Maa Katyayani Asthan

Maa Katyayani Asthan is one of the most important cultural and historical repository of Khagaria district. The temple is situated on the route of Mansi-Saharsa narrow guage railway near Dhamahara railway station on the bank of Koshi river at a distance of about 20 km from the district headquarters – Khagaria.

Maa Katyayani is worshiped as savour goddess of agriculture and cattle and temple as seat of power. It is believed that Maa Sati's hand had fallen here. Some believe that Bhagwati Durga was born as a daughter of saint Katyayan in his Ashram on the bank of Koshi, hence the Devi was named as Kaetyayani.

It is believed strongly that Maa Durga had appeared in dream of Sripat Maharaj and after that he founded a mud temple here which was reconstructed into a grand temple after about 350 years in 1951. A Board of trustee is also here to look after the management of the temple.

Annexure VII : Age, sex and education in the district, 1991 & 2001 Censuses 315

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 321

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide ranging utility. Census after Census much innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of population data. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective district. This publication has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organisation, and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B – village and townwise Primary Census Abstracts pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Caste and the Scheduled Tribe Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry and banking and civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the comparision of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office S/Shri Phool Singh ex-Joint Director, A.K. Saxena Deputy Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Assistant Directors and Shri Ramesh Prasad, S.I.Grade-I supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance it has been rare privilege to strive for results. I am deeply grateful to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Shri R.G. Mitra, Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

District Highlights – 2001 Census

1. Khagaria ranks 33rd in terms of population (12,80,354) and 33rd in terms of area (1,486 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Khagaria is the 19th densely populated district in the state with 862 persons per sq.km as against the state's 881.
3. Khagaria ranks 34th in terms of sex-ratio (885) against the state's 919.
4. There are 60 uninhabited villages (out of 301 total villages) in the district of Khagaria.
5. Borne (under Chautham C.D. Block) is the most populated village (25,151) and Darhi (under Khagaria C.D. Block) is the least populated village (25) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Parbatta has the highest number of villages (69) in the district and C.D. Block Mansi has the lowest number of villages (14).
8. Rahimpur (under Khagaria C.D. Block) has the largest area (5,104 hectares) and Tetarabad (under Khagaria C.D. Block) has the smallest area (4 hectares) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 97.9 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for

the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) mortality (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other

concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Khagaria was created as a separate subdivision mainly because of the difficulties arising out of a lack of easy means of communications. Railways were a very old means of communication in this district. As per the Gazetteer of 1960, this Subdivision has three railway lines the North Eastern Railway, passing west to East had four Stations – Khagaria, Mansi, Maheshkhunt and Pasraha . One branch line shoot off from Khagaria passing through Olapur and Imli, while another branch line shot off from Mansi, Which went up to Saharsa. This Mansi- Saharsa branch line, during that period was however disturbed during rains between Katyani Asthan and Koparia, a distance of 6 miles, which had to be covered by boats. Apart from railways, the other means of communication was roads, which were in a very bad shape. The only metalled road at that time was 22 mile long Maheshkhunt- Aguawani ghat road, which was still under construction. During that period Khagaria-Parihara- Bakhri Road was also under construction and national Highway linking Mokamaghat to Assam was under contemplation.

Munger, of which Khagaria was a part, in the later history, come into prominence, in the year 1762, when kasim ali khan made it his capital instead of Murshidabad , from which he removed his treasure, his elephants and horses, and even the gold and silver decorations of the Imambara. He built himself a palace with a breast work befor it for thirty guns, and had the fortifications strengthened; while his favourite General Gurghin Khan an Armenian who had formerly been a cloth merchant at Ispahan, reorganized the army, had it drilled and equipped after the English model, and established an arsenal; the manufacture of fire-arms, which still is carried on at Munger, is said to date back to this period, soon after he had established himself at Munger, Mir Kasim Ali came into collission with the English, which finally resulted in capture of Munger in the year 1763.

With the extension of the British dominions, Munger which included Khagaria ceased to be an important frontier post. The existence of Munger, as a separate executive centre is believed to date from the year 1812. The extent of the Munger jurisdiction is not mentioned in the local records till september 1814, when it is stated to comprise five Thanas or Police divisions, namely, Munger,Tarapur,Surajgarha, Mallepur and Gogari, In 1834 pargana chakai was transferred from the district of Ramgarh and in 1839 pargana Bishazari from the district of Patna, Numerous minor changes followed but the greatest change was effected in June 1874, when parganas Sakhrabadi, Darra, Singhaul, Kharagpur and Parbatta were transferred from Bhagalpur to Munger, together with tappas lowdah and simrawan and 281 villages from parganas sahuri and lakhanpur comprising in all an area of 613.62 square miles. The Subdivision of jamui was formed in 1864, at first with headquarters at sikandra, but in 1869 they were transferred to Jamui. The Begusarai subdivision was established in 1870 and in 1943-44, Khagaria subdivision was established with headquarters at Khagaria.

When Khagaria subdivision was created, it comprised of an area of 752 square miles and as per the Census of 1951, had a population of 5,84,625 persons. It had seven Police Thanas, namely, Khagaria, Gogari, Chautham, Parbatta, Alauli, Beldaur and Bakhtiyarpur. Presently, Bakhtiyarpur forms part of Saharsa district, Most of the part of Khagaria district was referred to as ‘ Pharkiya Pargana.’ In the 1926 District Gazetter of Munger, it has been referred as “a pargana in the north east of the Munger Subdivision, with an area of 506 square miles comprised mainly within the Gogari thana.” This tract formerly belonged to an ancient family of Zamindars, of whose history little is known except what was collected in 1787 by Mr. Adair, the collector of Bhagalpur. Towards the close of the 15th century, the Emperor of Delhi sent a Rajput, named Biswanath Raj, to contain lawlessness in the area. He successfully accomplished the task and obtained the grant of a Zamindari in this part of the country, and the estate developed on his posterity without interruption for ten generations. The annals of the family, however, after the first quarter of the 18th century, are a record of little but bloodshed and

violence. At the time of publication of the 1926 Gazetteer , the greater portion of the estate was the property of Babu Kedarnath Goenka and Babu deonandan Prasad.

(iii) Administrative set up

The district of Khagaria is bounded on the north by the district of Saharsa on the south by the district of Munger on the east by the districts of Madhepura and Bhagalpur and on the west by the districts of Begusarai and Samastipur. Presently the district of Khagaria has got two subdivisions viz., Khagaria and Gogri. There are seven Community Dev. Blocks in the district namely, Alauli, Khagaria, Mansi, Chautham, Beldaur, Gogri and Parbatta. There are two towns namely Khagaria (M) and Gogri Jamalpur (NAC) in the district. Total number of villages in the district is 301.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has two subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are seven C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration : The Judges and Munshif magistrates are posted at district and subdivisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Khagaria is the head of the district police administration who is either from the Indian Police Service or the Bihar Police Service. In the subdivisions of the district, the Deputy Superintendents of Police are posted who keep control on police administration.

(iv)Physical Features

The district of Khagaria is bounded on the north by the district of Saharsa on the south by the district of Munger on the east by the districts of Madhepura and Bhagalpur and on the west by the districts of Begusarai and Samastipur. Before the construction of embankments besides the Ganga, the Bagmati, the Burhi Gandak and the Kosi, namely karachi badlaghat embankment, Badla- Nagarpara embankment, Burhi Gandak protection embankment and Gopgari- Narayanpur embankment, the vast tract of present Khagaria district was flat allucial plain and was abound in marshy and swampy land. The characteristics of this part north of Ganga has been described as follows by a former collector of Munger, Mr. E. Lockwood in “Natural History, Sports and Travel”- “The northern part is an extensive plain formed by the rich alluvial soil brought down by the ever changing river. In the north nine tenths of the trees are cultivated mangoes, whilst wheat, Indian corn, various kinds of millet, peas, masur, rahar, oats, indigo, mustard, linseed and castor oil, are the principal crops which the land holders find profitable to grow.” He further describes that in contrast, “the southern portion (south of the Ganga) consists of vast rice tracts and forests, which cover the metamorphic hills extending far away into central India from the town of Monghyr. In the forest of the south are found the ebony tree, the sal and the mahua. The south also yields vast quantities of rice,and a hundred and fifty tons of opium, grown on twenty five thousand acres of land, whilst, after crossing the Ganges, little rice and not a single poppy will be seen.”

The major part of the alluvial plain comprising this district, at present, is mainly a saucer- shaped depression, the center of which was inundated during the rains by the over flow of the rivers and for the rest of the year was full of marshy hollows. The inundation has decreased after construction of embankments but still a large part in the north eastern part of the district, contained in west by Gogari, Maheshkhunt – Saharsa Road, in the north by the Koshi and in the south by the Ganga is completely inundated during rainy season except for the National Highway and the New Delhi – Gauhati Railway line.

River System

The principal rivers of the district are the Ganga, the Burhi Gandak, the Bagmati and the Ghaghra, The Ganga forms the southern boundary of the district in

its entire length. This river has severe shifting tendencies resulting in a vast tract of diara land, the northern side and several hamlets of the present Munger district have resettled on the north of the Ganga due to erosion caused by the shifting of the river. Due to cast tract of diara land, during rainy season, at some places, the breadth of the river runs into miles.

The Burhi Gandak, runs a Zig-Zag course through the district of Begusarai and enters Khagaria for a short while, running by the side of the town of Khagaria, and flow in to the Ganga. It forms the western boundary of the Khagaria town and a protection embankment built along the eastern side of this rive, protects Khagaria town from the floods of Burhi Gandak.

The Bagmati enters the district from the western side, through the district of Begusarai. It then pursues a winding but generally easterly direction, till it flows into the tilijuga or the Kamla near Chautham.

The Tilijuga or the Kamla enters the district from Darbhanga, near Mohraghat, It then flows south east to Chautham, merges into the Bagmati, and the united stream flows into the district of Bhagalpur under the name of the Ghaghri, which is known as one of the main branches of the Kosi.

Climate and flora and the fauna

The climate of the district may be said to form a medium between the dry, parching heat of the up country and the close moist atmosphere of the south valley of Bengal. The heat is often intense but is very favourable during the rains because of low humidity. The seasons are the same as in the other parts of Bihar. The summer begins towards the middle of march and continues upto the end of June, when the rainy season begins, The months of April and May combine heat with high humidity relieved by intermittent rain falls. The rainy season continues upto October , while the water logging due to rain water continues in some areas up to the end of December. The winters are quite pleasant in this area.

