Rambagh Palace, Darbhanga

Darbhnga is the seat of the Maharaja of Darbhanga.The Maharajas of Darbhanga have traditionally been very great patrons of art and literature.The estate was conferred upon by Emperor Akbar.There are a number of palaces built by successive Maharajas, important among them being Rambagh Palace, Nargauna Palace, Anandbagh Bhawan and Bela Palace. Situated in Darbhanga town the gate of Rambagh Palace is a massive structure which attracts persons coming to the town.

Annexure III : Various measures of fertility and mean age at marriage 1991 Census 750

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 & 2001 Census 751

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 & 2001 Census 754

Annexure VI : Marital status of population as per 1991 & 2001 Census 761

Annexure VII : Age, Sex and Education in the district, 1991 & 2001 Census 772

Annexure VIII : Distribution of different mother tongues returned in 2001 Census 779

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

Deputy Director of Census Operations,
Bihar, Patna

District Highlights – 2001 Census

1. Darbhanga ranks 7th in terms of population (32,95,789) and 23rd in terms of area (2279 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Darbhanga is the 3rd densely populated district in the state with 1,446 persons per sq.km as against the state's 881.
3. Darbhanga ranks 21st in terms of sex-ratio (914) against the state's 919.
4. There are 188 uninhabited villages (out of 1,271 total villages) in the district of Darbhanga.
5. Rarhi (under Jale C.D. Block) is the most populated village (34,130) and Az Rakbe Purkhotimpur (under Darbhanga C.D. Block) is the least populated village (7) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 70% of the total workers are engaged in Primary sector.
7. C.D. Block Bahadurpur has the highest number of villages (172) in the district and C.D. Block Kiratpur has the lowest number of villages (17).
8. Haridih (under Baheri C.D. Block) has the largest area (2,868 hectares) and Sherampur (under Benipur C.D. Block), Balia and Mathia urf Madhopur (under Bahadurpur C.D. Block) has the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 99.0 percent of the villages.
10. Darbhanga has attained fame as the "Makhana" producing district.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as

followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) mortality (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, based on 1991 and/or Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as area

possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Under the British, Darbhanga was a part of Sarkar Tirhut upto 1875 when it was constituted into a separate district. The subdivisions had been created earlier - Darbhanga Sadar in 1845, Madhubani in 1866 and Samastipur (then known as Tajpur) in 1867. Darbhanga district was a part of Patna division till 1908 when the Tirhut division was created with its headquarters at Muzaffarpur. As a result of reorganisation of districts in the State which took effect in the year 1972, Madhubani and Samastipur sub-divisions were upgraded as independent districts. Presently, there are three subdivisions, viz., Darbhanga Sadar, Benipur and Biraul consisting of 18 Development Blocks in the district.

The district is bounded on the north by Madhubani district, on the south by the district of Samastipur, on the east by Saharsa district and on the west by the districts of Muzaffarpur and Sitamarhi.

The district takes its name from its only town, Darbhanga - the district headquarters, which is said to have been founded by one Darbhangi Khan, about whom practically nothing is known. It is also held that the name Darbhanga has been derived from Dwar Banga or Dar-i-Banga meaning " the door to Bengal ". This derivation does not appear to be very correct as the division between Bengal and Bihar has always been much further to the east. However, the linguistic and cultural affinity with Bengal may be said to commence from here.

Early History

According to the District Gazetteer of Darbhanga, there are practically no prehistoric sites in the district though remains of the earliest aboriginal population can be seen in some parts of the district. Darbhanga lay on the great lines of Aryan immigration at a time when other parts of Bihar were outside the pale of Aryan influence. According to a legend, Darbhanga formed a part of the territory in which the Videhas settled on their migration from Punjab. They were guided to the east of the Gandak river by Agni, the God of fire, and told to settle there. Settlements were accordingly established and the kingdom of Videha founded. The kingdom included a greater portion of the modern district of Darbhanga. The kingdom, in course of time, came to be ruled by a successive line of kings commonly known as Janaks. Of them, Janak Siradhvaja was the father of Sita. Prominent among them were Yajnavalkya who codified the Hindu Law and Gautam (the husband of Ahilya) who has valuable philosophical treaties to his credit. King Janak himself was a great philosopher and his ideas have been eternally enshrined in the Upnishads.

In the course of time, the Videhan monarchy is believed to have been replaced by a Sangha or federation in the form of a republic. The establishment of the vrijjian republic (of which Videha was a part) marks the beginning of the historic period. The centre of power had, however, shifted to Vaishali and the Lichchhavis were the most prominent among the different clans that constituted the federation. The ascendancy of the Vrijjian republic was checked by Ajat-shatru, the Emperor of Magadh, who subdued and extended his control over north Bihar. This control, however, extended only to an acknowledgement of suzerainty; the small republics that had constituted the federation continued to flourish. In fact the continuous history of the Lichchhavis up to the Gupta period can be traced, with some certainty, presumably Darbhanga, like other parts of Bihar, passed through religious upheavals in the 6th century B.C. when Gautam Buddha and Mahavir Vardhamana expounded their doctrines. That the second Buddhist council took place at Vaishali (in the 4th century B.C.) indicates that Buddhism had entrenched itself in the area at that time.

The Sisunaga and Nanda empires included the Darbhanga district. Under the Mauryas, the administrative hold was further tightened and their rule was marked with stability and prosperity. Ashoka had visited Vaishali. The Sungas (who came to power in 185 B.C) and the Kanvas also held sway over the district. From the time of the Kushanas till the rise of Guptas, the history of the district remains more or less uneventful.

Matrimonial alliances with the Lichchhavis enabled the Guptas of Magadh to regain control over

north Bihar which came to be known as Tirabhukti. Vaishali was the administrative headquarters of the Tirabhukti region. The Chinese pilgrim, Fa-Hien visited north Bihar during the reign of Chandragupta II. He observed that Buddhism was no longer as flourishing as in the past. The earlier renown of Darbhanga as the place of philosophers continued in Gupta period as well. Kumarila Bhatt was a prominent philosopher. With the decline of the Gupta Empire, local autonomy reasserted itself. Later, Harashavardhana (606-648 A.D) annexed Darbhanga. Hiuen Tsang visited the area in 635 A.D. After the death of Harshavardhana, due to friction with a Chinese mission, Tirhut was invaded and occupied by the combined forces of Tibet and Nepal. They were, however, driven off by Adityasena (672 A.D.) After the fall of the later Guptas Yasovarman of Kannauj (700-740 A.D.) ruled over the area. Tirhut came under the Pala Kings of Bengal in the 9th century. The Karnata or Simraon dynasty was founded in 1097 by Nanyadeva who had to face conflict with the Senas of Bengal.

Medieval Period

Nanyadeva became very powerful and eventually succeeded in extending his domain over the whole of Mithila and Nepal. One of his sons ruled over Nepal while, Ganga Deva, reigned in Mithila. The latter is known to be the first ruler to have constituted fiscal divisions for revenue administration. His kingdom was divided into Parganas which in turn were split up into a number of panchayats. Ganga Deva is attributed to have built fortresses in the village Lahera Raja in Bahera police station. He is also said to have excavated two large tanks, known as Ganga Sagar near Darbhanga railway station. Narsingh Deva ascended the throne on the death of his father Ganga Deva. He quarrelled with his kingsman in Nepal as a result of which Mithila and Nepal were separated for ever. He was succeeded by his son Ram Singh Deva, who was a great scholar of Vedic literature and an able administrator. During his time several commentaries on the Vedas were compiled and a code of conduct was drawn up for the guidance of Hindus in their religious and social activities. Ram Singh Deva is credited with the introduction of the system of patwaris or village accountants for the maintenance of village records. Hara Singh Deva was the last ruler of the dynasty. He is known to have excavated several tanks in the district, and to have prepared records of the caste subdivisions of the Maithil Brahmins and the Karna Kayasthas. It was during his rule, that Tughlak Shah led a successful military expedition to Tirhut in 1329. The fort of Ram Singh Deva was besieged but he himself managed to escape to Nepal.

With the fall of the Simraon dynasty, Tirhut was annexed by the empire of Delhi. Different rulers, prominent among them being Kameshwar Thakur, Bhogiswar Thakur, Kirti singh and the most important of them Shiva Singh were made incharge of the territory. The tenure of the rulers depended on the pleasure of the "Emperor". The territory was brought under the direct administration of the Muslim Governors in 1532.

Though Darbhanga, along with other parts of north Bihar, was annexed to the Mughal Empire, the control was very loose and the local chiefs exercised great power. North Bihar had many Afghan settlers. Their number had increased owing to the large-scale immigration of those who had refused to serve the Mughals. They were turbulent, and when Daud Khan the Afghan king of Bengal, rose in revolt in 1574, he got a band of ready supporters in them. When the Mughal generals failed to control the rebellion. Emperor Akbar himself led a large army to crush the aspiration of Daud Khan. The Afghans were defeated and Bihar was lost to them. Akbar created a separate Subah of Bihar and placed it under Mughal Governor. Darbhanga thereafter remained a part of the Mughal Subah. There was no event of great significance during the next century and a half until the arrival of the Britishers in the country.

The decisive victory of the British in the battle of Buxar in 1764 gave them undisputed sway over the lower provinces of Bengal. As a consequence, Darbhanga along with other parts of Bihar, passed under the control of the British. The history of the district thereafter is merged with the history of the British rule in India.

After assuming control over the territory, the British took steps to consolidate their authority. Mithila, the enlightened home of Hindu culture and learning, had been ravaged by the Muslim and the Mughal armies from time to time. During the period of

transition from the old order to the rule of the East India Company, lawlessness increased. The British administrators took steps to establish law and order immediately and the responsibility devolved upon them. Besides the trouble-monger in Mithila, they had also to deal with the incursions of the Nepalese. The troubles with Nepal culminated in the Indo-Nepalese war. After having concluded peace with Nepal, the British administrators had a comparatively quiet time till the 1857 movement.

In 1857 patriotic fervour raged high in Darbhanga as in many other district of Bihar. The success of the rebel forces over Captain Dunbar at Dinapore gave great impetus to leaders of the freedom movement. The disillusioned zamindars were secretly supporting the cause. The Nepalese came to the aid to the British and with their support they succeeded in controlling the movement. Nothing very significant happened in the district during the next fifty years. Though the East India Company had succeeded in arresting the National Movement of 1857, the country's resolve to free itself from foreign domination continued. In the beginning the patriotic fervour found expression through the establishment of schools, and other social institutions. The Saraswati Academy was founded in 1901 at Darbhanga.

The call for non-co-operation found adequate response in the district of Darbhanga and many people volunteered to serve the cause championed by Mahatma Gandhi. Use of swadeshi goods was encouraged and Khadi became very popular, in August, 1926 a Khadi exhibition was **o**pened at Laheriasarai by Dr. Rajendra Prasad. Mahatma Gandhi also paid a visit to the district in connection with his mission to popularise Khadi.

Soon Darbhanga became the nerve-centre of political awakening. It played a very prominent role in the freedom movement and some of the most important leaders of Bihar during that time, such as Late Braj Kishore Prasad, Dharnidhar Prasad, etc. lived here. Though the popular agitation was suppressed at times, the movement continued and finally culminated in the independence of the country in 1947.

