Cattle fair of Sonepur

According the story in Purana goes in olden era, on the eve of Kartika Purnima (Full Moon day of Kartika) a crocodile caught a crazy elephant in the water of Narayani (Gandaki) river while he was joyfully taking bath. A horrible fight between crocodile and the elephant continued for several days. When the elephant realized his defeat and death coming closer he very fervently prayed Lord Vishnu to save his soul. Lord Vishnu emerged immediately and salvaged the elephant by killing the crocodile.

Since then, due to this episode in the region, on Kartika Purnima every year, the largest cattle fair in Asia is held here.

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 2001 Census 1006

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 2001 Census 1010

Annexure VI : Marital status of population as per 2001 Census 1017

Annexure VII : Age, sex and education in the state & district, 2001 Census 1032

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 1040

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of ‘notified slums’. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of ‘motif’ highlighting significant

characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth / place of last residence, (ii) main religions, (iii) marital status of population, (iv) age , sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General & Census Commissioner, India

New Delhi

Dated: 17.10.2006

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place

in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and wholehearted co-operation, which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

District Highlights – 2001 Census

1. Saran ranks 8th in terms of population (32,48,701) and 16th in terms of area (2,641 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Saran is the 5th densely populated district in the state with 1,230 persons per sq.km as against the state's 881.
3. Saran ranks 3rd in terms of sex-ratio (966) against the state's 919.
4. There are 201 uninhabited villages (out of 1,767 total villages) in the district of Saran.
5. Parsa (under 7 C.D. Block) is the most populated village (20,943) and Nagra (under Ekma C.D. Block) and Asgharpur (under Parsa C.D. Block) are the least populated villages (6) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 70% of the total workers are engaged in Primary sector.
7. C.D. Block Dariapur has the highest number of villages (196) in the district and C.D. Block Lahladpur has the lowest number of villages (39).
8. Sabalpur (under Sonepur C.D. Block) has the largest area (2,667 hectare) and Bahora (under Taraiya C.D. Block) and Mirzapur (under Parsa C.D. Block) have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 92.2 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991

Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The district of Saran is situated between 25º30' and 26º13' North latitude and 84º24' and 85º15' N East latitude in the southern part , often newly created Saran Division of north Bihar. The Ganges constitute the Southern boundary of the district beyond which lie the districts of Bhojpur and Patna. To the north lie the districts of Siwan and Gopalganj. The Gandak forms the deviding line with Vaishali and Muzaffarpur districts in the east. To the west Saran lies part of Siwan and district of Ballia in Uttar Pradesh, the Ghaghra constituting a natural boundary between Saran and Ballia in Uttar Pradesh,the Ghaghra constituting a natural boundary between Saran and Ballia contains three Sub-Divisions viz., Chapra Sadar, Mrhoura and Sonepur with headquarters at Chapra. Chapra happens to be the principal town of the district. There are 15 Anchals and 20 Community Development Blocks.

The historical background of the district as available in the Ain-I-Akbari' records Saran as one of the Six Sarkars (Revenue division) constituting the province of Bihar. At the time of grant of diwani to the East India Company in 1765, there were eight Sarkars including Saran and Champaran. These two were later combined to form a single unit named Saran. Saran (along with Champaran) was included in the Patna Division when the commissioners division were set up in 1829. It was separated from Champaran in 1866 when it (Champaran) was constituted into a separate district. Saran was made a part of Tirhut Division, when later was created in 1908. By this time there were three Sub-Divisions in this district namely Saran, Siwan and Gopalganj. In 1972 each sub-division of the old Saran district became an independent district.

The headquarters Saran district after separation of Siwan and Gopalganj remained at Chapra.

Various hypothesis have been put forward about the origin of the name Saran. General Cunningham suggested that Saran was earlier known as Sarana or asylum which was a name given to a stumbled (pillar) built by Emperor Ashoka to commemorate the conversion to Buddhism of some legendary demons who ate human flesh. He considered that the site of stupa must be some where near Arrah. Another view holds that the name Saran has been derived from saranga-aranya or the deer forest. The district being famous for its wide expanses of forest and deer in prehistoric time. According to another account worthy of recapitulation, Saran is a derivative of Sakra Aranya, the forest of Sakra which is another name for Indra. This forest is said to have covered the country around Visala at which place king Sumati received Lord Ramchandra when he was proceeding with Vaishwamitra on way from Ayodhya to Mithila.Yet another legend explains the three names Arrah, Saran and Champaran as corrupt forms of old Sanskrit names Aranya, Saranya and Champaranya derived from the thick forests covering these areas.

Early history

The Cheros are believed to have been the chief among the pre-Aryan inhabitants of the district. According the to vedic literature, the Aryan videhas came from the west and settled largely in the area east of the Gandak river as ordained by Agni, the God of fire. However many of them remained to the west of the river and settled in the area now comprising the Saran district.Saran formed the part of the kingdom of Kosala (Uttar Kosala) which figured prominently in the history of eastern India during the time of Gautama Buddha. In the travel memoirs of Hiuen-Tsang, the Chinese pilgrim who traveled in the country between 620 and 645 A.D. there is mention of three places he visited towards the north of the Ganges. The places were (1) Narayan deo Temple which has balconies as well as sculptured and ornamented towers, (2) a stupa (pillar) built by Ashoka towards the east of the Narayandeo Temple and (3) another stupa built by a Brahmin over the kumbha (pitcher) with which he had measured the ashes of Buddha and divided them into the eight equal parts for distribution to the eight kings of the areas. The Dighwara. Hiuen Tsang mentioned the aleove

description in his diary relating to Chenchu district, which correspond with modern Gajipur in Uttar Pradesh. This indicates that Saran was probably a part of the kingdom of Gajipur in that period. The earliest authentic historical fact or record concerning this district may perhaps be related to 898 A.D. which suggest that the village of Dighwa-Dubauli in Saran had supplied a copper plate issued in the reign of king Mahendra Paldeva. It records the grant of land in Sravasti Bhukti there by suggesting that the Guryara Pratihara empire extended upto Gandak, if not further east, on the northern banks of the Ganges. It follows, therefore, that Saran in the ninth century of the Christian era was a part of Sravasti Bhyukti, just as it is now part of Saran Division.

Mention may also be made here of the probable ravaging of the district by the Chinese General Wang-Hiuen-Tse in 647 A.D. A part from these disjointed inklings, the history of the district in mediaeval period is largely strouded in darkness.

Muslim period

Ghyasuddin, the Muslim Governor of Bengal, waged a war against the Raja of Tirhut between 1211 and 1226 A.D. Tirhut was for the first time sub-jugated by the Muslims during this period and obliged to pay tribute to them. Towards the close of the 13th century Nasiruddin Bughra Khan fought against his son, Muizuddin Kaikobad when the latter was installed at Delhi after the death of his grand father. The two armies of the son and the father met on the bank of river, Gogra in Saran, but truce were arrived at without any actual fighting. According to its term Nasiruddin gave up his claim to Delhi, but retained the right to hold Bengal as an independent kingdom.

The next event of important was the invasion of Tirhut by Shamsuddin Ilyas Shah, the first independent Sultan of Bengal (1339 to 1538). He ravaged Saran extended his hold over the entire district and built a fortress at Hazipur.

Saran continued to be a part of Bengal being separated from the Delhi empire by the river Gogra. In 1397 Saran alongwith Champaran was taken over by the king of Jaunpur and continued to be a part of this kingdom over a century until Alauddin Hussain Shah, king of Bengal (1493-1518) managed to bring it back in the kingdom of Bengal. When Sikander Lodi marched into Bihar subjugating Jaunpur, he did not dare to clash with the powerful Bengal army and preferred to conclude a treaty with Alauddin Hussain Shah in 1499. According to this treaty Sarkar Saran was added to Sikander Lodi who in his turn agreed not to extend his influence to Bengal proper. It may be noted here that though Saran was at his time included in the Muslim empire, the Muslims did not actually exercise any effective control. Thus Ferista mentions that when Sinkander Lodi subdued the district it was in the hands of Hindu Zamindars. This state of affairs did not remain un-noticed and emperor Sikander Lodi made Hussain Khan Formuli, the jagirdar of Saran and Champaran which were called Jalkhet or fields of water because of their lowlying lands. Formuli was a religious fanatic and with an unparalleled frenzy, managed to confiscate twenty thousand villages of Hindu Zamindars and extended his own Jagir.

Mughal period

Nasrat Shah son of Hussain Shah, disregarded the treaty concluded by his father with Sikander Lodi & invaded Tirhut. He established his authority over Saran & extended it across the Gogra to the district of Balia as well. This was much to the dislike of Babar the mughal emperor at Delhi. Babar moved to Bihar with large force in 1529. While camping at arrah he learnt that the army of Nasrat Shah was camping near the Junction of Ganges & the Gogra. This was considered to be a hostile act by Babar and he demanded that Nasrot Shah should withdraw his army which the latter refused to do. In the battle that followed **Nasrat Sah** was thoroughly vanquished. Babar made a grant of Saran to Saran Muhammad maruf who has secured the emperors confidence. About 50 years later Aker

defeated Daud Khan the Afgan King of Bangal at Patna in 1574. Saran then became one of the six Sarkars constituting the Subah of Bihar. Todermal, the finance minister of Akbar, assessed the revenue of Saran in 1582.

Thereafter the district had an uneventful history till the advent of Europeans. By 1666 the Dutch had established there trade in saltpeter and built a depot and the factory at Chapra. Saltpeter had a wide market all over Europe as it was used in the manufacture of gun powder & the Dutch naturally did very good business. Not to be outdone, the English also started trade in saltpeter though their main establishment was located at Patna.

An important event took place in the year 1726 when Fakhra-ud-daula the Governor of Bihar, sent a force into the district against Sheikh Abdullah. The Sheikh had been held in esteem by the earlier governors, but because of persecutions by Fakru-ud-daulla he had shifted is headquarters from Azimabad (Patna) to a place near Siwan where he build a mud fort for his protection. Further pursuit by Fakhru-ud-daula's forces made him flee from Siwan and seek asylum in Oudh.

The British forces made their first appearance in Bihar in 1757. A small section under Eyre Coote reached Chapra on the Forth August, in pursuit of Maonsieur Law, the French adventurer who had espoused the cause Sirj-ud-daula and thereby offended the British. However, Law had fled to Banaras before the British forces could arrive at Chapra and consequently there was no engagement.

When the attempt of the English to seize Patna was foiled by Mire Qasim Ali and they were obliged to remain within their fort for a long time, they had no option but to leave stealthily. On the 29th June 1763 they left by boat for Chapra. They were sort of supply and ammunitions and the weather was very heavy. The Nawab's force pursued them after apprehending them near Manjhi and brought them back to Patna as prisoners. A small British army followed the Nawab and while crossing the Saran ravaged the countryside on their way. The forces had to camp at Manjhi. Since rains had set in by that time, it was not possible to proceed further. In September that year, Indians in the British force stationed at Manjhi rebelled and managed to take all their British officers at prisoners who were how ever, released after being stripped of their equipment.

The battle of Buxer in 1785 was a turning point in the history of British rule in India. Saran also became a part of the lower provinces of Bengal. Lord Clive paid a visit to Chapra in 1766 when the Nawab of Oudh, a Minister of Emperor Shah Alam, and the Raja of Banarash met him in a conference designed to work out a common approach against the invading Maratha armies.

Although technically masters of Bengal including Saran, the English could succeed in establishing themselves with great difficulty in the face of the strong opposition by independent minded Zamindars, chiefs and princes in the district. Maharaja Fateh Sahi of Husepur, a relative of the Raja of Banarash refused to pay the revenue to the British. The undaunted rebel was however, defeated by a British army and expelled from his territory which coincided roughly with Siwan and Gopalganj districts. Govind Ram was appointed a revenue farmer. Fateh Sahi fled to a forest named Baghjogni and continued his struggle from there in spite of heavy odds. Since Fateh Sahi was held in high esteem by his people, his exhortion to them not to pay revenue to foreign rulers was largely followed and the collection of revenue, by the British almost ceased completely. Gobind Ram was killed in 1772. This forced the British to come to terms with Fateh Sahi who was allowed to return to Husepur. However his Zamindari was not restored to him and it continued to, be farmed out to other though he was paid a maintenance allowance. Basant Sahi a cousin of Fateh Sahi and the progenitor of the line of Hathua Rajas was appointed a revenue farmer by the British and Mir Jamal as the Superintendent of the Government revenue. Fateh Sahi managed to kill both Basant Sahi and Mir Jamal in 1775. It is believed that Basant Sahi's head was cut off and sent to his widow who performed Sati with the head of her dead husband in her lap. Fateh Sahi had a band of trained men at his command and his popularity was ever increasing. Even though the British managed to secure the

assistance of the Nawab of Oudh in their attempt to capture Fateh Sahi, and a huge reward was offered for his capture, he remained free. In 1808 he became a Sanyasi and thus ended an eventful period in the history of this district.

Movement of 1857

The freedom loving people of Saran played their due role in the national liberation movement. Among the various factors fanning their indignation against the foreign rulers were, (a) ill-treatment of sepoys in the police and the army, (b) high handedness and extortions of the European indigo planters, (c) conversion of people to Christianity by the missionaries, and (d) introduction of common messing in the Jails. The seething discontent among the people seems to have been fired by the events in Meerut and Banaras. The yoke of foreign rule was once again sought to be over thrown for good. The British administration on their part after realizing that trouble was in the offing took steps to fight the impending menace. The strength of the police force in the district was augmented. Very strict watch was kept on the ghats and the frontiers. The Treasury was moved from Chapra to Patna. The British found an ally in the Zamindars of Hathwa who promised loyalty to support and assist them in quelling the expected disturbances.

