District Map

PYRAMIDS OF DIGHWA-DUBAULI, GOPALGANJ

The village is situated 35 miles north of Chapra. The ruins here had been noticed only by Carlleyle in 1878 or so. Close to south-east of the village, were seen by him two "extra ordinary pyramidal shaped mounds", with "four corners at the base projecting considerably outwards". He says further, that they "appeared to be formed of clay but mixed with small fragments of brick and pottery". Further south, he noticed another mound with an old well nearby. To the north of the village also another mound was observed by him, which was perhaps cut off by the road. Though Carlleyle had given dimensions of some of these mounds, he offered no opinion as to what these ruins represented. According to local tradition known to him all these mounds were attributed to the Chero chiefs of the locality.

Annexure VII : Age, Sex and Education in the district, 1991 Census 848

Annexure VIII: Distribution of different mother tongues returned in 1991 Census 855

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

District Highlights – 2001 Census

1. Gopalganj ranks 21st in terms of population (21,52,638) and 26th in terms of area (2,033 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Gopalganj is the 11th densely populated district in the state with 1,059 persons per sq.km as against the state's 881.
3. Gopalganj ranks 2nd in terms of sex-ratio (1,001) against the state's 919.
4. There are 152 uninhabited villages (out of 1,535 total villages) in the district of Gopalganj.
5. Manjha (under Manjha C.D. Block) is the most populated village (14,403) and Hari Marpi (under Bijaipur C.D. Block) and Saddu Dih (under Phulwaria C.D. Block) are the least populated villages (6) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Kuchaikote has the highest number of villages (222) in the district and C.D. Sidhwalia has the lowest number of villages (50).
8. Rampur Tengrahi (under Gopalganj C.D. Block) has the largest area (2,428 hectare) and Man urf Basant Chhapra (under Baikunthpur C.D. Block) has the smallest area (2 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 99.5 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census

for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/

Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Gopalganj which till 1875 was only a tiny hamlet, was made a subdivision of old Saran district in the same year. It attained the status of an independent district on the 2nd of October, 1973. The district is situated between latitudinal range of 26°12" and 26°39" N and longitudinal range of 83°54" and 84°55" E. It is bounded on the east by Part of Purbra Champaran and Muzaffarpur, on the south by state of Uttar Pradesh, Siwan and Saran on the west and north by State of Uttar Pradesh, Pashchim Champaran & Purba Champaran. It forms an alluvial plain bounded by the Gandak and interseted by five smaller rivers, flowing in the southern direction, namely the Jharahi, Khanwa, Daha, Gandaki and Dhani.

The history of Gopalganj is a part of the history of old Saran district which included the present districts of Saran, Siwan and Gopalganj. The composite Saran district lying on one of the main lines of the Aryan advance, was probably occupied at an early period of Aryan races. According to a tradition preserved in vedic literature, the Vedas marched eastwards from the Saraswati until they reached the banks of the Gandak, and were informed by Agni, the god of fire, that their home lay to the east of its broad stream. In obedience to his directions, the Videhas crossed the river and founded a powerful kingdom on its eastern bank, but it seems likely that some of them settled in saran which lay on the line of march, while the majority of them crossed the Gandak. Local legend and tradition at least, are indicative of the fact that Saran was originally inhabited by original races, who were subdued or driven out by Aryan immigrants. The Cheros are said to have held the country for many centuries, and traces of their rule are still pointed out in the great mounds and fortifications found in different places. These aboriginal inhabitants are believed to have been subdued by immigrant Rajputs after a conflict which lasted for hundreds of years and the family records of the Harihobans Rajputs of Haldi in the adjoining district of Ballia say that their forefathers settled at Manji on the banks of the Gogra in this district, and after a protracted struggle conquered the Cheros, who had been lords of the country.

In the beginning of the 13th century the tide of Muhammadan conquest swept over Bihar ; and between 1211 and 1226 the Governor of Bengal, Ghias-ud-din Iwaz, carried his arms into the territory of Raja of Tirhut, who had never before been subdued by the Muhammadan arms and compelled him to pay tribute. There is, however, no record available on the history of this district till the close of that century, when Nasiruddin Bughra Khan, the son of the Emperor Ghias-ud-din Balban, was the king of Bengal, a weak ruler, into whose territories the Emperor of Delhi used to send ship-loads of dacoits, he caught and letting them loose there. On the death of the Emperor Balban, Nasiruddin's son, Muiz-ud-din Kiakobad, was raised to the throne and in 1288 Nasir-ud-din marched against him to enforce his own claims and advanced as far as the banks of the Gogra in Sarkar Saran. The upshot, however, was that father and son were reconciled, the former waiving his claims to the empire of Delhi and being permitted to retain Bengal as an independent kingdom.

In the middle of the 14th century Saran must have acknowledged the suzerainty of Ilyas Shah, the first independent Sultan of Bengal (1345-58), who invaded and ravaged Tirhut, harried the frontier of the Delhi empire, and built a fortress at Hajipur to consolidate his conquests. The Gogra now formed the boundary between the territory of the kings of Bengal and the Emperors of Delhi, but this outlying portion of the dominions of the former appears to have been wrested from them in 1397 by the kings of Jaunpur, who ruled over it for another century. It was, however, ceded by him in 1499 to the Emperor Sikandar Lodi, who advanced upon Bihar after subduing Jaunpur, and concluded a treaty at Barh, the terms of which were that emperor should hold Bihar, Tirhut and Sarkar Saran, and all the other countries he had subdued, provided he did not invade Bengal.

The treaty between Husain Shah and Sikandar Lodi was not honoured for a long time, for Nasrat Shah, the eldest and most capable of the son of Husain Shah, invaded Tirhut, extended his authority over this district, and even across the Gogra into the Ballia district where an inscription shows that a mosque near Sikandrapur was built during his reign. He soon came into conflict with the Emperor Babar who himself marched into Bihar as the head of a large

army to reduce the rebellions Afghan chief (1529). The Afghans were completely defeated and dislodged from their position and the attack made by the Bengal fleet and army was repulsed.

About half a century after this, Saran was finally amalgamated with the Mughal Empire, after Akbar had defeated the Afghans under the Bengal King, Daud Khan, and captured Patna in 1574. In this district an Afghan chief, Kabul Muhammad of Barharia, is said to have been one of Daud Khan's partisans but he was slain and his citadel taken by Jubraj Sahi, one of the early rulers of the Hathwa Raj, who wrested pargana Sipah from him and then retained it as a grant from Akbar. Saran now became a part of Bihar and under the direct control of a Governor.In the Ain-I-Akibari it was treated as one of the six Sarkars forming the Subah of province of Bihar ; and in 1582 it was assessed to revenue by Akbar's Finance Minister, Todar Mal.

Saran did not again come into prominence until the closing days of Muhammdan rule, when the European merchant adventurers made settlements in the district. The English were also attracted to Chapra about this time by the trade in salt petre, which was in great demand for the manufacture of gunpowder.

The early days of British administration were troubled ones, owing to the rebellion of Maharaja Fateh Sahi of Husepur. Fateh Sahi was descended from a line of semi-independent chiefs who had long exercised great power in Saran and his immediate predecessor, sardar Sahi, had demolished the fort of Majhauli and compelled its Raja to agree not to go about with flags and drums, the ensigns of Rajaship, until he had retaken them by force from the Rajas of Husepur. A kinsman of the powerful Balwant Singh, he chafed against the British rule, refused to pay revenue, resisted the troops sent against him, and was with much difficulty expelled from Husepur. Husepur, which appears to have been coterminous with the present subdivisions of Siwan and Gopalganj, was then farmed out to one Gobind Ram but Fateh Sahi, who had retired into a large tract of forest, called Bagh Jogini, lying between Gorakhpur and Saran and adjoining the territory under the Vizier of Oudh, took every opportunity to make raids into the district, to plunder the villages, and to stop the collection of revenue. The unsettled state of the country, his easy access to the territories of an independent prince, where British troops were unable to pursue him, and the impenetrable forest which surrounded his retreat, the collusion of the agents of the Vizier of Oudh, and above all, the attachment of the people to their expelled Raja and their dislike of a Government farmer, all contributed to favour his designs and he kept the country in a state of terror and the British authorities constantly on the alert. In 1772, Gobind Ram, the Government farmer, was put to death in one of these raids, and the revenue collections having come to a stand still, the Collector of Sarkar Saran recommended that Fateh Sahi should be induced to come in on the promise of an allowance being made to him by the Government. This proposal was accepted Gobind Ram's murder was forgiven on Fateh Sahi's solemnly denying any knowledge of the transaction and Ateh Sahi came to Patna, and promised to remain quietly with his family at Gusepur. His turbulent disposition did not allow him to remain quiet for too long and within two months he broke his promise and once more became a border free-booter.

At this time Husepur was under the charge of one Mir Jamal, who was styled Superintendent of Government Revenue And after being under the direct management of Government for a year, it was let out in farm to Basant Sahi, a cousin of Fateh Sahi, on the security of Raja Chait Singh of Benares. In 1775 both Basant Sahi and Mir Jamal were killed in a night attack by Fateh Sahi at Jadopur, a short distance from Husepur and Fateh Sahi eluded the pursuit of two companies of sepoys under Lieutenant Erskine, which were in the neighbourhood, and escaped with his booty to his forest fastness. Basant Sahi's head, it is said, was cut off and sent to his widow, who ascended a funeral pyre with it in her lap and became a sati. In dying she pronounced a terrible curse on any of her descendants who should partake of any food with Fateh Sahi or any of his race To this day, it is said, the Maharajas of Hathwa have religiously refrained from touching food or drinking even a drop of water, while traveling through that part of the Gorakhpur district which is the property of the Rajas of Tamkuhi, the descendants of Fateh Sahi. Fateh Sahi was known as Kunwar Singh of Saran, and in fact he was probably the first to raise the standard of revolt when whole of India

had yet to realise the humiliating experiences of a foreign rule. Even in nineteenth century English Society of India, admirers were not lacking.

(iii) Administrative set up

Gopalganj district is bounded on the east by Part of Purbra Champaran and Muzaffarpur, on the south by state of Uttar Pradesh, Siwan and Saran on the west and north by State of Uttar Pradesh, Pashchim Champaran & Purba Champaran. There are altogether fourteen Community Development Blocks in the district. The district consists of two sub-divisions namely, Hathwa and Gopalganj. Kataiya(NA), Mirganj(NA), Gopalganj(M) and Barauli(NA) are the four towns in the district. Total number of villages in the district are 1535. Gopalganj(M) is the headquarter of the district.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has two subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are fourteen C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration :

The Judges and Munshif magistrates are posted at district and sub-divisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration :

The Superintendent of Police, Gopalganj is the head of the district police administration who is generally from the Indian Police Service. In the subdivisions of the district, the Deputy Superintendents of Police are posted who keep control on police administration and belongs to Bihar Police Service.

(iv)Physical Features

The district is situated between latitudinal range of 26°12" and 26°39" N and longitudinal range of 83°54" and 84°55" E. The total area of the district is 2,033.0sq. kms. It ranks 26th on the ladder of districts of Bihar in respect of area. 2.2% of the total area of the state of Bihar is covered by this district.

There are no hills in Gopalganj. Though the district presents the appearance of a level plain, the uniformity is broken here and there by the depressions and marshes dotted over the countryside. The district contains no forest as well.

