DISTRICT MAP

Remains Of Lichhavis Gantantra

Set amidst lush paddy fields, 55 km north of Patna, lies the quiet hamlet steeped in legend, Vaishali. Named after King Visala, it was the capital of the Lichhavis, and is believed to be one of the earliest republics of the world, having an elected body of representatives and an efficient administration, as early as 6th century BC. Vaishali is significant to both Buddhists and Jains. Lord Buddha preached his first sermon, and announced his impending Nirvana, here. To commemmorate the importance of the site, Emperor Ashoka erected one of his famous pillars. Vaishali is also the birthplace of Lord Mahavira.

Annexure VII : Age, Sex and Education in the district, 1991 Census 894

Annexure VIII : Distribution of different mother tongues returned in 1991 Census 900

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

District Highlights – 2001 Census

1. Vaishali ranks 10th in terms of population (27,18,421) and 25th in terms of area (2,036 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Vaishali is the 4th densely populated district in the state with 1,335 persons per sq.km as against the state's 881.
3. Vaishali ranks 13th in terms of sex-ratio (920) against the state's 919.
4. There are 155 uninhabited villages (out of 1,569 total villages) in the district of Vaishali.
5. Ghataro Chaturbhuj (under Lalganj C.D. Block) is the most populated village (20,147) and Chak Thakru (under Raghopur C.D. Block) is the least populated village (5) in the district.
6. The economy of the district depends mainly on cultivation or related work. More than 70% , workers are engaged in Primary sector.
7. C.D. Block Hajipur has the highest number of villages (211) in the district and C.D. Block Desri has the lowest number of villages (46).
8. Village Raghopur (under Raghopur C.D. Block) has the largest area (1,891 hectares) whereas Chak Dumri village (under Raja Pakar C.D. Block) and Salempur, Rampur Nawsahan, saidpur Ganesh, Arazi Sultanpur and Imadpur Sultan villages (under Hajipur C.D. Block) have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available in 98.7 percent villages of the district.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census

for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) mortality (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available

through Computer Scanner.

(ii) Brief history of the district

Vaishali district, which till the 1971 Census was a part of Muzaffarpur district, acquired the status of an independent district on the 2nd October, 1972. Earlier it was a subdivision of Muzaffarpur district, known as Hajipur subdivision. Hajipur is the chief town and the headquarters of the district. The district has derived its name after Vaishali or modern Basarh, a village in the north-west corner of the district, situated 32 Kms north west of Hajipur. It has been identified as the birth-place of Mahabir, the 24th Jain Tirthankar. It was also the capital of the powerful confederacy of the Lichchavis.

The district is bounded on the north by Muzaffarpur district, on the south by Patna district (the Ganges forming a natural boundary), on the east by Samastipur district and on the west by the district of Saran.

Early History

Little is known about the original inhabitants of this ancient land of North Bihar. The 1961 District Census Hankdook mentions that the history of the district dates back to the rise of the Vrijjian Republic which replaced the Videhan monarchy. The centre of power also shifted from Mithila to Vaishali, the capital of the republic, which is identified with modern Basarh, the headquarters of Vaishali C.D. Block. The Vrijjian Republic was a confederation of eight clans, of which the Lichchavis were the most important. They gradually gained strength and came in conflict with the powerful kingdom of Magadh, Bimbisar (Circa 519 B.C.), the founder of the Magadh Empire, had secured his position by concluding matrimonial alliance with the neighbouring states of the Kosalas and the Lichchavis. Bimbisar was assassinated by his son Ajatsatru, who afterwards invaded Vaishali and extended his way over Tirhut.

Vaishali was a centre of religious renaissance Lord Mahavir, the founder of modern Jainism, was born in about 599 B.C near Valishali. Like Lord Buddha, he also came of an aristocratic family. His father was the Chief of the Nata or Naya clan of Kshatriyas. Mahavir became an ascetic at the age of 30 and revived the religion founded by Parsvantha.

Lord Buddha was a contemporary of Mahavir. It is said that when Vaishali was in the grip of a devastating plague, its people exhorted Buddha to pay a visit. On his arrival at the city, the fury of the pestilence was greatly reduced and this miracle won him a good many disciples. Although, Vaishali was the birth-place of Mahavir, it was influenced more by Buddhism. Even at a much later date, many stupas and sevreal Buddhist monasteries were found here by travellers including Hiuen Tsang. Even after the defeat of the Vrijjians by the Magadh emperor, Ajatshatru Vaishali continued to be and important place. The second great synod of the Buddhists was held here.

Vaishali appears to have gradually lost its glory after the Buddhist synod. Not much is known about it for the next several centuries. The Lichchavis, who had acknowledged the suzerainty of Magadh, ruled over the area. Vaishali was visited by Ashoka who got a stupa and a lion pillar erected here.

The Kushan King, Kanishka, invaded Vaishali in about 120 A.D. Fa-hien, the Chinese pilgrim visited the place during his tour of India, but he did not leave any detailed account of the place. A description of Vaishali appears in the travel accounts of Hiuen Tsang, who visited it about 635 A.D. according to this, the people were honest and religious and respected the learned. Hiuen Tsang say many deserted monasteries, some of which were in ruins. There were many Jains indicating that Buddhism was on the decline in that period.

Medieval Period

There is a great dearth of material on the history of North Bihar including Vaishali from the visit of Hiuen Tsang till the rise of the Pala dynasty. In the 8th century A.D. Gopala, the first of the Pala kings, became the ruler of Bengal. He extended his authority over Bihar in about 750A.D. The Palas continued to have their hold over Tirhut until 1019 A.D. When the Chedi kings of Central India established their sway. They were replaced towards the close of the 11th century by the rulers of the Sena dynasty. Lakshman Sena was powerful king of his dynasty.

Muslim Period

Ghias-ud-din Iwaz, the Governor of Bengal between 1211 and 1226, was the first Muslim invader of Tirhut. He subdued the Raja of Tirhut and extorted tributes from Him. Iwaz, however, could not succeeded in conquering the country. It was only in 1323 that Ghiyas-ud-din Tughlak succeeded in establishing his sway over the district. Hajipur, which had great strategic importance due to its situation at the confluence of the rivers Gandak and Ganga, was the seat of the Governors. Being under their direct control, the district has a number of relics of the Muslim period. The town of Hajipur itself was founded by Haji Illyas, king of Bengal from 1345 to 1358. He invaded Tirhut and, to consolidate his conquest, built a fortress at Hajipur. Feroz Tughlaq of Delhi marched to Tirhut in 1353 to punish Haji Illyas for his attempt at taking over the Emperors domain. The Haji was ultimately defeated and the Emperor returned to Delhi.

The whole North Bihar appears to have passed into the hands of the kings of Jaunpur towards the close of the 14th Century. It remained under them for about a hundred years until Emperor Sikander Lodi of Delhi defeated the king of Jaunpur and retrieved the territory. After his victory over the king of Jaunpur, the Emperor advanced against Hussian Shah in 1949, who by that time had extended his power over large tracts in Bihar. Hussain Shah found in difficult to resist the imperial forces and therefore he came to agreement with the Emperior and concluded a treaty with him at Barh. According to the terms, Hussain Shah withdrew from Bihar, Tirhut and Sarkar Saran while the Emperor agreed to desist from interfering with his possession in Bengal. But the kings of Bengal could not for long resist the temptation of extending their power over Tirhut. Nasrat Shah, son of Hussain Shah, raided Tirhut in the early 16th century not withstanding the earlier treaty concluded by his father. The Raja of Tirhut was killed and the king's son-in-law, Alauddin was appointed Governor of Tirhut. Nasrat Shah also took over Hajipur and put another son-in-low, Makhdoom Alam there. The power of the kings of Bengal was, however, waning and, with the fall of Mahmood Shah, North Bihar including Vaishali, became a part of the Mughal Empire. Though the entire North Bihar had been annexed, the control way very loose and petty chieftains continued to be powerful. When Daud Khan, the king of Bengal, raised the banner of revolt in 1574, he founded aband of ready supporters in the Afghans. Daud Khan had his stronghold at Patna and Hajipur. It was only after a fierce fight that the Mughals defeated Daud Khan. After the fall of the Afghan king, a separate Subah of Bihar was constituted and placed under a Mughal Governor. Tirhut which included Vaishali formed part of this Subah. The chieftains who had helped the Emperor were rewarded with grants of Jagir in Sarkar Hajipur. They settled down with their retinue. With the transfer of the headquarters of the Governor from Hajipur to Patna, the former lost its importance.

British Period

With the British victory at Buxar in 1764 Vaishali passed, with the rest of Bihar, under the British rule. After establishing their authority the English took steps to strengthen their hold. In the initial stages their chief interest was trade. In course of time, however, they emerged as rulers and succeeded in subduing the entire district. There was no event of great consequence in the district uptil the movement of 1857. The success of the insurgents at Delhi caused great concern to the English inhabitants in the district. In June, 1857 some of the soldiers (from amongst those who had revolted) came back home and became quite active. This caused considerable alarm to the European Community. The movement was ultimately crushed and the district remained undisturbed for quite some time.

The political awakening in the country in the period after the First World War stimulated nationalist movement in Vaishali district also. During the Non-Co-operation Movement, and later on during the Civil Disobedience Movement of 1930-31, the district responded widely to the call of Mahatma Gandhi. During the 'Quit-India Movement' in 1942 the district was in full fury. The district played a prominent role in the country's struggle for freedom.

(iii) Administrative set up

The district of Vaishali lies in the north Bihar region of the state. It is adjacent to Patna, Saran, Muzaffarpur and Samastipur districts of the state of Bihar. There are three subdivisions viz., Hajipur,

Mahua and Mahnar. There are altogether seventeen Community Development Blocks in the district namely Vaishali, Paterhi Belsar, Lalganj, Bhagwanpur, Goraul, Chehra Kalan, Patepur, Mahua, Jandaha, Raja Pakar, Hajipur, Raghopur, Bidupur, Desri, Sahdai Buzurg, Mahnar. Hajipur(M), Mahnar (M) and Lalganj (M) are the three towns in the district. Total number of villages in the district are 1,569. Hajipur (M) is the headquarter of the district.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has three subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are seventeen C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration :

The Judges and Munshif magistrates are posted at district and sub-divisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration :

The Superintendent of Police, Vaishali is the head of the district police administration who is generally from the Indian Police Service. In the subdivisions of the district, the Deputy Superintendents of Police are posted who keep control on police administration and belongs to Bihar Police Service.

(iv)Physical Features

The district of Vaishali comprises an extensive plain formed by the alluvium brought by the Ganga, the Gandak and other rivers which flow through it. It lies on the south of the Burhi Gandak and is bounded by the Ganges on the South and the Gandak on the sout-west. It is a plain with very few water-logged or low-lying tracts, highly fertile and well-suited for both food and cash crops.