(iii) Administrative set up

The district forms a part of the north Bihar Plain and lies in the northern portion of the state of Bihar. It is bounded on the north by the district of Sitamarhi and Madhubani on the south by the district of Samastipur on the east by the districts of Saharsa and Supaul and on the west by the district of Muzaffarpur. There are 18 C.D. Blocks viz., Jale, Singhwara, Keotiranway, Darbhanga, Manigachhi, Tardih, Alinagar, Benipur, Bahadurpur, Hanumannagar, Hayaghat, Baheri, Biraul, Ghanshyampur, Kiratpur, Gora Bauram, kusheswar Asthan and Kusheswar Asthan Purbi in the district of Darbhanga.There are three sub-divisions i.e. Darbhanga Sadar, Benipur and Biraul in the district. Darbhanga (MC) is the only town in the district. There are altogether 1271 villages in the district.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He often belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has three subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are eighteen C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration : The Judges and Munshif magistrates are posted at district and sub-divisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Darbhanga is the head of the district police administration who is either from the Indian Police Service or the Bihar Police Service. In the subdivisions of the district, the Deputy Superintendents of Police are posted who keep control on police administration.

(iv)Physical Features

The district may be divided into two sub-micro regions, namely Darbhanga Plain-West and Darbhanga Plain-East on the basis of relief, drainage, soil, rainfall, geology and natural vegetation. Darbhanga Plain-West comprises of the entire areas

of the Jale, Singhwara, Hayaghat, Baheri, Bahadurpur, Keotiranway and parts of Darbhanga and Biraul C.D. Blocks. The Kamla and Karai rivers flow from north to south in the region. It is a plain having gentle slope from north to south. The height of the region varies from 51 m in the north to 43 m in the south from mean sea level. The average annual rainfall is 1,052.8 mm. The geology is related to alluvium and its soils are Fluvents-Orthents, Orthents-Aquepts-Ochrepts, Orthents-Ochrepts and Ochrepts-Aquepts. Some marshy and shampy tracts are located in the southern part of the Darbhanga town. Paddy, Wheat, Millets, Sugarcane and Pulses are the main crops grown here. Darbhanga Plain-East comprises of the entire areas of Manigachhi, Benipur, Ghanshyampur and Kusheshwar Asthan and parts of Biraul and Darbhanga C.D. Blocks. The entire region is a plain one having a gentle slope from north-west to south-east. It is narrow in the south. The river Kamla flows from north to south provides water for irrigation. The height varies from 47 metres in the west to 40 metres in the south above the mean sea level. Average annual rainfall is 1,052.8 mm. The geology is related to Alluvium. Soils are comprised of Orthents-Ochrepts, Orthents-Aquepts-Ochrepts and Ochrepts-Aquepts. Paddy, wheat, millets, sugarcane and pulses are the main crops of the area.

The total area of the district is 2,279.00 sq. kms. It covers 2.42 % of the total areas of the state of Bihar and ranks 16 on the ladder of districts of Bihar in respect of areas. The district lies between 25^0 42" and 26^0 24" north latitude and 85^0 4" and 86^0 23" east longitude

Climatic Conditions

There are three well marked seasons, the cold, the hot and the rainy seasons. The cold weather begins in November and continues upto February, though March is also somewhat cool. Westerly winds and dust storms begin to blow in the second half of March and the temperature rises considerably. May is the hottest month when the temperature goes up to 42° C. Rains set in towards the middle of June. The rains continue till the end of September or middle of October. With the cessation of rains the temperature falls and the climate becomes rather pleasant.

The average normal rainfall of the district is 1,052.8 mm. As has been said earlier the rains usually start in the middle of June. The maximum rainfall occurs between the second half of July and the first half of August. The district also gets some winter rain.

Flora and Fauna

The land in Darbhanga is generally very fertile and there are hardly any uncultivated areas. The district is, therefore, devoid of any forests. Among the trees found in the district are Sisu, Khair, Palmyra and Khajur. Mango, jack-fruit, Pipal and tamarind are found near village settlements. The district also has some tracts of grass lands.

Wild animals existed in the district up to the end 0f the l8th century. But with the progressive use of land and rapid growth of population, the forest areas were cleared and the wild animals became almost extinct. Wolves and Hyenas are rare, while jackals are common. Fox and wildcat are also met with occasionally.

Among the birds found in the district are various kinds of quails, partridges and ducks, Snipes, cranes, storks and sparrows are commonly seen. Fish are plenty. The common varieties are Rohu, Bachwa, Tangra, Katla, Singhi and Boari. Hilsa is found only occasionally.

Mines and Minerals

The district is formed of thick alluvial soil. Beds of Kankar or nodular limestone of inferior quality are occasionally found. The riverbanks are generally made up of new alluvial soil formed by continuous deposit of silt by the rivers. Saltpetre is the only mineral found in the district.

Land use Pattern

The district is basically agricultural in character. The soil of the district is highly calcareous. It is mixture of clay and sand in varying proportions. In the low-lying central area, bangar soil is found. It is a mixture of clay and sand in almost equal proportions. This soil too is suitable for the cultivation of rice and rabi crops.

Rice is the main crop of the district. Maize, wheat and sugar cane are the other important crops grown in the district. Makhana grows in tanks and shallow

pools of waters in the district. It is a unique product of Darbhanga district and is exported to different places in the country.

Of the total area of the district, about 80 per cent area is cultivable and the rest are utilized for non-agricultural purposes. Improved methods of cultivation have been introduced by adopting better agricultural implements, certified seeds and chemicals. Government has taken a number of measures to train the farmers and supply to them the requisite seeds and fertilizers at the village level itself. Financial assistance as well as loans to needy farmers have also been made available through the State Government agencies and the nationalised banks including the Gramin Banks.

Irrigational facilities

Artificial irrigation, although important, has played a comparatively minor part in the agricultural economy of the district. The district of Darbhanga like the rest of other districts of North Bihar, is dependent for its crops on the local rainfall. Irrigation in Darbhanga is linked up with flood control measures and drainage schemes. After independence, considerable attention was paid to the provision of flood control measures and irrigational facilities in the district, principal among them being the Kosi Embankment and the Kosi Canal. Thereafter, a number of other schemes were also taken up during the different plan periods. Besides these, several Minor Irrigation schemes were executed for expansion of irrigational facilities in the district.

Fisheries

Fish is a favourite item of food for the people of Darbhanga. Fish and rice are very popular in the district as the staple diet. Most of the rivers, tanks, Jhils and low .water-logged areas abound in fish and this district is one of the principal fish producing centres in Bihar. Fisheries Department of the State Government looks after the development of pisci-culture.

Industrialisation

The old time industry which is still continuing in the district is the manufacture of sugar. Sugar industry has not only survived but has become one of the important industries in the district and consumes the large out turn of sugar cane within the district and also draws supplies from beyond the district.

The manufacture of cotton fabrics of various types is still continuing and quite a good quantity of Darbhahga handloom fabrics goes out of the district. Similarly some other cottage industries such as the manufacture of pottery, mats, baskets, brass utensils, blanket weaving, making of shoes and lac bangles have received encouragement from the Government and the public in recent years.

Livestock

Livestock is very important in a district like Darbhanga with a predominently agricultural economy. Buffaloes are reared in large number, and the district has long been noted for its breed. They are chiefly valuable for the milk they yield in large quantity. Besides, bullocks of Bachaur breed are also reared extensively. These are also sent to the cattle fairs at Sonepur and Sitamarhi. However, all parts of the district are not so well-Stocked with cattle as the low-lying areas are always liable to inundation, from which the cattle always suffer very severely. It is difficult to rear good quality of sheep for want of adequate pasturage. Goats of common variety are found in every village. Goat-milk is, however, not popular in the district.

In order to protect the livestock from various diseases and epidemics and also to improve the breed, the Animal Husbandry Deptt. of the State Government has adopted some very useful and concrete measures. It has established veterinary hospitals, sub-centres, artificial insemination centres, poultry farms etc., all over the district covering majority of villages. Poultry development has received considerable attention to various Community Development Blocks.

Communication

The district of Darbhanga has a well-knit communication system. It is served by the North Eastern Railway, has a sound system of roadways and considerable boat traffic in the bigger rivers. The railways and the roadways have now become more important trade routes than the waterways. There has been considerable expansion and development of roadways since independence and the public and private carriers and long distance passenger buses

have become a rival of the railways.

From Samastipur, a rail line runs to Darbhanga from where it branches off in two directions. One branch goes to the north west through Kamtaul and Jogiara in the district to Sitamarhi and one to Raxaul. The second branch goes to Sakri in the east from where it bifurcates, one going from Sakri to Jainagar via Madhubani and the other to Nirmali in Saharsa, through Jhanjharpur and Phulparas.

The district has a good number of roads haIf of which are black-topped including the State Highways. These are managed by the Public Works Department. In addition, village roads providing communications, with sugar factories etc., have also been constructed. The District Board and the Municipal Corporation manage various other less important roads. There are frequent bus services on the roads.

Country boats ply on the Bagmati river throughout the year and on the Kamla during the rainy season. Cargoes of various commodities are transported by river.

The district has a landing ground. However, there is no regular air service in the district.

Trade and Commerce

The development of the means of communication has had a great impact on the trade and commerce of the district. The district may now be said to be fairly well- connected by rail, road and waterways.

In the district the trade consists mainly of exporting rice, fruits, vegetables, pulses, mustard seed, ghee, linseed etc., and importing food grains, timber, coal, salt, kerosene oil, textile goods and other consumer goods. From the earliest time Darbhanga has had a brisk trade with Nepal.

Darbhanga is a very important trade centre mainly in agricultural cash crops. Wholesale trading in grains is carried on at Darbhanga bazaar, the chief centre of the wholesale business in the district. This trading centre has also developed a grain mandi. The retail shops of almost all the commodities consumed locally are found at Darbhanga and Laheriasarai.

Electricity and Power

The district receives its entire power supply from the Barauni Thermal Power Plant of the Bihar State Electricity Board.

After independence, the Government has been paying full attention to rural electrification and a large number of villages has been electrified. Domestic and commercial use account for the major quantity of the power consumption in urban areas while in the rural areas the main consumption of electrical power is for agricultural purposes.

Social and cultural and administrative development

Kusheshwar Asthan C. D. Block was earlier a part of the old Samastipur subdivision and became a part of Samastipur district after reorganisation. However, after some time the State Government decided to transfer this C. D. Block from Samastipur District to Darbhanga District on administrative considerations.

Fairs and festivals are held regularly in the district by different communities in complete harmony.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt

bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which

buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the

entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member

households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar

23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption

are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewerage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending

short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness

or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Darbhanga district during 1991 was 2,510,959 Hindus constitute over 77.9 per cent (1,955,068persons) of the population in the district followed by Muslims 22.1 percent (5,55,429 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Darbhanga district during 1991 was 2,510,959. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Darbhanga district, Hindi, the main mother tongue of the district was returned by 79.7 percent (2,002,335 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Darbhanga district, was 20.1 percent (5,05,196 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Darbhanga during 1991 census.

The population of the Scheduled Caste in the district of Darbhanga during 1991 census was 365,542. Numerically five important SCs were namely, (I) Dusadh/Dhari, (ii) Chamar/Mochi, (iii) Musahar (iv) Pasi and (v) Bantar. The population of Dusadh/Dhari was 142,551 which constituted 39.0 percent of the scheduled castes population. The population of Chamar/Mochi was 84,269 which constituted 23.1 percent of the scheduled castes population. Musahar had 68,217 population which constituted 18.7 percent of the scheduled castes population.

Pasi had 16,858 population while Bantar had 15,033 population. Pasi constituted 4.6 percent while Bantar 4.1 percent of the scheduled castes population.

