District Map

Dronacharya Garhi at village Don Bujurg

'Don' located at village "Don Bugurg" at Mairwa-Darauli road under C.D. Block, Darauli in the district of Siwan is a famous historical place well known for the place of Penance and self motification of Guru Dronacharya.

The religious eminence of Don can still be estimated from the fact that when there is a draught in the region, people perform special Puja at Dronacharya's Garh and Brahmins prepare and eat Litti (fried gram powder and spices stuffed flour cake beaked on the fire of charcoal, cowdung cake or fire wood) and Kheer – (a sweetened dish of rice and milk cooked together). After feast of Litti and Kheer, Brahmins offer prayers to Dronacharya in loud voice to provide rain and it is sure to come.

Annexure VIII	:	Distribution of different mother tongues returned in 2001 Census	951

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Dated: 17.10.2006

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

District Highlights – 2001 Census

1. Siwan ranks 11th in terms of population (27,14,349) and 24th in terms of area (2,219 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Siwan is the 7th densely populated district in the state with 1,223 persons per sq.km as against the state's 881.
3. Siwan ranks 1st in terms of sex-ratio (1,031) against the state's 919.
4. There are 152 uninhabited villages (out of 1,535 total villages) in the district of Siwan.
5. Manjha (under Ziradei C.D. Block) is the most populated village (14,403) and Hari Marpi (under Siwan C.D. Block) is the least populated village (6) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Kuchaikote has the highest number of villages (222) in the district and C.D. Sidhwalia has the lowest number of villages (50).
8. Rampur Tengrahi (under Hussainganj C.D. Block) has the largest area (2,428 hectare) and Man urf Basant Chhapra (under Darauli C.D. Block) has the smallest area (2 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 99.5 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as

followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block

maps have been done simultaneously, as far as area possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Siwan, situated in the western part of the State, was originally a sub-division of Saran district, which in ancient days formed a part of Kosala Kingdom. The present district limits came into existence only in 1972.

Siwan derived its name from Shiva Man, a Bandh Raja whose heirs ruled this area till Babar's arrival. Maharajganj which is another subdivision of Siwan district might have found its name from the seat of the Maharaja there. A recently excavated marvelous statue of Lord Vishnu at Village Bherbania from underneath a tree indicates that there were large number of followers of Lord Vishnu in the area. As the legend goes, Dronacharya of Mahabharat belonged to village DON in Darauli Block. Some believe Siwan to be the place where Lord Buddha died. Siwan is also known as Aliganj Sawan after the name of Ali Bux, one of the ancestors of the feudal lords of the area. Siwan was a part of Banaras Kingdom during 8th century. Muslims came here in the 13th century. Sikandar Lodi brought this area under his kingdom in 15th century. Babar crossed Ghaghra river near Siswan during his return journey. In the end of the 17th century, the Dutch came first followed by the English. After the battle of Buxar in 1765 it became a part of Bengal. Siwan played an important role in 1857 independence movement. It is famous for the stalwart and sturdy Bhojpuries, who have always been noted for their martial spirit and physical endurance and from whom the army and police personnel were largely drawn. A good number of them rebelled and rendered their services to Babu kunwar Singh The anti purdah movement in Bihar was started by Shri Braj Kishore Prasad who also belonged to Siwan in response to the Non Co-operative movement in 1920. A big meeting was organized at Darauli in Siwan District on the eve of the Kartik Purnima Mela under the leadership of Dr. Rajendra Prasad who had thrown away his lucrative practice as an advocate in the Patna High Court at the call of Gandhiji. In the wake of this movement Maulana Mazharul Haque, who came to stay with his maternal uncle Dr. Saiyyad Mahmood in Siwan, had constructed an ashram on the Patna-Danapur road which subsequently became Sadaquat Ashram.

The next phase of the Non co-operation movement known as the Civil Disobedience movement of 1930, was fully implemented in Siwan. In connection with the Satyagrah Movement a whirlwind tour of the different parts of Bihar was made by Pt. Jawaharlal Nehru. One of the famous meetings he addressed was at Maharajganj. A few persons of present Siwan District who played an important role in the attainment of independence were Dr. Rajendra Prasad, Maulana Mazharul Haque, Shri Mahendra Prasad the elder brother of Dr. Rajendra Prasad, Dr. Sayyad Mahamad, Shri Braj Kishore Prasad and Shri Phulena Prasad. Uma Kant Singh (Raman jee) of Narendrapur achieved martyrdom during the Quit India Movement. Jwala Prasad and Narmadeshwar Prasad of Siwan helped Jai Prakash Narayan after his escape from Hazaribag Central Jail. One of the most renowned literate of this country Pandit Rahul Sankritayayana started peasant Movement here between 1937 to 1938. During his visit to Champaran Mahatma Gandhi and Madan Mohan Malviya visited Siwan and Gandhiji even spent a night at Zeradei in the house of Dr. Rajendra Prasad. The chowki on which he slept then is still kept intact there.

(iii) Administrative set up

Siwan district is bounded by Gopalganj district from the north and north-east, by the Saran district from the south-east while in the west and south, it is bounded by the Deoria and Balia district of Uttar Pradesh respectively. It is apart of the north Bihar Plain. The district has been namely Ghaghra Flood Plain and Gandak Plain on the basis of Physical factors like soil, relief and drainage, geology, climate and natural vegetation. There are 19 C.D. Blocks viz., Nautan, Siwan, Barharia, Goriakothi, Lakri Nabiganj, Basantpur, Bhagwanpur Hat, Maharajganj, Pachrukhi, Hussainganj, Ziradei, Mairwa, Guthani, Darauli, Andar, Raghunathpur, Hasanpura, Daraundha and Siswan in the district of Siwan.There are two

sub-divisions i.e. Siwan Sadar and Mahrajganj in the district. There are three towns viz., Siwan (M), Maharajganj (NA) and Mairwa (NA) in the district. There are altogether 1530 villages in the district.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He often belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has three subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are nineteen C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration : The Judges and Munshif magistrates are posted at district and sub-divisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Siwan is the head of the district police administration who is either from the Indian Police Service or the Bihar Police Service. In the subdivisions of the district, the Deputy Superintendents of Police are posted who keep control on police administration.

(iv)Physical Features

Siwan is one of the western districts of the state bordering the state of Uttar Pradesh. It is geographically situated at 25:35 north and 84"1 to 84.47 east. The total area of the district is about 2219.00 sq. km. With a population of 217,0971 as per 1991 Census. It is bounded by Gopalganj district from the north and north-east, by the Saran district from the south-east while in the west and south, it is bounded by the Deoria and Balia district of Uttar Pradesh respectively. It is apart of the north Bihar Plain. The district has been namely Ghaghra Flood Plain and Gandak Plain on the basis of Physical factors like soil, relief and drainage, geology, climate and natural vegetation.

Ghaghra Flood Plain

It contains the entire portion of Mairwa, Gathni, Darauli, Andar, Raghunathpur Siswan, Hussainganj and Siwan C.D. Blocks. The region is drained by two small rivers, namely Tharahi and Daha which flow from north to the south in the western and the eastern portions respectively. River Ghaghra flows from the north-west the south-east along the Uttar Pradesh and Bihar State boundary. The region is a plain area having a gentle slope in the north south direction. The region lies at a height of 68 metres to 59 metres from the mean sea level. Three types of land, namely the low lands the annual rainfall is 1121.3 mm. The geology of the region is related to alluvium. The soils are composed of Udalfs and Fluvents-Psamments Orthents. Paddy, barely, wheat, sugarcane, pulses and oil seeds are the main crops of the area.

The region spreads over in 851 villages and two towns namely Mairwa and Siwan. Siwan is the district headquarters. It has an area of 1,182.80 sq. km. Inhabited by 2714349 persons with 2564860 residing in rural and rest in the urban area. The region is well connected by road and railways.

Gandhak Plain

The region covers the eastern parts of the district. It spreads over the entire portion of Barharia, Pachrukh, Maharajganj. Daraundha, Bhagwanpur hat, Basantpur and Goriakothi C.D. Blocks. Dhamati and Gandaki rivers flow from the north to south east. The surface is plain having a gentle slope towards the south-east. The annual rainfall is 1121.3 mm. The geology is related to alluvium and the soil is mainly Udalts. A small patch of Aquents Fluvents is located in the east. Paddy, barely wheat, sugarcane, pulses and oil seeds are the main crops.

The region covers 687 villages and one town of Maharajganj. It has an area of 1,036.20 sq. km. With a population of 10,67,078 persons reside in rural and 17,165 persons in urban areas in 1991 Census. The south western area is linked with Saran by Broad Gauge railways and rest of the portion is predominantly linked by roads.

Tenancy

There is a progressive decline in the average size of a holding. This is so because of the laws of inheritance, there being a further partition of a holding on every death of the family head. The growing population adds more dimension presently the size of the average holding is 0.25 acre. However, the consolidation of holding and fragmentation Act 1956 has taken up in this district now which will solve this problem in due course.

After the abolition of Zamindary system, the revenue administration has been divided into 15 Anchals in this district, each Anchal having on the average 10 halkas. One Karamchari is posted in each Halka whose work is to collection rents and agricultural statistics. He is supervised by Circle Inspector and an Anchal Adhikari. Some Diara villages are still unsurveyed and these have not yet been assessed to rent. Administration of Diara villages is a serious problem for the district administration more so in the case of those lying in the border of Balia District.

The demand of rent has been going on gradually since the abolition of Zamindary system. The present demand of the district is Rs. 46,61,299.94 the current demand of the Sairats is Rs. 9,04,176.95 and this total demand stands at 55,65,476.89 only.

Restoration of land to under Raiyats under Bataidary rule, settlement of Gairmazarua land to Schedule castes, Schedule tribes and backward classes, acquisition of surplus land under land ceiling Act - all these have considerably affected the prevailing pattern of tenancy in the district.

Agriculture

Siwan has a total geographical area of about 2.22 (as per DCH 81) lakh hectares out of which about 1.81 lakh hectares are agricultural land in which paddy, wheat, pulses, oil-seeds and maize are grown. Sugarcane, the main cash crop of this district is grown on about 5000 hectares. Among vegetables and spices prominent crops grown are potatoes and chillies. Among pulses, Arhar covers the largest area. Oil seeds comprise mainly of mustard and line seeds. The soil climate and general topography of this district are ideal for the cultivation of cereals and non-cereals crops.

Cultivation is the backbone of the district economy and about 80 percent of the working population are employed there in. More than 80% of the total cultivable area is under plough.

The farmers are generally traditional in cultivation practice but they have adopted certain modern methods also. They are now using improved seeds, chemical manure and tractors and other agricultural equipments for better yields.

There are state tube wells and canals providing regular and assured water supply for the irrigation but they account for only a small fraction of the total irrigated area. The main dependence is on private tube wells and cavity boring.

Fortunately, for this district there is abundance of under grounds water and ample scope of exploitation thereof.

Due to lack of sufficient irrigation facility, the dependence on rainfall cuts at the root of agricultural economy.

Famines and drought in this district are usually due to scanty rainfall. One of the most striking features of the district is the presence of large low-lying tracts of land in which only Agahni paddy could be grown. Hence a failure of the Agahni crop would mean general distress in such areas.

Soils

The soils are alluvial and vary from the hard clay found in the low swamps locally known as Bangar, to the light sandy loan of upland known an Bhith. The farmer grow winter paddy only. The autumn rice crop is generally obtained followed by spring crop of cereals, pulses and oil seeds. Baith soils predominate in the northern tracts to the west of the Jharahi river while Bangar soils is found in patches nearly all over the district. A third class farmland is that of good soil which is highly manured and is reserved for the most paying crops such as vegetables, wheat, maize and gram Heavy agricultural operation like ploughing are done by the male labourer. While lighter work such as peeping the crops or sowing in seeds are shared

by women and children of the family as well. The nucleus of agricultural labour is usually supplied by the cultivators family members unless the cultivator belongs to a certain caste and family no direct cultivation is done. In that case he obtains labourers on hire. The agricultural labourers get wages either in cash or in kind or in both.

There in no immigration of agricultural labour from outside the district. As a matter of fact, it is the labourers of this district who go to other districts of Bihar and other States in large number during harvesting season. Owing to its large population the agricultural produce of the district is insufficient to meet the requirements of the population within the district. There is a string of primary markets and cheap and easy mode of communication between cultivation fields and thrashing floor and the primary markets. The bullock-cart and tractor continues to be the chief mode of transport from the agricultural fields to thrashing grounds. Bullock-carts and tractors again take the agricultural produce from the village to primary markets. The village hats functions as the primary markets for the agricultural produce and it is from there that the whole sellers or vyaparis buy the stocks and take the stuff to the secondary markets. The secondary markets are economically more important having scientific storage facilities. In Siwan district some of the important secondary markets are Maharajganj, Siwan, Mairwa, Tarwara, Hasanpura and Nautan. Agricultural indebtedness is chronic here. Natural calamities like flood and draught, greatly affect the agricultural operations and leave no option to the farmers but to contract a debt. Hence there is hardly balance of any considerable amount in the hands of the average middle class agriculturist. However, short term credit through Banks and Blocks and co-operative loans come to help the farmers. There are the main sources of credit to farmers now.

