Sugarcane Research Institute, Pusa

In Bihar, Sugarcane Research Institute was established in 1932 at Musahari in Muzaffarpur district. The Institute was shifted to Pusa in 1936 after the earthquake of 1934.

More than 100 diseases resistant varieties of sugarcane have been developed by the Institute. For getting best yields from these varieties advanced techniques regarding suitable vegetation system, use of balanced quantity of fertilizers and manures according to soil, suitable managements of insects etc. have also been developed by the Institute.

Urban Primary Census Abstract 814

Annexure I : Number of Villages under each Gram Panchayat 823

Annexure II : Estimates of child mortality, 1981 and 1991 Census 832

Annexure III : Various measures of fertility and mean age at marriage 1991 Census 833

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 Census & 2001 Census 834

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 Census & 2001 Census 839

Annexure VI : Marital status of population as per 1991 Census & 2001 Census 848

Annexure VII : Age, sex and education in the district, 1991 Census & 2001 Census 864

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 872

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of ‘notified slums’. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two

other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census

Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

Deputy Director of Census Operations,
Bihar, Patna

District Highlights – 2001 Census

1. Samastipur 6th in terms of population (33,94,793) and 14th in terms of area (2,904 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Samastipur is the 10th densely populated district in the state with 1,169 persons per sq.km as against the state's 881.
3. Samastipur ranks 10th in terms of sex-ratio (928) against the state's 919.
4. There are 126 uninhabited villages (out of 1,248 total villages) in the district of Samastipur.
5. Bibhutipur (under Bibhutpur C.D. Block) is the most populated village (26,595) and Bhatgawan (under Hasanpur C.D. Block) is the least populated village (1) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 70% of the total workers are engaged in Primary sector.
7. C.D. Block Kalyanpur has the highest number of villages (153) in the district and C.D. Block Mohanpur has the lowest number of villages (33).
8. Raspur Patasia (under Mohiuddinagar C.D. Block) has the largest area (3,476 hectare) and Ram Paran Andar (under Kalyanpur C.D. Block) and Surajpur (under Ujiarpur C.D. Block) have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 99.0 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer

remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Before acquiring the status of a district on 14th November, 1972, Samastipur happened to be a subdivision of Darbhanga district since the formation of Tirhut Division in 1908. The district is bounded on the north by the Bagmati river, which separates it from Darbhanga district, on the west by Vaishali district, on the south by the Ganges, and on the east by Begusarai and Khagaria districts.

Samastipur district consists of four subdivisions, viz., Samastipur Sadar Subdivision, Rosera Subdivision, Dalsinghsarai Subdivision and Patori Subdivision comprising Sadar Subdivision 8 Community Development Blocks, Rosara Subdivision 6 Community Development Blocks and rest two Subdivisions compirising 3 each Community Development Blocks.

The history of Samastipur district has close association with that of old Darbhanga , its parents district.

The district comprises the greater parts of the ancient territory of Mithila. Its legandary history goes back to the Ramayana and Mahabharat periods. According to the accounts in the Vedic literature, the Videhas of the Aryan stock first migrated to the area from the Banks of the Saraswati in the Punjab. Legendary association of the old Darbhanga district with the Pandavas is evidenced by the belief that they stayed in Pandaul village (now part of Madhubani district) during a part of their period of exile.

In course of time the Videhan monarchy is believed to have been replaced by the Sangha or federation in the form of a republic. The establishment of the vrijian republic (of which Videha was a part) marks the

beginning of the historic period. The centre of power had, however, shifted to Vaishali and Lichchhavis were the most prominent amoung the different clans that constituted the confederation. The ascendancy of vrijian republic was checked by Ajatshatru, emperor of magadh, who subdued and extended his control over the north Bihar.

Matrimonial alliances with the Lichchhavis enabled the Guptas of Magadh to regain control over north Bihar which came to be known as Tirabhukti. Vaishali was the administrative headquarters of the Tirabhuktl region. The chinese pilgrim, Fa-hien visited north Bihar during the reign of Chandragupta II. He observed that Buddhism was no longer as flourishing as in the past. The earlier renown of Darbhanga (old Darbhanga which included Samastipur also) as the place of philosophers continued in the Gupta period as well. Kumarila Bhatt was a prominent philosopher. With the decline of the Gupta Empire, local autonomy reasserted itself. Later, Harshavardhana (606-648 A.D.) annexed Darbhanga. Hiuen Tsang visited the area in 635 A.D. After the death of Harshavardhana, due to friction with a Chinese mission, Tirhut was invaded and occupied by the combined forces of Tibet and Nepal. They were, however, driven off by Adityasena (672 A.D.). After the fall of the later Guptas, Yasovarman of Kannauj (700-740 A.D.) ruled over the area. Tirhut came under the Pala kings of Bengal in the 9th century. The Karnata or Simraon dynasty was founded in 1097 by Nanyadeva who had to face conflict with the Senas of Bengal.

Medieval Period

Nanyadeva became very powerful and eventually succeeded in extending his domain over the whole of mithila and Nepal. One of his sons ruled over Nepal, while another, Ganga Deva, reigned in Mithila. The latter is known to be the first ruler to have constituted fiscal divisions for revenue administration. Narsingh Deva ascended the throne on the death of his father Ganga Deva. He quarrelled with his kinsman in Nepal as a result of which Mithila and Napal were separated for ever. He was succeeded by his son Ram singh Deva, who was a great scholar of vedic literature and an able administrator. During his time several commentaries on the vedas were compiled and a code of conduct was drawn up for the guidance of the Hindus in their religious and social activities. Ram Singh Deva is with having introduced the system of patwaris or village accountants for the maintenance of village records. Sakti Singh succeeded his father Ram Singh Deva on his death. Unlike his forefathers he turned out a despot and one of his ministers formed council of seven elderly nobles as a measure against his autocratic power. Hara Singh Deva was the ruler of dynasty. With the fall of the simraon dynasty, Tirhut was annexed by the empire of Delhi.

The whole of north Bihar appears to have passed on to the kings of Jaunpur in 1397. It remained with them for over a century until Sikandra Lodi of Delhi defeated the king of Jaunpur. Meanwhile Hussain shah, the powerful king of Bengal, had extended his domain over large tracts in Bihar. After defeating the king of Jaunpur, Sikandera Lodi marched against Hussain shah in 1499. The latter realised that he could be no match against the imperial forces, and so he offered to withdraw from Bihar, Tirhut and Sarkar Saran, provided be Emperor gave him an assurance not to interfere with his possession in Bangal. The terms were quite favourable to the Emperor and he agreed. A treaty was accordingly concluded at Barh. The Emperor having got domain over Tirhut, proceeded to establish his authority. The Raja of Tirhut was subdued but was let off after the realisation of several lakhs of rupees. But the kings of Bengal couldnot keep their hands off Tirhut for long. Nasrat Shah (1518 –1532), son of Hussain Shah and the king of Bengal swept down upon Tirhut and killed the Raja. He appointed his son-in-law, Alauddin as the Governor. In 1538 Makhdum Alam joined Sher Khan in his revolt against the king of Bengal. The power of the kings of Bengal was diminishing. Mahmud Shah was the last independent king of Bengal.

Though Darbhanga (old Darbhnga which included Samastipur also) alongwith other parts of north Bihar, ws annexed to the Mughal Empire, the control was very loose and the local chiefs exercised great power. North Bihar had many Afghan settlers. Their number had increased owing to the large scale immigration of those who had refused to serve the Mughals. They were turbulent, and when Daud Khan, the Afghan king of Bengal, rose in revolt in 1574, he got a band of ready supporters in them. When the Mughal Generals failed to control the rebellion, Emperor Akbar himself led a large army to crush the aspirations of Daud Khan. The Afghans were defeated and Bihar ws lost to them. Akbar created a separate Subah of Bihar and placed it under a Mughal Governor. Tirhut formed part of this Subah. The chiefs who had helped the emperor were rewarded with grants of Jagir in sarkar Hajipur, which also covered the southern parts of district of Darbhanga (portions of the district of Samastipur). The Jagirdars settled down with their retinues. Darbhanga (includeing Samastipur district) thereafter remained a part of the Mughal Subah.

British Period

The decisive victory of the British in the battle of Buxar in 1764 gave them undisputed sway over the Lower Provisions of Bengal. As a consequence, the district along with other parts of Bihar, passed under the control of British.The history of the district thereafter is merged with the history of British rule in India.

After asuming control over the territory, the British took steps to consolidate their authority. Mithila, the enlightened home of Hindu culture and learning had been revaged by the Muslim and the Mughal armies from time to time. The British administrators took steps to establish law and order. Besides, the trouble-mongers in Mithila, they had also to deal with the incursions of he Nepalese. The troubles with Nepal culminated in the Indo Nepalese war. After having concluded peace with Nepal, the British administrators had comparatively quiet time until the 1857 movement. In 1857 patriotic fervour raged high in the district as in many other districts of Bihar.

(iii) Administrative set up

Samastipur is the 6th largest district in term of population and 14th largest dstrict in terms of area. Total area of the district is 2904.0 Square kilometers, which is spread over twenty c.D. Blocks. Total number of villages in samastipur district ore 1248 in which 1122 villages are inhabited and 126 villages are uninhabited.

As per 2001 Census samatipur distict has following setup.

Serial No.	Name of C.D.Blocks	No of villages in C.D.Block		Name of Statutory Towns in C.D. Blocks
		Inhabited	Uninhabited	
1	2	3	4	5
1	Kalyanpur	131	22	-

District Collector is head of the district administration, sub-division is headed by sub-divisional officers community Development Blocks and circle offices are the primary level of civil administration and revenue collections in the district. Block Development Officers and Circle Officers are posted in these officers respectively who assist sub-divisional and District officers of the district.

Senior Superintendent/Superintendent of Police is the head of the police administration of the district who is assisted by Dy-Superintendents and police/subdivisional police officer/posted in sub-divisions. A net work of police thanas and police post and police outposts are in place manned by Inspectors/ Sub-Inspectors of police who keep vigil on crime in their respective area**s.**

(iv) Physical Features

Natural Divisions

In Samastipur district entire tract forms a rich alluvial country noted for the fertility of its soil and for the execellence of its rabi crops. With the exception of the part of the doab between Bagmati and Burhi Gandak rivers, the district consists of large block of up land interspersed with a few chaurs or marshes. The land is very fertile and yields most of the valuable rabi and bhadai crops and it has been the centre of the indigo industry. The soil of the district is highly calcarious. It is a mixture of clay and sand and as one proceeds to south the sand content of the soil increases. The river banks are made of new alluvium formed by continuous deposit of soil and clay.

The most important rivers traversing the district are Burhi Gandak, the Baya, Kosi, Kamla, Kareh and Jhamwari and Balan, which are both the offshoots of Burhi Gandak. The Ganges skirts the district on the south. Burhi Gandak enters the district from the west near Pusa and then pursues a south-easterly course till it leaves the district near Rosera. River Baga flows through a portion of the Dalsingsarai and joins the Ganges below Dhaneshpur at the extreme south-east corner of the district. Jhamwari and Balan rivers are branches of Burhi Gandak, which they leave at pusa, and after flowing through the south-west of Samastipur rejoin the parent stream in Munger.

Climatic conditions

The climate of the district is somewhat dry and generally healthy. The cold season is from about the middle on November to the end of February. The summer season starts from March when westerly wind begins to blow and the temperature rises considerably. It continued till May and thereafter it is followed by the south-west monsoon season from June to September. May is the hottest month when the temperature goes upto 42°C. Rains set in towards the middle of June. With the advent of rain the temperature falls and humidity rises. October and the first half of November onstitute the post-monsoon season.