The population of the scheduled Tribes in the district of Darbhanga during 1991 census was 259. Numerically five important STs were namely (i) Oraon, (ii) Santal, (iii) Ho, (iv) Munda and (v) Kharwar. Oraon had 81 population which constituted 31.3 percent of the Scheduled Tribes population. Santal had 43 population which constituted 16.6 percent of the Scheduled Tribes population. Ho had 41 population which constituted 15.8 percent of the Scheduled Tribes population. Munda had 32 population while Kharwar had 29 population. Munda constituted 12.4 percent while Kharwar constituted 11.2 percent of the Scheduled Tribes population.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Darbhanga district is 32,95,789 comprising 17,22,189 Males and 15,73,600 Females and constituting 2.4 percent of the State population spread over 4.0 percent of the area of the State in the 18 C.D.Blocks of the district. Keotiranway is the most populous where as Kiratpur is the least populated C.D.

Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
number	C.D. Block	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Jale	180,934	180,934	0	234,407	234,407	0	29.6	29.6	0.0	0.0	0.0
2	Singhwara	179,955	179,955	0	236,055	236,055	0	31.2	31.2	0.0	0.0	0.0

Table-1 shows rise in the population of this district during 1991-2001 decade has been of the order of 31.3 percent. The rural population in the district has increased by 32.1 percent while the urban population growth over the decade has been of the order of 22.4 percent. Among the C.D. Blocks, Kusheshwar Asthan Purbi has shown the highest increase in population over the decade with 48.1 percent. The next highest increase in population is observed in Gora Bauram C.D. Block with 40.6 percent followed by Kiratpur C.D. Block with 39.9 percent. Percentage decadal variation has been observed to be the least in the case of Manigachhi with 21.7 percent. The next lowest increase in population is observed in Tardih with 22.1 percent.

18	Kusheshwar Asthan Purbi	12 (34.3)	19,290	17,501	2 (5.7)	8,539	7,744	2 (5.7)	13,312	12,020
	District (Rural)									
	Total:	**340 (31.4)**	**565,316**	**517,599**	**106 (9.8)**	**381,762**	**351,927**	**45 (4.2)**	**343,373**	**15,329**

It may be observed in the Table 2 that the maximum number of villages lie in the population range of 2000-4999 accounting for 31.4 percent of the total inhabited villages closely followed by villages in the population range of 1000-1999 accounting for 24.2 percent of the total inhabited villages. The percentages of in the above two population ranges are 35.76 percent 12.61 percent of the total rural population of the district respectively. The villages in the population range of 500-999 constitute 15.6 percent of the total inhabited villages and in these villages the percentage of population is only 4.26 percent. There are 106 villages in the population range of 5,000-9,999 accounting for 9.8 percent of the total inhabited villages and in these villages the percentage of population is 24.23 percent of the total rural population. There are 101 villages in the population range of 200-499 accounting for 9.3 percent of the total inhabited villages and in these villages the percentage of population is only 1.19 percent of the total rural population. There are 60 villages in the population range of less than 200 accounting for 5.5 percent of the total inhabited villages and in these villages the percentage of population is 0.20 percent. There are 45 villages in the highest population range of 10,000 and above accounting for 4.2 percent of the total inhabited villages and in these villages the percentage of population 21.75 percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicale in respect of Darbhanga district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.2	6,721	0.2
11-20	2	0.2	137	0.0
21-50	2	0.2	40	0.0
51-100	10	0.9	507	0.0
101-200	13	1.2	4,372	0.1
201-300	14	1.3	10,833	0.4
301-500	56	5.2	50,794	1.7
501 +	981	90.6	2,936,531	97.0
Not known	3	0.3	18,506	0.6
District Total:	**1,083**	**100.0**	**3,028,441**	**100.0**
Population Density (Rural) of the district:			**1252**	

The data presented in the above table highlight the fact that maximum proportion of villages in Darbhanga district lies in the density range (person per square kilometre) of 501+ with 90.6 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 5.2 percent. It would further be seen that a small number of villages fall in the density ranges of 0-10, 11-20 and 21-50 which account for 0.2 percent (in each density ranges) of the total inhabited villages.

The above table further reveals that the maximum villages which fall in the density range of 501+ cover 97.0 percent of the population followed by villages in the density range of 301-500 which account for 1.7 percent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1061	1064	1003	1056	1060	1013
1911	1051	1056	942	1074	1079	1003
1921	1020	1027	886	1051	1055	987
1931	995	1005	820	1015	1025	880
1941	1002	1012	842	1036	1051	844
1951	1000	1010	859	1062	1074	913
1961	1005	1020	832	1086	1107	870
1971	957	968	833	990	1004	846
1981	948	959	852	979	990	872
1991	907	913	857	911	915	868
2001	919	926	868	914	917	878

Note: Sex ratio has been defined here as the number of females per 1000 males.

The sex ratio for the rural areas of Darbhanga district was comparatively high as compared to the rural areas of the state from 1911 census to 1991 census. However, on the other hand, the sex ratio for the rural areas of the state was comparatively high as compared to the rural areas of Darbhanga

district in 1901 and 2001 censuses. It shows that the sex ratio for the rural areas of the state is comparatively high as compared to the rural areas of Darbhanga district after 100 years. The sex ratio for the urban areas of Darbhanga district was comparatively high as compared to the urban areas of the state till 2001 census

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio		
		Total	Rural	Urban

16	Gora Bauram	919	919	
17	Kusheshwar Asthan	934	934	
18	Kusheshwar Asthan Purbi	907	907	
	District Total:	**914**	**917**	**878**

In Darbhanga district as a whole there are 914 females for every thousand males.

Within the district, the sex ratio varies from 941 in Tardih C.D. Block to 889 in Darbhanga C.D. Block. The sex ratio of Kusheshwar Asthan is 934 while the sex ratio of Ghanshyampur C.D. Block is 931. The sex ratio figures for rural and urban areas of Darbhanga district are 917 and 878 respectively.

The urban sex ratio of the district is 878 which is lower than the total and rural averages of the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio
1	2	3
1	Jale	915
2	Singhwara	917
3	Keotiranway	920
4	Darbhanga	903
5	Manigachhi	938
6	Tardih	941
7	Alinagar	930
8	Benipur	929
9	Bahadurpur	895
10	Hanumannagar	903
11	Hayaghat	903
12	Baheri	914
13	Biraul	911
14	Ghanshyampur	931
15	Kiratpur	928
16	Gora Bauram	919
17	Kusheshwar Asthan	934
18	Kusheshwar Asthan Purbi	907
	District (Rural) Total:	**917**

As for rural areas in Darbhanga district there are 917females for every thousand males.Within the district, the sex ratio varies from 941 in Tardih C.D. Block to 895 in Bahadurpur C.D. Block. The sex ratios of Jale, Darbhanga, Bahadurpur, Hanumannagar, Hayaghat, Baheri, Biraul and Kusheshwar Asthan Purbi are lower than the district rural average of 917.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	6	0.6	596	0.0

900-949	378	34.9	1,489,918	49.2
950-999	170	15.7	435,918	14.4
1000-1099	74	6.8	121,709	4.0
1100+	30	2.8	11,997	0.4
District Total:	**1,083**	**100.0**	**3,028,441**	**100.0**
Sex ratio (Rural) for District:		**917**		

It is observed from the above table that the maximum proportion of villages in Darbhanga district lies in the sex ratio range of 900-949 and these villages account for 34.9 percent of the total inhabited villages of the district. It further reveals that these villages which fall in this sex ratio range account for 49.2 percent of the district rural population. 298 villages (27.5 percent) fall in the sex ratio range of 850-899 and these villages account for 26.9 percent of the rural population of the district. 170 villages (15.7 percent) are in the sex ratio range of 950-999 and these villages account for 14.4 percent of the district rural population. 99 villages (9.1 percent) are in the sex ratio range of 800-849 and these villages account for 4.5 percent of the rural population. 74 villages (6.8 percent) fall in the favourable sex ratio range of 1000-1099 and these villages account for 4.0 percent of the rural population. 30 villages (2.8 percent) are in the very favourable sex ratio range of 1100+ and these villages account for only 0.4 percent of the rural population. Only 6 villages (0.6 percent) are in the lowest sex ratio range of less than 700 which account for zero percent of the rural population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Sex ratio
1	2	3	4
1	Darbhanga	M.Corp	878
	Sex ratio (Urban) for the district:		**878**

There is no urban agglomeration in Darbhanga district. Darbhanga (M.Corp.) is the only statutory town in the district. The sex ratio in Darbhanga (M. Corp.) is 878.

12	Baheri	56,078	29,186	26,892	921
13	Biraul	47,245	24,429	22,816	934
14	Ghanshyampur	20,556	10,682	9,874	924
15	Kiratpur	14,290	7,426	6,864	924
16	Gora Bauram	25,595	13,135	12,460	949
17	Kusheshwar Asthan	28,670	14,686	13,984	952
18	Kusheshwar Asthan Purbi	22,060	11,359	10,701	942
	District (Rural) Total:	**620,403**	**324,015**	**296,388**	**915**

It is observed from the above tables 10 & 11 that the sex ratio in the age group 0-6 varies from 952 in Kusheshwar Asthan C.D. Block to 873 in Keotiranway C.D. Block. The sex ratio in the age group 0-6 of Gora Bauram is 949 while the sex ratio of Kusheshwar Asthan purbi is 942. The sex ratio figures in the age group 0-6 of Keotiranway, Darbhanga, Bahardurpur, Hanumannagar and Hayaghat C.D. Blocks are lower than the district total and rural averages. The urban sex ratio of Darbhanga district is lower than the total and rural sex ratio of the district.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	60	5.5	7,796	1.3
700-749	42	3.9	11,664	1.9
750-799	66	6.1	25,476	4.1
800-849	121	11.2	64,033	10.3
850-899	192	17.7	134,765	21.7
900-949	204	18.8	178,545	28.8
950-999	147	13.6	113,771	18.3
1000-1099	146	13.5	67,229	10.8
1100+	105	9.7	17,124	2.8
District (Rural) Total	**1,083**	**100.0**	**620,403**	**100.0**
Sex ratio (Rural) for District:		**915**		

It is observed from the above table that the maximum proportion of villages in Darbhanga district lies in the sex ratio range of 900-949 for the age group 0-6 and these villages (18.8 percent) account for 28.8 percent of the rural population of the district. 192 villages (17.7 percent) fall in the sex ratio range of 850-899 and these villages account for 21.7 percent of the rural population of the district. 147 villages (13.6 percent) are in the sex ratio range of 950-999 and these villages account for 18.3 percent of the rural population of the district. 146 villages (13.5 percent) are in the favourable sex ratio range of 1000-1099 and these villages account for 10.8 percent of the rural population. 105 villages (9.7 percent) are in the very favourable sex ratio range of 1100 and above and these villages account for 2.8 percent of the rural population. 121 villages (11.2 percent) are in the sex ratio range of 800-849 and these villages account for 10.3 percent of the rural population. 66 villages (6.1 percent) are in the sex ratio range of 750-799 and these villages account for 4.1 percent of the rural population. 60 villages (5.5 percent) are in lowest sex ratio range of less than 700 and these villages account for only 1.3 percent of the rural population.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

18	Kusheshwar Asthan Purbi	99,000	25,981	112	26.2	0.1
	District (Rural) Total:	**3,028,441**	**482,915**	**575**	**15.9**	**0.0**

The above tables 14 & 15 indicate that the percentage of Scheduled Castes in Darbhanga district is of the order of 15.5 percent of the total population. The highest percentage of Scheduled Castes population is contained in Kusheshwar Asthan Puri C.D. Block with 26.2 percent of the total population closely followed by Bahadurpur, Kusheshwar Asthan, Kiratpur, Hanumannagar and Hayaghat C.D. Blocks with 21.1, 20.6, 20.5, 18.7 and 18.4 percent respectively.