River System

There are three great boundary rivers - the Ganga, Gandak and Gogra which are navigable by large boats all the year round. These three rivers have a mythical and historical association. There is also a net-work of minor streams flowing into the Gogra or Ganga, many of which are fed by the overflow of the Gandak and dry up in the hot weather. Alluvion and diluvion are constantly taking place along the banks of the Ganga, Gogra and Gandak. The beds of the rivers are generally sandy, and the banks are cultivated as near to the water's edge as possible. Along the channels of the large rivers, there are often large expanses of low land which are flooded in the rains but are sown later in the year with spring crops which always turn out well, owing to the rich layer of silt annually deposited. In some places during the dry season there is often a belt of tamarisk jungle between the river and the cultivated fields, and this is the first step in the conversion of the sandy riverain into arable soil.

Lakes, properly so called, do not exist in Gopalganj district, but a vast number of broads or marshes called chaurs may be found after the cessation of the rains. They used to contain water during the winter and in some one even in to the hot weather and were the home of innumerable water-fowl. Most of the chaurs are drying up and are under cultivation. There is hardly any of the previous species of birds that used to visit these chaurs in thousands in winter.

There are very few large tanks in the district and even the existing ones are now not in proper order. With the changes in the financial condition, people no longer excavate tanks.

Climatic Conditions

The seasons in Gopalganj are very similar to those

in Saran, Siwan and Muzaffarpur. The hot weather begins about the middle of March, when hot westerly winds often accompanied by duststorms, begin to blow during the day. At night the wind comes generally from the east and the temperature is comparatively cool, being lowered by occasional thunder-storms; but the nights are extremely hot from the end of May till the first break of the monsoon which generally starts in the month of June. In a normal year the rains set in about the third week of June and continue with intermissions till about the end of September or the early part of October. The cold weather begins after the middle of October and continues till the beginning of March upto which time the days are still comparatively cool. This season is bracing and agreeable, at least from November till February ; the day temperature is low, the air dry and the nights distinctly cold. The climate is on the whole hot and dry, and though the winter months are delightfully cool, the heat is excessive in May and June.

Rainfall

The average annual rainfall for the district is about 1,016.76 mm. Generally the monsoon breaks in June. The peak month for rains is August. Thereafter it starts declining with some rainfall in the months of September and October and by November the rainy season is almost over and November and December are the driest months in the year both in average rainfall and average number of rainy days in a month.

Irrigation Facilities

Irrigation is resorted to wherever the means are present, either from wells, tanks, streams or aharas, i.e., reservoirs formed by constructing embankments across the line of drainage.

Irrigation from wells is very common in all areas except in the tract bordering the Gandak river where there is prejudice against it on the ground that the soil is unsuitable. In the greater part of district, however, well irrigation is feasible owing to the fact that sub-soil water is found very near the surface.

The soil in the district are alluvial and vary from the hard clay found in the low swamps, which is locally known as bangar to the light sandy loam of the uplands called bhath. The former grows winter rice only while from the latter an autumn rice crop is generally obtained followed by a spring crop of cereals, pulses and oil-seeds. In the district as a whole these two soils are found in fairly regular proportions.

Cropping pattern

Paddy is the most important of the food crops in the district. One - fifth of it is Bhadai rice, harvested in the autumn and the remaining four fifths is Aghani or winter rice. Other important crops grows in the district are wheat, sugar-cane and maize besides potato, pulses and oil-seeds. Sugar-cane and tobacco are the cash crops grown in the district.

Industries

There were formerly three industries in the district connected with opium, indigo and sugar, of which only the last now remains. The only other important industry is the manufacture of salt-petre. However, there are a number of small handicrafts, such as manufacture of brass, pottery, cloth-caving, oil-pressing, etc.

Mines and Minerals

There is no mining and heavy industry in the district. There are no minerals except nodular limestone (kankar) of good quality which is found throughout the district. It is used for metalling roads and for ballast on the railway but the supply is diminishing.

Communication

The North-Eastern Railway has two branches in the district. One runs through Siwan-Thawe-Gorakpur and other through Siwan-Thawe-Gopalganj-Chapra route. Five block headquarters of the district have the privilege of being very near to the railway stations. All the block headquarters, however, have the facility of road communication.

Gopalganj being a reverine district, water transport plays an important role in the means of transport. In the past, when the railways and other steam services were not developed, boats were the chief means for transport of goods and passengers. Though inland water transport has declined, still its possibility in the district is great.

The district is not connected by the regular air route. There is, however, one landing ground at Hathwa, where small aeroplane lands. Telephone exchange is located at Gopalganj, the district headquarters, and also at Hathwa and Barauli.

Livestock

In line with other districts in the State this district also depends absolutely on livestock for pursuing agriculture which is the most important occupation. The Animal Husbandry Department has been trying to improve the breed by providing selected bulls and opening of artificial insemination centers. Thre is one veterinary hospital at the district headquarters. In each of the block headquarters there is one veterinary dispensary and two field veterinary centres.

Electrification

The Electricity Division in the district has two wings, one dealing with transmission and other with distribution. Under the rural electrification programme quite a good number of villages have been electrified in the district so far.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household,

it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then

considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are

called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the

Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language

mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the

pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (ASFR)}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} (ASMFR)}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the

country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

The population of the Gopalganj district during 1991 was 17,04,310 Hindus constitute over 83.4 per cent (14,21,555persons) of the population in the district followed by Muslims 16.6 percent (2,82,287 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Gopalganj district during 1991 was 17,04,310. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Gopalganj district, Hindi, the main mother tongue of the district was returned by95.5 percent (16,28,138 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Gopalganj district, was 4.4 percent (75,293 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Gopalganj during 1991 Census

The population of the Scheduled Castes in the

district of Gopalganj was 208,382. According to 1991 Census. Numerically the five most prominent SCs in the district were (i) Chamar, Mochi (120,556) (ii) Dusadh, Dhori, Dharhi (43,553) (iii) Dhobi (21,970) (iv) Musahar (12,793) and (v) Dom, Dhangad (2816). While Chamar constituted the maximum proportion of Scheduled Castes population the percentages being 57.9 (more than half if the total SC population). Dusadh and Dhobi though numerically second and third in order comprised only 20.9 and 10.5 percent of the SC population in the district. Musahar and Dom are much less in number as compared to the other three SCs mentioned above with only 6.1 and 1.4 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than five SCs described above as their percentages to total SC population was less than even 1.0 percent except Pasi whose percentage was 1.3 respectively.

The population of the Scheduled Tribes in the district of Gopalganj during 1991 Census was 19,167.Numerically; the five important STs were namely (i) Gond (ii) Kharwar (iii) Kharia (iv) Lohara/ Lohra and (v) Oraon. Gond had 18,446 populations, which constituted 96.2 percent of the Scheduled Tribes population in the district. Kharwar with 212 populations constituted 1.1 percent of the ST population. Kharia with 105,Lohara with 102 and Oraon with 92 population which are much less in number as compared to the other two STs mentioned above with only 0.5 percent each of the total ST population of the district the other Scheduled Tribes were almost negligible in proportion.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Gopalganj district is 21,52,638 comprising 10,75,710 Males and 10,76,928 Females and constituting 2.6 percent of the State population spread over 2.2 percent of the area of the State in the 14 C.D.Blocks of the district. Kuchaikote is the most populous where as Pach Deuri is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001 (CONCLD.)

Serial number	C.D. Block	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
12	Barauli	174,841	146,530	28,311	215,617	180,964	34,653	23.3	23.5	22.4	16.2	16.1
13	Sidhwalia	89,218	89,218	0	113,914	113,914	0	27.7	27.7	0.0	0	0
14	Baikunthpur	145,073	145,073	0	177,196	177,196	0	22.1	22.1	0.0	0	0
District Total:		**1,704,310**	**1,607,444**	**96,866**	**2,152,638**	**2,022,048**	**130,590**	**26.3**	**25.8**	**34.8**	**5.7**	**6.1**

Table – 1 shows rise in the population of this district during 1991-2001 decade has been of the order of 26.3 percent. The rural population of the district has increased by 25.8 percent while the urban population growth over the decade has been of the order of 34.8 percent. The percentage of urban growth in the district is higher than the total and rural averages of the district. Rural-urban migration is an important factor which always leads to rapid expansion of the urban units. Among the C.D. Blocks, Thawe has shown the highest increase in population over the decade with 31.1 percent. The next highest increase in population is observed in Phulwaria C.D. Block with 30.0 percent followed by Pach Deuri C.D. Block with 29.3 percent. Percentage decadal variation has been observed to be the least in the case of Baikunthpur C.D. Block with 22.1 percent.The increase in rural population during 1991-2001 has been highest in Uchkagaon and Thawe C.D. Blocks with 31.1 percent followed by Phulwaria with 30.0 percent.As regards growth in urban population, Gopalganj C.D. Block occupies the first position with 53.3 percent. Such a high increase in Gopalganj C.D. Block may be attributed to the f act that Gopalganj town, the district headquarters, is located in this C.D. Block.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/C.D.Block	Total number of inhabited Village	Total rural population Persons	Males	Females	Number and percentage of villages	Population less than 200 Males	Females
1	2	3	4	5	6	7	8	9
1	Katiya	101	96,742	46,883	49,859	6 (5.9)	326	417
2	Bijaipur	125	115,723	56,575	59,148	23 (18.4)	1,075	1,218

It may be observed from the table – 2 that the maximum number of villages in the district lie in the population range of 1000-1999 accounting for 28.3 percent of the total inhabited villages closely followed by villages in the population range of 500-999 accounting for 26.4 percent of the total inhabited villages. The percentages of population in the above two population ranges are 27.5 and 13.3 percent respectively. The villages in the population range of 2000-4999 constitute 18.4 percent of the total inhabited villages and in these villages the percentage of population is 38.4 percent. There are 213 villages in the population range of 200-499 accounting for 15.4 percent of the total inhabited villages and in these villages the percentage of population is 3.8 percent. There are 113 villages in the population range of less than 200 accounting for 8.2 percent of the total inhabited villages and the percentage of population is only 0.6 percent. There are 42 villages in the population range of 5000-9999 accounting for 3.0 percent of the total inhabited villages and in these villages the percentage of population is 14.3 percent. There are only 3 villages in the highest population range of 10,000 and above accounting for only 0.2 percent of the total inhabited villages and in these villages the percentage of population is 2.2 percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicale in respect of Gopalganj district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	7	0.0
11-20	3	0.2	19	0.0
21-50	4	0.3	383	0.0
51-100	17	1.2	1,466	0.1
101-200	22	1.6	10,192	0.5
201-300	29	2.1	8,608	0.4
301-500	88	6.4	42,246	2.1
501 +	1,219	88.1	1,959,127	96.9
Not known	0	0.0	0	0.0
District Total:	**1,383**	**100.0**	**2,022,048**	**100.0**
Population Density (Rural) of the district:			**1,085**	

The data presented in the above table highlight the fact that maximum proportion of villages in Gopalganj district lies in the density rang of 501 and above with 88.1 percent of the total inhabited villages followed by villages in the density range (per square kilometer) of 301-500 which account for 6.4 percent of the total inhabited villages. It would further be seen that small number of villages fall in the density range of 201-300 which account for 2.1 percent of the total inhabited villages. There are 22 villages in the density range of 101-200 which account for 1.6 percent of the total inhabited villages. There are 17 villages in the population range of 51-100 which account for 1.2 percent of the total inhabited villages. There are only 4 villages in the density range of 21-50 which account for 0.3 percent of the total inhabited villages.