In contrast to the southern portions of the old district of Munger, this district, lying north to the Ganga does not comprise of any forest of Sal or other large trees. However ever growing jungles of Kash and Pater is found in the northern areas in the belt of the Kosi and its tributaries .At most of the places ,there are luxuriant gardens of mango and litchi ,for which this district lis mostly famous . Apart from these ,Babool , Neem,Sirish and Sisho are also found. Not the least valuable product is thatching grass .It is grown on low land subject to inundation which retains water too long to enable the villagers to sow a cold weather crop upon it.

Wild animals, such as boars were occassionally found in the northern area but now they are scarcely seen. However, birds are seen in large number in the various chours, particularly, in the area visited by the Kosi, the Kamla and the Bagmati. Snakes are also found in the river basins in a large number. Fish are abundant because of the rivers and the chours. Rohu, Kabai and Tengra are particularly known. During the winters, migratory birds come in large number in the northern part of the district.

Land use pattern

In the whole district, there is no hill and no mineral is found in this district. As far as the land use pattern is concerned, wheat is the prominent rabi crop in the district. Due to floods and water logging, the paddy production is very low, except in the southern part of the district. Maize is grown abundantly almost through out the district, while banana cultivation as a cash crop, has grown into prominence in last two decades. Banana cultivation is done mostly in Choutham, Gogari and Parbatta blocks.

Apart from these mango and litchi orchards are abundant in this district and are found almost through out the entire area. The study of old gazetteers show that these orchards have been in existence since long.

Irrigation facilities

After independence, the government has tried to create irrigation facilities through state tube wells and lift irrigation schemes. There are around 150 state tube wells and 20 lift irrigation schemes but 75 percent of the tube wells and 80 percent of the lift irrigation schemes are non functional because of poor maintenance. Despite the abundance of rivers in the district, there does not exist any system of canal

irrigation. As a result, the cultivators are dependent on the use of private borings fitted with pump sets. Fortunately, due to high water level in the area, the cost of boring is not very high and even middle class farmers can afford to have private boring and pump sets. Agriculture, being the mainstay of the economy of the district, Government sponsored financing programmes, also give importance to bank financing of individual owned irrigation projects, comprising mainly of 5-7.5 KVA pump sets and boring.

Animal Husbandry

The rearing of milch cattle had been a traditional occupation in this area. The 1960 Gazetteer says, "There is good pasturage among the hills to the south during the rainy season and in pasturage grounds of Pharkiya, in the dry season, but elsewhere grazing lands are scare. During the dry season, and only those who can afford to send their animals to the north gangetic plains in pargana Pharkiya keep good stock" Even people from the district of Darbhanga, Muzaffarpur and Bhagalpur used to visit this tract for the grazing of the cattle during dry season.

Industrialisation

The economy of the district is dependent entirely on agriculture and its two main allied activities, namely horticulture and dairy. Industrialisation is completely absent. This district has potential for agro- based industries because of large production of banana and maize, but so far no industry has come-up. The development of Barauni district of Begusarai, as a prominent industrial area , has also pre-empted any industrialization in this district as entrepreneurs move towards Barauni or to the upcoming town of Silliguri in West Bengal, rather than investing in this district. Another reason is lack of surplus capital in this district because of historical reasons, as mentioned earlier. Agriculture was never so profitable here, as to generate surplus capital. Small business is the only non agricultural economic activity in this district.

Transport

This district is well connected to other parts of Bihar and the country through railways as well as roads. New Delhi – Gauhati railway lines passes through Khagaria. Other prominent stations are Mansi, Maheshkhunt and Pasraha, from Mansi one branch line goes towards Saharsa, while from Khagaria, one branch line goes towards Samastipur. Both these branch lines are still meter- gauge. Mansi had been an important place from the point of view of railways, since it used to be the headquarters of an Engineering district of railway but now most of important offices of railways have shifted from this place to Barauni, which falls in Begusarai district.

National Highway No. 31 passes through the district almost parallel to the railway line in west-east direction. Almost 46 Km. of NH- 31 falls within the jurisdiction of Khagaria district NH-31 goes right upto Gauhati and is an important road link of Bihar to the north – eastern part of the country and to Northern Bengal. From Maheshkhunt, on NH-31, branches off one road to Saharsa district.

Apart from National highway, the condition of other roads in the district is not very good. Historically also the situation had been the same. Excessive rains and water logging coupled with poor maintenance account for this. Prominent roads of the district, which are maintained by Road Construction department are Maheshkhunt, Chauthm, Beldaur Road (26 Km.), Maheshkhunt – Gogari- Parbatta- sultanganj ghat Road (32 Km.), Khagaria- Alauli Road (18 Km.), Khagaria – Parihara- Bakhri Road (19 Km.), Khagaria-Munger ghat Road (6.5 Km.) , Khagaria-Sonmankhi Road (6.5 Km.) and Pansalwa – Baijnathpur Road (11 Km.).

The condition of other roads, some of which maintained by Rural Engineering organisation and some by block and Panchayats are not good. Due to existence of several rivers and rivulets, all weather communication in the interiors of the district would require huge investment in bridges and culverts, the lack of which makes large part of country side accessible by boats only during the rainy season.

Trade and commerce

Trade and commerce are the only non-agricultural economic activity in the district . Khagaria and Gogari Jamalpur are the two important trade centres. Main trading item is foodgrains. Apart from foodgrains there are small number of traders in other items, as, textiles, hardware, jewellery and other

commonly used items. Khagaria is a municipality while Gogari is a notified area. None of these is a fast growing township. In 1921 census, Khagaria, Which increased to 10,050 in 1951 census and in 2001, it is estimated to be near 45,000 persons. The 1960 Gazetteer of Munger terms Khagaria as "an important trade centre", where from large amount of chillies and grains were exported; and merchants from far and near corners of India have come and settled down here". In comparison, it seems that during last fifty years, most of the trading community has shifted out of the district, either to Begusarai and Patna, or to Siliguri. Due to the abundance of milch cattles in this area ,sale of milk and milk-product ,especially ghee is also an important business activity here.This has been a traditional occupation of this area.The 1960Gazetter says ,''the only small industry ,which has earned a good name among the people is ghee making ,which is carried on in this subdivision on a large scale .This is entirely due to a large number of she-buffaloes being reared in the Pharkiya Paragna. Many good cultivators send their cattle to the Pharakiya-paragna for pasturage.Khagaria is famous for ghee making and in the Bazar a good trade has sprung up. There are certain firms in Khagaria,Mansi, ,Badlaghat and Pasraha ,which send ghee to district places."

An organized boost has been given to this trade of milk,through formation of dairy co-operative societies. .Societies collect raw milk from members and send it to the chilling plant at Khagaria ,which sends chilled milk to Barauni processing plant of Barauni milk union ,where the chilled milk is processed and various milk products as well as packaged milk is sent to the market .The co-operative system ensures steady income to the farmers and provides market at their door-step itself. Still, due to poor communication in interiors ,large amount of milk production is still outside the net of co-operative system . Increasing the number of societies as well as increasing the membership of existing societies ,can be a very viable means to inject additional capital in the economy of this district and will specially be beneficial to small and medium farmers.

Electricity and Energy

The district of Khagaria has one grid station of 20 KVA at Khagaria and 3 Sub-stations.The availability of electricity is not steady and stable in the district.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof

may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate

building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household

Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an

institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi

22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any

economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business,

transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewerage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as

number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex

group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age

group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/ his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Khagaria district during 1991 was 987,227 Hindus constitute over 90.3 per cent (891,178persons) of the population in the district followed by Muslims 9.7 percent (95,908 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Khagaria district during 1991 was 987,227. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Khagaria district, Hindi, the main mother tongue of the district was returned by 91.9 percent (907,569 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Khagaria district, was 8.0 percent (79,413 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Khagaria during 1991 census.

The population of the Scheduled Castes in the district of Khagaria during 1991 census was 143,026. Numerically five important SCs were namely, (i) Musahar, (ii) Dusadh, Dhari, Dharhi, (iii) Chamar, Mochi, (iv) Dhobi and (v) Dom, Dhangad. The population of Musahar was 57,085 which constituted 39.9 percent of the Scheduled Castes population. The population of Dusadh/Dhari was 38,951 which constituted 27.2 percent of the Scheduled Castes population. Chamar/Mochi had 30,433 population which constituted 21.3 percent of the Scheduled

Castes population. Dhobi had 8832 population while Dom/Dhangad had 2588 population. Dhobi constituted 6.2 percent while Dom/Dhangad constituted 1.8 percent of the Scheduled Castes population.

The population of the Scheduled Tribes in the district of Khagaria during 1991 census was 35 only. Numerically five important STs were namely, (i) Unclassified, (ii) Santal (iii) Gond, (iv) Kharwar and (v) Munda. Unclassified had 15 population which constituted 42.9 percent of the Scheduled Tribes population. Santal had 9 population which constituted 25.7 percent of the Scheduled Tribes population. Gond had 4 population which constituted 11.4 percent of the Scheduled Tribes population. Munda had only 1 population which constituted 2.9 percent of the Scheduled Tribes population. Oraon had also the same number as that of Munda.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Khagaria district is 1,280,354 comprising 679,267 Males and 601,087 Females and constituting 1.5 percent of the State population spread over 1.6 percent of the area of the State in the 7 C.D.Blocks of the district. Khagaria is the most populous where as Mansi is the least populated C.D. Block in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
number	C.D. Block	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Alauli	160,102	160,102	0	213,845	213,845	0	33.6	33.6	0.0	0.0	0.0
2	Khagaria	231,430	197,240	34,190	295,480	250,259	45,221	27.7	26.9	32.3	14.8	15.3
3	Mansi	56,833	56,833	0	74,297	74,297	0	30.7	30.7	0.0	0.0	0.0
4	Chautham	85,988	85,988	0	113,761	113,761	0	32.3	32.3	0.0	0.0	0.0

	District											
	Total:	**987,227**	**928,423**	**58,804**	**1,280,354**	**1,204,027**	**76,327**	**29.7**	**29.7**	**29.8**	**6.0**	**6.0**

Table 1 shows rise in the population of this district during 1991-2001 decade has been of the order of 29.7 percent. The rural population on the district has increased by 29.7 percent while the urban population growth over the decade has been 29.8 percent. Among the C.D. Blocks, Alauli has shown the highest increase in population over the decade with 33.6 percent. The next highest increase in population is observed in Chautham C.D. Block with 32.3 percent followed by Beldaur with 32.1 percent. Percentage decadal variation has been observed to be the least in the case of Gogri C.D. Block with 27.1 percent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