The percentage of Scheduled Castes population in the district of Darbhanga for the rural areas is 15.9 percent which is higher than the urban areas (10.6 percent). The percentage of Scheduled Tribes population in Darbhabga district is almost negligible (zero percent) as has been observed in the above table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	130	12.0	0	0.0
Less than 5	88	8.1	6,675	1.4
5-10	201	18.6	67,257	13.9
11-20	329	30.4	208,871	43.3
21-30	156	14.4	98,388	20.4
31-40	85	7.8	58,966	12.2
41-50	20	1.8	10,106	2.1

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001 (*Concld.*)

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
51-75	41	3.8	20,195	4.2
76 and above	33	3.0	12,457	2.6
District Total	**1,083**	**100.0**	**482,915**	**100.0**

From the above table, it is apparent that there are 329 villages i.e. accounting for 30.4 percent of the inhabited villages on the district where the population of the Scheduled Castes ranges between 11 and 20 percent of total population. This is the largest group of villages in the district. This is closely followed by villages where the population of the Scheduled Castes ranges between 5 and 10 percent of the total population and these villages which number 201 account for 18.6 percent of the total inhabited villages. There are 156 villages accounting for 14.4 percent of the inhabited villages, where the percentage of Scheduled Castes population to total population is between 21 and 30. There are 85 villages accounting for 7.8 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is between 31 and 40. There are 41 villages accounting for 3.8 percent of the inhabited villages where the percentage of Scheduled Castes population is between 51 and 75. There are 33 villages accounting for 3.0 percent of the inhabited villages where the percentage of Scheduled Castes population is between 76 and above. 12.0 percent of the villages are such which do not have any Scheduled Castes population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

76 and above	0	0.0	0	0.0
District Total	**1,083**	**100.0**	**575**	**100.0**

It can be seen from the above table that there are 39 villages accounting for 3.6 percent of the inhabited village, where the percentage of Scheduled Tribes population to total population is less than 5. There are only 2 villages accounting for only 0.2 percent of the inhabited village, where the percentage of Scheduled Tribes population to total population is between 5 and 10. There are as many as 1042 villages accounting for 96.2 percent of the inhabited villages in the district which have no Scheduled Tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Darbhanga (M.Corp.)	267,348	28,210	266	10.6	0.1
	District(Urban) Total	**267,348**	**28,210**	**266**	**10.6**	**0.1**

It is apparent from the above table that there is no urban agglomeration in Darbhanga district. There is only one statutory town in the district i.e., Darbhanga(M.Corp.). The percentage of Scheduled Castes population to total population is 10.6 in Darbhanga (M. Corp.) while the percentage of Scheduled Tribes population to total population is 0.1, as has been observed in the above table.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Jale	908	923
2	Singhwara	915	1,500
3	Keotiranway	916	500
4	Darbhanga	916	400
5	Manigachhi	928	1,069
6	Tardih	909	0
7	Alinagar	915	0
8	Benipur	938	1,000
9	Bahadurpur	913	780
10	Hanumannagar	920	1,000
11	Hayaghat	886	1,000
12	Baheri	922	1,087
13	Biraul	926	1,462
14	Ghanshyampur	938	0
15	Kiratpur	929	0
16	Gora Bauram	918	0
17	Kusheshwar Asthan	962	0
18	Kusheshwar Asthan Purbi	927	534
	District (Rural) Total	**922**	**867**

It is observed from the table 19 that the sex ratio of Scheduled Castes varies from 962 in Kusheshwar Asthan C.D. Block to 886 in Hayaghat C.D. Block. The sex ratio in Benipur and Ghanshyampur C.D. Blocks are 938 while the sex ratio in Kiratpur is 929. The sex ratio figures of Manigachhi and Kusheshwar Asthan Purbi C.D. Blocks are 928 and 927 respectively. The sex ratio figures of Jale, Singhwara, Keotiranway, Hayaghat and Gora Bauram C.D. Blocks are lower than the district average of 922.

The sex ratio of Scheduled Tribes varies from 1500 in Singhwara C.D. Block to 400 in Darbhanga C.D. Block. The sex ratio figures of Biraul, Baheri and Manigachhi C.D. Blocks are 1462,1087 and 1069 respectively. The sex ratio figures of Keotiranway (500), Darbhanaga(400), Bahadurpur(780) and Kusheshwar Asthan Purbi(534) C.D. Blocks are lower than the district average(867).

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Darbhanga (M.Corp.)	891	673
Sex ratio (Urban) for the district:		**891**	**673**

There is no urban agglomeration in Darbhanga district. Darbhanga (M.Corp.) is the only statutory town in the district. The sex ratio of Scheduled Castes in Darbhanga (M. Corp.) is 891 while the sex ratio of Scheduled Tribes is 673.

District (Rural) Total:		**998,679**	**680,596**	**318,083**	**2,029,762**	**899,216**	**1,130,546**	**41.5**	**54.2**	**27.6**	**26.6**

Table 21 shows that among C.D. Blocks, Darbhanga has the highest proportion of literate population (59.9%) followed by Hayaghat (46.1%), Keotiranway (46.1%) and Bahadurpur (45.2%). The literacy rates for Jale, Benipur, Singhwara and Manigachhi C.D. Blocks are 44.7, 44.7, 44.7 and 44.6 percent respectively.

The literacy rates for Tardih, Alinagar, Hanumannagar, Baheri, Biraual, Ghanshyampur, Kiratpur, Gora Bauram, Kusheshwar Asthan and Kusheshwar Asthan Purbi C.D. Blocks are lower than the district average. Male literates greatly outnumber female literates in all the C.D. Blocks of Darbhanga district. The highest proportion of male literates is contained in Darbhanga C.D. Block with 69.8 percent followed by Keotiranway, Bahardurpur, Hayaghat and Manigachhi with 58.2, 58.1, 58 and 57.8 percent respectively. Darbhanga C.D. Block has the highest female literacy rate with 48.8 percent followed by Jale, Keotiranway, Singhwara and Hayaghat with 33.8, 33.2, 32.9 and 32.9 percent respectively.

Table 22 deals with the same topic as Table 21, the only difference being that it deals with the rural areas of the district and its C.D. Blocks.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.2	147	0.0
1-10	29	2.7	8,420	0.3
11-20	72	6.6	66,183	2.2
21-30	190	17.5	381,407	12.6
31-40	286	26.4	938,668	31.0
41-50	274	25.3	1,096,897	36.2
51-60	152	14.0	408,535	13.5
61-70	56	5.2	109,963	3.6
71-80	14	1.3	17,650	0.6
81-90	6	0.6	487	0.0
91-99	2	0.2	84	0.0
100	0	0.0	0	0.0
District Total:	**1,083**	**100.0**	**3,028,441**	**100.0**
Literacy rate for District:		**44.3**		

From the above table, it is apparent that there are 286 villages accounting for 26.4 percent of the inhabited villages in the district where literacy rate for villages ranges between 31 and 40 percent and these villages account for 31.0 percent of the district rural population. This is the largest group of villages in the district. This is closely followed by 274 villages accounting for 25.3 percent of the inhabited villages where literacy rate ranges between 41 and 50 percent and these villages account for 36.2 percent of the rural population. There are 190 villages accounting for 17.5 percent of the inhabited village, where literacy rate ranges between 21 and 30 percent and these villages account for 12.6 percent of the population. There are 152 villages accounting for 14.0 percent of the inhabited villages where literacy rate ranges between 51 and 60 percent and these villages account for 13.5 percent of the population. There are 56 villages accounting for 5.2 percent of the inhabited village, where literacy rate ranges between 61 and 70 percent and these villages account for 3.6 percent of the population. There are 72 villages accounting for 6.6 percent of the inhabited village, where literacy rate ranges between 11 and 20 percent and these villages account for 2.2 percent of the population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

	District (Rural) Total:	**84,413**	**64,863**	**19,550**	**398,502**	**186,458**	**212,044**	**22.6**	**33.3**	**11.0**	**22.3**

The table above shows that literacy rate among the scheduled castes is highest i.e. 32 percent in Bahadurpur C.D. Block whereas it is lowest i.e. 15 percent in Ghanshyampur C.D. Block in the district. It is observed that the literacy rate among the Scheduled Castes for the district is 22.6 percent. As regards percentage of male literacy rate among the Scheduled Castes it is highest i.e. 44.7 percent in Bahadurpur C.D. Block whereas it is lowest i.e. 23.7 percent in Ghanshyampur C.D. Block. In case of female literacy rate among the Scheduled Castes also it is highest i.e. 18.1 percent in Bahadurpur C.D. Block and the lowest i.e. 5.7 percent in Ghanshyampur C.D. Block. It is found that the gap between male and female literacy rate is highest i.e. 26.6 percent in Bahadurpur C.D. Block where as it is lowest i.e. 18 percent in Ghanshyampur C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	21	2.2	1,076	0.2
1-10	132	13.9	48,737	10.1
11-20	313	32.8	186,804	38.7
21-30	257	27.0	162,522	33.7
31-40	121	12.7	51,061	10.6
41-50	64	6.7	18,486	3.8
51-60	31	3.3	11,069	2.3
61-70	9	0.9	3,023	0.6
71-80	4	0.4	115	0.0
81-90	1	0.1	22	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**953**	**100.0**	**482,915**	**100.0**
Literacy rate for District (Rural):		**22.6**		

The above table shows that in case of literacy among the scheduled castes in the villages of the district the highest number of villages i.e. 32.8 percent fall in the literacy range of 11-20 percent whereas the lowest number of villages i.e. 0.1 percent fall in the literacy range of 81-90 percent. It is observed that of the total villages in the district 27.0 percent villages are such which fall in the literacy range of 21-30 percent followed by 12.7 percent villages which fall in the literacy range of 31-40 percent. There are 0.4 percent villages which fall in the literacy range of 71-80 percent in the case of literacy among the scheduled castes in the villages of the district.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Darbhanga (M.Corp.)	13,329	8,714	4,615	14,881	6,201	8,680	57.7	71.0	42.7	28.3
	Darbhanga (Urban)	**13,329**	**8,714**	**4,615**	**14,881**	**6,201**	**8,680**	**57.7**	**71.0**	**42.7**	**28.3**

The table above shows that the literacy rate among the scheduled castes in the urban areas of the district is as high as 57.7 percent in case of total population, 71.0 percent in case of males and 42.7 percent in case of females as compared to 47.0 percent in case of total population, 59.7 percent in case of males and 33.1 percent in case of females in the state of Bihar and 44.3 percent in case of total population, 56.7 percent in case of males and 30.8 percent in case of females in the district of Darbhanga.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Jale	11	7	4	14	6	8	47.8	58.3	36.4	22.0
2	Singhwara	4	2	2	6	2	4	50.0	66.7	40.0	26.7

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
3	Keotiranway	2	2	0	7	4	3	40.0	66.7	0.0	66.7
4	Darbhanga	4	3	1	10	7	3	44.4	60.0	25.0	35.0
5	Manigachhi	6	4	2	114	54	60	6.7	8.5	4.7	3.9
6	Benipur	17	11	6	35	15	20	40.5	61.1	25.0	36.1
7	Bahadurpur	49	34	15	40	16	24	70.0	82.9	51.7	31.2
8	Hanumannagar	1	1	0	11	5	6	14.3	25.0	0.0	25.0
9	Hayaghat	32	17	15	20	9	11	74.4	73.9	75.0	-1.1
10	Baheri	3	2	1	45	21	24	7.9	10.5	5.3	5.3
11	Biraul	1	1	0	31	12	19	5.0	12.5	0.0	12.5
12	Kusheshwar Asthan Purbi	6	4	2	106	69	37	7.0	7.3	6.5	0.8
	District (Rural) Total:	**136**	**88**	**48**	**439**	**220**	**219**	**30.8**	**37**	**23.6**	**13.3**