The banner of revolt was first raised in the district on the 25th July at Sugauli. The Indian soldiers of the 12th Irregular Cavalry mutinised and killed the despotic Commandant, Major Holmes and other European officers. The rebels then proceeded to join other forces. They attacked the Magistrate and the Opium agent at Siwan. The European resident of Chapra panicked and fled to Dinapure on the 28th July but returned later after violence was no longer apprehended. Some revolutionaries in the district attacked the indigo factories at Ganga and Darauli in October. The British sent a Gorkha regiment and a Nepali Brigade to Saran. In December 1857, the outpost at Guthni was stormed and occupied by the rebels. Such events continued till the insurgents were finally defeated by the British forces aided by the Nepalese army under Rana Jangbahadur at Sohanpur on the 26th December, 1857 which, for the time being, put an end to the struggle for emancipation from foreign rule. As stated earlier, Saran and Champaran continued to comprise a single district till 1866.

Present era

The district of Saran played a glorious role in the movement in the present century. Prominent persons who took part in the freedom movement wee Dr. Rajendra Prasad,Sri Jaiprakash Narayan and others.

Pride of Bihar Babu Braj Kishor Prasad who rendered his valuable support to Mahatma Gandhi in epic struggle in Champaran in 1917 was born at Shrinagar which falls now in Siwan district.

Dr. Rajendra Prasad the first President of Indian Republic was born at Ziradei (now in Siwan district) which before recognisation of district was a part of old Saran district. His association with the Congress started as far back as 1906 when he was a volunteer in the annual session of the Indian National Congress at Calcutta (now Kolkata). He was actively associated with Mahatma Gandhi's epic struggle in Champaran. Thereafter, his political stature grew day by day and he played a decisive role in the affaires of this country before and after independence. He was undoubtedly the greatest son of Bihar in the present era. Another important and illustrious leader produced by this district was Sri Jaiprakash Narayan.

The history of the district during the following year is of too recent origin and perhaps needs no recapitulation here. Suffice to say that Saran is among the enlightened and progressive district of the state with a healthy and sturdy people full of initiative and enterprise. Its biggest problem, the heavy pressure of population on land, is reflected in the

large number of emigrants mostly males and working as general labours, mill hands, plantation workers, constable, etc, who are often met with in the streets of Calcutta (Kolkata) or in the tea garden of Assam and other distant places.

(iii) Administrative set up

Chapra only it's the headquarters and principal town. The district of Saran which is situated in north Bihar. Administratively it constitute the Saran Division and houses the Headquarter of and Divisional Commissionery at Chapra also. The Ganges constitute the southern boundary of the district beyond which lie the districts of Bhojpur and Patna. To the north of Saran lie the districts of Gopalganj and Muzaffarpur and district of Siwan and part of Uttar Pradesh (Ballia district) flank Saran from west and north west and river Gogra constitute the natural boundary between Saran and Ballia. Vaishali district lie in its west after Gandak which is dividing line between Saran and Vaishali districts.

As per Census 2001, Saran district has the following administrative setup:-

Sub-Divisions	C.D. Blocks	No.of villages in C.D. Block
1. Marhaura	Mashrakh	68
	Panapur	70 (carved out from old Jalalpur Block after 1991 Census)
	Taraiya	87
	Ishuapur	63(created out of old Taraiya Block after 1991 Census)
	Marhaura	106
	Amnour	118
2. Chapra Sadar	Baniapur	114
	Lahladpur	39(created out of old Lahladpur C.D. Block after 1991 Census)
	Ekma	93
	Manjhi	133
	Jalalpur	71
	Ravilganj	52
	Sadar Chapra	110
	Nagara	59 (created out of erstwhile Jalalpur C.D. Block after 1991 Census)
	Maker	41 (New Block carved out from old Parsa Block between 1991-2001 Census)
	Parsa	90
	Garkha	113
3. Sonepur	Dariyapur	196
	Dighwara	46
	Sonepur	98
	Total-	**1767 village**

A total of 3 Sub-Divisions, 20 Community Development Blocks and 1767 villages constitute the present Saran-district.

There are five Towns/Municipalities the district name 1. Marhaura(NAC), 2. Revelganj(M), 3. Chapra(M), 4. Dighwara(NAC) and 5. Sonepur(NAC).

District Collector is head of the district administration, sub-division is headed by sub-divisional officers.Community Development Blocks and Circle Offices are the primary level of civil administration and revenue collections in the district. Block Development Officers and Circle Officers are posted in these office respectively who assist Sub-Divisional and District officers of the district.

Senior Superintendent/Superintendent of Police is the head of the police administration of the district who is assisted by Dy-Superintendents of Police/Subdivisional Police Officer/posted in Sub-Divisions. A net work of police thanas and police post and police outposts are in place manned by Inspectors/ Sub-Inspectors of police who keep vigil on crime in their respective area**s.**

(iv) Physical Features

The district is shaped like a triangle with its apex at the confluence of the boundary of Gopalganj district and the Gandak river. The Gandak river alongwith Muzaffarpur and Vaishali districts forms the eastern side, the Ganges and the Ghaghra alongwith Bhojpur and Patna districts forms the southern side, whereas the boundaries of Balia district of U.P. and Siwan and Gopalganj districts of Bihar and north western form the western side of the triangular Saran district. Saran district is situated between 25º36' and 26º13' North Latitude and 84º24' and 85º15' East Longitude. The land slopes towards the south east which is also the direction followed by the rivers.

The district is entirely constituted of plains but there are quite a few depressions and marshes, which cause the formation of two broad natural regions viz., and Ghaghra Flood Plain,
Gandak Flood Plain on the basis physical factore like soil, geology and climate.

Rivers

The Ganges touches the district at Kotwapatti Rampur as its junction with the Ghaghra. The river flows from West to East forming the southern boundary of the district till its reaches Sonepur, where it is joined by the Gandak. The Ganges is also navigable and boat traffic is of some Consequence. In cold Weather the river is about a mile in width but during the rains it assumes a huge form 13 to 16 K.MW. in width at some places. A large number of country boats carry merchandise along the river.

Originating from the lower Himalayan ranges near Tribenighat to the north-west of Motihari/Bettiah, the Gandak, which is also called Narayani in its earlier reaches touches the district near Chintamanpur in the north eastern corner of the district. It runs 85 K.M.S. along with the north eastern boundary of the district upto sonepur where it joins the Ganges. The Saran embayment running along almost the entire length of the river protect the district from Gandak floods. The river actually flows at a higher level than the adjoining plains and before erection of the embankment, the district receives flood water from this river which along with the washing brought by it greatly enhanced the fertility of the soil. It is navigable by country boats. An ambitious scheme has been launched by the State Government to exploit the water resources of this river.

The river Ghaghra (also known as Saryu) rises in the lower Himalayas and winding its course through the eastern district Uttar Pradesh, forms the western boundary of Saran for about 56 K.M. from near Matiharin Manjhi to its confluences with the river Ganga near Chapra.

It is navigable through out the year and usually boats carry goods to the eastern district of Uttar Pradesh. Revelganj being on its bank used to be a great center of river borne trade before coming of the reailways.

Climatic Conditions

In summer the climate of the district is hot and dry but winter months are quite cool and pleasant. Winter comes towards he middle of October after the rains are over. The temperature begins falling and January is the coldest month of the year with mercury falling to about 7.º C. The blowing of westerly wind accompanied by dust storms about the middle of March marks the beginning of hot weather. The mercury starts shooting upward and May is the hottest month of the year when the maximum temperature goes up to 45º C. The summer continues till the end of June when the onset of rains brings the much awaited relief and the temperature falls, though the humidity is still high the rise in humidity often makes the heat only more oppressive during the rainy season which lasts till the end of September. From November to February the district has a pleasant climate.

Rainfall

The monsoon breaks sometime in the latter half of June. The first showers are most welcome to the heat oppressed people. The rainy season lasts till the end of September. Maximum rainfall occurs in the month of July and August. It will be seen that normal rainfall in the district is 1138.7 m.m. and August is usually the wettest month of the year.

Forest

The district of Saran which in the remote past was densely wooded and presumably derived its name from its forest is completely devoid of any forest now. The Land is fertile and there is a large population to be supported and, therefore, no space has been left for wild growth. The cultivated land is dotted over with bamboo groves, palm trees and mango orchards.

Land use Pattern

Agriculture has continued to be the main occupation in the district and also the main source of livelihood of the people. Rainfall still controls the agricultural economy of Saran district. Conditions have, however, improved to some extent to meet the situation caused by the failure of monsoon.

Rice is the main crop of the district. It accounts for about more than 47.0 percent of the net area sown. Wheat covers nearly 11.00 percent of the net area sown, while sugarcane is grown in only 1.00 percent of the area.

Irrigational facility

The question of irrigation in the district of Saran involves watering of field on one hand and draining of waterlogged fields on the other. In the Pre-independence days, requirement of irrigation received some attention at the hands of the erstwhile zamindars. The British Government as such paid little or no attention to the irrigation needs of the district. It was only in the post independence period that Government have turned there whole-hearted attention to the irrigation requirements of the district. Among the several schemes executed by Government are the following:

Name of Project	Nature of Project
1. Saran Canal	Irrigation
2. Daha Canal	Ditto
3. Naini Bundh	Flood Control
4. Saran Embankment	Ditto
5. Ghoghra Embankment	Ditto
6. Mahi River Embankment	Ditto
7. Gandak Embankment	Ditto
8. Sondh Embankment	Ditto
9. Kurimal Bundh	Ditto
10. Kowal Embankment	Ditto

To drain of water from the waterlogged areas, there are 118 sluice gates in the above mentioned embankments. These embankments are being looked after by the Irrigation Division Chapra.

Mines and Minerals

The Geological formation of the district is Indo Gangetic alluvium. The silt brought down by the river Ganges and its tributaries since time immemorial has created the plains of the district. In the older alluvium, nodular segregations of the carbonate of line, known as knakar, are found. In many places the soil is saliferous from which saltpeter is extracted. No mineral of any economic importance is found in the district.

Industrialisation

According to records maintained by District Industries Office there were about 4000 registered factories in Saran district. They provided an employment to, on an average about 13000 workers daily. Among the large industrial establishments of the district, mention may be made of the Marhoura Confectionary of M/S.C.E. Morton (India) Ltd., the Saran Engineering co. Ltd. The Cawnpur Sugar Works Ltd., and the Cawnpur Sugar Mills Distillery at Marhoura are closed at present.

Livestock

The terms livestock includes Cattle (Cows, Bulls and Bullocks), Buffaloes, Sheep, Goat and Pigs. While poultry refers to fowls and ducks. The Cows are highest in number. Then comes the number of goats. Buffaloes occupy the third place Every C.D.Block has a veterinary hospitals.

Fishery

Several varieties of fish such as Rehu (Laburohita) Katla (catla buchanai) and Hilsa (clupea ilisha) are caught in the big rivers such as the Ganges, Ghaghra and Gandak. Among other common varieties found in the district are Piyas Bachwa, Boari and Arwari. In spite of having large rivers, the district has poor fish market and very little export of fish.

Flora and Fauna

(a) Jackals and Nilgais are the only wild animals found in the district. There are very few wild pigs. Formerly both leopards and tigers were common, but they have now completely disappeared.

(b) The district has a large number of snakes. Among the poisonous varieties, karait and gehuman or Indian cobra are often met with. Dhamin and dhonra (water snake) are the common varieties of non-poisonous snakes.

Communications

Roads – Situated on the western boundary of the erstwhile Subah of Bihar and later the province of Bengal. Saran enjoyed considerable strategic importance from commercial point of view. Much of trade in those days was of course routed through river traffic but development of roads also received attention particularly on account of famous Sonepur fair and trading activities of the British and the Dutch. However in 1830 there were only seven notable roads in existence in district. These connected Chapra with (i) Darauli, (ii) Gobindganj, (iii) Sattar Ghat, (iv) Rewa Ghat, (v) Sonepur, (vi) Sherpur, (vii) Gorakhpur (Via Siwan and Paragaon). The quality of these roads was rather poor. Much improvement in road communication has thereafter taken place.

The main P.W.D. roads in existence within the district now are enumerated below:-

Road	Distance (in Kilometers)
1. Chapra-Sonepur	54
2. Chapra-Siwan	65
3. Chapra-Rewa Gghat	39
4. Sonepur approach Road	4
5. Chapra by pass Road	6
6. Chapra-Salempur	78
7. Khaira-Sattar Ghat	93
8. Masrakh-Taraiya	10
9. Taraiya-Marhoura	8
10. Chapra-Marhoura	27
11. Chapra-Chapra Ghat	16
12. Marhoura-Amnaur	7
13. Khaira-Akhtiarpur	9
14. Chapra-Khair(Via Bintolia)	17
15. Chapra-Bhandaria	12
16. Puchhari-Harakhpura	3
17. Manpur-Garkha	18
18. Ashok Nagar-Sakari	3

Road	Distance (in Kilometers
19. Shitalpur-Maker	22
20. Parsa-Amnaur (Via Narayanpur)	7
21. Harihar Nath-Pahleza Ghat	9
22. Narayanpur-Amnaur	9
23. Chapra-Pagamberpur	23
24. Enai-Telpa	10
25. Banwar Chak-Pahleza	9
26. Garkha-Chirand	11.20
27. Sonepur-Rewa Ghat	39.4
28. Chapra-Guthani	34.6
29. Chainwa-Chainpur	6.5
	649.70 K.M.

The main District Board roads in existence are as follows:-

1) Water Bound Mecadum(W.B.M.)	332.5 K.M.
2) Brick Soling Road	265.5 K.M.
3) Kutcha Road	1167.0 K.M.
	1765 K.M.

As per the figures available from the local officials, the total mileage of surfaced roads in his district is 1247.70 K.M, in which 649.70 KM roads are under P.W.D. whereas 598.0 KM roads are being managed by District Board. Total Mileage of kutcha roads in this district is 1167.00 KM. which is being managed by District Board.

The district is at present well served by a net work of the State Transport Bus routes.

Railways

The main line of North-Eastern Railways runs through the district for a distance of 91.04 K.M. from and little beyond Chainwa in the west to Sonepur in the South-East. There are three other branch line in the district, viz., (i) W. Chapra to Varanasi – It runs for only 16 KM. In the district upto the bank of Ghagra, (ii) Chapra to Masrakh(44 KM) and (iii) Chapra to Gorakhpur–viz-Siwan – it runs for 35.2 KM. In the district upto Chainwa. The branch line from Sonepur to Pahleza Ghat has been closed due to the closure of ferry service between Pahleza Ghat and Mahendru Ghat.