	District (Rural)									
	Total:	**75 (31.1)**	**133,158**	**117,799**	**72 (29.9)**	**254,118**	**227,264**	**28 (11.6)**	**212,640**	**187,214**

A village on an average has a population of 4,996 persons in the district of Khagaria. 3 villages (1.2%) are in the range with population of less than 200, 8(3.3%) are in the range of 200-499, 18(7.5%) are in the range of 500-999, 37(15.4%) are in the range of 1000-1999, 75(31.1%) are in the range of 2,000-4999, 72(29.9%) are in the range of 5,000-9999, and remaining 28(11.6%) are in the range of 10,000 and above. For a broader generalization, villages have been grouped as small size less than (500), medium sized (500-1999), large size (2000-4999) and very large sized (5000+). Within the district small sized villages of less than 500 inhabitants together account for 4.5 per cent of the total inhabited villages with 0.25 per cent of the rural population in the district, medium sized (500-1999) 22.9 per cent of the total inhabited villages and 5.7 per cent of the rural population, a large sized (2000-4999) 31.1 per cent of the total inhabited villages with 20.84 per cent of the rural population and very large sized (5000+) 41.5 per cent of the total inhabited villages and 73.2 per cent of the rural population.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicable in respect of Khagaria district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	2	0.8	2,846	0.2
11-20	1	0.4	25	0.0
21-50	0	0.0	0	0.0
51-100	5	2.1	1,308	0.1
101-200	10	4.1	8,695	0.7
201-300	10	4.1	15,537	1.3
301-500	28	11.6	109,809	9.1
501 +	185	76.8	1,065,807	88.5
Not known	0	0.0	0	0.0
District Total:	**241**	**100.0**	**1,204,027**	**100.0**
Population Density (Rural) of the district:		**893**		

The data presented in the above table highlight the fact that maximum proportion of villages in Khagaria district lies in the density range (per square kilometre) of 501 + with 76.8 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 11.6 percent. It would further be seen that small number of villages fall in the density range of 11-20 which account for 0.4 per cent of the total inhabited villages.

The above table further reveals that the maximum number of villages which fall in the density range of 501 + cover 88.5 per cent of the population followed by villages in the density range of 301-500 which account for 9.1 per cent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,045	1,045	1,037
1911	1,051	1,056	942	1,046	1,049	969
1921	1,020	1,027	886	1,022	1,028	849
1931	995	1,005	820	998	1,001	909
1941	1,002	1,012	842	998	1,001	927
1951	1,000	1,010	859	939	940	891
1961	1,005	1,020	832	943	947	823
1971	957	968	833	894	896	854
1981	948	959	852	902	905	855
1991	907	913	857	868	868	855
2001	919	926	868	885	888	842

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows that sex ratio for the rural and urban areas of Khagaria district is comparatively low as compared to the rural and urban areas of the state during 1991 and 2001 censuses. However on the other hand, the urban sex ratio of the district is higher than the urban sex ratio of the state during 1971 and 1981 censuses. It means that the urban sex ratio of the district has declined during 1991 and 2001 in comparison to the sex ratio of the state. It is found that in cases of sex ratio in the total population in the district it is lower than the sex ratio of the state of Bihar both in 1991 and 2001.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C. D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Alauli	893	893	
2	Khagaria	879	891	819
3	Mansi	868	868	
4	Chautham	894	894	
5	Beldaur	918	918	
6	Gogri	866	865	876
7	Parbatta	885	885	
	District Total:	**885**	**888**	**842**

In Khagaria district as a whole there are 885 females for every thousand males.Within the district, the Sex ratio varies from 918 in Beldaur C.D. Block to 866 in Gogri. The sex ratio of Chautham C.D. Block is 894 while the sex ratio of Parbatta C.D. Block is 885. The sex ratio of Alauli C.D. Block is 893. The sex ratio figures for rural and urban areas of Khagaria district are 888 and 842 respectively.

The sex ratios of Beldaur, Chautham, Alauli and Khagaria are higher than the district rural average of 888 while Parbatta (885), Mansi(868) and Gogri (865) have sex ratios below the district rural average .The urban sex ratio of the district is 842 which is lower than the total and rural averages of the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio
1	2	3
1	Alauli	893
2	Khagaria	891
3	Mansi	868
4	Chautham	894
5	Beldaur	918
6	Gogri	865
7	Parbatta	885
	District (Rural) Total:	**888**

As for rural in Khagaria district there are 888 females for every thousand males. Within the district the sex ratio varies from 918 in Beldaur C.D. Block to 865 in Gogri C.D. Block. The sex ratios of Alauli, Khagaria, Mansi, Chautham and Parbatta C.D. Blocks are 893, 891, 868, 894 and 885 respectively. The sex ratios of Alauli, Khagaria, Chautham and Beldaur C.D. Blocks are higher than the district rural average of 888 while Mansi, Gogri and Parbatta C.D. Blocks have sex ratios below the district rural average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	0	0.0	0	0.0
700-749	1	0.4	743	0.1
750-799	6	2.5	4,188	0.3
800-849	34	14.1	118,706	9.9
850-899	106	44.0	654,867	54.4
900-949	75	31.1	364,361	30.3
950-999	15	6.2	52,901	4.4
1000-1099	4	1.7	8,261	0.7
1100+	0	0.0	0	0.0
District Total:	**241**	**100.0**	**1,204,027**	**100.0**
Sex ratio (Rural) for District:		**888**		

It is observed from the above table that the maximum proportion of villages in Khagaria district lies in the sex ratio range of 850-899 and these villages account for 44.0 per cent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 54.4 per cent of the district rural population. 75 villages (31.1 percent) fall in the sex ratio range of 900-949 and these villages account for 30.3 per cent of the rural population of the district. 34 villages (14.1 percent) are in the sex ratio range of 800-849 and these villages account for 9.9 per cent of the rural population. 15 villages (6.2 per cent) fall in the favourable sex ratio range of 950-999 and these villages account for 4.4 percent) of the rural population. 6 villages (only 2.5 percent) are in the sex ratio range of 750-799 and these villages account for only 0.3 percent of the population. Only 4 villages (only 1.7 percent) fall in the very favourable sex ratio range of 1000-1099 and this small proportion of villages accounts for 0.7 percent of the population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Urban status of town	Sex ratio
1	2	3	4
1	Gogri Jamalpur	NA	876
2	Khagaria	M	819
	Sex ratio (Urban) for the district:		**842**

\+ To be arranged in alphabetical order

There is no urban agglomeration in Khagaria district. There are two urban unit i.e. Khagaria (M) and Gogri Jamalpur(NA).The sex ratios of these two statutory towns are 819 and 876 respectively according to 2001 Census.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

		Urban	**76,327**	**5,538**	**56**	**7.3**	**0.1**

The above table indicates that the percentage of the Scheduled Castes in Khagaria district is of the order of 14.5 percent of the total population. The highest percentage of Scheduled Castes population is contained in Alauli C.D. Block with 25.4 per cent of the total population closely followed by Chautham, Khagaria, Beldaur, Gogri and Parbatta C.D. Blocks with 17.5, 15.7, 15.5, 8.1 and 6.2 per cent respectively. The percentage of Scheduled castes population in Khagaria district for the urban areas is 7.3 which is lower than the rural areas (14.9%). The percentage of Scheduled tribes population to total population for rural areas of Khagaria district is almost negligible as has been observed in the above table.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C. D. Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Alauli	213,845	54,225	24	25.4	0.0
2	Khagaria	250,259	43,159	20	17.2	0.0
3	Mansi	74,297	9,953	24	13.4	0.0
4	Chautham	113,761	19,957	76	17.5	0.1
5	Beldaur	147,456	22,832	41	15.5	0.0
6	Gogri	212,197	17,538	90	8.3	0.0
7	Parbatta	192,212	11,920	1	6.2	0.0
	District (Rural) Total:	**1,204,027**	**179,584**	**276**	**14.9**	**0.0**

It transpires from the above table 15 that the percentage of the scheduled castes in Khagaria district is of the order of 14.9 percent of the total population. The highest percentage of scheduled castes population in Alauli C.D. Block with 25.4 percent of the total population closely followed by Chautham, Khagaria, Beldaur, Mansi, Gogri and parbatta C.D. Blocks with 17.5, 17.2, 15.5, 13.4, 8.3 and 6.2 percent respectively. The percentages of scheduled castes population in Alauli, Chautham, Khagaria and Beldaur C.D. Blocks are higher than the district rural average (14.9%). The percentage of Scheduled Tribes population in the C.D. Blocks of Khagaria district is almost negligible as has been observed in the above table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	16	6.6	0	0.0
Less than 5	36	14.9	6,219	3.5
5-10	66	27.4	31,535	17.6
11-20	57	23.7	56,401	31.4
21-30	30	12.4	33,918	18.9
31-40	16	6.6	20,754	11.6
41-50	7	2.9	17,032	9.5
51-75	9	3.7	10,364	5.8
76 and above	4	1.7	3,361	1.9
District Total	**241**	**100.0**	**179,584**	**100.0**

From the table 16 above, it is apparent that there are 66 villages accounting for 27.4 per cent of the inhabited villages in the district where the population of the Scheduled castes ranges between 5 and 10 per cent of total population is the largest group of villages in the district. This is closely followed by villages where the population of the Scheduled Castes ranges between 11 and 20 percent of the total population and these villages which number 57 account for 23.7 per cent of the total inhabited villages. There are 36 villages accounting for 14.9 per cent of the inhabited villages where the percentage of Scheduled Castes population to total population is less than 5 percent. There are 30 villages accounting for 12.4 per cent of the inhabited villages, where the percentage of Scheduled castes population to total population is between 21 and 30 percent. There are 16 villages accounting for 6.6 percent of the inhabited villages, where the percentage of Scheduled castes population to total population is between 31 and 40percent. 6.6 percent of the villages are such as do not have any scheduled castes population.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