The table 28 shows that among the scheduled tribes the percentage of literates is highest i.e. 74.4 percent in Hayaghat C.D. Block whereas it is lowest i.e. 5.0 percent in Biraul C.D. Block in the district. It is observed that the literacy rate among scheduled tribes for the district is 30.8 percent only. As regards percentage of male literacy rate among the scheduled tribes it is highest i.e. 82.9 percent in Bahadurpur C.D. Block whereas it is lowest i.e. 7.3 percent in Kusheshwar Asthan purbi C.D. Block. In case of female literacy rate among the scheduled tribes it is highest i.e. 75.0 percent in Hayaghat C.D. Block where as it is lowest i.e. 4.7 percent in Manigachhi C.D. Block. Such higher percentage in literacy rate among the scheduled tribes population is because of very thin tribal population in the district.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	16	39.0	135	23.5
1-10	3	7.3	189	32.9
11-20	1	2.4	31	5.4
21-30	1	2.4	4	0.7
31-40	3	7.3	25	4.3
41-50	3	7.3	35	6.1
51-60	1	2.4	46	8.0
61-70	1	2.4	7	1.2
71-80	1	2.4	16	2.8
81-90	0	0.0	0	0.0
91-99	2	4.9	52	9.0
100	9	22.0	35	6.1
District Total:	**41**	**100.0**	**575**	**100.0**
Literacy rate for District (Rural):		**30.8**		

The table 29 shows that in case of literacy among the scheduled tribes in the villages of the district the highest number of villages i.e. 39.0 percent fall in the no literacy range of zero percent where as the lowest number of villages i.e. 2.4 percent each fall in the literacy ranges, 11-20, 21-30, 51-60, 61-70 and 71-80 percent. It is observed that of the total villages in the district 22.0 percent villages are such which fall in the highest literacy range of 100 percent. There are 7.3 percent villages which fall in the literacy range, i.e. 31-40 and 41-50 percent followed by 4.9 percent villages which fall in the literacy range of 91-99 percent in the case of literacy among the scheduled tribes in the villages of the district.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Darbhanga (M.Corp.)	194	130	64	72	29	43	86.2	94.9	72.7	22.2
	Darbhanga (Urban)	**194**	**130**	**64**	**72**	**29**	**43**	**86.2**	**94.9**	**72.7**	**22.2**

The table above shows that the literacy rate among the scheduled tribes in the urban areas of the district is as high as 86.2 percent in case of total population, 94.9 percent in case of males and 72.7 percent in case of females.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN C.D.BLOCKS, 2001

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table - 31 and 32 show that the work participation rate (WPR) for Darbhanga district recorded 23.1 percent of the district total population as main workers and 8.1 percent as marginal workers. The proportion of non-workers in the district is 68.8 percent.

Among the main workers male work participation rate in the district is 38.3 percent while that of females is only 6.5 percent as per 2001 census. The proportion of main workers is the highest (25.9 percent) in Biraul C.D. Block and the lowest (19.4 percent) in Singhwara C.D. Block. Out of 18 C.D. Blocks, WPR of 11 C.D. Blocks are above the district average. The proportion of marginal workers is the highest (13.3 percent) in Kiratpur and the lowest (5.0 percent) in Darbhanga C.D. Block. The proportion of total workers is the highest (36.9 percent) in Kusheshwar Asthan Purbi C.D. Block and the lowest (28.1) percent in Singhwara C.D. Block.

Table 32 deals with the same topic as Table 31, the only difference being that it deals with the rural areas of the district and its C.D. Blocks.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of Town	Persons / Males / Females	Total Population	Main worker		Marginal worker		Total workers (Main and marginal Workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage
1	2	3	4	5	6	7	8	9	10	11	12
1	Darbhanga (M Corp.)	Persons	267,348	56,532	21.1	5,775	2.2	62,307	23.3	205,041	76.7
		Males	142,377	51,665	36.3	4,527	3.2	56,192	39.5	86,185	60.5
		Females	124,971	4,867	3.9	1,248	1.0	6,115	4.9	118,856	95.1
	District (Urban)										
	Total:	**Persons**	**267,348**	**56,532**	**21.1**	**5,775**	**2.2**	**62,307**	**23.3**	**205,041**	**76.7**
		Males	**142,377**	**51,665**	**36.3**	**4,527**	**3.2**	**56,192**	**39.5**	**86,185**	**60.5**
		Females	**124,971**	**4,867**	**3.9**	**1,248**	**1.0**	**6,115**	**4.9**	**118,856**	**95.1**

There is no urban agglomeration in Darbhanga district. The only urban unit in the district is Darbhanga (M. Corp.). The work participation rate for total workers is defined as the percentage of total workers to total population. For Darbhanga (M. Corp.) the work participation rate (WPR) recorded 23.3 percent of the total population of the town as 21.1 percent main workers and 2.2 percent as marginal workers. The proportion of non-workers in the town is 76.7 percent. The proportion of male and female main workers are 36.3 and 3.9 percent respectively. The proportion of marginal workers among males is 3.2 percent and that for females is 1.0 percent.

Note: Percent of Workers to total workers are given in brackets

From the above table 34 and 35 the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four-fold classification namely, cultivation, agricultural labour, household industry and other economic activities. The economic activity of the district is primarily dependent on agriculture which is supported by the fact that cultivators (23.0%) and agricultural labourers (51.1%) together constitute 74.1 percent of the total workers of the district. The agriculture sector has absorbed about three-fourth of the total main workers. The proportion of cultivators varies between 31.3 percent for Baheri C.D. Block to 11.1 percent for Darbhanga C.D. Block. The proportion of agricultural labourers varies between 66.1 percent for Kiratpur C.D. Block to 30.4 percent for Darbhanga C.D. Block. The proportion of household industry workers is only 4.0 percent of the total workers of the district. The proportion of household industry workers varies between 6.9 percent for Hayaghat C.D. Block to 2.6 percent for Kusheshwar Asthan Purbi and Gora Bauram C.D. Block. The proportion of other workers varies between 54.4 percent for Darbhanga C.D. Block to 6.0 percent for Kiratpur C.D. Block.

Table 35 deals with the same topic as Table 34, the only difference being that it deals with the rural areas of the district and its C.D. Blocks.

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of Town	Persons/ Males/ Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9
1	Darbhanga (M Corp.)	Persons	267,348	62,307	760	814	2,806	57,927
				(23.3)	(1.2)	(1.3)	(4.5)	(93.0)
		Males	142,377	56,192	599	745	2,138	52,710
				(39.5)	(1.1)	(1.3)	(3.8)	(93.8)
		Females	124,971	6,115	161	69	668	5,217
				(4.9)	(2.6)	(1.1)	(10.9)	(85.3)
	District (Urban) Total:	**Persons**	**267,348**	**62,307**	**760**	**814**	**2,806**	**57,927**
				(23.3)	**(1.2)**	**(1.3)**	**(4.5)**	**(93.0)**
		Males	**142,377**	**56,192**	**599**	**745**	**2,138**	**52,710**
				(39.5)	**(1.1)**	**(1.3)**	**(3.8)**	**(93.8)**
		Females	**124,971**	**6,115**	**161**	**69**	**668**	**5,217**
				(4.9)	**(2.6)**	**(1.1)**	**(10.9)**	**(85.3)**

From the above table it is observed that cultivators constitute 1.2 percent of the total workers in Darbhanga (M. Corp.). The proportion of male and female cultivators are 1.1 and 2.6 percent respectively. The proportion of agricultural labourers is 1.3 percent. The proportion of male and female agricultural labourers are 1.3 and 1.1 percent respectively. The proportion of household industry workers is 4.5 percent of the total workers. The proportion of male and female household industry workers are 3.8 and 10.9 percent respectively. The proportion of other workers is 93.0 percent of the total workers. The proportion of other workers among males is 93.8 percent and that of for females is 85.3 percent.

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational facility :– There are as many as 889 villages accounting for 82.1 percent of the total inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in the development block of Baheri with 98.6 percent while Bahadurpur C.D. Block has the lowest proportion of villages with 72.1 percent.

Medical facility :– The availability of medical

facility in the villages is low and only 25.0 percent villages have got it. Among the C.D. Blocks, Baheri has the largest proportion of villages with medical facility, the percentage being 70.8 percent. Bahadurpur C.D. Block, on the other hand, has the smallest proportion of villages (8.2%) where medical facility is available.

Improved drinking water :– There are as many as 1072 villages accounting for 99.0 percent of the inhabited villages in the district where improved drinking water facility is available. Among C.D. Blocks, Jale, Manigachhi, Tardih, Alinagar, Benipur, Ghanshyampur, Kiratpur, Gora Bauram, Kusheshwar Asthan and Kusheshwar Asthan Purbi have the highest proportion of villages with 100.00 percent. Hanumannagar C.D. Block, on the other hand, has the lowest proportion of villages (95.4%) where improved drinking water facility is available.

Post office :– Postal facilities are available in 295 villages out of 1083 inhabited villages (27.2%) in the district. Ghanshyampur C.D. Block has the maximum number of villages having postal facility (48.1%). Bahadurpur C.D. Block has the minimum number of villages having postal facility (9.8%).

Telephone :– The availabity of telephone facility in the villages is low and only 21.0 percent have got it. Among the C.D. Blocks, Manigachhi C.D. Block has the maximum number of villages having telephone facility (34.8%) while the villages of Gora Bauram and Kusheshwar Asthan Purbi still do not have telephone facility.

Transport Communication :– Transport Communication facilities are available in 176 villages out of 1083 inhabited villages (16.3%) in the district. Tardih C.D. Block has the highest proportion of villages (33.3%) which a re connected by bus or rail or navigable river/canal services. Bahadurpur C.D. Block has the minimum number of villages having transport communication (5.7%).

Bank :– Banking facility is available only in 101 villages out of 1083 inhabited villages (9.3%) in the district. Among C.D. Blocks, Ghanshyampur C.D. Block has the maximum number of villages having banking facility (33.3%) whereas the villages of Kusheshwar Asthan Purbi C.D. Block still do not have banking facility.

Agricultural credit societies :– Agricultural credit societies are available only in 108 villages out of 1083 inhabited villages (10.0%) in the district. Among C.D. Blocks, Baheri C.D. Block has the maximum number of villages having agricultural credit societies (31.9%) while the villages of Manigachhi, Tardih, Kiratpur and Kusheshwar Asthan Purbi C.D. Blocks still do not have agaricultural credit societies.

Approach by pucca road :– This facility is available in 494 villages out of 1083 inhabited villages (45.6%) in the district. Manigachhi C.D. Block has the maximum number of villages having pucca road approach (82.6%) while Kusheshwar Asthan Purbi C.D. Block has the minimum number of villages having pucca road approach (2.9%).

Power Supply :– Electrified villages in the district constitute 45.2 percent of the total number of inhabited villages. Among the C.D. Blocks, Manigachhi C.D. Block has the maximum number of electrified villages with 89.1 percent while the villages of Kusheshwar Asthan Purbi C.D. Block do not have electrification.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen that educational facility is available to 94.2 percent of the rural population of the district. The proportion varies between the maximum of 99.8 percent in Baheri block and the minimum of 83.6 percent in Biraul block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 82.1 percent vide table 37) than the proportion of population which is as high as 94.2 percent. This may be attributed to fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by this facility is of the order of 40.9 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility only it may be observed that proportion of rural population served ,by the facility is of the order of 98.6 percent which is slightly less than the proportion of villages served by this facility in the district.

