SILK INDUSTRY AT BHAGALPUR

The city of Bhagalpur is well known in the country as Silk city of India. Thousand of workers work on looms for producing varieties of silk cloths through out the year in the city. The economy of the city is largely based on silk industries. Malwari ,Tashar and Matka silks produced here have world market.

Annexure II : Estimates of child mortality, 1981 and 1991 Census 818

Annexure III : Various measures of fertility and mean age at marriage 1991 Census 819

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 Census & 2001 Census 820

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 Census & 2001 Census 823

Annexure VI : Marital status of population as per 1991 Census & 2001 Census 831

Annexure VII : Age, sex and education in the district, 1991 Census & 2001 Census 846

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 853

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of ‘notified slums’. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant

additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

District Highlights – 2001 Census

1. Bhagalpur 15th in terms of population (24,23,172) and 17th in terms of area (2,569 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Bhagalpur is the 16th densely populated district in the state with 943 persons per sq.km as against the state's 881.
3. Bhagalpur ranks 35th in terms of sex-ratio (876) against the state's 919.
4. There are 585 uninhabited villages (out of 1,520 total villages) in the district of Bhagalpur.
5. Kharik (under Kharik C.D. Block) is the most populated village (32,302) and Rabiachak (under Sultanganj C.D. Block) is the least populated village (10) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 65% of the total workers are engaged in Primary sector.
7. C.D. Block Colgong has the highest number of villages (211) in the district and C.D. Block Rangra Chowk has the lowest number of villages (11).
8. Shankarpur Khawas (under Colgong C.D. Block) has the largest area (7,658 hectare) and 32 villages have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 93.7 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional C.D.Block/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The district of Bhagalpur is situated in the central part of Bhagalpur division. The city of Bhagalpur is the headquarters of Bhagalpur division as also of the district and Sadar subdivision. There are 3 sub-divisions viz., Naugachia, Bhagalpur Sadar and Kahalgaon in the district. Number of C.D. Blocks in the district is 16. There are 1519 villages and 5 towns in the district.

The district of Bhagalpur, as presently constituted, comprised the south-eastern part of the Subah of Bihar in the Mughal times. When the Diwani of Bihar, Bengal and Orissa was granted to the East India Company in 1765, the district consisted of a large area east of Sarkar Munger and, with the exception of Pargana Chhai, lay entirely south of the Ganges. This also included Munger which was separated in 1832. Santhal Pargana was formed into a separate district in 1855-56. The area of the district of the Ganges was thus greatly reduced. In the year 1954, the entire area north of the Ganges, with the exception of Bihpur, Naugachhia and Golpalpur Police Stations was constituted into the new Saharsa district. In the year 1991 Banka sub-division of the district was given the status of a district. Bhagalpur, as presently constituted, contains three subdivisions, viz., Bhagalpur Sadar, Naugachhia and Kahalgaon consisting of 16 Community Development Block-cum-Anchals.

No authentic report is available as to the origin of the name of Bhagalpur. In the Bengal District Gazetteer, Bhagalpur, 1911, it has rightly been observed that the limits of the district of Bhagalpur being purely artificial, no connected account of the territory that now bears this name can be expected. However, according to the District Gazetteer of Bhagalpur (1962), Buchanan has observed in his journal that the name is said to have been given by the Mughal officers who collected a number of fugitives, and defended them in the plains from the violence and depredations of the disorderly chiefs of the interior.

Early history

According to traditions preserved in the epics and puranas, the descendants of Anu, the great grandson of Manu, founded the Anava kingdom in the east. Afterwards, this kingdom was divided among the five sons of king Bali, known as Anga, Vanga, Kalinga, Pundia and Sumha. Among the kings of Anga about whom there is some reference, was Lomapada, a contemporary and friend of king Dashrath of Ayodhya. His great grandson was Champa after whom the capital of Anga, till then known as Malini, was renamed as Champa.

Anga, alongwith Magadh, first finds mention in Vedic literature in the Atharvaveda Samhita. Buddhist scriptures mention Anga among the different kingdoms in northern India. According to a tradition, Brahmadatta, the king of Anga defeated Bhattiya, the king of Magadh. But the latter's son, Bimbisar (C.545 B.C.) avenged his father's defeat and subjugated Anga. Ajatshatru, the next king of Magadh, is said to have transferred his capital to Champa. Subhadrangi, the mother of Ashoka, was a poor Brahmin girl of Champa who was given to Bindusar in marriage.

Anga remained a part of the Magadhan Empire under the Nandas, the Mauryas (324-185 B.C.), the Sugas (185-75 B.C.) and the Kanvas (75-30 B.C.). During the rule of the Kanvas, king Kharavela of Kalinga invaded Magadh and Anga.

The history of the next few centuries upto the coronation of Chandragupta I (in 320 A.D.) is rather obscure. Anga was a part of the great Gupta Empire (320-455A.D.). This was an epoch of great material and cultural progress. With the decline of the Guptas, the Gaud King Sasanka gained control over the area in 602 A.D. and maintained his dominion till his death in 625 A.D. His death marked the decline of Gaud power and later the area came under Harsha's domain of influence. He installed Madhav Gupta as king of Magadh. His son Adityasena has left an inscription in Mandar Hill indicating the installation of Narsimha or Narhari temple by him.

Hiuen Tsang visited Champa in the course of his travels. He has left a description of the town in his travel accounts.

The Palas of Bengal came to power in 755 A.D. with the election of Gopala as the king. He conquered Bihar. Dharmapala succeeded him. Vigrahpala established his authority in Anga. A copper plate ascribed to his son Narayanpal hs been found at Bhagalpur. Vikramshila, the seat of the famous University, was founded by Gopala. The Senas also ruled over Anga after the fall of the Palas.

Muslim period

Lakhsamana Sena (1185-1206) of the Sena dynasty was in power when Muhammad Bakhtiar Khilji overran Bihar and Bengal towards the end of the twelfth century. He ransacked and trazed to ground the ancient universities of Nalanda and Vikramshila. Bakhtiar Khilji was the first Viceroy of Bihar and Bengal under the Turko-Afghan rulers of Delhi. South Bihar was more firmly annexed to Delhi in 1330. Towards the close of the fourteenth century, virtually the whole of Bihar was annexed to the kingdom of Jaunpur and remained under it for almost a hundred years. The rule of Jaunpur was terminated by the successful expeditions of Hussain Shah of Bengal.

Humayun invaded Bengal in C. 1540. He passed through Bhagalpur but was checked by Sher Shah in the narrow defile between the Ganges and the Rajmahal hills. On his accession to the throne in 1556, Akbar finally broke the Afghan power and established Mughal authority on a sound footing. Bhagalpur was constituted as a part of the Sarkar of Munger. Akbar's forces marched through Bhagalpur in 1573 and 1575. There was a military revolt against Akbar in 1580. The rebels had an army of about 30,000 cavalry and were encamped at Bhagalpur, Akbar sent his Finance Minister, Todar Mall, to quell the rebellion which he successfully accomplished. He prevailed upon the local zamindars to cut off all supplies to the insurgents who had perforce to scatter away.

British period

For the next two centuries Bihar including Bhagalpur was governed by the Muslim Viceroys of the Mughal Emperors, with their seat at Rajmahal. This terminated in 1769 when the East India Company first appointed 'supervisors' in the district. Augustus Cleveland became the first collector in 1779. In a brief span of four years that he held office, Cleveland accomplished a great deal in conciliating the hill tribesmen of the Santhal Pargana. A pyramidal monument to him still exists in Bhagalpur city.

The subsequent history of the district is rather uneventful. The Santhal rebellion led to the creation of the new non-regulation district of the Santhal Pargana in 1855-56.

1857 Movement

The movement of 1857 did not have very great repercussions in Bhagalpur. On learning of the rising at Dinapur and Munger, Mr. Yule, who was then Commissioner, stopped a detachment of 100 European soldiers of the Fifth Fusiliers and posted them at Bhagalpur. At that time the 5th Irregulars were stationed at Bhagalpur and the 32nd Native Infantry at Bausi. The former revolted on the 14th August and marched to Rohini to join a detachment of their regiment stationed at that place. The combined force marched to Bausi. But the Colonel of the 32nd Native Infantry had been forewarned and he succeeded in preventing his men from joining the insurgents. The latter then marched off towards Deoghar.

Although the 32nd Native Infantry had not risen against the British earlier, it revolted on the 9th October, and killed Lt. Cooper and Mr. Ronald, the Assistant Commissioner. This rising was short lived and the insurgents laid down arms of their own accord soon after.

The district of Bhagalpur played an important role in the country's freedom struggle. It was influenced by the Swadeshi Movement in the first decade of this century. Periodicals from Calcutta which advocated the Swadeshi cause had good circulation in Bhagalpur. There was effective public participation in the movement for boycott of foreign cloth in the early days of the struggle for Indian Independence under Gandhi's leadership. The Students' Movement was emerging in the next decade and Bhagalpur participated in it with great fervour. Some of its annual conventions were held in Bhagalpur.

Bhagalpur responded adequately to Gandhiji's calls during the Non-Cooperation and Civil Disobedience Movement. The Satyadraha was particularly forceful in Bihpur where it was ruthlessly suppressed. The Congress office, Khadi depot and Charkha Sangha were taken over by the police. Over 1,600 persons were arrested in the district in 1930.

In 1942 a large number of meetings were held and processions taken out after the arrest of the national leaders. The police had to open fire at Naugachhia and Bhagalpur town, Nathnagar and Champanagar. The district played a prominent role in the subsequent event which continued till the country's independence.