Maximum number of village fall in the density range of 501 and above covering 96.9 percent of the population followed by villages in the density range of 301-500 which account for 2.1 percent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,199	1,200	1,177
1911	1,051	1,056	942	1,151	1,153	1,041
1921	1,020	1,027	886	1,066	1,066	0
1931	995	1,005	820	1,038	1,038	0
1941	1,002	1,012	842	1,082	1,082	0
1951	1,000	1,010	859	1,037	1,042	890
1961	1,005	1,020	832	1,098	1,106	835
1971	957	968	833	1,018	1,024	815
1981	948	959	852	1,006	1,011	903
1991	907	913	857	968	972	903
2001	919	926	868	1,001	1,006	928

Note: Sex ratio has been defined here as the number of females per 1000 males.

The sex ratio for the rural areas of Gopalganj district is comparative high as compared to the rural areas of the state from 1901 census to 2001 census. It is found that in case of sex ratio in the total population of the district it is higher than the sex ratio of the state from 1901 census to 2001. The sex ratio for the urban areas of the district is found to be comparatively high as compared to the urban areas of the state in 1901 and 1911 census. It is interesting to observe from the table that there was no urban population in the district of Gopalganj from 1921 to 1941 census. Again the sex ratio for the urban areas of the district is comparatively high as compared to the urban areas of the state from 1951 to 1961 census. The sex ratio for the urban areas of the state is comparative high as compared to the urban areas of district only in 1971 census.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio

14	Baikunthpur	1,024	1,024	-
	District Total:	**1,001**	**1,006**	**928**

In Gopalganj district as a whole there are 1001 females for every thousand males. Within the district the sex ratio varies from 1051 in Barauli C.D. Block to 923 in Gopalganj C.d. Block. The sex ratio of Bijaipur C.D. Block is 1045 while the sex ratio of Katiya C.D. Block is 1041. The sex ratio figures for rural and urban areas of Gopalganj district are 1006 and 928 respectively.

The sex ratios of Katiya, Bijaipur, Bhorey, Barauli, Sidhwalia and Baikunthpur C.D. Blocks are higher than the district rural average of 1006 while Pach Deuri(1002), Kuchai Kote(989), Phulwaria(994), Hathua(990), Uchkagaon(990), Thawe(968) and Gopalganj(945) C.D. Blocks have sex ratio below the district rural average. The urban sex ratio of the district is 928 which is lower than the total and rural averages of the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Katiya	1,063
2	Bijaipur	1,045
3	Bhorey	1,036
4	Pach Deuri	1,002

12	Barauli	1,056
13	Sidhwalia	1,010
14	Baikunthpur	1,024
	District (Rural) Total:	**1,006**

As for rural areas in Gopalganj district there are 1006 females for every thousand males. Within the district, the sex ratio varies from 1063 in Katiya C.D. Block to 945 in Gopalganj C.D. Block. The sex ratios of Barauli, Bijaipur, Bhorey and Baikunthpur C.D. Blocks are 1056, 1045, 1036 and 1024 respectively. The sex ratios of Katiya, Bijaipur, Bhorey, Barauli, Sidhwalia and Baikunthpur C.D. Blocks are higher than the district rural average of 1006 while Pach Deuri(1002), Kuchaikote(989), Phulwaria(994), Hathua(990), Uchkagaon(990), Thawe(968) and Gopalganj(945) and Manjha (988) C.D. Blocks have sex ratio's below the district rural average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	4	0.3	346	0.0
700-749	2	0.1	304	0.0
750-799	17	1.2	5,511	0.3
800-849	37	2.7	26,279	1.3
850-899	90	6.5	105,473	5.2
900-949	186	13.4	331,157	16.4
950-999	286	20.7	508,523	25.1
1000-1099	493	35.6	769,916	38.1
1100+	268	19.4	274,539	13.6
District Total:	**1,383**	**100.0**	**2,022,048**	**100.0**
Sex ratio (Rural) for District:		**1,006**		

It is observed from the table 8 that the maximum proportion of villages in Gopalganj district lies in the very favourable sex ratio range of 1000-1099 and these villages account for 35.6 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 38.1 percent of the district rural population. 286 villages i.e. 20.7 percent of the inhabited villages fall in the sex ratio range of 950-999 and these villages account for 25.1 percent of the rural population of the district. 268 villages i.e. 19.4 percent of the total inhabited villages fall in the most favourable sex ratio range of 1100 and above and these villages account for 13.6 percent of the district rural population. 186 villages i.e. 13.4 percent of the total inhabited villages fall in the sex ratio range of 900-949 and the villages account for 16.4 percent of the district rural population. 90 villages i.e. 6.5 percent of the total inhabited villages fall in the unfavourable sex ratio range of 850-899 and these villages account for 5.2 percent of the district rural population. 37 villages i.e. 2.7 percent of the total inhabited villages fall in the unfavourable sex ratio range of 800-849 and these villages account for 1.3 percent of the population. There are only 4 villages in the lowest sex ratio range of less than 700 accounting for 0.3 percent of the total inhabited villages and these villages constitute negligible percentage of the population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A^./ Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Kataiya (NA)	NA	926
2	Mirganj (NA)	NA	923
3	Gopalganj (M)	M	873
4	Barauli (NA)	NA	1026
	Sex ratio (Urban) for the district:		**928**

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

There is no urban agglomeration in Gopalganj district. There are four statutory towns in the district. The sex ratio of Barauli(NA) is the highest (1026) whereas the sex ratio of Gopalganj(M) is the lowest (873). The sex ratios of Katiya(NA) and Mirganj(NA) are 926 and 923 respectively.

		Rural	**410,209**	**208,725**	**201,484**	**965**
		Urban	**23,459**	**12,103**	**11,356**	**938**

It is observed from the table – 10 that the sex ratio in the age group 0-6 in the district varies from 990 in Thawe C.D. Block to 943 in Pach Deuri C.D. Block. The sex ratio of Sidhwalia C.D. Block is 976 while the sex ratio of Manjha C.D. Block is 975. The sex ratio figures in the age group 0-6 of Bhorey, Uchdagaon, Thawe, Manjha and Sidhwalia C.D. Blocks are higher than the district total and rural averages while Katiya, Bijaipur, Pach Deuri, Kuchaikote, Phulwaria, Hathua, Gopalganj, Barauli and Baikunthpur C.D. Blocks have sex ratios below the district total and rural averages. The urban sex ratio of Gopalganj district is lower than the district total and rural averages.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age Group
		Persons	Males	Females	
1	2	3	4	5	6
1	Katiya	18,725	9,539	9,186	963
2	Bijaipur	22,711	11,590	11,121	960
3	Bhorey	30,176	15,284	14,892	974
4	Pach Deuri	16,894	8,696	8,198	943
5	Kuchaikote	56,196	28,686	27,510	959
6	Phulwaria	22,025	11,250	10,775	958
7	Hathua	36,056	18,444	17,612	955
8	Uchkagaon	26,068	13,198	12,870	975
9	Thawe	19,345	9,722	9,623	990
10	Gopalganj	26,301	13,357	12,944	969
11	Manjha	35,488	17,970	17,518	975

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001 (CONCLD.)

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age Group
		Persons	Males	Females	
1	2	3	4	5	6
12	Barauli	38,857	19,759	19,098	967
13	Sidhwalia	24,437	12,365	12,072	976
14	Baikunthpur	36,930	18,865	18,065	958
	District (Rural) Total:	**410,209**	**208,725**	**201,484**	**965**

It is observed in table – 11 that the sex ratio in the age group 0-6 among the rural population in the C.D. Blocks of the district varies from 990 in Thawe C.D. Block to 943 in Pach Deuri C.D. Block. The sex ratio of Sidhwalia C.D. Block is 976 while the sex ratios of Uchkagaon and Manjha C.D. Blocks are 975 and 975 respectively. The sex ratio figures of Bhorey, Uchkagaon, Thawe, Gopalganj, Manjha, Barauli and Sidhwalia C.D. Blocks are higher than the district rural average while Katiya, Bijaipur, Pach Deuri, Kuchaikote, Phulwaria, Hathua and Baikunthpur C.D. Block have sex ratios below the district average.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	81	6	5,960	1.5
700-749	35	3	5,666	1.4
750-799	62	4	11,129	2.7
800-849	102	7	23,721	5.8
850-899	141	10	44,745	10.9
900-949	202	15	86,226	21.0
950-999	194	14	86,191	21.0
1000-1099	297	21	95,782	23.3
1100+	269	19	50,789	12.4
District (Rural) Total	**1,383**	**100**	**410,209**	**100.0**
Sex ratio (Rural) for District:			**965**	

It is observed in the table that 21.5 percent of inhabited villages in Gopalganj district lies in the very favourable sex ratio range of 1000-1099 in the age group 0-6. 269 villages (19.5%) fall in the most favourable sex ratio range of 1100 and above in the age group. 202 villages (14.6%) are in the sex ratio range of 900-949. 194 villages (14.0%) are in the sex ratio range of 950-999. 141 villages (10.2%) are in the sex ratio range 850-899. 102 villages (7.4%) are in the unfavourable sex ratio range of 800-849. 81 villages (5.9%) are in the lowest sex ratio range of less than 700. The villages in the highest sex ratio range of 1100 and above constitute 12.4 percent of the rural population of the district.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

The above table shows that the percentage of scheduled castes in Gopalganj district is 12.4 percent of the total population in the district. Within the district highest percentage of scheduled castes population is in Bigaipur C.D. Block with 16.0 percent closely followed by Katiya, Bhorey, Pach Deuri and Thawe with 14.7, 13.3, 13.3 and 13.3 respectively. The percentage of scheduled castes population in Gopaalganj district for the urban areas is 10.2 percent which is lower than the district total and rural averages. The percentage of scheduled tribes population in Gopalganj district is only 0.3 percent of the total population. The highest percentage of scheduled tribes is in Thawe C.D. Block with 0.8 percent while the lowest percentage is in Phulwaria, Barauli, Sidhwalia and Baikunthpur C.D. Blocks with only 0.1 percent. The percentage of scheduled tribes population in Gopalganj district for the urban areas is 0.2 percent which is lower than the district total and rural averages.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7

10	Gopalganj	130,955	15,414	218	11.8	0.2
11	Manjha	172,233	22,488	253	13.1	0.1
12	Barauli	180,964	20,315	143	11.2	0.1
13	Sidhwalia	113,914	13,869	130	12.2	0.1
14	Baikunthpur	177,196	19,294	203	10.9	0.1
	District (Rural) Total: 2,022,048		**253,922**	**5,883**	**12.6**	**0.3**