Besides the large rivers such as the Ganges, the Gandak, the district has a few streams also. The most important river is the Ganga which touches the district at Teraharasia in Raghopur block, where it is joined by the Gandak. The river is about 1.6 kms. wide though in the rainy season it becomes much wider. Large stretches of sand may be seen in the river-bed except in the rainy season. The Ganga is navigable throughout the year. Country boats ply regularly between Hajipur and Patna.

The Gandak, which is also locally known as the Narayani or Saligrami, joins the main stream of the Ganga opposite Patna. The river has vast irrigation and power potentialities and the Gandak Project has been implemented for harnessing its resources.

Climatic Conditions

Vaishali district generally enjoys a bracing and healthy climate with three well marked seasons - winter, summer and the rainy season. The first commences early in November and lasts till almost the end of March. Though the days begin to get hot in March, the nights and early mornings continue to the comparatively cool and pleasant. January is the coldest month when the mercury sometimes drops below 5^{o}C. The hot weather commencing in April is ushered in by dust-storm. The heat is intense in the month of May and continues until the rains come. Clouds being to gather in early June. Humidity increases and the rains set in towards the middle of June. Usually, there is a recess of a week or ten days between the first shower and the regular monsoon. The rainy season lasts till the end of September or the middle of October. With the cessation of rains the temperature falls and the climate becomes rather agreeable.

The district enjoys good rainfall with an annual average of 1168 mm. July and August are the rainiest months of the year and together they receive over 50percent of the total annual rainfall. The district also gets some winter rains. However, over 85 percent of annual rainfall occurs during the monsoon months of June to September.

Flora and Fauna

The district is a large alluvial plain watered by

the various rivers. It is rich in vegetation and its green fields are dotted with groves of mango, bamboo and other trees. The land being fertile, no area has been left for wild growth and the entire district is devoid of any forest. With the extension of cultivation, the growth of population, and extension of means of communication, wild animals have almost disappeared from the district. The only animals now seen in the district are foxes and jackals.

Among the birds seen in the district are the crows and treepie, the latter being yellowish in colour with patches of white and similar to myna. The common babbler, the bulbul , the Jhujenga or black drongo, the minivet, the common myna, the sparrow, papiha, the cuckoo, the barbet, the nilkanth, the green bee-eater, the blue-tailed bee-eater, the grass owl, the brown dove and the peewit are the other birds found in the district.

The district also abounds in fish, common among these being suiya, hilsa, rewa, rohu, singhi, bachwa, tengra, kewai, etc. Poisonous snakes found are the gehuman (cobra) Karait, lohiar, amaitar, patar, etc. Among the snakes of non-poisonous variety are the awaria, dhorah and dhamin.

Crocodiles are occasionally seen in the Gandak and the Ganga.

Mines and Minerals

The entire district is formed of alluvial soil but the soil is dark in colour, with greater content of sand and mineral salts.

No minerals of any economic importance is found in the district.

Land-use Pattern

The district is basically agricultural in character. The soil of the district is highly calcareous. The different varieties of soil found in the district are sandy, loamy, light clayey and usar. Paddy is grown mostly on clayey soil which is known locally as mathivari. Sandy loam which is known as balsundari, is particularly suited for rabi cultivation.

Rice, maize and wheat are the main crops of the district. Sugar-cane tobacco, potato are the cash crops grown in the district. The district headquarters Hajipur is famous for the very good varieties of banana produced here. It is exported to other places also.

In Hajipur area the cultivation of vegetables and fruits is now being done on scientific lines and their production has gone up considerably. Introduction of good grafts had helped the growers in producing better varieties of fruits and this has augmented the earning of the cultivators considerably.

Irrigational facilities

The soil of the district is capable of retaining moisture. It is considered to be one of the fertile districts in Bihar. Formerly the cultivators did not find it necessary to obtain water for the fields from large irrigation work. But on account of falling production of food crops, deficit in food grains and the increasing pressure of population the need for assured irrigation has been keenly felt.

After independence, considerable attention has been paid to implementation of various irrigational projects. A number of Medium Irrigation schemes, Minor Irrigation schemes, Open borings, irrigation wells and tube wells have been introduced in the district during the different plan periods.

Cattle shows are sometimes organised and prizes in cash or kind are awarded with a view to encouraging the local breeders.

Industrialisation

In contrast to the decline of indigo and saltpetre there has been a great expansion of the cultivation of sugar-cane and in the working of the Sugar factories. There is a big sugar factory located at Goraul. Tobacco industry is also important in the district, and a few units are located at Mahnar, Mahesh Glass Works at Hajipur is the main glass factory in the district and is engaged in the manufacture of bangles, jars, tumblers and other articles and the bulk of the output is consumed locally. There are also a number of small scale industries in the district and the bulk of these industrial establishments relate to black smiths and potters, who play important roles in the rural-cum-agricultural economy of the district.

There is no heavy industry in the district. The

completion of the road bridge on the Ganga has improved the prospects of industrialisation of the district immensely. An industrial area is being developed by the State Government and it is expected that some industrial units will come up soon.

Live stock

The general condition of livestock is fair. The development of the breed of cattle and buffaloes is essential for agricultural activities and availability of adequate quantity of milk. There has been a concerted effort on behalf of the state Government to tackle this problem. The All India Key Village scheme sponsored by Government of India is in operation in the district.A scheme aims at improving the general efficiency of the cattle by adopting scientific methods of breeding, feeding, disease control and marketing selected bull-calves are reared in the key village for distribution after maturity for the purpose of upgrading. In order to improve the breed of cattle quickly and also at low cost, artificial insemination centres with sub-centres have been opened in the district. Distribution of froze4n semen has also been introduced in the district.

There are a number of veterinary hospitals and dispensaries spread over the entire district. Treatment, prevention and suppression of diseases of the livestock are the main functions of the veterinary institutions.

Cattle shows are sometimes organised and prizes in cash or kind are awarded with a view to encouraging the local breeders.

Communication facilities

The district has well developed means of communication. It has a net work of railway and well maintained roads. Country boats also ply in the larger views.

During the British period itself, the English rulers realised the importance of developing assured means of communication as they were interested in securing proper trade routes. With the advance of trade and commerce, road traffic increased and the need for more and better roads were felt. After independence, the Public Works Department of the Government took up road building in the district. Prior to this, the District Board and other local bodies were primarily concerned with the maintenance of roads within the district.

The district is well served by railway. The lines running in this part are :

i) Hajipur- Muzafarpur - Samastipur Trunk line. This enters the district after crossing the Gandak near Hajipur.

ii) The Chord Line between Hajipur and Bachwara. The Gandak remains navigable throughout the year.

Grains and other commodities are carried by boat on this river.

There is a landing ground at Hajipur which is mean only for small aircraft.

Trade and Commerce

Vaishali is mainly agricultural district with the bulk of its population engaged in agriculture. Trade and industry depend to a great extent on communication facilities. The district is fairly well connected by rail, road and river.

The main exports from the district are tobacco, banana, lichi and mango. Bananas from Hajipur are exported to Bengal, Uttar Pradesh and a few other parts of the country. The main imports are machine parts of manufacture of cloth and item of common use.

Mahnar has considerbaly improved its trade and commerce due to its location on the bank of the Ganges. Besides the markets in the township, a good deal of trade is cleared through the melas and fairs of the district.

Electricity and Power

The district receives its entire power supply from the Bihar State Electricity Board. All the 3 towns of the district have electricity. In rural areas, however, the pace of electrification is comparatively slow. However, the Government is trying to extended electric line to the maximum number of villages by implementing various schemes for rural electrification.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.

In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.

If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth

of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/

Hotel building was treated as one census house but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

(a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

(b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against (b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban

spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:—

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the

Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa

22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on

land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a

network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewerage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group, normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (\text{ASFR})}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (\text{ASMFR})}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 : Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of

residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt.

defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Vaishali district during 1991 Census was 2,146,065 Hindus constitute over 90.5 percent (1,942,401persons) of the population in the district followed by Muslims 9.2 percent (2,02,602 persons). All other four major religious communities have almost negligible percentage.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Vaishali district during 1991 Census was 2,146,065. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Vaishali district, Hindi, the main mother tongue of the district was returned by 93.3 percent (2,001,914 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Vaishali district, was 6.7 percent (143,575 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Vaishali during 1991 Census

The population of the Scheduled Castes in the district of Vaishali was 425,898, according to 1991 Census Numerically, the five most prominent SC in the district were (i)Dusad ,Dhari, Dharhi(217,470) (ii) Chamar,Mochi(132,160) (iii) Musahar(24,199) (iv) Dhobi (20,859) and (iv) Pasi (14,178) while Dusadh constituted the maximum proportion of Scheduled Castes population , being 51.1 percent (more than half of the total SC population). Chamar comprised 31.0 percent of the SC population in the district. Musahar and Dhobi though numerically third and fourth in order comprised only 5.7 and 4.9 percent of the SC population in the district. Pasi are much less in number as compared to the other fourth SCs mentioned above with only 3.3 percent of the total Sc population of the district. Remaining Scheduled Castes were comparatively very less in number as compared to five SCs described above as their percentage to total SC population was less than even 10 percent except Hari,Mehtar,Bhangi whose percentage was 1.5 respectively.

The population of the Scheduled Tribes in the district of Vaishali, during 1991 Census was 1,408.Numurically, the five important STs were namely (i) Gond(ii) Kharwar(iii)Munda(iv) Oraon and (v) unclassified. Gond has 539 population, which constituted 38.3 percent of the Scheduled Tribes population in the district. Kharwar with 240 population constituted 17.0 percent of the ST population. Munda, which were 212 in number, constituted 15.1 percent of the ST population. Oraon comprised 135 persons and constituted 9.6 percent of ST population while unclassified with population 120 constituted 8.5 percent of the total ST population in the district. The

other Scheduled Tribes were almost negligible in proportion except Santal, Lohara/Lohra and Kharia whose percentage were 5.2,3.5 and 1.6 respectively.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Vaishali district is 2,718,421 comprising 1,415,603 Males and 1,302,818 Females and constituting 3.3 percent of the State population spread over 2.2 percent of the area of the State in the 16 C.D.Blocks of the district. Hajipur is the most populous where as Paterhi Belsar is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population

	District											
	Total:	**2,146,065**	**2,002,708**	**143,357**	**2,718,421**	**2,531,766**	**186,655**	**26.7**	**26.4**	**30.2**	**6.7**	**6.9**

Table 1 shows that increase in population of Vaishali District during 1991-2001 decade has been of the order of 26.7 percent. The rural population in the district has increased by 26.4 percent while the urban population growth during the decade has been recorded 30.2 percent. Rural-Urban migration is an important factor which always leads to rapid expansion of the urban unit. Among the C.D. Blocks Raghopur has shown the highest increase in total population over the decade with 42.6 percent. The next highest increase in total population is observed in C.D. Block Desri with 34.1 percent. Percentage decadal variation has been the least in the case of Mahnar C.D. Block with 18.2 percent.