Rainfall

The rains generally start in the district by middle of June. The average annual rainfall in the district is 1255 mm. August is the rainiest month. The district also gets some winter rain.

Forests

As the land in the district is generally very fertile, there are hardly any uncultivable areas. The district is, therefore, devoid of any forests. Planting of fruits, timber, and fire-wood trees has, however, been taken up lately by the Forest Department. The expanse of cultivation, the growth of population and the extension of means of communications have practically denuded the district of forests and wild animals. Hare and mongoose are met with occasionally.

Land use pattern

Samastipur district is marked by the intensive cultivation of its rich uplands. The land of the district is very fertile and multiple cropping is practised. Cash crop such as chillies, sugarcane, tobacco and turmeric are grown here. The district falls in the belt of Saraisa Pargana where tobacco is famous for its quality. The staple food of the district is rice, wheat, dal and vegetables.

Agriculture is the principal economic activity of the district and nearly 83 percent of the total working population depends on it. Wheat, pulses and edible oil seeds are also grown here. Tobacco is processed and exported to distant places of the country. The district has also a rich endowment of fruits like mango, lichi and banana. These fruits in sizeable number are exported is sizeable quantity out side the state also.

The importance of agriculture in this district is highlighted by the existence of the Rajendra Agriculture University, the Central Tobacco Research Institute and the Sugercane Research Institute at pusa. Kisan Vidyapith and other extension agencies are functioning there to disseminate healthy and up-to-date knowledge of agriculture operations among the farmers. High yielding varieties of seeds, improved agricultural implement and chemical fertilizers are utilised by the cultivators of this district. The functioning of the different research institutes is detailed below.

Sugar Cane Research Institute

At this institute research on different varieties of sugarcane is carried out. It also develops better varieties of sugarcane suitable for the soil of this area. Thirty persons are trained at this institute every year and are awarded scholarship and free lodging. The minimum qualification of trainees is matriculation with science. They are imparted specialised training in the cultivation of sugarcane in addition to the general knowledge of agriculture.

Tobacco Research Institute

It is centrally sponsored institute. This institute at Pusa has been carrying on research relating to various types of tobacco. It grows tobacco, undertakes its processing on experimental basis and explores ways of improving the yield and quality. Tobacco growing farmers of this district have amply benefitted through this institute and are now growing virginia tobacco and selling it to eminent cigarette companies. The new improved varieties introduced are Sona and Gandak Bahar. Sona is very popular as chewing tobacco in this district. Gandak Bahar is used mainly in preparation of Kimam and black yellow tobacco for betel chewing.

Masina farm(in Warisnagar block), an individual enterprise, has been gaining prominenece among the cultivators for a high quality seeds and produce of hybrid maize. The main agencies in operation are(i) Masina Joint Farming Co-operative Societies (ii) Masina Beej Nigam,(iii) Masina Beej Private Limited and (iv) Masina Food Products Private Limited. Masina Farm has, in fact, done a really commendable job in initiating a programme of Production of hybrid seeds and in making every body conscious of quality and high yield in agriculture.

Keepinhg in view the progress of maize cultivation in this area, a Pioneer Maize Seed Research Station has been established in Samastipur in the year 1980-81 for producing yellow hybrid maize seeds. Its main research station is in Hyderabad. Now they have opened a branch research station here in Samastipur where one chief scientist is working for the production and promotion of yellow and white pioneer maize deeds.

Irrigational facilities

Artificial irrigation, although important, has played a comparatively minor part in the agricultural economy of the district. The district, like most other districts, is dependent on rainfall for its crops. Rainfall is not always normal and well distributed. This brings in the need for artificial irrigation. The main sources of irrigation are tanks, chaurs and streams but in the event of failure of rains these sources naturally fail when they are most needed. The irrigated area in the district is very small.

Mines and minerals

No mineral is found in this district. There are no mining and heavy industries in the district of Samastipur.

Industrialisation

The small district of Samastipur has two sugar mills, one at Samastipur and the other at Hasanpur. A jute mill, a paper factory, re-rolling mill and many other small factories are working around Samastipur town. The Khadi Gramodyog Board has its main centre at Pusa with 29 subcentres in different parts of

district. Thousands of male and female weavers and rural artisans derive their livelihood from these centres. The district Industries centre has also been functioning to promote the growth of industries in the district. It is running two training-cum-production centres at Jitwarpur (Samastipur) and Waini (Pusa).

Live stock

This district along with other districts in the State depends absolutely on livestock for pursuing agriculture which is the most important occupation. The district is also suitable for the rearing of milch cattle. Barauni Dairy Plant is situated at a distance of 60 Kms. where various Kinds of milk products such as Ghee, Milk powder, etc., are produced, Diara area of patori and Mohiuddinnagar (which is close to Barauni) being affected by flood, is suitable for rearing milch cattle. Crop can not be grown more than once in a year in these areas. Hence the income of farmers and agricultural labourers can be supplemented by adopting this subsidiary occupation.

Fishery

Many rivers flow through this district which provide fish in abundance. There are also many tanks like Moen, Dom, etc., in which fish is reared. There are a good number of fisherman co-operative societies to cater to the needs of thousands of fisherman. The tanks or Chaurs need renovation for implementation of fish production programme. A fish farmers, development agency has been established in the district which will address itself to this task.

Communications

Samastipur is also the Divisional Headquarters of the North Eastern Railway. The district has direct train link with Patna, Calcutta, Delhi, Dhanbad, Jamshedpur, Bombay and other places of importance. National High way 28 passes through the district. The district headquarters is connected to all block headquarters by all weather roads.

In addition to rail and road, rivers like the Ganges, Burhi Gandak, kareh etc., provide transport facilities.

The district has shown marked improvement in the field of communication. .Besides, ample number of post offices, there are five telephone exchanges working in the district. A microwave station is also functioning at samastipur to provide quick telecommunications. The district headquarters is linked by S.T.D. with many prominent cities of the country.

Trade and commerce

The district occupies a place of pride in the trade of Saraisa Tobacco. Virginia tobacco is also grown and traded in this district. Spices such as Garlic, Chilli, Ginger, etc., are exported from this district. Fruits such as mango, lichi, and banana are also important items of trade and commerce of the district. .Masina and Mangalgarh are two private farms besides the Agriculture University at Pusa which produce high yielding maize seeds and export the same to other parts of the State and the country in abundance.

(v) Census concepts

Building

A ‘Building’ is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places

of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the

garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.- -For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi

7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhanger
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Swasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra

23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind

or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as

storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (ASFR)}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (ASMFR)}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-

999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Samastipur district during 1991 was 2,716,929 Hindus constitute over 89.9 per cent (2,442,774persons) of the population in the district followed by Muslims 10.1 percent (2,73,351 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Samastipur district during 1991 was 2,716,929. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Samastipur district, Hindi, the main mother tongue of the district was returned by 91.4 percent (2,484,304 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Samastipur district, was 8.5 percent (229,714 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Samastipur during 1991 census.

The population of the Scheduled Castes in the district of Samastipur was 489,985, according to 1991 Census, Numerically the five most prominent SCs in the district were (i) Dusadh,Dhari,Dharhi (224,094)(ii) Chamar,mochi(141,268)(iii)Musahar (49,354)(iv) Pasi(26,247) and (v) Dhobi(23,077).While Dusadh constituted the maximum proportion of Scheduled Castes population , the percentage being 45.7 (more than one third of the total SC population). Chamar and Musahr though numerically Second and third in order comprised only 28.8 and 10.1 percent of the SC population respectively in the district. Pasi and Dhobi are much less in number as compared to the other three SCs mentioned above with only 5.4 and 4.7 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the five SCs described above as their percentage to total SC population was less than even 1.0 percent except Bantar whose percentage wa 5s 2.0 respectively.

The population of the Scheduled Tribes in the district Samastipur during 1991 Census was 542.Numerically, the five important STs were namely (i) Gond (ii) Oraon (iii)Gorait 9iv) Santal and (v)kharwar.Gond had 177 population which constituted 32.7 percent of the Scheduled Tribes population in

the district Oraon with 76 population constituted 14.0 of the ST population .Gorait which were 74 in number constituted 13.7 percent of the ST population Santal comprised 73 persons and constituted 13.5 percent of ST population while Kharwar with 36 population . Remaining Scheduled Tribes were comparatively very less in number than the five STs described above as their percentage to total ST was less than even 2.0 percent except Munda, Korwa,Kora and unclassified whose parentages were 4.4 ,2.6 and 2.0 each respectively.

(vii) 2001 Census Findings- Population and its Distribution.

According to the 2001 Census, the total population of Samastipur district is 3394793 comprising 1760692 Males and 1634101 Females and constituting 4.1 percent of the State population spread over 3.1 percent of the area of the State in the 20 C.D.Blocks of the district. Samastipur is the most populous where as Mohanpur is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

	District Total:	**3E+06**	**2582052**	**134877**	**3394793**	**3271338**	**123455**	**24.9**	**26.7**	**-8.5**	**5.0**	**3.6**

Table – 1 shows that decadal growth of population of Samastipur during 1991-2001 has been of the order of 24.9 percent. The rural population in the district has increased by 26.7 percent while the urban population growth over the decade has been negative and decrease in urban population has been of the order of 8.5 percent in the district. It is probably due to the fact that Hasanpur having an urban population of 23941 in 1991 has been declassified and the same has been treated as rural in census 2001. Rural-urban migration is an

important factor which always leads to rapid expansion of the urban unit but in the case of Samastipur district there has been a decrease in urban population in 2001 over 1991. In 1991 the proportion of urban population in the district was 5 percent which in 2001 stood at 3.6 percent.

Among C.D. Blocks, Bithan has shown the highest increase in population over the decade with 36.5 percent followed by C.D. Block Singhia with 35.3 percent in the district. Percentage decadal variation has been observed the least in the case of C.D. Block Pusa with 16.2 percent. The increase in urban population over the decadal has been of the order of 159 percent in C.D. Block Samastipur where as it has been least in C.D. Block Rosera with 13.4 percent.