Rivers

The Saran district has a net work of navigable rivers. Both Chapra and Revelganj are important trading centers on account of their situation on river banks. With the development of roads and railway in the district, the importance of river borne traffic has diminished largely.

Air

There is only one landing ground in the district which is at Chapra. This is however suitable for small aircrafts. Expansion and construction of an all weather runway is being taken up shortly.

Trade and commerce

Trade in Saran district consists mainly of exporting lin seed, mustard seeds, gram, pulses, spirit, etc. and importing of rice, paddy, other food grains, cotton piece goods, salt, kerosene oil and coal.

Electricity and Power

The district receives most of its power supply from the State Electricity Board, which has only one power house located at Chapra, which was established in 1932, when it was run by private company. The State Electricity Board took over the control of this power house in 1955.

Out of 1799 revenue villages of this district 1323 villages have been electrified uptil now. Total consumption of electricity in this district is 55.19 M.K.Wtt. According to the local officials, the break up of electric connection under different categories in the district are as under:-

1. Domestic Connection	39190
2. Commercial Connection	3577
3. Industrial Connection	1314
4. Electrified State Tube-Wells	190
5. Electrified Private Tube-Well	2473

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate

household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath

room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.- -For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts

of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhanger
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Swasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and

deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in ‘work’ as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as ‘Main worker’.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as ‘Marginal worker’ .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The

type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 : Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(ii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Saran district during 1991 was 2,572,980 Hindus constitute over 90.2 per cent (2,319,788persons) of the population in the district followed by Muslims 9.8 percent (2,52,141 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Saran district during 1991 was 2,572,746. As per distribution of different mother tongues (languages mentioned under 8^{th} Schedule of Constitution of India) as returned during the 1991 Census for Saran district, Hindi, the main mother tongue of the district was returned by 97.0 percent (2,495,863 persons) of the population. The corresponding percentage for the Urdu, the second

most prominent language spoken in Saran district, was 3.0 percent (76,014 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Saran during 1991 census.

The population of the Scheduled Castes in the district of Saran was 301,306 accounting to 1991 Census. Numerically the five most prominent SCs in the district were (i)Chamar,Mochi(152,603) (ii)Dusadh,Dhari,Dharhi(101,927)(iii)Dhobi (14,794)(iv)Pasi (12,714) and (v) Musahar (7050) while Chamar constituted the maximum proportion of Scheduled Castes population, the percentages being 50.6 (more than half of the total SC population) Dusadh comprised 33.8, percent of the SC population in the district in though numerically Second population of SC population in the while Musahar comprised 2.3 percent of the total SC population of the district.Remaning Scheduled Castes were comparatively very less in number than the five SCs described above as their percentages to total SC population was less than even 1.0 percent except Dom/Dhangad and Nat whose percentages were 1.4 and 1.3 respectively.

The population of the Scheduled Tribes in the district of Saran during 1991 Census was 3,231, Numerically, the five important STs were namely (i) Gond (ii) Kharia (iii)Kharwar (iv)Ho and (v) unclassified . Gond had 1,973 populataion which constituted 61.1 percent of the Scheduled Tribes population in the district.Khari,s with 348 population constituted 10.8 percent of the ST population.Kharwar which were 310 in number constituted 9.6 percent of the ST population.Ho comprised 160 persons and constituted 5.0 percent of ST population while unclassified with 133 population constitute 4.1 percent of the total ST population in the district. The other Scheduled Tribes were almost negligible proportion except Munds, Oraon and Santal whose percentages were 3.4,3.0 and 1.1 respectively.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Saran district is 32,48,701 comprising 16,52,661 Males and 15,96,040 Females and constituting 3.9 percent of the State population spread over 2.8 percent of the area of the State in the 20 C.D.Blocks of the district. Chapra is the most populous where as Lahladpur is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D. BLOCKS BY RESIDENCE, 1991-2001

Serial number	Name of C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Mashrakh	123,411	123,411	0	156,844	156,844	0	27.1	27.1	0.0	0.0	0.0
2	Panapur	76,044	76,044	0	100,535	100,535	0	32.2	32.2	0.0	0.0	0.0
3	Taraiya	90,783	90,783	0	118,143	118,143	0	30.1	30.1	0.0	0.0	0.0

Table – 1 shows that the rise in the population of Saran district during the decade 1991-2001 has been of the order of 26.3 percent. The rural population in the district has increased by 26.1 percent where as the urban population growth over the decade has been of the order of 27.4 percent. Rural to urban migration is an important factor which always leads to rapid expansion of urban units but in case of district of Saran there has been no significant change in urban population. It can be observed that in 1991 Revelganj has 33.8 percent urban population which grew to 34.4 percent in 2001. Similarly Dighwara had 24.8 percent urban population which rose to 25.4 percent in 2001. There has been very in significant rise in urban population of Sonepur which rose to 15.2 percent in 2001 from 15.4 percent in 1991. On the other hand there has been a decrease in urban population of Chapra with 49.6 percent in 1991 to 49.4 percent in 2001. Urban population of Marhaura decreased from 12.1 percent in 1991 to 11.5 percent in 2001.

In case of rural population, C.D. Block Chapra has shown the highest increase of 32.4 percent during the decade . The lowest decadal growth in rural population has been of the order of 17.5 percent in C.D. Block Dighwara.

Districts (Rural) Total:		**371,816**	**417 (26.6)**	**630,123**	**617,096**	**69 (4.4)**	**236,144**	**224,695**	**13 (0.8)**	**97,835**	**91,396**

It may be observed in Table - 2 that the maximum number of villages in the district of Saran lie in the population range of 1000-1999 accounting for 33.2 percent of the total inhabited villages followed by villages in the population range of 2000-4999 accounting for 26.6 percent of the total inhabited villages. The percentages of population in the above two population ranges are 25.4 and 42.3 percent of the total rural population of the district respectively. The villages in the population range of 500-999 constitute 21.2 percent of the total inhabited villages and in these villages the percentage of population is 8.4 percent. 141 villages in the population range of 200-499 accounting for 9 percent of the total inhabited villages have 1.7 percent of the total rural population of the district. There are 74 and 69 villages in the population ranges of less than 200 and 5000-9999 accounting for 4.7 and 4.4 percent of the total inhabited villages respectively. These villages account for 0.3 and 15.6 percent of the total rural population of the district. Only 13 villages accounting for 0.8 percent of the inhabited villages having 6.4 percent of total rural population of the district fall in the population range of ten thousand and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

		Name of town
		1
(a)	**New**	
(i)	Statutary town	NIL
(ii)	Census town	NIL
(b)	**Denotified**	NIL
(c)	**Declassified**	NIL
(d)	**Wholly merged with other town(s)**	NIL

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	30	0.0
11-20	1	0.1	11	0.0
21-50	6	0.4	139	0.0
51-100	10	0.6	4,654	0.2
101-200	14	0.9	2,565	0.1
201-300	26	1.7	11,815	0.4
301-500	49	3.1	33,561	1.1
501 +	1,459	93.2	2,897,289	98.2
Not known	0	0.0	0	0.0
District Total:	**1,566**	**100.0**	**2,950,064**	**100.0**
Population Density (Rural) of the district:		**1,242.1**		

The data presented in the above table highlights the fact that maximum proportion of villages in Saran district lies in the population density range (per square kilometer) of 501 and more with 93.2 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 3.1 percent.

The maximum number of villages falling in the density range 501+ cover 98.2 percent of the total population followed by villages in the density range of 301 to 500 account for 1.1 percent of the total population.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,199	1,207	1,080
1911	1,051	1,056	942	1,151	1,161	991
1921	1,020	1,027	886	1,066	1,076	917
1931	995	1,005	820	1,038	1,050	862
1941	1,002	1,012	842	1,082	1,095	889
1951	1,000	1,010	859	1,132	1,147	922
1961	1,005	1,020	832	1,148	1,168	875
1971	957	968	833	1,052	1,066	846
1981	948	959	852	1,019	1,033	875
1991	907	913	857	963	974	863
2001	919	926	868	966	974	890

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table – 5 presents the comparative chart of sex ratio for the state of Bihar as well as Saran district for total, rural and urban areas since 1901.Saran district has been such a district in the state which has the history of having favourable sex ratio for rural areas consistently from 1901 to 1981 where as state as a whole lost this position after 1961.

However the rural sex ratio in Saran district has been comparatively higher than those of Bihar throughout the decadal under consideration. Urban sex ratio both in the district and the state was favourable in 1901 There after it became adverse. The urban sex ratio in the district was 1080 in 1901 became 991 in 1911,917 in 1921 and it was 922 in 1951. Except these census years it remained below 900. In 2001, the urban sex ratio remained 890 and 868 for the district and the state respectively.

TABLE 6: SEX RATIO BY C.D.Blocks, 2001

Serial number	Name of C.D. Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Mashrakh	993	993	
2	Panapur	970	970	
3	Taraiya	970	970	
4	Ishupur	1,031	1,031	
5	Baniapur	1,038	1,038	
6	Lahladpur	1,047	1,047	
7	Ekma	1,031	1,031	
8	Manjhi	994	994	
9	Jalalpur	996	996	
10	Revelganj	944	950	931
11	Chapra	893	909	876
12	Nagra	976	976

16	Parsa	969
17	Dariapur	962
18	Garkha	952
19	Dighwara	923
20	Sonepur	886
Sex ratio (Rural) for the district Total:		**974**

As far rural areas in Saran district is concern, there are 974 females for every thousand males. Within the district the sex ratio varies from 1047 in Lahladpur C.D. Block to 886 in Sonepur C.D. Block. The most favourable sex ratio besides Lahladpur C.D.Blocks Baniapur (1038,Ishupur (1031) can be observed in C.D. Blocks Baniapur (1038),Ishupur (1031) and Ekma (1031). Out of a total of 20 C.D. Blocks in Saran district, 11 have a sex ratio which is lower than the district average.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	14	0.9	2,485	0.1
700-749	7	0.4	2,840	0.1
750-799	16	1.0	9,165	0.3
800-849	79	5.0	105,279	3.6
850-899	187	11.9	354,888	12.0
900-949	282	18.0	639,570	21.7
950-999	336	21.5	784,122	26.6
1000-1099	446	28.5	828,642	28.1
1100+	199	12.7	223,073	7.6
District Total:	**1,566**	**100.0**	**2,950,064**	**100.0**
Sex ratio (Rural) for District:		**974**		

It can be observed in Table – 8 that the maximum number (446) of villages in Saran district lie in the sex ratio range of 1000-1099 and these villages account for 28.5 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 28.1 percent of the district total rural population. 336 villages accounting for 21.5 percent of the total inhabited villages and 26.6 percent of its total population have a sex ratio range of 950-999 females per thousand males. 282 villages accounting for 18 percent of inhabited villages and 21.7 percent of the district total rural population fall in the sex ratio range of 900-949. 199 villages accounting for 12.7 percent of the total villages and 7.6 percent of total rural population of the district have 1100 and more females per thousand males where as another 187 villages accounting for 11.9 percent of villages and 12 percent of total rural population of the district are such which fall in the sex ratio range of 850-899. Only 7 and 14 villages accounting for 0.4 and 0.9 percent of the inhabited villages and each group having 0.1 percent of the total rural population of the district fall in sex ratio ranges of 700-749 and less than 700 respectively.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio

19	Dighwara	80,545	9,372	47	11.6	0.1
20	Sonepur	186,781	18,472	293	9.9	0.2
	District (Rural) Total:	**2,950,064**	**358,864**	**5,897**	**12.2**	**0.2**

The Table indicates that the percentage of Scheduled Castes population in Saran district is in the order of 12.2 percent of the total rural population.

The highest percentage of Sheduled Castes i.e. 15 percent to the total rural population of the district is in C.D. Block Jalalpur followed by Garkha(14.8%), Revelganj(14.1%) and Chapra(14%). C.D. Blocks Maker and Parsa have 13.6 and 13.4 percent Scheduled Castes population respectively. The lowest proportion of scheduled castes i.e. 9.9 percent of the total rural population of the district is in C.D. Block Sonepur.

Besides these in C.D. Blocks Panapur, Taraiya, Ishupur, Baniapur, Ekma, Manjhi, Marhaura, Amnour, Dariapur and Dighwara the percentage of Scheduled Castes population is lower than the

district average (12.2%). Rest of the C.D. Blocks have either equal or higher proportion of Scheduled Castes population than the district rural average.

The proportion of Scheduled Tribes in the district is 0.2 percent of the total rural population. 1.3 percent of the total population of C.D. Block Jalalpur is Scheduled Tribes followed boy C.D. Block Revelganj(0.6%), Manjhi(0.4%), Ekma(0.3%) and Mashrakh(0.3%). Other C.D. Blocks have either nil or negligible percentage of Scheduled Tribes in the district.

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	272	17.4	0	0.0
Less than 5	197	12.6	8,618	2.4

19	Dighwara	910	1,238
20	Sonepur	877	684
District (Rural) Total		**959**	**989**

Table 19 shows that the sex ratio among Scheduled Castes is 959 and among Scheduled tribes it is 989 in the rural areas of the district. Among C.D. Blocks Baniapur, Ekma and Lahladpur have highest sex ratio i.e. 1033, 1007 and 1005 respectively among Scheduled Castes. In other C.D. Blocks of the district the sex ratio among scheduled castes varies between 994 in C.D. Block Ishupur and 877 in Sonepur C.D. Block.

The sex ratio in C.D. Block Mashrakh, Panapur, Taraiya, Ishupur, Manjhi, Revelganj, Nagra, Marhaura and Dariapur besides Baniapur, Lahladpur and Ekma is higher among Scheduled Castes is higher than the district average. On the other hand sex ratio in C.D. Blocks Jalalpur, Chapra, Amnour, Maker, Parsa, Garkha, Dighwara and Sonepur among Scheduled Castes is lower than the district average.