Census Concept

To be obtained from ORGI

Non-Census Concept

To be obtained from ORGI

Scope of the Village Directory and Town Directory

To be obtained from Bhagalpur district.

(iii) Administrative set up

The district lies on the eastern tip of the state of Bihar. The border of the newly created state of Jharkhand is in the east of the district. After the bifurcation of the district in the year 1991 its erstwhile Banka sub-division was given status of a district. There 3 sub-division and 16 Community Development Blocks in the district. The number of villages and towns in the district is 1519 and 5 respectively.

(iv) Physical features

The district is bounded on the north by the districts of Madhepura, Purnia and Katihar, on the south by the district of Banka, , on the east by the state of Jharkhand and on the west by the districts of Munger and Khagaria.

The total area of the district is 2,569.44 sq. kms. It covers 2.73 % of the total areas of the state of Bihar and ranks 20th on the ladder of districts of Bihar in respect of area. The district lies between 25^0 2" and 25^0 17" north latitudes and 86^0 37" and 87^0 32" east longitudes.

The district of Bhagalpur shares its physical characteristics with most parts of the state. The river Ganga separates north Bhagalpur from south Bhagalpur. The portion north of the river is comprised of the three development blocks, viz., Bihpur, Gopalpur and Naugachhia contained in Naugachhia subdivision. This part is contiguous to the northern part of Maunger district and is analogous in physical characteristics to the north Bihar Plain. The land in this portion of the district is very fertile and Naugachhia is one of the principal centers of trade in grain in the state of Bihar.

The area south of the Gangaes comprises the bulk of the district. Bounded partly in the north by the Ganges, south Bhagalpur has a generally plain surface. The land begins to rise at an easy ascent about 48 kms. south of Bhagalpur city and then the hilly tracts commence. Thus the district of Bhagalpur may be broadly divided into three natural divisions, viz.,

(i) The alluvial plains north of the Ganges.

(ii) The plains south of the Ganges and

(iii) The uplands bordering Sahibganj and Godda districts of Jharkhand State.

River system

The Ganges touches the district at Tulsipur, forming the boundary with Parbatta block of Munger district for about 16 kms. It enters the district opposite Sultanganj wher there is a granite hillock in river-bed. The Ganges then flows northwards to Bhagalpur where it takes a bend to the south to Colgong. From here the river flows eastward for 13 kms. up to Patharghatta where it is joined by the Kosi. The river is navigable throughout the year for all types of boats.

The river Chandan rises in the north of Deoghar (in Jharkhand state). It passes near Banka district and joins the Ganges at Ghogha. The Chandan Reservoir Scheme irrigates a large area of land in south Bhagalpur.

CLIMATIC CONDITIONS

The climate of this district is characterized by a hot Summer and a pleasant Winter season. March to June comprises the Summer months while the Winter season lasts from November to February. The monsoon sets in some time in the later part of June and the rains continue till September, October being a transitional month. The district also receives some winter rains. The annual average rainfall is 1001.7 mm in the district.

Flora and Fauna

With the separation of Banka district from Bhagalpur district the present Bhagalpur district considerably lost forest wealth. As a natural vegetation the trees found in the district are asan kawa and mahua. Some other trees are bahera, kadam, amaltas. Among the species of acacia are babul, sirish and saln babal. Among the fruit trees, those of mango and jack-fruit are common. Plantains, date palms, plums, jamun are some of the other important fruit trees.

Several kinds of fish are found, e.g., rohu, katla, boari and tengra. Bachwa, hjinga and pothi are some other varieties.

Mines and Minerals

The portion north of the Ganges and the fertile plains south of the river are comprised of pure alluvium, both old and new. The gneissic formation occupies a considerable area in Colgong.

Among the minerals in the district, deposits of China-clay, fire-clay and mica have been exploited. Those of garnet, quartz, felspar and galena are yet to be fully exploited.

The alluvial formation, however, occupies the greater pat of the district of Bhagalpur.

Land use pattern

The main occupation of the people of Bhagalpur district is agriculture. The cultivators are fully conscious of the beneficial effects of rotation of crops. Crops are generally sown in rotation but there are certain tracts specially in diara areas where rotation cannot be strictly followed. Crop rotation maintains and improves the fertility of the soil, increases the quality and the yield of the crop and also helps in conservation of soil.

The soils of the district may be classified as under:

(i) Clayey comprising Kharar, Kewal, gorimati and harim chikai.

(ii) Loamy soils known as doras and

(iii) Sandy soils known as balmut and in diara areas, dhus.

Rice is far and away the most important crop of the district. It covers the largest proportion of the gross area sown. Wheat is the main Rabi crop. Maize forms another important cereal and an item of food amongst the poor masses. The most important maize growing areas are in North Bhagalpur particularly Naugachhia. Sugar-cane is the most important non-food crop (cash crop) of the district. The next important non-food crop are the oil seeds.

Besides food crops and non-food crops different kinds of fruits and vegetables are also grown in this district. Fruits are grown in gardens where other kinds of crops are generally not grown. Vegetables are grown in the lands generally near the homestead of cultivator. Vegetables are also grown in large quantities in the uplands near the towns because they get ready market. Potato is the most important vegetable grown in the district.

Irrigational facilities

Agriculture depends mainly on the availability of water at proper time and in proper quantity. In the past the main source of water had been rain fall. However, on account of failure of monsoon at times or premature cessation of rainfall

the need fro irrigation was felt. Before the abolition of zamindari the zamindars used to maintain ahars and pynes which served the twin purposes of irrigation and drainage. Besides these channels there were wells for irrigational purposes.

After the independence the government has under different five-year plans, drawn up land executed various schemes for irrigation.

Livestock

The term 'livestock' includes cattle (cows, bulls and bullocks), buffaloes, sheep, goats and pigs. The cattle in the district are generally not of very good quality. The government has taken up various measures to improve the breed of the cattle. Bulls of improved varieties are purchased and distributed in the different parts of the district. Artificial insemination centres have also been opened at various centres in the district.

A number of veterinary hospitals and dispensaries including the artificial insemination centres are functioning at various places in the district for general welfare of the animals. There has been marked progress in veterinary matters in the district in recent past.

Considerable attention has been paid to poultry development in different community development blocks in the district. Under this scheme Poultry Extension Centre and hatching centres are also in operation at a few centres.

To encourage the cattle owners for improving their live stocks, cattle shows are also organized in various development blocks as also at the district headquarters occasionally.

Industrialisation

The district of Bhagalpur hs been famous for its industrial potentiality since long. Tasar silk, Dyeing, Salt, Indigo, Glass-ware were some of the chief industries. Cloth manufacture was one of the important industries. Besides, thee were a number of small-scale industries and some of them are still continuing.

A number of industries have come up in the post-independence period. Among the medium industrial establishments, mention may be made of-

(i) Workshop of Late Dip Narain Technical Training School, Barari

(ii) Government Silk Institute, Nathnagar

(iii) Shri Ambika Mill, Colgong

(iv) Shri Shiva Parbati Dal, Rice and Oil Mills, Sultanganj

(v) Aruna Mill, Pirpainti

(vi) Sheo Mills, Co(Private) Ltd., Bhagalpur.

Among the household industries, which also play an important role in the economy of the district, handloom industry finds a prominent place in the district of Bhagalpur. Dairying, pottery making and manufacture of materials from cork, bamboo, cane, leaves, etc., are also quite significant.

Fisheries

The large number of rivers, streams, low lying fields where water accumulates in the rainy season, ponds and marshes indicate a rich potential for pisciculture in this district. Certain portions of the bed of Ganga near Bhagalpur are particularly noted for a large veriety of spawn. A large number of tanks are kept reserved for rearing fish. The State government has also taken up a few schemes for development of fisheries.

There are big traders who directly import and export fish. Quite a large quantity of fish is received in Bhagalpur market every day from the other side of the Ganges mostly from Katihar district and Khagaria district. Occasionally particular kinds of fish such as, hilsa, bhetki, etc., and lobsters packed in ice are imported from Calcutta. Fresh water fish such as Rohu and Katla are sent out from Bhagalpur to Calcutta.

In Bhagalpur town fish are brought from different centres and they are sent to the wholesale fish market at Sultanganj. From this market the fish ae sent to retailers on auction basis. The chief fish markets and trade centres in the district are at Bhagalpur, Colgong, Naugachhia, Pirpainti, Amarpur and Sultanganj.

Communications

Bhagalpur district is well connected by rail, road and river transport.

Roads- The roads in the district consist of Public Works Department roads, District Board roads, Municipal roads and village roads.

Following are the other black-topped roads maintained by the P.W.D. These are all State Highways.

Road	Length in Kms.
1. Bhagalpur-Hasdiha	72
2. Bhagalpur-Sultanganj-Ghorghat.	33.5
3. Bhagalpur-Colgong	30
4. Akbarnagar-Shahkund	09.5
5. Sultanganj-Tarapur	05
6. Ghongha-Sonhaula	16
7. Pirpainti-Godda	14.5
8. Amarpur-Shahkund	19
9. Jagdishpur-Sonhaula	19
10. Bhagalpur-Agarpurkotwali	19
11. Colgong-Sahebganj	29
12. Sultanganj ghat linking-Tarapur road	1.5

The important roads in the area north of the Ganges are Bihpur-Ghaghrighat road (9.5 kms.), Naugachhia-Gopalpur-Colgong road (21 kms.), the road from Gosaingaon to the junction of Bihpur-Birpur Road (21 kms.) and Kotoria-Tuitanga road (11 kms.). The District Board also maintains considerable length of pucca roads. Besides, thee are a good number of village roads in the district.