Districts (Rural) Total:		**324 (28.9)**	**544837**	**506553**	**153 (13.6)**	**540242**	**505417**	**45 (4.0)**	**323989**	**295445**

It may be observed in table – 2 that the maximum number of villages in the district lie in the population range of 2000-4999 accounting for 28.9 percent of the total inhabited villages closely followed by villages in the population range of 1000-1999 accounting for 25 percent of the total inhabited villages. The percentages of population in the above two ranges are 32.1 and 12.4 respectively. The villages in the population range of 5000-9999 constitute 13.6 percent of the total inhabited villages and in these villages the percentage of population is as high as 32 percent of the total rural population of the district. There are 45 villages in the population range of 10,000 and above accounting for 4 percent of total inhabited villages and 18.9 percent of the total rural population of the district. 9.8 and 6.1 percent of the inhabited villages and 1.2 and 0.2 percent of the total rural population of the district fall in the lower population ranges of 200-400 and less than 200 respectively.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

		Name of town
		1
(a)	**New**	
(i)	Statutary town	NIL
(ii)	Census town	NIL
(b)	**Denotified**	NIL
(c)	**Declassified**	NIL
(d)	**Wholly merged with other town(s)**	NIL

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

The table noted above is not applicable in respect of Samastipur district as there has been no change between 1991 and 2001 censuses.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	6	0.5	11,530	0.4
11-20	1	0.1	8	0.0
21-50	9	0.8	258	0.0
51-100	5	0.4	714	0.0
101-200	9	0.8	3,598	0.1
201-300	15	1.3	9,185	0.3
301-500	35	3.1	42,416	1.3
501 +	1,042	92.9	3,203,629	97.9
Not known	0	0.0	0	0.0
District Total:	**1,122**	**100.0**	**3,271,338**	**100.0**

Population Density (Rural) of the district: 1291.6

The data presented in the above table highlight the fact that maximum proportion of village in Samastipur district lie in the density range (per square kilometer) of 500+ with 92.9 percent of the total inhabited villages and 97.9 percent of the total rural population of the district. 3.1 percent of the inhabited villages and 1.3 of the total rural population fall in the density range of population 301-500. 1.3 and 8 percent of the such villages and 0.3 and 0.1 percent of the total rural population of the district fall in the further lower density range of 201-300 and 101-200 respectively. Only 1 village having 0.1 percent only lies in density range of 11-20 where as 6 villages accounting for 0.5 percents of inhabited villages and 0.4 percent of total rural population fall in density range of 0-10. The average density of population in rural areas of Samastipur district is 1291.6.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1061	1064	1003	1056	1059	908
1911	1051	1056	942	1074	1078	876
1921	1020	1027	886	1051	1054	851
1931	995	1005	820	1015	1021	764
1941	1002	1012	842	1036	1043	788
1951	1000	1010	859	1008	1014	860
1961	1005	1020	832	1039	1049	803
1971	957	968	833	967	973	817
1981	948	959	852	972	977	855
1991	907	913	857	926	929	869
2001	919	926	868	928	930	879

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table – 5 shows that the sex ratio for the rural areas of Samastipur district has been comparatively higher than the sex ratio for the rural areas of the Bihar state as a whole since 1911 census. In census 2001 also the rural sex ratio for Samastipur district is 930 while that of Bihar is 926 only. On the other hand in 1901 census Samastipur returned as sex ratio of 1059 where as it was 1064 for the state.

In respect of urban areas, the sex ratio have been higher in the district than the state average for the census years 1951, 1981, 1991 and 2001 where as it remained lower than the state in the years 1901, 1911, 1921, 1931, 1941, 1961 and 1971. The urban sex ratio in the district 879 where as it was 868 for the state.

TABLE 6 : SEX RATIO BY C .D. BLOCKS, 2001

19	Hasanpur	931	931	-
20	Bithan	942	942	-
	District Total:	**928**	**930**	**879**

In Samastipur district as a whole there are 928 females per 1000 males. The sex ratio is 930 for rural areas and 879 for urban areas of the district. Within the district, the sex ratio varies from 972 in Bibhutpur to 780 in Dalsinghsarai. Samastipur has a sex ratio of 907 for rural and 860 for urban areas. Mohiuddinagr has a sex ratio of 943 for rural and 927 for urban areas. Dalsinghsarai, which has the lowest average sex ratio, have 767 and 895 females per thousand males for rural and urban areas respectively. Rosera have a sex ratio of 940 for rural and 886 for urban areas.

TABLE 7 : SEX RATIO BY C. D. BLOCKS, 2001

Serial number	Name of C D Block	Sex ratio
1	2	3
1	Kalyanpur	931
2	Warisnagar	920
3	Shivaji Nagar	968

17	Rosera	940
18	Singhia	946
19	Hasanpur	931
20	Bithan	942
	District (Rural) Total:	**930**

As for rural areas of Samastipur district, there are 930 females for every thousand males. Within the district, the sex ratio varies from 972 in C.D. Block Bibhutpur to 767 in C.D. Block Dalsinghsara. The sex ratios, apart from Bibhutpur are higher than the district average in C.D. Blocks Kalyanpur, Shivaji Nagar, Sarairanjan, Ujiarpur, Rosera, Singhia, Hasanpur and Bithan. Sex ratios in other C.D. Blocks are either than or equal to the district rural average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	15	1.3	48,047	1.5
700-749	7	0.6	18,935	0.6
750-799	21	1.9	49,119	1.5
800-849	45	4.0	53,299	1.6
850-899	183	16.3	426,708	13.0
900-949	387	34.5	1,447,423	44.2
950-999	280	25.0	959,274	29.3
1000-1099	141	12.6	248,279	7.6
1100+	43	3.8	20,254	0.6
District Total:	**1,122**	**100.0**	**3,271,338**	**100.0**
Sex ratio (Rural) for District:		**930**		

It can be observed in table –8 that the maximum proportion of villages in Samastipur district lies in the sex ratio range of 900-949 and there villages account for 34.5 percent of the total inhabited villages covering 44.2 percent of total rural population. 25 percent of inhabited villages and 29.3 percent of the total rural population fall in the sex ratio range of 950-999. Again 16.3 percent of total inhabited villages and 13 percent of total rural population fall in the sex ratio range of 850-899. Regarding highest and lowest ranges of sex ratio, only 3.8 percent of inhabited villages and 0.6 percent of total population fall under sex ratio range of 1100 and more where as 1.3 percent of inhabited villages and 1.5 percent of total rural population have a sex ratio range of less than 700.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Samastipur	UA	860
2	Samastipur	M+OG	860
3	(i) Samastipur	M	866
4	Mohiuddinagar	NA	927
5	Dalsinghsarai	NA	895
6	Rosera	M	886
Sex ratio (Urban) for the district:			**879**

The average sex ratio in urban areas of Samastipur district, including Samastipur urban Agglomeration is 879. Among towns Mohiuddinagar(NA) has the highest sex ratio of 927. Dalsinghsarai(NA) has a sex ratio of 895 where as Rosera(M) has 886 females for every thousand males. Samastipur Municipal area including its outgrowth as well as Samastipur urban Agglomeration each has a sex ratio of 860 where as Samastipur Municipality exclusively has a sex ratio of 866.

	District (Rural) Total:	**691,040**	**356,506**	**334,534**	**938**

It is observed in table – 11 that the sex ratio in the age-group 0-6 among the rural population in the C.D. Blocks of the district varies from 974 in C.D. Block Singhia to 884 in C.D. Block Vidyapati Nagar. C.D. Block Bithan has a sex ratio of 962 were as C.D. Block Sarairanjan, Shivaji Nagar, Khanpur and Mohanpur have a sex ratio of 955, 954, 953 and 952 respectively.

Sex ratios covering 0-6 years of population in rural areas of the district are higher than the average rural sex ratios in 10 C.D. Blocks, where as in 50 percent of the C.D. Blocks the sex ratios for 0-6 year are lower than the district rural average.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	47	4.2	2,765	0.4
700-749	24	2.1	3,920	0.6
750-799	53	4.7	15,739	2.3
800-849	85	7.6	38,458	5.6
850-899	169	15.1	112,901	16.3
900-949	245	21.8	236,196	34.2
950-999	195	17.4	156,507	22.6
1000-1099	187	16.7	102,420	14.8
1100+	117	10.4	22,134	3.2
District (Rural) Total	**1122**	**100.0**	**691,040**	**100.0**
Sex ratio (Rural) for District:		**938**		

It is observed in the above table- 12 that 21.8 percent of the total inhabited villages and 34.2 percent of the total rural population of 0-6 years in Samastipur district fall in the sex ratio range of 900-949. 17.4 and 16.7 percent of the inhabited villages having 22.6 and 14.8 percent of the total population of 0-6 years fall in the sex ratio range of 950-999 and 1000-1099 respectively. 15.1 percent of inhabited villages and 16.3 percent of the total rural population of 0-6 years fall in the sex ratio range of 850-899 percent the higher and lower sides of the sex ratio ranges for 0-6 years rural population are 34.2 percent at the range 900-949 and 0.7 percent at the range less than 700, respectively. 10.4 percent of inhabited villages and 3.2 percent of population fall in the sex ratio range of 1100+ where as on the lower side 4.2 percent of total inhabited villages and 0.4 percent of the total rural population have a sex ratio range of less than 700.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Samastipur	UA	8,812	4,541	4,271	941
2	Samastipur	M+OG	8,812	4,541	4,271	941
3	(i) Samastipur	M	8,129	4,204	3,925	934
4	Mohiuddinagar	NA	2,935	1,537	1,398	910
5	Dalsinghsarai	NA	3,393	1,785	1,608	901
6	Rosera	M	4,988	2,609	2,379	912
	District(Urban) Total		**20,128**	**10,472**	**9,656**	**922**

It is observed from the table –13 that the average sex ratio in urban areas of the district for 0-6 years population is 922. Among the various urban units Samastipur U.A. including Samastipur (M+OG) has the highest sex ratio of 941. For Samastipur(M) sex ratio is 934 only. Rosera(M) has sex ratio of 912 followed by Mohiuddinagar(NA) and Dalsinghsarai(NA) with 910 and 901, respectively.

The above table shows that the proportion of scheduled castes in Samastipur district is 18.5 percent of the total population where as its proportions in rural and urban areas of the district are 18.7 and 14.5 percents respectively. Within the district the highest percentage of scheduled castes population is 21.8 in Singhia C.D. Block closely followed by Pusa C.D. Block with 21.2 percent. On the other hand C.D. Block

Bithan has the lowest proportion of scheduled castes population which accounts for only 13.7 percent of the district's total rural population. Regarding urban areas of the district, Dalsinghsarai has 21.8 percent scheduled castes population followed by urban areas of Samastipur, Mahiuddinagar and Rosera with 13.5, 13.4 and 11.8 percents respectively. The proportion of scheduled tribes in the district as a whole is only 0.1 percent of the total population. Scheduled tribes can be spotted in C.D. Blocks Warisnagar, Samastipur, Mohiuddinagar, Dalsinghsarai and, in Ujiarpur only.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

19	Hasanpur	178,968	30,873	3	17.3	0
20	Bithan	119,014	16,278	0	13.7	0
District (Rural) Total:		**3,271,338**	**610,975**	**2,871**	**18.7**	**0.1**

The table placed above indicates that the percentage of the scheduled castes in Samastipur district is of the order of 18.7 percent of the total rural population. The highest percentage of scheduled castes population in C.D. Block Singhia with 21.8 percent of the total population closely followed by C.D. Block Pusa with 21.2 percent. 50 percent of the C.D. Blocks of the district have a lower percentage of scheduled castes population than the average for the district i.e. 18.7 percent and rest 50 percent have the higher percentage than the district average.

The proportion of scheduled tribes in the district is only 0.1 percent were as in C.D. Block Dalsinghsarai 1.3 percent of the total population is scheduled tribes. C.D. Blocks Warisnagar, Samastipur and Ujiarpur each have only 0.1 scheduled tribes population in the district.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	108	9.6	0	0.0
Less than 5	77	6.9	3,499	0.6
5-10	136	12.1	33,509	5.5
11-20	364	32.4	269,256	44.1
21-30	243	21.7	195,854	32.1
31-40	84	7.5	59,776	9.8
41-50	36	3.2	18,689	3.1
51-75	41	3.7	19,290	3.2
76 and above	33	2.9	11,102	1.8
District Total	**1,122**	**100.0**	**610,975**	**100.0**

From the table above, it is apparent that there are 364 villages accounting for 32.4 percent of the total inhabited villages where in the population of scheduled castes ranges between 11-20 percent of the scheduled castes population.