Regarding sex ratio among Scheduled Tribes Mashrakh, Ishupur, Manjhi, Jalalpur, Chapra, Dariapur, Garkha and Dighwara C.D. Blocks have more than 1000 females per thousand males. Baniapur has just 1000 females for 1000 males. In other C.D.

Blocks sex ratio among Scheduled Tribes varies between 973 in C.D. Block Lahladpur and 350 in Parsa. C.D. Blocks. Ekma, Marhaura and Revelganj have 968, 840 and 813 sex ratio respectively for Scheduled Tribes. C.D. Block Panapur has a sex ratio of 571 while C.D. Block Maker and Sonepur have 667 and 684 respectively for Scheduled Tribes.

TABLE 20: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Chapra (M)	856	866
2	Dighwara (NA)	885	0
3	Marhaura (NA)	922	1,000
4	Revelganj (M)	883	796
5	Sonepur (NA)	892	798
Sex ratio (Urban) for the district:		**874**	**838**

There are 5 statutory towns in the district. There is no urban agglomeration in the district of Saran. The sex ratio among Sheduled Castes and Scheduled Tribes in the urban areas of the district are 874 and 838, respectively. The highest sex ratio among Scheduled Castes is observed in Marhaura(NA) followed by Sonepur(NA), Dighwara(NA) and Revelganj(M) with sex ratio of 892, 885 and 883 respectively. Chapra (M) has the lowest(856) sex ratio among Scheduled Tribes. Among Scheduled Tribes, Marhaura (NA) has the highest sex ratio i.e. 1000 females for every thousand males. Chapra (M), Sonepur (NA) and Revelganj (M) have a sex ratio of 866, 798 and 796 respectively for Scheduled Tribes.

District (Rural) Total:		**1,183,481**	**787,663**	**395,818**	**1,766,583**	**706,973**	**1,059,610**	**50.3**	**66.3**	**34.0**	**32.3**

Table 21 & 22 shows number and percentage of literates and illiterates by sex in C. D. Blocks, 2001 in Total which includes rural as well as urban areas which table 22 shows same thing in rural areas. Table 22 show that among the C.D. Blocks in the district, Ekma has the highest proportion of literate population i.e. 57.2 percent followed by C.D. Block Dighwara with 56.9 percent. C.D. Block Mashrakh, Baniapur, Manjhi, Jalalpur, Revelganj, Chapra,Nagra and Sonepur also have a higher literacy rates than district average of 50.3 percent. On the other hand Panapur, Taraiya, Ishupur,Lahladpur, Mahraura, Amnour, Maker, Parsa, Dariapur and Garkha are behind district average.

Male literates outnumber female literates in all the C.D. Blocks. Male literacy rate in the district is 66.3 percent while for females it is 34 percent. The highest male literacy rate is 73.8 percent in Ekma C.D. Block while it is lowest i.e. 58.7 percent in Panapur. Female literacy rate is also highest i.e. 41.4 percent in Ekma C.D.Block followed by C.D. Block Dighwara with 41 percent. On the other hand C.D. Block Panapur has the lowest female literacy rate of 26.4 percent. 50 percent of the total C.D. Blocks have a lower female literacy rate than district average.

The highest literacy gap between male and female is 34.0 percent which is noticed in C.D. Block Ishupur. The lowest gap between male and female literacy rate can be observed in C.D. Block Sonepur (29.4 percent) and 29.6 percent in Maker C. D. Block. The gap in literacy rate between males and female literates in the district as a whole is 32.3 percent.

TABLE 23: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.1	22	0.0
1-10	10	0.6	5,299	0.2
11-20	26	1.7	14,282	0.5
21-30	86	5.5	83,010	2.8
31-40	222	14.2	359,905	12.2
41-50	469	29.9	1,014,246	34.4
51-60	461	29.4	1,017,305	34.5
61-70	220	14.0	380,012	12.9
71-80	53	3.4	67,059	2.3
81-90	9	0.6	7,690	0.3
91-99	8	0.5	1,234	0.0
100	0	0.0	0	0.0
District Total:	**1566**	**100.0**	**2,950,064**	**100.0**

Literacy rate for District: **51.8**

The above table 23 shows that two villages have no literates and district has no such village which has 100 percent literacy. 59.3 percent villages of the district lie in literacy range 41-60 percentage which includes 68.9 percent population of the district.

TABLE 24: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Chapra (M)	106,629	64,051	42,578	72,561	31,443	41,118	70.8	79.3	61.0	18.2
2	Dighwara (NA)	12,844	8,275	4,569	14,523	6,049	8,474	58.2	71.0	43.9	27.0
3	Marhaura (NA)	10,216	6,817	3,399	14,332	5,856	8,476	51.5	66.6	35.4	31.3
4	Revelganj (M)	14,923	9,842	5,081	19,119	7,784	11,335	53.5	67.7	38.1	29.6
5	Sonepur (NA)	19,517	12,164	7,353	13,973	5,744	8,229	70.0	81.1	57.0	24.1
District(Urban) Total		**164,129**	**101,149**	**62,980**	**134,508**	**56,876**	**77,632**	**66.1**	**76.5**	**54.3**	**22.2**

The table above shows that the literacy rate in urban areas of the district is 66.1 percent. There is no urban agglomeration but two Municipalities and three Notified Area Committees are there in the district. Chapra Municipality have the highest literacy rate of 70.8 followed by sonepur (NA) 70 percent . The male and female literacy rates in Chapra(M) are 79.3 and 61 percent respectively. Sonepur(NA) has 81.1 and 57 percent literacy rates for males and females respectively. The total literacy rate for Dighwara(NA) is 58.2 percent where as it is 71 percent for males and 43.9 percent for females. Revelganj(M) and Marhaura(NA) have 53.5 and 51.5 percent total literacy rates respectively. Male and female literacy rate in Revelganj(M) are 67.7 and 38.1 percent respectively whereas male and female literacy rates in Marhaura(NA) are 66.6 and 35.4 percent respectively. Gap in male and female literacy rate in urban areas of the district is 22.2 percent. A gap in literacy rate of 31.3 and 29.6 percent between males and females exists in Marhaura(NA) and Revelganj(M) respectively. 27 and 24.1 percent literacy rate gap between males and females is noted in Dighwara(NA) and Sonepur(NA) respectively. The lowest gap between male and female literacy rate exists in Chapra(M) i.e. 18.2 percent only.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

The Table 25 shows that literacy rate among Scheduled Castes is highest i.e. 40 percent in C.D. Block Revelganj where as it is lowest i.e. 24 percent in C.D. Block Panapur in the district. As regard to percentage of male and female literacy, among Scheduled Castes the highest male and female literacy rates i.e. 57.9 and 21.5 percent respectively is observed in C.D. Block Revelganj. The lowest sex wise literacy rates for males(36.2%) and females (11.4%) in the district has been noted in C.D. Block Panapur. The average literacy rates for the district among Scheduled Castes is 32.2 percent

in rural areas. The district literacy rate for male is 47.5 and for female it is 16.2 percent in rural areas. It is found that the gap between male and female literacy rates among rural Scheduled Castes population in the district is 31.3 percent. The highest literacy rate gap between males and females is 36.4 percent in C.D. Block Revelganj where as it is lowest i.e. 23.8 percent in C.D. Block Taraiya.

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	25	1.9	829	0.2
1-10	81	6.3	14,448	4.0
11-20	177	13.7	46,814	13.0
21-30	304	23.5	103,486	28.8
31-40	312	24.1	107,685	30.0
41-50	223	17.2	56,633	15.8
51-60	106	8.2	21,999	6.1
61-70	41	3.2	5,576	1.6
71-80	12	0.9	1,168	0.3
81-90	7	0.5	185	0.1
91-99	1	0.1	21	0.0
100	5	0.4	20	0.0
District Total:	**1,294**	**100.0**	**358,864**	**100.0**
Literacy rate for District (Rural):		**32.2**		

The above table shows that in case of literacy among the Scheduled Castes in the villages of the district, the highest number of village i.e. 24.1 percent fall in the literacy range of 31-40 percent where as the lowest number of villages is 0.1 percent fall in literacy range of 91-99 percent. Only 5 villages (0.4 percent of total inhabited villages) have a literacy rate of 100 percent in the district. On the other hand 25 villages accounting for 1.9 percent of the inhabited villages in the district have zero literacy rate. Regarding percentage distribution of rural Scheduled Castes population among different literacy ranges, it is observed that highest proportion of such, population i.e. 30 percent fall in the literacy range of 31-40 percent followed by 28.8 percent having literacy range of 21-30 percent. 15.8 and 13 percent of total rural Scheduled Castes inhabited in villages having literacy rate ranges between 41-50 and 11-20 percent respectively. 6.1 and 4 percent of such population fall in 51-60 and 1-10 percent literacy range in the district.

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS TOWNS, 2001

Serial number	Name and urban status of Town*	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Chapra (M)	6,721	4,529	2,192	9,203	4,050	5,153	51.8	64.1	37.1	27.0
2	Dighwara (NA)	1,180	876	304	2,922	1,300	1,622	37.1	51.0	20.8	30.3
3	Marhaura (NA)	755	583	172	1,894	795	1,099	37.1	54.7	17.7	37.0
4	Revelganj (M)	1,153	896	257	2,618	1,107	1,511	38.6	55.5	18.7	36.8
5	Sonepur (NA)	2,290	1,528	762	2,333	915	1,418	61.1	75.8	43.9	31.9
	Saran (Urban)	**12,099**	**8,412**	**3,687**	**18,970**	**8,167**	**10,803**	**48.5**	**62.4**	**32.2**	**30.2**

The Table above shows that the average literacy rate among the Scheduled Castes in the urban areas of the district is 48.5 percent. It is 62.4 percent for males and 32.2 percent females in the district for Sonepur(NA) and have highest literacy rates among urban Scheduled Castes population i.e. 61.1 and 51.8 respectively. Marhaura(NA) and Dighwara(NA) have a literacy rate of 37.1 percent each among Scheduled Castes literacy rate of 38.6 percent is noted among urban Scheduled Castes in Revelganj (M).

A literacy rate of 75.8 percent for urban scheduled castes male and 43.9 percent for female have been recorded in Sonepur(NA). Dighwara (NA) has the lowest i.e. 51 percent literacy rate among males where as Marhaura(NA) has the lowest rate of literacy i.e. 17.7 percent among females.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
11	Chapra	51	43	8	144	53	91	33.6	58.1	10.3	47.9
12	Nagra	2	2	0	0	0	0	100.0	100.0	0.0	100.0
13	Marhaura	43	32	11	49	18	31	61.4	82.1	35.5	46.6
14	Maker	1	1	0	4	2	2	20.0	33.3	0.0	33.3
15	Parsa	0	0	0	27	20	7	0.0	0.0	0.0	0.0
16	Dariapur	102	72	30	208	81	127	41.5	59.5	24.0	35.5
17	Garkha	70	52	18	91	24	67	54.3	85.2	26.5	58.8
18	Dighwara	9	7	2	38	14	24	24.3	41.2	10.0	31.2
19	Sonepur	29	24	5	264	150	114	11.1	15.3	4.8	10.5
	District (Rural) Total:	**2,115**	**1,464**	**651**	**3,782**	**1,501**	**2,281**	**44.9**	**61.4**	**28.0**	**33.4**

Table 28 shows that among the Scheduled Tribes the percentage of literates inhabited in the rural areas of district rural population is 44.9 percent. It is 61.4 percent for males and 28 percent for females. Among C.D. Blocks, Panapur has 77.8 percent rate of literacy among Scheduled Tribes. 100 percent males and 50 percent females are literate in this C.D. Block. Such high literacy rate among male is due to very small population. On the other hand,

Traiya C.D. Block has the 100 percent literacy rate for Scheduled Tribes male and zero for females. However such figures are not indicative of literacy trend as only one Scheduled Tribes male and female each have been recorded in this C.D. Block. The same feature is also observed in C.D. Block Nagra. 61.4 percent and 60.9 percent of the Scheduled Tribes in C.D. Block Marhaura and Jalalpur respectively are literate. The lowest total literacy among scheduled tribes i.e. 11.1 percent is in Sonepur. Lowest literacy rate among male and female scheduled Tribes can be observed also in Sonepur C.D. Block with 15.3 and 4.8 percent respectively.

The gap between male and female literacy rates in the district for rural areas for scheduled Tribes is 33.4 percent. Among C.D. Block Taraiya and Nagra show a gap 100 percent between male and female literacy rates but that is not factual as there is no literate female scheduled tribe in these C.D. Blocks. C.D. Block Garkha and Panapur show a gap of 58.8 and 50 percent between male and female literacy rates respectively. Minimum gap between male and female literacy among rural scheduled tribes population is 10.5 percent recorded in C.D. Block Sonepur.

TABLE 29: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR CHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	15	11.3	90	1.5
1-10	8	6.0	476	8.1
11-20	9	6.8	313	5.3
21-30	7	5.3	364	6.2
31-40	19	14.3	854	14.5
41-50	22	16.5	870	14.8
51-60	19	14.3	1,284	21.8
61-70	15	11.3	1,173	19.9
71-80	9	6.8	404	6.9
81-90	1	0.8	35	0.6
91-99	0	0.0	0	0.0
100	9	6.8	34	0.6
District Total:	**133**	**100.0**	**5,897**	**100.0**
Literacy rate for District (Rural):		**44.9**		

The above Table 29 shows that in case of literacy among the Scheduled Tribes in the villages of the district, the highest number of villages i.e. 22 accounting for 16.5 percent of the inhabited villages covering 14.8 percent of Scheduled Tribes fall in the literacy range of 41-50 percent. 19 villages each accounting for 14.3 percent of inhabited villages each covering 21.8 and 14.5 percent Scheduled Tribes fall in literacy range of 51-60 and 31-40 percent, respectively. 15 villages constituting 11.3 percent of total inhabited villages covering 19.9 percent Scheduled Tribes in the district fall in literacy range of 61-70 percent. On the other hand another 15 villages constituting 11.3 percent of inhabited villages covering 1.5 percent Scheduled Tribes fall in literacy zone of zero percent in Saran district.