The above table indicates that the percentage of scheduled castes in Gopalganj district is 12.6 percent of the total population. The highest percentage of scheduled castes population is in Bijaipur followed by Katiya, Bhorey, Pach Deuri, Thawe and Manjha C.D. Blocks with 14.6, 13.3, 13.3, 13.3 and 13.1, percent, respectively. The percentages of scheduled castes population in Katiya, Bijaipur, Bhorey, Pach Deuri, Thawe and Manjha C.D. Blocks are higher than the district rural average (12.6%). The percentage of scheduled tribes population of Gopalganj district for the rural areas is only 0.3 percent. The highest percentage of scheduled tribes population is in Thawe C.D. Block with 0.8 percent.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Sceduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	253	18.3	0	0.0
Less than 5	179	12.9	7,010	2.8
5-10	337	24.4	61,135	24.1
11-20	339	24.5	101,704	40.1
21-30	157	11.4	50,017	19.7
31-40	53	3.8	15,809	6.2
41-50	26	1.9	7,411	2.9
51-75	25	1.8	7,375	2.9
76 and above	14	1.0	3,461	1.4
District Total	**1,383**	**100.0**	**253,922**	**100.0**

From the above table, it is apparent that there are 339 villages accounting for 24.5 percent of the inhabited villages in the district where the population of scheduled castes ranges between 11 and 20 percent of the total population. This is closely followed by villages where the population of the scheduled castes ranges between 5 and 10 percent of the total population. These 337 villages account for 24.4 percent of the inhabited villages. There are 179 villages accounting for 12.9 percent of the inhabited villages where the percentage of scheduled castes population to total population is less than 5 percent. There are 157 villages accounting for 11.4 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 21 and 30 percent. There are 25 villages accounting for 1.8 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 51 and 75 percent. There are 14 villages accounting for 1.0 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 76 and above percent. There is no scheduled castes population in 18.3 percent of the inhabited villages in the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Scheduled Tribes		
		Percentage	Population	Percentage
1	2	3	4	5
Nil	1,215	87.9	0	0.0
Less than 5	141	10.2	4,139	70.4
5-10	15	1.1	874	14.9
11-20	6	0.4	407	6.9
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	1	0.1	293	5.0
51-75	1	0.1	19	0.3
76 and above	4	0.3	151	2.6
District Total	**1,383**	**100.0**	**5,883**	**100.0**

The above table shows that there are 141 villages accounting for 10.2 percent of the inhabited villages in the district where the percentage of scheduled tribes population to total population is less than 5 percent. There are 15 villages accounting for 1.1 percent of the inhabited villages where the percentage of scheduled tribes population to total population is between 5-10 percent of the total population. There are 6 villages accounting 0.4 percent of the inhabited villages in the district where the percentage of scheduled tribes population ranges between 11 and 20 percent of the total population. There are only 4 villages accounting for 0.3 percent of the inhabited villages where the percentage of scheduled tribes population is between 76 and above percent of the total population. There are as many as 1215 villages which constitute 87.9 percent of the total inhabited villages in the district which have no scheduled tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA^/ Town+*	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

10	Gopalganj	929	1,076
11	Manjha	976	1,162
12	Barauli	1,040	1,072
13	Sidhwalia	975	1,031
14	Baikunthpur	992	990
	District (Rural) Total	**986**	**1,073**

Table – 19 shows that the sex ratio of scheduled castes varies from 1042 in Katiya C.D. Block to 929 in Gopalganj C.D. Block. The sex ratio in Barauli C.D. Block is 1040 while the sex ratio in Bhorey is 1033. The sex ratio figures of Katiya, Bijaipur, Bhorey, Pach Deuri, Phulwaria, Barauli and Baikunthpur C.D. Blocks are higher than district rural average.

The sex ratio of scheduled tribes varies from 1162 in Manjha C.D. Block to 988 in Katiya C.D. Block. The sex ratio in Bijaipur C.D. Block is 1137 while the sex ratio in Pach Deuri C.D. Block is 1123. The sex ratio figures of Bijaipur, Bhorey, Pach Deuri, Hathua, Uchkagaon, Thawe, Gopalganj and Mangha C.D. Blocks are higher than the district rural average.

The percentages of scheduled castes population to total population in Gopalganj(M) and Barauli(NA) are 10.6 and 9.8 percent respectively. The percentage of scheduled tribes population to total population is 0.2 percent for the urban areas of the district. The highest percentage of scheduled tribes population to total population is in Kataiya(NA) with 0.6 percent where as it is lowest in Mirganj(NA) and Barauli(NA) with 0.1 percent.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town^/+*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Barauli (NA)	975	636
2	Gopalganj (M)	854	882
3	Kataiya (NA)	957	931
4	Mirganj (NA)	956	778
Sex ratio (Urban) for the district:		**915**	**877**

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

There is no urban agglomeration in Gopalganj district. There are four statutory towns in the district. The sex ratio of Scheduled Castes in Barauli(NA) is the highest (975) whereas it is lowest (854) in Gopalganj(M). The sex ratios of Kataiya(NA), Mirganj(NA) and Barauli(NA) are higher than the district urban average(915).

The sex ratio of Scheduled Tribes in Kataiya(NA) is the highest(931) whereas it is lowest (636) in Barauli(NA). The sex ratios of Scheduled Tribes in Kataiya(NA) and Gopalganj(M) are higher than the district urban average (877).

	Total:	**749,715**	**497,531**	**252,184**	**1,272,333**	**510,439**	**761,894**	**46.5**	**62.3**	**31.0**	**31.2**

Table – 21 and 22 show that among the C.D. Blocks in the district Thawe C.D. Block has the highest proportion of literate population (54.5%) followed by Gopalganj C.D. Block (53.3%). The literacy rates for Hathua, Uchkagaon and Phulwaria C.D. Blocks are 51.6, 51.4 and 49.1 percent respectively. Male literates out number female literates in all the C.D. Blocks of Gopalganj district. The highest proportion of male literates is again in Thawe C.D. Block with 68.6 percent closely followed by Hathua C.D. Block with 67.8 percent. Male literacy rates for Uchkagaon, Phulwaria and Gopalganj C.D. Blocks are 66.3, 65.7 and 65.6 percent respectively. Again Thawe C.D. Block has the highest female literacy rate with 39.9 percent while Pach Deuri C.D. Block has the lowest literacy rate among the female with 25.3 percent. Female literacy rates for Uchkagaon, Hathua, Kuchaikote and Katia C.D. Blocks are 36.1, 35.3, 33.3 and 32.8 percent respectively.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	4	0.3	98	0.0
1-10	15	1.1	4,560	0.2
11-20	41	3.0	20,457	1.0
21-30	128	9.3	139,032	6.9
31-40	244	17.6	390,702	19.3
41-50	423	30.6	758,542	37.5
51-60	359	26.0	528,736	26.1
61-70	132	9.5	152,584	7.5
71-80	29	2.1	25,959	1.3
81-90	7	0.5	1,372	0.1
91-99	0	0.0	0	0.0
100	1	0.1	6	0.0
District Total:	**1383**	**100.0**	**2,022,048**	**100.0**
Literacy rate for District:		**47.5**		

The above table shows that in 30.6 percent of the inhabited villages, literacy rate ranges between 41-50 percent. In these 423 villages 37.5 percent of the district rural population live. This is the largest group of villages in the district. This is closely followed by 359 villages (26.0%) with 26.1 percent of the district rural population 17.6 percent of the inhabited villages are such where literacy rate ranges between 31 and 40 percent. 9.5 percent of the inhabited villages are such where literacy rate ranges between 61 and 70 percent. 9.3 percent of the inhabited villages i.e. 128 villages are such where literacy rate ranges between 21 and 30 percent. These villages account for 6.9 percent of the district rural population. 29 villages i.e. 2.1 percent of the inhabited villages are such where literacy rate ranges between 71 and 80 percent and these villages account for 1.3 percent of the district rural population. 0.5 percent of the inhabited villages i.e. 7 villages are such where literacy rate ranges between 81 and 90 percent and these villages account for only 0.1 percent of the district rural population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status UA^/ Town+*	Number of literates and illiterates									Gap in male-female literacy rate

	District (Rural)										
	Total:	**63,552**	**46,650**	**16,902**	**190,370**	**81,187**	**109,183**	**32**	**46.7**	**17.1**	**29.6**

Table – 25 shows that literacy rate among the Scheduled Castes is highest i.e. 37.4 percent in Thawe C.D. Block where as it is lowest i.e. 25.5 percent in Sidhwalia C.D. Block. It is observed that the literacy rate among the Scheduled castes for the district is 32.0 percent. As regards percentage of male literacy rate among the Scheduled Castes it is highest i.e. 52.1 percent in Thawe C.D. Block where as it

is lowest i.e. 39.3 percent in Sidhwalia C.D. Block. In the case of female literacy rate among the scheduled castes it is again highest i.e. 22.0 percent in Thawe C.D. Block where as it is lowest i.e. 11.4 percent in Sidhwalia C.D. Block. It is found that the gap between male and female literacy rate is highest i.e. 32.6 percent in Hathua C.D. Block where as it is lowest i.e. 27.7 percent in Katiya and Baikunthpur C.D. Blocks.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	33	2.9	1,038	0.4
1-10	45	4.0	6,231	2.5
11-20	140	12.4	34,567	13.6
21-30	280	24.8	80,341	31.6
31-40	305	27.0	79,130	31.2
41-50	190	16.8	37,221	14.7
51-60	86	7.6	12,203	4.8
61-70	33	2.9	2,509	1.0
71-80	8	0.7	365	0.1
81-90	6	0.5	309	0.1
91-99	0	0.0	0	0.0
100	4	0.4	8	0.0
District Total:	**1130**	**100.0**	**253,922**	**100.0**
Literacy rate for District (Rural):		**32.0**		

The above table shows that in case of literacy among the Scheduled Castes in the villages of the district the highest number of villages i.e. 27.0 percent fall in the literacy range of 31-40 percent followed by 280 villages i.e. 24.8 percent of the total villages in the district which fall in the literacy range of 21-30 percent. 190 villages i.e. 16.8 percent of the total villages in the district are such which fall in the literacy range of 41-50 percent. 140 villages i.e. 12.4 percent of the total villages in the district are such which fall in the literacy range of 11-20 percent. 86 villages i.e. 7.6 percent of the total villages in the district are such which fall in literacy range of 51-60 percent. 45 villages i.e. 4.0 percent of the total villages in the district are such fall in the literacy range of 1-10 percent. 33 villages i.e. 2.9 percent of the total villages in the district are such which fall in the literacy range of 61-70 percent. Again 33 villages i.e. 2.9 percent of the total villages in the district are such which fall in the no literacy range i.e. 0 percent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

	District (Rural)										
	Total:	**1,729**	**1,165**	**564**	**4,154**	**1,673**	**2,481**	**36.8**	**52**	**23**	**29**

The table – 28 shows that among the Scheduled Tribes the percentage of literates is highest i.e. 75.4 percent in Phulwaria C.D. Block where as it is lowest i.e. 25.1 percent in Pach Deuri and Manjha C.D. Blocks in the district. It is observed that the literacy rate among Scheduled Tribes for the district is 36.8 percent. As regards percentages of male literacy rate among the Scheduled Tribes it is highest i.e. 93.8 percent in Phulwaria C.d. Block where as it is lowest i.e. 34.0 percent in Pach Deuri C.D. Block. In case of female literacy rate among the Scheduled Tribes it is highest i.e. 59.5 percent again in Phulwaria C.D. Block where as it is lowest i.e. 8.3 percent in Manjha C.D. Block. Such higher percentage in literacy rate among the Scheduled Tribes population is because of thin tribal population in the district.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	31	18.5	403	6.9
1-10	12	7.1	454	7.7
11-20	15	8.9	776	13.2
21-30	19	11.3	520	8.8
31-40	21	12.5	982	16.7
41-50	24	14.3	1,470	25.0
51-60	16	9.5	628	10.7
61-70	7	4.2	173	2.9
71-80	9	5.4	318	5.4
81-90	6	3.6	116	2.0
91-99	1	0.6	20	0.3
100	7	4.2	23	0.4
District Total:	**168**	**100.0**	**5,883**	**100.0**
Literacy rate for District (Rural):			**36.8**	

The Table 29 shows that in 18.5 percent villages are illiterate which contain 6.9 percent (403) scheduled tribes population of the district. 24 villages i.e. 14.3 percent fall in the literacy range of 41-50 percent. 21 villages i.e. 12.5 percent fall in the literacy range of 31-40 percent. 19 villages i.e. 11.3 percent fall in the literacy range of 21-30 percent. 16 villages i.e. 9.5 percent fall in the literacy range of 51-60 percent. 12 villages i.e. 7.1 percent fall in the literacy range of 1-10 percent. 9 villages i.e. 5.4 percent fall in the literacy range of 71-80 percent. 7 villages i.e. 4.2 percent fall in the highest literacy range of 100.0 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table – 31 and 32 show that the work participation (WPR) in Gopalganj district is 21.7 percent as main workers and 8.1 percent as marginal workers. Proportion of non workers in the district is 70.2 percent.