This is closely followed by villages where the population of the scheduled castes ranges between 21-30 percent of the total scheduled castes population. These 243 villages account for 21.7 percent of the total inhabited villages. There are 136 villages accounting for 12.1 percent of the total inhabited villages where the percentage of scheduled castes population to total population is between 5-10. There are only 33 villages accounting for 2.9 percent of the total inhabited villages where percentage rang of scheduled castes population to total population is 76 and above. On the other hand as much as 108 villages accounting for 9.6 percent of the total inhabited villages accounting for 9.6 percent of the total inhabited villages have no population of scheduled castes in the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,057	94.2	0	0.0
Less than 5	62	5.5	1,687	58.8
5-10	3	0.3	1,184	41.2
11-20	0	0.0	0	0.0
21-30	0	0.0	0	0.0
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**1,122**	**100.0**	**2,871**	**100.0**

It is apparent from the table above that there are 62 villages accounting for 5.5 percent of the total inhabited villages in the district where population of scheduled Tribes ranges between 1-5 (less than 5). In

all these villages the population of scheduled tribes is 1687 only. The percentage range of scheduled tribes population to total population is between 5-10 in 3 villages. As many as 1057 villages have got no population of scheduled tribes.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Samastipur UA	61,998	8,375	321	13.5	0.5
2	Samastipur (M+OG)	61,998	8,375	321	13.5	0.5
3	(i) Samastipur (M)	55,589	7,600	189	13.7	0.3
4	Mohiuddinagar (NA)	13,769	1,850	97	13.4	0.7

17	Rosera	959	0
18	Singhia	952	750
19	Hasanpur	948	0
20	Bithan	944	0
	District (Rural) Total	**936**	**165**

Table – 19 shows that the sex ratio of scheduled castes varies from 982 in C.D. Block Shivaji Nagar to 929 in C.D. Block Dalsinghsarai. The sex ratio in C.D. Blocks Bibhutipur and Mohanpur are 975 and 965 respectively. Sex ratio among scheduled castes in rural areas of the district is 936.

Regarding scheduled tribes, the sex ratio varies from 1750 in Khanpur to 22 in C.D. Block Dalsinghsarai. The sex ratio among scheduled tribes is 1333 in each C.D. Blocks Patori and Tajpur. On the other hand Kalyanpur, Mohanpur, Rosera, Hasanpur and Bithan have no population of scheduled tribes. The average sex ratio among scheduled tribes for the rural areas of the district is 165.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Samastipur UA	846	922
2	Samastipur (M+OG)	846	922
3	(i) Samastipur (M)	850	871
4	Mohiuddinagar (NA)	949	1064
5	Dalsinghsarai (NA)	918	875
6	Rosera (M)	920	0
	Sex ratio (Urban) for the district:	**887**	**896**

The table furnished about shows the sex ratio among scheduled castes and scheduled tribes in urban areas of the district. The sex ratio among scheduled castes in urban areas is 887 and it is highest i.e. 949 in Mohiuddinagar(NA) followed by Rosera(M) and Dalsinghsarai(NA) with 920 and 918 respectively. Sex ratio among scheduled castes in Samastipur(UA), Samastipur(M+OG) and Samastipur(M) varies between 846 and 850.

In case of scheduled tribes the sex ratio in urban areas of the district is 896. Among the urban units the highest sex ratio among scheduled tribes is 1064 in Mohiuddinagar(NA). Samastipur urban Agglomeration and Samstipur Municipal areas including its outgrowth is 922. Dalsinghsarai(NA) and Samastipur(M) have a sex ratio of 875 and 871 respectively among scheduled tribes. On the other hand Rosera(M) has no population of scheduled tribes.

Table – 21 show number and percentage of literates and illiterates by sex in 2001 Census for total which inclides rural and urban both which table 22 shows the same thing for the rural areas.Among C.D. Blocks of the district, Pusa has the highest proportion of literate i.e. 56.2 percent followed closely by C.D. Blocks Samastipur (53.3percent) and Tajpur(52.7 percent). The lowest proportion of literacy rate is 29.0 percent in C.D. Block Bithan. Regarding sexwise literacy, Pusa has the highest male literacy rate of 68.9 percent followed by Samastipur and Tajpur C.D. Blocks with 66.4 and 65.1 percents, respectively. Percentage of female literate is also highest in C.D. Block Pusa (42.4 percent), followed by Tajpur39.7 percent and Samastipur(38.7 percent). The lowest rates of literacy among male and female are 41.7 and 15.4 percent respectively in C.D. Block Bithan. The average literacy rate for the rural areas of the district is 43.9 where as it is 56.5 for males and 30.3 for females. The over all gap in male-female literacy rate in the rural areas of the district is 26.2 percent.

Regarding literacy in urban areas the average literacy rate for the district is 75.7 percent in which proportion of male and female literacy are 83.8 percent and 66.4 percent respecticvly. The gap in male and female literacy rates in urban areas is 17.5 percent.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	5	0.4	239	0.0
1-10	18	1.6	4,529	0.1
11-20	49	4.4	51,113	1.6
21-30	134	11.9	263,255	8.0
31-40	263	23.4	840,453	25.7
41-50	360	32.1	1,297,907	39.7
51-60	197	17.6	629,545	19.2
61-70	62	5.5	143,915	4.4
71-80	25	2.2	37,538	1.1
81-90	5	0.4	2,650	0.1
91-99	3	0.3	193	0.0
100	1	0.1	1	0.0
District Total:	**1122**	**100.0**	**3,271,338**	**100.0**
Literacy rate for District:		**45.1**		

The above table shows that 360 villages accounting for 32.1 percent of the inhabited villages, the literacy rate ranges between 41-50 percent. In these villages 39.7 percent of the population of the district live. In 263 villages accounting for 23.4 percent of total inhabited villages the literacy rate ranges between 31-40. 25.7 percent of the population fall under this range of literacy. 197 villages accounting for 17.6 percent of the inhabited villages and covering 19.2 percent of the population have a literacy range of 51-60. 134 villages accounting for 11.9 percent of the inhabited villages and having 8 percent of the population of the district have a literacy range of 21-30 percent. 5 villages have no literacy on the one hand and 1 village has 100 percent literacy in which total population is 1 only. The average rate of literacy for rural areas of the district is 45.1 percent.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

The table above shows that literacy rate among the scheduled castes is highest i.e. 31.7 percent in C.D. Block Tajpur followed closely by C.D. BLOCK Pusa and Samastipur with 30.9 and 30 percent respectively. C.D. Block Bithan has the lowest rate of literacy i.e. 15.2 percent among scheduled castes. Regarding sex wise literacy position, male literacy rates Tajpur, Pusa and Samastipur follow the trends of respective general literacy rate but except Tajpur this trend is not followed by female literacy rates. Bibhutpur and Dalsinghsarai have 17.6 and 17.3 percentages of literacy among scheduled castes females in rural areas of the district. The total literacy rate among scheduled castes in rural areas of the district is 24.2 percent. The corresponding figures for male and female are 34.7 and 12.9 respectively. The total literacy gap between male and female in

rural areas of the district is 21.8 percent. The gap in male-female literacy is highest in C.D. Block Pusa (26.3 percent) and Tajpur (26 percent). This gap is lowest in C.D. Block Dalsinghsarai (11.4 percent).

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	16	1.6	496	0.1
1-10	103	10.2	30,530	5.0
11-20	277	27.3	189,568	31.0
21-30	324	32.0	257,439	42.1
31-40	177	17.5	93,692	15.3
41-50	77	7.6	33,733	5.5
51-60	22	2.2	4,224	0.7
61-70	13	1.3	1,004	0.2
71-80	3	0.3	268	0.0
81-90	1	0.1	16	0.0
91-99	0	0.0	0	0.0
100	1	0.1	5	0.0
District Total:	**1014**	**100.0**	**610,975**	**100.0**
Literacy rate for District (Rural):		**24.2**		

The table above shows that in case of literacy among scheduled castes in the villages of the district, the highest proportion of inhabited villages i.e. 32 percent falls in the literacy range of 21-30 percent and these villages covers 42.1 percent of total scheduled castes population. 27.5 percent of inhabited villages having 31 percent of the scheduled castes population fall in literacy range of 11-20 percent. 17.5 percent of villages having 15.3 percent of scheduled castes population come under literacy range of 31-40 percent. 10.2 percent of inhabited villages and 5 percent of scheduled castes population have a literacy range of 1-10 percent. Only one village with 5 scheduled castes population have 100 percent literacy where as 16 inhabited villages are such which have zero literacy. The average literacy rate for scheduled castes in rural areas of the district is 24.2 percent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Samastipur (M+OG)	4370	2863	1507	4005	1673	2332	63.1	75.9	47.8	28.1
2	Mohiuddinagar (NA)	484	339	145	1366	610	756	35.1	48.3	21.4	26.8
3	Dalsinghsarai (NA)	1645	1153	492	2762	1145	1617	46.4	61.5	29.4	32
4	Rosera (M)	1042	723	319	2189	960	1229	41.7	54.7	27	27.7
	Samastipur (Urban)	**7541**	**5078**	**2463**	**10322**	**4388**	**5934**	**52.6**	**66.2**	**36.9**	**29.3**

The table above shows that the literacy rate among the scheduled castes in the urban areas of the district is far below i.e. 52.6 percent in case of total scheduled castes population, 66.2 percent in case of males and 36.9 percent in case of females as compared to urban population of the district which is 75.7 percent in case of total population, 83.9 percent in case of males and 66.4 percent in case of females vide table 24).

The literacy gap is also wider as it is only 17.5 percent in case of total urban population of the district where as it accounts for 29.3 percent in case of urban scheduled castes population.

Among urban units, Samastipur M+OG has the highest rate of literacy among scheduled castes i.e. 63.1 percent in case of total, 75.9 percent in case of males and 47.8 percent in case of females. All other towns in the district the literacy rates range from 35.1 percent to 46.4 percent in case of total, from 48.3 percent to 61.5 percent in case of males and between 26.8 percent and 27.7 percent in case of females.

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

17	Hasanpur	2	2	0	1	1	0	66.7	66.7	0	66.7
District (Rural) Total:		**383**	**271**	**112**	**2488**	**2194**	**294**	**14.2**	**11.5**	**34.5**	**-23**

The table furnished above shows that among scheduled tribes the percentage of literates is highest i.e. 87.5 percent in C.D. Block Khanpur followed by C.D. Blocks Samastipur, with 84.8 percent. Morwa and Mohiuddinagar each has a literacy rate of 83.3 percent. The lowest literacy rate is 1.7 percent in C.D. Block Dalsinghsarai. Male literacy among scheduled tribes is 100 percent in C.D. Blocks Khanpur, Tajpur and Patori. Dalsinghsarai has the lowest male literacy rate i.e. 1.3 percent among scheduled tribes. Regarding female literacy, C.D. Block, Mohiuddinagar has 100 percent literacy among female scheduled

tribes. On the other hand C.D. Blocks Kalyanpur, Shivajinagar, Sarairanjan, Vidyapatinagar, Singhia and Hasanpur have zero literacy among female scheduled tribes.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	21	32.3	585	20.4
1-10	7	10.8	1,573	54.8
11-20	3	4.6	148	5.2
21-30	2	3.1	56	2.0
31-40	2	3.1	6	0.2
41-50	3	4.6	10	0.3
51-60	3	4.6	93	3.2
61-70	1	1.5	92	3.2
71-80	3	4.6	25	0.9
81-90	2	3.1	227	7.9
91-99	0	0.0	0	0.0
100	18	27.7	56	2.0
District Total:	**65**	**100.0**	**2,871**	**100.0**
Literacy rate for District (Rural):		**14.2**		

The above table – 29 shows that only 65 villages in district have scheduled tribes population. In which 18 villages having 100 sheduled tribes literacy rate which have only 2.0 percent S.T. population of the district.In 21 villages Sheduled tribes population reside which have literate person. These 21 villages contain 20.4 percent Scheduled tribes population of the district. The average literacy rate of the district among Scheduled tribes is 14.2 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Samastipur (M+OG)	268	149	119	53	18	35	95.4	100	90.2	9.8
2	Mohiuddinagar (NA)	1	1	0	96	46	50	1.3	2.8	0	2.8
3	Dalsinghsarai (NA)	24	16	8	36	16	20	52.2	69.6	34.8	34.8
4	Rosera (M)	6	6	0	7	7	0	46.2	46.2	0	46.2
Samastipur (Urban)		**299**	**172**	**127**	**192**	**87**	**105**	**72.0**	**77.8**	**65.5**	**12.4**

The table above 30 shows that the literacy rate among the scheduled tribes in the urban areas of the district is 72.0 percent and among various urban units, Samastipur Municipal area including its outgrowth has the highest i.e. 95.4 percent literacy. Dalsinghsarai(NA) and Rosera(M) have 52.2 and 46.2 percent literacy rate respectively. The lowest rate of literacy i.e. 1.3 has been returned from Mohiuddinagar(NA). Male literacy in the urban areas of the district is 77.8 percent. Among various urban units, Samastipur(M+OG) has 100 percent literacy followed by Dalsinghsarai(NA) and Rosera(M) with 69.6 and 46.2 percents respectively. Mohiuddinagar(NA) has the lowest rate of male literacy i.e. 2.8 percent. The average female literacy rate among scheduled tribes in urban areas of the district is 65.5. Samastipur (M+OG) with 90.2 percent female literacy far out number Dalsinghsarai(NA) which has female literacy rate of 34.8 percent only. Mohiuddinagar has no female literacy among scheduled tribes, Rosera(M) has no female scheduled tribe population.