Animal Husbandary

The district depends to some extend on live stock for pursuing agriculture which is the most important occupation. Some cultivators usually keep a pair of bullocks, a few cows and one or two buffaloes. Sheep, goats and poultry do not always fall under the live stock wealth of a good cultivator, but these exist in abundance with poor type of persons in district. The poorer among the cultivators or the landless labourers are mainly engaged in these pursuits. The social status and resources for agriculture of a farmer is judged by the number of cattle and the modern appliances they use.

The district does not have good pasturage. The alkaline soil does not offer a proper pasturage. Moreover very close cultivation does not leave much space for fodder crops to be grown. The accent has been more for the growing of food grains. As a result the animals are not so well fed.

So far there have been poor breeds of cattle, but now Animal Husbandry Department has been trying introduce important varieties of Tharparkar, Sahiwal, Sahabadi, Haryana and Bachaur breeds which are getting popular.

Forestry

The resources of forestry in this district is almost nil. Now the forest Department has launched Social Forestry through afforestation by the roads side canals, embankments which shall yield result after some years and good progress in this direction has been made.

Minerals and Mining

This resource also is almost nil in this district. There are no minerals except nodular limestone (Kankar) of good quality which is found through out the district. It is used for metalling roads for ballast on the railways. Brick making has assumed importance in the recent.

Electricity and Power

There are no hydro-electric or thermal power stations in the district. The industries that are run by power here have either their own electricity plant or derive the power from the power generating station maintain by the Government. There is one 132 K.V. grid power substation situated in this district whose present capacity is 2x20 M.V.A. which is feeding power to both Siwan and Gopalganj District. There are four power substation situated at Siwan. (capacity 1x3+1x5 M.V.A.) Mairwa 1x3 M.V.A. Maharajganj (1x3+1x1.6 M.V.A.,) which are feeding to the urban and rural area of the district. The district required

about 17 MW power at peak load hours and 15 MW on average out of which the district is getting 5-6 MW average per day. It gets electricity from Barauni Thermal Power Station. The electricity in this district is supplied by rotation as the requirements is much higher than the actual supply. With the result, all villages are not electrified so far in the district. 962 villages are covered under the rural electrification under different scheme. Some villages are not getting power due to theft of conductor/broken poles etc. They have taken for rehabilitation. Out of which 22 villages have been rehabilitated.

Land use Pattern

This district is an area where crop-lands dominate the overall picture of a land use. Crop-land use is dominated by food grains and farming has not come out of the stage of subsistence. This is an area of low productivity. In 1971 the district was supporting 6.58 persons per hectare of land. In 1981 the position deteriorated on account of pressure of population and in 1991 & 2001 it has further deteriorated to more pressure on the land and this agony goes to continue in spite of population control masques. There is preponderance of food crops. Food requirement dominates the character of land use, food covering more than 95 percent of the crop land. The only important cash crop is sugarcane covering less than 5 percent of the gross cultivated area. But the income derived from the cash crop goes partly for meeting the deficit in food. It is also used as input for cultivation. Thus the meagre availability of land per head puts a serious limitation on the efficiency of agriculture. It becomes labour intensive. There is a need of close cultivation all through the year.

The common classification of the land under cultivation is under three categories, viz. The lowland, the upland and the Diara land. In the lowland the main crop is paddy, while the upland grows paddy, barley, wheat, sugarcane, pulses and oilseed. The Diara lands yields good Rabi or cold weather crops. But the Bhadai or autumn crops from this type of lands are liable to damage from the spill of the rivers. The fertility and grow very good crops of wheat, barley, peas and mustard. The fertility depends on the deposits of the rivers year after year. Other Diara lands are sandy and it is just possible that the good crop of one year is spoiled by the deposits of sand in the next. The district has no forest area and very little of cultivable waste land is there for reclamation.

Fishery

In spite of large river like Gandak, Ghaghra, Daha and Jharhi and a fair number of tanks and other water reservoirs, this district is not important for the yield of fish. Netting of fish is the work of fishermen or the *Mallahs* who, for various reasons, have to do other occupations. There are no regular fishing villages in this district.

One of the reasons for the moribund condition of fishing as a trade appears to be that there is no addition to the number of tanks or big water reservoirs. On the other hand the existing tanks are not being regular maintained as a result of which many tanks have ceased to be proper breeding ground. Fishing in big rivers requires better nets and a better financial background which the scattered fishermen do not possess. There is also a certain amount of apathy in the younger generation of the Mallahs to take to this annual profession.

However fishing is done by some portion of the Mallah's population mostly near embankments of river. The chief fish markets in the district are Raghunathpur, Siswan, Guthani, Siwan and Darauli.

Industry

There is a no major industry in the district except Sugar factories. Among medium and small scale industry there are Textile Mill, Printing Presses, Soap Factories, Engineering Goods and Foundries, Cold Storage units, Saw Mills, Distilleries and units for manufacturing transport and electrical equipments. A Spinning Mill at Siwan working under Textile Corporation of Bihar has been functioning.

Sugar industry is the principal industry here. Now Siwan sugar and Gur Refining Company and S.K.G. Sugar Mill are the two units established.

The two important medium scale industry are the Duth Nath Soap Factory, Maharajganj. Among the main small scale industries, there are 69 floor Mills, 4 Oil mills, Biscuit Factories and Bidi making etc.

Among cottage industries, Basket making industries is located Maharajganj areas. Besids this Brass utensils manufacturing industries pottery industry, Handloom weaving industry, Ginning factory, cloth printing industry are situated in Siwan and Tekuli industry at Harihans are prominent ones. In view of good material and fine workmanship, the Brass work of Siwan have more than a local reputation. The best pottery of old Saran is made at Siwan from peculiar kind of clay called Koharauti. Much of the pottery turned out is indigenous shape and decoration. The manufacture of Gur is extensive in Siwan district. The district has big potentials of cottages industries and for its developments the District Industry Centre has been established. A number of training cum production centers have been started in different blocks to import improved technical training to traditional artisans.

Trade and commerce

The principal imports are rice, and other food grains, Salt, Kerosene Oil, Coal and Cotton piece goods. The exports are sugar, linseed, mustard seed, gram, pulses and other food grains. Siwan being a deficient district for food production, it depends on other districts of Bihar even in normal times.

The grain trade here is of particular importance. Even at the worst time when crops fail and prices rise the traders buy large stock of grains at a higher price and by selling at the right time get an assured profit.

The main trade routes are the roadways and the railways. The North Eastern Railway inter crosses the district and carries the bulk of the good traffic.

The principal trade centers are Siswan, Maharajganj and Mairwa, connected both by railways and roads. Large scale whole sale business in grains and other commodities is carried on from Maharajganj. The daily turnover is probably higher in Maharajganj than in the whole of old Saran area. The other goods dealt with at Maharajganj are Jute, Molasses, Onion, Potato and Spices. A large number of looms are also in operation in and around Maharajganj which provided ample scope of trade in hand loom produce. Siwan town has a good wholesale business of grain and some grade pottery and brass work. The retail marketing centers are scattered all over the district. They are Mairwa, Guthani, Darauli, Tarwara and Nautan.

The number of village markets and *hats* are very large. Almost every village has one or two shops for the principal commodities. The village traders and Sahukars have their conection with the nearest markets. Some of the important village markets are Basantpur, Bhagwanpur, Barharia, Pachrukhi, Hassanpura, Hussainganj, Gopalpur, Siswan, Ander Supauli Darauli, Mohendar, Raghunathpur are held for the sale of cattle and agricultural goods.

Transport

Transport facilities in the district are not inadequate.Railways and roads are the two main media. Previously there was problem due to inadequate metalled roads and interaction of different railway gauges. But conversion of metro-gauge into broad gauge from Gorakhpur have improved the condition. Addition to the metalled roads by P.W.D., R.E.O. and District Board has improved the condition of road routes.

The North Eastern Railways crosses through Siwan district for 45 Kms. from little beyond Mairwa in the North West to Daraundha in the south east crossing through the stations of Mairwa, Ziradei, Siwan, Pacharukhi and Darundha. There is also a short loop line running from Darundha to Maharajganj. Siwan is an important railway station of the North Eastern Railway where main traffic dealt with are sugar and vegetable.

Although there is no state highway but now some roads have been taken. There is a wide net of important metalled roads serving as important routes for transport. There are Siwan Mairwa-Guthani road covering 31.5 kms. Siwan Raghunathpur road covered 27 kms. Siwan-Siswan road covering 33 kms. Siwan-Basantpur road covering 37 kms. Siwan-Maharajganj road 19 kms. Siwan-Badali road 17 kms. Siwan-Mirganj road covering 16 kms. Gutani – Chapra road via Darauli and Raghunathpur road covering 45 kms. And Bhantapokhar-Ziradei road covering 5 kms. On all these roads power propelled vechicles ply regularly carrying the passangers, Buses ply on Siwan-Patna, Siwan-Chapra, Siwan-Mirganj, Siwan-Gopalganj and

Siwan-Mairwa-Guthani etc. on these road and on other road regularly. The Village roads are mainly kutcha which form perfect reticulating between the main higheways. The R.E.O. and District Board are gradually converting the village kutcha roads in the mettled ones.

Up to 1969 there was no road link with eastern Utter Pradesh, it was after the construction of road bridge near Guthani over river Saryu that the flow of traffic to the neighbouring state has shown considerable progress.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as

a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and

the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a

continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

UrbanAgglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).—

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:—

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution

to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding Norh Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali

16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any

economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to

improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 : Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late

neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/

migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on Relegion

Population of the Siwan district during 1991 was 2,170,971 Hindus constitute over 82.8 per cent (1,796,764persons) of the population in the district followed by Muslims 17.2 percent (3,73,562 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Siwan district during 1991 was 2,170,971. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Siwan district, Hindi, the main mother tongue of the district was returned by 92.4 percent (2007038persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Siwan district, was 7.5 percent (162,926 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Siwan during 1991 census.

The population of the Scheduled Castes in the district of Siwan was 241,867,according to 1991 Census. Numerically, the five most prominent SCs in the district were (i)Chamar,Mochi(141,634) (ii) Dusadh,Dhari, Dharhi(63211)(iii) Dhobi 18047 (iv) Pasi (6008) and (v)Musahar(4871) . while Chamar constituted the maximum proportion of Scheduled Castes population, the percentage being 58.6 (more than half of the total SC population).Dusadh and Dhobi though numerically second and third in number comprised only 26.1 and 7.5 percent of the SC population in the district. Pasi and Musahar a re much less in number as compared to the other three SCs mentioned above with only 2.5 and 2.0 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the five SCs described above as their percentage to total SC population was less than even 1.0 percent except Dom/Dangad whose percentage was 1.6 respectively.