TABLE 30: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Revelganj (M)	34	23	11	54	26	28	50.7	63.9	35.5	28.4
2	Chapra (M)	287	181	106	174	66	108	77.4	89.6	62.7	26.9
3	Marhaura (NA)	9	6	3	5	1	4	75.0	100.0	50.0	50.0
4	Dighwara (NA)	2	2	0	0	0	0	100.0	100.0	0.0	100.0
5	Sonepur (NA)	138	84	54	67	30	37	85.7	91.3	78.3	13.0
	District (Urban) Total	**470**	**296**	**174**	**300**	**123**	**177**	**76.7**	**87.6**	**63.3**	**24.3**

The above Table 30 shows that the literacy rate among Scheduled Tribes in the urban areas of the district is 76.7 percent. It is 87.6 percent for the males and 63.3 percent for females. A literacy gap between Scheduled Tribes males and females in urban areas of the district is 24.3 percent. Dighwara(NA) has only two Scheduled Tribe males and both are literate showing 100 percent literacy rate. Marhaura(NA) has a literacy rate of 100 percent for male and 50 percent for females.

In Chapra (M) 89.6 percent males and 62.7 percent females scheduled tribes are literate. Sonepur(NA) has 91.3 percent literate male scheduled tribes and 78.3 percent female literate among scheduled tribes population. Revelganj(M) has comparatively lower rate of literacy among scheduled tribes male and females. It is 63.9 percent for males and 35.5 percent for females.

A literacy gap between scheduled tribes males and females in different urban units ranges between 13 to 50 percent. Though Dighwara(NA) shows a 100 percent gap in male and female literacy among scheduled tribes but this is only technical and not factual as there is no female scheduled tribe in the town.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C.D.Blocks, 2001

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 31 and 32 show that the work participation rate (WPR) in the Saran district is 19.8 percent as main workers and 6.7 percent as marginal workers. Proportion of total workers in the district is 26.5 percent. Remaining 73.5 percent of the population in the district is Non-worker.

Among the main workers male work participation rate in the district is 34.3 percent while that of females is 4.9 percent as per 2001 census. The proportion of main workers is highest in Mashrakh C.D.Block,which is 21.6 percent in C.D.Block Baniapur, hladpur and Dariapur occupy the second position (20.6 percent each) and lowest (18 percent) in C.D. Block Ishupur.

A similar work participation rate of 18.2 percent is main workers can be observed in C.D. Blocks Jalalpur and Amnour, also. Out of 20 C.D. Blocks, WPRs of Main worker 9 C.D. Blocks are above district average. The proportion of marginal workers is the highest (10.4 percent) in C.D. Block Amnour and the lowest (4.7 percent) in C.D. Block Baniapur. The proportion of total workers is the highest (28.5 percent) in C.D. Block Amnour followed by C.D. Block Dariapur (28.2 percent).

The proportion of non-workers among males in the district is 57.9 percent while that of females is 89.6 percent. The proportion of non-workers is the highest (76.9 percent) in C.D. Block Ishupur and the lowest (71.5 percent) in C.D. Block Amnour.

There 5 urban units in Saran district of which two are Municipalities and rest three are Notified Area Committees. There is no urban agglomeration in the district. The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. In Saran district, the work participation rate is 24 percent for urban areas. The proportion of main workers is 19.8 percent where as the proportion of marginal workers is 4.2 percent in urban areas of the district.

The proportion of non-workers in urban areas of the district is 76 percent. The proportion of male and female main workers in urban areas is 34.5 and 3.3 percent respectively and that of marginal workers is 6.1 and 2.1 percent respectively. The percentage of total male and female workers is 40.6 and 5.4 percent respectively. The proportion of male and female non-worker is 59.4 and 94.6 percent respectively in urban areas of the district. Chapra(M) has the highest percentage of main workers i.e. 20.2 percent followed by Dighwara(NA) (20.1 percent). Proportion of male main workers is always higher than that of females in all the towns. The highest proportion of marginal workers is deserved in Revelganj(M) (6.4 percent) followed by Sonepur(NA) (5.9 percent). The proportion of male marginal workers is generally higher than that of females in all the urban units. The highest proportion i.e. 25.7 percent of total workers has been noted in Revelganj(M) followed by Marhaura(NA) with 25.5 percent. Male total workers exceed the proportion of female total workers in all the urban units in the district. The highest proportion of non - workers i.e. 76.6 percent has been observed in Chapra(M) followed by Sonepur(NA) with 76.1 percent non-workers. The proportion of female non-workers far exceeds that of male non-workers in almost all urban units.

Note: Percentage of Worker to total worker are given in brackets

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (35.7 percent) and agricultural labourers(37.5 percent) together constitute 73.2 percent of the total workers of the district. The agriculture sector has absorbed about threefourth of the total workers. The proportion of cultivators varies between 47.3 percent for C.D. Block Panapur to 16 percent in C.D. Block Chapra. Proportion of Agricultural labourers varies between 45.9 percent for C.D. Block Revelganj to 26.7 percent for C.D. Block Chapra. The proportion of Household Industry workers is only 4 percent of the total workers of the district. Proportion of Household Industry workers varies between 6 percent in C.D. Block Dighwara and 2.3 percent in C.D. Block Lahladpur. The proportion of other workers is highest i.e. 52.8 percent in C.D. Block Chapra and the lowest i.e. 12.3 percent in C.D. Block Maker. The higher proportion of non-agricultural sector denotes urban character of area.

Note: Percentage of Worker to total worker are given in brackets

There are 5 urban units and no urban agglomeration in the district of Saran. From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of total workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers.

The cultivators constitute 6.8 percent and agricultural labourers constitute 17.4 percent of the total workers of the district for urban areas. Proportion of cultivators ranges between 22 percent in Marhaura(NA) and 2.1 percent in Chapra(M). The proportion of agricultural labourers varies from 37.3 percent in Revelganj(M) to 10.7 percent in Chapra(M). The proportion of household Industry workers is highest (8.6 percent) in Dighwara(NA) and lowest (4.5 percent) in Revelganj(M). The proportion of other workers is highest i.e. 81.4 percent in Chapra(M) and lowest i.e. 40.9 percent in Marhaura(NA). Higher proportion of other workers indicates the scale of urbanization in Chapra(M).

There are 7.1 percent male and 4.3 percent female cultivators in urban areas of the district. The proportion of agricultural laboures is 15.6 percent for male and 32.7 percent for female in same area. The proportion of male and female household industry workers in the urban areas of the district is 5 percent and 15.8 percent respectively. The proportion of male and female other workers in all the towns as a whole is 72.3 and 47.1 percent respectively.

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37: DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Note: - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$Transport communication includes bus service, rail facility and navigable waterways.

The above Table gives the distribution of villages according to the availability of different type of amenities in the district.

Educational amenity:- There are as many as 1232 villages accounting for 78.7 percent of the total inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D. Block Baniapur with 91.6 percent closely followed by C.D. Block Ekma with 91.3 percent. The smallest proportion of villages with educational facility is observed in C.D. Block Maker with 61.5 percent.

Medical amenity:- The availability of medical amenity in the villages is quite low and only 21.8 percent of the total inhabited villages in the district have such facility. Among the C.D. Blocks, Jalalpur has the largest proportion of villages with medical facility, the percentage being 41.5 percent. It is lowest in C.D. Block Ishupur with 8.1 percent and zero in C.D. Block Lahladpur.

Improved drinking water:- There are as many as 1554 villages accounting for 99.2 percent of the total inhabited villages in the district which have the facility of improved drinking water. Out of 20 C.D. Blocks in the district, 14 have got 100 percent villages with improved drinking water facility. On the other hand C.D. Block Teraiya has the lowest proportion of villages i.e. 93.1 percent with improved drinking water facility.

Post office:- Postal facilities are available only in 22.5 percent of the total inhabited villages i.e. 35.3 percent with post office is observed in C.D. Block Dighwara followed by C.D. Block Jalalpur with 30.8 percent. C.D. Block Panapur has the minimum number of villages i.e. 11.3 percent with postal facilities.

Telephone:- The availability of telephone facility in the villages is quite low and only 15.1 percent of the inhabited villages in the district have the facility. The highest proportion of villages i.e. 43.8 percent is in C.D. Block Sonepur followed by C.D. Block Jalalpur with 26.2 percent. The lowest proportion of villages having this facility is in C.D. Block Panapur with 1.6 percent.

Transport and communication:- Transport and communication facilities are available only in 14.2 percent of the total inhabited villages in the district. The highest proportion of villages i.e. 35 percent fall in C.D. Block Revelganj followed by C.D. Block Parsa with 34.1 percent. The minimum proportion of such villages i.e. 1.4 percent fall in C.D. Block Taraiya.

Bank:- Banking facility is available in only 8 percent of the total inhabited villages of the district. The highest proportion of villages having banking facility i.e. 19.4 percent, fall under C.D. Block Mashrakh while lowest proportion i.e. 1.6 percent is under C.D. Block Panapur.

Agricultural Credit Societies:-Agricultural Credit Societies are available only in 8.2 percent of the total inhabited villages of the district. As high as 54.3 percent of villages in C.D. Block Ekma have

this facility. On the other hand, C.D. Blocks Taraiya, Lahladpur, Revelganj, Chapra, Nagra, Maker and Sonepur is not available in any villages such facility.

Approach by Pucca Road:- This facility is available to 39 percent of the total inhabited villages in the district. On the highest side, 75.3 percent inhabited villages of C.D. Block Sonepur have such facility. On the lower side only 9.7 percent of the villages in C.D. Block Panapur are having approach by pucca road.

Power supply:- Electrified villages in the district account for only 34.7 percent of the total inhabited villages in the district. Among various C.D. Blocks, 76.5 percent villages of Marhaura C.D. Block are electrified. On the other hand only 0.7 percent villages of Dariapur C.D. Block have this facility.

Note: - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from the Table above that educational facility is available to 92.4 percent of the total rural population of the district. The proportion varies between the maximum of 99.1 percent in C.D. Block Ekma and the minimum of 82.8 percent in C.D. Block Lahladpur. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 78.7 percent vide Table No. 37) than the proportion of population which is as high as 92.4 percent. This may be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In case of medical facility also it can be seen that the proportion of rural population served by this amenity is of the order of 35.2 percent which is more than the proportion of villages (21.8% vide Table No.37) served by medical facility in the district.

In case of improved drinking water facility it is interesting to observe that proportion of rural population served by the amenity is of the order of 99.2 percent which is equal to the proportion of villages (99.2% vide Table No.37) enjoying this amenity.

The proportion of rural population of the district enjoying amenities like Post offices, Telephone, Transport.Approach by pucca road and Power supply are more than the proportion of inhabited villages having such facilities in the district. More or less a similar trend can be observed in respect of all these amenities in various C.D. Blocks also.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometers	5-10 kilometers	10+ kilometers	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	313	30	10	353
(b) Middle School	998	169	41	1,208
(c) Degree College	378	419	750	1,547
2. Medical:-				
(a) Hospital	525	407	585	1,517
(b) PHC	663	405	452	1,520
3. Post Office	1,062	127	26	1,215
4. Telephone	674	326	330	1,330
5. Bus Service	798	321	277	1,396
6. Banks				
(a) Commercial Bank	1,038	294	123	1,455
(b) Cooperative Bank	643	478	410	1,531
7. Agricultural Credit Societies	738	273	427	1,438

The Table above shows that there are a good number of villages in the district in certain primary and modern amenities are not available. It would be seen that there are 353 (22.5%) inhabited villages in the district which do not have a Primary school but the facility is available at places situated within 5 kms. for 313 villages and for 30 villages at a distance of 5-10 kelometers. Primary school facility is available at a distance of 10+ kms. for 10 villages. There are as much as 1208 (77.1 percent of total inhabited villages) villages in the district which do not have a Middle school but the facility is available at place situated within 5 kms. for 998 villages, at 5-10 kms. for 169 villages and a distance of 10+ kms for 41 villages. 1547 villages (98.8 percent of villages) in the district do not have a Degree College in the district but the facility is available at a distance of less than 5 kms. for 378 villages, at a distance of 5-10 kms. for 419 villages and at 10+ kms. for 750 villages.