The highest variation in urban population during the decade has been noticed in Hajipur C.D. Block i.e. 36.2 percent followed by Mahnar and Lalganj C.D. Block with 21.6 and 19.8 percent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

16	Mahnar	14 (28.0)	21,389	20,352	4 (8.0)	12,515	11,497	1 (2.0)	5,764	5,421
	District (Rural)									
	Total:	**319 (22.6)**	**503,082**	**469,123**	**75 (5.3)**	**264,706**	**239,163**	**14 (1.0)**	**108,032**	**95,723**

It may be observed in table 2 that the maximum number of villages (377) in the district lie in the population range of 1000-1999 which account for 26.7 percent of the total inhabited villages in the district i.e. 1,414 villages and a rural population of 548,850 (21.7 percent). But a bit smaller number of villages i.e. 319 (accounting for 22.6 percent of villages) falling in the population range of 2000-4999 account for highest rural population of 972,205 which is 38.4 percent of total rural population of the district. 297 and 202 villages falling in population range of 500-999 and 200-499 accounting for 21 percent and 14.3 percent of total inhabited villages have 8.7 and 2.7 percent of the total rural population respectively. Only 14 inhabited villages accounting for 1 percent of villages and 8 percent of total rural population of the district lie in highest population range of 10,000 and above. Comparatively less populated villages having a population range of less than 200 each accounting for 9.2 percent of the villages also have only 0.5 percent of the total rural population of the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicale in respect of Vaishali district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5

301-500	41	2.9	22,935	0.9
501 +	1,303	92.1	2,479,453	97.9
Not known	0	0.0	0	0.0
District Total:	**1,414**	**100.0**	**2,531,766**	**100.0**
Population Density (Rural) of the district:		**1,379**		

The data presented in the above table highlight the fact that maximum proportion of villages in Vaishali district lie in the population density range (per square kilometer) of 501+ with 92.1 percent of total inhabited villages and 97.9 percent of total rural population in the district. 2.9 percent of the total villages accounting for 0.9 percent of the rural population of the district lie in population density range of 301-500. Proportion of villages and population are even lower for villages having less density of population in the district. The average density of rural population in the district is 1,379.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,089	1,084	1,205
1911	1,051	1,056	942	1,092	1,092	1,084
1921	1,020	1,027	886	1,079	1,079	1,075
1931	995	1,005	820	1,037	1,040	950
1941	1,002	1,012	842	1,048	1,050	1,008
1951	1,000	1,010	859	1,065	1,067	1,031
1961	1,005	1,020	832	1,069	1,075	957
1971	957	968	833	1,017	1,024	921
1981	948	959	852	994	1,002	896
1991	907	913	857	921	923	884
2001	919	926	868	920	923	889

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows sex ratio for the state and the district since 1901. Generally a declining trend of sex ratio both in the state and the district for rural as well as urban areas is observed till 1991. The general sex ratio for the state in 1901 was 1061 which remained 919 in 2001. Similarly it declined from 1,064 for state rural areas in 1901 to 926 in 2001. In urban areas of the state sex ratio declined from 1,003 in 1901 to 868 in 2001. A similar pattern of sex ratio is also observed in the district of Vaishali also as total

sex ratio declined from 1089 in 1901 to 920 in 2001. Sex ratio for rural and urban areas also declined from 1084 and 1205 in 1901 to 923 and 889 respectively in 2001. It can be observed from the comparison of sex ratio between state and the district that it has been through out higher in Vaishali district than the state average both for rural and urban areas in 2001except in which rural sex ratio for the state is 926 where as it is 923 for the district.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Vaishali	948	948	
2	Paterhi Belsar	958	958	
3	Lalganj	930	933	915
4	Bhagwanpur	921	921	
5	Goraul	945	945	
6	Chehra Kalan	961	961	
7	Patepur	935	935	
8	Mahua	928	928	
9	Jandaha	950	950	
10	Raja Pakar	928	928	
11	Hajipur	885	892	871
12	Raghopur	851	851	
13	Bidupur	901	901	
14	Desri	904	904	
15	Sahdai Buzurg	915	915	
16	Mahnar	941	945	929
	District Total:	**920**	**923**	**889**

In the district of Vaishali as a whole there are 920 females for 1000 males. Within the district, the sex ratio varies between 961 in Chehra Kalan C.D.Block and 851 in Raghopur C.D.Block . Paterhi Belsar has a sex ratio of 958. These figures are good for rural areas. The average sex ratio in the district for urban area is 889. The highest sex ratio for urban area is 929 in C.D. Block Mahnar followed by 915 in Lalganj and 871 in Hajipur. The rural sex ratio is higher than district average in C.D. Blocks Hajipur, Raghopur, Bidupur, Desri and Sahdai Buzurg where as in Vaishali, Paterhi Belsar , Lalganj, Bhagwanpur, Goraul, Chehra Klan, Patepur, Mahua, Jandaha, Raja Pakar and Mahnar sex ratio is higher than the district for rural areas.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio
1	2	3
1	Vaishali	948
2	Paterhi Belsar	958
3	Lalganj	933
4	Bhagwanpur	921
5	Goraul	945
6	Chehra Kalan	961
7	Patepur	935
8	Mahua	928
9	Jandaha	950
10	Raja Pakar	928
11	Hajipur	892
12	Raghopur	851
13	Bidupur	901
14	Desri	904
15	Sahdai Buzurg	915
16	Mahnar	945
	District (Rural) Total:	**923**

Table 7 present sex ratio position in the district exclusively for rural areas. There are only 923 females for every thousand males in rural areas of the district as a whole. The highest sex ratio i.e. 961 can be noticed in C.D. Block Chehra Klan followed by 958 in C.D. Blocks Paterhi Belsar and 950 in Jandaha. Raghopur C.D. Block has lowest sex ratio of 851 females for 1000 males. Other C.D. Blocks having a lower sex ratio than the district average are Hajipur (892), Desri (904) and Sahdai Buzurg (915). These C.D. Blocks having a lower sex ratio are situated mostly in 'Doara' are as of the district which is flood prone.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	1.3	1,449	0.1
700-749	8	0.6	2,750	0.1
750-799	43	3.0	39,219	1.5
800-849	140	9.9	211,262	8.3
850-899	305	21.6	665,799	26.3
900-949	358	25.3	831,596	32.8
950-999	275	19.4	518,167	20.5
1000-1099	196	13.9	225,080	8.9
1100+	71	5.0	36,444	1.4
District Total:	**1,414**	**100.0**	**2,531,766**	**100.0**
Sex ratio (Rural) for District:		**923**		

It can be observed in table 8 that the maximum proportion of villages in Vaishali district lie in the sex ratio range of 900-949 and those villages account for 25.3 percent of the total inhabited villages and 32.8 percent of the total rural population. 21.6 percent of villages accounting for 26.3 percent of rural population in the district fall in the sex ratio range of 850-899. 19.4 percent villages having 20.5 percent of rural population of the district have a sex ratio range of 950-999. Only 13.9 and 5 percents of the inhabited villages are having a favorable sex ratio of 1000-1099 and 1100+ which constitute 8.9 and 1.4 percent of total rural population respectively. Only 18 villages accounting for 1.3 percent of inhabited villages and 0.1 percent of rural population have a sex ratio range of less than 700 in the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Urban status of town	Sex ratio
1	2	3	4
1	Hajipur	M	871
2	Lalganj	M	915
3	Mahnar Bazar	M	929
	Sex ratio (Urban) for the district:		**889**

\+ Arranged in alphabetical order

There are three Municipalities namely Lalganj (M), Hajipur (M) and Mahnar Bazar (M) and no urban agglomeration in Vaishali district. The total sex ratio for urban areas in the district is 889 only. Among towns Mahnar Bazar has the highest sex ratio of 929 females for every thousand males. Lalganj (M) has a sex ratio of 915 followed by Hajipur (M) which is lowest i.e. 871.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

		Urban	**33,731**	**17,484**	**16,247**	**929**

It is observed in the table 10 that average sex ratio for 0-6 years population in the district is 937. Rural and urban areas have a sex ratio 938 and 929, respectively. Sex ratio for 0-6 years population in the district varies from a maximum of 968 in C.D. Block Rghopur to 912 in C.D. Block Hajipur sex ratio for 0-6 years population is higher than the district average in C.D. Blocks Vaishali, Paterhi Belsar, Lalganj, Chehra Kalan, Jandaha, Raghopur and Mahnar. On the other hand sex ratio for 0-6 years is less than district average in C.D. Blocks Goraul, Patepur, Mahua, Raja Pakar, Hajipur, Bidupur, Desri and Sahdai Buzurg. Bhagwanpur C.D. Block has just equal sex ratio to the district average for this age group. The highest sex ratio for 0-6 years in urban area has been observed in Mahnar Town i.e. 978 where as for rural area it 968 in Raghopur C.D. Block.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age Group
		Persons	Males	Females	
1	2	3	4	5	6
1	Vaishali	28,948	14,856	14,092	949
2	Paterhi Belsar	14,473	7,444	7,029	944
3	Lalganj	33,668	17,255	16,413	951
4	Bhagwanpur	32,042	16,538	15,504	937

	District (Rural) Total:	**509,504**	**262,958**	**246,546**	**938**

It is observed from the above table that the sex ratio in the age group 0-6 years among the rural population in C.D. Blocks of the district varies from 968 in Raghopur to 912 in Hajipur. The sex ratio figures of C.D. Blocks Vaishali, Paterhi Bazar, Lalganj, Jandaha, Raghopur and Mahnar are higher than the district average where as in C.D. Blocks Bhagwanpur, Goraul, Patepur, Mahua, Raja Pakar, Hajipur, Bidupur, Desri, Sahadai Buzurg are lower than the district average of 938.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	94	6.6	7,480	1.5
700-749	52	3.7	7,764	1.5
750-799	74	5.2	16,583	3.3
800-849	133	9.4	40,014	7.9
850-899	171	12.1	84,098	16.5

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001 *(Concld.)*

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
900-949	238	16.8	128,175	25.2
950-999	192	13.6	99,906	19.6
1000-1099	259	18.3	95,983	18.8

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001 (*Concld.*)

Serial number	Name of C.D.Block	Total/ Rural/ Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
16	Mahnar	Total	144,040	31,416	12	21.8	0
		Rural	106,670	23,357	0	21.9	0
		Urban	37,370	8,059	12	21.6	0
	District Total:	**Total**	**2,718,421**	**562,123**	**3,068**	**20.7**	**0.1**
		Rural	**2,531,766**	**529,027**	**2,883**	**20.9**	**0.1**
		Urban	**186,655**	**33,096**	**185**	**17.7**	**0.1**