The population of the Scheduled Tribes in the district of Siwan during 1991 Census was 12650.Numerically, the five important STs were namely (i) Gond(ii) Kharwar (iii)Kharia (iv)Santal and (v)Gorait, Gond had 98,356 population which constituted 77-8 percent of the Scheduled Tribes population in the district. Kharwar with 1395 population constituted 11.0 percent of the ST population. Kharia, which were 478 number constituted 3.8 percent of the ST population Santal comprised 438 persons and constituted 3.5 percent of ST population while Gorait with 151 population

constituted 1.2 percent of the total ST population in the district. The other Scheduled Tribes were almost negligible in proportion except Sauria Paharia whose percentage was 1.1 respectively.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Siwan district is 27,14,349 comprising 13,36,283 Males and 13,78,066 Females and constituting 3.3 percent of the State population spread over 2.4 percent of the area of the State in the 19 C.D.Blocks of the district. Siwan is the most populous where as Nautan is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001

	District Total:	**2,170,971**	**2,055,466**	**115,505**	**2,714,349**	**2,564,860**	**149,489**	**25.0**	**24.8**	**29.4**	**5.3**	**5.5**

Table 1 shows that rise in the population of Siwan district during the decade 1991-2001 has been of the order of 25 percent. The rural population in the district has increased by 24.8 percent where as the urban population growth over the decade has been of the order of 29.4 percent. Rural to urban migration is an important factor which always leads to rapid expansion of urban units but in case of Siwan there has been no significant change in urban population. It can be observed that in 1991 Siwan C.D. Block has 38.7 percent urban population which grew to 40.3 percent in 2001. Proportion of urban population has been on decrease in case of Maharajganj and Mairwa which decreased from 13.5 percent in 1991 to 13.3 percent in 2001 for Maharajganj and from 20.5 percent in 1991 to 20 percent in 2001 for Mairwa C.D. Block. In case of rural population Husainganj has shown the highest increase in population over the decade with 38.2 percent followed by C.D. Block Guthani with 30.2 percent. The lowest proportion of rural population growth i.e. 18.8 percent has been recorded in C.D. Block Siswan.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/C.D.Block	Total number of inhabited Villages	Total rural population			Number and percentage of villages	Population less than 200

It may be observed in Table – 2 that the maximum number of villages in the district lie in the population range of 1000-1999 accounting for 29.7 percent of the total inhabited villages closely followed by villages in the population range of 2000-4999 accounting for 25.1 percent of the total inhabited villages. The percentage of population in the above two population ranges are 23.74 percent

and 41 percent of the total rural population of the district respectively. The villages in the population range of 500-999 constitute 23.6 percent of the total inhabited villages and in these villages the percentage of population is 9.87 percent. There are 72 villages in the population range of 5000-9999 accounting for 5 percent of the total inhabited villages and in the highest population range of 10,000 and above accounting for only 0.7 percent of the total inhabited villages and in these villages the percent of population is 4.75. There are 157 villages in population range of 200-499 accounting for 10.9 percent of the total inhabited villages and in these villages the percentage of population is 2.21 percent. There are 72 villages in the lowest population range of less than 200 accounting for 5 percent of total inhabited villages and in these villages the percentage of population is 0.29 percent only.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

Name of town
1
(a) New
(i) Statutory town
Nil
(ii) Census town
Nil
(b) Denotified
(i) Statutory towns of 1991 census denotified and also did not satisfy the criteria to be treated as census town
Nil
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria
Nil
(iii) Census towns of 1991 census are notiified as statutory town in 2001 census
Nil
(c) Declassified
Nil
(d) Wholly merged with other town(s)
Nil
Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	5	0.3	710	0.0
11-20	2	0.1	140	0.0
21-50	3	0.2	281	0.0
51-100	8	0.6	866	0.0
101-200	16	1.1	1,473	0.1
201-300	15	1.0	10,055	0.4
301-500	41	2.9	26,161	1.0
501 +	1,348	93.7	2,525,174	98.5
Not known	0	0.0	0	0.0
District Total:	**1,438**	**100.0**	**2,564,860**	**100.0**
Population Density (Rural) of the district:			**1190.7**	

The data presented in the above table highlight the fact that maximum proportion of villages in Siwan district lies in the density range (per square kilomiter) of 501+ with 93.1 percent of the total inhabited

villages followed by villages in the density range of 301-500 which account for 2.9 percent. It would further be seen that 15 and 16 villages fall in the density range of 201-300 and 101-200 respectively accounting for 1.0 and 1.1 percent respectively of the total inhabited villages.

Maximum number of villages fall in the density range of 501+ covering 98.5 percent of the population followed by villages in the density range of 301-500 which account for only one percent of the total rural population of the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,199	1,204	991
1911	1,051	1,056	942	1,151	1,155	940
1921	1,020	1,027	886	1,066	1,070	833
1931	995	1,005	820	1,038	1,043	781
1941	1,002	1,012	842	1,082	1,087	853
1951	1,000	1,010	859	1,118	1,123	896
1961	1,005	1,020	832	1,154	1,164	884
1971	957	968	833	1,076	1,084	879
1981	948	959	852	1,070	1,079	889
1991	907	913	857	1,017	1,024	889
2001	919	926	868	1,031	1,040	899

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows that sex ratio for the rural areas of Siwan district has been comparatively higher as compared to the rural areas of state from 1901 to 2001. However, on the other hand, the sex ratio for the urban areas of the state is found to be comparatively higher from 1901 to 1931 and lower from 1941 to 2001.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

16	Raghunathpur	1,076
17	Hasanpura	1,055
18	Daraundha	1,051
19	Siswan	1,069
	District (Rural) Total:	**1,040**

As a C.D. Blockwise rural sex ratio in Siwan district is concern, there are 1040 females per thousand males in the district as a whole. Within the district rural sex ratio varies from 1112 in Maharajganj C.D. Block to 984 in Hussainganj C.D. Block which is highest and lowest rural sex ratio respectively in the district. The sex ratio is higher than the district average in C.D. Blocks – Goriakothi, Basantpur, Bhagwanpur Hat, Maharajganj, Darauli, Raghunathpur, Hasanpur, Daraundha and Siswan. Andar C.D. Block has the sex ratio of 1040 which is equal to district average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	6	0.4	173	0.0
700-749	1	0.1	19	0.0
750-799	2	0.1	723	0.0
800-849	15	1.0	7,857	0.3
850-899	57	4.0	45,591	1.8
900-949	123	8.6	245,187	9.6
950-999	264	18.4	596,107	23.2
1000-1099	512	35.6	1,078,957	42.1
1100+	458	31.8	590,246	23.0
District Total:	**1,438**	**100.0**	**2,564,860**	**100.0**
Sex ratio (Rural) for District:		**1,040**		

It is observed in tTable 8 that the maximum proportion of villages in Siwan district lie in the sex ratio range of 1000-1099 and these villages account for 35.6 percent of the total inhabited villages and constitutes.42.1 percent of the district rural population. 31.8 percent of the total inhabited villages fall in the sex ratio range of 1100+ and these villages account for 23.0 percent of district rural population. 18.4 percent of the total inhabited villages fall in the sex ratio range of 950-999 which account for 23.2 percent of district rural population. 8.6 percent of the inhabited villages lie in the sex

ratio range of 900-949 and these villages account for 9.6 percent of district rural population. There are 4.0 percent of the inhabited villages in the district lie in the sex ratio range of 850-999 and these villages account for 1.8 percent of the total rural population of district. One percent of the inhabited villages accounting for 0.3 percent of the total rural population of the Siwan district lie in sex ratio ranges of 849.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A/ Town	Urban status of town	Sex ratio
1	2	3	4
1	Maharajganj	NA	969
2	Mairwa	NA	896
3	Siwan	M	887
	Sex ratio(Urban) for the district:		**899**

There are three statutory towns in Siwan district. Urban sex ratio in the district is 899. Maharajganj Notified Area has the highest sex ratio of 969 females per 1000 males. Mairwa(NA) has the sex ratio of 896 which is slightly less than district average. Siwan Municipal area has the lowest (887) urban sex ratio in the district.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

		Urban	**24,553**	**12,566**	**11,987**	**954**

It is observed from the above Table that the sex ratio in the age group 0-6 in the district varies from 966 in Siwan C.D. Block to 890 in Pachrukhi C.D. Block. The average sex ratio for the district in the age group 0-6 is 934. The highest sex ratio for age group 0-6 in rural areas of the district is 967 in C.D. Block Siwan. The corresponding figures in urban areas is 914. The lowest sex ratio for the population of 0-6 years in rural area is 890 which has been recorded in Pachrukhi C.D. Block during Census 2001. A sex ratio of 941 and 922 in the urban areas have been recorded in C.D. Block Mairwa and Maharajganj respectively for the population of 0-6 years in the district Siwan.

The average sex ratio is 933 in rural and 954 in urban areas in the district for the population of 0-6 years.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age Group
		Persons	Males	Females	
1	2	3	4	5	6
1	Nautan	14,134	7,330	6,804	928
2	Siwan	33,158	16,853	16,305	967
3	Barharia	53,668	28,094	25,574	910
4	Goriakothi	37,867	19,549	18,318	937
5	Lakri Nabiganj	22,590	11,684	10,906	933
6	Basantpur	18,025	9,304	8,721	937
7	Bhagwanpur Hat	35,792	18,395	17,397	946
8	Maharajganj	28,683	14,971	13,712	916
9	Pachrukhi	33,715	17,837	15,878	890
10	Hussainganj	30,897	16,057	14,840	924
11	Ziradei	26,620	13,601	13,019	957
12	Mairwa	14,992	7,767	7,225	930
13	Guthani	21,030	10,712	10,318	963
14	Darauli	28,246	14,507	13,739	947
15	Andar	18,873	9,826	9,047	921
16	Raghunathpur	27,575	14,364	13,211	920
17	Hasanpura	26,571	13,586	12,985	956
18	Daraundha	28,180	14,492	13,688	945
19	Siswan	24,442	12,700	11,742	925
	District (Rural) Total:	**525,058**	**271,629**	**253,429**	**933**

It is observed in Table 11 that the sex ratio in the age group 0-6 among the rural population in the C.D. Blocks of the district varies from 967 in C.D. Block Siwan to 890 in C.D. Block Pachrukhi. The sex ratio is 963, 957 and 956 in C.D. Blocks Guthani, Ziradei and Hasanpura respectively. Apart from these C.D. Blocks, Goriakothi,Basantpur, Bhagwanpur Hat, Darauli and Daraundha,C.D. Blocks have a higher rural sex ratio to the district average of 933. On the other hand Nautan, Barharia, Maharajganj, Hussainganj, Andar, Raghunathpur and Siswan apart from Pachrukhi C.D. Block have the sex ratio below the district rural average.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	72	5.0	6,724	1.3
700-749	49	3.4	8,633	1.6
750-799	73	5.1	18,619	3.5
800-849	135	9.4	45,795	8.7
850-899	213	14.8	98,014	18.7
900-949	260	18.1	125,713	23.9
950-999	206	14.3	100,772	19.2
1000-1099	245	17.0	90,020	17.1
1100+	185	12.9	30,768	5.9
District (Rural) Total	**1,438**	**100.0**	**525,058**	**100.0**
Sex ratio (Rural) for District:		**933**		

It is observed in the above Table that 18.1 percent of the inhabited villages in Siwan district lie in the sex ratio range of 900-949 in the age group of 0-6 years. These villages account for 23.9 percent of the total rural population of 0-6 years in the district. 17.0 percent of the villages lie in the sex ratio range of 1000-1099 accounting for 17.1 percent of total rural population of 0-6 years. 14.8 percent of the villages fall in sex ratio range of 850-899 which account for 18.7 percent of the population of 0-6 years in the district. 14.3 percent of the villages lie in the sex ratio range of 950-999 which cover 19.2 percent of the population of 0-6 years in the district. On the other hand 12.9 percent of total inhabited villages lie under sex ratio range of 1100 and more covering 5.9 percent of the rural population of 0-6 years in the district. 9.4 and 5.1 percentage of the villages accounting for 8.7 and 3.5 percent of total population of 0-6 years in the district lie in the sex ratio range of 800-849 and 750-799 respectively. 3.4 and 5.0 percent of total inhabited villages accounting for 1.6 and 1.3 percent of total population of 0-6 years lie in the sex ratio range of 700-749 and less than 700 respectively in Siwan district.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Maharajganj	NA	4,030	2,097	1,933	922
2	Mairwa	NA	3,280	1,690	1,590	941

Table No 14 shows that the percentage of Scheduled Castes in Siwan district is 11.4 percent of the total population. Within the district highest percentage of Scheduled Castes population is 15.6 percent in Guthani C.D. Block which is higher than the district average. C.D. Blocks Raghunathpur (14.5%), Darauli (13.4%), Andar(13.1%), Daraundha (11.8%), Barharia (11.6%) and Pachrukhi (11.5%) have a higher proportion of Schedule Castes population than the district as a whole. The percentage of Scheduled Castes population in rural and urban areas of the district are 11.7 and 6.1 percent of the total population. The percentage of Scheduled Tribes population in the district is 0.5 percent of the total population. The highest proportion of Scheduled Tribes is 2.1 percent in rural area of the C.D. Block Mairwa. The proportion of Scheduled Tribes are 1.7 and 1.4 percentage point in Mairwa and Nautan C.D. Blocks respectively. In other C.D. Blocks the proportion of Scheduled Tribes lies between 0.1 to 0.9 percent or even nil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

	District (Rural)					
	Total:	**2,564,860**	**299,863**	**12,882**	**11.7**	**0.5**