In the case of post office also it may be seen that the proportion of rural population served by this facility is of the order of 56.3 percent which is more than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development .blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	189	39	4	232
(b) Middle School	659	142	15	816
(c) Degree College	149	310	610	1,069
2. Medical:-				
(a) Hospital	232	299	520	1,051
(b) PHC	335	323	396	1,054
3. Post Office	601	146	41	788
4. Telephone	403	225	228	856
5. Bus Service	443	306	196	945
6. Banks				
(a) Commercial Bank	555	251	183	989
(b) Co-operative Bank	156	275	637	1,068
7. Agricultural Credit Societies	416	233	326	975

As regards educational facility it would be seen that there are 232 villages in the district (21.4%) which do not have any primary schools. Out of 232 villages, 189 villages have this facility at places situated within 5 kms, 39 villages have this facility at a distance range of 5-10 kms and only 4 villages at places beyond 10 kms.

There are as many as 816 villages in the district (75.3%) which do not have middle schools. Out of 816 villages, 659 villages have this facility at places situated within 5 kms, 142 villages have this facility at a distance range of 5-10 kms and only 15 villages at places beyond 10 kms. There are 1069 villages in the district (98.7%) which are deprived of colleges. Out of 1069 villages, 149 villages enjoy this facility, at places situated within 5 kms, 310 villages enjoy this facility at a distance range of 5-10 kms and as many as 610 villages enjoying this facility at places beyond 10 kms.

Similarly trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited village in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that the maximum number of inhabited villages lie in the distance range of 16-50 kms. (52.3%) from the nearest statutory town. This is followed by villages in the distance range of 5-15 kms. (31.8%) from the nearest statutory town. There are 109 villages accounting for 10.1 percent of the total inhabited villages which lie in the distance range of more than 50 kms.

The proportion of villages having educational facility is 65.6 percent for those situated within 5 kms from the nearest statutory town which increases to 82.8 percent in the next higher distance range of 5-15 kms. from the nearest statutory town. Thereafter it marginally decreases to 82.5 percent in the distance range of 16-50 kms from the nearest statutory town and it again increases to 87.2 percent in the distance range of 51+ kms.

In the case of other amenities(except for telephone facility) also the more or less the same trend can be observed from the above table.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the table that the maximum number of villages, i.e., 340 (31.4%) in the district fall in the population range of 2000-4999 followed by 262 villages (24.2%) having a population range of 1000-1999. There are 169 villages (15.6%) which fall in the population range of 500-999. The lowest number of villages is observed in the population range of 10000+ being 45(4.2%).

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Jale	58	18,647	66.2	42.1
2	Singhwara	85	16,415	83.9	61.9
3	Keotiranway	96	14,658	77.8	44.8
4	Darbhanga	106	17,628	72.6	32.9
5	Manigachhi	46	13,502	73.8	44.2
6	Tardih	36	8,161	85.4	44.2
7	Alinagar	41	9,369	84.4	28.3
8	Benipur	58	16,084	78.6	35.2
9	Bahadurpur	122	15,495	71.3	39.8
10	Hanumannagar	65	13,129	76.5	35.0
11	Hayaghat	43	8,522	73.0	40.4
12	Baheri	72	21,233	73.8	44.0
13	Biraul	62	18,051	78.4	24.5
14	Ghanshyampur	27	10,288	81.0	49.3
15	Kiratpur	17	6,235	65.6	28.4
16	Gora Bauram	45	11,359	79.9	43.9

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
17	Kusheshwar Asthan	69	11,587	88.3	65.5
18	Kusheshwar Asthan Purbi	35	12,117	88.8	13.6
	District Total:	**1,083**	**242,480**	**77.3**	**40.2**

The above table gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks.

It would be seen from the table that 77.3 percent of the total area of the district is utilised for cultivation (cultivable area) and of this only 40.2 percent area is irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Kusheshwar Asthan Purbi with 88.8 percent closely followed by Kusheshwar Asthan and Tardih C.D.Blocks with 88.3 and 85.4 percent respectively. The lowest percentage of cultivable area is found in Kiratpur C.D.Block with 65.6 percent.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Darbhanga (M.Corp.)	1.4	0.8	0.7	0.4	0	0.2	0	0	0.1
	District Total	**1.4**	**0.8**	**0.7**	**0.4**	**0**	**0.2**	**0**	**0**	**0.1**

The above table gives the details of finances in the statutory town in terms of per capita receipt and expenditure. There is only one statutory town in the district i.e., Darbhagna (M. Corp.). On going into the details of receipt under different heads it can be seen that the per capita receipt through taxes is slightly higher than the per capita receipt from all other sources. The per capita expenditure on public health and conveniences is higher than the per capita expenditure on the item named other in case of Darbhanga (M. Corp.). The per capita total receipt is higher than the per capita total expenditure.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Darbhanga (M.Corp.)	2.3	2.8	0.4	0.3	0.2
	District Total	**2.3**	**2.8**	**0.4**	**0.3**	**0.2**

The above table gives the details of different categories of educational institutions per ten thousand population in the town of Darbhanga district.

It would be seen from the above table that institutions like Secondary/Matriculation level school and college are situated in Darbhanga (M. Corp.) accounting for an average of 0.4 and 0.2 institution per ten thousand population respectively. Primary school and middle school account for an average of 2.3 and 2.8 schools per ten thousand population respectively in Darbhanga (M. Corp.). Senior Secondary School accounts for an average of 0.3 institution per ten thousand population.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Darbhanga (M.Corp.)	36
	District Total	**36**

The above table furnishes information regarding availability of beds in medical institutions in Darbhanga town. The number of beds in medical institutions per ten thousand population for Darbhanga (M. Corp.) works out to be 36.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Darbhanga (M.Corp.)	267,348	21,883	8.2
	District Total	**267,348**	**21,883**	**8.2**

The table above indicates that slum population in Darbhanga (M. Corp.) constitutes 8.2 percent of the total population of the town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Darbhanga (M.Corp.)	Gur	Mango
		Rice	Wheat
		Makhana	Makhana

It is clear from the table that Darbhanga (M. Corp.) is the only statutory town in the district. It would be seen from the table that three commodities are being manufactured in the town and three commodities are exported from the town.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It would be clear from the table that there are as many as 617449 households accounting for 97.8 percent of the total households of the district who are dwelling in owned houses. The proportion of households is the highest (65.6%) who is occupying only single room and the proportion of households is the lowest (1.2%) who is occupying no exclusive room. The median number of rooms is 1 for the total households in the tenure status of owned category. There are 103,955 scheduled castes households accounting for 16.5 percent of the total households of the district who are dwelling in owned houses. The median number of rooms is 1. There are 4233 scheduled tribes households accounting for only 0.7 percent of the total households of the district who are dwelling in owned houses. The median number of rooms is 1. There are 7768 households accounting for 1.2 percent of the total households of the district who are dwelling in rented houses. The proportion of households dwelling in single room is the highest (38.7 %) where as it is lowest (1.7 %) dwelling in no exclusive room. The median number of rooms is 2.

There are 773 scheduled castes households accounting for nearly 10 percent of the total households who are dewelling in rented houses. The median number of rooms is 1. There are 117 scheduled tribes households accounting for 1.5 percent of the total households who are dwelling in rented houses. The median number of rooms is 1.

Similar trend can be observed in respect of households who are dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C. D. Block	Total			Rural			Urban

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roof are made of pucca materials i.e. where burnt bricks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roof made of Kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the above table that the maximum proportion of households having permanent houses constitute 45.2 percent of the rural households in the district followed by 33.1 percent having temporary houses and 21.7 percent having semi-permanent houses.

In the case of urban households in the district, however, the maximum proportion of households accounting for 81.1 percent live in permanent houses followed by 10.8 percent in semi permanent houses and 8.0 percent in temporary houses.

Among C.D. Blocks, Singhwara C.D. Block has the maximum proportion of rural households living in permanent houses (60.7%) followed by Jale C.D. Block 54.3% and Hayaghat C.D. Block (53.3%). Kiratpur C.D. Block has the minimum proportion of households living in permanent houses with 13.2 percent.

In the case of temporary houses, Kiratpur C.D. Block has the maximum proportion of households living in temporary houses (78.2%) followed by Tardih (59.1%). Singhwara C.D. Block has the minimum proportion of households living in temporary houses with 17.6 percent.

In the case of semi permanent houses, Kusheshwar Asthan C.D. Block has the highest proportion of households (34.8%) followed by Baheri C.D. Block with 31.0 percent. Kiratpur C.D. Block has the lowest proportion of households living in semi permanent houses with 8.7 percent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

There are as many as many as 485403 households accounting for 82.2 percent of the rural households of the district who have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Ghanshyampur C.D. Block with 90.4 percent and the lowest proportion of households is in Bahadurpur C.D. Block with 74.5 percent. There are 31915 households accounting for 5.4 percent of the rural households of the district who have electricity. The highest proportion of households with electricity is in Bahadurpur C.D. Block with 11.0 percent and the lowest proportion of households is in the development block of Kiratpur with 0.2percent.

There are 32779 households accounting for 5.6 percent of the rural households of the district who have the facility of bathroom. The highest proportion of households having bathroom facility is in Hayaghat C.D. Block with 8.5 percent and the lowest proportion of households having bathroom facility is in Kusheshwar Asthan C.D. Block with 1.4 percent.

There are 108176 households accounting for 18.3 percent of the rural households of the district who avail of toilet facility. Among C.D. Blocks, Keotiranway has the highest proportion of households having toilet facility (24.3%) and Kiratpur C.D. Block has the lowest proportion of households having toilet facility (7.0%).

As regards drainage facility, there are as many as 103915 households accounting for 17.6 percent of the rural households of the district who have drainage facility. Among C.D. Blocks, Jale has the highest proportion of households having drainage facility (28.8%) and Kusheshwar Asthan purbi has the lowest proportion of households having drainage facility (3.9%).

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It would be seen from the table that there are 193105 households accounting for 32.7 percent of the rural households of the district who are using firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking can be observed in Hayaghat C.D. Block (49.1%) and the lowest proportion of households is in Kusheshwar Asthan Purbi with 4.7 percent.

There are as many as 221004 households accounting for 37.4 percent of the rural households of the district who are using crop residue as fuel for cooking. Among the C.D. Blocks, the proportion of households is the highest (85.5%) in Kusheshwar Asthan Purbi C.D.Block and the lowest (23.8%) in Tardih C.D.Block.

There are 145571 households accounting for 24.7 percent of the rural households of the district who are using cowdung cake as fuel for cooking. Among the C.D. Blocks, Tardih C.D.Block has the highest proportion of households (42.2%) using cowdung cake for cooking and Kusheshwar Asthan Purbi has the lowest proportion of households using cowdung cake as fuel for cooking with 8.8 percent.

In the case of electricity there are only 526 households accounting for only 0.1 percent of the rural households of the district using it for cooking . In the

case of coal/lignite the situation is more or less the same for the district. In the case of cooking gas (L.P.G.) there are 4345 households accounting for 0.7 percent of the rural households of the district who are using cooking gas as fuel for cooking. In the case of urban households the situation is different. There are as many as 14214 households accounting for 34.7 percent of the urban households of the district who are using cooking gas as fuel for cooking.