The table above shows that the proportion of scheduled castes total population in Vaishali district is 20.7 percent. Within the district, the highest percentage of scheduled castes population is in Paterhi Belsar i.e. 23.5 percent followed closely by Raja Pakar with 22.9 percent. The lowest percentage of scheduled castes to total population can be observed in C.D. Block Vaishali with 17.9 percent. Among urban areas, Mahnar has the highest proportion of scheduled castes with 21.6 percent of the total population followed by Hajipur with 17.3 percent. The lowest proportion of scheduled castes in urban area is 14.6 percent in Lalganj. The proportion of scheduled tribes population in the district is 0.1 percent which is highest in Raghopur with 0.7 percent. Most of the C.D. Blocks do not have scheduled tribes population in the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7

16	Mahnar	106,670	23,357	0	21.9	0
	District (Rural) Total:	**2,531,766**	**529,027**	**2,883**	**20.9**	**0.1**

The table 15 indicates that the percentage of scheduled castes in Vaishali district is of the order of 20.9 percent of the district rural population. The highest percentage of scheduled castes population is 23.5 percent in C.D. Block Paterhi Belsar followed by Rajapakar and Hajipur C.D. Blocks with 22.9 percent each. The lowest proportion of scheduled castes is 16.3 percent in C.D. Block Raghopur, whereas Vaishali C.D. Block has 17.9 percent scheduled castes of its total rural population. The proportion of scheduled tribes to total rural population in the district is 0.1 percent only. Among the C.D. Blocks, Raghopur has 0.7 percent scheduled tribes. Vaishali, Lalganj and Chehra Kalan have 0.3 percent and 0.2 percent each respectively. Fifty percent of the total C.D. Blocks have no scheduled tribes population in rural areas.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	188	13.3	0	0.0
Less than 5	79	5.6	3,272	0.6
5-10	153	10.8	25,025	4.7
11-20	357	25.2	162,490	30.7
21-30	300	21.2	166,660	31.5
31-40	165	11.7	96,987	18.3
41-50	64	4.5	33,969	6.4
51-75	66	4.7	28,944	5.5
76 and above	42	3.0	11,680	2.2
District Total	**1,414**	**100.0**	**529,027**	**100.0**

From the table above, it is apparent that there are 357 villages accounting for 25.2 percent of inhabited villages and 30.7 percent of total scheduled castes population in the district where the scheduled castes population ranges between 11-20 percent of total population. This is closely followed by 300 such villages where the population of the scheduled castes ranges between 21-30 percent of the total population. These villages account for 21.2 percent of the inhabited villages and 31.5 percent of total scheduled castes population. There are 165 villages which account for 11.7 percent of the inhabited villages and 18.3 percent of total scheduled castes population where the percentage of scheduled castes population ranges between 31-40 percent of the total population. Similarly 153 villages accounting for 10.8 percent of the inhabited villages and 4.7 of total scheduled castes population are such where percentage of scheduled castes population ranges between 5-10 percent of the total population. Only 42 villages having higher percentage of scheduled castes i.e. 76 percent and above account for 3 percent of total inhabited villages and 2.2 percent of the total scheduled castes population. On the other hand, a sizeable number of inhabited villages i.e. 188 has no population of scheduled castes in the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,370	96.9	0	0.0
Less than 5	37	2.6	814	28.2
5-10	6	0.4	993	34.4
11-20	0	0.0	0	0.0

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001 (*Concld.*)

Percentage Range of Scheduled Tribes population to total population	Number of villages	Scheduled Tribes Percentage	Scheduled Tribes Population	Scheduled Tribes Percentage
1	2	3	4	5
21-30	0	0.0	0	0.0
31-40	1	0.1	1,076	37.3
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**1,414**	**100.0**	**2,883**	**100.0**

As regards the population of Scheduled Tribes, it can be seen from the table above that there are 37 villages and accounting for 28.2 percent of total Scheduled Tribes where percentage of Scheduled Tribes ranges less than 5 of the total population. Only 6 such villages which account for 0.4 percent of villages and 34.4 percent of Scheduled Tribes population have a percentage range between 5-10 for Scheduled Tribes. Only one villages have a larger proportion of 37.3 percent of total scheduled tribes in the district and fall in the range of 31-40 percent. On the other hand 1370 villages accounting for 96.9 percent of total inhabited villages have no population of scheduled tribes in the district.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Hajipur (M)	119,412	20,661	86	17.3	0.1
2	Lalganj (M)	29,873	4,376	87	14.6	0.3
3	Mahnar Bazar (M)	37,370	8,059	12	21.6	0.0
	District (Urban) Total	**186,655**	**33,096**	**185**	**17.7**	**0.1**

\+ Arranged in alphabetical order

There are three municipal towns viz., Lalganj(M), Hajipur(M) and Mahnar Bazar(M) in the district. The percentage of scheduled castes is 17.7 and that urban population in the district of Vaishali. Mahnar Bazar(M) has 21.6 percent scheduled castes followed by Hajipur(M) with 17.3 percent. Lalganj(M) has 14.6 percent scheduled castes population. Lalganj(M) has highest proportion i.e. 0.3 percent of scheduled Tribes while Hajipur has only 0.1 percent of the same.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio

14	Desri	893	1,182
15	Sahdai Buzurg	918	696
16	Mahnar	945	0
	District (Rural) Total	**922**	**919**

Table 19 shows the sex ratio among scheduled castes and scheduled tribes population in the district. The average sex ratio in the district for scheduled castes and scheduled tribes are 922 and 919 respectively. The sex ratio among scheduled castes varies from 862 in Raghopur C.D. Block to 953 in Chehra Kalan. Among scheduled tribes it varies from 500 in C.D. Block Mahua to 1182 in Desri C.D. Block. Paterhi Bazar, Bhagwanpur and Mahnar do not have any scheduled tribes in the district.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Hajipur (M)	884	911
2	Lalganj (M)	932	1,071
3	Mahnar Bazar (M)	907	1,000
	Sex ratio (Urban) for the district:	**896**	**989**

\+ Arranged in alphabetical order

The above table shows that sex ratio among scheduled castes and scheduled tribes residing in Municipal towns of the district. The average sex ratio in urban areas of the district is 896 for scheduled castes and 989 for scheduled tribes. The highest sex ratio i.e. 932 for scheduled castes has been recorded in Lalganj(M) followed by Mahnar Bazar(M) with a sex ratio of 907. Hajipur(M) has the lowest sex ratio of 884 for scheduled castes. For scheduled tribes Lalganj(M) has the highest sex ratio of 1071 followed by Mahnar Bazar(M) with a balance sex ratio of 1000 females for every thousand males. Hajipur(M) has the lowest sex ratio of 911 only.

Table 22 shows number and percentage of literates and illiterates by sex in rural areas of the C. D. Blocks.The C.D. Block Hajipur has the highest proportion of literate population i.e. 56.9 percent for rural areas followed closely by C.D. Block Bidupur with 55.2 percent Raghopur has the lowest proportion of literates i.e. 33 percent only. The highest male and female literacy have been recorded also in Hajipur with 69.3 and 43 percent respectively. The literacy rate gap between male and female is 26.3 percent in C.D. Block Hajipur for rural population. Again C.D. Block Raghopur has the lowest male and female literacy i.e. 44 and 19.6 percent respectively in the district. The average literacy rate for the district for rural population is 49.3 percent. Male and females literacy rates in the district for rural areas are 62.3 and 35.2 percents respectively. The average gap of literacy for the district between male and female literacy is 27.1 percent.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.1	13	0.0
1-10	17	1.2	5,715	0.2
11-20	47	3.3	26,433	1.0
21-30	96	6.8	140,662	5.6
31-40	191	13.5	326,753	12.9
41-50	382	27.0	782,761	30.9
51-60	406	28.7	930,345	36.7
61-70	197	13.9	268,506	10.6

The above table shows that among the scheduled tribes the percentage of literates is highest i.e. 100 percent in C.D. Block Mahua.Since there are only one male and one female, hence literacy gap in this C.D. Block is zero. Literacy rate among scheduled tribes is lowest i.e. 4.5 and 4.6 percent in C.D. Blocks Jandaha and Raghopur respectively. It is observed that the literacy rate in rural areas among the scheduled tribes for the district is 27.2 percent. As regards percentage of male and female literacy among the scheduled tribes are lowest in Raghopur C.D. Block which stand at 5.6 and 3.5 percent respectively. The average literacy rates for scheduled castes male and female are 34.4 and 19.3 percent respectively in rural areas of the district. It is noticed that 100 percent literacy in Mahua C.D. Block is due to nominal population of a literate male and female only. The percentage literacy gap between males and females scheduled tribes is 15.1 percent in rural areas of the district.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

\+ Arranged in alphabetical order

The above table shows that the literacy rate among the scheduled tribes in the urban areas of the district is 74.8 percent. Males have a significantly higher rate of literacy i.e. 85.3 percent where as it is 63.2 percent among females. The literacy rate gap between male and female in urban areas of the district for scheduled tribes is 22.1 percent.

Among the three municipal towns of the district, Hajipur(M) has the highest literacy rate i.e. 91.1 percent among scheduled tribes. Literacy among males and females is also highest in Hajipur with 97 and 82.6 percent respectively. Lalganj(M) occupies second position in terms of literacy as total literacy rate among scheduled tribes is 71.4 percent. Male and female literacy rates in Lalganj(M) are 83.8 and 60 percent respectively. Mahnar Bazar(M) has the lowest literacy rate among scheduled tribes i.e. 10 percent only. Male literacy rate is 20 percent where as it is zero percent in case of female. The literacy rates gap in Hajipur(M), Lalganj(M) and Mahnar Bazar(M) are 14.4, 23.8 and 20 percent respectively.

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 32 shows that the work participation rate (WPR) in Vaishali district for rural areas is 23.1 percent as main workers and 6 percent as marginal workers. Proportion of non workers in the district is 70.9 percent. The proportion of total workers is 29.1 percent in rural areas of the district. These figures for total areas including urban as well as rural as per table 31 are more or less the same as table 32.

Among the main workers, male work participation rate in the district is 39.3 percent while that of female is only 5.5 percent as per table 32. The proportion of main workers is the highest i.e. 24.8 percent in C.D. Block Goraul and the lowest i.e. 21.1 percent in C.D. Block Sahdai Buzurg. Proportions of main workers in C.D. Blocks Desri, Bidupur and Hajipur are 21.2, 21.5 and 21.8 percent respectively. Out of 16 C.D. Blocks in the district, the WPR for main workers is higher than the district average in 8 C.D. Blocks.