The Table presented above indicates that the percentage of Scheduled Castes in Siwan district is of the order of 11.7 percent of the total rural population. The highest percentage of Scheduled Castes population is in Guthani C.D. Block with 15.6 percent of the total population closely followed by Raghunathpur, Darauli, Andar and Mairwa C.D. Blocks with 14.5, 13.4, 13.1 and 12.2 percent respectively. The percentage of Scheduled Castes population in Maharajganj and Daraundha are higher than the district rural average (11.7%). The percentage of Scheduled Tribes in rural population in the district of Siwan is 0.5 percent. The proportion of Scheduled Tribes is highest in Mairwa C.D. Block with 2.1 percent followed closely by Nautan C.D. Block with 1.4 percent. The percentage of rural Scheduled Tribes population in C.D. Block Siwan, Ziradai, Guthani, Darauli and Daraundha is higher than the district as a whole.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	230	16.0	0	0.0
Less than 5	194	13.5	11,335	3.8
5-10	390	27.1	78,784	26.3
11-20	399	27.7	133,985	44.7
21-30	137	9.5	47,520	15.8
31-40	39	2.7	13,110	4.4
41-50	18	1.3	4,360	1.5
51-75	22	1.5	8,885	3.0
76 and above	9	0.6	1,884	0.6
District Total:	**1,438**	**100.0**	**299,863**	**100.0**

From theTtable above it is apparent that there are 399 villages accounting for 27.7 percent of the inhabited villages in the district where the population of Scheduled Castes percentage ranges between 11 and 20. This is closely followed by villages where the population of Scheduled Castes percentage ranges between 5 and 10 and these 390 villages account for 27.1 percent of the total inhabited villages. There are

194 villages which account for 13.5 percent of the inhabited villages where the percentage range of Scheduled Castes population to total population less than 5. There are 137 villages which constitute 9.5 percent of inhabited villages where the percentage range of Scheduled Castes population is between 21 and 30. 39 villages are such which constitute 2.7 percent of the inhabited villages where the percentage range of Scheduled Castes population is between 31 and 40. There are no Scheduled Castes population in 230 villages accounting for 16.0 percent of the total inhabited villages of Siwan district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,213	84.4	0	0.0
Less than 5	176	12.2	6,904	53.6
5-10	33	2.3	3,634	28.2
11-20	13	0.9	1,852	14.4
21-30	2	0.1	473	3.7
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	1	0.1	19	0.1
District Total	**1,438**	**100.0**	**12,882**	**100.0**

As regards population of Scheduled Tribes it can be seen from the Table above that there are 176 villages accounting for 12.2 percent of the total inhabited villages where the percentage of Scheduled Tribes population is less than 5. Thirty three villages, accounting for 2.3 percent of inhabited villages in the district are such were percentage of Scheduled Tribes is between 5 and 10. Thirteen villages accounting for 0.9 percent of inhabited villages are such where percentage of Scheduled Tribes population is between 11 and 20. Only 2 villages are such where percentage range of Scheduled Tribes population to total population is 21-30 .Similarly there is only one village where percentage of Scheduled Tribes population to total total population is 76 and above. There are as many as 1,213 villages which constitute 84.4 percent of the total inhabited villages in the district which have no Scheduled Tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA/ Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Maharajganj (NA)	20,860	1,369	31	6.6	0.1
2	Mairwa (NA)	18,710	1,153	19	6.2	0.1
3	Siwan (M)	109,919	6,628	890	6.0	0.8
	District(Urban) Total	**149,489**	**9,150**	**940**	**6.1**	**0.6**

The above Table shows that there are three statutory towns in Siwan district. The percentage of Scheduled Castes and Scheduled Tribes population to total population are 6.1 percent and 0.6 percent

respectively in the urban areas of the district as a whole. Siwan Municipal Area has 6.0 and 0.8 percent population of Scheduled Castes and Scheduled Tribes population to total population respectively. Maharajganj Notified Area has 6.6 and 0.1 percent of Scheduled Castes and Scheduled Tribes population to total population respectively. Mairwa(NA) has about the same proportion of Scheduled Castes and Scheduled Tribes population as Maharajganj (NA).

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Nautan	1,022	986
2	Siwan	1,006	1,067
3	Barharia	1,013	1,105
4	Goriakothi	1,021	1,085
5	Lakri Nabiganj	994	979
6	Basantpur	1,018	0
7	Bhagwanpur Hat	1,022	1,438
8	Maharajganj	1,100	1,136
9	Pachrukhi	970	1,036
10	Hussainganj	976	914
11	Ziradei	1,020	1,016
12	Mairwa	1,002	978
13	Guthani	994	1,044
14	Darauli	1,005	1,054
15	Andar	1,024	976
16	Raghunathpur	1,038	905
17	Hasanpura	1,056	1,203
18	Daraundha	1,028	1,092
19	Siswan	1,029	981
	District (Rural) Sex Ratio	**1,017**	**1,028**

Table 19 shows that the sex ratio of Scheduled Castes varies from 1100 in C.D. Block Maharajganj to 970 in C.D. Block Pachrukhi. In C.D. Block Hasanpura the sex ratio is 1056. Raghunathpur, Siwan and Daraundha C.D. Blocks has a sex ratio of 1038, 1029 and 1028 respectively. Nautan, Goriakothi, Basantpur, Bhagwanpur Hat, Ziradei and Andar C.D. Blocks have a comparatively higher sex ratio than the district average of 1017 among Scheduled Tribes.

In the other hand in Siwan, Barharia, Lakri Nabiganj, Hussainganj, Mairwa, Guthani and Darauli C.D. Blocks the rural sex ratio among Scheduled Castes is lower than the district rural average.

The sex ratio of Scheduled Tribes varies from 1438 in C.D. Block Bhagwanpur Hat to 905 in C.D. Block Raghunathpur. There is no Scheduled Tribes in C.D. Block Basantpur. The next higher sex ratio 1203 is in C.D. Block Hasanpura. Sex ratio of Scheduled Tribes is 1136 and 1105 in C.D. Block Maharajganj and Barharia, respectively. Apart from these in C.D. Blocks Siwan, Goriakothi, Pachrukhi, Guthani, Drauli and Daraundha sex ratio higher than the district rural average of 1028. On the other hand in C.D. Blocks Nautan, Lakri Nabiganj, Ziradai, Hussainganj, Mairwa, Andar, Raghunathpur and Siswan sex ratio among Scheduled Tribes is lower than the district rural average.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Maharajganj (NA)	975	938
2	Mairwa (NA)	848	900
3	Siwan (M)	843	866
	District (Urban) Sex ratio: 862		**869**

There are three urban areas in Siwan district. The sex ratio of Scheduled Castes and Scheduled Tribes in urban areas of the district ara 862 and 869 respectively. The highest urban sex ratio among both Scheduled Castes and Scheduled Tribes ara 975 and 938, respectively in Maharajganj town. In Mairwa town sex ratio is 848 and 900 respectively for Scheduled Castes and Scheduled Tribes. Siwan Municipal area has the lowest sex ratio both for Scheduled Castes (843) and Scheduled Tribes (866).

Table 21 shows that the average urban literacy rate in Siwan district is 69.7 percent. Male and female urban literacy rates are 78.4 and 59.9 percent respectively. Siwan Municipal area has the highest literacy rates both for males (79.6%) and female (63.9%). Maiewa Town has 76.1 and 50.3 percent literacy among males and females respectively. Maharajganj town has the lowest proportion of both male (73.4%) and female (47.4%) literacy in the district. The literacy rate gap between male and female literates in rural population of the district is as wide as 30.9 percent (As shown in table 21) . The corresponding figure for urban areas of the district is 18.5 percent.Table 22 show that among the C.D. Blocks of the district, Bhagwanpur Hat has the highest proportion of literate population (53.8%) followed closely by Ziradei(53.3 %), Guthani (52.5%) and Andar (52.4%) C.D. Blocks. The lowest (49.2%) literacy has been returned in C.D. Block Nautan. The average rural literacy rate in Siwan district is 50.5 percent. Male literates out number females as 66.5 percent males and only 35.6 females in the district as a whole are literate. The highest male literacy rate is 70.4 in C.D. Block Bhagwanpur Hat. The lowest literacy rate 61.7 percent among males has been recorded in C.D. Block Lakri Nabiganj. The highest female literacy rate is 38.9 in C.D. Block Bhagwanpur Hat followed closely by C.D. Block Ziradei (38.8%). The lowest female literacy rate is 30.2 percent in C.D. Block Lakri Nabiganj.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.1	103	0.0
1-10	5	0.3	925	0.0

	District (Rural) Total:	**81,446**	**57,857**	**23,589**	**218,417**	**90,788**	**127,629**	**35.1**	**50.9**	**19.9**	**31.0**

The table above shows that literacy rate among Scheduled Castes in rural areas of the district is 35.1 percent. Male and female literacy rates are 50.9 and 19.9 percent respectively. The highest literacy rate 40.4 percent among Scheduled Castes has been recorded in C.D. Block Guthani which is closely followed by 40.1 percent in Ziradei C.D.Block. The highest literacy rate among males(57.4%) has been returned in Guthani C.D.Block whereas the highest literacy rate among females has been recorded (24.2 %) in Ziradei C.D.Block. The lowest literacy rate among Scheduled Castes is 29.3 percent in C.D. Block Lakri Nabiganj. Similarly the lowest literacy rate among both males (42.9%) and females (15.7%) have also been recorded in C.D. Block Lakri Nabiganj.

The literacy rate gap between Scheduled Castes male and female literacy is as wide as 31.0 percent in the district. This gap is widest (33.9%) in C.D. Block Guthani and Siwan C.D.Block both and minimum (26.5%) in C.D. Block Goriakothi.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	13	1.1	291	0.1
1-10	27	2.2	4,445	1.5
11-20	112	9.3	24,344	8.1
21-30	247	20.4	76,117	25.4
31-40	362	30.0	108,596	36.2
41-50	261	21.6	60,507	20.2
51-60	126	10.4	20,569	6.9
61-70	40	3.3	3,787	1.3
71-80	13	1.1	1,123	0.4
81-90	6	0.5	80	0.0
91-99	0	0.0	0	0.0
100	1	0.1	4	0.0
District Total:	**1208**	**100.0**	**299,863**	**100.0**
Literacy rate for District (Rural):		**35.1**		

The table above shows that in case of literacy among the Scheduled Castes in the rural areas of the district, the highest number of villages i.e. – 362 accounting for 30 percent of the total inhabited villages fall in the literacy range of 31 to 40 percent. 261 and 247 villages accounting for 21.6 and 20.4 percent of total inhabited villages fall in literacy range of 41 to 50 and 21 to 30 percent respectively. A total of 870 villages out of 1208 covering 81.8 percent of the total Scheduled Castes population in the district fall under literacy range of 21 to 50 percent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Maharajganj (NA)	436	296	140	933	397	536	42.0	56.2	27.4	28.8
2	Mairwa (NA)	412	304	108	741	320	421	44.7	60.0	26.0	33.9
3	Siwan (M)	2,831	1,917	914	3,797	1,679	2,118	52.0	63.9	37.3	26.6
	District (Urban) Total :	**3,679**	**2,517**	**1,162**	**5,471**	**2,396**	**3,075**	**49.7**	**62.4**	**34.4**	**28**

The table above shows that the literacy rate among Scheduled Castes in the urban areas of the district is 49.7 percent. Male and female literacy rates are 62.4 and 34.4 percent respectively. Sex wise literacy position shows a literacy gap of 28.0 percent points between male and female in urban Scheduled Castes population in the district. Siwan(M) has the highest(52%) proportion of literacy among Scheduled Castes. In case of males and females, it is 63.9 and 37.3 percent respectively. Maharajganj (NA) has 42 percent literacy rate among Scheduled Castes. The lowest literacy rate in case of males has been recorded in Maharajganj (NA) whereas in case of females Mairwa (NA) has been recorded the lowest one i.e. 26.0 percent.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

19	Siswan	238	153	85	291	114	177	55.9	73.6	39.0	34.6
	District (Rural) Total:	**4,362**	**2,920**	**1,442**	**8,520**	**3,433**	**5,087**	**43.0**	**59.2**	**27.6**	**31.6**

The table above shows that the literacy rate among Scheduled Tribes in the rural areas of the district is 43.0 percent. Male and female literacy rate are 59.2 and 27.6 percent respectively. In this position, the literacy gap between males and females among Scheduled Tribes of the district is 31.6 percent points. Among the C.D. Blocks, Siswan has the highest literacy rate (55.9 %) among Scheduled Tribes. The highest literacy rate in case of males and females are 76.7 and 37.1 percent in C.D. Blocks Bhagwanpur Hat and Daraundha respectively. The lowest literacy rate among Scheduled Tribes is 21.4 percent in Maharajganj C.D. Block. The lowest literacy rates in case of males and females among Scheduled Tribes are 31.8 and 13.0 percent in C.D. Block Maharajganj . The literacy gap between males and females Scheduled Tribes is 50.0 percent point in Basantpur and 18.9 percent point in Maharajganj C.D. Blocks.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	27	12.0	217	1.7
1-10	7	3.1	382	3.0
11-20	22	9.8	1,171	9.1
21-30	23	10.2	1,172	9.1
31-40	35	15.6	2,875	22.3
41-50	41	18.2	3,113	24.2
51-60	25	11.1	2,140	16.6
61-70	20	8.9	927	7.2
71-80	13	5.8	652	5.1
81-90	5	2.2	177	1.4
91-99	2	0.9	33	0.3
100	5	2.2	23	0.2
District Total:	**225**	**100.0**	**12,882**	**100.0**
Literacy rate for District (Rural):		**43.0**		