Among the main workers male participation rate in the district is 36.9 percent while that of females is only 6.6 percent as per 2001 census. The proportion of main workers is the highest (23.6%) in Pach Deuri and Sidhwalia C.D. Blocks and the lowest (19.3%) in Hathua C.D. Block.

Out of 14 C.D. Blocks, WPR of seven C.D. Blocks above the district average (8.4%). The proportion of marginal workers is the highest (12.7%) in Phulwaria C.D. Block and the lowest (4.4%) in Baikunthpur C.d. Block. The proportion of total workers is the highest (33.5%) in Pach Deuri and Phulwaria C.D. Blocks.

The proportion of non workers among males in the district is 55.3 percent while that of females is 84.5 percent. The proportion of non workers is the highest (74.3%) in Baikunthpur C.D. Block and the lowest (66.5%) in Pachu Deuri and Phulwaria C.D. Blocks.

\+ To be arranged in alphabetical order

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

There is no urban agglomeration in Gopalganj district. The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. The work participation rate (WPR) in the urban areas of the district is 21.6 percent as main workers and 4.3 percent as marginal workers. Proportion of non worker in the urban areas of the district is 74.1 percent. Among the main workers male work participation rate in the district(U) is 37.2 percent while that of females is only 4.8 percent as per 2001 census. The proportion of main workers is the highest (23.2%) in Barauli(NA) and the lowest (20.3%) in Gopalganj(M). The proportion of marginal workers is the highest (7.0%) in Kataiya(NA) and the lowest (2.4%) in Gopalganj(M). The proportion of total workers is the highest (30.1%) in Barauli(NA) and the lowest (22.7%) again in Gopalganj(M).

The proportion of non workers among males in the district(U) is 57.7 percent while that of females is 91.7 percent. The proportion of non workers is the highest (77.3%) in Gopalganj(M) and the lowest (69.9%) in Barauli(NA).

Note :- Percentage of workers to total workers are given in brackets

From the table – 34 the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (41.0%) and agricultural labourers (40.1%) together constitute 81.1 percent of the total workers of the district. The agriculture sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies from 52.1 percent in Bijaipur C.D. Block to 23.8 percent in Gopalganj C.D. Block. Proportion of agricultural labourers varies from 48.0 percent in Manjha C.D. Block to 33.1 percent in Uchkagaon C.D. Block. Proportion of household industry workers varies from 3.8 percent in Barauli C.D. Block to 1.6 percent in Pach Deuri C.D. Block. Proportion of the total workers of the district. Proportion of other workers varies from 32.7 percent in Gopalganj C.D. Block to 8.1 percent again in Pach Deuri C.D. Block. Proportion of other worker is 16.2 percent of the total workers of the district.

Note: Percent of Worker to total workerre given in brackets

From the table – 35, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, Cultivators, agricultural labourers, household industry workers and other economic activities. The economic activity in the rural areas of the district is primarily dependent on agriculture which is supported by the fact that the cultivators (42.4%) and agricultural labourers (41.1%) together constitute 83.5 percent of the total workers of the district. The agriculture sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 52.1 percent for Bijaipur C.D. Block to 29.1 percent for Gopalganj C.D. Block. The proportion of agricultural labourers varies between 48.4 percent for Gopalganj C.D. Blocks to 36.0 percent for Bijaipur C.D. Block. The proportion of household industry workers is only 2.5 percent of the total workers of the district. The proportion of household industry workers varies between 3.7 percent for Manjha C.D. Block to 1.6 percent for Pach Deuri C.D. Block. The proportion of other workers is 14.0 percent of the total workers of the district. The proportion of other workers varies between 20.7 percent for Thawe C.D. Block to 8.1 percent again for Pach Deuri C.D. Block.

Note :- Percentage of workers to total workers are given in brackets

^ The names of constituents of U.A. are given separately

* In case of towns having outgrowth an asterisk mark should be placed against their names to indicate that they have outgrowths which are not separate towns.

There is no urban agglomeration in Gopalganj district. From the table, the relative importance of the main sphere of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators agricultural labourers, household industry workers and other economic activities. The cultivators constitute 16.1 percent and agricultural labourers constitute 22.4 percent of the total workers of the district. The proportion of cultivators varies between 27.6 percent for Barauli(NA) to 6.4 percent for Gopalganj(M). The proportion of agricultural labourers varies between 34.8 percent for Kataiya(NA) to 11.7 percent for Mirganj(NA). The proportion of household industry workers is 5.0 percent of the total workers of the district. The proportion of household industry workers varies between 6.9 percent for Mirganj(NA) to 4.2 percent for Gopalganj(M). The proportion of other workers is 56.6 percent of the total workers of the district. The proportion of other workers varies between 75.3 percent for Gopalganj(M) to 35.0 percent for Barauli(NA).

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37to 47:

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table 37 gives the distribution of villages according to the availability of different amenities in the district.

Educational amenity : There are as many as 884 villages accounting for 63.9 percent of the total number of inhabited villages (1383) in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D. Block Gopalganj with 79.7 percent closely followed by Hathua C.D. Block with 78.8 percent. The smallest proportion of villages with educational facility is observed in C.D. Block Bhorey with 44.1 percent.

Medical amenity : The availability of medical amenity in the villages is quite low and only 18.9 percent villages have got it. Among the C.D. Blocks, Uchkagaon has the largest proportion of villages with medical facility, the percentage being 64.9 percent. It is followed by Barauli C.D. Block with 61.3 percent. Pach Deuri C.D. Block on the other hand has the minimum proportion of villages (4.3%) where medical amenity is available.

Improved drinking water : There are as many as 1376 villages accounting for 99.5 percent of the inhabited villages in the district where improved drinking water facility is available. Among the C.D. Blocks, Katiya, Bijaipur, Bhorey, Pach Deuri, Phulwaria, Uchkagaon, Thawe, Gopalganj and Barauli have 100.0 percent of villages where improved drinking water facility is available. Baikunthpur C.D. Block on the other hand has the minimum proportion of villages (96.7%) where improved drinking water facility is available.

Post office : Postal facilities are available only in 198 villages out of 1383 inhabited villages (14.3%) in the district. Gopalganj C.D. Block has the maximum number of villages having postal facility (30.5%). Pach Deuri C.D. Block has minimum number of villages having postal facility (5.4%).

Telephone : The availability of telephone facility in the villages is quite low and only 4.8 percent villages have got it. Among the C.D. Blocks, Thawe has the maximum number of villages having telephone f acility (22.9%). While the villages of Bijaipur, Pach Deuri and Uchkagaon C.D. Blocks still do not have telephone facility.

Transport Communication : Transport Communication facilities are available only in 199 villages out of 1383 inhabited villages (14.4%) in the district. Baikunthpur C.D. Block has the maximum number of villages (46.7%) which are connected by bus or rail or navigable river/canal services, etc. Bhorey C.D. Block has the minimum number of villages (3.9%) having transport communication facility.

Bank : Banking facility is available only in 71 villages out of 1383 inhabited villages (5.1%) in the district. Among the C.D. Blocks, Phulwaria has the maximum number of villages having banking facility (8.2%). Gopalganj C.D. Block has the minimum number of villages having banking facility (1.7%).

Agricultural Credit Societies : Agaricultural Credit Societies are available only in 118 villages out of 1383 inhabited villages (8.5%) in the district. Hathua C.D. Block has the maximum number of villages having agricultural credit societies (39.4%) while Kuchaikote has the minimum number of villages with 0.5 percent.

Approach by pucca road : The facility is available in 549 villages out of 1383 inhabited villages (39.7%) in the district. Bijaipur C.D. Block has the maximum number of villages having pucca approach road (64.0%) while Phulwaria C.D. Block has the minimum number of villages with 18.4 percent.

Power Supply :Electrified villages in the district constitute 31.7 percent of the total number of inhabited villages. Hathua C.D. Block has the maximum number of villages with 73.1 percent while Baikunthpur C.D. Block has electrified the minimum number of villages with only 3.3 percent.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from table no. 38 that educational facility is available to 84.5 percent of the rural population of the district. The proportion varies between the maximum of 93.9 percent in Hathua C.D. Block. It may be of interest to note that proportion of villages in the district enjoying

educational facility is less (being 63.9 percent vide table-37) Than the proportion of population which is as high as 84.5 percent. This may be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can also be seen that the proportion of rural population served by the amenity is of the order of 32.9 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility it may be observed that proportion of rural population served by the amenity is of the order of 99.1 percent which is slightly less than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also in the district as also in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	469	46	2	517
(b) Middle School	937	222	35	1,194
(c) Degree College	190	372	809	1,371
2. Medical:-				
(a) Hospital	328	511	520	1,359
(b) PHC	486	501	322	1,309
3. Post Office	958	189	41	1,188
4. Telephone	455	483	378	1316
5. Bus Service	711	381	136	1,228
6. Banks				
(a) Commercial Bank	800	389	137	1,326
(b) Cooperative Bank	462	536	347	1,345
7. Agricultural Credit Societies	502	495	268	1,265

As regards educational facility it would be seen that there are 517 villages in the district (37.4%) which do not have any Primary School but the facility is available at places situated within 5 kms. for 469 villages, 46 villages enjoy this facility at a distance of 5-10 kms. and only 2 villages enjoy this facility beyond the distance of 10 kms. There are as many as 1194 villages in the district (86.3%) which do not have meddle schools but the facility is available at places situated within 5 kms. for 937 villages, 222 villages at the distance range of 5-10 kms. and 35 villages at the distance range of beyond 10 kms. There are as many as 1371 villages in the district (99.1%) which do not have the facility of degree college but the facility is available at distance range of less than 5 kms. for 190 villages, 372 villages at a distance range of beyond 10 kms.