The proportion of marginal workers is the highest i.e. 6.6 percent each in C.D. Blocks Paterhi Belsar and Patepur and the lowest i.e. 5.2 percent each in C.d. Blocks Goraul and Mahnar. The proportion of total workers is the highest i.e. 30.8 percent in C.D. Block Jandaha followed by C.D. Blocks Vaishali, Paterhi Belsar and Patepur with 30.6, 30.6 and 30.4 percent respectively. The lowest proportion of total

workers is 26.8 percent in C.D. Blocks. Desri and it is 26.9 percent in C.D. Bidupur.

The proportion of non workers among males in the district is 54.5 percent while for females it is 88.7 percent. Total non workers in the district stand at 70.9 percent of the total population. Among C.D. Blocks the proportion of non workers is highest i.e. 73.2 percent in C.D. Block Desri followed by Bidupur with 73.1 percent. The proportion of non workers is lowest i.e. 69.2 percent in C.D. Block Jandaha.

\+ Arranged in alphabetical order

There are three Municipal towns and no urban agglomeration in Vaishali district. The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. The total work participation rate for the urban areas of the district shown above is 25.1 percent of the total urban population. Male and female total W.P.R. for the district Municipal areas as a whole are 42 and 6 percent respectively. The work participation rate for main and marginal workers are 21.4 and 3.6 percent respectively. Proportion of male workers both as main and marginal workers are higher than those of females. The proportion of non-workers in municipal areas of the district is 74.9 percent and in this case females outnumber males as there are 94 percent female 58 percent males non-workers in urban areas of the district.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D.BLOCKS, 2001

Note: Percentage of Workers to total workers are given in brackets

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification, namely, cultivators, agricultural labourers, household industry works and other workers. The economic activity in the rural and urban areas in the district in the rural and primarily dependent on agricultural which is pop ported by the fact that the cultivators (31 percent) and agricultural labourers (41.6 percent) together constitute 72.6 percent of the total workers of the district. The agricultural sectors has observed about three fourth of the total works force in the district. The proportion of cultivators varies between 44.3 percent for Raghopur C.D. Block to 17.8 percent for Hajipur C.D. Block. Proportion agricultural labourers varies between 50.4 percent for Patepur C.D. Block to 30.2 percent for Hajipur C.D. Block. The proportion of household industry workers is only 4.2 percent of the total workers of the district. Its proportion among C. D. Blocks varies from 5.4 percent in C.D. Block Hajipur to 2.2 percent in C.D. Bock Raghopur. The proportion of other workers is 23.2 percent of the total workers of the district. Among C.D. Blocks, its proportion varies form 46.6 percent in Hajipur to 13.3 percent in C.D. Block Raghopur. Sexwise distribution of workers can also be viewed in table 34. Figures for C.D. Blocks lalganj , Hajipur and Mahnar Bazar include information recording urban areas also.

Note: Percent of Worker to total workerre given in brackets

The data presented in table above are almost same as those of table 34 with the only difference that table 35 present information for rural areas only where as table 34 include information regarding urban areas of the district also. Such differences can be observed only in C.D. Block Lalganj, Hajipur and Manhar Bazar only as these C.D. Blocks have urban areas also.

The economic activity in the rural areas of the district is primarily dependent on agricultural which is supported by the fact that the cultivators (32.5 percent) and agricultural labourers(42.9 percent) together constitute 75.4 percent of the total workers of the district. It is evidently clear that agricultural sectors has absorbed more than three fourths of the total workers in the district. The proportion of cultivators varies form 44.3 percent in C.D. Block Raghopur to 23.1 percent in C.D. Block Hajipur.

The proportion of agricultural labourers varies form 50.4 percent in C.D. Block Patepur to 36.4 percent in C.D. Block Raja Pakar. The proportion of household industry workers is only 4 percent in the district the distribution of which in C.D. Blocks varies from 5.3 percent in C.D. Block Chehra Kalan to 2.2 percent in C.D. Block Raghopur. The proportion of other workers in the district is 20.5 percent which in various C.D. Blocks varies form 34.8 percent in C.D. Block Hajipur to 13.3 percent in C.D. Block Raghopur.

Note : Percentage of workers to total workers are given in brackets

\+ Arranged in alphabetical order

There are three municipal towns and no urban agglomeration in the district of Vaishali. From the table above the relative importance of the main spheres of economic activity may the gauged by giving a glance to the distribution of total workers into 4 broad categories such as cultivator, Agricultural labourers household industry workers and other workers in urban areas of he district. The cultivators constitute 6.5 percent of the total workers in urban areas of the district. The highest proportion of cultivator is 7.7 percent in Mahnar Bazar(M) where as it is lowest at 5.9 percent in Lalganj(M). The proportion of agricultural labourers is 22 percent in urban areas of the district. Mahnar Bazar(M) has 38.8 percent where as Hajipur(M) has only 15.5 percent agricultural labourers. About equal proportion of male and female cultivators can be deserved in urban area of the district. Where as in case of agricultural labourers the proportion of female (34.6 percent) is more than males (20.4 percent. more than 6 percent of the total workers in the district in the towns engaged in household industry. 5.3 out of which percent males and 12.8 percent females are working in such industries in the towns. 5 to 7 percents of the total workers in these municipal towns are engaged in household industries. Other workers constitute 65.3 percent of the total workers of those Municipal towns. The proportion of male and female other workers are 67.7 and 46.2 percent respectively. The highest proportion of other workers i.e. 71.9 percent can be observed in Hajipur(M) where as it is lowest i.e. 48.4 percent in Mahnar Bazar(M).

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table above gives the distribution of villages according to the availability of different amenities in the district.

Educational facilities :- There are as many as 966 villages accounting for 68.3 percent of the total number of inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D. Block Mahnar with 84 percent closely followed by C.D. Block Jandaha with 80.9 percent. The smallest proportion of villages with educational facility is observed in C.D. Block Hajipur with 57 percent.

Medical facilities :- The availability of medical facility in the villages is quite low as only 10.9 percent of total inhabited villages in the district have it. Among the C.D. Blocks, Mahnar has the largest proportion of villages with medical facility, the percentage being only 32 percent. It is followed by C.D. Block Jandaha with 30.4 percent. C.d. Block Raja Pakar, on the other hand has the lowest proportion of villages i.e. 1.5 percent where medical facilities is available.

Improved drinking water :- There are as many as 98.7 percent of the total inhabited villages in the district where improved drinking water facility is available. Among the C.D. Blocks, Vaishali. Paterhi Bazar, Patepur, Jandaha, Raghopur and Mahnar have 100 percent villages with improved drinking water facilities. C.D. Block Desri on the other hand has the lowest i.e. 92.3 percent of its villages where such facilities are available.

Post office :- Postal facilities are available only in 17.2 percent of the total inhabited villages of the district. C.D. Block Mahnar has the highest i.e. 30 percent proportion of such villages where postal facility is available. C.D. Block Raja Pakar, on the other hand has only 10.4 percent of such villages where post office is available.

Telephone :- The availability of telephone facility in the villages is quite low as only 18.7 percent of total inhabited villages of the district has got it. Among C.D. Blocks, Bidupur has got the maximum proportion of villages i.e. 31.3 percent which have telephone facility in the district. C.D. Block Patepur on the other hand has the lowest proportion i.e. 4.3 percent of villages which have this facility. C.d. Block Raghopur has got no village having telephone facility.

Transport and Communication :- Transport and communication facilities are available only in 12.7 percent of the total inhabited villages of the district. C.D. Blocks Raghopur and Desri have the highest proportion of such villages i.e. 33.9 and 33.3 percent respectively. C.D. Block Bidupur, on the other hand has lowest proportion i.e. 3.5 percent of such villages having this facility.

Bank :- Banking facility is available only in 5.7 percent of the inhabited villages of the district. Among C.D. Blocks, Desri has the maximum proportion i.e. 12.8 percent of such villages which have Banking facility in the district. It is followed by Mahnar with 10 percent of such villages. The lowest proportion of such villages with 2.1 percent have been observed in C.D. Blocks Paterhi Belsar and Sahdai Buzurg in the district.

Agricultural credit societies :- Agricultural credit societies are available only in 9.3 percent of the total inhabited villages of the district. C.D. Block Vaishali has the highest proportion of such villages i.e. 19.6 percent having an agricultural credit society. C.D. Block Chehra Kalan on the other hand, has got only 4.1 percent of its villages with such facility. C.D. Blocks Paterhi Belsar, Desri and Sahdai Buzurg have got no village having such society.

Approach by pucca road :- This facility is available to 44.3 percent of the total inhabited villages of the district. Among C.D. Blocks, Desri has the highest proportion of such villages i.e. 82.1 percent followed by Bidupur with 68.7 percent. The lowest proportion of such villages having approach by pucca road is 6.8 percent in C.D. Block Raghopur.

Power supply :- Electrified villages in the district constitute 68.6 percent of the total inhabited villages of the district. Among C.D. Blocks, Hajipur has got 90.1 percent of its villages electrified followed closely by C.D. Block Lalganj with 88 percent of such villages. C.D. Block Sahdai Buzurg, on the other hand has got only 12.8 percent of its villages electrified.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from the table above that educational facility is available to 88.4 percent of the rural population of the district. Its proportion varies from a maximum of 97.7 percent in Raghopur C.d. Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 68.3 percent vide table 37) than the proportion of rural population which is as high as 88.4 percent. This may be attributed to the fact that comparatively larger and densely / populated villages other than small and thinly populated ones possess educational facility.

This may be attributed to the fact that usually this facility is available to larger/densely populated villages rather than to smaller and thinly populated ones in the district.

In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 23.8 percent which is more than the proportion of villages curved by medical facility in the district. However among various C.D. Blocks the its proportion of varies from maximum of 70.3 percent in C.D. Block Raghopur to a minimum of 0.5 percent in C.d. Block Raja Pakar.

In case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 98.6 percent which is almost of the same proportion of villages served by this facility in the district.

A similar trend can be observed in respect of other amenities also both in the district as also in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	459	19	7	485
(b) Middle School	1,016	89	15	1,120
(c) Degree College	415	433	552	1,400
2. Medical:-				
(a) Hospital	429	365	598	1,392
(b) PHC	590	344	451	1,385
3. Post Office	1,066	75	30	1,171
4. Telephone	675	274	200	1,149
5. Bus Service	598	305	370	1,273
6. Banks				
(a) Commercial Bank	967	243	130	1,340
(b) Co-operative Bank	329	390	680	1,399
7. Agricultural Credit Societies	850	271	162	1,283

As regards educational facility it would be seen that there are 485 villages in the district which do not have any primary school but the facility is available at places situated within 5 kms for 459 villages at 5-10 kms for 19 villages and at 10+ kms for 7 villages. There are 1120 villages in the district which do not have middle school but the facility is available at places situated within 5 kms for 1016 villages, at 5-10 kms for 89 villages and at 10+ kms for 15 villages. As many as 1400 villages out of 1414 inhabited villages in the district do not have a Degree College but it is available at a distance of less than 5 kms for 415 villages, within 5-10 kms for 433 villages and at a distance of 10 and more kms for 552 villages.