The table above shows that in case of literacy among Scheduled Tribes in the rural areas of the district the highest number of villages i.e. 41, accounting for 18.2 percent of the inhabited villages and 24.2 percent of the total Scheduled Tribes population fall in the literacy range of 41 to 50. Thirty

five villages accounting for 15.6 percent of the inhabited villages which constitutes 22.3 percent of the total Scheduled Tribes population of the district fall in the literacy range of 31 to 40. Only 5 villages accounting for 2.2 percent of the inhabited villages and 0.2 percent of total Scheduled Tribes population in the literacy range of 100. On the other hand 27 villages accounting 12.0 percent of the inhabited villages and 1.7 percent of total Scheduled Tribes population fall in nil literacy range.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Maharajganj (NA)	23	14	9	8	2	6	88.5	100.0	75.0	25.0
2	Mairwa (NA)	14	8	6	5	2	3	77.8	80.0	75.0	5.0
3	Siwan (M)	421	275	146	469	202	267	56.0	68.2	41.8	26.4
	District (Urban)										
	Total :	**458**	**297**	**161**	**482**	**206**	**276**	**57.5**	**69.6**	**43.6**	**25.9**

The table above shows that the literacy rate among the Scheduled Tribes in the urban areas of the district is 57.5 percent. In case of males and females the literacy rate are 69.6 and 43.6 percent respectively. The literacy rate gap between males and females is 25.9 percent among the urban Scheduled Tribes population of the district of Siwan. The highest proportion of literate Scheduled Tribes i.e. 88.5 is in Maharajganj (NA). Cent percent males Scheduled Tribes in Maharajganj (NA) and 75.0 percent females in both Maharajganj (NA) and Mairwa (NA)are literate. Siwan Municipal area has the lowest proportion i.e. 56.0 percent of Scheduled Tribes. Literacy rates among Scheduled Tribes males and females are lower in Siwan (M) than the district average.

The Work Participation Rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 31 presents figures for total areas including rural/urban, whereas Table 32 presents information regarding rural areas only. As per Table 31 the Work Participation Rate (WPR) in the Siwan district is 26.9 percent of which 18.8 percent are main workers and 8.1 percent are marginal workers. Proportion of non-workers in the district is 73.1 percent.

Among the main workers male Work

Participation Rate in the district is 32.8 percent while that of females is only 5.3 percent. Among the marginal workers the Work Participation Rates for male and females in Siwan district are 8.7 and 7.5 percent respectively.

The proportion of main workers is the highest (21.2%) in C.D. Block Basantpur and lowest (16.3%) in C.D. Block Hasanpura. The proportion of marginal workers is highest (10.7%) in Barharia C.D. Block and lowest (5.2%) in Basantpur C.D. Block. The proportion of total workers is highest (29.7%) in Barharia C.D. Block and lowest (24.3%) in Hasanpura C.D. Block.

The proportion of non workers among males in the district is 58.5 and 87.2 percent among females. The proportion of non workers is highest (75.7%) in Hasanpura C.D. Block and lowest (70.3%) in Barharia C.D. Block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

		Females	8,840	386	4.4	287	3.2	673	7.6	8,167	92.4
	District (Urban)										
	Total:	**Persons**	**149,489**	**30,283**	**20.3**	**5,422**	**3.6**	**35,705**	**23.9**	**113,784**	**76.1**
		Males	**78,727**	**27,821**	**35.3**	**3,567**	**4.5**	**31,388**	**39.9**	**47,339**	**60.1**
		Females	**70,762**	**2,462**	**3.5**	**1,855**	**2.6**	**4,317**	**6.1**	**66,445**	**93.9**

There is no urban agglomeration in Siwan district. There are three urban units in the district. The Work Participation Rate for total workers is defined as the percentage of total workers to total population. In the similar way main and marginal workers are also defined. The Work Participation Rate in urban areas of the district for total workers is 23.9 percent of which 20.3 percent is main workers and 3.6 percent is marginal workers. The proportion of male and female main workers are 35.3 and 3.5 percent respectively. The proportion of marginal workers among males and females are 4.5 and 2.6 percent respectively. The proportion of male and female urban non workers are 60.1 and 93.9 percent respectively.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D.BLOCKS, 2001

From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to broad four fold classification namely cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture

which is supported by the fact that the cultivators (41.2 percent) and agriculture labourers (33.7%) together constitute 74.9 percent of the total workers of the district. The agriculture sector has absorbed about three fourth of the total main workers. The proportin of cultivators varies from 50.6 percent in Nautan C.D. Block to 29.8 percent in Siwan C.D. Block. Proportion of agricultural labourers varies between 41.1 percent in Barharia C.D. Block and 22.8 percent in C.D. Block Siwan. The proportion of household industry workers is only 3.6 percent of the total workers of the district. Proportion of household industry workers varies between 5.2 percent in Nautan C.D. Block and 2.6 percent in Maharajganj and Ziradei C.D. Blocks. The proportion of other workers is 21.5 percent of the total workers of the district. Proportion of other workers varies from 42.7 percent in Siwan C.D. Block to 12.4 percent in Lakri Nabiganj C.D. Block.

Note: Percentage of worker to total workers are given in brackets

From the Table No.35,it is observed that the economic activity in the rural areas of district is primarily dependent on agriculture which is supported by the fact that the cultivators (42.9 percent) and agricultural labourers (35.1 percent) together constitute 78.0 percent of the total workers of the district. The agriculture sector has absorved more than three fourth of the total main workers. The proportion of cultivators varies from 50.6 percent for C.D. Block Nautan to 33.1 percent for C.D. Block Hussainganj. Proportion of agricultural labours varies from 41.1 percent for C.D. Block Barharia to 29 percent for C.D. Block Basantpur. The proportion of household industry workers is only 3.5 percent of the total workers of the district. The proportion of household industry workers varies from 5.2 percent for C.D. Block Nautan to 2.2 percent for C.D. Block Maharajganj. The proportion of other workers is 18.5 percent of the total workers of the district. Proportion of other workers varies between 32.4 percent for C.D. Block Hussainganj and 13.8 percent for C.D. Block Darauli.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above Table gives the distribution of villages according to availability of different amenities in the district.

Educational facility :- There are as many of 1131 accounting for 78.7 percent of the total inhabited villages in the district where educational facility is available. The highest proportion i.e. 97.8% of villages with educational facility is in C.D. Block Hussainganj closely followed by C.D. Block Basantpur (95.0%). The smallest proportion i.e. 57.1% of villages with educational facility is in C.D. Block Guthani.

Medical facility :- The availability of medical facility in the villages is quite low and only 17.7 percent of the inhabited villages have got it. Among the C.D. Blocks, Maharajganj has the highest proportion i.e. 37.7 percent of villages with medical facility. It is followed by Barharia and Goriakothi C.D. Blocks, with 30.2 and 28.4 percentage points respectively. Guthani C.D. Block, on the other hand, has the minimum proportion of villages (1.0 percent) where medical facility is available.

Improved drinking water :- There are as many as 1430 villages accounting for 99.4 percent of the total inhabited villages in the district where improved drinking water facility is available. This facility is available in cent percent villages of 15 C.D. Blocks out of 19 C.D. Blocks in the district. Siwan and Ziradei C.D. Blocks on the other hand have the minimum proportion of villages (96.0 percent) where improved drinking water facility is available.

Post Office :- Postal facilities are available in 301 out of 1438 villages accounting for 20.9 percent of the total inhabited villages in the district. C.D. Block Hussainganj has the maximum number of villages (31.1%) having postal facility followed by Maharajganj (30.4%). Nautan C.D. Block has the minimum proportion of villages (13.0%) having postal facility.

Telephone :- The availability of telephone facility in the villages is quite low and only 8.8 percent of inhabited villages in the district has telephone facility. Among C.D. Blocks, Hussainganj has the maximum proportion and such of villages (35.6%), followed by Maharajganj (34.8%) and Pachrukhi (32.1%) where as C.D. Blocks Nautan, Basantpur and Siswan still do not have telephone facility.

Transport communication :- Transport communication facilities are available in 166 out of 1438 villages accounting for 11.5 percent of the inhabited villages in the district, while 88.5 percent of the inhabited villages in Siwan district still do not have this facility. Among C.D. Blocks a maximum of 28.9 percent villages of Hussainganj C.D. Block and a minimum of 3.7 percent villages of Siwan ndha

C.D. Blocks respectively have got such facility in the district.

Bank :- Banking facility is available only in 97 out of the 1438 villages accounting for 6.7 percent of the inhabited villages of the district of Siwan. Among C.D. Blocks, Lakri Nabiganj (12.8%), Goriakothi (11.1%) and Hussainganj (11.1%) have the higher proportion while Siwan (2.5%) and Basantpur (2.5%) have the minimum proportion of villages with Banking facility. 93.3 percent of the inhabited villages of the district still do not have Banking facility in the district.

Agricultural Credit Society :- Agricultural credit societies are available only in 150 villages accounting for 10.4 percent of the inhabited villages of the district. C.D. Block Pachrukhi has the highest proportion (33.3%) of villages with such facility followed by Goriakothi (23.5%) and Raghunathpur (21.8%) C.D. Blocks. Nautan C.D. Block has no such facility. 89.6 percent of the total inhabited villages in the district still do not have such facility.

Approach by pucca road :- 560 villages accounting for 38.9 percent of the inhabited villages in the district are connected with pucca approach road. C.D. Blocks Basantpur, Barharia and Goriakothi have 65.0, 54.7 and 54.3 percent of their villages respectively connected with pucca approach roads. C.D. Blocks, Lakri Nabiganj and Ziradei have 12.8 and 12.5 percent of the total inhabited villages accounted with pucca approach roads. 61.1 percent of the total inhabited villages in the district of Siwan still do not have pucca approach roads.

Power Supply :- Electrified villages in the district constitute 30.7 percent of total inhabited villages. Among C.D. Blocks, Pachrukhi and Maharajganj have 88.9 and 60.9 percent of their total villages electrified. On the other hand C.D. Block Lakri Nabiganj has no electrified village at all. C.D. Block Siswan has only 2.7 percent of the villages electrified. 69.3 percent of the total inhabited villages in the district of Siwan are not electrified.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from the Table that educational facility is available to 92.3 percent of the rural population of the district. The proportion varies between the maximum of 99.6 percent in Hussainganj C.D. Block and the minimum of 79.5 percent in Guthani C.D. Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 78.7 percent vide Table 37) than the proportion of population which is as high as 92.3 percent. This may be attributing to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In case of medical facility also, it can be seen that the proportion of rural population served is of the order of 30.7 percent which is more than the proportion of villages served by medical facility in the district.

In case of improved drinking water facility also, it may be observed that proportion of rural population served by the amenity is of the order of

99.5 percent which is slightly more than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	299	20	0	319
(b) Middle School	937	203	11	1,151
(c) Degree College	238	445	744	1,427
2. Medical:-				
(a) Hospital	464	576	355	1,395
(b) PHC	506	585	310	1,401
3. Post Office	993	132	12	1,137
4. Telephone	466	526	319	1,311
5. Bus Service	784	430	73	1,287
6. Banks				
(a) Commercial Bank	555	251	183	989
(b) Co-operative Bank	415	645	360	1,420
7. Agricultural Credit Societies	529	497	262	1,288

As regards educational facility it would be seen that there are 319 villages in the district which do not have any Primary school but the facility is available at places situated within 5 kms. for 299 villages and only 20 villages within the range of 5 to 10 kms. There are as many as 1,151 villages in the district which do not have Middle school but the facility is available at places situated within 5 kms. for 937 villages, 5 to 10 kms. for 203 villages and at a distance of 10 and more kms for 11 villages.

It can be observed that out of 1,438 total inhabited villages, 1427 do not have any Degree college within their villages. However this facility is available within 5 kms. for 238 villages, at a distance of 5 to 10 kms for 445 villages and at a distance of more than 10 kms. for 744 villages in the district.

There are 1395 villages in the district which do not have a Hospital but the facility is available at places within 5 kms. for 464 villages, for 576 villages this facility is available at a distance range of 5 to 10. kms where as 355 villages have this facility at places which are situated at a distance of 10+ kms. There are as many as 1401 villages which do not have a Primary Health Centre in the district which are available at a distance from less than 5 kms. to 10 kms. and more.

A similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road

	(100.0)	**(78.7)**	**(17.7)**	**(20.9)**	**(8.8)**	**(11.5)**	**(6.7)**	**(10.4)**	**(38.9)**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the Table that a maximum number of inhabited villages i.e. 770 lie in the distance range of 16-50 kms. from the nearest statutory town followed by 551 villages in the distance range of 5 to 15 kms. 115 villages in the district lie at a distance range of less than 5 kms. while only two villages are such which lie 51 and more kms. apart from the nearest statutory town in the district.

It is interesting to observe from the Table that the proportion of villages having educational facility ranges between 77.4, 78.8 and 78.7 percent for those villages situated a distance of less than 5 kms., 5-15 kms. and 16-50 kms. respectively from the nearest statutory town. Only two villages having educational facility are situated at a distance of 51+ kms. from the nearest statutory town. In the case of other amenities (except approach by pucca road) also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, telegraph office and Post & telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the Table that the maximum number of villages i.e. 427 fall in the population range of 1000-1999, followed by 361 and 339 villages in the population range of 2000-4999 and 500-999 respectively. There are 229 villages are such which have a population range of 1 to 499. The lowest number of villages is observed in the population range of 10,000+ being only 10.

The proportion of villages having different amenities varies in direct relation to their population range, Generally, the maximum percentage of villages having different amenities have a population range of 5000-9999, 2000-4999 and 10,000+ which further corroborates the fact that more facilities are generally available in medium and larger population size villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Nautan	46	6,477	81.2	77.3
2	Siwan	81	12,429	85.1	55.4
3	Barharia	139	17,707	84.1	63.6
4	Goriakothi	81	13,800	80.8	55.6
5	Lakri Nabiganj	39	9,495	86.1	47.8
6	Basantpur	40	6,220	85.3	70.2
7	Bhagwanpur Hat	112	14,892	81.9	72.8
8	Maharajganj	69	10,766	86.4	72.9
9	Pachrukhi	81	12,378	85.0	71.4
10	Hussainganj	45	8,460	85.7	48.3
11	Ziradei	80	12,103	86.6	75.9
12	Mairwa	54	6,760	82.0	76.8
13	Guthani	98	9,104	83.8	70.2

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001 (*Concld.*)

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
14	Darauli	97	15,762	60.9	73.8
15	Andar	61	11,740	83.1	59.0
16	Raghunathpur	101	14,154	78.0	57.7
17	Hasanpura	64	9,792	84.8	68.7
18	Daraundha	75	12,277	78.7	66.7
19	Siswan	75	11,092	49.1	65.8
	District Total:	**1,438**	**215,408**	**79.9**	**65.3**

It would be seen from the Table that 79.9 percent of the total area of the district is cultivable area and of this only 65.3 percent area is found to be irrigated. Among C.D. Blocks, the highest percentage of cultivable area is found in Ziradei with 86.6, closely followed by Maharajganj(86.4%) and Lakri Nabiganj (86.1 %)C.D. Blocks. The lowest cultivable area is found to be only 49.1 percent in Siswan C.D. Block.

The highest proportion of irrigated area (77.3%) to total cultivable area is found in Nautan C.D. Block followed by Mairwa(76.8%) and Ziradei(75.9%) C.D. Blocks. The lowest proportion of irrigated area is found in C.D. Block Lakri Nabiganj(47.8%).

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Maharajganj (NA)	0.5	0.1	0.4	0.8	0.5	0	0.2	0	0.1
2	IV Mairwa (NA)	4.4	0.2	4.2	2	0.5	1.4	0	0	0.1
3	I Siwan (M)	1.3	0.2	1.1	2.8	0.6	1.4	0.5	0	0.3
	District Total	**1.6**	**0.2**	**1.4**	**2.4**	**0.5**	**1.2**	**0.4**	**0**	**0.2**

Note : Cultivable area = irrigated area + unirrigated area

The above Table gives the details of finances in the statutory towns in terms of per capita receipt and expenditure. There is one municipality in the district i.e. Siwan(M) and two Notified Area committees i.e. Mairwa(NA) and Maharajganj(NA). On going into the details of receipt under different heads, total per capita receipt from all the statutory towns in the district is 1.6 of which 0.2 is from taxes and 1.4 is from all other sources. The highest total per capita receipt is 4.4 in Mairwa(NA), followed by Siwan(M) with 1.3. Maharajganj(NA) has the least, per capita receipt (0.5) among all urban units. Mairwa(NA) and Siwan (M) have per capita receipt 0.2 from taxes where as in case of Maharajganj (NA) it is 0.1 . In respect of percapita receipt from all other sources except taxes Mairwa(NA) is at the top with 4.2 followed by Siwan(M) with 1.1, while Maharajganj(NA) has 0.4.

The per capita total expenditure in the civic bodies of the district is higher than the total per capita receipt. The per capita total expenditure is 2.4 of which 0.5 is spent on general administration, 1.2 on public health and conveniences, 0.4 on public works and 0.2 is spent on other purposes.Majority of the expenditures in all the civic bodies except in Maharajganj(NA) is incurred on public health and conveniences.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Maharajganj (NA)	4.8	3.8	1.9	0	0.5
2	Mairwa (NA)	9.6	2.1	2.7	1.1	0.5
3	Siwan (M)	2.0	0.5	0.5	0.2	0.7
	District Total	**3.3**	**1.2**	**1.0**	**0.3**	**0.7**

The above Table gives the details of different categories of educational institutions per ten thousand population in the statutory towns of the district. It would be seen from the Table that institutions like colleges are situated in all the three urban areas accounting for an average 0.7 per ten thousand population. An average of 3.3 primary school, 1.2 middle school and 1 secondary/ matriculation schools are situated in the statutory towns of the district for every ten thousand population. Except Maharajganj (NA) senior secondary school is available for Mairwa(NA) and Siwan(M) on an average of 0.3 for every ten thousand population in the district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Maharajganj (NA)	0
2	Mairwa (NA)	3
3	Siwan (M)	7
	Distrct Total :	**6**

The above Table furnishes information regarding availability of beds in medical institutions in statutory urban areas of the district. The number of beds in medical institution per ten thousand population for urban areas of the district works out to be 6. Among towns, Siwan (M) and Mairwa (NA) has 7 and 3 beds in medical institutions for every ten thousand population respectively, while Maharajganj (NA) has got no such facility.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
		N.A.		

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Maharajganj (NA)	Pulse Handloom Cloth	Handloom Cloth Pulse,Potato
2	Mairwa (NA)	Sweets	Rice Wheat Pulse
3	Siwan (M)	Sugar Earthen Pot Handloom Cloth	Sugar Potato Biscuits

The above Table-47 presents a list of most important commodities manufactured in the towns and exported to other places. It can be observed from the Table that Pulse are grown and Handloom Clothes are manufactured in Maharajganj(NA) and Potato besides these two articles are exported to other areas from the town. Mairwa(NA) only exports Rice, Wheat and Pulses to other areas though these articles are not produced there. Sugar, Earthen Pot and Handloom Clothes are produced in Siwan(M) and Sugar, Potato and Biscuits are exported from the town.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

Data source: Census of India 2001, H- series: "Tables on Houses, Household Amenities and Assets."

Table 48 shows that there are as many as 388382 households accounting for 98.1 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in single room is the highest (34.3%) where as it is the lowest (1.3%) for those dwelling in no exclusive room. The median number of room is 2 for the total households in the tenure status of owned dwellings.

There are 53836 Scheduled Castes households accounting for 98.4 percent of the total Scheduled Castes households in the district dwelling in owned houses. The proportion of one room dwelling households among Scheduled Castes is 52.1 percent and the median number of room is 1 only.

There are 3017 Scheduled Tribes households residing in their own houses accounting for 95.7 percent of total Scheduled Tribes households in the district of which 40.3 percent are single room dwellers and a little over 29 percent are two room dwelling households there are 4.1 percent households are such who do not have any exclusive room. The median number of room among Scheduled Tribes households is 2.

There are 5686 households accounting for 1.4 percent of the total households in the district who residing in rented houses of which 36.2 percent are single room dwellers and 1.5 percent of such households have no exclusive room.

There are 436 Scheduled Castes households accounting for 0.8 percent of the total Scheduled Castes households in the district who are living in rented houses of which 41.7 percent are single room

dwellers and 3.2 percent households do not have any exclusive room. The median number of room for Scheduled Castes households under this status is 2.

There are 89 Scheduled Tribes households accounting for 2.9 percent of the total Scheduled Tribes households in the district who are living in rented houses of which proportion of single room dwellers is 41.6 percent where as 1.1 percent households do not have any exclusive room.

Similar trend can be observed in respect of households dwelling in other tenure status in the district.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source : Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roofs made of kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the Table No.49 that of the total rural households maximum proportion of households i.e. 70.6 percent in Siwan district live in permanent houses followed by those who are living in temporary houses (15.8%) and semi permanent houses(13.7%).

In case of urban households in the district also the maximum proportion (88.4%) them live in permanent houses followed by semi permanent (6.5%) and temporary (5.1%) houses.

Among C.D. Blocks in the district, Hussainganj has the maximum proportion of rural households i.e. 81.2 percent living in permanent houses followed by Ziradei (76.5%)

and Siwan (75.8%) C.D. Blocks. Lakri Nabiganj C.D. Block has the minimum proportion (63.3%) of households living by permanent houses. In case of temporary houses in rural areas, Nautan C.D. Block has the maximum proportion of households i.e. 27.6 percent living in such houses followed by Mairwa C.D. Block (22.3%). The lowest proportion i.e. 7.6 percent of such households are found in Hussainganj C.D. Block.

In respect of semi permanent houses in rural areas, C.D. Block Hasanpura has the highest proportion (19.1%) of households living in semi permanent houses where as lowest proportion (6.2%) of such households are found in Nautan C.D. Block.

In respect of urban households, Siwan(M) has 90.3 percent households living in permanent, 6.1 percent in semi permanent houses and 3.6 percent households living in temporary houses. In Maharajganj (NA) 83.9 percents of urban households live in permanent houses, 9.7 percent in semi permanent houses and 6.4 percent in temporary houses. Mairwa (NA) has 83.5, 4.8 and 11.7 percent households living in permanent, semi permanent and temporary houses respectively.

Data source : Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

The Table above shows that of the total rural households i.e. 374,715 in the district, 90.3 percent of them have improved drinking water facility. The highest proportion (93.9%) of households with improved drinking water facility can be observed in C.D. Block Guthani where as it is lowest (85.9 %) in C.D. Block Basantpur.

Regarding electricity, it is found that only 3.0 percent of the rural households in the district have electricity. The highest proportion of households with electricity is in Pachrukhi C.D. Block with 10.9 percent where as it is lowest in C.D. Block Raghunathpur with 0.3 percent only.

Only 7.9 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Hussainganj C.D. Block with 12.3 percent where as it is lowest in Andar C.D. Block with 5.6 percent.

Only 13.1 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is in Hussainganj C.D. Block with 22.7 percent where as it is lowest in Mairwa C.D. Block with 6.4 percent.

Only 47.4 percent of the total rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Hasanpura C.D. Block with 62.7 percent where as it is lowest in Bhagwanpur that C.D. Block with 29.8 percent.

All these facilities in the district are available to urban households comparatively in much higher proportion.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The Table 51 shows that 52.6 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Basantpur C.D. Block with 77.0 percent where as it is lowest in Andar C.D. Block with 32.4 percent.

Around thirt eight percent of the rural households in the district use crop residue as fuel

for cooking. Among the C.D. Blocks highest proportion of households using crop residue as fuel for cooking is 51.3 percent in Raghunathpur C.D. Block where as it is lowest i.e. 20.8 percent in Basantpur C.D. Block.

Only 7.8 percent of the rural households in the district use cowdung cake as fuel for cooking. Among C.D. Blocks the proportion of households using cowdung cake as fuel is highest i.e. 19.9 percent in Andar C.D. Block where as it is lowest in Basantpur C.D. Block with one percent.

In case of cooking gas (L.P.G.) only 0.8 percent of the rural household use L.P.G. for cooking in the district while proportion of urban households using cooking gas in the district is 28.9 percent.

Keresine oil for cooking purpose is used by 0.3 percent rural and 15.7 percent urban households in the district. Similar trend can be observed in respect of other types of fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

					Availability of household assets						
Serial number	C.D.Block	Total/ Rural/ Urban	Total number of households	Total number of households availing banking services	Radio / Transistor	Television	Tele-phone	Bicycle	Scooter, Motor Cycle, Moped	Car, Jeep, Van	None of the specified assets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

In would be seen from the Table above that there are 160,587 households accounting for 40.6 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in C.D. Block Ziradei with 47.1 percent of the total households availing banking services where as the same is lowest in C.D. Block Hasanpura with 34.5 percent.