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It would be seen from the above table that 77,521 households accounting for 13.1 percent of the rural households of the district availing banking services. The highest proportion of households can be observed in Benipur C.D. Block (18.6%) who is availing banking services and the lowest proportion of households in Kusheshwar Asthan Purbi C.D. Block (5.0%).

There are as many as 157,287 households accounting for 26.6 percent of the rural households possessing radio, transistor. Among the C.D. Blocks, Benipur has the highest proportion of households (35.7%) possessing radio/ transistor and Kusheshwar Asthan Purbi has the lowest proportion of households with 13.1 percent.

As regards television there are 25,958 households accounting 4.4 percent of the rural households for of the district who are possessing televisions. Among the C.D. Blocks, Bahadurpur has the highest proportion of households (8.4%) possessing television and Kiratpur has the lowest proportion of households with 1.0 percent. As regards telephone there are 7865 households accounting for 1.3 percent of the rural households of the district availing telephone services. Among C.D. Blocks, Bahadurpur has the highest proportion of households (2.4%) availing telephone services and Kiratpur has the lowest proportion of households with 0.30 percent.

Similar trend can be observed in respect of other specified asset also both in the district as also in its development blocks.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

No major social or cultural event has taken place in the district of Darbhanga after the creation of Madhubani and Samastipur as independent districts.

Kusheshwar Asthan C. D. Block was earlier a part of the old Samastipur subdivision and became a part of Samastipur district after reorganisation. However, after some time the State Government decided to transfer this C. D. Block from Samastipur District to Darbhanga District on administrative considerations.

Fairs and festivals are held regularly in the district by different communities in complete harmony.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Ahalya Asthan

It is a famous historical temple, situated about 4 Kms. away from Kamtaul Railway Station. The temple is dedicated to Ahalya, wife of Gautam Rishi. Large fairs are held every year on the occasion of Ramnavami in the Hindi month of Chaitra and Vivah Panchami in Agrahayan. There are various other temples and mosques in the village.

Brahmpur

The village is situated about 8 kms. away from Kamtaul and 19 kms. south-east of Jogiara. The village is noted for the Gautam Kund and temple of Gautam Rishi which are located very close to it. According to the Puranic tradition Lord Brahma appeared before Gautam Rishi at this place after the chastity of his wife, Ahalya, had been violated by Indra and Chandrama. The village derives its name from this occurance. In regard to the Gautam Kund, it is believed that God Brahma himself created the tank by piercing the earth with seven arrows, so that Gautam might not have to travel a long distance for bathing in the Ganga.

Chhaprar

The village is situated in Bahadurpur block, at a distance of about 10 kms. from Laheriasarai. It has a temple of Lord Mahadeva on the bank of the Kamla river around which fairs are held on the occasion of Kartik and Maghi Purnima.

Dekulidham

The village falls in Biraul block and is noted for its large temple of Lord Shiva. Devotees congregate here every Sunday. A large annual fair is held on the occasion of Shivaratri.

Kamtaul

The village is a rail head in Jale block. The village has a Khadi gramodyog centre and a Khadi store. It is the rail head for visitors to Ahalya-sthan and Gautam-sthan.

Kusheshwar-asthan

It is an important religious place, situated about 16 kms. north-east of Hasanpur Road railway station on the Samastipur-Khagaria Branch line of North Eastern Railway. It is noted for the temple of Lord Shiva known as Kusheshwarasthan. Pilgrims visit this place all the year round for worship. The origin of this temple is traced to the epic period.

Mahiram-Mahadeo-sthan

It is a temple of Lord Shiva situated at a distance of about 5 kms. from the Darbhanga-Biraul pucca road. Large annual fairs are held here on the occasion of Kartik and Maghi Purnima.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The Maharajas of Darbhanga have traditionally been great patrons of art and literature and through their magnificence have always provided encouragement to the Sanskrit scholars. Darbhanga became the nerve-centre of political awakening. It played prominent role in the freedom movement and some of the most important leaders of Bihar during that time, such as Late Braj Kishore Prasad, Dharnidhar Prasad, etc. lived here.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publication which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village, wherever possible are

provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in English and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural

and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/ improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

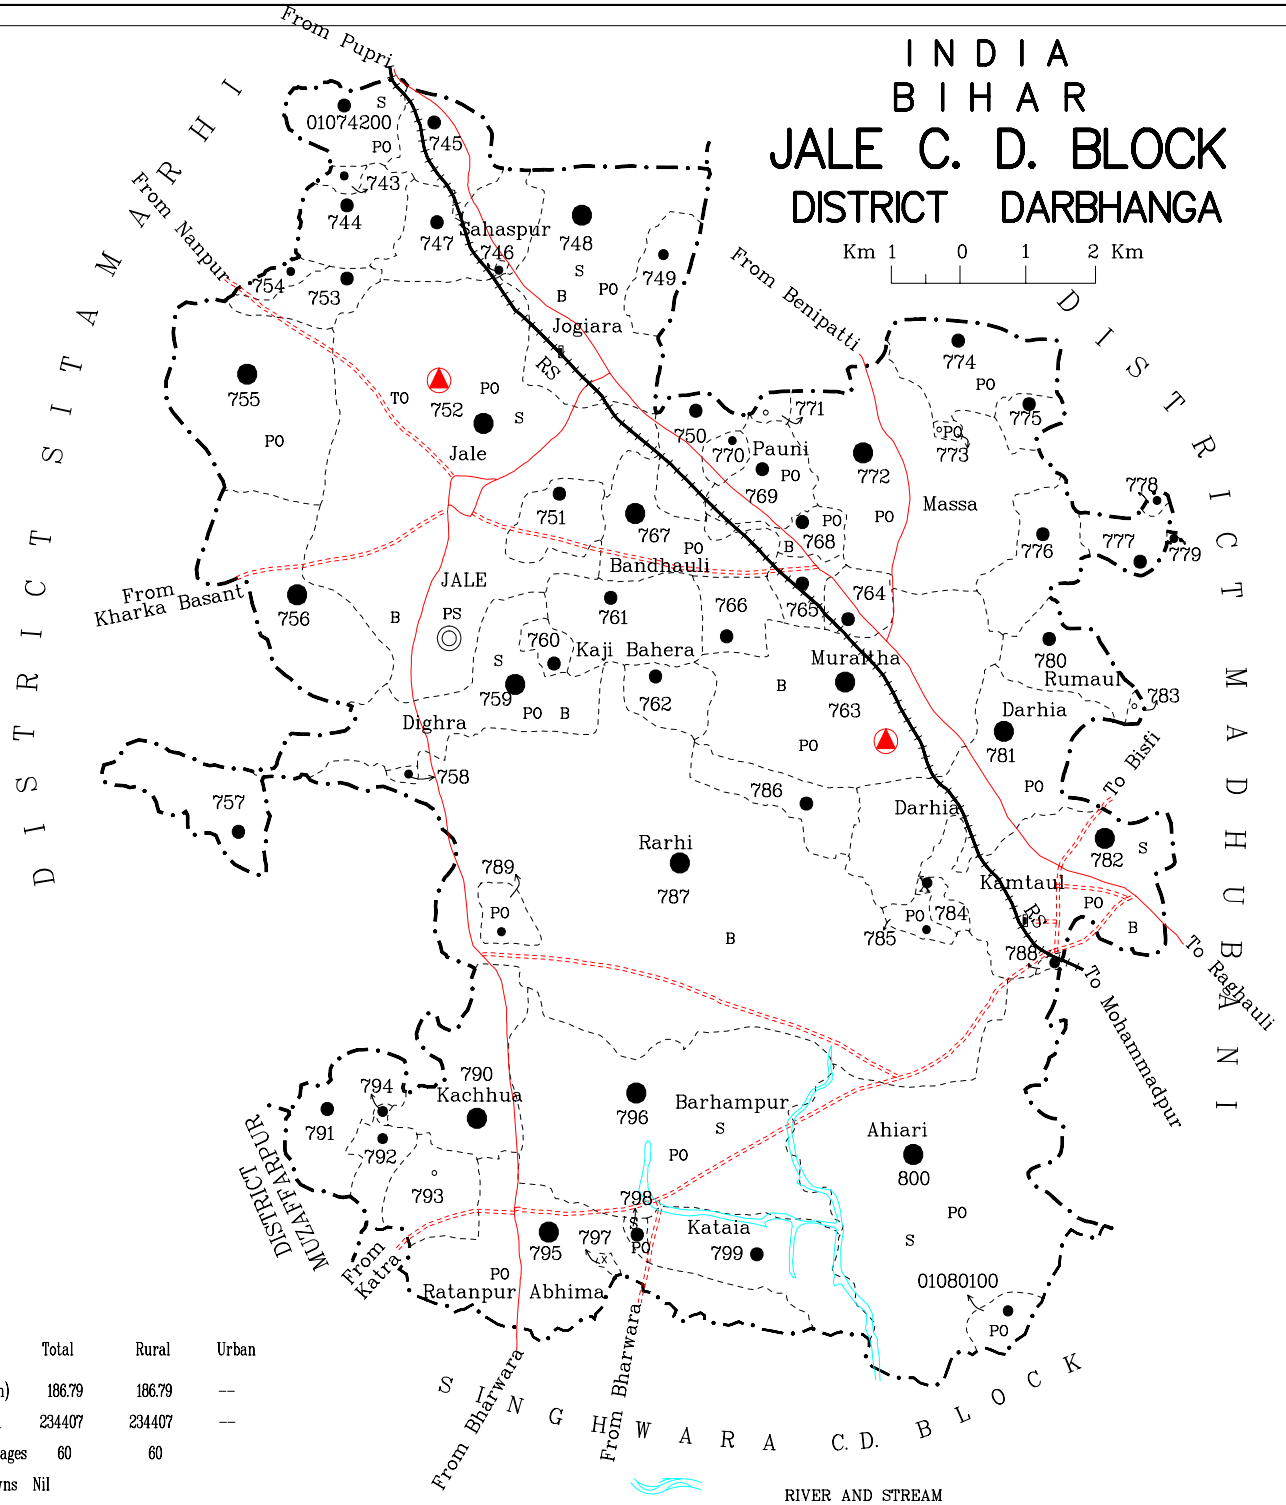

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

APPENDIX VIII - VILLAGE DIRECTORY

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT (C. D. BLOCK WISE)

Serial number	Name of Gram Panchayat and location code number	Area of Gram Panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Income and expenditure of Panchayat / Gram Panchayat (in Rs.'000)	
			Number	Location code numbers					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11
N.A.										

Note : N.A. stands for information not available.

APPENDIX IX - VILLAGE DIRECTORY

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Serial number	Name of C. D. Block	Village location code number	Name of village	Number of girls school			
				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8
N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II
ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Darbhanga	1991	77	88	96	96
	1981	92	109	118	130

Information on the question on children ever born and children surviving convased for all ever married women during 1991 Census has been compiled by age of the mother. Estimates of child mortality, thus worked out are presented in Annexure II.

From the estimates of child mortality (number of deaths by ages 1, 2, 3, and 5 given in above annexure as q(1), q(2), q(3) and q(5)), it is observed that there has been decline in child mortality over the decade (in 1991 Census as compared to 1981 Census) both in the district as well as the state. An interesting feature which can be noticed from the annexure is that the child mortality at the ages 1, 2, 3, and 5 was lower in the district during 1981 Census as compared to the state average while at the time of 1991 Census the child mortality of the district was recorded higher than the state average indicating thereby that the pace of decline child mortality had been faster in the state as a whole vis- a- vis the district of Darbhanga.