Railways- Bhagalpur lies on the broad-gauge loop line of the Eastern Railway running from Kiul to Burdwan Important stations in the district on this line are Sultanganj, Bhagalpur, Sabour and Colgong. A branch line runs from Bhagalpur to Mandar Hill (21 kms.). North Bhagalpur is served by the metre - guage Barauni-Katihar section of the North Eastern Railway. Narainpur, Thana Bihpur, Naugachhia and Katareah railway stations lie on this line. This line has been doubled from Khagaria to Katareah.

River- North and south Bhagalpur are connected by a regular ferry service. The north Eastern Railway runs a metre-guage line from Bhagalpur to Barari Ghat on the south of the Ganges. On the other side is Mahadeopur Ghat, connected by branch line to Thana Bihpur. Steamer services for crossing the Ganges are also available at Bhagalpur and Sultanganj. Country boats are used for transport of goods along the Ganges.

Airways- Bhagalpur is not served by any regular air service. It has one landing grounds at Bhagalpur.

Trade and commerce

The position of Bhagalpur on the map of Bihar has a particular importance for trade and commerce. It is extremely well located and commands an extensive river front. It has an adequate railway system supported by roadways. A portion of Bhagalpur district lies on the north of the river Ganga and grows luxuriant maize and other crops. Bhagalpur has also been in close contact with Nepal through Purnia district.

Trade in Bhagalpur district consists mainly of export of jute, oil-seeds, food grains, turmeric, sugar, molasses, limber, tasar silk,hides, bones, scrap iron, handloom products, blankets, carpets and trunks and of import of cotton piece goods, coal, salt, iron and steel, grains and pulses, kerosene oil, petrol, cement, etc.

There are mainly three commodities, viz., cloth, grains and turmeric arranged according to importance in which wholesale business is carried on in the district. The chief centers of wholesale business in the district ae Mirjanhat, Nathnagar, Aliganj(Bhagalpur), Sultanganj, Colgong, Pirpainti, Naugachhia and Jagdishpur. Bhagalpur town has been the chief marketing center in the district since long being the headquarters of the division and the district as well. It has the advantage of all the modes of communication-Railways, Roadways and waterways.

The main retail marketing centers in the district are Bhagalpur, Sabour, Nathnagar, Colgong, Sultanganj, Naugachhia, Bihpur, Sonhaula, Ghogha, Pirpainti and Jagdishpur. At all these place retail shops of almost all the commodities locally consumed are found.

Electricity and Power

The district receives most of its power supply from the Bihar State Electricity Board. All the towns of Bhagalpur district have electricity. In rural areas, however, the pace of electrification is comparatively slow. So far 20.36 per cent of inhabited villages in the district have been provided with electricity. However, considerable attention is now being paid by the State government under its Rural Electrification Programme to benefit as many villages as possible.

Major Social and Cultural events

There has not been any change in the administrative set-up of the district during the last decade as stated in the beginning.

Fairs and festivals are held regularly in the district by different communities in complete harmony. The Shiva temple named Ajgaivinath at Sultanganj attract large number of people from far and wide specially in the month of Sravana (August) on every Monday. Some seasonal melas are also held in the rural areas of the district.

(iv) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks

or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house.

But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban

spread.- -For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi

7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhanger
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Swasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TMFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASMFR}}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$\text{ASMR} = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 : Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Bhagalpur district during 1991 was 32,02,471 Hindus constitute over 86.01 per cent (27,54,594persons) of the population in the district followed by Muslims 13.87 percent (4,44,298 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Bhagalpur district during 1991 was 32,02,471. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Bhagalpur district, Hindi, the main mother tongue of the district was returned by 87.16 percent (27,91,127 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Bhagalpur district, was 10.50 percent (3,36,227 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Bhagalpur during 1991 census.

The population of the Scheduled Castes in the district of Bhagalpur was 333,453, according to 1991 Census. Numerically, the five most prominent SCs in the distict were (i) Chamar,Mochi(153,149) (ii) Dusadh,Dhari,Dhahi (83,762)(iii) Musahar (31,289) (iv)Dhobi(254,974) and (v)Pasi(11,925)while Chamar constituted the maximum proportion of Scheduled Castes population , the percentage being 45.9 (more than one third of the total SC population) Dusadh comprised 25.1 percent of the SC population in the district in though numerically Second position of SC population in the district. Musahar and Dhobi though numerically third and forth in order comprised only 9.4 and 7.5 percent of the SC population in the district. Pasi are much less in number as compared to the other four SCs mentioned above with only 3.6 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the five SCs described above as their percentage to total SC population was less than even 1.0 percent except Dom/Dangad,Hari/Mehtar/Bhangi and Bhutia whose percentages were 3.0 and 1.2 each respectively.

The population of the Scheduled Tribes in the district of Bhagalpur during 1991 Census was 110,735. Numerically, the five important STs were namely (i) Santal (ii) Kharwar(iii)Gond (iv)Oraon and (v) Kora. Santal had 66,297 populations, which constituted 59.9 percent of the Scheduled Tribes population in the district. Kharwar with 25,647 populations constituted 2.3 percent of the ST population. Gond , which were 6,019 in number constituted 5.4 percent of the ST population. Oraon comprised 3,564 persons and constituted 3.2 percent of ST population while Kora with 2,890 populations constituted 2.6 percent of the total ST population in the district. The other Scheduled Tribes were almost negligible in proportion except Mal Paharia whose percentage was 1.6 respectively.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Bhagalpur district is 2,423,172comprising 1,291,658 Males and 1, 131,514 Females and constituting 2.9 percent of the State population spread over 2.7 percent of the area of the State in the 16 C.D.Blocks of the district. Jagdishpur is the most populous whereas Ismailpur is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1 : DECADAL CHANGE IN POPULATION OF C.D.BLOCKS BY RESIDENCE, 1991-2001

Serial number	C.D.Block	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001

16	Sonhaula	118,671	118,671	0	150,936	150,936	0	27.2	27.2	0	0	0
	District Total:		**1,909,967**	**1,566,518**	**343,449**	**2,423,172**	**1,970,745**	**452427**	**26.9**	**25.8**	**31.7**	**18.0**

Table 1 shows decadal change in population of C.D. Blocks by residence, 1991-2001. Decadal growth rate in district is 26.9 percent,. In rural and urban areas of the district, these are 25.8 percent and 31.7 percent, respectively. Highest percentage decadal variation (i.e. 36.3 percent) in Pirpainti C.D. Block. Among sixteen C.D. Block of the district only four C.D. Blocks viz Jagadishpur, Naugachhia. Among these four C.D. Blocks Jagdhishpur C.D. Block has highest (74.3%) urban population.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

16	Sonhaula	138	4088	3681	0 (0.0)	0	0
Districts (Rural) Total:		**935**	**195135**	**170502**	**27 (2.9)**	**259130**	**226086**

It may be observed from Table-2 that the maximum number of villages in the district lie in the population range of 1000-1999 accounting for 24.6 percent of the total inhabited villages closely followed by villages in population range of 2000-4999 accounting for 20.6 percent of the total

inhabited villages. The percentages of population in the above two population ranges are 16.7 percent and 30.3 percent of the total rural population of the district, respectively. The villages in the population range of 500-999 constitute 19.6 percent of the total inhabited villages and in these villages the percentage of population 6.7 percent. There are 140 villages in the population range of less than 200 accounting for 11.8 percent of the total inhabited villages and in these villages the percentage of population is 0.5 percent of the total rural population. There are 52 villages in the population range of 5000-9999 accounting 5.6 percent of the total inhabited villages and in these villages the percentage of population is only 18.6 percent of the total rural population. There are only 27 villages in the highest population range of 10,000 and above accounting for only 2.9 percent of the total inhabited and these villages contain 24.6 percent population of the district.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

		Name of town
		1
(a)	New	
(i)	Statutary town	NIL
(ii)	Census town	NIL
(b)	Denotified	NIL
(c)	Declassified	NIL
(d)	Wholly merged with other town(s)	NIL

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	5	0.5	1,059	0.1
11-20	4	0.4	370	0.0
21-50	3	0.3	1,245	0.1
51-100	22	2.4	4,726	0.2
101-200	27	2.9	12,928	0.7
201-300	42	4.5	31,984	1.6
301-500	86	9.2	150,704	7.6
501 +	745	79.7	1,758,902	89.3
Not known	1	0.1	8,827	0.4
District Total:	**935**	**100.0**	**1,970,745**	**100.0**
Population Density (Rural) of the district:		**905.3**		

The data presented in the table 4 highlight the fact that maximum proportion of villages in Bhagalpur district lies in the density range (per square kilometer) of 501+ with 79.7 percent of the inhabited villages which account for 89.3 percent of the total population.It followed by villages in the density range of 301-500 which account for 9.2 percent. It would further be seen that small number of villages fall in the density range 201-300 which account for 4.5 percent of the total inhabited villages.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1061	1064	1003	1057	1082	912
1911	1051	1056	942	1040	1067	871
1921	1020	1027	886	1028	1058	851
1931	995	1005	820	987	1021	800
1941	1002	1012	842	968	997	796
1951	1000	1010	859	944	963	835
1961	1005	1020	832	929	951	828
1971	957	968	833	897	913	818
1981	948	959	852	898	910	847
1991	907	913	857	864	866	855
2001	919	926	868	876	878	866

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table- 5 shows that sex ratio for the urban areas of Bhagalpur district is comparatively high as compared to the urban areas of the state during 1991 and 2001 census. However, on the other hand the sex for the rural areas of the state is found to be comparatively high as compared to the rural areas of Bhagalpur district during 1991 and 2001 censuses. It has already been discussed that the district of Bhagalpur was created before 1991 census. It is found that sex ratio of the district is lower than the sex ratio of the state, Bihar in 1991 and 2001 censuses. In decemial Censuses since 1901 and 2001 sex ratio of the state and district are highest in 1901 and lowest in 1991 Census.