District Total	**241**	**100.0**	**276**	**100.0**

As regards the population of the Scheduled Tribes it can be seen from the above table-17 that there are only 17 villages in the district which contain members of the Scheduled Tribes. In all these villages the population of the Scheduled Tribes is as low as less than 5 percent of the total population. There are as many as 224 villages accounting for 92.90 per cent of the total inhabited villages in the district which have no scheduled tribes at all.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Gogri Jamalpur (NA)	31,106	2,188	0	7.0	0
2	Khagaria (M)	45,221	3,350	56	7.4	0.1
	District(Urban) Total	**76,327**	**5,538**	**56**	**7.3**	**0.1**

\+ To be arranged in alphabetical order

It is apparent from the above table 18 that there is no urban agglomeration in Khagaria district. There are two statutory towns in the district i.e. Khagaria (M) and Gogri Jamalpur (NA). The percentage of Scheduled Castes population to total population is 7.4 in Khagaria(M). The percentage of Scheduled Tribes population in Khagaria (M) is almost negligible (o.1%) as has been observed in the above table. The percentage of Scheduled Castes population to total population is 7.0 in Gogri Jamalpur(NA). The percentage of Scheduled Tribes population in Gogri Jamalpur is nil as there is no scheduled Tribes Population in the town.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Alauli	891	333
2	Khagaria	898	818
3	Mansi	885	1000
4	Chautham	892	727
5	Beldaur	942	783
6	Gogri	856	1000
7	Parbatta	875	0
	District (Rural) Total	**894**	**792**

It is observed from the above table 19 that the sex ratio of Scheduled Casts varies from 942 in Beldaur C.D. Block to 856 in Gogri C.D. Blocks. The sex ratio in Khagaria C.D. Block is 898 while the sex ratio in Chautham is 892. The sex ratio figures of Alauli, Mansi and Parbatta C.D. Blocks are 891, 885 and 875 respectively. The sex ratio figures of Beldaur and Khagaria C.D. Blocks are higher than the district average.

The sex ratio of Scheduled Tribes also varies from 1000 in Mansi C.D. Block to 333 in Alauli. Sex ratio figures of Scheduled tribes in Alauli, Chautham and Beldaur C.D. Blocks are below the district average. The sex ratio figures of Scheduled Tribes relating to Mansi, Gogri and Khagaria C.D. Blocks are higher than the district average. It is worthwhile to mention that Scheduled Tribe population in the districts is negligible.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Gogri Jamalpur (NA)	914	0
2	Khagaria(M)	974	1,000
	Sex ratio (Urban) for the district:	**840**	**1,000**

\+ To be arranged in alphabetical order

There is no urban agglomeration in Khagaria district. There are two statutory towns in the district i.e. Khagaria(M) and Gogri Jamalpur(NA) .The sex ratio of Scheduled castes in Khagaria(M) is 794 while the sex ratio of Gogri Jamalpur (NA) is 914. The Scheduled Tribes sex ratio for Gogri Jamalpur(NA) is Negligible whyle the Scheduled Tribes sex ratio for Khagari(M) is 1000.

Among C.D. Blocks, Parbatta has the highest proportion of literate population (50.0%) followed by Gogri (45.8%). The literacy rates for Khagaria , Mansi , Chautham , Beldaur and Alauli C.D. Blocks are 45.4, 41.7, 36.5, 32.0 and 31.4 percent respectively. Male literates greatly out number female literates in all the C.D. Blocks of Khagaria district. The highest proportion of male literates is contained in Parbatta C.D. Block with 60.4 percent closely followed by Gogri, Khagaria, Mansi, Chautham and Alauli C.D. Blocks with 56.3,55.2, 52.4, 47.2 and 42.3 percent respectively. Parbatta C.D. Block has the highest female literacy rate with 38.0 percent while Alauli has the lowest literacy rate of females with 19.1 per cent. Male literacy rates for Parbatta, Gogri, Mansi and Khagaria are higher than the corresponding figures of Khagaria district. Alauli, Chautham and Beldaur C.D. Blocks have the lower male literacy rate than the district average.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

	District (Rural)										
	Total:	**370,815**	**250,967**	**119,848**	**833,212**	**386,856**	**446,356**	**39.5**	**50.1**	**27.3**	**22.8**

Table 22 shows that among the C.D. Blocks in the district Parbatta C.D. Block has the highest percentage of literate population (50.0%) followed by Gogri C.D. Block (43.9%). The literacy rates for Mansi, Khagaria, Chautham, Beldaur and Alauli C.D. Blocks are 41.7, 39.4, 36.5, 32.0 and 31.4 percent respectively. Male literates outnumber female literate in all the C.D. Blocks of Khagaria district. The highest proportion of male literates is in Parbatta C.D. Block with 60.4 percent closely followed by Gogri, Mansi and Khagaria C.D. Blocks with 54.5, 52.4 and 49.6 percent respectively. Parbatta C.D. Block has the highest female literacy rate with 37.9 percent while Alauli C.D. Block has the lowest literacy among the females with 19.1 percent. Male literacy rates for Parbatta, Gogri and Mansi C.D. Blocks are higher than the corresponding figures of Khagaria district while Alauli, Khagaria, Chautham and Beldaur C.D. Blocks have the lower male literacy rates than the district.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	7	2.9	5,018	0.4
11-20	20	8.3	47,046	3.9
21-30	46	19.1	203,323	16.9
31-40	69	28.6	455,863	37.9
41-50	63	26.1	330,434	27.4
51-60	25	10.4	113,517	9.4
61-70	7	2.9	41,554	3.5
71-80	3	1.2	6,579	0.5
81-90	1	0.4	693	0.1
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**241**	**100.0**	**1,204,027**	**100.0**
Literacy rate for District:		**41.3**		

From the table23 above, it is apparent that there are 69 villages accounting for 28.6 per cent of the inhabited villages in the district where literacy rate for villages ranges between 31 and 40 per cent and these

villages account for 37.9 per cent of the district rural population. This is the largest group of villages in the district. This is closely followed by 63 villages accounting for 26.1 per cent of the inhabited villages where literacy rate ranges between 41 and 50 percent and these villages account for 27.4 per cent of the district rural population. There are 46 villages accounting for 19.1 per cent of the inhabited villages where literacy rate ranges between 21 and 30 per cent and these villages account for 16.9 per cent of the district rural population. There are 25 villages accounting for 10.4 percent of the inhabited villages where literacy rate ranges between 51 and 60 percent and these villages account for 9.4 per cent of the district rural population. There are only 7 villages accounting for 2.9 per cent of the inhabited villages where literacy rate ranges between 61 and 70 percent and these villages account for only 3.5 per cent of the district rural population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

	District(Urban) Total	**43,359**	**26,259**	**17,100**	**32,968**	**15,185**	**17,783**	**69.8**	**77.1**	**60.9**	**16.3**

\+ To be arranged in alphabetical order

It transpires from the above table 24 that there is no urban agglomeration in Khagaria district. There are two statutory towns in the district i.e. Khagaria(M) and Gogri Jamalpur(NA). The literacy rate for Khagaria(M) is 76.8 percent whereas the literacy rate for Gogri Jamalpur is 59.1 percent. Male literates greatly outnumber female literates as the male literacy rate for Khagaria(M) is 82.9 percent while the female literacy rate is 69.3 per cent. The Male literacy rate for Gogri Jamalpur(NA) is 68.2 percent while the female literacy rate is 48.4 percent.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12

6	Gogri	4,594	3,454	1,140	12,944	5,995	6,949	34.4	47.2	18.9	28.3
7	Parbatta	3,311	2,406	905	8,609	3,952	4,657	36.0	48.4	21.5	26.9
	District (Rural) Total:	**31,789**	**23,634**	**8,155**	**147,795**	**71,177**	**76,618**	**23.4**	**32.6**	**12.8**	**19.8**

The table above shows that literacy among the scheduled castes is highest i.e. 36.0 percent in Parbatta C.D. Block whereas it is lowest i.e. 16.9 percent in Alauli C.D. Block in the district. It is observed that the literacy rate among the scheduled castes for the district is 23.4 percent. As regards percentage of male literacy among the scheduled castes it is highest in Parbatta C.D. Block with 48.4 percent whereas it is lowest in Alauli C.D. Block with 24.3 percent. In case of female literacy rate among the scheduled castes also it is highest in Parbatta C.D. Block with 21.5 percent and the lowest in Alauli C.D. Block with 8.4 percent. It is found that the gap between male and female literacy rate is highest in Gogari C.D. Block with 28.3 percent whereas it is lowest in Alauli C.D. Block with 15.9 percent.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	1	0.4	78	0.0
1-10	28	12.4	26,229	14.6
11-20	69	30.7	61,943	34.5
21-30	52	23.1	47,383	26.4
31-40	36	16.0	21,632	12.0

The table 28 shows that among the Scheduled Tribes the percentage of literates is highest i.e. 100 percent in Parbatta C.D. Block in the district while it is lowest in Gogri C.D. Block. It is observed that the literacy rate among the scheduled tribes for the district is 37.3 percent. As regards percentage of male literacy among the scheduled tribes it is highest in i.e. 100 percent in both Mansi and Parbatta C.D. Blocks whereas it is lowest i.e. 32.4 percent in Chautham C.D. Block. In case of female literacy rate among the scheduled tribes it is highest in Mansi C.D. Block whereas it is lowest i.e. 3.4 percent in Gogri C.D. Block. Such higher percentage in literacy rate among the scheduled tribes population is because of very thin tribal population in the district.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	3	17.6	16	5.8
1-10	1	5.9	16	5.8
11-20	1	5.9	8	2.9
21-30	1	5.9	74	26.8
31-40	3	17.6	110	39.9
41-50	0	0.0	0	0.0
51-60	0	0.0	0	0.0
61-70	2	11.8	24	8.7
71-80	0	0.0	0	0.0
81-90	1	5.9	22	8.0
91-99	0	0.0	0	0.0
100	5	29.4	6	2.2
District Total:	**17**	**100.0**	**276**	**100.0**
Literacy rate for District (Rural):		**37.3**		

The table 29 above shows that in case of literacy among the scheduled tribes in the villages of the district the highest number of villages i.e. 29.4 percent fall in the literacy range 100 percent followed by 17.6 percent of the villages which fall in the literacy range of 31-40 and 0 percent. It is observed that the 11.8 percent of the villages are such which fall in the literacy range of 61-70 percent. The lowest number of villages i.e. 5.9 percent fall in the literacy range of 1-10, 11-20, 21-30 and 81-90 percent incase of literacy among the scheduled tribes in the villages of the district.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Khagaria (M)	41	24	17	15	4	11	89.1	100.0	77.3	22.7
	Khagaria (Urban)	**41**	**24**	**17**	**15**	**4**	**11**	**89.1**	**100.0**	**77.3**	**22.7**

The table 30 above shows that the literacy rate among the scheduled tribes in the urban areas of the district is quite high i.e. 89.1 percent incase of total population, 100 percent in case of males and 77.3 percent in case of females.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS AND NON-WORKERS BY SEX IN C.D.BLOCKS, 2001

Serial number	Name of C.D.Block	Persons / Males / Females	Total Population	Main worker		Marginal worker		Total workers (Main and marginal Workers)		Non workers

The work participation rate for total worker is defined as the percentage of total workers to total population. In a similar way it is defined for main and margin workers. For Khagaria district the work participation rate (WPR) recorded 26.0 percent of the district total population as main workers and 10.5 per cent as marginal workers. Proportion of non workers in the district is 63.5 percent.