There are 143,345 households accounting for 36.2 percent of the total households in the district possessing radio/transistors. In this regard the highest proportion of households is in Ziradei C.D. Block 39.7 percent where as it is lowest i.e. 33.0 percent in C.D. Block Andar.

There are 7.4 percent of the total households in

the district possess televisions. In this regard, the highest proportion of households is in C.D. Block Siwan (20.7%) where as it is lowest in C.D. Block Darauli (3.7%).

Table also shows that 63.0 percent of the total households in the district possess Bicycles, 4.3 percent possess Scooter/moter cycle/moped, 1.8 percent have telephone and only 1.1 percent possess car/jeep/van. C.D. Blockwise details can be observed in the district.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

This district derived its name from Shiva Man a Bandh Raja. Dronacharya of Mahabharat belonged to the village DON in Darauli Block. Thus, this district has its social and cultural importance.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Amarpur

Amarpur is a village situated three kms. west of Darauli. In this village ruins of mosque of red bricks on the bank of river Ghaghara is still exist. This mosque was built during the reign of Mughal Emperor Shahjahan (1628-1658) under the supervision of his Nib Amar Singh but the work was left incomplete. The village derived its name from the builder of the mosque, Amar Singh.

Faridpur

Faridpur situated just near Andar is the birth place of Maulana Mazharul Haq who played an important role during the freedom movement. He was a symbol of Hindu-Muslim unity.

Darauli

Darouli is the headquarter of C.D.Block Darouli. It is said to have been founded after the name of Dara Shikoh, the eldest son of the Emperor Shahjahan. Its name was Daras Ali which later on was changed into Darauli. There are reminiscence of Mughal period ruins where a big fair is held every year on the Kartik Purnima.

Don

A village in the Darauli C.D.Block where there are remnants of a fort which is said to be connected with the famous hero of the Mahabharat, Acharya Dronacharya, the guru of both Kauravas and Pandavas.

Hasanpura

It is a village in the Hussainganj C.D.Block. It is said that it was found by Makhdum Saiyad Hasan Chisti, a saint who came from Arabia to India and settled here. He also founded a *Khankhah* (religious institution) here. For the upkeep of *Khankhah* and Dargah of Saint Chisti an endowment of land was granted by the Emperor of Delhi. The village contains the remains of a large mosque and dargah of the saint which is visited by both Hindus and Muslims.

Lakri Dargah

A village, it is the place of pilgrimage for the Muslims. The village is so called because it contains the tomb (dargah) of a Mohammedan saint, Shah Arjan of Patria, in which there is some good wood-work. The story runs that the saint, attracted by the solitude of the place, performed a Chila here, i.e., gave himself upto religious contemplation for 40 days. He also set up a religious establishment which was endowed by the Emperor Aurangzeb. The anniversary of the saint's death is celebrated on the 11th of Rabi-us-sani every year which attracts a large crowd.

Maharajganj

A C.D.Block headquarters now, it was also called Basnauli Gangar. It is the largest market in the district. This was the place where great hero of Indian Independence Movemenet, Shri Phulena Prasad centralized his activity and fought against the Britis rurel.

Mairwa

A C.D.Block headquarters, there is a celebrated Brahma Astban, locally known as Hari Baba ka Asthan, the shrine having been built over the relics of the saint. There is also a mound called Chananriyam Dih from an Ahirni women who is now worshipped in a shed built in front of the dak bungalow which occupies the top of the mound. The shrine is on the bank of the Jharhi river and fairs are held in Katik and Chaitra months. There is also a leper home at Mairwa known as Kustha Sevasram which is doing useful work.

Papaur

A village which represents a place of great antiquity. It must be the Pava where the goldsmith Kunda lived, when Lord Buddha came and went with his followers to the invitation to dine with the goldsmith. The name Papaur appears to be a corrupt from of Paparura or Pavapura, i.e., the sacred city.

Mehndar

A village is Siswan C.D.Block, where there is a temple of Lord Shiva which is visited by the people of the locality on the Shivaratri day. It is known for its temple and a pond scatteral over an area of more than 52 *bighas*. It is said that one Nepal King built these and took his bath in the pond and got his leprosy cured.

Jiradei

It is a village in the C.D.Block Hussainganj. Dr. Rajendra Prasad, the first President of the Indian Republic belonged to this village.

Keontalia

A village in Darauli C.D.Block situated on the bank of the river Saryu. It is said to have the remnants of a Hindu temple, which was built at the instance of Lord Buddha.

Bhikhabandh

A village in Maharajganj Block, there is a big tree under the shade of which Bhaiya-Bahini temple is situated. The story runs that these brother and sister fought Mughal sepoys in the 14th century and died here incourse of fighting.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Agriculture is the main occupation of the district, where as few persons of the population is dependent on commerce. The chief commodities of imports are rice, salt, cloth, coal and kerosene oil while chief commodities for export are potato, sugar and mustard seed.

However, the people of this district are adventurous and enterprising. The district being predominantly agriculture based. The pressure on the land is enormous, but emigration affords a partial relief to pressure on soil. Much of the emigration is seasonal lasting for three months. But the people of Siwan are found almost in all parts of India and a substantial numbers reside abroad specially Arab countries where from they regularly send substantial amount to their homes. The receipt is so good that a nationalized bank has recently opened a special NRI counter for this purpose.

(xi) Scope of Village Directory and Town Directory - column heading wise explanation and coverage of data.

The District Census Handbooks are the only publication which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referenc village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in English and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town

in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local

authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

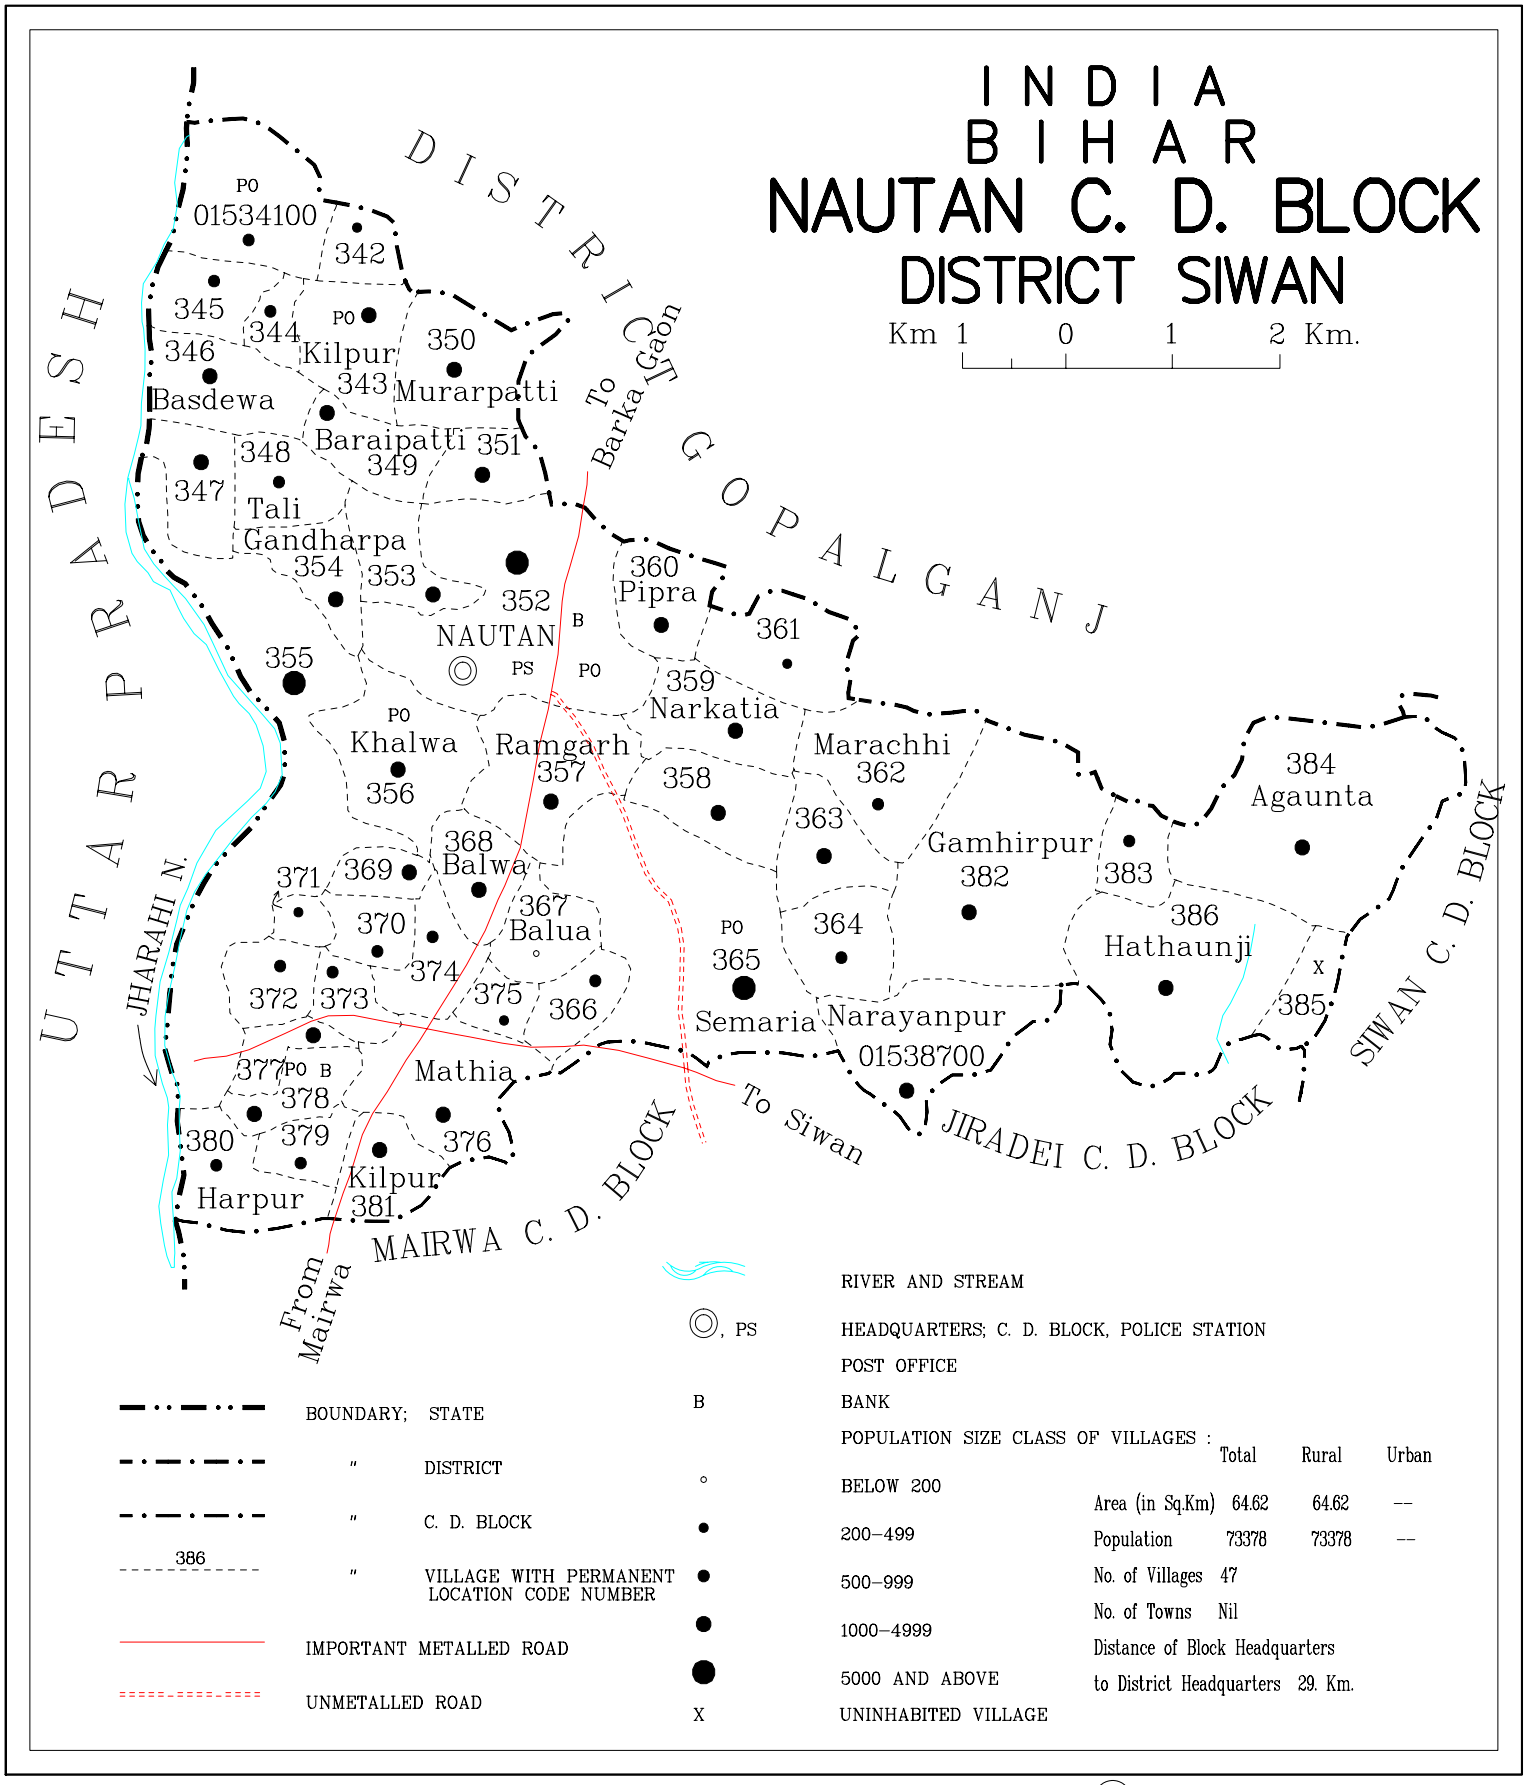

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Serial number	Name of Towns	Name of villages merged in towns	Name of villages identified for outgrowth	Location Code Number 1991 Census	Location Code Number 2001 Census (in case of partly OG)
1	2	3	4	5	6