TABLE 6 : SEX RATIO BY C.D.Block, 2001

Serial number	Name of C.D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Narayanpur	881	881	
2	Bihpur	871	871	
3	Kharik	880	880	
4	Naugachhia Rangra	864	864	863

6	Gopalpur	875	875	
7	Pirpainti	875	875	
8	Colgong	868	867	887
9	Ismailpur	877	877	
10	Sabour	863	863	
11	Nathnagar	876	876	
12	Sultanganj	876	880	860
13	Shahkund	895	895	
14	Goradih	872	872	
15	Jagdishpur	873	895	865
16	Sonhaula	912	912	
District Total:		**876**	**878**	**866**

In Bhagalpur district as a whole there are 876 females for every thousand males. Among C.D. Blocks the sex ratio varies from 912 in Sonhaula C.D. Block to 861 in Rangra Chowk C.D. Block. The sex ratio figures for rural and urban areas of Bhagalpur district are 878 and 866 respectively. The sex ratios of Sonhaula(912), Jagdishpur and Shahkund(895), Narayanpur(881) and Sultanganj(880) C.D. Blocks are higher than the district rural average of 878 while Rongra Chowk(861), Sabaur(863), Naugachhia(864), Colgong(867), Bihpur(871), Goradih(872), Gopalpur and Pirpainti(875), Nathnagar(876), Ismailpur(877) C.D. Blocks have sex ratio below the district rural average. The urban sex ratio of the district is 866 which is lower than the total and rural averages of the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Narayanpur	881
2	Bihpur	871
3	Kharik	880

8	Colgong	867
9	Ismailpur	877
10	Sabour	863
11	Nathnagar	876
12	Sultanganj	880
13	Shahkund	895
14	Goradih	872
15	Jagdishpur	895
16	Sonhaula	912
District (Rural) Total:		**878**

In rural areas of the Bhagalpur district, sex ratio is 878, The sex ratio of Sonhaula(912), Jagdishpur and Shahkund(895), Narayanpur(881) and Sultanganj(880) C.D. Blocks are higher than the district rural average of 878 while Ranga Chowk (861), Sabaur(863), Nbaugachhia(864), Colgong(867), Birpur(871), Garadih(872), Gopalpur and Pirpainti(875), Nathnagar(876), Ismalpur(877) C.D. Blocks have sex ratio below the district rural average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	17	1.8	3,499	0.2
700-749	23	2.5	10,969	0.6
750-799	55	5.9	43,802	2.2
800-849	180	19.3	302,449	15.3
850-899	315	33.7	1,081,090	54.9
900-949	197	21.1	402,901	20.4
950-999	81	8.7	101,398	5.1
1000-1099	45	4.8	19,078	1.0
1100+	22	2.4	5,559	0.3
District Total:	**935**	**100.0**	**1,970,745**	**100.0**
Sex ratio (Rural) for District:		**878**		

it is observed in the table – 8 that the maximum proportion of villages in Bhagalpur district lies in the sex ratio range of 850-899 and these villages account for 33.7 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 54.9 percent of the district rural population. 197 villages (21.1%) fall in the sex ratio range of 900-949 and these villages account for 20.4 percent of the rural population of the district.

180 villages (19.3%) are in the sex ratio range of 800-849 and these villages account for 15.3 percent of the rural population. 81 villages (8.7%) fall in the favourable sex ratio range of 950-999 and these villages account for only 5.1 percent of the rural population.

55 villages (5.9%) are in the sex ratio range of 750-799 and these villages account for only 2.2 percent of the rural population. 45 villages (4.8%) fall in the very favourable sex ratio range of 1000-1099 and these villages account for only 1.0 percent of the rural population.

23 villages (2.5%) are in the sex ratio range of 700-749 and these villages account for only 0.6 percent of the rural population. 22 villages (2.4%) are in the sex ratio range of 1100 and above and these villages account for only 0.3 percent of the rural population. 17 villages (1.8%) fall in the sex ratio range of (less than 700) which account for 0.2 percent of the rural population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A / Town	Urban status of town	Sex ratio
1	2	3	4
1	Naugachhia	(NA)	863
2	Colgong	(M)	887
3	Sultanganj	(NA)	860
4	Bhagalpur	(UA)	865
5	(a) Bhagalpur	(M Corp.)	864
6	(b) Habibpur	(CT)	905
Sex ratio (Urban) for the district:			**866**

Table-9 shows sex ratio of urban agglomerations / towns in 2001 Census. There is no urban agglomeration in Bhagalpur district . There are six urban units in Bhagalpur district . The average sex ratio of the district (urban) is 866. Habibpur (CT) has the highest sex ratio (i.e.9.5) while Sultanganj(NA) has the lowest sex ratio (i.e. 860).

Table 10 shows sex ratio of population in the age group 0-6 years for C.D. Block/Tahils. It is observed from the above table that the sex ratio in the age group 0-6 in the district varies from 1050 in Ismailpur to 944 in Sultanganj C.D. Block. The sex ratio figures in the age group 0-6 of Ismailpur, Narayanpur and Rangra Chowk C.D. Blocks are higher than the district total and rural

averages. While Bihpur, Naugachhia, Gopalpur, Pirpaint, Colgong, Sabour, Nathnagar, Shah Kund, Goradih, Jagdishpur C.D. Blocks has sex ratio below the district rural averages.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

14	Goradih	23484	11931	11553	968
15	Jagdishpur	23712	11881	11831	996
16	Sonhaula	32116	16050	16066	1,001
	District (Rural) Total:	**400395**	**203190**	**197205**	**971**

The above Table –11 shows sex ratio of population in the age group 0-6 for rural areas of the C.D. Blocks. It is observed in table – 11 that the sex ratio in the age group 0-6 among the rural population in the C.D. Blocks of the district varies from 1,050 in Ismailpur C.D. Block to 946 in Bihpur C.D. Block.The sex ratio figures of Ismailpur, Sonhaula, Kharik, Jagdishpur, Pirpainti, Narayanpur, Rangra Chowk C.D. Blocks are higher than the district rural average while Bihpur Naugachhia, Gopalpur, Colgong, Nathnagar, Sultanganj, Shahkund, C.D. Blocks have sex ratios below the district rural average..

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	53	5.7	2329	0.6
700-749	24	2.6	3219	0.8
750-799	35	3.7	6768	1.7
800-849	82	8.8	21249	5.3
850-899	89	9.5	33803	8.4
900-949	133	14.2	79100	19.8
950-999	133	14.2	126908	31.7
1000-1099	187	20.0	89827	22.4
1100+	199	21.3	37192	9.3
District (Rural) Total	**935**	**100.0**	**400395**	**100.0**
Sex ratio (Rural) for District:		**971**		

It is observed in the table 12 that 21.3 percent of inhabited villages in Bhagalpur district lies in the sex ratio range of 1100+ in the age group 0-6. 187 (20.0%) villages fall in the sex ratio range of 1000-1099 in the age group 0-6. 133 (14.2%) villages are in the sex ratio ranges of 900-949 & 950-999. 89 (9.5%) villages are in the sex ratio range 850-899 and 82 (8.8%) villages are in the sex

ratio range of 800-849. These villages having favourable sex ratio constitute 5.3 percent of the rural population of the district. There are 53 (5.7%) villages in the district which lie in the unfavourable sex ratio ranges of (less than 700). These villages account for 0.6 percent of the rural population of the district. There are 35 villages (3.7%) in the district which lie in the range of 750-799. These villages account for 1.7 percent of the rural population of the district. There are 24 villages in the district having very unfavourable sex ratio range of 700-749 which account for 0.8 percent of the rural population of the district.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females

6	(b) Habibpur	(CT)	1921	990	931	940
District(Urban) Total			**71731**	**36942**	**34789**	**942**

There is no urban agglomeration in Bhagalpur district. It is apparent from the above table that there are only six statutory towns in Bhagalpur district.

The highest sex ratio in the age group 0-6 is observed in Colgong(M) with 956. The lowest sex ratio in the age group 0-6 in Sultanganj(NA) with 918. Among towns Habibpur (CT) and Sultanganj (NA) have sex ratio below to the sex ratio of the urban areas of the district. On the other hand Naugachhia (NA) , Colgong(M), Bhagalpur(NA) have sex ratio above to that of the district (urban).

The number and percentage of scheduled castes and scheduled tribes population in C.D. Blocks, in 2001 census. The above table shows that the percentage of Scheduled Castes in Bhagalpur district is 10.5 percent of the total population of the district.

Within the district highest percentage of Scheduled Castes population is observed in Goradih C.D. Block with 14.5, percent closely followed by Colgong C.D. Block with 13.0 percent.

The percentage of Scheduled Castes population in Bhagalpur district for the urban areas is 7.8 percent which is lower than the rural areas (11.1%) of the district.

The percentage of Scheduled Tribes population in the C.D. Blocks of Bhagalpur district is almost negligible. Only three C.D. Blocks viz. Pirpainti (15.0%) Colgong (4.4), Rangra Chowk (4.1 percent)and Sonhaula (2.9) C.D. Blocks having more than 1.0% Scheduled tribes population.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

16	Sonhaula	150936	19873	4320	13.2	2.9
	District (Rural) Total:	**1970745**	**219594**	**53804**	**11.1**	**2.7**

Table-15 shows no. and percentage of Scheduled Caste and Scheduled Tribe in rural areas of the C.D.Blocks. The above table indicates that the percentage of the Scheduled Castes in Bhagalpur district is of the order of 11.1 percent of the total rural population.The highest percentage of scheduled castes population is observed in Gordih l Block with 14.5 percent of the total population closely followed by Colgong, Sultanganj, Shahkund, Sabaur Sonhaula and Nathnagar C.D.Blocks with13.5,13.4, 13.3, 12.5,13.2 and 11.2 percent, respectively. The percentage of Scheduled Castes population in Goradih (14.5%), Colgong(13.5%), Sultanganj(13.4%), Shahkund(13.3%), Sonhaula(13.2%) and Nathnagar C.D. Blocks are higher than the district rural average (11.1%).