There are 1392 villages in the district which are without the facility of Hospital but for 429 villages this facility is available within 5 kms, for 365 villages it is available at a range of 5-10 kms and for 451 villages it is available at a distance of more than 10 kms.

As many as 1385 villages in the district are such

which do not have a Primary Health Centre but the same is available within 5 kms for 590 villages at a distance of 5-10 kms for 344 kms and for 451 villages it is available at a distance of 10 kms and more.

Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited village in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road

	(100.0)	**(68.3)**	**(10.9)**	**(17.2)**	**(18.7)**	**(12.7)**	**(5.7)**	**(9.3)**	**(44.3)**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the table that the maximum number of inhabited villages i.e. 724 lie in the distance range of 16-50 kms from the nearest statutory town. This is followed by villages (being 631) in the distance range of 5-15 kms. 54 villages are at a distance of less than 5 kms and only 5 villages are at a distance of 51 and more kms from the nearest statutory town.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 64.8 percent for those situated within 5 kms from the nearest town and it increases to 71.5 percent in the distance range of 16-50 kms. 65 and 60 percent villages having educational facility lie at a distance of 5-15 and 51+ kms respectively from the nearest statutory town.

In case of other amenities (except approach by pucca road) also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It can be seen from the table that the maximum number of villages i.e. 377 and 332 fall in the population range of 1000-1999 and 1 to 499 respectively. These followed closely by 319 and 297 villages having a population range of 2000-4999 and 500-999 respectively. 75 villages fall in comparatively higher range of population 5000-9999 and the lowest number of villages i.e. 14 are deserved in the population range of 10,000 and above.

The proportion of villages having different amenities mostly varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10000+ which further corroborates the fact that more facilities are generally available in larger and populous villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Vaishali	112	12,556	68.7	31.1
2	Paterhi Belsar	48	7,419	76.1	19.5
3	Lalganj	92	14,094	66.3	37.2
4	Bhagwanpur	99	11,574	75.3	57.2
5	Goraul	84	9,832	76.6	53.1
6	Chehra Kalan	49	6,770	76.2	67.8
7	Patepur	138	24,246	85.9	60.6
8	Mahua	128	13,687	84.8	54.8
9	Jandaha	115	14,761	72.2	38.2
10	Raja Pakar	67	7,445	75.0	43.4
11	Hajipur	172	12,560	77.3	62.1
12	Raghopur	59	20,996	33.0	19.1
13	Bidupur	115	10,565	65.4	40.8
14	Desri	39	4,164	81.8	69.7
15	Sahdai Buzurg	47	5,925	77.6	61.7
16	Mahnar	50	6,949	83.0	35.3
	District Total:	**1,414**	**183,543**	**71.4**	**47.8**

Table 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It would be seen from the table that 71.4 percent of the total area of the district is utilized for cultivation (cultivable area) and of this 47.8 percent area is found to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in C.D. Block Patepur with 85.9 percent closely followed by C.D. Block Mahua with 84.8. The lowest cultivable area is found in C.D. Block Raghopur which is 33 percent only.

The highest proportion of irrigated area is 69.7 percent to total cultivable area found in C.D. Block Desri, followed closely by C.D. Block Chehra Kalan with 67.8 percent. The least proportion of irrigated area is found in C.D. Blocks Raghopur and Paterhi Belsar with 19.1 and 19.5 percent respectively.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Hajipur (M)	5.5	0.9	4.7	4.0	3.9	0	0	0	0.1
2	III Lalganj (M)	5.2	0.4	4.7	5.2	5.2	0	0	0	0
3	III Mahnar Bazar (M)	5.1	0.2	4.9	5.1	5.1	0	0	0	0
	District Total	**5.4**	**0.7**	**4.7**	**4.4**	**4.3**	**0**	**0**	**0**	**0.1**

The table above gives the details of finances in the statutory towns in terms of percapita receipt and expenditure. There are three statutory towns in Vaishali district and the total percapita receipt from taxes and other sources are highest in Hajipur Municipality where as Mahua(M) has the lowest percapita receipt both from taxes and others sources. Regarding percapita expenditure, Lalganj(M) has the highest total percapita expenditure followed by Mahnar Bazar(M). Hajipur, on the other hand has lowest total percapita expenditure. Going into details of expenditure it can be observed that General Administration is the major head of percapita expenditure in all the statutory towns and among there, Lalganj is on the top followed closely by Mahnar Bazar(M). Hajipur(M) has the lowest percapita expenditure on general administration but it has some other expenditure also which is not the case with other statutory towns.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Hajipur (M)	1.2	1.8	0.5	0.1	0.5
2	Lalganj (M)	2.0	3.0	0.7	0	1.0
3	Mahnar Bazar (M)	1.9	1.3	0.5	0	0.3
	District Total	**1.4**	**1.9**	**0.5**	**0.1**	**0.5**

The table above gives the details of different categories of educational institutions per ten thousand population in Municipal towns of the district. It would be seen from the table that institutions like primary school and middle schools account for an average of 1.4 and 1.9 for every ten thousand population. The average number of higher institutions like secondary/ matriculation, senior secondary and college stand at 0.5, 0.1 and 0.5 for every 10,000 population in the statutory towns of Vaishali district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Hajipur(M)	10
2	Lalganj(M)	10
3	Mahnar Bazar(M)	2
	Distrct Total	**8**

The table above furnishes information regarding availability of bed in medical institutions in Municipal towns of the district. There are 8 beds available in the medical institutions of the municipal towns of the district, for every ten thousand population. Among towns under consideration Lalganj has 10, Hajipur has also 10 and Mahnar Bazar has only two beds for every ten thousand population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Hajipur	119,412	14,500	12.1
2	Lalganj	29,873	17,887	59.9
3	Mahnar Bazar	37,370	1,461	3.9
	District Total	**186,655**	**33,848**	**18.1**

The table above presents number and proportion of slum population for each municipal towns of the district. On the average, 18.1 percent of the total statutory urban population is recorded as slum population. Lalganj(M) has the highest proportion i.e. 59.9 of percent its total population recorded as slum population followed by Hajipur(M) with 12.1 percent and Mahnar(M) with 3.9 percent.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Hajipur (M)	Furniture	Banana
			Lichi
			Guava
2	Lalganj (M)	Furniture	Furniture
		Tabacco	Tobacco
			Oil Seeds
3	Mahnar Bazar (M)	Colour	Tobacco
		Tobacco	Onion
		Saline Water	Colour

The table above presents the list of important commodities manufactured in and exported out of the Municipal towns of the district. It can be observed that only Furniture is manufactured in Hajipur(M) and fruits like Banana, Lichi and Guava are grown and exported out to other places. Lalganj(M) manufactures furnitures and tobacco and it exported these items alongwith oil send also, color, tobacco and shine water are manufactured in Mahnar Bazar(M) and besides tobacco and color, onion are also exported out to other places.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 shows that there are as many as 413089 households accounting for 97.8 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in single room is highest (46.9 percent) where as lowest (1.5 percent) for those dwelling in no exclusive room. The median number of rooms is 2 for the total households in the tenure status of owned dwellings.

There are 96724 scheduled castes households accounting for 23.4 percent of the total households dwelling in owned houses and the median number of room is 1. There are 1521 scheduled tribes households accounting for only 0.4 percent of the total households dwelling in owned houses and the median number of room is 2.

There are 5533 households accounting for 1.3 percent of the total households of the district dwelling in rented houses. The proportion of households dwelling in single room is highest (40.7 percent) where as it is the lowest (1.9 percent) for those dwelling in no exclusive room under this tenure status. There are 680 scheduled castes households accounting for 12.3 percent of the total households dwelling in rented houses and the median number of room is 2. There are 86 scheduled tribes households accounting for 1.6 percent of the total households of the district dwelling in rented houses and the median number of room is 2.

Similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

	District Total:	**50.2**	**24.0**	**25.8**	**48.8**	**24.1**	**27.0**	**70.1**	**22.5**	**7.4**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roof are made of pucca materials i.e. where burnt bricks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roof made of Kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the table above that of the total rural households, maximum proportion of households i.e. 48.8 percent live in permanent houses followed by 27 percent living in temporary and 24.1 percent living in semi permanent houses in rural areas of the district.

In case of urban households in the district, also the maximum proportion of households i.e. 70.1 percent live in permanent houses followed by 22.5 percent households living in semi permanent houses. In urban areas of the district only 7.4 percent of the total household live in temporary houses. The percentage distribution of total households living in permanent, semi permanent and temporary houses in Vaishali district stand at 50.2, 24 and 25.8 percent respectively.

Among the C.D. Blocks of the district, Hajipur has the maximum proportion of rural households living in permanent houses (58.4 percent) followed by Bidupur (57.8 percent). The minimum proportion of rural households living permanent houses is 25.8 percent in C.d. Block Raghopur. In case of semi permanent houses in rural areas maximum of 39 percent of the households in C.D. Blocks Desri and the least proportion (15.2 percent) of households in C.D. Block Bhagwanpur live in semi permanent houses. A maximum of 47.4 percent and minimum of 8.8 percent rural households in C.D. Blocks Paterhi Belsar and Bidupur respectively live in temporary houses.

Regarding urban areas, 71.8 percent of the households in Hajipur live in permanent houses followed by Mahnar and Lalganj(M) with 67.6 and 66.4 percent respectively. In case of semi permanent houses, 27.8 percent of households in Mahnar 21.8 percent in Hajipur and 18.1 percent households in Lalganj live in such houses. In case of temporary houses, a maximum of 15.5 percent of households in Lalganj, 6.3 percent in Hajipur and 4.6 percent households in Hajipur and 4.6 percent households in Mahnar urban area live in such houses.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table 50 shows that of the total rural households, 274142 i.e. 69.3 percent have the improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in C.D. Block Raghopur

with 88 percent where as it is lowest in C.D. Block Bidupur with 40.3 percent.

Regarding electricity it is found that only 6.8 percent of the rural households in the district have electricity. The highest proportion of households with electricity is in Hajipur C.D. Block with 18.4 percent where as it is lowest in C.D. Block Jandaha with 1.2 percent.

Only 6.1 percent of the total rural households in

the district have bathroom facility. The highest proportion of households having bathroom facility is 9.8 percent in C.D. Block Hajipur where as it is lowest i.e. 2.6 percent in C.D. Block Raghopur.

Only 16.9 percent of the total rural households have toilet facility in the district. The highest proportion of this facility is 24.1 percent in C.D. Block Hajipur where as it is lowest i.e. 9.9 percent in C.D. Block Raghopur.