There are 1359 villages in the district (98.3%) which are without the facility of Hospital and as many as 328 villages enjoy this facility at a distance of less than 5 kms., 511 villages at a distance of 5-10 kms. and 520 villages at a distance of more than 10 kms. There are 1309 villages in the district (94.6%)Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited village in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	158	117	33	20	10	18	8	22	64
	(100.0)	(74.1)	(20.9)	(12.7)	(6.3)	(11.4)	(5.1)	(13.9)	(40.5)
5 -15	655	425	129	102	39	82	31	69	270
	(100.0)	(64.9)	(19.7)	(15.6)	(6.0)	(12.5)	(4.7)	(10.5)	(41.2)
16 - 50	520	313	91	69	18	85	29	27	197
	(100.0)	(60.2)	(17.5)	(13.3)	(3.5)	(16.3)	(5.6)	(5.2)	(37.9)

	0	0	0	0	0	0	0	0	0
District total	**1,383**	**884**	**261**	**198**	**67**	**199**	**71**	**118**	**549**
	(100.0)	**(63.9)**	**(18.9)**	**(14.3)**	**(4.8)**	**(14.4)**	**(5.1)**	**(8.5)**	**(39.7)**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that the maximum number of inhabited villages (47.4%) lie in the distance range of 5-10 kms. from the nearest statutory town. This is followed by villages in the distance range of 16-50 kms. from the nearest statutory town with 37.6 percent. There are 11.4 percent villages in the distance range of less than 5 kms. and 3.6 percent villages in the distance range of 51 and above kms.

Interesting, it can be observed from the table that the proportion of villages having educational facility is 74.1 percent for those situated within 5 kms. from the nearest statutory town and decreases to 64.9 percent in the distance range of 5-15 kms. Thereafter it again decreases to 60.2 percent in the distance range of 16-50 kms. from the nearest town. Similar trend can be observed in the case of medical, telephone and agricultural societies. A different situation is observed in the case of post office, transport communications, banks and approach by pucca road facilities, in that the proportion of villages increases with the increase in the distance group from the nearest town.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited village in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the table no.41 that the maximum number of villages i.e. 392 (28.3%) in the district falls in the population range of 1000-1999 followed by 365 villages (26.4%) having a population range of 500-999. There are 326 villages accounting for 23.6 percent of the inhabited villages in the district which fall in the population range of 1-499. There are 255 villages on accounting for 18.4 percent of the inhabited villages in the district which fall in the population range of 2000-4999.

There are 42 villages accounting for 3.0 percent of the inhabited villages in the district which fall in the population range of 5000-9999 and finally only 3 villages (only 0.2%) in the highest population range of 10,000 and above.

The proportion of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10,000+ which further corroborates the fact that more facilities are generally available in larger than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Katiya	101	10,997	85.4	75.5
2	Bijaipur	125	12,453	89.1	75.1
3	Bhorey	152	14,379	91.8	70.0
4	Pach Deuri	92	8,964	85.4	74.6
5	Kuchaikote	212	24,847	76.6	36.3
6	phulwaria	98	9,426	90.8	78.2
7	Hathua	104	14,587	88.0	78.1
8	Uchkagaon	74	10,282	91.5	88.7
9	Thawe	48	6,843	86.6	78.0
10	Gopalganj	59	15,537	78.2	66.9
11	Manjha	103	13,867	90.0	81.9

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001 (CONCLD.)

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
12	Barauli	75	15,365	86.4	68.1
13	Sidhwalia	48	11,990	85.2	68.4
14	Baikunthpur	92	16,856	84.8	66.1
	District Total:	**1,383**	**186,393**	**85.6**	**69.4**

Note : Cultivable area = irrigated area + unirrigated area

Table – 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It would be seen from the table that 85.6 percent of the total area of the district is utilised for cultivation (cultivable area) and of this 69.4 percent area is found to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Bhorey C.D. Block with 91.8 percent closely followed by Uchkagaon and Phulwaria C.D. Blocks with 91.5 and 90.8 percent respectively. The lowest cultivable area is found in Kuchaikote C.D. Block which is 76.6 percent.

The highest proportion of irrigated area (88.7%) to total cultivable area is found in Uchkagaon C.D. Block followed by Manjha and Phulwaria C.D. Blocks with 81.9 and 78.2 percent respectively. The least proportion of irrigated area is found in Kuchaikote C.D. Block with 36.3 percent which indicates that the villages in this block are deprived of required irrigational facilities.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

		Per capita receipt			Per capita expenditure					
				From all		Public health				
Serial number	Class,name &urban status of the town	Total	Through taxes	other sources	Total	General administration	and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Barauli (NA)	1.9	0.3	1.6	0.9	0.7	0	0	0	0.3
2	II Gopalganj (M)	4.4	1.6	2.8	5.8	3.8	0	1.1	0	0.7
3	IV Kataiya (NA)	0	0	0	0	0	0	0	0	0
4	III Mirganj (NA)	2.4	0.6	1.9	3.1	3.1	0	0	0	0
	District Total	**2.8**	**0.9**	**1.9**	**3.2**	**2.3**	**0**	**0.5**	**0**	**0.4**

The above table gives the details of finances in the statutory towns in terms of per capita receipt and expenditure.There is no urban agglomeration in Gopalganj district.It would be apparent from the above figures that the per capita total receipt is the highest in the case of Gopalganj(M). However, on going into the details of receipts under different heads it can be seen that while the receipt through taxes is less than the receipt through all other sources which is the maximum again in Gopalganj(M).Per capita total expenditure is also highest in Gopalganj(M). Per capita expenditure incurred on general administration is the highest again in the case of Gopalganj(M) while it is lowest in Barauli(NA).Per capita receipt and expenditure is the minimum in the case of Barauli(NA).

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Barauli (NA)	4.3	1.7	0.3	0.3	0
2	Gopalganj (M)	2.0	0.7	0.6	0.4	0.7
3	Kataiya (NA)	1.7	2.2	1.1	0	0
4	Mirganj (NA)	1.3	1.7	1.3	0	0
	District Total	**2.5**	**1.4**	**0.7**	**0.2**	**0.3**

The above table gives the details of different categories of educational institutions per ten thousand population in the towns of the district. It would be seen from the table that institutions like secondary/matriculation level school and college account for an average of 0.7 and 0.3 institutions per ten thousand population respectively in the urban areas of the district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Barauli(NA)	2
2	Gopalganj(M)	14
3	Kataiya(NA)	11
4	Mirganj(NA)	3
	Distrct Total	**8**

The above table furnishes information regarding availability of beds in medical institutions in the towns of the district.The number of beds in medical institutions per ten thousand population for urban areas of the district works out to be 8.0. The availability of beds in medical institutions is the highest in the case of Gopalganj(M) having 14.0 beds per ten thousand population. Barauli(NA), on the other hand, has the lowest number of such beds (2.0) among all the four towns in the district

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Barauli	34,653	430	1.2
2	Kataiya	17,912	750	4.2
3	Mirganj	23,576	355	1.5
	District Total	**76,141**	**1,535**	**2.0**

The above table indicates that slum population in Kataiya(NA) constitutes 4.2 percent of the total population of the town while Barauli(NA) constitutes 1.2 percent of the total population of the town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Barauli (NA)	Edible Oil	Jute
		Tobacco	Tobacco
		Rope	CottonCloth
2	Gopalganj (M)	Sugar	Sugar
		Gur	Leather
		Bamboo Goods	
3	Kataiya (NA)	Gur	Gur
		Rice	Rice
		Chira	Wheat
4	Mirganj (NA)	Wine	Wine
		Sugar	Sugar
		Bidi	Potato

Table 47 presents the most important commodities manufactured in the towns and exported from the towns of the district.In Barauli(NA) and Gopalganj(M) it has been observed that tobacco and Sugar respectively are the most important commodities which are manufactured in the towns are also the most important items which are exported to other places. In Mirganj(NA) wine and Sugar are the most important commodities manufactured and exported on the other hand, in Kataiya(NA) Gur and Rice are the most important commodities manufactured and exported.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	Median number of rooms	2	2	2	1	1	1	1	1	1
District total		**328,079**	**308,465**	**19,614**	**50,281**	**47,775**	**2,506**	**1,973**	**1,874**	**99**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 shows that there are as many as 320923 households accounting for 97.8 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in two rooms is the highest (33.7%) where as it is the lowest (0.8%) dwelling in no exclusively. The median number of rooms is 2 for the total households in the tenure status of owned category.

There are 49338 Scheduled Castes households accounting for 15.4 of the total households dwelling in owned houses. The proportion of households dwelling in single rooms is the highest (47.0%) where as it is lowest (1.2%) dwelling in no exclusive room. There are 1778 Scheduled Tribes households accounting for only 0.6 percent of the total households dwelling in owned houses. The proportion of

households dwelling in two rooms is the highest(38.0%) where as it is lowest (1.7%) dwelling in no exclusive room.

There are 4248 households accounting for 1.3 percent of the total households of the district dwelling in rented houses. The proportion of households dwelling in two rooms is the highest (38.9%) where as it is lowest (2.0%) dwelling in no exclusive room. There are 395 Scheduled Castes households accounting for 9.3 percent of the total households dwelling in tented houses and the median number of rooms is 2. There are only 71 Scheduled Tribes accounting for 1.7 percent of the total households dwelling in rented houses and the median number of rooms is 1.

Similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

	District Total:	**57.9**	**8.5**	**33.5**	**56.7**	**8.6**	**34.7**	**77.5**	**6.8**	**15.7**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the above table that of the total rural households maximum proportion of households i.e. 56.7 percent live in permanent houses followed by 34.7 percent living in temporary houses and 8.6 percent living in Semi permanent houses.

In the case of urban households in the district, the maximum proportion of households i.e. 77.5 percent live again in permanent houses followed by 15.7 percent in temporary houses and 6.8 percent in semi permanent houses.

Among the C.D. Blocks in the district, Thawe C.D. Block has the maximum proportion of rural households living in permanent houses(76.2%) followed by Uchkagaon and Hathua C.D. Blocks with 69.5 and 67.4 percent respectively. Gopalganj C.D. Block has the minimum proportion of households living in permanent houses with 41.3 percent. In the case of temporary houses, Pach Duri C.D. Block has maximum proportion of households living in temporary houses (53.5%) followed by Gopalganj and Sidhwalia C.D. Block with 49.7 and 38.6 percent respectively. Thawe C.D. Block has the minimum proportion of households living in temporary houses with 15.4 percent. In the case of semi permanent houses, Bijaipur C.D. Block has the maximum proportion of households living in semi permanent houses (14.4%) followed by Katiya and Baikunthpur C.D. Blocks with 13.2 and 11.0 percent respectively. Pach Deuri C.D. Block has the minimum proportion of households living in semi permanent houses with 3.6 percent.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table – 50 shows that of the total rural households 285055 households i.e. 92.4 percent have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Bijaipur C.D. Block with 96.3 percent where as it is lowest in Baikunthpur C.D. Block with 88.5 percent.

As regards electricity it is found that only 4.4 percent of the rural households in the district have electricity. The highest proportion of households with electricity is in Thawe C.D. Block with 11.9 percent where as it is lowest in Baikunthpur C.D. Block with 0.3 percent.

Only 6.7 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Thawe C.D. Block with 10.2 percent where as it is lowest in Pach Deuri C.D. Block with 4.3 percent.

Only 9.5 percent of the total rural households in the district have toilet facility. The highest proportion of households having toilet facility is again in Thawe C.D. Block with 17.8 percent where as it is lowest in Pach Deuri C.D. Block with 3.8 percent.

32.4 percent of the total rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Hathua C.D. Block with 56.3 percent where as it is lowest in Sidhwalia C.D. Block with 7.3 percent.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table – 51 shows that 44.5 percent of the total rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Baikunthpur C.D. Block (55.1%) where as it is lowest in Phulwaria C.D. Block (30.6%).