Among the main workers male work participation rate in the district is 40.6 percent while that of females is only 9.6 per cent as per 2001 Census. The proportion of main workers is the highest (29.1 percent) in Beldaur C.D, Block and the lowest (22.2 per cent) in Mansi C.D. Block. Out of 7 C.D. Blocks, WPR of 4 C.D. Blocks are above the district average. The proportion of marginal workers is the highest (14.3 percent) in Chautham C.D. Block and the lowest (8.4 percent) in Gogri C.D. Blcck. The proportion of total workers is the highest (42.9 per cent) in Beldaur C.D. Block and the lowest (32.4 percent) in Khagaria C.D. Block.

Among the non workers, male work participation rate in the district is 51.5 per cent while that of females is 77.1 percent as per 2001 Census. The proportion of non workers is the highest (67.6 per cent) in Khagaria C.D, Block and the lowest (57.1 percent) in Beldaur C.D. Block.

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 32 above shows that the work participation rate (WPR) in rural areas of Khagaria district is 26.2 percent as main workers and 11 percent as marginal workers. Proportion of Non-workers in the district is 62.8 percent.

Among the main workers male work participation rate in the district is 40.7 percent while that of females is only 10 percent as per 2001 census. The proportion of main workers is the highest (29.1%) in Beldaur C.D. Block and the lowest (22.2%) in Mansi C.D. Block. Out of 7 C.D. Blocks, WPR of 5 C.D. Blocks are above the district average. The proportion of marginal workers

is the highest (14.3%) in Chautham C.D. Block and the lowest (8.5%) in Parbatta C.D. Block. The proportion of total workers is the highest (42.9%) in Beldaur C.D. Block and the lowest (32.6%) in Mansi C.D. Block.

The proportion of non-workers among males in the district is 51.1 percent while that of females 76 percent as per 2001 census. The proportion of non-workers is the highest (67.4%) in Mansi C.D. Block and the lowest (57.1%) in Beldaur C.D. Block.

\+ To be arranged in alphabetical order

From the abve table 33 it transpires that there is no urban agglomeration in Khagaria district. Khagaria(M) and Gogri Jamalpur(NA) are the two urban units in the district. For Khagaria(M) the work participation rate recorded 23.8 percent of the total population of the town as main workers and 1.5 percent as marginal workers . The proportion of male and female main workers are 40.1 and 3.8 percent respectively. The proportion of male and female marginal workers are 2.1 and 0.9 percent respectively. The work participation rate (WPR) for Gogri Jamalpur(NA) recorded 21.5 percent of the total population as main workers. The proportion of male and female main workers are 37.6 and 3.2 percent respectively. The marginal worker account for 3.4 percent of the total population of the town. The proportion of male and female marginal workers are 3.6 and 3.1 percent respectively.

				(22.9)	**(19.6)**	**(68.9)**	**(3.3)**	**(8.2)**

Note :- Percentage of workers to total workers are given in brackets

From the above table 34, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivation, agricultural labour, household industry and other economic activities. The economic activity of the district is primarily dependent on agriculture which is supported by the fact that the cultivator (25.8 percent) and agricultural labourers (54.4 percent) together constitute 80.2 percent of the total workers of the district. The proportion of cultivators varies between 30.1 percent for Parbatta block to 19.6 percent for Khagaria block. The proportion of agricultural labourers varies between 61.9 percent for Alauli block to 46.1 percent for Mansi block. The proportion of household industry workers is only 2.5 percent of the total workers of the district. The proportion of household industry workers varies between 3.9 percent for Mansi block to 1.3 percent for Chautham block. The proportion

of other workers is 17.3 percent of the total workers of the district. The proportion of other workers varies between 28.6 percent for Khagaria block to 7.4 percent for Beldaur block.

TABLE 35 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D.BLOCKS, 2001

Serial number	Name of C. D. Block	Persons/ Males/ Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9

				(24.0)	**(19.8)**	**(69.6)**	**(3.0)**	**(7.6)**

Note: Percent of Workers to total workers are given in brackets

From the table 35 placed on previous page, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely cultivators, agricultural labourers, household industry workers and other economic activities. The economic activity in the rural areas of the district is primarily dependent on agriculture which is supported by the fact that the cultivators (26.7%) and agricultural labourers (56.2%) together constitute 82.9 percent of the total workers of the district. The agriculture sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 30.1 percent for Parbatta C.D. Block to 21.5 percent for Khagaria C.D. Block. Proportion of agricultural labourers varies between 61.9 percent for Alauli C.D. Block to 46.1 percent for Mansi C.D. Block. The proportion of household industry workers varies between 3.9 percent for Mansi C.D. Block to 1.3 percent for Chautham C.D. Block. The proportion of household industry workers is only 2.3 percent of the total workers of the district. The proportion of other workers is 14.8 percent of the total workers of the district. The proportion of other workers varies between 27.5 percent for Mansi C.D. Block to 7.4 percent for Beldaur C.D. Block.

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of Town	Persons/ Males/ Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9

				(41.8)	**(6.9)**	**(9.9)**	**(5.6)**	**(77.6)**
		Females	**34,883**	**1,868**	**63**	**340**	**450**	**1,015**
				(5.4)	**(3.4)**	**(18.2)**	**(24.1)**	**(54.3)**

Note: Percent of Workers to total workers are given in brackets

It is obvious from the above table 36 that there is no urban agglomeration in Khagaria district. There are two statutory towns in the district i.e. Khagaria(M) and Gogri Jamalpur(NA). From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other economic activities. The cultivators constitute 5.3 percent and agricultural labourers constitute 5.4 percent of the total workers of Khagaria(M). Household industry workers and other workers constitute 4.9 and 84.4 percent respectively in Khagaria(M). The cultivators and agricultural labourers constitute 8.4 and 18.5 percent respectively in Gogri Jamalpur(NA). The proportion of Household industry workers and other workers are 11.0 and 62.1 percent respectively.

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water *	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table 37 gives the distribution of villages according to availability of different amenities in the district.

Educational amenity :- There are as many as 220 villages accounting for 91.3 percent of the total number of inhabited villages(241) in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D. Block Parbatta with 93.5 percent closely followed by Alauli and Khagaria C.D. Blocks with 93.2 and 93.0 percent respectively. The smallest proportion of villages with educational facility is observed in Mansi C.D. Block with 72.7 percent.

Medical amenity :- The availability of medical amenity in the villages is 51.5 percent of the total inhabited villages of the district. Among the C.D. Blocks Gogri has the highest proportion of villages with medical facility, the percentage being 85.4 percent on the other hand, Parbatta has the minimum proportion of villages (26.1%) where medical amenity is available.

Improved drinking water :- There are as many as 236 villages accounting for 97.9 percent of the total inhabited villages in the district where improved drinking water facility is available. Beldaur C.D. Block, on the other hand, has the minimum proportion of villages (89.7%) where improved drinking water facility is available.

Post office :- Postal facilities are available in 126 villages out of 241 inhabited villages (52.3%) in

the district. Khagaria C.D. Block has the maximum number of villages having postal facility (58.1%) followed by Parbatta C.D. Block with 54.3 percent. Mansi C.D. Block has the minimum number of villages having postal facility (36.4%).

Telephone :- The availability of telephone facility in the villages is 40.7 percent in the district. Among the C.D. Blocks, Mansi has the maximum number of villages having telephone facility (72.7%) followed by Gogri with 65.9 percent. Alauli C.D. Block has the minimum number of village having telephone facility (9.1%).

Transport Communication :- Transport Communication facilities are available in 70 villages out of 241 inhabited villages (29.0%) in the district. Among the C.D. Blocks Khagaria has the highest proportion of villages (44.2%) which are connected by bus or rail or navigable river/canal services, etc., followed by Chautham and Parbatta with 37.0 percent while Mansi has the minimum number of villages having this facility with only 9.1 percent.

Bank :- Banking facility is available only in 38 villages out of 241 inhabited villages (15.8%) in the district. Among the C.D. Blocks, Mansi has the highest proportion of villages having banking facility (27.3%) followed by Khagaria C.D. Block with 20.9 percent. Chautham has the lowest proportion of villages having banking facility (11.1%).

Agricultural credit Societies :- This facility is available in 77 villages out of 241 inhabited villages (32.0%) in the district. Khagaria C.D. Block has the maximum number of villages having agricultural credit facilities (69.8%) while Beldaur C.D. Block has the minimum number of villages with 10.3 percent.

Approach by pucca road :- This facility is available in 126 villages out of 241 inhabited villages (52.3%) in the district. Among C.D. Blocks, Mansi with 72.7 percent villages having Pucca approach road followed by Khagaria C.D. Block (67.4%) while Beldaur C.D. Block has the least number of villages having this facility with only 20.7 percent.

Power Supply :- Electrified villages in the district constitute 47.3 percent of the total number of inhabited villages. Among the C.D. Blocks, Parbatta has the maximum number of electrified villages with 76.1 percent while Beldaur has the minimum number of villages with only 6.9 percent.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

			Type of amenity available

		(100)	**(97.4)**	**(68.2)**	**(98.6)**	**(75.7)**	**(58.1)**	**(39.9)**	**(29.1)**	**(48.3)**	**(63.3)**	**(56.1)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from the table 38 that educational facility is available to 97.4 per cent of the rural population of the district. The proportion varies between the maximum of 99.0 percent in Gogri block and the minimum of 91.3 per cent in Mansi block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 91.3 per cent vide table 37) than the proportion of population which as high as 97.4 per cent. This may be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 68.2 per cent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 98.6 per cent which is more than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	18	3	0	21
(b) Middle School	86	16	3	105
(c) Degree College	36	81	120	237

3. Post Office	98	11	7	116
4. Telephone	43	45	55	143
5. Bus Service	77	74	43	194
6. Banks				
(a) Commercial Bank	94	72	45	211
(b) Co-operative Bank	64	100	63	227
7. Agricultural Credit Societies	89	48	27	164

As regards educational facility it would be seen from the above table 39 that there are 21villages in the district (8.7%) which do not have primary school but the facility is available at places situated within 5 kms. For 18 villages and 3 villages within the range of 5 kms and 5-10 kms. There are as many as 105 villages in the district which do not have middle schools but the facility is available at places within 5 kms. For 86 villages, 16 villages at the range of 5-10 kms. And 3 villages at the range of 10 + kms. There are as many as 237 villages which do not have the facility of degree colleges but the facility is available at the places within 5 kms. For 36 villages, 81 villages at range of 5-10 kms. And 120 villages at the range of 10 + kms.