The percentage of Scheduled Tribes population in the C.D. Blocks of Bhagalpur district is almost negligible as has been observed in the above table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	242	25.9	0	0.0
Less than 5	139	14.9	11,971	5.5
5-10	185	19.8	61,581	28.0
11-20	172	18.4	64,233	29.3
21-30	86	9.2	35,530	16.2
31-40	46	4.9	19,346	8.8
41-50	27	2.9	13,187	6.0
51-75	25	2.7	9,594	4.4
76 and above	13	1.4	4,152	1.9
District Total	**935**	**100.0**	**219,594**	**100.0**

From the above table, it is apparent that there are 242 villages accounting for 25.9 percent of the inhabited villages in the district where the Scheduled Castes is not available.This is closely followed by villages where the population of Scheduled Castes range between 5 and 10 percent of the total population. These 185 villages account for 19.8 percent of the total inhabited villages. There are 172 villages which account for 18.4 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is between 11 and 720.

There are 139 villages which constitute 14.9 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is less than 5 percent. 86 villages are such which constitute 9.2 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is between 21 and 30 percent. 46 villages are such which constitute 4.9 percent of the inhabited villages where the percentage of Scheduled Castes population to total population lies between 31 and 40 percent. 27 villages are such which constitute 2.9 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is between 41 and 50 percent. 25 and 13 villages are such which constitute 2.7 and 1.4 percent of the total inhabited where the percentage of Scheduled Castes population to total population lies between 51 and 75 and above.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	778	83.2	0	0.0
Less than 5	62	6.6	2,702	5.0
5-10	28	3.0	6,594	12.3
11-20	20	2.1	12,203	22.7
21-30	15	1.6	12,073	22.4

District (Urban) Total		**452427**	**35092**	**1741**	**7.8**	**0.4**

Table – 18 shows that there is no urban agglomeration in Bhagalpur district. There are only six statutory town in the district. The highest percentage of Scheduled Castes population to total population is in Habibpur(CT) with 12.5 and the C.T. has noScheduled Tribes population. The lowest percentage of Scheduled Castes population to total population is in Naugachhia(NA) with 5.8, in this town percentage of Scheduled Tribes population is only 0.1.

In Colong(M) the percentage of Scheduled Castes population to total population is 6.3 percent and the percentage of Scheduled Tribes population is 0.4 in Sultanganj(NA) the percentage of Scheduled Castes population to total population is 9.1 percent and the percentage of Scheduled Tribes population is negligible. In Bhagalpur(UA) the percentage of Scheduled Castes population to total population is 7.9 percent and the percentage of Scheduled Tribes population is 0.5. In Bhagalpur(M.Corp) the percentage of Scheduled Castes population to total population is 7.8 percent and the percentage of Scheduled Tribes population is 0.5.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Narayanpur	869	0
2	Bihpur	855	667
3	Kharik	871	0
4	Naugachhia	847	963
5	Rangra Chowk	861	806

12	Sultanganj	871	0
13	Shahkund	881	3000
14	Goradih	870	0
15	Jagdishpur	873	1500
16	Sonhaula	903	929
	District (Rural) Total	**877**	**886**

Table – 19 shows that the sex ratio of Scheduled Castes varies from 958 in Ismailpur C.D. Block to 847 in Naugachhia C.D. Block.

The sex ratio of Scheduled Tribes varies from 3000 in Shahkund C.D. Block to 556 in Nathnagar C.D. Block.

Sex ratio figures of Scheduled Tribes in Bihpur, Rangra Chowk, Pirpainti, Sabour and Nathnagar C.D. Blocks are lower than the district rural average.

And the sex ratio figures of Scheduled Tribes in Jagdishpur, Shahkund, Colgong, Gopalpur and Naugachhia C.D. Block are higher than the district rural average.

It is worthwhile to mention that Scheduled Tribes population in Narayanpur, Kharik, Goradih, Sultanganj and Ismailpur C.D. Blocks are negligible.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Naugachhia (NA)	903	375
2	Colgong (M)	887	818
3	Sultanganj (NA)	879	0
4	Bhagalpur UA	858	638
5	(a) Bhagalpur (M Corp.)	856	638
6	(b) Habibpur (CT)	907	0
Sex ratio (Urban) for the district:		**864**	**639**

Table-20 shows sex ratio among scheduled castes and scheduled tribes in urban agglomerations/towns in 2001 census. There are no urban agglomerations in Bhagalpur district. There are six towns in the district.

The highest sex ratio of Scheduled Castes is observed in Habibpur(CT) with 907 while the sex ratio of Scheduled Tribes is nil. The lowest sex ratio of Scheduled Castes is observed in Bhagalpur(M.Corp.) i.e. 856 while the sex ratio of Scheduled Tribes is 638. And also the sex ratio of Scheduled Castes in Colgong(M) is 887 while the sex ratio of Scheduled Tribes is 818. The sex ratio of Scheduled Castes of Sultanganj is 879 while the it is negligible for Scheduled Tribes.

The sex ratio of Scheduled Castes and Scheduled Tribes in Naugachhia (N.A.) are 903 and 375 respectively.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY C.D.BLOCKS, 2001

12	Sonhaula	988	679	309	3332	1560	1772	27.6	36.7	17.9	18.8
District (Rural) Total:		**15337**	**10879**	**4458**	**38467**	**17654**	**20813**	**35.7**	**47.2**	**22.3**	**24.9**

The table – 28 shows that among the Scheduled Tribes the percentage of literates is highest 100 percent in Goradih, Shahkund and Nathnagar C.D. Blocks of the district. It is observed that the literacy rate among the scheduled Tribes for the district is 35.7 percent only. As regards percentage of male literacy rate among the Scheduled Tribes it is highest i.e. 100 percent in Jagdishpur, Goradih, Shahkund and Nathnagar C.D. Blocks where as it is lowest i.e. 29.2 percent in Naugachhia C.D. Block. In case of female literacy rate among the Scheduled Tribes it is highest i.e. 100 percent in Nathnagar and Shahkund C.D. Blocks. Such higher percentage in literacy rate among the Scheduled Tribes population is because of very thin tribal population in the district.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	11	7.0	145	0.3
1-10	21	13.4	3,453	6.4
11-20	29	18.5	6,646	12.4
21-30	30	19.1	13,933	25.9
31-40	21	13.4	6,224	11.6
41-50	10	6.4	13,318	24.8
51-60	12	7.6	7,949	14.8
61-70	1	0.6	100	0.2
71-80	6	3.8	1,709	3.2
81-90	3	1.9	218	0.4
91-99	1	0.6	26	0.0
100	12	7.6	83	0.2
District Total:	**157**	**100.0**	**53,804**	**100.0**
Literacy rate for District (Rural):		**35.7**		

The above table shows that in case of literacy among the scheduled tribes in the villages of the district the highest number of villages 730.0 (19.1 percent) fall in the literacy range of 21 to30 percent where as the lowest number of villages 1 (0.6 percent) fall in the literacy range i.e. 91 to 99 percent & 61 to70 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Naugachhia (NA)	27	22	5	6	2	4	96.4	100	83.3	16.7
2	Colgong (M)	49	31	18	31	13	18	69	79.5	56.3	23.2
3	Sultanganj (NA)	1	1	0	0	0	0	100	100	0	100
4	Bhagalpur (M Corp.)	1196	712	484	431	281	150	79.6	76.6	84.5	-7.8
	Bhagalpur (Urban)	**1273**	**766**	**507**	**468**	**296**	**172**	**79.5**	**77.3**	**83**	**-5.7**

Table-30 shows number and percentage of literates and illiterate of scheduled tribes in urban areas/towns of the district. In district (urban) literacy rate of the scheduled tribes in urban areas of the district is 79.5 percent in which male and females literacy rates are 77.3% and 83.0% respectively. Thus in females literacy rate is higher than the male literacy rate. Among towns, highest literacy rate of scheduled tribes is observed in Sultanganj(NA) 100%. But it is misleading because in this C.D.Block only one male was counted who was literate.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

That –31 shows number and percentage of main workers, marginal workers and non-workers by six in C.D. Blocks/Tahsils for total (rural+urban). In district percentage total percentage of workers is 35.3 in which 24.0 percent of main workers and 11.3 percent marginal workers.

The proportions of males and females in total workers of the district are 47.4 and 21.4 percent respectively. In district proportion of non –workers is 64.7% in which 52.6 males and 78.6 percent females are non-workers. Among C.D. Blocks highest lowest proportions of the total workers are observed in Goradih(43.4%) and Jagdishpur with 28.9 percent, respectively.

Table-32 shows number and percentage of main workers, marginal and non-workers by sex in rural areas of the district.The work participation rate for total workers is defined as the percentage of total workers to population. In a similar way it is defined for main and marginal workers. Table – 31 and 32 shows that the work participation rate (WPR) in the Bhagalpur district is 24.5 percent as main workers and 12.9 percent as marginal workers. Proportion of non workers in the district is 62.7 percent. Among the main workers male work participation rate in the district is 38.0 percent while that of female is only 9.0 percent as per 2001 census.