As much as 1517 villages (96.9 percent) in the district do not have Hospital facility within the village. A Hospital is available at a distance of less than 5 kms. for 525 villages, at a distance of 5-10 kms. for 407 villages and at 10+ kms. for 585 villages. A Primary Health Centre is available at a distance of less than 5 kms. for 663 villages, at 5-10 kms. for 405 villages and at a distance of 10+ kms. for 452 villages. Post Office is not available in 1215 (77.6 percent) villages of the district but it is available at a distance of less than 5 kms for 1062 villages, at 5-10 kms for 127 villages and at 10+

kms. for 26 villages. Telephone facility is not available in 1330 (84.9 percent) villages of the district but the same is available at a distance of less than 5 km for 674 villages, at 5-10 kms. for 326 villages and at a distance of 10+ km or 330 villages. Likwise, Bus services are not available in 1396 villages (89.1 percent) but the same is available at a distance of less than 5 kms. for 798 villages, at 5-10 kms. for 321 villages and at 10+ kms. for 277 villages. Commercial Banking services are not available in 1455 (92.9 percent) villages in the district but services of a Commercial Bank is available to 1038 villages at a distance of less than 5 kms, to 294 villages at 5-10 kms and to 123 villages at 10+ kms. Services of a Co-operative Bank is available at a distance of less than 5 kms. for 643 villages, at 5-10 kms. for 478 villages and at 10+ kms. for 410 villages. Agricultural Credit Societies are not available in 1438 (91.8 percent) villages but the same is available at a distance of less than 5 kms., for 738 villages, at 5-10 kms. for 273 villages and at 10+ kms. for 427 villages.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	64	45	21	14	17	11	2	2	28
	(100.0)	(70.3)	(32.8)	(21.9)	(26.6)	(17.2)	(3.1)	(3.1)	(43.8)
5 -15	574	428	133	127	113	70	48	21	269
	(100.0)	(74.6)	(23.2)	(22.1)	(19.7)	(12.2)	(8.4)	(3.7)	(46.9)
16 - 50	913	746	188	210	105	139	75	105	310
	(100.0)	(81.7)	(20.6)	(23.0)	(11.5)	(15.2)	(8.2)	(11.5)	(34.0)
51+	15	13	0	1	1	3	0	0	4
	(100.0)	(86.7)	(0.0)	(6.7)	(6.7)	(20.0)	(0.0)	(0.0)	(26.7)
Unspecified	0	0	0	0	0	0	0	0	0
	0	0	0	0	0	0	0	0	0
District total	**1,566**	**1,232**	**342**	**352**	**236**	**223**	**125**	**128**	**611**
	(100.0)	**(78.7)**	**(21.8)**	**(22.5)**	**(15.1)**	**(14.2)**	**(8.0)**	**(8.2)**	**(39.0)**

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the Table above that as much as 913 villages out of 1566 inhabited villages in the district lie at a distance of 5-15 kms. from the nearest statutory town. 574 villages are situated at a distance of 51+ kms from nearest statutory town. Since a maximum number of 913 out of 1566 villages of the district lie in the distance range of 16-50 kms. from the nearest statutory town, most of the amenities are also available to maximum number of villages at a distance of 16-50 km from the nearest statutory town. Similarly, next largest number of villages (574 out of 1566) are situated at a distance of 5-15 kms. from the nearest statutory town it is quite natural that most of the amenities are also available to next largest number of villages at a distance of 5-15 kms. from the nearest statutory town. A similar trend can be observed for other villages having various distance ranges from the nearest town and amenities available to such villages in the district of Saran.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from Table 41 that the maximum number of villages i.e. 520 out of 1566 lie in the population range of 1000-1999 followed by 417 and 332 villages which lie in the population ranges of 2000-4999 and 500-999 respectively. The smallest number of villages i.e. 13 have a population range of 10000+ each. The proportion of villages having different amenities varies in direct relation to their population ranges. Generally, the maximum percentage of villages having different amenities have a population range of 10000+, 5000-9999, 2000-4999, 1000-1999 and 500-999 respectively which further corroborates the fact that more facilities are generally available in larger population villages than in smaller ones.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Mashrakh	67	13,233	83.3	48.9
2	Panapur	62	10,675	85.7	51.1
3	Taraiya	72	9,813	89.3	86.0
4	Ishupur	62	9,969	81.1	49.5
5	Baniapur	107	16,867	87.6	89.3
6	Lahladpur	36	5,291	83.1	64.3
7	Ekma	92	15,013	68.0	72.6
8	Manjhi	111	17,604	93.0	50.3
9	Jalalpur	65	11,818	86.4	65.4
10	Revelganj	40	7,823	61.4	59.5
11	Chapra	92	15,034	67.2	64.8
12	Nagra	59	5,386	99.9	42.1
13	Marhaura	102	14,030	82.8	51.8
14	Amnour	118	12,603	80.4	59.3
15	Maker	39	7,174	73.7	75.9
16	Parsa	85	10,045	75.1	91.7
17	Dariapur	151	19,271	76.4	60.7
18	Garkha	99	16,273	83.1	51.3
19	Dighwara	34	5,872	63.3	62.7
20	Sonepur	73	13,710	60.9	58.9
	District Total:	**1,566**	**237,504**	**79.2**	**62.6**

Note: - Cultivable area = irrigated area + unirrigated area

Table 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.It would be seen from the Table that 79.2 percent of total area of the district is cultivable and 62.6 percent of the area to total cultivable is irrigated. Among C.D. Blocks the highest percentage of cultivable area i.e. 99.9 percent is found in C.D. Block Nagra followed by C.D. Block Manjhi with 93 percent cultivable area. The lowest cultivable area i.e. 60.9 percent is found in C.D. Block Sonepur. The highest proportion of irrigated area i.e. 91.7 percent is found in C.D. Block Parsa followed by C.D. Block Baniapur with 89.3 percent. The lowest proportion of irrigated area i.e. 42.1 percent is found in C.D. Block Nagra. The proportion of irrigated area in other C.D. Blocks varies between these two levels.

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Chapra (M)	5.2	0.3	4.9	5.1	4.6	0.0	0.0	0.0	0.5
2	III Dighwara (NA)	8.3	0.2	8.2	1.4	0.7	0.0	0.0	0.0	0.7
3	III Marhaura (NA)	0.9	0.0	0.9	0.0	0.0	0.0	0.0	0.0	0.0
4	III Revelganj (M)	4.4	0.1	4.4	3.4	0.5	1.1	0.2	0.0	1.6
5	III Sonepur (NA)	2.8	1.9	0.9	1.9	1.2	0.0	0.7	0.0	0.0
	District Total	**4.8**	**0.4**	**4.3**	**3.8**	**3.0**	**0.1**	**0.1**	**0.0**	**0.5**

The Table 43 gives the details of finances in the statutory towns of the district in terms of per capita receipt and expenditure.

The percapita receipt is highest i.e. Rs. 8.3 in Dighwara town followed by Chapra(M) with Rs. 5.2 Marhaura(NA) has no Rs. 0.9 , per capita receipt . Marhaura (NA) , Revelganj (M) and Sonepur (NA) have per capita receipts Rs. 0.9, 4.4 and Rs. 2.8 respectively, which are lower than the average per capita receipt of the district Rs. 4.8.

Per capita expenditure of the district is Rs. 3.8 in which expenditure on general administration , public health and convenience and public works are Rs. 3.0, Rs. 0.1 respectively. In Revelganj(M) total per capita expenditure is 3.4 in which Rs. 0.5 is spent on General Administration.Rs. 1.1 on Public health and Conveniences, Rs. 0.2 on Public work and Rs. 1.6 on other purposes. In Sonepur(NA) per capita expenditure is Rs. 1.9 in which Rs. 1.2 on General Administration and RS. 0.7 on Public works. Dighwara Notified Area Committee has a per capita expenditure Rs. 1.4 of which Rs. 0.7 on General Administration and rest Rs. 0.7 on other items.

TABLE 44: SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Chapra (M)	3.1	2.0	0.7	0.3	0.8
2	Dighwara (NA)	6.2	0.7	0.7	0.0	0.7
3	Marhaura (NA)	10.2	1.2	0.8	0.4	0.4
4	Revelganj (M)	4.4	2.6	1.2	0.3	0.0
5	Sonepur (NA)	3.9	1.5	1.2	0.0	0.6
	District Total	**4.2**	**1.8**	**0.8**	**0.2**	**0.6**

The Table 44 gives the details of different categories of educational institutions per ten thousand population in various towns of the district. It would be seen from the Table that 4.2 Primary, 1.8 Junior Secondary/Middle Schools, 0.8 Secondary/Matriculation, 0.2 Senior Secondary Schools and 0.6 Colleges per ten thousand of urban population are available in the statutory urban areas as of the district as a whole.

Among various statutory towns Marhaura(NA) has 10.2 Primary Schools per 10,000 urban population where as Chapra(M) has only 3.1 Primary School for every 10000 population. Revelganj(M) has 2.6 Middle School per ten thousand population where as Dighwara(NA) has only 0.7 Middle School for ten thousand population. Revelganj(M) and Sonepur(NA) have 1.2 Secondary/Matriculation Schools each for every 10,000 population. Marhaura(NA) has 0.4 Senior Secondary School for ten thousand population where as Dighwara(NA) and Sonepur(NA) do not have such institution. Chapra(M) and Dighwara(NA) have 0.7 College each for every ten thousand population which it is not available in Revelganj(M).

TABLE 45: NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Chapra(M)	33
2	Dighwara(NA)	2
3	Marhaura(NA)	6
4	Revelganj(M)	2
5	Sonepur(NA)	33
District Total		**24**

Table above furnishes information regarding availability of beds in Medical institutions in various towns of Saran district.

The number of bed in Medical institution of Chapra(M) and Sonepur(NA) is 33 each per ten thousand population. These numbers are above the district average of 24. Number of beds in Medical institution is 6 for Marhaura(NA) and 2 each for Dighwara(NA) and Revelganj(M) for every ten thousand population.

TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population

SLUM DATA IS NOT AVAILABLE				

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Chapra (M)	Agarbatti	Vegetables
		Matches	Mango
		Earthen Pots	Cauli Flower
2	Dighwara (NA)	Sweets	Tent
			Carpet
			Vegetable
3	Marhaura (NA)	Sweets	Medicine
			Cloth
			Kerosene Oil
4	Revelganj (M)	Tent	Cauli Flower
		Basket	Tomato
		Furniture	Plum
5	Sonepur (NA)	Leaf Plate	Medicine
		Earthen Pots	Cloth
			Kerosene Oil

Table 47 presents the list of most important commodities manufactured in the towns and exported to other places. Chapra(M) produces Agarbatti, Matches and Earthern Pots and exports Patal, (A kind of green Cauli vegetable) Mango and Flowers. Revelganj(M) produces Tent, Baskets and Furnitures and exports Cauli Flower, Potato and Plum.

Leaf Plates and Earthern Pots are manufactured in Sonepur town but nothing is exported out side. All of its produces are consumed locally.

On the other hand Dighwara(NA) produced nothing but it exports Tent, Carpet and Vegetables to other placed. Marhaura(NA) nither produces nor exports any commodity within its jurisdiction.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 shows that there are as many as 477241 households accounting for 97.3 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in single room is highest i.e. 39.4 percent where as it is the lowest in median number of rooms in the households in the Tenure status of owned dwellings. There are 67976 Scheduled Castes households accounting for 97.5 percent of the total Scheduled Castes households in the district are dwelling in owned houses and the median number of room is 1. There are 2715 Scheduled Tribes households accounting for 92.7 percent the total Scheduled Tribes households are residing in owned houses and the median number of room is 2. There are 8834 households accounting for 1.8 percent of the total households of the district dwelling in rented houses. The proportion of such households dwelling in single room is the highest i.e. 41.2 percent where as it is lowest i.e. 1.5 percent for those dwelling in no exclusive room. There are 896 Scheduled Castes households accounting for 1.3 percent of the total scheduled castes households who are dwelling in rented houses and the median number of room is 1. Only 103 households accounting for 4.5 percent of the total Scheduled Tribes households reside in rented houses in the district and the median number of room is 2 for such households. A similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source: Census of India 2001, H-series: CC Tables on Houses, Household amenities and Assets."

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It would be seen from the above Table that of the total rural households maximum proportion of households i.e. 68.9 percent live in permanent houses followed by 18.7 percent living in semi permanent and 12.4 percent in temporary houses.

In case of urban households in the district however, the maximum proportion of households i.e. 76.3 percent live in permanent followed by 17 percent and 6.6 percent by those living in semi permanent and temporary houses respectively. Among C.D. Blocks in the district, Nagra has the maximum proportion (75.7 percent) of rural households living in permanent houses followed closely by C.D. Blocks, Dighwara with 75.6 percent households living in permanent houses. On the other hand C.D. Block Panapur has the lowest proportion (56.3 percent) of rural households living in

permanent houses. In case of urban areas of the district, Chapra has the maximum proportion (80.7 percent) of households residing in permanent houses followed by Marhaura and Sonepur with 79.3 percent and 76.1 percent respectively residing in permanent houses. The lowest proportion of households (60.2 percent) in Revelganj town live in permanent houses. A similar trend can be observed for those living in semi permanent and temporary houses in rural as well as in urban areas of the district.

Data source: Census of India 2001, H-series: “Tables on Houses, Household amenities and Assets.”

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentages given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage means closed and open drainage.

The Table 50 shows that of the total rural households, 368847 households accounting for 82.5 percent have facility of Improved drinking water. The highest proportion of households with improved drinking water facility can be observed in C.D. Block Ekma with 91.8 percent closely followed by C.D. Block Lahladpur with 91.7 percent where as it is lowest in C.D. Block Sonepur with 63.3 percent. Regarding electricity, it is found that only 3.6 percent of the total rural households have the facility of electricity. The highest proportion of households with electricity is 15.2 percent in C.D. Block Sonepur. The lowest proportion of electricity using households are 0.5 percent of the total rural households in C.D. Block Panapur and Maker each. It can be observed that only 6.4 percent of the total rural households have bathroom facility.The highest proportion of household with bathroom facility is 10.4 percent in C.D. Block Chapra where as it is lowest in Parsa C.D. Block with 3.7 percent.

Only 13.6 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is 19.7 in C.D. Block Sonepur followed closely by C.D. Block Dighwara with 19.5 percent where as the lowest proportion of toilet facility is 8.2 percent in C.D. Block Maker. Regarding drainage, only 56.2 percent of the rural households have this facility in the district. The highest proportion of rural households having such facility is 72.1 percent in C.D. Block Manjhi where as it is lowest in C.D. Block .4 percent. More or less a similar trend can be observed in urban areas also in the matters of most of these facilities being availed by the households in urban areas of the district.

Percentage in brackets

Data source: Census of India 2001, H-series: “Tables on Houses, Household amenities and Assets”.

Table 51 above shows that 48.7 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel is 74.5 percent in C.D. Block Mashrakh where as it is lowest in C.D. Block Dariapur with 35.3 percent.

34.7 percent of the total rural households in the district use crop residue as fuel for cooking purposes. Among C.D. Blocks, highest proportion of households using crop residue as fuel is 46 percent in C.D. Block Amnour where as it is lowest in C.D. Block Mashrakh with 22.6 percent.

13.9 percent of the total rural households in the district use cowdung cake as fuel for cooking. The highest proportion of such households using cowdung as fuel is 31.4 percent in C.D. Block Sonepur where as lowest proportion of such households is in C.D. Block Mashrakh with 1.9 percent.