Only 35.3 percent of the total rural households in the district have drainage facility. The highest proportion of this facility is in C.D. Block Vaishali with 51.0 percent where as it is lowest in C.d. Block Chehra Kalan with 14.6 percent.

More or less a similar trend can be observed for urban areas of the district also.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 51 shows that 41.4 percent of the total rural households use firewood for cooking. The highest proportion of households using firewood as fuel for cooking is in C.D. Block Vaishali with 54.4 percent where as it is lowest i.e. 11.5 percent in C.D. Block Raghopur.

Around 40 percent of the total rural households in the district use crop residue as fuel for cooking purposes. The highest proportion of households using crop residue is 62.4 percent in C.D. Block Chehra Klan where as it is lowest i.e. 23.1 percent in C.D. Block Raghopur.

More than 14 percent of the total rural households in the district use cowdung cake as fuel for cooking. Among the C.D. Blocks, the proportion of households using cowdung cake as fuel for cooking is highest i.e. 63.7 percent in C.D. Block Raghopur where as it is lowest i.e. 5 percent in C.D. Block Lalganj.

Only 0.2 percent of the total rural households use either electricity, coal/lignite(charcoal) or kerosene as fuel for cooking. Only 0.1 percent of the total rural households use bio-gas as fuel for cooking in the district. Cooking gas (LPG) is used by 1.4 percent of the total rural households as fuel for cooking purposes and its proportion is highest i.e. 4.6 percent in C.D.

Block Hajipur where as it is lowest i.e. 0.2 percent in C.D. Block Raghopur.

only 2.5 percent of the total rural households in the district use other types of fuel for cooking purposes and 0.1 percent of rural households in the district do no cooking work.

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It would be seen from the table above that there are 110,309 households accounting for 26.1 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in C.D. Block Hajipur with 38.7 percent where as the same is lowest i.e. 7.1 percent in C.D. Block Raghopur. There are 130,750 households accounting for 31 percent of the total households in the district possessing radio/ transistor. In this regard the highest proportion of households is in C.D. Block Hajipur with 35.5 percent where as it is lowest in C.D. Block Raghopur with 16.8 percent.

49,808 households accounting for 11.8 percent of the total households in the district possess televisions. In this regards the highest proportion of households is 25.8 percent in C.D. Block Hajipur where as it is lowest i.e. 4.2 percent in C.D. Block Raghopur.

Regarding telephone there are only 7,847 households accounting for 1.9 percent of the total households in the district which have telephone services. In this regard the highest proportion of households is 6.2 percent in C.D. Block Hajipur where as it is lowest i.e. 0.7 percent in C.d. Block Raghopur.

237,146 households accounting for 56.1 percent of the total households in the district possess bicycles. In this regard the highest proportion of households is 62.6 percent in C.D. Block Mahua where as it is lowest i.e. 32.7 percent in C.D. Block Raghopur.

21,607 households accounting for 5.1 percent of the total households in the district possess scooter, motorcycle moped. Its highest proportion (10.3 percent) can be observed in C.D. Block Hajipur where as it is lowest i.e. 1.3 percent in C.D. Block Raghopur.

Car, Jeep or van are owned by 5,175 households accounting for only 1.2 percent of the total households in the district. It proportion is highest again in C.d. Block Hajipur which is 2.3 percent where as it is lowest is 0.7 percent in C.D. Block Raghopur.

However, still sizeable chunk of 37.1 percent of the total households in the district are such who possess none of these specified assets.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

Hajipur subdivision of the old district of Muzaffarpur was upgraded and acquired the status of an independent district on 2nd October, 1972 consisting of three subdivisions viz., Hajipur, Mahua and Mahnar and 16 development blocks, viz. Hajipur, Lalganj, Vaishali, Goraul, Mahua, Patepur, Jandaha, Mahnar, Sahdai Buzurg, Desari, Bidupur, Patedhi Belsar, Bhagwanpur, Chehra Kalan, Raja Pakar and Raghopur. The three towns in the district are Hajipur (M) Lalganj (M) and Mahnar Bazar (M).

No major social or cultural event has taken place in the new district of Vaishali since it came into existence. Fairs and festivals are however, held regularly in the district by different communities in complete harmony.

(ix)Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Balu Karam

It is an ancient village in Vaishali block, situated on the Hajipur-Vaishali road, 30 Kms. north of Hajipur. The sixth World Buddhist conference was held here.

Ramchaura

The place is situated in Vaishali block where a mela is held every year on Ramnavmi day. The local tradition has it that Lord Ramchandra had halted here for a bath on his way to Janakpur. There are some marks on stone which are said to be his foot-prints.

Konhara

A ghat at the confluence of the Gandak and the Ganges in Hajipur block. It is traditionally believed to be the place where the mythical elephant was caught by a crocodile and Lord Vishnu got it released.

Jandaha

The village, which is situated about 7 Kms. from th railway station at Mahnar, is the headquarters of the block bearing the same name. The village contains a mazar of Hazrat Saheb Saib, said to be about 400 years old.

Vaishali

The village is the headquarters of the block of the same name and is situated at distance of 32 Kms. north-west of Hajipur. It is said to be the birth place of Mahavir, the 24th Tirthankar of Jainism. It was visited by Lord Buddha thrice and was the site of the second great Buddhist council. Lord Rama on his way to Janakpur had spent a night here as the guest of the King of Vaishali. Many seals and coins of the Gupta period have been found here. The remains of a huge mound known locally as the fort (garh) of Raja Vishal are also found here.

Vaishali Museum has been built by the Vaishali Sangh at Chak Ramdas. There is a valuable collection of the local finds made through community efforts.

Hajipur

It is a municipal town situated on the eastern bank of Gandak at a short distance above its confluence with the ganga, oppostie Patna. It is the chief town and the headquarters of the Vaishali district. Haji Illyas alias Shamsuddin Illyas, the king of Bengal is reported to have founded this town.

It is believed that Lord Ramchandra passed through Hajipur on his way to Mithila. Lord Buddha also passed through this place. During Muslim rule Hajipur was an important place and there are several old mosques in the town.

(x)Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

The village is the headquarters of the block of the same name and is situated at distance of 32 Kms. north-west of Hajipur. It is said to be the birth place of Mahavir, the 24th Tirthankar of Jainism. It was visited by Lord Buddha thrice and was the site of the second great Buddhist council. Lord Rama on his way to Janakpur had spent a night here as the guest of the King of Vaishali. Many seals and coins of the Gupta period have been found here. The remains of a huge mound known locally as the fort (garh) of Raja Vishal are also found here.

Vaishali Museum has been built by the Vaishali Sangh at Chak Ramdas. There is a valuable collection of the local finds made through community efforts.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publication which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number

of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is

also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in English and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I : Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II : Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III : Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV : Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V : Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI : Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII : Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

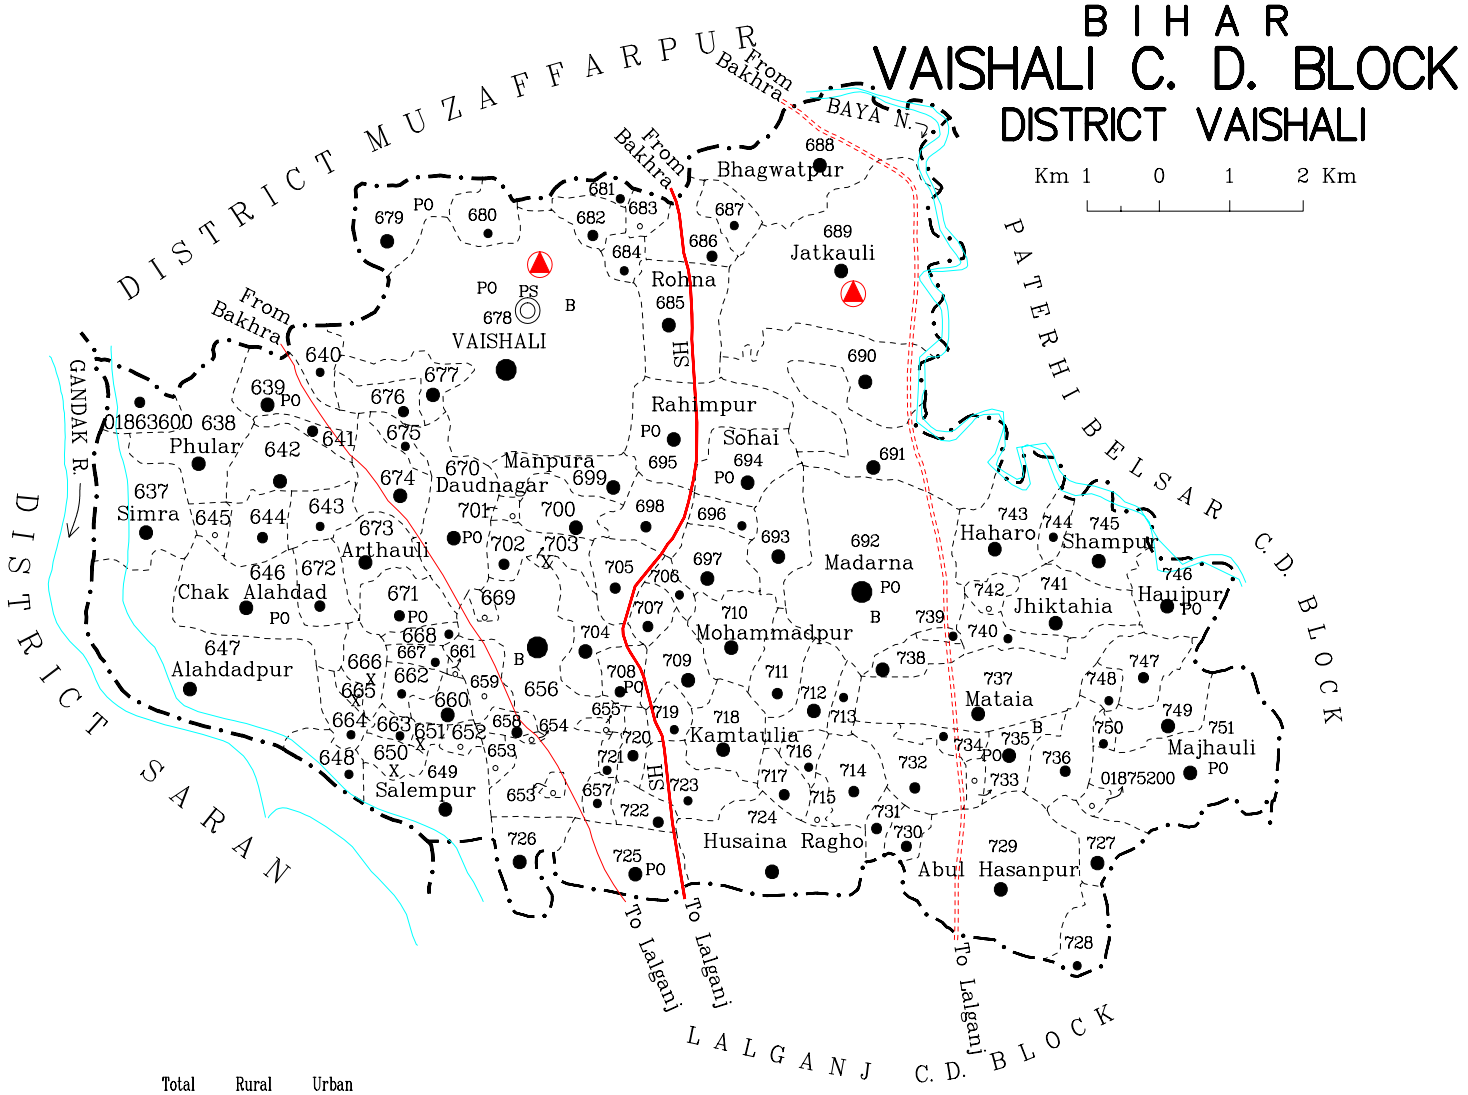

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

APPENDIX VIII - VILLAGE DIRECTORY

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT (C. D. BLOCK WISE)

Serial number	Name of Gram Panchayat and location code number	Area of Gram Panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Income and expenditure of Panchayat / Gram Panchayat (in Rs.'000)	
			Number	Location code numbers					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11
N.A.										