There are 232 villages in the district (96.3%) which are without the facility of hospital and 43 villages enjoy this facility at a distance within 5 kms.,

84 at a distance range of 5-10 kms. and rest 105 villages at a distance of 10 + kms. There are 206 villages in the district (85.5%) which do not have primary health centre but 50 villages enjoy this facility at a distance within 5 kms., 67 villages at a distance within 5-10 kms. and 89 villages at a distance beyond 10 kms.

Similar trend can ,be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited village in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	22	21	14	14	18	10	4	13	20
	(100.0)	(95.5)	(63.6)	(63.6)	(81.8)	(45.5)	(18.2)	(59.1)	(90.9)
5 -15	84	76	53	42	38	25	14	32	61
	(100.0)	(90.5)	(63.1)	(50.0)	(45.2)	(29.8)	(16.7)	(38.1)	(72.6)
16 - 50	129	117	53	68	41	35	19	31	44
	(100.0)	(90.7)	(41.1)	(52.7)	(31.8)	(27.1)	(14.7)	(24.0)	(34.1)
51+	6	6	4	2	1	0	1	1	1
	(100.0)	(100.0)	(66.7)	(33.3)	(16.7)	(0.0)	(16.7)	(16.7)	(16.7)

	(100.0)	**(91.3)**	**(51.5)**	**(52.3)**	**(40.7)**	**(29.0)**	**(15.8)**	**(32.0)**	**(52.3)**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table 40 that maximum number of inhabited villages (53.5%) lie in distance range of 16-50 kms. from the nearest statutory town. This is followed by villages in the distance range of 5-15 kms. from the nearest statutory town with 34.4 percent. There are 9.1 percent villages in the distance range of less than 5 kms. from the statutory town and 2.5 percent villages in the distance range of 51+ kms. from the statutory town.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 95.5 percent for those situated within 5 kms. from the nearest statutory town and decreases to 90.5 percent in the distance range of 5-15 kms. Thereafter it increases to 90.7 percent in the distance range of 16-50 kms. from the nearest statutory town and it again increases to 100 percent in the distance range of 51+ kms. In the case of other amenities also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It can be seen from the table 41 that the maximum number of villages i.e. 75 (31.1%) in the district fall in the population range of 2000-4,999 followed by 72 villages (29.9%) having a population range of 5000-9999. There are 37 villages (15.4%) in the population range of 1000-1999. The lowest number of villages is observed in the population range of 1-499 being only 11.

The proportion of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10000+ which further corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Alauli	44	27,277	83.6	65.9
2	Khagaria	43	25,591	68.5	74.9
3	Mansi	11	5,972	60.3	73.2
4	Chautham	27	16,400	67.3	57.7
5	Beldaur	29	22,357	88.7	39.0
6	Gogri	41	18,693	71.8	68.5
7	Parbatta	46	18,572	60.1	50.0
	District Total:	**241**	**134,862**	**73.7**	**60.0**

Note : Cultivable area = irrigated area + unirrigated area

Table 42 gives the percentage of cultivable areas also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It would be seen from the table that 73.7 percent of the total area of the is utilized for cultivation (cultivable area) and of this 60 percent areas is found to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Beldaur C.D. Block with 88.7 percent closely followed by Alauli and Gogri C.D. Blocks with 83.6 and 71.8 percent respectively. The lowest cultivable area is found in Parbatta C.D. Block which is 60.1 percent. The highest proportion of irrigated area (74.9%) to total cultivable area is found in Khagaria C.D. Block followed by Mansi and Gogri C.D. Blocks with 73.2 and 68.5 percent respectively. The least proportion of irrigated area is found in Beldaur C.D. Block with 39 percent which indicates that villages in this block are deprived of required irrigational facilities.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Gogri Jamalpur (NA)	0.1	0.1	0	0.1	0.1	0	0	0	0
2	III Khagaria (M)	7.3	4.3	3.0	6.6	5.0	0	0.5	0	1.1
	District Total	**4.4**	**2.6**	**1.8**	**4.0**	**3.0**	**0**	**0.3**	**0**	**0.6**

The above table 43 gives the details of finances in the statutory towns in terms of per capita receipt and expenditure. There are two statutory towns in the district i.e. Gogri Jamalpur(N) and Khagaria(M). On going into the details of receipt under different heads it can be seen that the receipt through taxes is the only head for per capita receipt in case of Gogri Jamalpur(N). The per capita expenditure incurred on general administration is the only head for per capita expenditure. The per capita receipt and expenditure are equal in case of Gogri Jamalpur(N). The per capita total receipt is higher than the per capita total expenditure in case of Khagaria(M). The per capita receipt through taxes is higher than the per capita receipt from all other sources. The per capita expenditure incurred on general administration is higher than the per capita expenditure on public works and public health and conveniences in Khagaria(M).

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Gogari Jamalpur (NA)	1.3	1.0	1.0	0.0	0.3
2	Khagaria (M)	4.4	2.2	0.7	0.2	0.4
	District Total	**3.1**	**1.7**	**0.8**	**0.1**	**0.4**

The above table 44 gives the details of different categories of educational institutions per ten thousand population in the town of the district. It would be seen from the above table that institutions like Secondary/ Matriculation level school and college are situated in Gogri Jamalpur(N) accounting for an average of 1 and 0.3 institution per ten thousand population respectively. Primary School and Middle School account for an average of 1.3 and 1 per ten thousand population. There is no Senior Secondary School in Gogri Jamalpur town. In case of Khagaria(M) Secondary/Matriculation level school and college account for an average of 0.7 and 0.4 institution per ten thousand population respectively. Senior Secondary School accounts for an average of 0.2 institution per ten thousand population. Primary School and Middle School account for an average of 4.4 and 2.2 institution per ten thousand population respectively in the town.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Gogri Jamalpur(NA)	8
2	Khagaria(M)	34
	District Total	**23**

The above table 45 furnishes information regarding availability of beds in medical institutions in Gogri Jamalpur(N) and Khagaria(M).

The number of beds in medical institutions per ten thousand population for Gogri Jamalpur(N) works out to be 8. Khagaria(M), on the other hand had the higher proportion of such beds (34) in medical institutions per ten thousand population. The number of beds in medical institutions per ten thousand population for the urban areas of the district works out to be 23.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Gogri Jamalpur(NA)	31,106	571	1.8
2	Khagaria(M)	45,221	2,243	5.0
	District Total	**76,327**	**2,814**	**3.7**

The table above indicates that slum population in Gogri Jamalpur(N) constitutes 1.8 percent of the total population of the town. In case of Khagaria(M) slum population constitutes 5.0 percent of the total population of the town. The proportion of slum population for the urban areas of the district is 3.7 percent of the total urban population of the district.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Gogri Jamalpur (NA)	Handloom Cloth	Maize, Wheat, Banana
2	Khagaria (M)	Steel Goods Ventilater, Ice	Fish, Paneer, Patal (Vegetable)

Table 47 presents the most important commodities manufactured in the town and exported from the town. It would be seen from the above table that one item i.e. Handloom cloth is manufactured in Gogri Jamalpur(N) and three item viz., Maize, Wheat and Banana are exported from the town. In case of Khagaria(M) three items viz., Steel Goods, Ventilator and Ice are manufactured in the town and three items viz., Fish, Paneer and Patal are exported from the town.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

	District total	**232,387**	**220,440**	**11,947**	**39,453**	**38,487**	**966**	**481**	**457**	**24**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 shows that there are as many as 227166 households accounting for 97.8 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in single room is the highest (72.2%) whereas it is lowest (1.4%) dwelling in no exclusive room. The median number of rooms is 1 for the total households in the tenure status of owned category.

There are 38,636 scheduled castes households accounting for 17.0 percent of the total households dwelling in owned houses and the median number of rooms is 1. There are 448 scheduled Tribes households accounting only 0.2 percent of the total households dwelling in owned houses and the median number of rooms is 1.

There are 3050 households accounting for 1.3 percent of the total households of the district dwelling in rented houses. The proportion of households dwelling in single room is the highest (48.0%) where as it is lowest (0.8%) in no exclusive room. There are 291 Scheduled Castes households accounting for 9.5 percent of the total households dwelling in rented houses and the median households accounting for 0.9 percent of the total households dwelling in rented houses and the median number of rooms is 1.

Similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C. D. Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Alauli	29.0	28.3	42.7	29.0	28.3	42.7	0.0	0.0	0.0
2	Khagaria	46.7	27.4	26.0	41.8	29.3	28.9	78.6	15.0	6.4
3	Mansi	53.0	23.7	23.3	53.0	23.7	23.3	0.0	0.0	0.0
4	Chautham	29.3	28.0	42.8	29.3	28.0	42.8	0.0	0.0	0.0
5	Beldaur	14.2	9.1	76.7	14.2	9.1	76.7	0.0	0.0	0.0
6	Gogri	49.7	29.7	20.6	47.0	30.3	22.7	70.7	25.2	4.1
7	Parbatta	51.5	26.8	21.7	51.5	26.8	21.7	0.0	0.0	0.0
	District Total:	**39.7**	**25.6**	**34.7**	**37.8**	**25.9**	**36.3**	**75.3**	**19.2**	**5.4**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roof are made of pucca materials i.e. where burnt bricks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roof made of Kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the above table that of the total rural households maximum proportion of households i.e., 37.8 percent live in permanent houses followed by 36.3 percent living in temporary houses and 25.9 percent living in semi permanent houses.In the case of urban households in the district however, the maximum proportion of households i.e., 75.3 percent live in permanent houses followed by 19.2 percent in semi permanent houses and 5.4 percent in temporary houses. Among the C.D. Blocks in the district Mansi has the maximum proportion of rural households living in permanent houses (53.0%) followed by Parbatta (51.5%) and Gogri (47.0%). Beldaur C.D. Block has the minimum proportion of households living in permanent houses with 14.2 percent. In case of temporary houses, Beldaur C.D. Block has the maximum proportion of households living in temporary houses (76.7%) followed by Chautham (42.8%) and Alauli (42.7%). Parbatta C.D. Block has the minimum proportion of households living in temporary houses with 21.7 percent. In case of semi permanent houses, Gogri C.D. Block has the maximum proportion of households (30.3%) followed by Khagaria C.D. Block (29.3%). Beldaur C.D. Block has the minimum proportion of households having semi permanent houses with 9.1 percent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table 50 shows that of the total rural household 220440 households i.e. 85.6 percent have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Chautham C.D. Block with 96.0 percent whereas it is lowest in Alauli C.D. Block with 82.0 percent.As regards electricity it is found that only 6.8 percent of rural households in the district have electricity. The highest proportion of households with electricity is in Mansi C.D. Block with 19.1 percent whereas it is lowest in Beldaur C.D. Block with 0.2 percent.Only 5.5 percent of the total rural household in the district have bathroom facility. The highest proportion of households having bathroom facility is in Parbatta C.D. Block with 8.3 percent whereas it is lowest in Beldaur C.D. Block with 2.2 percent.Only 15.3 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is in Parbatta C.D. Block with 23.0 percent whereas it is lowest in Beldaur C.D. Block with 6.1 percent.Only 19.6 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Parbatta C.D. Block with 27.0 percent whereas it is lowest in Beldaur C.D. Block with 11.7 percent.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 51 above shows that 20.1 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Parbatta C.D. Block (32.8%) whereas it is lowest in Alauli C.D. Block with 8.5 percent. 67.3 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D. Blocks, the highest proportion of households using crop residue as fuel for cooking is 82.0 percent in Beldaur C.D. Block whereas it is lowest in Mansi C.D. Block with 54.7 percent.10.5 percent of the rural households in the district use cowdung cake as fuel for cooking. Among the C.D. Blocks the proportion of households using cowdung cake as fuel for cooking is highest (15.6%) in Mansi C.D. Block whereas it lowest (6.8%) in Beldaur C.D. Block.In the case of cooking gas (L.P.G.) there are only 1442 households accounting for 0.7 percent of the rural households in the district using it for cooking. As regards Kerosene there are only 541 households accounting for 0.2 percent of the rural households in the district using it for cooking. Similar trend can be observed in respect of other tupes of fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

It would be seen from the table above that there are 24863 households accounting for 10.7 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in Parbatta C.D. Block (10.7%) whereas the same is lowest in Beldaur C.D. Block (5.4%).There are 50920 households accounting for 21.9 percent of the total households in the district possessing redio/tansistor. In this regard the highest proportion of households is in Parbatta C.D. Block (26.4%) whereas it is lowest in Alauli C.D. Block (17.6%).There are 14,628 households accounting for 6.3 percent of the total households in the district possessing television. In this regard the highest proportion of households is in Khagaria C.D. Block (11.4%) whereas it is lowest in Alauli C.D. Block (1.3%).There are 3732 households accounting for 1.6 percent of the total households in the district possessing telephone. In this regard the highest proportion of households is in Khagaria C.D. Block (3.1%) whereas it is lowest in Alauli C.D. Block (0.4%).There are 55872 households accounting for 24.0 percent of the total households in the district possessing bicycle. In this regard the highest proportion of households is in Parbatta C.D. Block (26.5%) whereas it is lowest in Alauli C.D. Block (21.2%).Similar trend can be observed in respect of other specified asset.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

In recent past, people generally do not remember any important social or cultural event. However, everybody remembers the devastating floods of the year 1987, when even Khagaria town was heavily flooded, including collectorate and other government offices. Though floods have become an annual occurrence since times imemorial, but the floods of 1987 left a devastating trail after a long time, especially after the major embankments were constructed.Fairs and festivals are held regularly in the district by different communities in complete harmony.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Katyayani Asthan

Katyayani Asthan is situated at a distance of approximately 12 kms. From the District headquaters, on the bank of river Kosi, between the stations Badlaghat and Dhamaraghat , which are stations on Mansi-Saharsa metergauge rail line. Temples of Ma Katyayani , as well as of Ram, Lakshman and Ma Janaki is situated at this place. Every Monday and Friday , large number of devotees come to this place for offering puja. Ma Katyayani is worshiped in two forms in this area. Some devotees worship Ma Katyayani as Sidh Peeth, while a large number of devotees worshiped as Lok Devi- Devi of Milk Cattles. That is why devotees offer raw milk to the deity.

It is said that Rishi Katyayan was performing Tapasya on the bank of river Kaushiki(now Koshi) when Ma Durga- the deity of Shakti took 'avtar' in child form and was accepted by Rishi as his daughter. Hence she is called Katyayani. Another story says that around 300 years ago, this place used to be dense forest. One day a devotee Shripat Maharaj saw Ma Katyayani in dream and as per her direction constructed an earthen Temple at that place and started worshiping her. In the year 1951, the temple was reconstructed. Lack of proper communication and the inaccessibility of the place by road has hampered the development of this area.

Shyamlal National High School

This high school was established in 1910. Late Shri Shyamlal donated his entire property and formed a trust board under inspiration from Dr. Rajendra Prasad and Dr. S.K. Sinha. The students and teachers of this school played a very important role in the freedom movement. The school used to be a meeting ground of the Krantikaris.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

Some important events during the freedom struggle ,is commonly told by the freedom fighters of this area.One of these is an event of 24th August 1942.That day three Englishmen were surveying the railwayline by plane when their plane fell in river near Rohiyar Bengaliya,which is presently under Chautham Block .The villagers,killed all three out of revenge. Getting the information,the then collector of Munger started repressive actions and killed several villagers.

Another important event is the martyrdom of Prabhu Nrayan Singh ,who was killed by the bullets of Englishmen on 13th August 1942,while leading a procession towards Khagaria police station. He belonged to a village called Madar, nearly five kms. from Khagaria town.

Mahendra Choudhary ,of Pipra village in Chautham block is another martyr ,remembered reverently in Khagaria .He was hanged to death on 6th August ,1945 in Bhagalpur Central Jail. It is said that Mahatma Gandhi had correspondence with Viceroy Wavell for pardon to Mahendra Choudhary.

It is said that several important national leaders of freedom movement had visited and stayed in Khagaria ,especially in Gogri and Parbatta. Important centres of freedom movement were Shyamlal National High school ,founded in 1910 ,at Khagaria ;Gogri and Nayagaon village in Parvatta.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only

publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number

of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or

private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in English and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure

of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area

not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

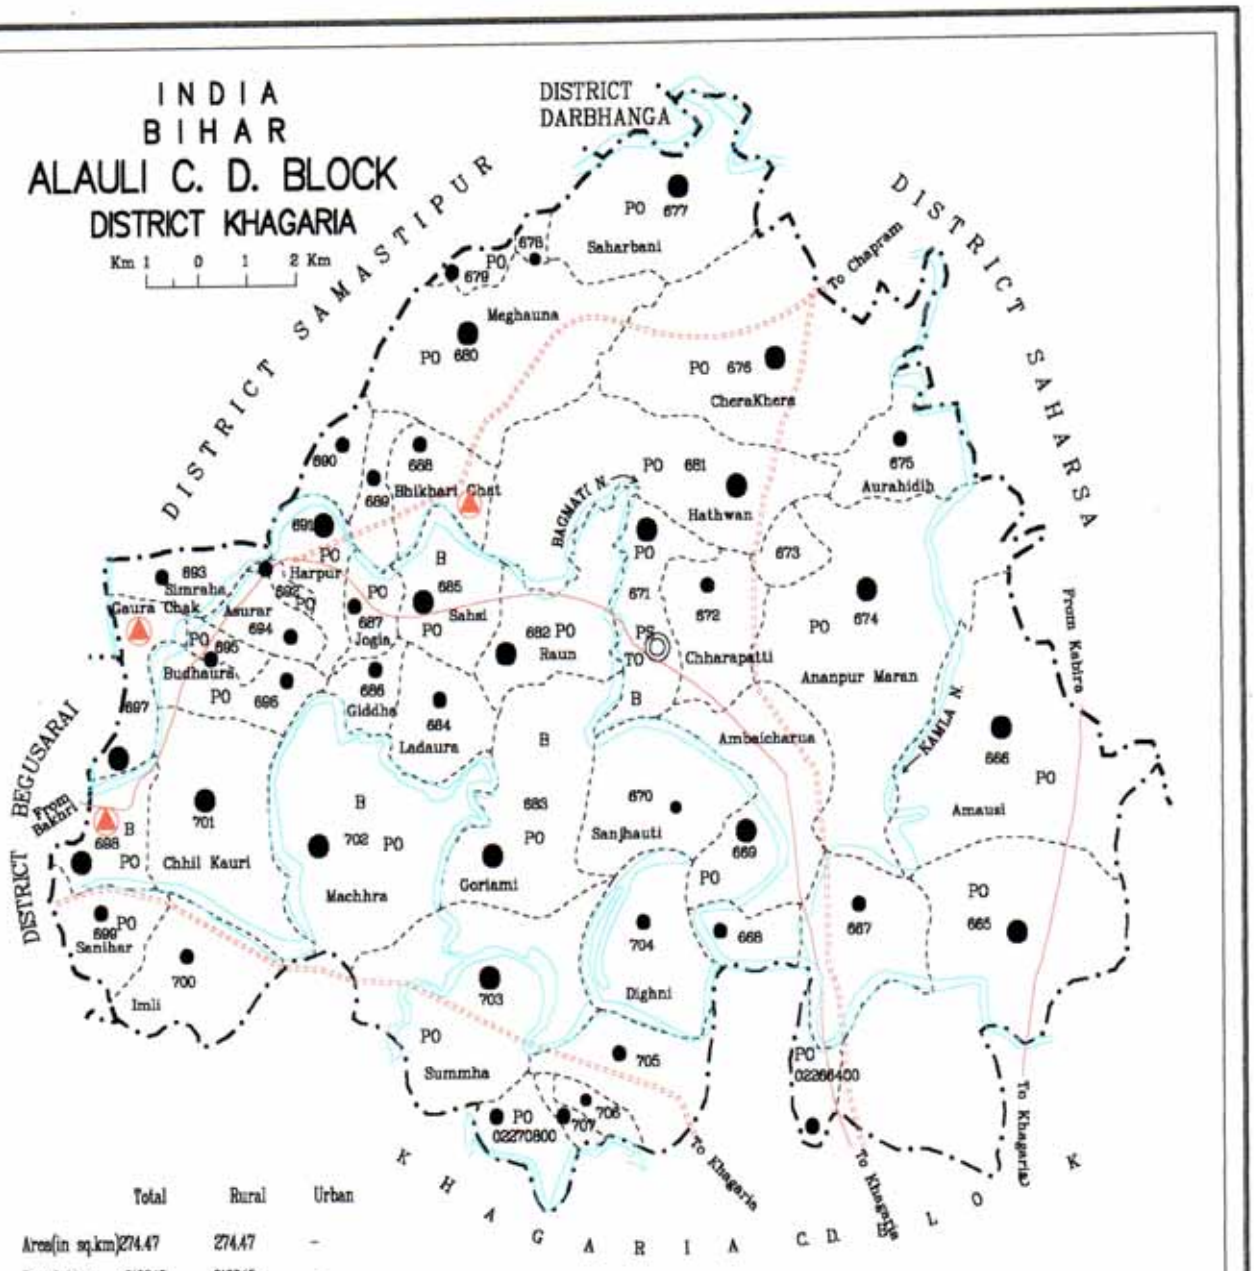

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	S H Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