Electricity is used as fuel for cooking by only 0.1 percent of the total rural households in the district. However the highest proportion of such households using electricity as fuel for cooking is 0.2 percent in C.D. Block Garkha where as in C.D. Blocks Mashrakh, Panapur, Ishupur, Jalalpur, Nagra, Dariapur and Dighwara the proportion of households using electricity as fuel for cooking is negligible. Only 1 percent of the total rural households use LPG for cooking in the district and the highest proportion of its user is 4.2 percent in C.D. Block Chapra which indicates influence of Chapra(M). Similarly proportion of users of coal/lignite/charcoal, Bio-gas and Kerosene is very low as only 01 to 03 percent total rural households in the district use these materials as fuel for cooking. Other materials are used by only 0.7 percent of the total rural households in the district, where as 0.1 percent of rural households do not use any fuel as they do not cook their fuel.

Data source: Census of India 2001, H-series: "Table on Houses, Household amenities and Assets."

It would be seen from the Table 52 that there 146911 households accounting for 32.9 percent of the total rural households in the district avail Banking facilities. 9 percent of 146911 households availing banking services are found in C.D. Block Manjhi where as only 2 percent of such households can be observed in C.D. Block Maker.

Household assets like Radios/transistors are available in 150227 households in rural areas which account for 33.6 percent of the total rural households in the district. Among the C.D. Blocks, the highest proportion of such households are found in C.D. Block Baniapur with 8.3 percent where as the lowest 2.4 percent can be observed in Maker C.D. Block.

There are 40608 households,where television sets are available in rural areas accounting for 9.1 percent of the total rural households of the district. The highest number of households having television is in Chapra C.D.Block with 3917 television sets where as lowest number of such households 741 can be observed in C.D. Block Panapur.

There are 5808 households using telephones in the rural areas of the district accounting for 1.3 percent of the total rural households of the district. The largest number of households with telephone facility i.e. 647 are found in C.D. Block Chapra where as lowest number i.e 85 is in Maker C.D.Block..

266481 households accounting for 59.6 percent of the total rural households possess Bicycle in the district. The highest number of Bicycle owing households i.e. 22097 are in C.D. Block Baniapur where as the number is lowest i.e. 5298 in C.D. Block Revelganj.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

No major social and cultural event has taken place in the newly created district of Saran since it was bifurcated into three separate district. Fairs and festivals are however held regularly in the district.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

1. Baniapur – It is a large village and is the headquarters of Baniapur Anchal. The village is situated on Chapra -Salempur Road, at on distance of 27 km. from Chapra.

2. Bankerwa – A village in Parsa Anchal, it lies on the western bank of the Gandak about 48 km. east of Chapra. It was an important centre for collection and dispatch of sugar cane to the sugar factories.

3. Chapra – The town is the headquarter of Saran district and Saran Division. It is situated on the northern bank of the river Ghaghra at a distance of 107 km. west of Muzaffarpur and 51 km. west of Sonepur. It is also an important railway junction. The town owed its earlier importance chiefly as commercial centre on account of its strategic location for river-borne trade.

4. Dhoa-Sthan – Situated 16 km. of Baniapur, it is known for the ancient temple of Lord Shiva. The village is connected with Chapra by regular Bus service.

5. Dighwara – A Notified Area Committee and rail head situated 28 km. south east of Chapra. Dighwara town is also headquarters of Dighwara Anchal. The name is derived from a celebrated sage, Dighwara. Situated on the bank of Ganges, it is also an important commercial centre for river-borne traffic.

6. Doriganj – The village is situated 11 km. east of Chapra. It was flourishing trade centre in the past when it stood a confluence of the Ganges and Ghaghra. Three kilometers upstream from Doriganj is Sherpur-Ghat where passangers from Arrah disembark after crossing the river Ganges. This place is famous for business of sand and grains.

7. Ekma – A village situated 28 km. north west of Chapra, it is also a rail head and headquarters of Ekma Anchal. Ekma is an important commercial centre connected with Chapra, Siwan, Manjhi, Darauli and Masrakh by all weather roads.

8. Eksar – The village situated close to Ekma and the village is noted for three stone images, one of dancing Ganesh and two of lord Vishnu, recovered from here. These have been kept in the State Museum at Patna.

9. Garkha – A village is situated on the Chapra-Rewa Ghat Road, it is also the headquarters of Garkha Anchal. It is noted that people of this place took active part in of the freedom movement that place played in the freedom movement.

10. Hasanpura – It is a village in Parsa Anchal situated on the bank of Dhani river. It is noted for a large fair held under a big banyan tree on the occasion of Vijaya Dashmi.

11. Jalalpur – A village situated on the Chapra-Salempur Ghat Road, it lies 18 km. north of Chapra. It is also the headquarters of Jalalpur Anchal.

12. Jankinagar Hat – A village situated 2 km. south of Garkha.It is noted for the weekly cattle fair held during the half of the year from the 13th of Baisakh to the 15th Kartik. A large fair is also held here on the occasion of Basant Panchami.

13. Karinga – A village situated 5 kms. north west of Chapra town. The village is of historical importance as being the first centre of trade established by the Dutch.

14. Manjhi - A village and the headquarters of Manjhi Anchal. It is situated 19 kms. west of Chapra on the bank of Ghaghra. A large fair is held here on the occasion of Kartik Purnima,when people congregate to take bath in the river.

15. Marhaura :- A village and headquarters of Marhaura Anchal. At present a Sub-Division situated 27 kms. north east of Chapra. It is also a rail head and noted for the sugar factory, engineering works, distillery and Morton factory.

16. Parsa :- A large village situated 5 kms. north east of Ekma. Railway Station on the Ekma-Sohagpur Road, it is locally known as Babu Parsa in order to distinguish it from another village Parsas which is the headquarters of an Anchal of the same name. It is noted for the brassware available here.

17. Parsa :- The village is the headquarters of Parsa Anchal and situated at a distance of 38 kms. from Chapra. It was important centre of indigo cultivation during the British regime.

18. Qasbamaker :- A large village of Parsa Anchal, situated on the bank of Gandak 54 kms. north of Chapra. The village is noted for the fair held on the occasion of Gyarahwin Sharif which draws large number of visitors of all communities.

19. Revelganj :- A small town having a municipality and lying adjacent to Chapra. It is also the headquarters of Revelganj Anchal. The town is named after Henruy Revel, Collector of Customs in 1778, under the East India Railway Company.

20. Sonepur :- Internationally famous for the large fair held on the occasion of Kartik Purnima; it is also the headquarters of Sonepur Anchal & Sub-Division. Sonepur has a Notified Area Committee and it is noted for its Railway Platform.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Information is not available

(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The

district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. Block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in

each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW

(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR

(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW

(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

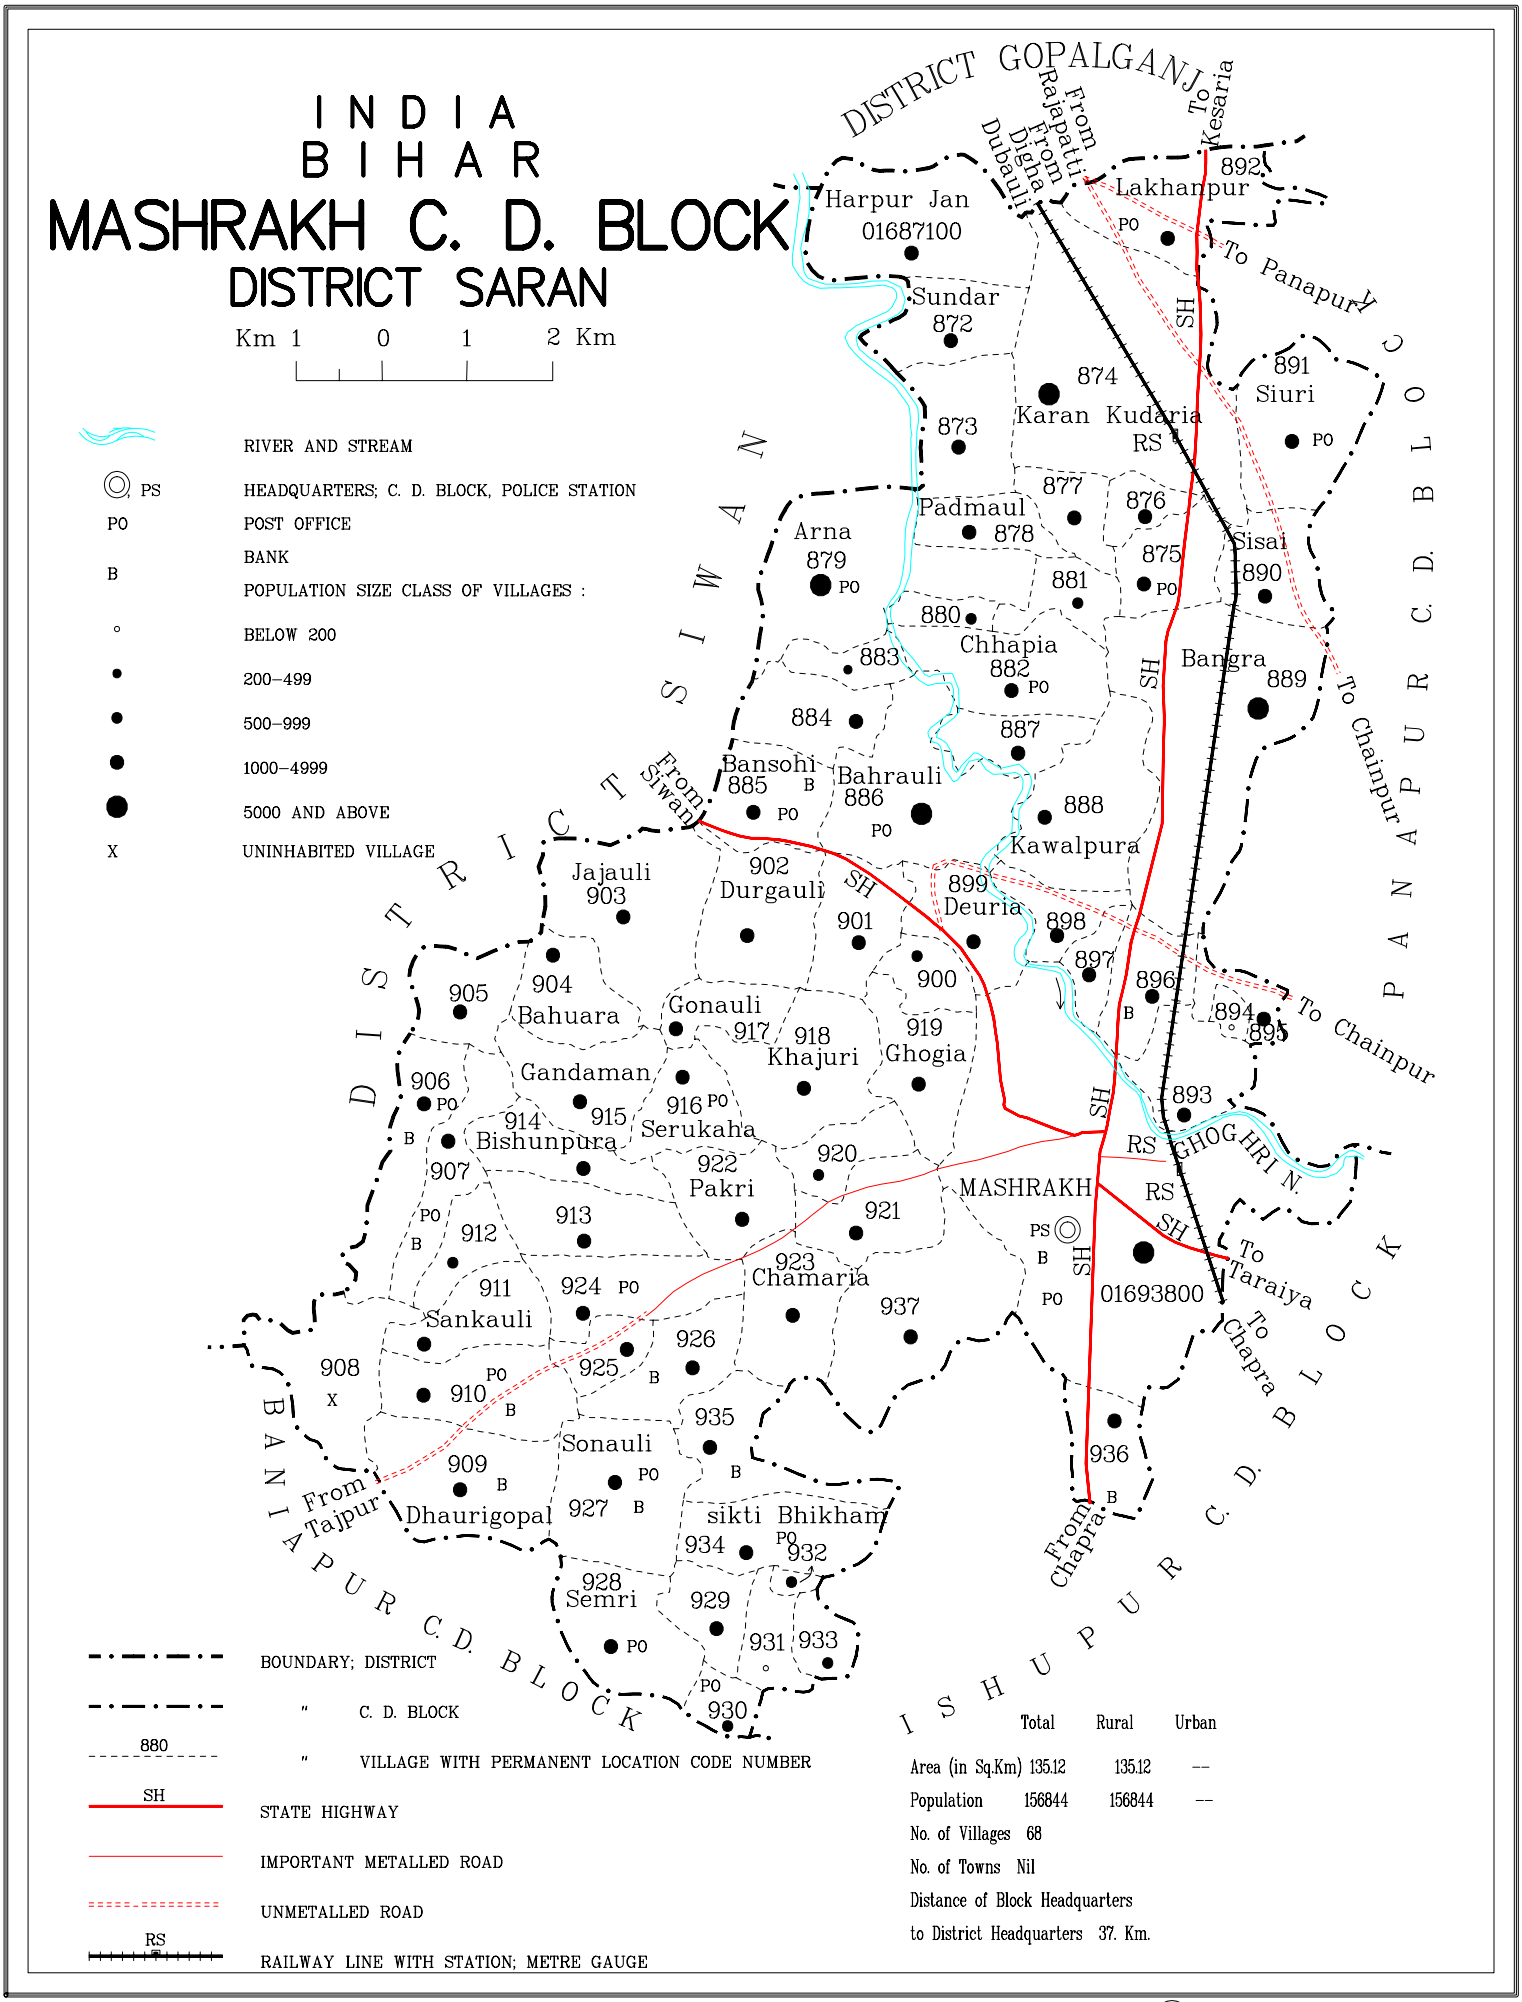

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Town Directory

Section-II: Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS

(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town ‘yes’ is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C