The gap in male and female literacy rate in urban areas of the district is 12.4 percent. Rosera(M) has a gap of 46.2 percent followed by Dalsinghsarai(NA) with 34.8 percent. The gap in male and female literacy rate among scheduled tribes is lowest i.e. 2.8 percent in Mohiuddinagar where as Samastipur(M+OG) has a gap of 9.8 percent between male and female literacy rates.

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way, it is defined for main and marginal workers. Table 31 and 32 show that the work participation rate (WPR) in Samastipur district is 24.8 percent as main workers and 6.7 percent as marginal worker. The total work participation rate including main as well as marginal workers in the district 31.6 including urban areas also.On the other hand, table 32 shows number by sex in rural areas of the C.D. Blocks. In rural areas proportion of main workers and marginal workers are 24.9 and 6.9 respectively. And proporion of the total workers is 31.8 percent.

		Males	6161	42.3	8416	57.7
		Females	786	6.1	12129	93.9
District (Urban) Total:		**Persons**	**31479**	**25.5**	**91976**	**74.5**
		Males	**27748**	**42.2**	**37957**	**57.8**
		Females	**3731**	**6.5**	**54019**	**93.5**

The work participation rate in urban areas of the district including urban Agglomeration for total workers (main+marginal) is 25.5 percent. The corresponding figures for main and marginal workers are 22.9 and 2.6 percents respectively. Sexwise WPR shows that male workers are dominent as 42.2 percent total workers are male. The corresponding proportion for main and marginal workers are 38.8 and 3.4. The proportion of female total worker is 6.5 percent where as proportion of female main and marginal workers are 4.7 and 1.7 percent respectively.

The proportion of total non-workers in urban areas of the district is 74.5 percent. The corresponding figures for male and female are 57.8 and 93.5.

Various urban units including urban Agglomeration have a WPR of 23 and above as main workers. Where as Dalsighsarai(NA) has the lowest i.e. 21.1 percent only. In case of marginal workers Dalsinghsarai(NA) has the highest proportion i.e. 5.2 percent where as Samastipur(UA), Samastipur(M+OG) have a work participation rate of 1.4 percent only.

The proportion of non-workers is highest i.e. 75.4 percent in Samastipur(UA), Samastipur(M+OG) and Samastipur(M) where as it is lowest i.e. 71.2 percent in Mohiuddinagar(NA).

Among the main workers male work participation rate in the district for total area is 41.4 percent while that of female is 7 percent only. The proportion of main workers is the highest (27.3 percent) in C.D. Block Bithan followed by Dalsinghsarai, Kalyanpur and Warisnagar with 26.7, 26.5 and 26.1 percents respectively. The proportion of main worker is lowest (23.4 percent) in C.D. Blocks Samastipur, Patori, Mohanpur. The proportion of marginal workers is the highest (11.3 percent) in C.D. Block Bithan where as it is lowest (3.9 percent) in C.D. Block Patori. Male and female WPR for Marginal worker is 5.4 and 8.1 percents respectively. Male and female work participation rates for marginal as well as main workers are 46.8 and 15.1 percents respectively (Table-31).

The proportion of non-worker in the district is 68.4 percent where as proportion of male and female non workers are 53.2 and 84.9 percent respectively (Table – 31). The work participation rate for rural areas (Table – 32) is more or less the same but it can be observed that in rural areas (Table – 32) female work participation rate is higher than the corresponding figures for all areas including urban (Table – 31) but it is reverse in case of female non workers in the district (Table – 32)

Note: Percent of Worker to total worker are given in brackets

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (27.1 percent) and agricultural labours (47.4 percent) together constitute 74.5 percent of the total workers of the district. The agriculture sector has absorbed about three fourth of the total workers. The proportion of cultivator varies between 33.8 percents in C.D. Block Shivajinagar, Morwa and Mohanpur to 17 percent in C.D. Block Samastipur. Proportion of agricultural labours varies between 62.7 percent in C.D. Block Singhia and 31.3 percent in C.D. Block Samastipur. The proportion of household industry under varies between 5.9 percent in Sarairanjan C.D. Block to 1.8 percent in Singhia C.D. Block. The average proportion of household industry workers in the district is 4.4 percent. The proportion of other workers varies between 48.2 percent in C.D. Block Samastipur and 8.2 percent in C.D. Block Bithan. The average of other workers in the district is 21.1 percent.

Note: Percent of Worker to total worker are given in brackets

The table 35 furnishes economic, categories of workers for rural areas of Samastipur district. It is well known that the economic activity in the rural areas of the district is primarily dependent on agriculture which is supported by the fact that the cultivators (27.8 percent) and agricultural labours (48.6 percent) together constitute 76.4 percent of the total workers of the district. The agricultural sector has absorbed about three fourth of the total workers in the district. The proportion of cultivators varies between 33.8 percent in C.D. Blocks Shivajinagar, Morwa and Manoharpur to 18.9 percent in C.D. Block Dalsinghsara. The proportion of agricultural labours varies between 62.7 percent in C.D. Block Singhia and 38.2 percent in Samastipur. The proportion of household industry varies between 5.9 percent in C.D. Block Sarairanjan and 1.8 percent in C.D. Block Singhia. The proportion of other workers is highest i.e. 37.1 percent in C.D. Block Samastipur where as it is lowest i.e. 8.2 percent in C.D. Block Bithan. The average proportion of household industry workers and other workers are 4.4 and 19.2 percents respectively. The proportions of male workers are higher in all categories of works in the district except in Agriultural Labourer and household industry.

				(6.5)	**(1.5)**	**(16.1)**	**(15.9)**	**(66.6)**

The table above shows that total workers constitute 25.5 percents of the total population of urban areas of the district. 42.2 percent of males and 6.5 percent of females population of urban areas of the district are workers. 2.6 percent of the total work force are cultivators. 9 percent of total workers are agricultural labours. 5.1 percent and 83.2 percent are household industry workers and other workers respectively. In urban areas of the district other works alone constitute 83.2 percent of total work force. Cultivators, agricultural labours and household industry workers together constitute 16.7 of total workers in the district. Samastipur(UA) including Samastipur Municipal area and its outgrowth has the highest i.e. 95.4 proportion of other workers where as Mohiuddinagar(NA) has the lowest proportion i.e. 49.5 percent.

Proportion of male workers is higher than that of female in case of agricultural labourers and household industry workers in urban areas of the district.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational amenity:- There are as many as total inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D. Block Bibhutpur with 95.3 percent followed by Sarairanjan and Patori with 94.5 and 93.9 percent respectively. The lowest proportion i.e. 65.2 percent of villages with educational facility is observed in C.D. Block Warisnagar.

Medical amenity:- The availability of medical amenity in the villages is quite low as only 17.4 percent villages have got it. Among the C.D. Block Sarairanjan has the highest proportion of villages with medical facility i.e. 85.5 percent where as C.D. Block Hasanpur as this amenity in 1.3 percent villages only. Warisnagar has got no village with medical amenity.

Improved Drinking Water:- There are as many as 99 percent villages in the district where improved drinking water facility is available. Out of 20 C.D. Blocks in the district, in 13 C.D. Blocks 100 percent of villages have got improved drinking water facility. In Ujiarpur C.D. Block only 95 percent villages have this facility.

Post Office:- Postal facility is available only in 30.8 percent villages of the district. Among various C.D. Blocks, Bibhutpur has got 67.4 percent villages where this facility is available followed closely by C.D. Block Mohanpur with 64.7 percent. C.D. Block Hasanpur has the minimum proportion of villages i.e. 17.1 percent having postal facility.

Telephone:- The availability of telephone facility in the villages is quite low and only 21.5 percent villages in the district have got it. Among the C.D. Blocks, Sarairanjan and Samastipur have got maximum proportion of villages with 47.3 and 45.6 percent respectively which have such facility. While only 4.5 percent villages of Singhia have telephone facility, Bithan still do not have any village with this facility.

Transport and Communications:- Transport and communication facilities are available only in 17.8 percent villages of the district. Among various C.D. Blocks, Samastipur has the highest proportion i.e. 38.9 percent of villages having transport and communication facility. 36.4 and 35.3 percentages of villages of Sarairanjan and Mohanpur C.D. Blocks are connected by bus, or rail or navigable river/canal services etc. Only one village of C.D. Block Shivaji Nagar has got such facility where as not single village of C.D. Block Rosera hs got such amenity.

Bank:- Banking facility is available only in 10.2 percent villages of the district. A maximum of 18.8 percent inhabited villages of C.D. Block Warisnagar and a minimum of 2 percent villages of C.D. Block Bithan have Banking facility, where as C.D. Block Singhia has no such village with this facility.

Agricultural Credit Societies:- Only 17.6 percent of total inhabited villages of the district have agricultural credit society. C.D. Block Khanpur has the maximum proportion (47.3 percent) of such villages having agricultural credit societies where as C.D. BLOCK Hasanpur has only 6.6 percent villages with this facility. On the other hand C.D. Blocks Tajpur and Rosera have no village with this amenity.

Approach by Pucca road:- As much as 56.7 percent of the total inhabited villages of the district enjoy the facility of approach by pucca road. Among C.D. Blocks, Singhia has 81.8 percent villages which are having approach by pucca road. 80 percent villages of Sarairanjan have approach facility by pucca road. C.D. Block Morwa has only 30 percent villages which are having approach by pucca road.

Power Supply:- 60.1 percent of the villages in the district have power supply. Among C.D. Block as much as 93.3 percent villages of Samastipur are electrified and enjoy the facility of power supply followed by 84.5 percent villages of Tajpur. On the other hand only one village accounting for 2 percent of the villages in C.D. Block Bithan has power supply.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial no.	Name of C. D. Block	Total population of inhabited villages	Type of amenity available				Type of amenity available					
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communi cations $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table place above shows the proportion of various amenities available to rural population of the district.