50.6 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D. Blocks, highest proportion of households using crop residue as fuel for cooking is 65.9 percent in Phulwaria C.D. Block where as it is lowest in Baikunthpur C.D. Block with 38.1 percent.

Only 3.6 percent of the rural household in the district use Cowdung cake as fuel for cooking. Among the C.D. Blocks, the proportion of households using cowdung cake as fuel for cooking is highest(5.5%) in Baikunthpur C.D. Block where as it is lowest (2.2%) in Hathua C.D. Block.

In the case of cooking gas (L.P.G.) there are 1988 households accounting for only 0.6 percent of the rural households in the district using it for cooking. As regards Kerosene there are only 762 households accounting for 0.2 percent of the rural households in the district using it for cooking. Similar trend can be observed in respect of other types of fuel.

It would be seen from table – 52 that there are 108086 households accounting for 35.0 percent of the total rural households in the district availing banking services. In this regard the highest proportion of households can be observed in Uchkagaon C.D. Block (42.3%) where as it is lowest in Gopalganj C.D. Block (23.9%).

There are 100189 households accounting for 32.5 percent of the total rural households in the district possessing radio/transistor. In this regard the highest proportion of households is in Bijaipur C.D. Block (37.9%) where as it is lowest in Gopalganj C.D. Block (23.1%).

There are 14900 households accounting for 4.8 percent of the rural households in the district possessing television. In this regard the highest proportion of households is in Hathua C.D. Block (7.1%) where as it is lowest in Pach Deuri C.D. Block (2.7%).

There are only 2718 households accounting for 0.9 percent of the rural households in the district possessing telephone. In this regard the highest proportion of households is in Thawe C.D. Block (2.7%) where as it is lowest in Barauli C.d. Block (0.4%).

Similar trend can be observed in respect of other specified assets also both in the district as also in its development blocks.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

The district of Gopalganj has ten Community Development Blocks during 1991 Census. Now (during 2001 Census) it has fourteen Community Development Blocks.

Fairs and festivals are held regularly in the district by different communities in complete harmony.

(ix)Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Thawe

A village situated 6 kms. South of Gopalganj. It is a junction station of the North-Eastern Railway of the Mashakh-Thawe section and the Siwan-Gorakhpur loop. In the village there are remains of an old fort but the history of the fort is obscure. The Hathwa Raja had a palace there but is now in decadent state. Close by the residence of the Hathwa Raja there is an old temple dedicated to the goddess Durga. Within the enclosure of the temple there is a peculiar tree, the botanical family of which has not yet been identified. The tree has grown up like the cross. Various legends are prevalent in connection with the idol and the tree. Food for jackals is still offered in the nearby jungle and a big fair is annually held in the month of Chait (March-April).

Dighwa Dubauli

A village in the extreme east of Gopalganj, 56 kms. north of Chapra and 25 Kms. south-east of Gopalganj. It contains some ancient remains ; of which the renowned historian Mr. Carlleyle has given the following account. At Dighwa Dubauli there is an ancient site and two extraordinary pyramidal-shape mounds. These two extraordinary mounds are situated close to the south-east of the village, and east and west of each other. The western mound is situated almost adjoining the south-eastern end of the village,

and the eastern mound is situated at the distance of 640 feet to the east-south-east of the other, and close to the road. There is an old well here. A historical copper-plate, known as the Dighwa Dubauli plate dating back to 761-2 A.D. was found in this village.

Hathwa

A village in the district situated about 4 kms. west of Mirganj. The place is closely associated with the Hathwa Raj about which the District Gazetter of Saran 1960 mentions as follows.

The Hathwa Raj family, which like the families of the Maharajas of Benares, Bettiah and Tikari is of Bhumihar Brahman caste is one of the oldest of the aristocratic families of Bihar. This family, which was originally known as that of Rajas of Husepur, claims an antiquity anterior to the Muhammadan conquest of India and is said to have been settled in Saran for more than a hundred generations. The genealogical tree of the family shows a line of 103 Rajas, the patronymic of the earlier Rajas being Sen, which was changed to Singh with the 16th in descent, to Mal, with the 83rd and to Sahi with the 87th of the line. The title of Maharaja seems to have been conferred by the Emperor of Delhi on the 86th Raja, Kalyan Mal and that of Maharaja Bahadur on the 87th Khem Karan Sahi. The earlier history of the family is obscure. The authentic history of the Hathwa family commence with the time of Fateh Sahi, who was Maharaja of Husepur when the East India Company obtained the Diwani of Bengal, Bihar and Orissa in 1765.

Chhattardhari Sahi, a grand nephew of Fateh Sahi and grandson of Basant Sahi, in whose time the family seat was removed from Husepur to Hathwa rendered valuable assistance at the time of the Santhal rebellion and also during the Mutiny, the service rendered by him in 1857 receiving the special commendation of Government. Chhattardhari Sahi who died in 1858 had two sons, both of whom died before their father, leaving two sons each ; but during his lifetime he had nominated as his heir, Rajendra Pratap Sahi, his eldest great-grandson whose father had waived his right. The succession was contested by two other grandsons of deceased Maharaja, one of whom, Bir Pratap Sahi, fought the case till it was decided by the Privy Council in favour of Rajendra Pratap Sahi. It was decided that the Hathwa Raj is an impartible raj which descends under the Kulachar or family rule of inheritance to the eldest son, to the exclusion of all his younger brothers, who are provided with sufficient land or an allowance in money for their maintenance.

Rajendra Pratap Sahi rendered good service in re-establishing order in the district at the close of the Mutiny and was granted some confiscated villages in old Shahabad as a reward for his services. He was succeeded by his son Krishna Pratap Sahi who received the title of Maharaja Bahadur and was made a K.C.I.E. in 1889.. He died in 1896 and was succeeded by his son, the present Maharaja, Guru Mahadeo Asram Prasad Sahi. He was then only three years old and the estate was again taken under the management of the court of wards; it was released in 1911 when the young man was placed under the guardianship of his mother. In 1914 he was installed on the gaddi by Sir Charles Bayley, the then Lt. Governor of Bihar and Orissa and also received the title of Maharaja Bahadur. The Kaiser-I-Hind gold medal was conferred on the Dowager-Maharani in 1900 for the munificence of her charitable donations. The family residence is at Hathwa, 9 kilometers north of Siwan, where Maharaja Krishna Pratap Sahi built a palace, a large modern building with one of the finest Durbar halls in India.

Husepur

A village situated in the north-west of the district is on the western bank of Jharahi river. Historically this village is of some interest as it was formerly headquarters of the Maharajas of Hathwa when they were still rulers of country. Contiguous to it in the north-east is Kalyanpur which was the site of still earlier residence. Mounds of bricks overgrown with jungle, is now left, which mark the ruins of old forts, and of moats now almost filled up. Kalyan Mal, who was the first in the line to receive the title of Majharaja from the Mughal Emperor, gave this name to the village of Kalyanpur, a nearby village as well as to the surrounding paragana which is called Kalyanpur Kuari. At Kalyanpur besides large tanks and wells the ruins of the fortress of Kalyan Mal are still traceable. Maharaja Khem Karan Sahi, descendant of Kalyan Mal, having removed his residence of Kalyanpur and built a fort there, that place was the headquarters of the family till Fateh Sahi became a rebel.

Jadopur

A Village 8 kms. to the north of Gopalganj where Fateh sahi had killed his cousin Basant Sahi as he was enraged at the treachery of his cousin. A big pipal tree marks the scene of his death. The widow of Basant Sahi thereupon immolated herself on the funeral pyre, with thirteen of her handmaids holding the head of her deceased husband in her lap. A big banyan tree in the jungle to the east of the ruined fort at Husepur still marks the site of her death and there are fourteen small mounds of earth under the tree held sacred to the memory of sati members of the Hathwa Raj family do puja there, as also under the pipal tree at Jadopur where Basant Sahi was killed.

Gopalganj

It is the headquarters of the district of the same

name. It lies on the west bank of Gandaki river, about 3 kms. from the main Gandak embankment, 93 Kms. north from Chapra, 34 Kms. north-east of Siwan with which it is connected by a good metalled road and also by a loop line of the North Eastern Railway running from Siwan to Thawe and on to Gorakhpur. It is growing township. It was made the subdivisional headquarters in 1875 when it was only a tiny hamlet. It has developed considerably since then. The extension of the Mashrakh-Thawe line and the sugar factory at Harkhua brought in commercial prosperity to Gopalganj.

Mirganj

Mirganj is a townsship in Gopalganj district situated 16 Kms. north-west of Siwan and nearly midway between it and Gopalganj. It is a place of considerable commercial importance, being a centre at which grain from north and north-west is collected for export to Patna and elsewhere, Several Patna merchants have agents here, especially for linseed, cotton, gur and pulse. Being connected by both rail and metalled road it has considerable importance for trade. These commodities are sent of Mirganj market from the adjacent villages. The loop line from Siwan to Gorakhpur passes through Mirganj, connecting it with Railway line having Hathwa Railway station. Hathwa is only 4 Kms. away. After the passing of the Bihar Land Reforms act, 1950, the Mirganj bazar which was formerly the property of Hathwa estate had vested in the State.

It is said that Mirganj was named after a saint Mir Saheb who lived there for a long time. There is an unconfirmed story that the forefathers of the present Hathwa Maharaj granted Mirganj to a panda or a priest of Gaya from whom it was latter purchased by the high officials of the estate.

(x)Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The district is mainly agrarian in nature. Paddy is the most important of the food crops in the district. One - fifth of it is Bhadai rice, harvested in the autumn and the remaining four fifths is Aghani or winter rice.

A village in the district situated about 4 kms. west of Mirganj. The place is closely associated with the Hathwa Raj about which the District Gazetter of Saran 1960 mentions in detail.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publication which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to

the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Part-B : Primary Census Abstract

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II
ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Gopalganj	1991	53	54	60	68
	1981	81	97	108	124

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in Annexure II as q(1), q(2), q(3) and q(5) it is observed that there has been decline in child mortality over decade (in 1991 census as compared to 1981 census) both in the district as well as state. An interesting feature which can be noticed from the Annexure is that the child mortality at the ages 1,2,3 and 5 was lower in the district compared to the state. It indicates that the pace of decline in child mortality had been faster in the district vis-à-vis the state.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the districts and the state(1991-Census)	
	State	District
1	2	3
CBR	36.2	37.2
TFR	5.3	5.5
TMFR	5.9	6.2
GFR	163	167
GMFR	186	188
Child woman ratio	66.6	67.4
No. of children ever born per woman in age group (45-49)	4.1	4.1
Mean age at marriage	16.5	15.6

Some other fertility measures for Gopalganj district and the state are furnished in above annexure III.

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are higher in Gopalganj district than the state as a whole in 1991 Census.