The proportion of main workers is the highest (29.5%) in Ismailpur C.D. Block and the lowest (21.1%) in Narayanpur C.D. Block. Out of 16 C.D. Blocks, WPR of eight C.D. Blocks are above the district average. The proportion of marginal workers is highest (17.9%) in Goradih C.D. Block and the lowest (9.6%) in Ismailpur C.D. Block. The proportion of total workers is highest (43.4%) in Garadih C.D. Block and the lowest (32.3%) in Narayanpur C.D. Block. The proportion of non workers among males in the district is 51.4 percent while that of female is 75.5 percent as per 2001 census. The proportion of non workers is the highest (67.7%) in Narayanpur C.D. Block and the lowest (56.6%) in Goradih C.D. Block.

There is no urban agglomeration in Bhagalpur district. There are only six urban unit in the district. The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. In district urban the proportion of main workers is 26.4 percent in which 21.7 percent main workers and 4.7 percent marginal workers, the proportion of male main workers is 36.7 percent while proportion of the female main workers is only 4.4 percent. Simelarly proportion of the male marginal workers and female marginal workers are 5.6 percent and 3.7 percent, respectively. Among the C.D. Blocks highest and lowest proportion, of main workers are observed in Naugachhia (NA) with 22.0 percent and in Colgong(M) with 21.3 percent. The highest marginal workers is observed in Sultanganj with 8.4 percent and lowest in Colgong with 2.9 percent.

Note: Percent of Worker to total worker are given in brackets

From the table 34 , the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers. The Economic activity is primarily dependent on agricultural which is supported by the fact that the cultivators (19.9%) and agricultural labourers(48.2%) together constitute 68.1 percent of the total workers of the district.

The agricultural sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 28.8 percent for Rangra Chowk C.D. Block to 4.9 percent for Jagdishpur C.D. Block. Proportion of agricultural labourers varies between 65.3 percent in Sonhaula C.D. Block to 14.4 percent in Jagdishpur C.D. Block.

The proportion of Household Industry Workers is only 7.4 percent of the total workers of the district. Proportion of household industry workers varies between 19.5 percent in Jagdishpur C.D. Block to 3.2 in Sonhaula C.D. Block.

The proportion of other workers is 24.5 percent of the total workers of the district. Proportion of other workers varies between 61.2 percent in Jagdishpur C.D. Block to 9.4 percent in Sonhaula C.D. Block.

Note: Percent of Worker to total worker are given in brackets

Table-35 shows distribution of workers by sex in four categories of the economic activity in rural areas of the C.D. Blocks in 2001 Census. From the above table, the relative importance of the main spheres of Economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other Economic activity in the rural areas of the district is primarily dependent on agricultural which is supported by the fact that the cultivators (22.6%) and agricultural labourers (54.4%) together constitute 77.0 percent of the total workers of the district . The agriculturals sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 28.6 percent for Ismailpur C.D. Block to 11.4 percent for Jagdishpur C.D. Block . Proportion of agricultural labourers varies between 65.3 percent for Sonhaula C.D. Block to 34.0 percent for Jagdishpur C.D. Block . The proportion of Households Industry workers is only 6.4 percent of the total workers of the district. Among C.D. Blocks this proportion varies between 26.2 percent for Jagdishpur C.D. Block to 2.3 percent for Ismailpur C.D. Block.The proportion of other workers is 16.6 percent of the total workers of the district. This proportion varies between 34.0 percent for Sabour C.D. Block to 7.0 percent for Ismailpur C.D. Block.

There is no urban agglomeration in Bhagalpur district. There are only 6 towns in the district. From the above table the relative importance of the main spheres of Economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold

classification, namely cultivators, agricultural labourares households industry workers and other economic activities.

The cultivators constitute 3.1 percent and agricultural labourares constitute 10.1 percent of the total workers of the Bhagalpur district. Among towns, the highest proportion of male cultivators is 9.9 percent in Sultanganj and lowest males cultivators in Habibpur with 0.5 percent.

The proportion of female cultivators is 8.8 percent is in Sultanganj and lowest 0.4 percent in Colgong(M). The proportion of male agricultural labourers is highest in Sultanganj with 33.4 and lowest in Habibpur with 0.4 percent proportion of female agricultural labourers is highest in Naugachhia with 56.0 percent and lowest 1.6 percent for Habibpur.

Household Industry workers constitute 13.6 percent of the total workers of the Bhagalpur district. The proportion of household industry male workers is highest in Habibpur with 30.4 percent and lowest in Naugachhia with 3.7 percent, proportion of female household industry workers is highest in Habibpur with 40.8 percent and lowest in Naugachhia with 8.9 percent.

Other workers constitute 73.3 percent of the total workers of the district Bhagalpur. The highest proportion of male is observed in Colgong with 87.6 percent and lowest in Naugachhia with 61.1 percent. The proportion of female is highest in Colgong (M) with 72.2% and lowest in Naugachhia with 26.7 percent.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The table 37 gives the distribution of villages according to the availability of different amenities in the district.

Educational amenity : There are as many as 651 villages accounting for 69.6 percent of the total number of inhabited villages (935) in the district where Educational facility is available The highest proportion of villages with Educational facility is observed in Naugachhia C.D. Block, Rangra Chowk and Gopalpur with 100 percent and closely followed by Bihpur and Kharik C.D. Block with 95.5 and 94.7 percent respectively. The smallest proportion of villages with Educational facility is observed in Jagdishpur C.D. Block with 55.6 percent.

Medical amenity : The availability of medical amenity in the villages is quite low and only 24.5 percent villages have got it. Among the C.D. Blocks, Kharik has the highest proportion of villages with medical facility, the percentage being 84.2 percent. It is followed by Naugachhia C.D. Block with 75.0. On the other hand Goradih C.D. Block has the lowest proportion of villages (5.0%) where medical facility is available.

Improved drinking water : There are as many as 876 villages accounting for 97.3 percent of the total inhabited villages in the district where improved drinking water facility is available. Among Bihpur, Kharik, Naugachhia, Gopalpur, Ismailpur, Nathnagar C.D. Blocks all villages (100 percent) have improved drinking water facility. On the other hand Sonhaula C.D. Block has the minimum proportion of villages (88.4%) where improved drinking water facility is available.

Post office : Postal facilities are available only in (23.6%) villages out of 935 inhabited villages in the district. Naugachhia C.D. Block has the maximum number of villages having postal facility (66.7%) followed by Ranga Chowk C.D. Block with 55.6 percent. Jagdishpur C.D. Block has the minimum number of villages 8 (9.9%) having postal facility.

Telephone : The availability of telephone facility in the villages is quite low and only 219 (23.4 percent) villages have got it. Among the C.D. Blocks, Sabour has the maximum number of, 26 (55.3%) villages having telephone facility followed by Naugachhia and Sultanganj C.D. Block with 50.0 percent each while the village of Narayanpur C.D. Block has the minimum number of villages having postal facility (6.7%).

Transport communication : Transport communication facilities are available only in 219 villages out of 935 inhabited villages (23.4%) in the district, Naugachhia C.D. Block has the highest proportion of villages (58.3%) which are connected by bus or rail or navigable river/canal services, etc. followed by Rangra Chowk and Bihpur C.D. Blocks with 55.6 and 54.5 percent, respectively. Sultanganj has the minimum number of villages 65(6.8%) having Transport facility.

Bank : Banking facility is available only in 88 (9.4%) villages in the district. Among the C.D. Blocks, Bihpur and Gopalpur C.D. Block have the maximum number of villages having banking facility (27.3%) followed by Naugachhia C.D. Block with 25.0 percent. Jagdishpur has the minimum number of villages having banking facility (4.9%).

Agricultural credit society : Agricultural credit societies are available only 131 (14.0%) villages while majority of villages still do not have agricultural credit society.

Approach Pucca Road : The facilities is available in 460 villages out of 935 inhabited villages (49.2%) in the district. Among the C.D. Blocks, Bihpur with 77.3 percent villages having pucca approach road followed by Naugachhia and Rangra Chowk, C.D. Blocks (66.7%) while Sonhaula C.D. Block has the least number of villages having this facility with 28.3 percent.

Power supply : Electrified villages in the district constitute as low as 47.6 percent of the total number of inhabited villages. Among the C.D. Blocks, Naugachhia has the maximum number of electrified village with 91.7 percent while Goradih has the minimum number of villages with only 12.5 percent.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table –38 shows number and percentage of rural population served by different amenities in 2001 Census. It would be seen from the above table that educational facility is available to 90.6 percent of the rural population of the district. The proportion varies between the maximum of 100 percent in Bihpur, Naugachhia, Gopalpur, Rangra Chowk C.D. Blocks and the minimum of 80.0 percent in Sonhaula C.D. Block.

It may be of interest to note that proportion of villages in the district enjoying educational facilities is less (being 69.6 percent) than the proportion of population which is as high as 90.6 percent. This may be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all. In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order 44.6 percent. Similar trend can be observed in respect of other amenities also both in the district as well as in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	224	67	2	293
(b) Middle School	565	130	24	719
(c) Degree College	139	206	582	927
2. Medical:-				
(a) Hospital	312	237	351	900
(b) PHC	304	263	311	878
3. Post Office	576	118	27	721
4. Telephone	300	196	220	716
5. Bus Service	438	247	149	834
6. Banks				
(a) Commercial Bank	475	231	156	862
(b) Cooperative Bank	231	288	391	910
7. Agricultural Credit Societies	235	169	421	825

As regards educational facility, it would be seen that there are 293 (31.3%) villages in the district which do not have any Primary school but the facilities is available at places situated within 5 kms., for 224 villages and only 67 villages within the range of 5-10 kms. And only two villages have this facility at distance more than 10 kms. There are as many as 719 (76.8%) villages in the district which have no middle school but this facility is available for 565 villages at places situated within 5 kms., for 130 villages at distanc in range 5-10 kms. and only 10 villages in the district having middle school at distance more than 10kms. 927(99.1%) villages having no college level facility within the village.But 139 villages having college at distance less than 5 kms.,

206(22.0%)villages having college at distance in range (5-10) kms. and 582(62.2%) villages at distance more than 10 kms.Out of 935 inhabited villages, 900 (96.2%) villages having no hospital within the village. But 312 villages having hospital at distance less than 5 km. 237 villages having this facility in distance range (5-10) km. and 351 villages having hospital at distance more than 10 kms.