There is no such village in the district of Siwan

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II
ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Siwan	1991	77	74	66	75
	1981	59	82	97	113

From the estimates of child mortality (number of deaths by ages 1, 2, 3 and 5) given in Annexure II as q(1), q(2), q(3) and q(5) it is observed that there has been decline in child mortality over decades (in 1991 Census as compared to 1981 Census) both in the state and the district of Siwan except for children of one year . The mortality in case of children of one year in 1981 was 59 which rose to 77 in 1991 in the

district. An interesting feature which can be noticed from the Annexure is that the child mortality at the ages 1, 2, 3 and 5 was lower in Siwan district compared to the state averages at the time of 1981 and 1991 Censuses excepting for children of one year as noted above.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the districts and the state(1991-Census)	
	State	District
1	2	3
CBR	36.2	36.3
TFR	5.3	5.4
TMFR	5.9	6.1
GFR	163	162.0
GMFR	186	186.0
Child Woman Ratio	66.6	69.2
No. of Children ever born per Woman in age group (45-49)	4.1	4.3
Mean age at marriage	16.5	16.5

It can be seen that fertility measures such as Crude Birth Rate(CRB), Total Fertility Rate(TFR) and Total Marital Fertility Rate(TMFR) for Siwan district are higher than the State average whereas General Fertility Rate(GFR) is higher in Bihar state as a whole in compared to Siwan district. However, the General Marital Fertility Rate(GMFR) and mean age at marriage for Siwan district are equal to State average. The Child Woman Ratio(CWR) is significantly higher (69.2) in Siwan district than the Bihar (66.6) as a whole.Number of children ever born per woman in age group 45-49 is also higher in Siwan district than that of Bihar state average.

ANNEXURE - IV (A)

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Siwan	244,998	14,106	230,892	827	196	631	660,776	42,249	618,527
	(37.1)	(33.4)	(37.3)	(0.1)	(0.5)	(0.1)	(100.0)	(100.0)	(100.0)

Migrants by place of birth are 213.07 lakhs and 199.89 lakhs during 1991 and 2001 Censuses respectively in Bihar state as a whole. The migrants constitute 24.7 and 24.1 percent of the total population in the state according to 1991 and 2001 Censuses respectively. The proportion of male and female migrants is approximately 5% and 46% respectively to its total population during 1991 Census and it is 4.9 % and 45.0% for males and females during 2001 Census respectively.In Siwan district, the total number of migrants by place of birth is 2.08 lakh and 6.61 lakh during 1991 and 2001 Censuses respectively .The migrants in Siwan district comprise 21.2 and 24.3 percent of the total population of the district during 1991 and 2001 Censuses respectively. Male and female migrants account for 3.9 % and 42.1% respectively of the total population during 1991 Census and those male and female migrants account for 3.2 and 44.9 percent respectively of the total population during 2001 Census.

From the distribution of total migrants in Bihar by place of birth it can be clearly seen that females predominate in Intra district migration while males predominate in inter district, inter state and international migration. Almost similar trend is noticed in Siwan district during both the Censuses(Except for inter-state and international migration in 2001 Census for the district). This probably indicates that migration of females from their place of birth is generally attributed to the prevailing custom of the girls moving away on marriage from their place of birth and majority of cases this movement is from within the same district i.e. the district of enumeration. Migrants born in other states of India as also those born outside India have lower proportion of females vis-a-vis.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Siwan		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	472,962	444,502	28,460
(1) within the state		(100.0)	(84.7)	(15.3)	(100.0)	(94.0)	(6.0)
	Rural	19,010,120	16,570,646	2,439,474	461,582	438,002	23,580
		(94.7)	(82.6)	(12.2)	(97.6)	(92.6)	(5.0)
	Urban	990,737	375,267	615,470	10,830	5,990	4,840
		(4.9)	(1.9)	(3.1)	(2.3)	(1.3)	(1.0)

ANNEXURE - IV (C)
INTERSTATE MIGRANTS, 2001 CENSUS

Bihar			Siwan		
Place of Birth	Migrants	Percentage to total Migrants	Place of Birth	Migrants	Percentage to total Migrants
1	2	3	1	2	3
Uttar Pradesh	434,051	27.4	Assam	108,594	44.3
Jharkhand	339,297	21.4	Uttar Pradesh	62,920	25.7
Assam	133,758	8.5	Jharkhand	45,184	18.4
West Bengal	126,499	8.0	Maharashtra	11,382	4.6
Nagaland	101,267	6.4	Nagaland	5,409	2.2
Chhattisgargh	90,469	5.7	Andhra Pradesh	2,724	1.1
Gujarat	65,996	4.2	Total for six states	236,213	96.4
Uttaranchal	63,527	4.0	Other states	8,785	3.6
Jammu & Kashmir	43,737	2.8	**Total**	**244,998**	**100.0**
Orissa	42,215	2.7			
Maharashtra	38,244	2.4			
Rajasthan	20,542	1.3			
Haryana	20,505	1.3			
Andhra Pradesh	18,371	1.2			
Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

It transpires from the above Annexure that during 1991 Census in case of Bihar 9 States, namely, Andhra Pradesh, Assam, Haryana, Madhya Pradesh, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal together account for 9.80 lakh (93.38%) of the 10.5 lakh interstate migrants, West Bengal and Uttar Pradesh states are prominent among them contributing 39.9 and 30.7 percent of migrants respectively. In respect of Siwan district, of the total 29240 interstate migrants in 1991 Census, Uttar Pradesh and West Bangal states contribute 92.0 and 5.7 percentages respectively.

During 2001 Census we can see that in case of state fourteen states together account for 97.2 percent of the total inter-state migrants.States of Uttar Pradesh and Jharkhand are prominent among them and they contribute 27.4 and 21.4 percent of the total inter-state migrants respectively.In case of district,during 2001 Census the states of Assam,Uttar Pradesh and Jharkhand have contributed 44.3,25.7 and 18.4 percent respectively to the total inter-state migrants.

ANNEXURE - V (A)

The data presented in Annexure-V (A) shows religion wise distribution of population according to 1991 and 2001 Censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the Censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001 respectively. The Muslim come next with 14.8 and 16.5 percent respectively. Christians have been the third most important religious community though it proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the State during both the Censuses. Persons categorized under "Other Religions & Persuasions" compris of 1.7 and 0.1 percent of the state's population during 1991 and 2001 Censuses.

In Siwan district the proportion of Hindus to the total population of the district remained 82.8 percent in 1991 and 81.7 percent in 2001 which were slightly lower than the respective State averages. Muslims

had been, however, relatively in good proportions as they constituted 17.2 and 18.2 percent of the district's population in 1991 and 2001 Censuses. The proportion of population of other religious communities remained almost negligible in the district of Siwan during both the censuses as Hindus and Muslims taken together comprised over 99 percent of the total population of the district during both the censuses.

The above Annexures furnish religion wise distribution of population for the district of Siwan and its C.D. Blocks in 1991 and 2001 Censuses.

As already observed in Annexure V (A) of 1991 census, though the proportion of Hindus in the district of Siwan is highest as compared to other religious communities still it was seen that Muslims also formed a big chunk of population in the district. Among the C.D.Blocks of the district in 1991 Census , Darauli C.D.Block has recorded the highest proportion(94.1 %) of Hindu population and Barharia C.D.Block of the district has recorded the highest proportion(32.5 %) of Muslim population. During 2001 Census it is again Darauali C.D.Block of the district , which has recorded the highest proportion of Hindus with 93.9 percent whereas Hussanganj has recorded the highest proportion for Muslims with 38.2 percent The existence of other religious communities in various C.D. Blocks of the district is insignificant as their proportions to total population are almost negligible in both the Censuses.

It is quite apparent from Annexures above that Siwan district as well as the State have a relatively higher proportion of 'never married' males and 'married' females during Census 1991. This may be attributed due to the fact that women get married at younger ages than males. As against 54.2 and 58.2 percentages of 'never married' males in Bihar State and Siwan district respectively, the corresponding proportion among females are 45.2 and 46.5 only. There is no much difference in situation in Siwan district as compared to Bihar state as a whole. While the district has slightly higher proportion of male widowed, the State, on the other hand, has slightly higher proportion of female widowed during 1991 Census and the district has higher proportions of male and female widowed during 2001 Census.

While analyzing marital status by broad age-groups one finds that married females out number married males in the age-group 10-14 suggesting that child marriage among females is more prevalent than males. However, the interesting feature which can be noticed is that the proportion of married males and females in the age-group 10-14 is comparatively less in Siwan district in compare to the State.

It is also significant that the proportion of 'never married' females in the age-group 15-19 and above is much lower than the 'never married' males in Siwan district as well as for the State as a whole. The proportion of divorced or separated males and females are significantly low in Siwan district as also in Bihar state.

Age not stated	17.8	18.5	11.5	7.6	17.1	12.1	0.2	0.0

One of the important characteristics of the population on which information is collected in the Census is literacy. Apart from collecting data on number of literates, level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the Census has already been explained in the beginning of this publication.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 Census was 38.5 percent. Now it has risen to 47.0 percent in 2001 Census. The corresponding proportions for Siwan district in 1991 and 2001 are 39.1 and 51.6 percent respectively.

Annexures VII(A),VII(B),VII(C) and VII(D) furnish informations regarding absolute number of illiterates and literates in Bihar state and Siwan district as also percentage distribution of literates by different level of education by different age groups in 1991 and 2001 Censuses.

A break up of literate population by various educational level (of 1991 Census) show that 20.3 percent males and 27.2 percent females in the State are literate but have not attained any educational level. These proportins have risen to 28.4 and 35.8 percent (including Below Primary)for males and females respectively in the State in 2001Census. It can be also seen from the Annexures that more or less same trend prevails in Siwan district during 1991 and 2001 Censuses. It is interesting to see that at lower levels of education (up to 'Primary') the female's proportions are on higher side than the male's proportions in State as well as in the district in both the Censuses.

According to 1991and 2001 Censuses the position of literates by different level of education in Siwan district is more or less the same as observed in case of Bihar.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Siwan		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Bhojpuri	2,465,169	90.8
Hindi	14,524,035	17.5	Urdu	201,759	7.4
Magadhi/Magahi	12,132,383	14.6	Hindi	44,233	1.6

Marwari	27,152	0.0	Marwari	153	0.0
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	1,131	0.0
Total Population	**82,998,509**	**100.0**	**Total Population**	**2,714,349**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century.Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as Scheduled or Non-Scheduled languages during 2001 Census for Bihar State as well as for Siwan district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Magahi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the State as their mother tongue respectively in 2001. Urdu in the State has been returned by 11.4 percent of the total state's population whereas in the district of Siwan 7.4 percent of the district population have returned it as their mother tongue. Bhojpuri as mother tongue has been returned by 90.8 percent of Siwan district's population.Hindi has got third position with 1.6 percent of the district population having returned it as their mother tongue. Except these languages analysed above both for the State and the district, other have been returned by insignificant proportions of the respective population of the State and the district as mother tongues as per Census 2001.