It would be seen from the table place above that educational facility is available to 94.9 percent of the total rural population of the district. The proportion varies between the maximum of 99.8 percent in C.D. Block Bibhutpur to a minimum of 83.9 percent in C.D. Block Khanpur. It may be of interest to note that the proportion of villages in the district enjoying educational facility is less (being 79.9 percent only vide table 37) than the proportion of rural population enjoying it is as high as 94.9 percent. This may be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 29.1 percent which is more than the proportion of villages served (17.4%) by medical facility in the district.

In case of improved drinking water facility the situation is similar as it may be observed that proportion of rural population served by the amenity is of the order of 98.9 percent which is almost similar to the proportion of villages served by this facility (99 percent).

It can be observed from the above table that in case of Post Office the percentage is good among rural population. It is highest in Mohanpur C.D. Block is 94.04 percent.

In case of telephone facilities the situation is different. Only 35.1 perent of the population avoid this facility. In Sarairanjan C.d. Block the facility is most available (71.9 Percent).

The transport communication facilities are also not very significant for the district as oly 26.6 percent population are amenity this facility in rural areas. Rosera, Shivajinagar and Morwa C.D. Blocks have the lowest among all i.e. 0.0 percent, 1.1 percent and 6.1 percent respectively.

In case of approach by pucca road and power supply amenity, both are in a higher side e.i. 71.2 percent and 70.8 percent respectively. When approach by pucca road among most available in Rosera C.D. Block (96.5 percent), the Power supply facility is mostly available for Samastipur C.D.Block)99.2percent) Khanpur as well as Bithan have the lowest is 42. percent and 7.5 percent respectively in case of these two amenities.

More or less a similar trend can be observed in respect of other amenities also both in the district has also in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	223	19	2	244
(b) Middle School	656	128	17	801
(c) Degree College	286	422	381	1089
2. Medical:-				
(a) Hospital	252	441	405	1098
(b) PHC	353	409	321	1083
3. Post Office	665	94	19	778
4. Telephone	309	312	260	881
5. Bus Service	425	298	248	971
6. Banks				
(a) Commercial Bank	547	300	172	1019
(b) Cooperative Bank	196	380	527	1103
7. Agricultural Credit Societies	502	291	132	925

It would be seen from the table that there are 244 villages which do not have any primary school but the amenity is available at places situated within 5 kms for 223 villages at a distance of 5-10 kms for 19 villages and at 10+ kms for 2 villages.

There are 801 villages in the district which do not have middle schools but the facility is available within 5 kms of the village in case of 117 villages, at a distance of 5-10 kms for 15 villages and at a distance of 10 kms and more in case of one village only. There are as much as 1089 villages in the district where no degree college is available but the degree college is available within 5 kms from the village in

case of 286 villages, at a distance of 5-10 kms for 422 villages and it is available at a distance of 10 kms and more for 381 villages.

There are as much as 1098 villages out of a total of 112 inhabited villages in the district where Hospital is not available but the same is available within 5 kms from the village in case of 252 villages, at a distance of 5-10 kms for 441 villages and at a distance of 10+ kms in case of 405 villages. Similarly, 1083 villages are such where even Primary health center is not available and the amenity is available at various places at a distance of 0-5 km to 10+ kms.

A similar trend can be observed in respect of other amenities in the district also.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available

5000-9999	153	149	52	150	126	56	52	31	52	113	109
	(100.0)	(97.4)	(34.0)	(98.0)	(82.4)	(36.6)	(34.0)	(20.3)	(34.0)	(73.9)	(71.2)
10000 +	45	45	22	45	40	30	15	21	20	41	42
	(100.0)	(100.0)	(48.9)	(100.0)	(88.9)	(66.7)	(33.3)	(46.7)	(44.4)	(91.1)	(93.3)
District total	**1122**	**896**	**195**	**1111**	**346**	**241**	**200**	**114**	**197**	**636**	**674**
	(100.0)	**(79.9)**	**(17.4)**	**(99.0)**	**(30.8)**	**(21.5)**	**(17.8)**	**(10.2)**	**(17.6)**	**(56.7)**	**(60.1)**

It would appear from the table above that maximum number of villages i.e. 554 lie in the distance range of 16-50 kms from the nearest statutory town followed by 485 villages which are situated in distance range of 5-15 kms from the nearest town. 76 villages are situated within the 5 kms and only 7 inhabited villages are situated at a distance of 51 kms and above from the nearest statutory town.

In can be observed from the table that the proportion of villages having educational facility is 80.3 percent for those situated at a distance of 16-50 kms followed by 79.8 percent of villages in case of which are situated within 5-15 kms from the nearest statutory town. In case of other amenities also (except approach by pucca road) more or less the trend is the same.

It can be seen from the table furnished above that the maximum number of villages i.e. 324 in the district fall in the population range of 2000-4999 followed by 280 villages having a population range of 1000-1999. The lowest number of villages being 45 are observed in the population range of 10,000 and more.

The proportion of villages having different amenities most varies in direct relation of their population range.

Generally, the maximum percentage of villages having different amenities have a population range of 1000-1999 and above. While further corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Kalyanpur	131	22,471	73.9	57.7
2	Warisnagar	69	12,802	77.8	73.1
3	Shivaji Nagar	68	13,731	73.5	53.3
4	Khanpur	55	13,816	74.9	38.8
5	Samastipur	90	13,675	73.2	68.1
6	Pusa	37	7,593	85.9	30.3
7	Tajpur	58	6,670	81.9	34.1
8	Morwa	60	12,571	79.6	55.9
9	Patori	49	10,369	84.1	64.2
10	Mohanpur	17	6,479	69.7	34.8
11	Mohiuddinagar	42	12,025	77.5	39.6
12	Sarairanjan	55	14,632	80.5	66.3
13	Vidyapati Nagar	34	8,697	65.1	41.4
14	Dalsinghsarai	44	9,145	72.6	56.9
15	Ujiarpur	60	17,096	78.7	22.8
16	Bibhutpur	43	21,050	79.2	59.2
17	Rosera	39	10,485	81.9	71.8
18	Singhia	44	14,435	74.1	65.7
19	Hasanpur	76	14,261	85	54.7
20	Bithan	51	11,276	87.8	52.4
	District Total:	**1122**	**253,279**	**77.8**	**53.4**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 shows the percentage of cultivable area to total area and also the proportion of irrigated area to total cultivable area in the district and in its various C.D. Blocks.

It would be seen from the table that 77.8 percent of the total area of the district is cultivable and of this only 53.4 percent area is found to be irrigated. Among C.D. Blocks, the highest percentage of cultivable area is found in C.D. Block Bithan with 87.8 percent closely followed by Pusa, Hasanpur and Patori with 85.9, 85.0 and 84.1 percentages respectively. The lowest cultivable are is found in C.D. Block Vidyapati Nagar which is 65.1 percent only.

The highest proportion of irrigated area i.e. 73.1 percent is found in C.D. Block Warisnagar followed closely by Rosera with 71.8 percent. The least proportion of irrigated area is 22.8 percent only in C.D. Block Ujiarpur which indicates that a good proportion of cultivable and the villages in this block are deprived of required irrigated.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Percapita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Dalsinghsarai (NA)	2.5	0.3	2.2	2	2	0	0	0	0
2	IV Mohiuddinagar (NA)	0.3	0.3	0	0	0	0	0	0	0
3	III Rosera (M)	6	1.9	4.1	4.6	1.2	2.4	0.5	0	0.4
4	II Samastipur (M)	8.8	1.7	7.1	9	8.6	0	0	0	0.4
District Total		**6.2**	**1.3**	**4.9**	**5.9**	**4.9**	**0.6**	**0.1**	**0**	**0.3**

The above table gives the details of finances in the statutory towns in terms of percapita receipt and expenditure. The total average percapita receipts from all statutory towns in the district is 6150.1 of which 1296.5 come from taxes and rest 4853.6 from other sources.

The average percapita expenditure for all the statutory towns in the district is 5873.7, of which 4906.6 is on general administration, 559.7 is on public health and conveniences, 109.8 is on public works, 3.1 on public institutions and 294.4 on other items. The position of percapita receipt and expenditure for different statutory towns can be viewed from the table.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Dalsinghsarai (NA)	9.9	8.9	2.5	0	0.5
2	Mohiuddinagar (NA)	5.1	2.2	2.2	0	2.2
3	Rosera (M)	5.5	1.8	1.8	0.7	0.4
4	Samastipur (M)	3.1	2.4	1.5	0.6	0.8
District Total		**4.9**	**3.3**	**1.8**	**0.5**	**0.6**

The table placed above gives the details regarding availability of different categories of educational institutions per ten thousand population in the statutory towns of the district. It would be seen that institutions like college and senior secondary schools are situated in statutory towns of the district

accounting for 0.6 and 0.5 institution per ten thousand population respectively. 1.8 institution relating to secondary and matriculation is available for every ten thousand population. Institutions pertaining to primary and junior secondary/middle education account for 4.9 and 3.3 institutions per ten thousand population in statutory towns of the district. On going into tails of different statutory towns regarding availability of various educational institutions, Mohiuddinagar(NA) is found to be an important place in the district particularly for highest average of college (2.2) per ten thousand population. Dalsinghsarai(NA) has got highest proportion of institutions of primary (9.9), Junior secondary/Middle (8.9) and secondary/matriculation (2.5) education.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Dalsinghsarai(NA)	15
2	Mohiuddinagar(NA)	4
3	Rosera(M)	11
4	Samastipur(M)	66
	Distrct Total	**39**

The above table furnishes information regarding availability of beds in medical institutions situated in towns of the district. On the average, 39 beds per ten thousand population are available in urban areas of district. Samastipur(M) has the highest number of beds i.e. 66 for every ten thousand population where as Mohiuddinagar(NA) has only 4 beds in its medical institutions for every ten thousand population.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Slum data is not available.				

There are only two statutory towns in the district which have slum population. 31.4 percent of the total population of these two towns are slum dwellers. Mohiuddinagar(NA) has the highest

proportion of slum dwellers (46.8 percent of its total population) followed by Dalsinghsarai with 20.9 percent. Other statutory towns of the district have no slum dwellers.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity Manufactured	Exported
1	2	3	4
1	Dalsinghsarai (NA)	Biri	Chilly
		Bakery	Tobacco
		Spices	Turmeric
2	Mohiuddinagar (NA)	Sweets	Spice
			Milk
			Jamain
3	Rosera (M)	Bullock Cart'S Wheel	Wheel(Bullock'S Cart)
		Kamandal	Lichi
		Ventilator	Chilly
4	Samastipur (M)	Sugar	Tobacco
		Furnitures	Chilly
		Soap	Spices

It can be seen from the table above that in Dalsinghsarai(NA) Biri, Bakery products and spices are manufactured where as Chilly, Tobacco and Turmeric are exported. On the other hand Mohiuddinagar town does not manufacture any commodity where as it exports spice, milk and Jamain to other places. Rosera(M) produces Bullock carts Wheel, Kamandal and Ventilator and exports Bailgari(Bullock carts) Wheel, Lichi and Chilly. Sugar, Furniture and Soap are mot important commodities manufactured in Samastipur Municipal area where as Tobacco, Chilly and Spices are among most important commodities exported out from this town.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

The table furnished above shows that are as many as 576380 households accounting for 97.0 percent of the total households of the district who are residing in dwelling in owned houses. The proportion of households dwelling in single room is highest (59.4%) where as it is the lowest (1.4 percent) for those living in no exclusive room. The median number of room is 1 for the total households in the tenure status of the owned dwellings.