The rural 878 (93.9%) villages in the district, which do not have primary health center. Similarly, 721 villages of the district having no postoffice facility. 716 villages having no telephone facility. 834 villages having no bus services and Commercial Banks are not available in 910 villages. In 825 villages, co-operative societies are not available but 235 villages enjoy this facility at aistance less than 5 km. 169 villages having Agricultural credit society at distance in range 5-10 km. but 421 villages having this facility at distance more than 10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	71	51	21	19	26	12	7	7	51
	(100.0)	(71.8)	(29.6)	(26.8)	(36.6)	(16.9)	(9.9)	(9.9)	(71.8)
5 -15	454	308	91	105	124	77	35	44	242
	(100.0)	(67.8)	(20.0)	(23.1)	(27.3)	(17.0)	(7.7)	(9.7)	(53.3)
16 - 50	382	268	105	87	62	34	40	54	146
	(100.0)	(70.2)	(27.5)	(22.8)	(16.2)	(8.9)	(10.5)	(14.1)	(38.2)
51+	28	24	12	10	7	8	6	5	21

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table-41 shows distribution of villages according to population range and amenities available, in 2001 Census. It can be seen from the table no.41 that the maximum number of villages i.e. 250(26.7%) in the district fall in the population range of 1-499 followed by 230 villages (24.5%) having a population range of 1000-1999. The lowest number of villages is observed in the population range of 10,000 and above being only 27(2.8%).

The proportion of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range of 1000-999.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Narayanpur	15	10403	55.2	50
2	Bihpur	22	8121	62	62.3
3	Kharik	19	11105	73.9	58.8
4	Naugachhia	12	9066	85.5	52.4
5	Rangra Chowk	9	11974	68.1	61.4
6	Gopalpur	11	12734	78.2	64.3
7	Pirpainti	87	33387	69.1	29.5
8	Colgong	146	32002	76.1	11.4
9	Ismailpur	6	6269	73.2	87.3
10	Sabour	47	8969	62.2	38
11	Nathnagar	84	9776	67.5	25.4
12	Sultanganj	74	16730	73.7	40.3
13	Shahkund	104	15713	81.5	49.7
14	Goradih	80	12430	88	75.8
15	Jagdishpur	81	6993	78.4	40.6
16	Sonhaula	138	16067	86	36.3
	District Total:	**935**	**221739**	**74.1**	**42.9**

Note : - Cultivable area = irrigated area + unirrigated area

Table-42 shows distribution of villages according to the land use in 2001 Census. Table gives the percentage of cultivable area as also the proportion of irrigated area the total cultivable area in the district and its various C.D. Blocks.It would be seen from the table that 74.1 percent of the total area of the district is utilised for cultivation (cultivable area) and only 42.9 percent of this area is found to be irrigated.

Among the C.D. Blocks, the highest percentage of cultivable area is found in Goradih C.D. Block with 88.0 percent closely followed by Sonhaula C.D. Block with 86.0 percent. The lowest cultivable area is found in Narayanpur C.D. Block which is 55.2 percent. The highest proportion of irrigated area (87.3%) to the total cultivable area is found in Ismailpur C.D. Block, followed by Goradih C.D. Block with 75.8 percent. The least proportion of irrigated area is found in Colgong C.D. Block with 11.4 percent which indicates that the villages in this block are deprived of required irrigational facilities.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	I Bhagalpur (M CORP.)	10323.6	5566	4757.5	9430.2	4419.4	4812	80.3	0	118.6
2	III Colgong (M)	52.9	14	38.8	44.7	11.9	27.8	0.8	0.3	3.9
3	III Naugachhia (NA)	1071.3	1071.3	0	1071.3	1045.2	0	0	0	26.1
4	III Sultanganj (NA)	3505.2	420.9	3084.3	2067.6	1119.8	0	127.5	0	820.2
	District Total :	**8367.2**	**4414.1**	**3953.1**	**7543.6**	**3596**	**3702.4**	**73.8**	**0**	**171.3**

The table 43 gives the details of finances in the statutory town in terms of percapita receipt and expenditure.There are only four statutory towns in the district Bhagalpur. On going into the details of receipt under different heads in can be seen that the percapita receipt in case of Bhagalpur district. The per capita expenditure incurred on public works is lower than the per capita expenditure on general administration. Per capita total receipt is higher than the per capita total expenditure in Bhagalpur.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bhagalpur (M CORP.)	2.3	1.4	0.6	0.1	0.2
2	Colgong (M)	3.6	1.4	1.4	0	0.9
3	Naugachhia (NA)	1.3	1	0.5	0.3	0.5
4	Sultanganj (NA)	4.8	1.7	1	0	0.2
District Total :		**2.6**	**1.4**	**0.7**	**0.1**	**0.2**

The above table gives the details of different categories of educational institution per ten thousand population in the towns of the district. It would be seen from the above table that institution like secondary / Matriculation level school and college account for an average of 0.7 and 0.2 institution per ten thousands population, respectively, in the urban areas of the district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Bhagalpur(M CORP.)	35
2	Colgong(M)	3
3	Habibpur(CT)	0
4	Naugachhia(NA)	37
5	Sultanganj(NA)	9
	Distrct Total :	**31**

The table 45 furnishes information regarding availability of beds in medical institution for per 10000 population in towns of the Bhagalpur district.

The number of beds in medical institutions per ten thousand population works out to be highest in Naugachhia (NA) with 37 and lowest is in Colgong (M) with 3. And there is no bed in medical institution in Habibpur (C.T.).

TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Slum data is not available				

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bhagalpur (M CORP.)	Silk Cloth Handloom Cloth Raw Yarn	Silk Cloth Handloom Cloth Rice
2	Colgong (M)	Chira Mustard Oil Andi Oil	Gur Mustard Oil Vegetable
3	Habibpur (CT)	Silk Yarn Silk Handloom Cloth	Silk Rice Silk Goods
4	Naugachhia (NA)	-	Maize Kalai Wheat
5	Sultanganj (NA)	Mustard Oil Pulse, and Handloom	Mustard Oil Pulse, Rice

Table – 47 presents the most important commodities manufactured in the town and exported from Bhagalpur. It would be seen from the above table.

There are five towns in Bhagalpur district. Among the towns, in Bhagalpur (M.Corp.) three items viz. Silk cloth, Handloom cloth, Raw yarn are manufactured in town and three items viz. Silk cloth, Handloom cloth, Rice are exported from Bhgalpur town.

In Colgong (M) three items viz. Chira, Mustard oil, Andi oil are manufactured in the town and three items viz. Gur, Mustard oil, and Vegetable are exported from town.

Habibpur (CT) , items viz. Silk yarn, Silk, Handloom a remanufactured in the town and the three items viz. Silk, Rice, Silk goods are exported from Bhagalpur.

In Naugachhia (NA) any important items are not manufactured in the town but three items Maize, Kalai and wheat are exported from Bhagalpur.

In Sultanganj (NA) three items viz. Mustard oil, Pulse and handloom are manufactured in the town and also three items Mustard oil, Pulse and rice are exported.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

	One room	4059	1163	2896	516	216	300	161	89	72
	Two rooms	3816	902	2914	335	89	246	99	49	50
	Three rooms	1292	293	999	67	31	36	52	35	17
	3+ rooms	692	116	576	36	12	24	13	6	7
	Median number of rooms	2	2	2	1	1	1	2	2	2
Others	No exclusive room	417	315	102	128	87	41	14	14	0
	One room	3630	2251	1379	1312	737	575	127	90	37
	Two rooms	1928	990	938	338	175	163	76	33	43
	Three rooms	894	431	463	100	36	64	36	15	21
	3+ rooms	403	213	190	41	20	21	9	5	4
	Median number of rooms	1	1	2	1	1	1	1	1	2

Table – 48 shows that there are as many as 397,384 households accounting for 95.8 percent of the total households of the district dwelling in owned houses.

The proportion of households dwelling in single room is the highest (58.2%) where as it is the lowest (1.4%) dwelling in no exclusive room. The median number of rooms is for the total households in the tenure status of owned category.

There are 1006 scheduled castes households accounting for 2.4 percentage of the total households dwelling in owned houses and the median number of rooms is 1. There are 11905 scheduled tribes households accounting for 73.0 percent of the total households dwelling in owned houses and the median number of rooms is 2.

The proportion of households dwelling in single rooms is highest (40.6%) where as it is lowest (1.4%) dwelling in no exclusive room. There are 980 scheduled castes households accounting for 9.8 percent of the total households dwelling in rented houses and the midian number of rooms is 1. similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concreate are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

Table-49 shows percentage distribution of households living in permanent and temporary houses in 2001 census. In this district, 44.0 percent households living in permanent houses, 27.3 percent in semi permanent houses and 28.7 percent in temporary houses. In rural area proportion of permanent houses is only 38.0 percent while it is 74.5 percent in urban areas. On the other hand proportion of the temporary houses in urban areas is (4.3%) very low, while in rural area it is 33.5 percent.