(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matri-culation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and

correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/C.D. Block / UA / City / Town
2. Primary Census Abstract for Scheduled Castes	District/C.D. Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/C.D. Block/Town
4. Village Primary Census Abstract	CD Block/Village wise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for

rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Saran	1991	61	70	81	104
	1981	70	87	106	118

From the estimates of child mortality (number of deaths by ages 1, 2, 3. and 5) given in Annexure II as q(1), q(2), q(3) and q(5) it is observed that there has been a decline in child mortality over the decade (in 1991 census as compare to 1981 census) both in the district as well as in the state. An interesting feature which can be noticed from the Annexure is that the child mortality at the ages 1, 2, 3 and 5 was lower in the district as compared to the state average (except for children of 5 years in 1991 census) at the time of 1981 and 1991 Censuses. It indicates that the pace of decline in child mortality had been faster in the district vis-à-vis state. Spurt in child mortality among children of 5 years of age in 1991 Census seems to be due to spread of some age specific disease in the district.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

Various fertility measures for the districts and the state(1991-Census)		
	State	District
1	2	3
CBR	36.2	33.8
TFR	5.3	5.1
TMFR	5.9	5.7
GFR	163.0	156.0
GMFR	186.0	176.0
Child woman ratio	66.6	71.0
No. of children ever born per woman in age group (45-49)	4.1	4.1
Mean age at marriage	16.5	14.3

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are lower in Saran district as compared to the state average in 1991 census. The child woman ratio is found to be higher in Saran district as compared to the state average. The mean age as marriage of females in the district of Saran is lower as compared to that of the state.Number of children even born per woman in the age group 45-49 is equal to the state average.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

State/District	Born in other states			Born in other countries			Total migrants		
	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(.9)	(1.1)	(100.0)	(100.0)	(100.0)
Saran	14,076	2,997	11,079	279	41	238	817,293	61,170	756,123
	(1.7)	(4.9)	(1.5)	(0.0)	(0.1)	(0.0)	(100.0)	(100.0)	(100.0)

The growth of population for any area is influenced by the migratory movements of the people including in and out migration. However, for want of data on out-migration since such data is not collected in Census, it might not be possible to assess the net impact of out migration on growth of population, although such impact may not be much in most of the cases.

The above tables show percentage distribution of migrants by place of birth based on data recorded during 1991 and 2001 Censuses. It can be seen from the tables that total migrants in the district of Saran during 1991 Census are 611,811 whereas in the state as a whole the migrants are found to be 21,307,020 in number (Saran constitutes 2.9% of the migrants of the state). The corresponding figures for the district and the state for the year 2001 are 817,293 and 19,989,195 respectively. Saran constitues 4.1 percent of the total migrants coming to the state in 2001. Female migrants outnumber the male migrants both in the case of the district as well as the state in both the Censuses. While the male migrants constitute only 3.0 and about 7.5 percent in 1991 and 2001 respectively, the female migrants are as high as 97.0 and 91.5 percent of total migrants of Saran district in 1991 and 2001 respectively. The corresponding proportion of male and female migrants for the state as a whole works out to 11.0 and 89.0 percent respectively in 1991 and 10.5 and 89.5 percent respectively in 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of cases.

It can further be seen from the tables that most of the migratory movement has taken place within the district of enumeration in Saran district particularly in case of females both in 1991 and 2001 (80.1% for females as against 55.3% for males in 1991 and 89.8% females and 80.7% males in 2001). The proportion of male migrants born in other districts of the state is quite high, being 35.7 percent males as against 18.3 percent for females in 1991 and 14.3 percent male and 18.7 female percent respectively in 2001. The state average figures are also on the same line in 1991 and 2001 though the proportion of male and female migrants are more as compared to corresponding figures of the district of Saran.

The proportions of migrants (both males & females) born in other states and in other countries have been quite low in the district during 1991 and 2001 Censuses . However, the state average figures are found to be comparatively higher in case of migrants born in other states and born in other countries as compared to corresponding figures of migrants in the district during 1991 and 2001 Censuses .

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Saran		
		Total	Rural	Urban	Total	Rural	Urban

		(23.2)	(5.7)	(17.5)	(32.8)	(17.4)	(15.5)

The flow of migrants generally consist of four stratum, viz – rural to rural, rural to urban, urban to urban and urban to rural. The rural and urban composition of internal migrants by place of birth according to 1991 census is presented in Annexure IV(B) below:

Of the total intra – state migrants in the state 82.6 percent were rural to rural, 3.1 percent were from urban to urban, 12.2 percent were from rural to urban and 1.9 percent from urban to rural. In case of Saran district of the total intra-state migrants 89.5 percent were from rural to rural, 1.6 percent were from urban to urban, 7.5 percent were from rural to urban and 1.3 percent from urban to rural.

In case of migrants from other states, 48.8 percent were from rural to rural, 17.5 percent were from urban to urban, 27.4 percent were from rural to urban and only 5.7 percent were from urban to rural for the state of Bihar. In case of Saran district, on the other hand, of the total migrants, 45.2 percent were from rural to rural, 15.5 percent were from urban to urban, 21.6 percent were from rural to urban and 17.4 percent were from urban to rural.

ANNEXURE - IV (C)

INTERSTATE MIGRANTS, 1991 CENSUS

Bihar			Saran

Chhatisgargh	90,469	5.7	Maharashtra	239	1.7
Gujarat	65,996	4.2	Total for six states	13,473	95.7
Uttranchal	63,527	4.0	Other states	603	4.3
Jammu & Kashmir	43,737	2.8	**Total**	**14,076**	**100.0**
Orissa	42,215	2.7			
Maharashtra	38,244	2.4			
Rajasthan	20,542	1.3			
Haryana	20,505	1.3			
Andhra Pradesh	18,371	1.2			
Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

The data presented in the above tables pertaining to 1991 and 2001 Censuses deal with the magnitude of inter-state migration to the state of Bihar as also migrants coming from other states to Saran district. It will appear that the district received only 1.0 percent of the total migrants coming from other states to Bihar in 1991 and 0.9 percent in 2001 (10,080 out of 1,049,969 in 1991 and 14,076 out of 1,582,339 in 2001). The state of West Bengal and Uttar Pradesh in 1991 Census and Uttar Pradesh alongwith Jharkhand were the major contributors of migrants to the state in 2001.For the district of Saran West Beengal and Uttar Pradesh in 1991 Census and Uttar Pradesh alongwith Jharkhand and West Bengal in 2001 Census have been the major contributors. Nine major contributing states in 1991 and 14 such states in 2001 contributed 93.4 and 97.2 percent of the total migrants to the state of Bihar respectively. In case of Saran district 13 major states in 1991 and only 6 such states in 2001 contributed over 98 and 95 percent of total migrants to the district respectively.

ANNEXURE - V (A)

The data presented in Annexure-V (A) show religion wise distribution of population according to 1991 and 2001 Censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the Censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001 respectively. The Muslims come next with 14.8 and 16.5 percent respectively. Christians had been the third most important religious community though its proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the state during both the Censuses. Persons categorized under "Other Religions & Persuasions" comprised 1.7 and 0.1 percent of the state's population during 1991 and 2001 Censuses respectively.

In Saran district the proportion of Hindus to the total population of the district remained 90.2 percent in 1991 and 89.6 percent in 2001 which were comparatively higher than the respective state averages. Muslims constituted 9.8 and 10.4 percent of the district's population in 1991 and 2001 which were comparatively lower than the state average. The proportion of population of other religious communities remained almost negligible in the district of Saran during both the Censuses as Hindus and Muslims taken together comprised over 99 percent of the total population of the district during both the Censuses.

The above Annexures furnish religion wise distribution of population for the district of Saran and its C.D. Blocks in 1991 and 2001 Censuses. As already observed in Annexure V (A) of 1991 and 2001Census, though the proportion of Hindus in the district of Saran is highest as compared to other religious communities still it was seen that Muslims also formed a sizeable chunk of population in the district. It can be seen that except two C.D.Blocks viz. Lahladpur and Nagra C.D.Block all the C.D.Block of Saran district constitute over 85 percent Hindus during 1991 and 2001 Censuses.

Annexure V1 (A) furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991 and 2001 Censuses while Annexure (B) shows percentage distribution of population by marital status for the state. The Annexures V1 (C) and V1 (D) presented above give corresponding figures and percentages for the district of Saran.

It shall be evident from Annexures V1 (A) to V1 (D) pertaining to 1991 and 2001 Censuses that the state of Bihar as well as Saran district have relatively higher proportion of males in the "never married" category. The proportion of females, however, is found to be larger in the "married" category. This may, perhaps, be attributed to the fact that women, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 48.3 percent of "never married" males in 1991 Census and 56.3 and 59.1 percent in 2001 Census in Bihar state and Saran district respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 46.3 percent in 1991 and 47.3 and 48.6 in 2001 Census. Females are found to be higher in proportion in the "married" category than males both in the state and the district in both the Censuses, the percentages being 49.8 and 48.9 percent in 1991 and 47.8 and 46.5 percent in 2001. The corresponding figures for males in 1991 and 2001 Censuses stand at 43.6 and 39.3 and 41.6 and 38.3 respectively. So far the proportion of "widowed" is concerned, it transpires from the tables pertaining to 1991 and 2001 Censuses that female "widowed" are higher in proportion than male "widowed" both in the state as well as in the district. The proportion of "divorced or separated" is found to be negligible both in case of males and females in the state of Bihar and Saran district.

While analyzing tables for 1991 and 2001 Censuses regarding marital status of the male and female population by age groups, one notices that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than in males. It may, however, be interesting to note that proportion of married males and females in the age group 10-14 is less in Saran district as compared to the state average figure in both the Censuses. It is also discernable from the table that child marriage is more prevalent in the rural areas i.e., villages of the state and the district than the urban areas i.e., towns.

It is further noted from the tables pertaining to both 1991 and 2001 Censuses that generally the proportion of "married" females in the state as a whole and the district is relatively higher upto the age group 30- 34 or in some cases 40-44 while above these age group the proportion of "married" males are found to be higher than females.

Annexures VII(A),VII (B), VII (C) and VII (D) furnish position of literacy and level of education by various age –groups of population for the State of Bihar and the district of Saran respectively as per data collected during 1991 and 2001 Census. Among these, Annexures VII (A)and VII (B) provide literacy position absolute in numbers whereas Annexures VII (C) and VII (D) give these figures in terms of percentages.Literacy is one of the most important characteristics of population on which information are collected during Censuses. The concept of literacy adopted in Census has already been explained in the beginning of this volume.A proper index for measuring literacy is proportion of literate and educated persons to the total population. The rate of literacy for Bihar(excluding population of 0-6 years) in 1991 stood at 38.5 percent which rose to 47.0 percent in 2001.

The corresponding proportion for Saran district in 1991 and 2001 remained 41.8 and 51.8 percents respectively.It can be seen from the annexures that 20.6 percent males and 29.9 percent females in 1991 were literate without educational level in Saran. The corresponding proportions in 2001 including Below Primary remained 25.7 and 34.5 percent respectively. The proportions of Primary passed Males and females in 1991 were 21.8 and 29.2 percents respectively which became 24.2 and 31.7 percent in 2001 in the district. In 1991 there were 26.5 and 25.6 percent males and females who had passed middle whereas in 2001, the corresponding figures remained lower at 17.0 and 15.0 percent respectively. The proportion of those who had passed Matriculation and above in 1991 were 31.1 and 15.4 percent for males and females respectively in the district, the corresponding figures in 2001 remained 33.0 and 18.8 percent only which were higher than the previous Census. Males outnumbered females in the matter of literacy particularly in higher levels of education comprising of Middle and Matriculation and above. More or less same trends prevails for the state also during both the Censuses.

ANNEXURE – VIII

PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Saran district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001.

Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Saran only 3.8 percent of the district population have returned it as their mother tongue. Bhojpuri as mother tongue has been returned by 93.4 percent of Saran district's population and got first position in the list. Hindi has got third position with only 2.5 percent of the district population having returned it as their mother tongues. Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions or very low proportion of the respective population of the state and the district as mother tongues as per Census 2001.