Note : N.A. stands for information not available.

APPENDIX IX - VILLAGE DIRECTORY

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Serial number	Name of C. D. Block	Village location code number	Name of village	Number of girls school			
				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8
N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

TOWNS SHOWING THEIR OUTGROWTHS WITH POPULATION

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
There is no outgrowth in any of the towns of Vaishali district.				

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Vaishali	1991	46	59	66	71
	1981	80	103	126	142

From the estimates of child mortality (number of deaths by ages 1, 2, 3 and 5) given in Annexure II as q(1), q(2), q(3) and q(5) it is observed that there has been decline in child mortality over decade (in 1991 Census as compared to 1981 Census) both in the district as well as the state.

An interesting feature that can be noticed from the Annexure is that the child mortality at the ages 1, 2, 3 and 5 was lower in the district compared to the state average at the time of 1991 Census. It indicates that the pace of decline in child mortality had been faster in the district vis-à-vis the state.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the districts and the state(1991-Census)	
	State	District
1	2	3
CBR	36.2	33.1
TFR	5.3	5.0
TMFR	5.9	5.5
GFR	163	154.0
GMFR	186	169.0
Child woman ratio	66.6	73.7
No. of children everz born per woman age group(45-49)	4.1	4.2
Mean age at marriage	16.5	17.7

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate(CBR), Total Fertility Rate(TFR), Total Marital Fertility Rate(TMFR), General Fertility Rate(GFR) and General Marital Fertility Rate(GMFR) are lower in Vaishali district than the state as a whole in 1991 Census.

The child woman ratio is found to be higher in Vaishali district compared to the state average. Number of children ever born per woman in age group 15-49 in Vaishali district is slightly higher compared to the state. The mean age at marriage of females in the district of Vaishali is also higher compared to the state.

State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Vaishali	7,017	1,304	5,713	307	27	280	678,573	43,436	635,137
	(1.0)	(3.0)	(0.9)	(0.0)	(0.1)	(0.0)	(100.0)	(100.0)	(100.0)

The growth of population for any area (be it any district or state) is influenced by the pattern of migration (in-migration as well as out-migration). However, for want of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population,although such impact may not be much in most of the cases.

It is apparent from Annexures IV(A) that out of 213,070,20 and 199,891,95 migrants in the State as per place of birth in 1991 and 2001 Censuses, the share of Vaishali district is 532,872 and 678,573 i.e., 2.5 and 3.4 percent respectively of state's total. Female migrants out number the male migrants both for the district and the state. In case of percentage of migrants born in Bihar there is wide gap between male and female population. With respect to percentage figures of born elsewhere in the district of enumeration the district percentages 72.5 and 77.4 are more than the state percentage of 67.8 and 68.4 respectively during 1991 and 2001 Censuses.

When we compare the percentage figures of migrants born in other districts of Bihar it is crystal clear that the district and state percentages are equal in 1991 Census whereas it is lower than the state percentage (22.7%) during 2001 Census.The percentage figures for born in other states and in other countries are lower for the district than the state in both the Censuses.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Vaishali		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	526,162	484,880	41,282
(1) within the state		(100.0)	(84.7)	(15.3)	(100.0)	(92.2)	(7.8)
	Rural	19,010,120	16,570,646	2,439,474	507,762	472,390	35,372
		(94.7)	(82.6)	(12.2)	(96.5)	(89.8)	(6.7)
	Urban	990,737	375,267	615,470	15,580	9,810	5,770
		(4.9)	(1.9)	(3.1)	(3.0)	(1.9)	(1.1)
(2) In other states of India	Total	1,049,969	575,484	474,485	5,860	5,020	840
		(100.0)	(54.8)	(45.2)	(100.0)	(85.7)	(14.3)
	Rural	800,601	512,444	288,157	4,320	3,780	540
		(76.2)	(48.8)	(27.4)	(73.7)	(64.5)	(9.2)
	Urban	243,448	60,040	183,408	1,450	1,180	270
		(23.2)	(5.7)	(17.5)	(24.7)	(20.1)	(4.6)

Of the total intra-state migrants in the state 82.6 percent were rural to rural, 3.7 percent were from urban to urban, 12.2 percent were from rural to urban and 1.9 percent from urban to rural. In the case of Vaishali district, of the total intra-state migrants, 89.8 percent were from rural to rural, 1.1 percent were from urban to urban, 6.7 percent were from rural to urban and 1.9 percent from urban to rural.

In the case of migrants from other states, 48.8 percent were from rural to rural, 17.5 percent were from urban to urban, 27.4 percent were from rural to urban and only 5.7 percent from urban to rural for the state of Bihar. In the case of Vaishali district, on the other hand, of the total migrants, 64.5 percent were from rural to rural, 4.6 percent were from urban to urban, 9.2 percent were from rural to urban and 20.1 percent from urban to rural.

Annexures IV(C) deals with interstate migrants to the district of Vaishali and the state of Bihar. The district received only 0.6 and 0.4 percent of the migrants respectively from outside the state in comparison to total migrants coming to state in 1991 and 2001 Censuses. The State of West Bengal is major contributor as regards immigration, both in the case of district and the state in 1991 Census whereas State of Jharkhand and Uttar pradesh which are the major contributor as regards immigration in the case of district and the staterespectively in 2001 Census. West Bengal which comes after Jharkhand contributes 20.8 percent of total immigrants coming from outside the state to the district in 2001 Census.

Annexures V(A) and V(B) above show religionwise distribution of population of 1991 and 2001 Census. Both, for the state of Bihar and Vaishali district, Hindus form great chunk of society with 82.4 percent and 90.5 percent in 1991 Census and with 83.2 percent and 90.4 percent in 2001 Census respectively. The percentage of Hindu population is lower in the state than the district whereas in case of Muslim the percentage in the district is also lower than the state in both the Censuses. It is apparent from Annexure V(B) that Patepur C.D.Block has highest proportion (17.3%) of Muslims during 1991 Census whereas Chehra Kalan has the highest proportion (25.9%) of Muslims during 2001 Census. The proportion of population of other religious communities is almost negligible in the district of Vaishali and its C.D. Blocks.

ANNEXURE - VI (A)

It is quite evident from above annexures that Vaishali district as well as the state have a relatively higher proportion of never married males and married females both in 1991 and 2001 Censuses. This may be attributed to the fact that women enter into marital knot at comparatively younger ages than males. As against 54.2 and 56.0 percentages of never married males in 1991 and 56.3 and 56.7 in 2001 Census in Bihar state and Vaishali district respectively, the corresponding percentages among females in 1991 are 45.2 and 44.7 and 47.3 and 46.2 percent in 2001. The state has slightly higher proportion of male and female widowed than the corresponding figures for Vaishali district in 1991 and 2001 Censuses.

While analyzing marital status by broad age groups one finds that married females outnumber married males in the age group 10-14 both in the year 1991 and 2001 suggesting that child marriage among females is more prevalent than males. However, it is interesting to note that the proportion of married males and females in the age group 10-14 or 0-14 is comparatively less in Vaishali district and it is true for both 1991 and 2001 Censuses. It is also found that child marriage is more prevalent in rural areas of the state and the district than urban areas.

It is also significant to note that the proportion of never married females in Vaishali district and state as a whole in the age group 15-19 and above is much lower than the never married males. The proportion of divorced or separated males and females is almost negligible in Vaishali district as also in Bihar state and are true for both 1991 and 2001 Censuses.

Literacy is one of the important demographic characteristics. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the Census has already been explained in the beginning of this publication.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 Census was 38.5 percent. Now it has risen to 47.0 percent in 2001 Census. The corresponding propotions for Vashli district in 1991 and 2001 are - 40.6 and 50.5 percent respectively.

Annexures VII(A),VII(B),VII(C) and VII(D) furnish informations regarding absolute number of

illiterates and literates in Bihar state and Vaishali district as also percentage distribution of literates by different level of education by different age-groups in 1991 and 2001 Censuses.

A break up of literate population by various educational level (of 1991 Census) show that 20.3 percent males and 27.2 percent females in the state are literate but have not attained any educational level. These proportins have risen to 28.4 and 35.8 percent (including Below Primary)for males and females respectively in the state in 2001Census. It can be also seen from the Annexures that more or less same trend prevails in Vaishali district during 1991 and 2001 Censuses. It is interesting to see that at lower levels of education (up to 'Primary') the female's proportions are on higher side than the male's proportions in state as well as in the district in both the Censuses.

According to 1991and 2001 Census the position of literates by different level of education in Vaishali district is more or less the same as observed in case of Bihar.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Vaishali		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Hindi	692,620	25.5
Hindi	14,524,035	17.5	Urdu	195,616	7.2
Magadhi/Magahi	12,132,383	14.6	Magadhi/Magahi	3,394	0.1
Maithili	11,830,684	14.3	Maithili	3,082	0.1
Urdu	9,457,544	11.4	Bhojpuri	2,175	0.1

Marwari	27,152	0.0	Kurukh/Oraon	176	0.0
Total of other mother tongues	12,842,100	15.5	Total of other mother tongues	1,818,966	66.9
Total Population	**82,998,509**	**100.0**	**Total Population**	**2,718,421**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Vaishali district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Vaishali 7.2 percent of the district population have returned it as their mother tongue. Hindi as mother tongue has been returned by 25.5 percent of Vaishali district's population. Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per 2001 Census. However, in the district other mother tongues together constitute 66.9 percent of the total population of the district.