There are 121957 scheduled castes households accounting for 21.2 percent of the total households dwelling in owned houses and the median number of room is 1. There are 2703 scheduled tribes households accounting for only 0.5 percent of the total households dwelling in owned houses and the median number of room is 1, only.

There are 10531 households accounting for 1.8 percent of the total households of the district dwelling in rented houses. The proportion of households dwelling in single room is the highest (39.9 percent) where as it is lowest (1.2 percent) for those dwelling in no exclusive room under this tenure status. There are 1159 scheduled castes households accounting for 11 percent of the total households dwelling in rented houses and the median number of room is 1. There are 211 scheduled tribe households accounting for 2 percent of the total households dwelling in rented houses and the median number of room is one.

Similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial no.	District/ C. D. Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It would be seen from the above table that of the total rural households maximum proportion of households i.e. 53.7 percent live in permanent houses followed by 26.2 percent living in temporary houses and 20.1 percent living in semi-permanent houses.

In case of urban households in the district also the maximum proportion of households i.e. 81.5 percent live in permanent houses followed by 12.3 percent households living semi-permanent houses and 6.2 percent living in temporary houses.

Among various C.D. Blocks of the district, Tajpur has the maximum proportion of rural households (67.9 percent) living in permanent houses followed by C.D. Block Samastipur (63.9 percent) and Ujiarpur (62 percent) C.D. Block Khanpur has the lowest proportion of households (37.9 percent) living in permanent houses. In case of semi-permanent houses C.D. Block Singhia has the

maximum Proportion of household (rural) i.e. 35.3 percent followed by Bithan with 33.5 percent. The lowest proportion of rural households living in semi permanent houses (12.9 percent) is in Warisnagar.

There are four urban areas in the district among which Samastipur has the highest proportion of households (90.2 percent) living in permanent houses followed by Rosera with 79.7 percent. Only 55.4 percent households in Mohiuddinagar town live in permanent houses where as, 38.2 percent households in Mohiuddinagar town live in semi permanent houses. On the other hand 9.6 percent households of Dalsingsarai town live in temporary houses.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

Table 50 shows that of the total rural households (573086) in the district 76.2 percent have improved drinking water facility. The highest proportion of households with improved drinking water facility can be

observed in C.D. Block Bithan with 86.8 percent followed by Hasanpur with 85.2 percent. Where as it is lowest i.e. 64.9 percent in C.D. Block Patori.

Regarding electricity it is found that only 5.8 percent of the total rural households in the district have it. The highest proportion of households with electricity is in C.D. Block Pusa with 24.8 percent where as it is lowest in C.D. Block Bithan with 0.3 percent.

Only 4.9 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Samastipur C.D. Block with 11.4 percent followed by Pusa C.D. Block with 10.5 percent where as it is lowest i.e. 2 percent in C.D. Block Bithan.

Only 13.9 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is in C.D. Block Pusa with 24.2 percent where as it is lowest i.e. 6.2 percent in Bithan.

Only 22.7 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is 33.6 percent in Patori C.D. Block followed closely by Samastipur C.D. Block with 32.1 percent where as it is lowest i.e. 14.2 percent in Singhia C.D. Block. So far urban areas are concerned all such facilities available to comparatively higher proportion of households ranging from as high as 83.9 percent to as low as 42.5 percent in the district. C.D. Block wise details can be seen from the table.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 51 above shows that 26.7 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is 45.6 percent in C.D. Block Pusa followed closely by Tajpur C.D. Block with 42.8 percent where as it is lowest i.e. 9.1 percent in C.D. Block Bithan.

58.6 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D./ Blocks, highest proportion of households using crop residue as fuel for cooking is 77.1 percent in C.D. Block Bithan where as it is lowest i.e. 38.5 percent in C.d. Block Pusa.

8.9 percent rural households in the district use cowdung cake as fuel for cooking. Among C.D. Blocks, the proportion of households using cowdung cake as fuel for cooking is highest i.e. 41.5 percent in C.D. Block Mohanpur where as its use is lowest i.e. 3.9 percent each in C.D. Block Pusa and Bibhutpur. Only 1.2 percent of the rural households of the district use L.P.G. for cooking purpose. The highest proportion of household using it is 6.4 percent in C.D. Block Samastipur followed by Pusa with 4.6 percent where as its use is lowest i.e. 0.1 percent in each C.D. Blocks Shivaji Nagar and Singhia. Electricity and coal/lignite/charcoal are use only by 0.1 percent rural households in the district where as Kerosene oil is by only 0.4 percent rural households in the district. Bio-gas is used by only 280 rural households in the district which is most negligible in terms of percentage. Other sources of fuel for cooking purpose is used by only 3.8 percent of rural households in the district where as 0.1 percent rural households in the district do no cooking work.

Considering type of fuel used for cooking in urban areas of the district it is observed that the proportion of urban households using firewood, coal/charcoal, L.P.G., Bio-gas and kerosene are higher as compared to rural households. On the other hand the proportion of urban households using crop residue, cowdung, electricity and other fuels lower as compared to rural households. C.D. Blockwise details can be seen in the table.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

It would be seen from the table above that 20.9 percent of the total households in rural areas of the district are availing banking services where as 52.2 percent of total households in urban areas of the district are availing this service. 27.8 percent rural and 41.5 percent urban households own Radio/Transister where as Television sets are possessed by 7 and 40.5 percents households rural and urban areas respectively. Telephone services are availing by 1.1 percent of rural households where as 13 percent urban households avail this facility. Bicycle is possesses as much as 49.8 percent of rural and 45.3 percent of urban households in the district. Motor Cycle, scooter and mopeds are owned by 2.9 percent of rural and 14.1 percent of urban households in the district. Car, Jeep Van etc are owned by only 0.7 and 2.2 percent of the rural and urban households respectively.

On the other hand, a good proportion of both rural and urban households in the district do not possess any of these assets or avail of any of the services shown in the table. The percentages of such households are 43.8 percent in rural and 33 percent in urban areas of the district.

C.D. Blockwise availability of Banking services and ownership of various assets can be viewed from the table placed above.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

Information is not available

No major social and cultural event has taken place in the newly created district of Saran since it was bifurcated into three separate district. Fairs and festivals are however held regularly in the district.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Information is not available

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

In Samastipir district entire tract forms a rich alluvial, noted for the fertility of each soil and excellence of its ruby crop. Orginally district wise separated by Darbhanga district. District is bounded by Bagmati river in north, which separates it from Darbhanga distict, on west by Vaishali district, in south by Ga nga river and east by Begusarai and Khagaria district

(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The

concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Col
umn-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate

lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)Primary School	P
(ii)Middle School	M
(iii) Secondary School	S
(iv) Senior Secondary School	PUC
(v)College	C
(vi) Industrial School	I
(vii) Training School	Tr
(viii) Adult literacy class/centre	AC
(ix) Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)Allopathic Hospital	H
Ayurvedic Hospital	HA
Unani Hospital	HU
Homeopathic Hospital	H Hom
(ii)Allopathic Dispensary	D
Ayurvedic Dispensary	DA
Unani Dispensary	DU
Homeopathic Dispensary	D Hom
(iii) Maternity & Child Welfare	MCW
(iv) Maternity Home	MH
(v)Child Welfare Centre	CWC
(vi) Health Centre	HC
(vii) Primary Health Centre	PHC
(viii) Primary Health Sub-Centre	PHS
(ix) Family Welfare Centre	FWC
(x)T.B. Clinic	TB
(xi) Nursing Home	NH
(xii) Registered Private Medical Practitioner	RMP
(xiii) Subsidised Medical Practitioner	SMP
(xiv) Community Health Worker	CHW
(xv) Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)Tap Water	T
(ii)Well Water	W
(iii) Tank Water	TK
(iv) Tubewell Water	TW
(v)Handpump	HP
(vi) River Water	R
(vii) Canal	C
(viii)	Lake L
(ix) Spring	S
(x)Others	O
(xi) Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)Post Office	PO
(ii)Telegraph Office	TO
(iii) Post & Telegraph Office	PTO
(iv) Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)Commercial Bank	CM
(ii)Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)Agricultural Credit Society	ACS
(ii)Non- Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)Cinema/Video Hall	CV
(ii)Sports Club	SP
(iii) Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)Bus	BS
(ii)Railway Station	RS
(iii) Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST

(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i) Pucca Road	PR
(ii) Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i) Sewer	S
(ii) Open Surface Drains	OSD
(iii) Box Surface Drains	BSD
(iv) Sylk Drains	SD

(v) Cesspool method	CP
(vi) Pit System	Pt
(vii) Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i) Head Loads	HL
(ii) Basket	B
(iii) Wheel Barrows	WB
(iv) Septic Tank	ST
(v) Pit System	Pt
(vi) Sewerage	S
(vii) Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i) Tap water	T
(ii) Tube-well water	TW
(iii) Tank Water	TK
(iv) Well water	W

Column 14 :

(v) Over Head Tank	OHT
(vi) Service Reservoir	SR
(vii) River Infiltration Gallery	RIG
(viii) Bore Well Pumping System	BWP
(ix) Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i) Hospital	H
(ii) Dispensary	D
(iii)Health Centre	HC
(iv)Family Welfare Centre	FWC
(v) T.B. Clinic	TB
(vi) Nursing Home	NH
(vii) Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i) Ayurvedic	A
(ii) Unani	U
(iii) Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i) Arts only	A
(ii) Science only	S
(iii) Commerce only	C
(iv) Arts & Science only	AS
(v) Arts & Commerce only	AC
(vi) Combined for all categories– Arts, Science and Commerce	ASC
(vii) Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i) Shorthand	SH
(ii) Typewriting	Type
(iii) Shorthand & Typewriting	SH Type
(iv) Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matri-culation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library	PL
(ii) Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT
STATUS AND

Serial number	Class, name and civic status of town	Location code number	Name of District/ Tahsil/ Police Station/Island etc.	Name of C.D. Block	Area (in sq. km.)	Number of households incl. houseless households (2001 Census)	Population and growth

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The

responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In

addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/C.D. Block / UA / City / Town
2. Primary Census Abstract for Scheduled Castes	District/C.D. Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/C.D. Block/Town
4. Village Primary Census Abstract	CD Block/Village wise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled

Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Samastipur	1991	87	99	117	124
	1981	107	120	142	161

Information on the question on children ever born and children surviving convased for all ever married women during 1981 and 1991 census has been compiled by age of the mother. Estimates of child mortality thus worked out are presented in Annexure II(c) below:

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in Annexure II as q(1),q(2),q(3) and q(5) it is observed that there has been decline in child mortality over decade (in 1991 Census as compared to 1981 Census) both in the district as well as the state.

An interesting feature which can be noticed from the annexure is that the child mortality at the ages 1,2,3 and 5 was higher in the district compared to the state average at the time of 1981 and 1991 censuses. It indicates that the pace of decline in child mortality had been slower in the district vis-à-vis the state.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the district and the State(1991-Census)	
	State	District
1	2	3
CBR	36.2	33.1
TFR	5.3	4.8
TMFR	5.9	5.3
GFR	163	151
GMFR	186	166
Child woman ratio	66.6	68.8
No. of children ever Born per woman age Group (45-49)	4.1	3.9
Mean age at marriage	16.5	15.5

Some other fertility measures for Samastipur district and the state of Bihar are furnished in above annexure III.