The child woman ratio is found to be higher in Gopalganj district compared to the state average. Number of children ever born per woman in age-group 45-49 in Gopalganj district is equal compared to the state avarage. The mean age at marriage of females in the district of Gopalganj is lower compared to the state.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

	(68.4)	(62.0)	(69.1)	(22.7)	(27.8)	(22.1)	(91.0)	(89.8)	(91.2)
Gopalganj	359,696	23,944	335,752	114,790	6,214	108,576	474,486	30,158	444,328
	(67.3)	(72.2)	(67.0)	(21.5)	(18.7)	(21.7)	(88.8)	(90.9)	(88.7)

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Gopalganj	59,264	2,882	56,382	410	133	277	534,160	33,173	500,987
	(11.1)	(8.7)	(11.3)	(0.1)	(0.4)	(0.1)	(100.0)	(100.0)	(100.0)

The growth of population for any area is influenced by the migratory movements of the people including in and out migration. However, for want of data on out-migration since such data is not collected in census, it might not be possible to assess the net impact of out migration on growth of population, although such impact may not be much in most of the cases.

The above tables show percentage distribution of migrants by place of birth based on data recorded during 1991 and 2001 censuses. It can be seen from the tables that total migrants in the district of Gopalganj are 415,240 whereas in the state as a whole the migrants are found to be 21,307,020 in number (Gopalganj constitutes 1.9 % of the migrants of the state). The corresponding figures for the district and the state for the year 2001 are 534,160 and 19,989,195 respectively. Araria constitues 2.7 percent of the total migrants coming to the state in 2001. Female migrants outnumber the male migrants both in the case of the district as well as the state in both the censuses. While the male migrants constitute only 3.6 and about 6.2 percent in 1991 and 2001 respectively, the female migrants are as high as 96.4 and 93.8 percent of total migrants of Gopalganj district in 1991 and 2001 respectively. The corresponding proportion of male and female migrants for the state as a whole works out to 11.0 and 89.0 percent respectively in 1991 and 10.5 and 89.5 percent respectivelyin 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of cases.

It can further be seen from the tables that most of the migratory movement has taken place within the district of enumeration in Gopalganj district (65.4 % females and 61.1 % males in 1991 and 67.0% females and 72.2% males in 2001). The proportion of male migrants born in other districts of the state is high, being 26.5 percent as against 22.6 percent for females in 1991.But during 2001 Census the proportion of female migrants born in other district of the state high,being 21.7 percent as against 18.7 percent for male migrants in the district. The state average figures are also on the same line in 1991 and 2001 though the proportion of male and female migrants are slightly more as compared to corresponding figures of the district of Gopalganj

The proportions of migrants (both males & females) born in other states and in other countries have been quite low in the district during both the censuses as evident from the tables. However, the state average figures are found to be comparatively lower in case of migrants born in other states and higher for migrants born in other countries as compared to corresponding figures of migrants in the district during both the censuses of 1991 and 2001.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Gopalganj		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	365,241	342,743	22,498
(1) within the state		(100.0)	(84.7)	(15.3)	(100.0)	(93.8)	(6.2)
	Rural	19,010,120	16,570,646	2,439,474	357,940	337,843	20,097
		(94.7)	(82.6)	(12.2)	(98.0)	(92.5)	(5.5)
	Urban	990,737	375,267	615,470	6,801	4,420	2,381
		(4.9)	(1.9)	(3.1)	(1.9)	(1.2)	(0.7)
(2) In other states of India	Total	1,049,969	575,484	474,485	49,449	46,659	2,790
		(100.0)	(54.8)	(45.2)	(100.0)	(94.4)	(5.6)
	Rural	800,601	512,444	288,157	46589	44,499	2,090
		(76.2)	(48.8)	(27.4)	(94.2)	(90.0)	(4.2)
	Urban	243,448	60,040	183,408	2,810	2,120	690
		(23.2)	(5.7)	(17.5)	(5.7)	(4.3)	(1.4)

It can be seen from the above annexure that of the total intra-state migrants in Gopalganj district, 92.5 percent cases were from rural to rural while 0.7 percent migration took place from urban to urban. The corresponding state average work out to 82.6 and 3.1 percent. The migratory movement from rural to urban areas in the district constitutes 5.5 percent as against 1.2 percent from urban to rural. The state data, on the other hand, shows that of the total intra-state migrants 12.2 percent were from rural to urban while only 1.9 percent from urban to rural areas.

The table further Gopalganj reveals that in case of migrants from other states to Araria district (i.e., those who were born outside Bihar state and enumerated in the district of Gopalganj), 26.9 percent were from rural to rural while 32.0 percent from urban areas of other states to urban areas of Gopalganj district. The corresponding figures of the state average being 48.8 percent and 17.5 percent respectively. So far movement of migrants from rural areas of other states to urban areas of Araria district is concerned, it can be noted from the table that 4.2 percent of such migratory movement took place. The proportion of migrants from urban areas of other states to rural areas of Gopalganj district is found to be 4.3 percent. The rural to urban migration and urban to rural migration from other states to the state of Bihar has been observed to be 27.4 and 5.7 percent respectively.

The data presented in the above tables pertaining to 1991 and 2001 censuses deal with the magnitude of inter-state migration to the state of Bihar as also migrants coming from other states to Araria district. It appear that the district received only 4.7 percent of the total migrants coming from other states to Bihar in 1991 and 3.7 percent in 2001 (49,441 out of 1,049,969 in 1991 and 59,264 out of 1,582,339 in 2001). The state of West Bengal and Uttar Pradesh in 1991 and Uttar Pradesh alongwith Jharkhand in 2001 were the major contributors of migrants to the state . For the district of Gopalganj the state of Uttar Pradesh in both has been the major contributors. Nine major contributing states in 1991 and 14 such states in 2001 contributed 93 and 97 percent of the total migrants to the state of Bihar respectively. In case of Gopalganj district 13 major states in 1991 and only 3 such states in 2001 contributed over 99.0 and 97.1 percent of total migrants to the district respectively.

The data presented in Annexure-V (A) show religion wise distribution of population according to 1991 and 2001 censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001 respectively. The Muslims come next with 14.8 and 16.5 percent in 1991 and 2001 Censuses respectively. Christians had been the third most important religious community though it proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the state during both the censuses. Persons categorized under "Other Religions & Persuasions" comprised 1.7 and 0.1 percent of the state's population during 1991 and 2001 censuses.

In Gopalganj district the proportion of Hindus to the total population of the district remained 83.4 percent in 1991 and 82.9 percent in 2001 which were almost equal to the respective state averages. Muslims had been, however, in good proportions as they constituted 16.6 and 17.1 percent of the district's population in 1991 and 2001. The proportion of population of other religious communities remained almost negligible in the district of Gopalganj during both the censuses as Hindus and Muslims taken together comprised over 99 percent of the total population of the district during both the censuses.

The above Annexures furnish religion wise distribution of population for the district of Gopalganj and its C.D. Blocks in 1991 and 2001 censuses.

As already observed in Annexure V (A) of 1991 census, though the proportion of Hindus in the district of Gopalganj is highest as compared to other religious communities still it was seen that Muslims also formed a big chunk of population in the district. Among the C.D. blocks, . Bhorey C.D.Block has recorded the highest proportion of Hindu (90.2 %) whereas Manjha C.D.Block has recorded the highest (25.9 %) of Muslims during 1991 Census. Almost same trend continued in 2001 Census also.Sidhwalia C.D.Block has recorded the highest proportion (89.9 %) of Hindus in 2001 Census whereas Thawe C.D.Block has recorded the highest proportion (31.0 %) of Muslims in 2001 Census.

The existence of other religious communities in various C.D. Blocks of the district is insignificant as their proportions to total population are almost negligible in both the censuses.

Annexure V1 (A) presented furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991 and 2001 censuses while Annexure (B) shows percentage distribution of population by marital status for the state. The Annexures V1 (C) and V1 (D) presented give corresponding figures and percentages for the district of Gopalganj.

It shall be evident from Annexures V1 (A) to V1 (D) pertaining to 1991 and 2001 censuses that the state of Bihar as well as Gopalganj district have relatively higher proportion of males in the "never married" category. The proportion of females, however, is found to be larger in the "married" category. This may, perhaps, be attributed to the fact that women, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 56.3 percent of "never married" males in 1991 Census and 56.3 and 58.5 percent in 2001 Census in Bihar state and Gopalganj district respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 45.7 percent in 1991 and 47.3 and 48.9 in 2001 Census. Females are found to be higher in proportion in the "married" category than males both in the state and the district in both the censuses, the percentages being 49.8 and 49.6 percent in 1991 and 47.8 and 46.3 percent in 2001. The corresponding figures for males in 1991 and 2001 censuses stand at 43.6 and 40.9 and 41.6 and 39.0 respectively. So far the proportion of "widowed" is concerned, it transpires from the tables pertaining to 1991 and 2001 censuses that female "widowed" are higher in proportion than male "widowed" both in the state as well as in the district. The proportion of "divorced or separated" is found to be negligible both in case of males and females in the state of Bihar and Gopalganj district.

While analyzing tables for 1991 and 2001 censuses regarding marital status of the male and female population by age groups, one notices that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than in males. It may, however, be interesting to note that proportion of married males and females in the age group 10-14 is less in Gopalganj district as compared to the state average figure. It is also discernable from the table that child marriage is more prevalent in the rural areas i.e., villages of the state and the district than the urban areas i.e., towns.

It is further noted from the tables pertaining to both 1991 and 2001 censuses that the proportion of "married" females in the state as a whole and the district is relatively higher around the ages 35 and or 40 respectively while above these ages the proportion of "married" males are found to be higher than females.

Annexures VII(A) VII (B) , VII (C) and VII (D) presented above, furnish position of literacy and level of education by various age –groups of population for the State of Bihar and the district of Araria respectively as per data collected during 1991 and 2001 Census. Among these, Annexures VII (A)and VII (B) provide literacy position absolute in numbers where as Annexures VII (C) and VII (D) give these figures in terms of percentages.

Literacy is one of the most important characteristics of population on which information are collected during Censuses. The concept of literacy adopted in Census has already been explained in the beginning of this volume.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The rate of literacy for Bihar(excluding population of 0-6 years) in 1991 stood at 38.5 percent

which rose to 47.0 percent in 2001. the corresponding proportion for Gopalganj district in 1991 and 2001 remained 35.0 and 47.5 percents respectively. Males out numbered females in the matter of literacy particularly in higher levels of education comprising of Middle and Matriculation and above.

It can be seen from the annexures that 22.5 percent males and 31.1 percent females in 1991 were literate without educational level in Gopalganj The corresponding proportions in 2001 including Below Primary remained 30.3 and 40.1 percent respectively. The proportions of Primary passed Males and females in 1991 were 24.1 and 31.1 percents respectively which became 26.2 and 30.6 percent in 2001 in the district. In 1991 there were 26.6 and 23.6 percent males and females who had passed middle whereas in 2001, the corresponding figures remained lower at 16.6 and 14.1 percent respectively .The proportion of those who had passed Matriculation and above in 1991 were 26.8 and 14.2 percent for males and females respectively in the district, the corresponding figures in 2001 remained 26.9 and 19.2 percent only which were higher than the previous Census.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Gopalganj		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3

Marwari	27,152	0.0	Mundari	86	0.0
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	783	0.0
Total Population	**82,998,509**	**100.0**	**Total Population**	**2,152,638**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Gopalganj district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population .Bhojpuri as mother tongue has been returned by 93.7 percent of Gopalganj population and got first position in the district. Hindi has got third position with 1.2 percent of the district population. Urdu has got second position with 4.9 percent of the district's population have returned it as their mother tongue.Except these languages analysed above,other languages have insignificant proportions of the respective population of the state and the district as mother tongues as per Census 2001.