DISTRICT PRIMARY

Location code number	District/ CD Block/ U.A./ City/ Town	Total/ Rural/ Urban	Area of Town/ Ward in square kilometre	Number of households	Total population (including institutional and houseless population)			Population in the age-group 0-6

	1981	94	112	125	141
Khagaria	1991	85	89	92	101
	1981	100	120	140	158

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in Annexure II as q(1),q(2),q(3) and q(5) it is observed that there has been decline in child mortality over the decade (in 1991 census as compared to 1981 census) both in the district as well as the state. An interesting feature which can be noticed from the annexure is that the child mortality at the ages 1,2,3 and 5 was higher in the district compared to the state average at the time of 1981 and 1991 censuses. It indicates that the pace of decline in child mortality has been slower in the district vis-à-vis the state.

Some other fertility measures for Khagaria district and the state are furnished in above annexure III. It can be seen from fertility data presented above that fertility measures such as Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR) and General Fertility Rate (GFR) are higher in Khagaria district compared to the state average in 1991 census whereas Crude Birth Rate (CBR) and General Marital Fertility Rate (GMFR) are lower in the district in comparison to the state average. The child woman ratio is found to be higher in Khagaria district compared to the state average. Number of children ever born per woman in the age-group 45-49 in Khagaria district is lower compared to the state average. The mean age at marriage of females is also lower in the district in comparison to the state average.

	(1.2)	(1.8)	(1.1)	(0.1)	(0.1)	(0.1)	(100.0)	(100.0)	(100.0)

Migrants by place of birth are 213.1 and 199.9 lakhs in Bihar state as a whole in 1991 and 2001 censuses respectively comprising 23.4 lakh and 21.0 lakh males and 189.6 lakh and 178.9 lakh females respectively. The migrants constitute 24.7 and 24.1 percent of the total population in the state according to 1991 and 2001 censuses respectively. The proportion of male and female migrants, in 1991 census, is approximately 5.1 percent and 46.0 percent respectively whereas it is 4.9 percent and 45.0 percent respectively in 2001 census.

In Khagaria district, in 1991 and 2001 censuses, the total number of migrants by place of birth is 1.38 lakh and 2.99 lakh migrants respectively of which only 0.07 lakh are males while 1.31 lakh migrants are females in 1991 census whereas 0.28 lakh are males and 2.71 lakh are female in 2001 census. The migrants in Khagaria district comprise 14.0 percent and 23.4 percent of the total population of the district. Male and female migrants account for 1.3 percent and 28.6 percent respectively of the total population in 1991 and 4.2 percent and 45.1 percent respectively during 2001 census.

From the distribution of total migrants in Bihar

state by place of birth it can be clearly seen in both the censuses that females predominate in Intra district migration while males predominate in inter district, inter state and international migration. In the case of Khagaria district males predominate in intra district migration while females predominate in inter district migration. The inter state and international migration has the similar trend in the district. This probably indicates that migration of females from their place of birth is generally attributed to the prevailing custom of girls moving away on marriage from their place of birth. Migrants born in other states of India as also those born outside India have lower proportion of females vis-à-vis males.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Khagaria		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	136,021	128,264	7,757

Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

It transpires from the above annexure that in case of Bihar 9 States, namely, Andhra Pradesh, Assam, Haryana, Madhya Pradesh, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal together account for 9.80 lakh (93.38%) of the 10.5 lakh interstate migrants in 1991 census. West Bengal and Uttar Pradesh states are predominant among them contributing 39.9 and 30.7 percent of migrants respectively. In respect of Khagaria district, of the total 2,270 interstate migrants, Uttar Pradesh and West Bengal states contribute 49.3 and 22.9 percentages respectively.

It can be further seen that during 2001 census States of Uttar pradesh and Jharkhand are the major contributors of migrants to the state. For the district of Khagaria Jharkhand, West Bengal and Uttar Pradesh have been major contributors migrants in 2001 census.

It may be observed that Hindus are by far the numerically most important religious community as it accounts for as much as 82.4 percent of the state's population and 90.3 percent of the population of Khagaria district in 1991 census. The Muslims come next with 14.8 percent of the state's population. The percentage of Muslims in the district of Khagaria is comparatively lower than the state average accounting for 9.7 percent of the district's population. The proportion of Christians, Sikhs, Jains and Buddhists population in the state as well as in the district is very low. Almost same trend continued in state as well as in district in 2001 census also.

Annexure-V(B) furnishes religionwise distribution of population for district of Khagaria and its C.D.blocks according to 1991 and 2001 Censuses

As already obverbed in annexure V(A), though the proportion of Hindus in Khagaria District is the highest as compared to other religious communities still it is seen that the Muslims also formed a big chunk of population in the district during both the Censuses. Among the C.D.Blocks proportion of Hindus is above 85 percent in all the C.D.Blocks of Khagaria District, the highest being in Alauli C.D.Block (93.9%) during 1991 Census and in Chautham C.D.Block (94.2%) during 2001 Census. The proportion of Muslim population is the highest in Gogri C.D.Block with 13.4 percent in 1991 Census and with 14.4 percent it ranks first during 2001 Census also. The existence of other religious communities in various C.D.Blocks of the district is insignificant during both the Censuses as their proportion to total population is almost negligible.

It is quite apparent from annexures that Khagaria district as well as the state have a relatively higher proportion of 'never married' males and 'married' females. This may be attributed due to the fact that women get married at younger age than males. As against 54.2 and 55.4 percentages of 'never married' males in Bihar state and Khagaria district respectively, the corresponding proportion among females is 45.2 and 44.9 only in 1991 census. Same trend continued in 2001 census also. As against 56.3 and 58.7 percentages of never married males in Bihar and Khagaria district respectively, the corresponding proportion among females is 47.3 and 48.4 only. There is no much difference in situation in Khagaria district as compared to Bihar state as a whole during both the censuses. The district of Khagaria has slightly lower proportion of widowed and divorced males and females.

While analysing marital status by broad age-groups one finds that married females outnumber married males in the age-group 10-14 suggesting that child marriage among females is more prevalent than males.

It is also significant that the proportion of 'never married' females in the age-group 15-19 and above is much lower than the 'never married' males in Khagaria district as well as for the state as a whole.

One of the important characteristics of the population on which information is collected in the Census is literacy. Apart from collecting data on number of literates, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the Census has already been explained in the beginning of this publication.

A proper index to the extent of literacy is provided by the proportion of literate and educated persons to the total population. The literacy rates for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 and 2001 censuses are 38.5 and 47.0 percent respectively. Male Literates outnumbered female literates as the literacy rates for males, according to 1991 and 2001 censuses are 52.5

and 59.7 percent respectively while for females the literacy rates are only to the extent of 22.9 and 33.1 percent respectively. The literacy rates for Khagaria district according to 1991 and 2001 censuses, are 32.3 and 41.3 percent respectively which are lower than the state average. Male literates in the district accounted for 43.0 percent during 1991 Census and 51.8 percent during 2001 Census while female literates in the district constitute 19.8 percent of the total population during 1991 Census and 29.4 percent of the total population in 2001 Census. The literacy rates for males and females in Khagaria district are lower than the corresponding figures of Bihar state.

Annexure VII(A) and VII(B) furnish information regarding absolute number of illiterates and literates and educated persons in Bihar state and Khagaria district as also percentage distribution of literate persons by different level of education by different age-groups.

A break-up of literate population by various educational level shows that 20.3 percent males and 27.2 percent females during 1991 Census and 28.4 percent males and 35.8 percent females during 2001 Census in the state are such who are literate without attaining any educational level with Below Primary. 21.6 percent and 26.2 percent males and females during 1991 Census 24.9 percent males and 30.6 percent females during 2001 Census in the state have crossed the primary or junior basic standard, 26.4 and 26.9 percent males and females in 1991 Census and 14.6 percent males and 13.2 percent females during 2001 Census have passed the middle examination while 31.7 and 19.7 percent males and females in 1991 Census and 32.1 and 20.4 percent males and females in 2001 Census in the state are such who are matriculates and above. The contrast between males and females is significant among matriculates and above as the percentage of female literates who have passed the matriculation and above examination are roughly 12 percentage points less than male literate population who have attained this level of education.

The position of literates by different level of education in Khagaria district, according to 1991 and 2001 Censuses, is more or less the same as observed for Bihar state as a whole.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Khagaria		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Hindi	274,266	21.4
Hindi	14,524,035	17.5	Urdu	102,750	8.0

Marwari	27,152	0.0	Bengali	217	0.0
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	880,712	68.8
Total Population	**82,998,509**	**100.0**	**Total Population**	**1,280,354**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Khagaria district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Magahi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population where as in the district of Khgaria 8.0 percent of the district population have returned it as their mother tongue. Hindi as mother tongue has been returned by 21.4 percent of Khagaria district's population. Maithili has got second position with 1.5 percent of the district population having returned it as their mother tongues. Except these languages analysed above both for the state and the district, others have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per Census 2001.