It can be seen from fertility data presented above that fertility measures such Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are lower in Samastipur district compared to the state average in 1991 census. The child woman ratio is found to be higher in Samastipur district compared to the state. Number of children ever born per woman in age-group 45-49 in Samastipur district is lower compared to the state. The mean age at marriage of females is also lower in the district compared to the state average.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Samastipur	575,782	42,931	532,851	270,657	29,538	241,119	846,439	72,469	773,970
	(67.1)	(55.7)	(68.2)	(31.5)	(38.3)	(30.9)	(98.6)	(94.0)	(99.0)

State/District	Born in other states			Born in other countries			Total migrants		
	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(.9)	(1.1)	(100.0)	(100.0)	(100.0)
Samastipur	11,163	4,333	6,830	952	287	665	858,554	77,089	781,465
	(1.3)	(5.6)	(.9)	(.1)	(.4)	(.1)	(100.0)	(100.0)	(100.0)

Note:-Total migrants exclude persons whose birth place is unclassifiable**.**

The growth of population for any area is influenced by the migratory movements of the people including in and out migration. However, for want of data on out-migration since such data is not collected in Census, it might not be possible to assess the net impact of out migration on growth of population, although such impact may not be much in most of the cases.

The above tables show percentage distribution of migrants by place of birth based on data recorded during 1991 and 2001 Censuses. It can be seen from the tables that total migrants in the district of Samastipur are 636,875 whereas in the state as a whole the migrants are found to be 21,307,020 in number (Samastipur constitutes 3.0 % of the migrants of the state). The corresponding figures for the district and the state for the year 2001 are 858,554 and 19,989,195 respectively. Samastipur constitues 4.3 percent of the total migrants coming to the state in 2001. Female migrants outnumber the male migrants both in the case of the district as well as the state in both the Censuses. While the male migrants constitute only 4.9 and about 9.0 percent in 1991 and 2001 respectively, the female migrants are as high as 91.0 and 91.0 percent of total migrants of Samastipur district in 1991 and 2001 respectively. The corresponding proportion of male and female migrants for the state as a whole works out to 10.9 and 89.1 percent respectively in 1991 and 10.5 and 89.5 percent respectively in 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of cases.

It can further be seen from the tables that most of the migratory movement has taken place within the district of enumeration in Samastipur district particularly in case of females both in 1991 and 2001 (67.5% for females as against 41.7% for males in 1991 and 68.2% females and 55.7% males in 2001). The proportion of male migrants born in other districts of the state is quite high, being 50.4 percent males as against 31.6 percent for females in 1991 and 38.3 percent and 30.9 percent respectively in 2001. The state average figures are also on the same line in 1991 and 2001 though the proportion of male and female migrants are slightly less to corresponding figures of the district of Samastipur.

The proportions of migrants (both males & females) born in other states and in other countries have been quite low in the district during 1991 and 2001 Census. However, the state average figures are found to be comparatively higher (except for males born in other countries during 1991 Cenasus) in case of migrants born in other states and born in other countries as compared to corresponding figures of migrants in the district during 1991 and 2001 Census.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Samastipur		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8

	Urban	990,737	375,267	615,470	19,550	11,190	8,360
		(4.9)	(1.9)	(3.1)	(3.1)	(1.8)	(1.3)
(2) In other states of India	Total	1,049,969	575,484	474,485	6,620	3,890	2,730
		(100.0)	(54.8)	(45.2)	(100.0)	(58.8)	(91.2)
	Rural	800,601	512,444	288,157	3,650	2,520	1,130
		(76.2)	(48.8)	(27.4)	(55.1)	(38.1)	(17.1)
	Urban	243,448	60,040	183,408	2,960	1,360	1,600
		(23.2)	(5.7)	(17.5)	(44.7)	(20.5)	(24.2)

Of the total intrastate migrants in the state 82.6 percent were rural to rural, 3.1 percent were from urban to urban, 12.2 percent were from rural to urban and 1.9 percent were from urban to rural. In case of Samastipur district, of the total intra-state migrants, 90.8 percent were from rural to rural, 1.3 percent were from urban to urban, 5.8 percent were from rural to urban and 1.8 percent were from urban to rural.

In case of migrants from other states, 48.8 percent were from rural to rural, 17.10 percent were from urban to urban, 27.4 percent were from rural to urban and only 5.7 percent were from urban to rural for the state of Bihar. In case of Samastipur district, on the other hand, of the total migrants, 38.1 percent were from rural to rural, 24.2 percent from urban to urban, 17.1 percent were from rural to urban and 20.5 percent were from urban to rural.

Orissa	42,215	2.7	Total for nine states	10,632	95.2
Maharashtra	38,244	2.4	Other states	531	4.8
Rajasthan	20,542	1.3	**Total**	**11,163**	**100.0**
Haryana	20,505	1.3			
Andhra Pradesh	18,371	1.2			
Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

The data presented in the above tables pertaining to 1991 and 2001 Censuses deal with the magnitude of inter-state migration to the state of Bihar as also migrants coming from other states to Samastipur district. It will appear that the district received only 0.6 percent of the total migrants coming from other states to Bihar in 1991 and 0.7 percent in 2001 (6,620 out of 1,049,969 in 1991 and 11.163 out of 1,582,339 in 2001). The state of West Bengal and Uttar Pradesh in 1991 and Uttar Pradesh alongwith Jharkhand in 2001 were the major contributors of migrants to the state in 2001. For the district of Samastipur West Bengal, Uttar Pradesh and Haryana in 1991 and Jharkhand alongwith Wast Bangal and Uttar Pradesh in 2001 have been the major contributors. Nine major contributing states in 1991 and 14 such states in 2001 contributed 93.4 and 97.2 percent of the total migrants to the state of Bihar respectively. In case of Samastipur district 13 major states in 1991 and only 9 such states in 2001 contributed over 94.0 and 95.2 percent of total migrants to the district respectively.

The data presented in Annexure-V (A) show religion wise distribution of population according to 1991 and 2001 Censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the Censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001 respectively. The Muslims come next with 14.8 and 16.5 percent respectively. Christians had been the third most important religious community though it proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the state during both the Censuses. Persons categorized under "Other Religions & Persuasions" comprised 1.7 and 0.1 percent of the state's population during 1991 and 2001 Censuses.

In Samastipur district the proportion of Hindus to the total population of the district remained 89.9 percent in 1991 and 89.4 percent in 2001 which comparatively higher than the respective state averages. Muslims constituted 10.1 and 10.5 percent of the district's population in 1991 and 2001. The proportion of population of other religious communities remained almost negligible in the district of Samastipur during both the Censuses as Hindus and Muslims taken together comprised over 99 percent of the total population of the district during both the Censuses.

ANNEXURE V (B)

The above Annexures furnish religion wise distribution of population for the district of Samastipur and its C.D. Blocks in 1991 and 2001 Censuses.

As already observed in Annexure V (A) of 1991 and 2001Census, though the proportion of Hindus in the district of Samastipur is highest as compared to other religious communities still it was seen that Muslims also formed a sizable chunk of population in the district. Among the C.D. blocksof the district Every C.D.Block of the district constitute Hindus as their main population. Pusa C.D.Block (with 18. %) during 1991 Census and newly created Tazpur C.D.Blocks (with 26.8) during 2001 Census constituted the highest proportion of Muslims population

The existence of other religious communities in various C.D. Blocks of the district is insignificant as their proportions to total population are almost negligible in both the Censuses.

Annexure V1 (A) furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991 and 2001 Censuses while Annexure (B) shows percentage distribution of population by marital status for the state. The Annexures V1 (C) and V1 (D) presented above give corresponding figures and percentages for the district of Samastipur.

It shall be evident from Annexures V1 (A) to V1 (D) pertaining to 1991 and 2001 Censuses that the state of Bihar as well as Samastipur district have relatively higher proportion of males in the "never married" category. The proportion of females, however, is found to be larger in the "married" category. This may, perhaps, be attributed to the fact that women, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 55.1 percent of "never married" males in 1991 Census and 56.3 and 56.4 percent in 2001 Census in Bihar state and Samastipur district respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 44.3 percent in 1991 and 47.3 and 46.4 in 2001 Census. Females are found to be higher in proportion in the "married" category than males both in the state and the district in both the Censuses, the percentages being 49.8 and 50.5 percent in 1991 and 47.8 and 48.4 percent in 2001. The corresponding figures for males in 1991 and 2001 Censuses stand at 43.6 and 42.9 and 41.6 and 41.5 respectively. So far the proportion of "widowed" is concerned, it transpires from the tables pertaining to 1991 and 2001 Censuses that female "widowed" are higher in proportion than male "widowed" both in the state as well as in the district. The proportion of "divorced or separated" is found to be negligible both in case of males and females in the state of Bihar and Samastipur district.

While analyzing tables for 1991 and 2001 Censuses regarding marital status of the male and female population by age groups, one notices that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than in males. It may, however, be interesting to note that proportion of married males and females in the age group 10-14 is less in Samastipur district as compared to the state average figure in both the Censuses. It is also discernable from the table that child marriage is more prevalent in the rural areas i.e., villages of the state and the district than the urban areas i.e., towns.

It is further noted from the tables pertaining to both 1991 and 2001 Censuses that the proportion of " never married" females in the state as a whole and the district is relatively lower than the proportion of "never married" males in all the age groups.It is also evident from the Annexure that proportion of married males is higher than the proportion of married above age group 35-39.

Annexures VII(A),VII (B), VII (C) and VII (D) furnish position of literacy and level of education by various age –groups of population for the State of Bihar and the district of Samastipur respectively as per data collected during 1991 and 2001 Census. Among these, Annexures VII (A)and VII (B) provide literacy position absolute in numbers whereas Annexures VII (C) and VII (D) give these figures in terms of percentages.

Literacy is one of the most important characteristics of population on which information is collected during Censuses. The concept of literacy adopted in Census has already been explained in the beginning of this volume.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The rate of literacy for Bihar(excluding population of 0-6 years) in 1991 stood at 38.5 percent which rose to 47.0 percent in 2001. The corresponding proportion for Samastipur district in 1991 and 2001 remained 28.5 and 45.1 percents respectively.

It can be seen from the Annexures that 22.4 percent males and 28.1 percent females in 1991 were literate without educational level in Samastipur. The corresponding proportions in 2001 including Below Primary remained 34.6 and 40.3 percent respectively. The proportions of Primary passed Males and females in 1991 were 22.6 and 26.3 percents respectively which became 24.9 and 28.9 percent in 2001 in the district. In 1991 there were 24.9 and 25.8 percent males and females who had passed middle whereas in 2001, the corresponding figures remained lower at 13.1 and 12.7 percent respectively. The proportion of those who had passed Matriculation and above in 1991 were 30.1 and 19.8 percent for males and females respectively in the district, the corresponding figures in 2001 remained 26.8 and 18.0 percent only which were lower than the previous Census. Males outnumbered females in the matter of literacy particularly in higher levels of education comprising of Matriculation and above. Same trend can be observed in case of State also.

ANNEXURE – VIII

PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Samastipur		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Maithili	1,501,002	44.2
Hindi	14,524,035	17.5	Hindi	1,397,862	41.2
Magadhi/Magahi	12,132,383	14.6	Urdu	305,188	9.0

Marwari	27,152	0.0	Punjabi	636	0.0
Total of Other Mother Tongues	12,842,100	15.5	Total of Other Mother Tongues	172,002	5.1
Total Population	**82,998,509**	**100.0**	**Total Population**	**3,394,793**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Samastipur district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population.Maithili as mother tongue has been returned by 44.2 percent of Samastipur district's population. Hindi has got second position with 41.2 percent of the district population having returned it as their mother tongues. Urdu placed in the list at third place returned by 9.0 percent of districts population as their mother tongue.Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions or very low proportion of the respective population of the state and the district as mother tongues as per Census 2001.