ANNEXURE - III (*Concld.*)

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for all the districts and the state(1991-Census)							
State / District	CBR	TFR	TMFR	GFR	GMFR	Child Woman Ratio	No. of Children ever born per Woman in age group 45-49	Mean age at marriage
1	2	3	4	5	6	7	8	9
Giridih	37.6	5.2	5.7	165.0	184.0	69.3	4.4	15.3
Hazaribag	34.9	5.0	5.5	159.0	179.0	72.1	4.6	15.5
Palamu	37.2	5.6	6.1	176.0	194.0	80.5	4.8	15.7
Lohardaga	38.5	5.7	6.8	172.0	208.0	67.9	4.6	17.2
Gumla	37.9	5.4	7.2	160.0	211.0	64.0	4.1	17.9
Ranchi	33.9	4.7	6.4	145.0	187.0	60.1	4.0	17.4
Purbi Singhbhum	27.7	3.5	5.0	112.0	147.0	48.6	3.7	17.9
Pashchimi Singhbhum	33.9	4.5	6.5	138.0	192.0	61.0	3.9	18.4
Araria	36.8	5.3	5.9	169.0	190.0	70.0	4.3	16.5
Kishanganj	38.0	5.6	6.9	172.0	221.0	67.7	4.7	17.6

Various fertility measures have been defined in the earlier section of this volume. In the above table the data in respect of various fertility measures have been presented for the state as well as all its districts.

The above annexure reveals that some of the fertility measures like CBR, GFR and GMFR are higher for Darbhanga district as compared to the state average, whereas chiled woman ratio is lower than State average. A few fertility measures such as TFR (5.5) and TMFR (6.1) are observed slightly higher than the state's averages. Average number of children born to a women is found to be slightly more in Darbhanga district (4.2) than the state average of 4.1. So far mean age at marriage is concerned, it can be seen from the table that the district and the state figures are the same (16.5 years). The different fertility measures in various districts of the state are, by and large, found to be not much in variation.

ANNEXURE - IV (A)

	(65.8)	(63.0)	(66.1)	(21.5)	(22.1)	(21.4)	(87.3)	(85.1)	(87.5)

State/District	Born in other states			Born in other countries			Total migrants		
	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Darbhanga	92,493	10,213	82,280	1,810	222	1,588	740,334	69,804	670,530
	(12.5)	(14.6)	(12.3)	(0.2)	(0.3)	(0.2)	(100.0)	(100.0)	(100.0)

The growth of population for any area is influenced by the migratory movements of the people including in and out migration. However, for want of data on out-migration since such data is not collected in census, it might not be possible to assess the net impact of out migration on growth of population, although such impact may not be much in most of the cases.

The above tables show percentage distribution of migrants by place of birth based on data recorded during 1991 and 2001 censuses. It can be seen from the tables that total migrants in the district of Darbhanga are 631,919 whereas in the state as a whole the migrants are found to be 21,307,020 in number (Darbhanga constitutes around 3.0% of the migrants of the state). The corresponding figures for the district and the state for the year 2001 are 740,334 and 19,989,195 respectively. Darbhanga constitues 3.7 percent of the total migrants coming to the state in 2001. Female migrants outnumber the male migrants both in the case of the district as well as the state in both the censuses. While the male migrants constitute only 5.1 and about 10 percent in 1991 and 2001 respectively, the female migrants are as high as 94.9 and 90.6 percent of total migrants of Darbhanga district in 1991 and 2001 respectively. The corresponding proportion of male and female migrants for the state as a whole works out to 10.9 and 89.1 percent respectively in 1991 and 10.5 and 89.5 percent respectivelyin 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of cases.

It can further be seen from the tables that most of the migratory movement has taken place within the district of enumeration in Darbhanga district particularly in case of females both in 1991and 2001 (74.4% for females as against 56.3% for males in 1991 and 66.1% females as against 63.0% males in 2001). The proportion of male migrants born in other districts of the state is quite high, being 40.2 percent males as against 24.8 percent for females in 1991 and 22.1 and 21.4 percent respectively in 2001. The proportion of male migrants are significantly more (in both the censuses) and female migrants are slightly less (in both the censuses) in state as compared to corresponding figures of the district of Darbhanga.

The proportions of migrants (both males & females) born in other states and in other countries have been on higher side than the state averages in 2001 census as evident from the tables. However, the state average figures are found to be higher in case of migrants born in other states and higher for migrants born in other countries as compared to corresponding figures of migrants in the district during 1991 census.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Darbhanga		
		Total	Rural	Urban	Total	Rural	Urban

Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

The data presented in the above tables pertaining to 1991 and 2001 censuses deal with the magnitude of inter-state migration to the state of Bihar as also migrants coming from other states to Darbhanga district. It will appear that the district received only 0.4 percent of the total migrants coming from other states to Bihar in 1991 and 5.8 percent in 2001 (4,100 out of 1,049,969 in 1991 and 92,493 out of 1,582,339 in 2001). The state of West Bengal and Uttar Pradesh in 1991 and Uttar Pradesh alongwith Jharkhand were the major contributors of migrants to the state in 2001. For the district of Darbhanga West Bengal, and Uttar Pradesh in 1991 and Chhtishgarh alongwith Andhra Pradesh and Uttar Pradesh in 2001 have been the major contributors. Nine major contributing states in 1991 and 14 such states in 2001 contributed 93 and 97 percent of the total migrants to the state of Bihar respectively. In case of Darbhanga district 13 major states in 1991 and only 7 such states in 2001 contributed over 93.4 and 96.7 percent of total migrants to the district respectively.

The data presented in Annexure-V (A) show religion wise distribution of population according to 1991 and 2001 censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001 respectively. The Muslims come next with 14.8 and 16.5 percent respectively. Christians had been the third most important religious community though it proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the state during both the censuses. Persons categorized under "Other Religions & Persuasions" comprised 1.7 and 0.1 percent of the state's population during 1991 and 2001 censuses.

In Darbhanga district the proportion of Hindus to the total population of the district remained 77.9 percent in 1991 and 77.2 percent in 2001 which were comparatively much lower than the respective state averages. Muslims constituted 22.1and 22.7 percent of the district's population in 1991 and 2001 censuses respectively. The proportion of population of other religious communities remained almost negligible in the district of Darbhanga during both the censuses as Hindus and Muslims taken together comprised over 99 percent of the total population of the district during both the censuses.

The above Annexures furnish religion wise distribution of population for the district of Darbhanga and its C.D. Blocks in 1991 and 2001 censuses.

It is evident from Annexures V(B) that among the C.D. blocks of Darbhanga district during 1991 census Kusheswar Asthan and Baheri C.D. blocks the proportion of Hindu population is above 90 percent to the total population, the highest being in Kusheswar Asthan block (91.0%). Muslims are in good numbers in Jale, Keotiranway and Singhwara C.D. blocks in 1991 census. This trend continued in various CD Blocks of Darbhanga district during 2001 census also. The existence of other religious communities in various C.D. Blocks of the district is insignificant as their proportions to total population are almost negligible in both the censuses.

Annexure V1 (A) furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991 and 2001 censuses while Annexure (B) shows percentage distribution of population by marital status for the state. The Annexures V1 (C) and V1 (D) furnish corresponding figures and percentages for the district of Darbhanga.

It shall be evident from Annexures V1 (A) to V1 (D) pertaining to 1991 and 2001 censuses that the state of Bihar as well as Darbhanga district have relatively higher proportion of males in the "never married" category. The proportion of females, however, is found to be larger in the "married" category. This may, perhaps, be attributed to the fact that women, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 55.2 percent of "never married" males in 1991 census and 56.3 and 57.2 percent in 2001 census in Bihar state and Darbhanga district respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 44.7 percent in 1991 and 47.3 and 47.6 in 2001 census. Females are found to be higher in proportion in the "married" category than males both in the state and the district in both the censuses, the percentages being 49.8 and 50.2 percent in 1991 and 47.8 and 47.4 percent in 2001. The corresponding figures for males in 1991 and 2001 censuses stand at 43.6 and 43.1 and 41.6 and 41.1 respectively. So far the proportion of "widowed" is concerned, it transpires from the tables pertaining to 1991 and 2001 censuses that female "widowed" are higher in proportion than male "widowed" both in the state as well as in the district. The proportion of "divorced or separated" is found to be negligible both in case of males and females in the state of Bihar and Darbhanga district.

While analyzing tables for 1991 and 2001 censuses regarding marital status of the male and female population by age groups, one notices that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than in males. It may, however, be interesting to note that proportion of married males and females in the age group 10-14 is less in Darbhanga district as compared to the state average figure. It is also discernable from the table that child marriage is more prevalent in the rural areas i.e., villages of the state and the district than the urban areas i.e., towns.

It is further noted from the tables pertaining both 1991 and 2001 censuses that the proportion of "married" females in the state as a whole and the district is relatively higher around the ages 35 and 40 respectively while above these ages the proportion of "married" males are found to be higher than females.

Annexures VII(A) VII (B) , VII (C) and VII (D) presented furnish position of literacy and level of education by various age –groups of population for the State of Bihar and the district of Darbhanga respectively as per data collected during 1991 and 2001 Census. Among these, Annexures VII (A)and VII (B) provide literacy position absolute in numbers where as Annexures VII (C) and VII (D) give these figures in terms of percentages.

Literacy is one of the most important characteristics of population on which information are collected during Censuses. The concept of literacy adopted in Census has already been explained in the beginning of this volume.

A proper index for measuring literacy is proportion of literate and educated persons to the total

population. The rate of literacy for Bihar(excluding population of 0-6 years) in 1991 stood at 38.5 percent which rose to 47.0 percent in 2001. the corresponding proportion for Darbhanga district in 1991 and 2001 remained 34.9 and 44.3 percents respectively.

It can be seen from the annexures that 21.2 percent males and 28.1 percent females in 1991 were literate without educational level in Darbhanga. The corresponding proportions in 2001 including Below Primary remained 29.7 and 37.1 percent respectively. The proportions of Primary passed Males and females in 1991 were 22.0 and 26.3 percents respectively which became 26.2 and 31.2 percent in 2001 in the district. In 1991 there were 24.9 and 26.3 percent males and females who had passed middle where as in 2001, the corresponding figures remained lower at 13.4 and 11.9 percent respectively .The proportion of those who had passed Matriculation and above in 1991 were 31.9 and 18.9 percent for males and females respectively in the district, the corresponding figures in 2001 remained 30.6 and 19.7 percent only which were lower for males and higher for females than the previous Census. it is interesting to note that Males out numbered females in the matter of literacy particularly in higher levels of education comprising of Middle and Matriculation and above.

ANNEXURE - VIII

PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Darbhanga		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Maithili	2,250,420	68.3
Hindi	14,524,035	17.5	Urdu	695,430	21.1
Magadhi/Magahi	12,132,383	14.6	Hindi	321,381	9.8
Maithili	11,830,684	14.3	Marathi	2,223	0.1
Urdu	9,457,544	11.4	Bhojpuri	1,793	0.1

Bengali	442,352	0.5	Nepali	1,055	0.0
Santali	382,866	0.5	Magadhi/Magahi	894	0.0
Kurukh/Oraon	57,952	0.1	Arabic/Arbi	723	0.0
Marwari	27,152	0.0	Sindhis	663	0.0
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	19,809	0.6
Total Population	**82,998,509**	**100.0**	**Total Population**	**3,295,789**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Darbhanga district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population where as in the district of Darbhanga hooping 21.1 percent of the district population have returned it as their mother tongue. Maithili as mother tongue has been returned by 68.3 percent of Darbhanga district's population. Hindi has got and third position with 9.8 percent of the district population having returned it as their mother tongues. Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per Census 2001.