Among C.D. Blocks in rural area proportion of permanent houses are highest and lowest in Sabour (55.1%) and Goradih C.D. Blocks (24.7%) , respectively. The proportion in urban areas are in Jagdishpur (78.3%) and 59.7% in Sultanganj C.D. Blocks, respectively.

In urban areas, proportion of temporary houses highest 14.6 percent in Sultanganj C.D. Block while it is lowest 2.5 percent in Jagdishpur C.D. Block. In rural areas of the C.D. Blocks, proportion of temporary houses is highest 48.7% in Pirpainti C.D. Block while it is lowest 9.2 percent in Sabour C.D. Block.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.

. Table-50 shows percentage of households having improved drinking water sources electricity, bathroom,toilate and drainage facility. In district 61.9 percent households having improved drinking water facility in which 57.6 percent households in rural areas and 83.7 percent households in urban areas of the district having improved drinking water facility.

In district, only 19.1 percent households having electricity facility in which 10.8 percent in rural areas and 60.9 percent in urban areas. 53.9 percent households of the Jagdishpur C.D. Block having electricity on the other hand in Goradih C.D. Block only (2.2%) households have electricity. Similarly highest proportion of bathroom, toilet and drainage are observed in Jagdishpur C.D. Block 40.6%, 67.4% and 69.4% respectively. On the other hand lowest proportion of bathroom, toilet and drainage are observed in Ismailpur C.D. Blocks i.e 1.1% bathroom, 6.1% toilet and 11.0% drainage respectively.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table – 51 shows that 27.6 percent of the rural households in the district use fire wood as fuel for cooking the highest proportion of households using fire wood as fuel for cooking is observed in Kharik C.D. Block with 46.3 percent as and lowest in Sonhaula C.D. Block with 13.3 percent.

35.4 percent of the rural households in the district use crop residues as fuel for cooking. Among the C.D. Blocks, highest proportion of households using crop residue as fuel for cooking is Ismailpur C.D. Block with 74.1 percent where as it is lowest is Jagdishpur C.D. Block with 23.5 percent.

26.7 percent of the rural households in the district use cowdung cake as fuel for cooking. Among the C.D. Blocks, the proportion of households using cowdung cake as fuel for cooking is highest (42.9%) in Sonhaula C.D. Block where as it is lowest (4.4%) in Bihpur C.D. Block.

In the case of cooking gas (L.P.G.) there are only 22411 households accounting for 5.4 percent of the total households in the district using for cooking. As regards Kerosene there are only 3111 households accounting for 0.8 percent of the total households in the district using it for cooking. Similar trend can be observed in respect of other types of fuel.

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

Table-52 shows number of households availing banking services and number of household having each of the specified assets in 2001 census. It would be seen from the table above that there are 98405 households accounting for 23.7 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in Jagdishpur C.D. Block (41.4%) where as the same is lowest in Ismailpur C.D. Block (4.7%). There are 119788 households accounting for 28.9 percent of the total households in the district possessing radio/transistor. In the regard the highest proportion of households is in Jagdishpur C.D. Block (44.0%) where as it is lowest in Pirpainti C.D. Block (21.0%).

52667 households accounting for 12.7 percent of the total households in the district possess televisions. In this regard the highest proportion of households is observed in Jagdishpur C.D. Block (35.8%) where as it is lowest in Sonhaula C.D. Block (3.2%).

As regards telephone there are only 14224 households accounting for only 3.4 percent of the total households in the district availing telephone services. In this regard the highest proportion of households is in Jagdishpur C.D. Block (12.4%) where as it is lowest in Ismailpur C.d. Block (0.4%).

127138 households accounting for 30.7 percent of the total households in the district possess bicycles. In this regard the highest proportion of households is in Jagdishpur C.D. Block (43.2%) where as it is lowest in Sonhaula C.D. Block with (22.1%).

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

No major social and cultural event has taken place in he newly created district of Bhagalpur since it was bifurcated into three separate district. Fairs and festivals are however held regularly in the district.

(ix) Brief description of places of religious, historical and archaeological importance invillages and places of tourist interest in the towns of the district

1. Antichak

The village is situated about 13 kms. north-east of Colgong and is supposed to be the most probable site of the famous Vikramshila Mahavihara. The University of Vikramshila was founded by King Dharampala of the Pala dynasty of Bengal. It was a great center of Buddhist learning between the 9^{th} and the 13^{th} centuries A.D.

2. Amarpur

The village is the headquarters of the development block bearing the same name and is situated about 26 kms. away from Bhagalpur on Bhagalpur-Kajraili road. According to locat tradition, the villafge was founded by Shah Umar Vajir of Shah Suja, the Governor of Bihar. He rehabilitatd the persons who left village Patwai when it was eroded by the river Chandan.

3. Asauta

The village is said to have been established mby Maharani Chandarjoti after she left Kharagapur. The Maharani built a Garh (fort) and a tank at Asauta. She also built a mosque for her son. The ruins of the Garh and the mosque still exist.

4. Bhuria

The village, which belongs to Sonhaula blocks is situated on
Ghogha-Dhuraiya road near Gahira rivulet. It is noted as the erstwhile seat of the zamindars of the Majumdar family. The zamindari is said to have been founded in the reign of Shah Jehan. There is one Thakurbari in the village where a large fair is held on the occasion of Dusehra.

5. Chutia

The village is about 8 kms. away from the block headquarters at Shambhuganj. There is a hill in the village containing a temple of Chuteshwar Nath. There is a large cave in the hill. Traces of marks left by Chariot wheels of stones are said to indicate that a big battle was fought here in the remote past.

6. Cauripar

The village is situated at a distance of 10 kms. from the block headquarters at Bihpur. It is noted as a Khadi producing center and the village has a number of Ambar Charkhas. A large fair takes place on the occasion of Kartik-purnima which draws a big crowd.

7. Gauripur

This is another village about 3 kms. away from village Asauta in Shambhuganj block. A Shiva temple constructed by Maharani Chandrjoti of Kharagpur lies in this village.

8. Gopalpur

The vilavge is the headquarters of the development block bearing the same name. Three hillocks in the bed of the Ganges between Tintanga Pahar and Colgong Ghat contain the temples of Lord Vishnu, Shiva and Mahavir, etc. Fairs are held every year on the occasion of Shivaratri and Ramnavami.

9. Marwa

The village lies about 1 km. north of the block headquarters at B ihpur. A very large fair is held on the occasion of Bhadra Purnima (September) which draws about one and a half lakhs visitors. A smaller fair is also held on the occasion of Shivaratri.

10. Nathnagar

The village, situated about 5 kms. west of Bhagfalpur town, is the headquarters of the block bearing the same name. There is a fort in dilapi dated condition which is ascribed to Karna, one of the famous figures of the Mahabharat. It has a Jain Temple which is visited by numerous Jain pilgrims from distant places. The temple of Manas Kamna Nath is known for the fulfillment of the desires of those who offer prayers there.

11. Patharghatta Hill

The place is situated about 13 kms. north-east of Colgong and faces the river Ganges just where the river resumes its easterly course. On the northern side of the hill are some rock sculptures dating prior to the 7^{th} or 8^{th} century A.D. They are known as the Chawrasi Munis (84 sages) but are supposed to represent scenes from the adventures of Lord Krishna and Rama. The hill also contains five caves, the important of which is the Bateshwar cave. There is a temple of Lord Mahadeva on the hill. This temple is of recent origin. At the time of Shivaratri, a mela is held and large number of visitors come from all over the country to offer prayers.

12. Pirpainti

The village is the headquarters of the block bearing the same name. It is situated about 5 kms. north of Pirpainti railway station. The village has an old mosque locally believed to have been constructed during the Mughal period.

13. Shahkund

The village is situated about 13 kms. south-east of Sultanganj and is the headquarters of the block bearing the same name. The village has a Majar (mausoleum) of Shah Saheb. On a hillock in the vilagve are found remains of ancient buildings and temples.

14. Tintanga Pahar

The place is situated about one and half kilometres from Colgong Railway Station. Hindu temples exist at each of the hills. One of them contains a decapitated 10 feet high stone image of Lord Buddha. It is said that Kahal Rishi, father of Astavakra, the great scholar lived on one of the hills. The name Colgong is supposed to have been derived from the name of Kahal Rishi.

15. Bhagalpur

Bhagalpur town is the administrative headquarters of the district and the division bearing the same name and has the importance for its silk weaving industry and cloth trade. From the point of historical importance, mention may be made of the ancient Burhanath Temple on the bank of the Ganges, the Jain Mandir Champanagar, the Mayaganj Gufa, Karnagarh, Nathnagar and Kumkar Bibi's tomb, etc.

16. Colgong

It is a Municipality situated on the Ganges. There is a tomb about one kilometer east of Colgong Railway Station, believed to be of Md. Shah, the last King of Bengal who died here in 1539 A.D. after his capital at Gour had been captured by Sher Shah and his two sons killed.

17. Sultanganj

It is a Notified Area Committee situated on the Ganges about 26 kms. west of Bhagalpur. It is an important religious center for the Hindus on account of the temple of Ajgaibinath which is situated on a hillock in the bed of the Ganges. Large number of people visit this place during the month of Sravana (July-August) to fetch water from the Ganges which they pour over Lord Baidyanath at Deoghar.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

District is bounded on north by district Madhepura, Purnia and Katihar. On the south by district of Banka, on the east by Jharkhand state and on the west by district of Munger. Ganga river separates north Bhagalpur with south Bhagalpur

(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as ‘Yes’ or ‘No’. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village ,adash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH

(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O

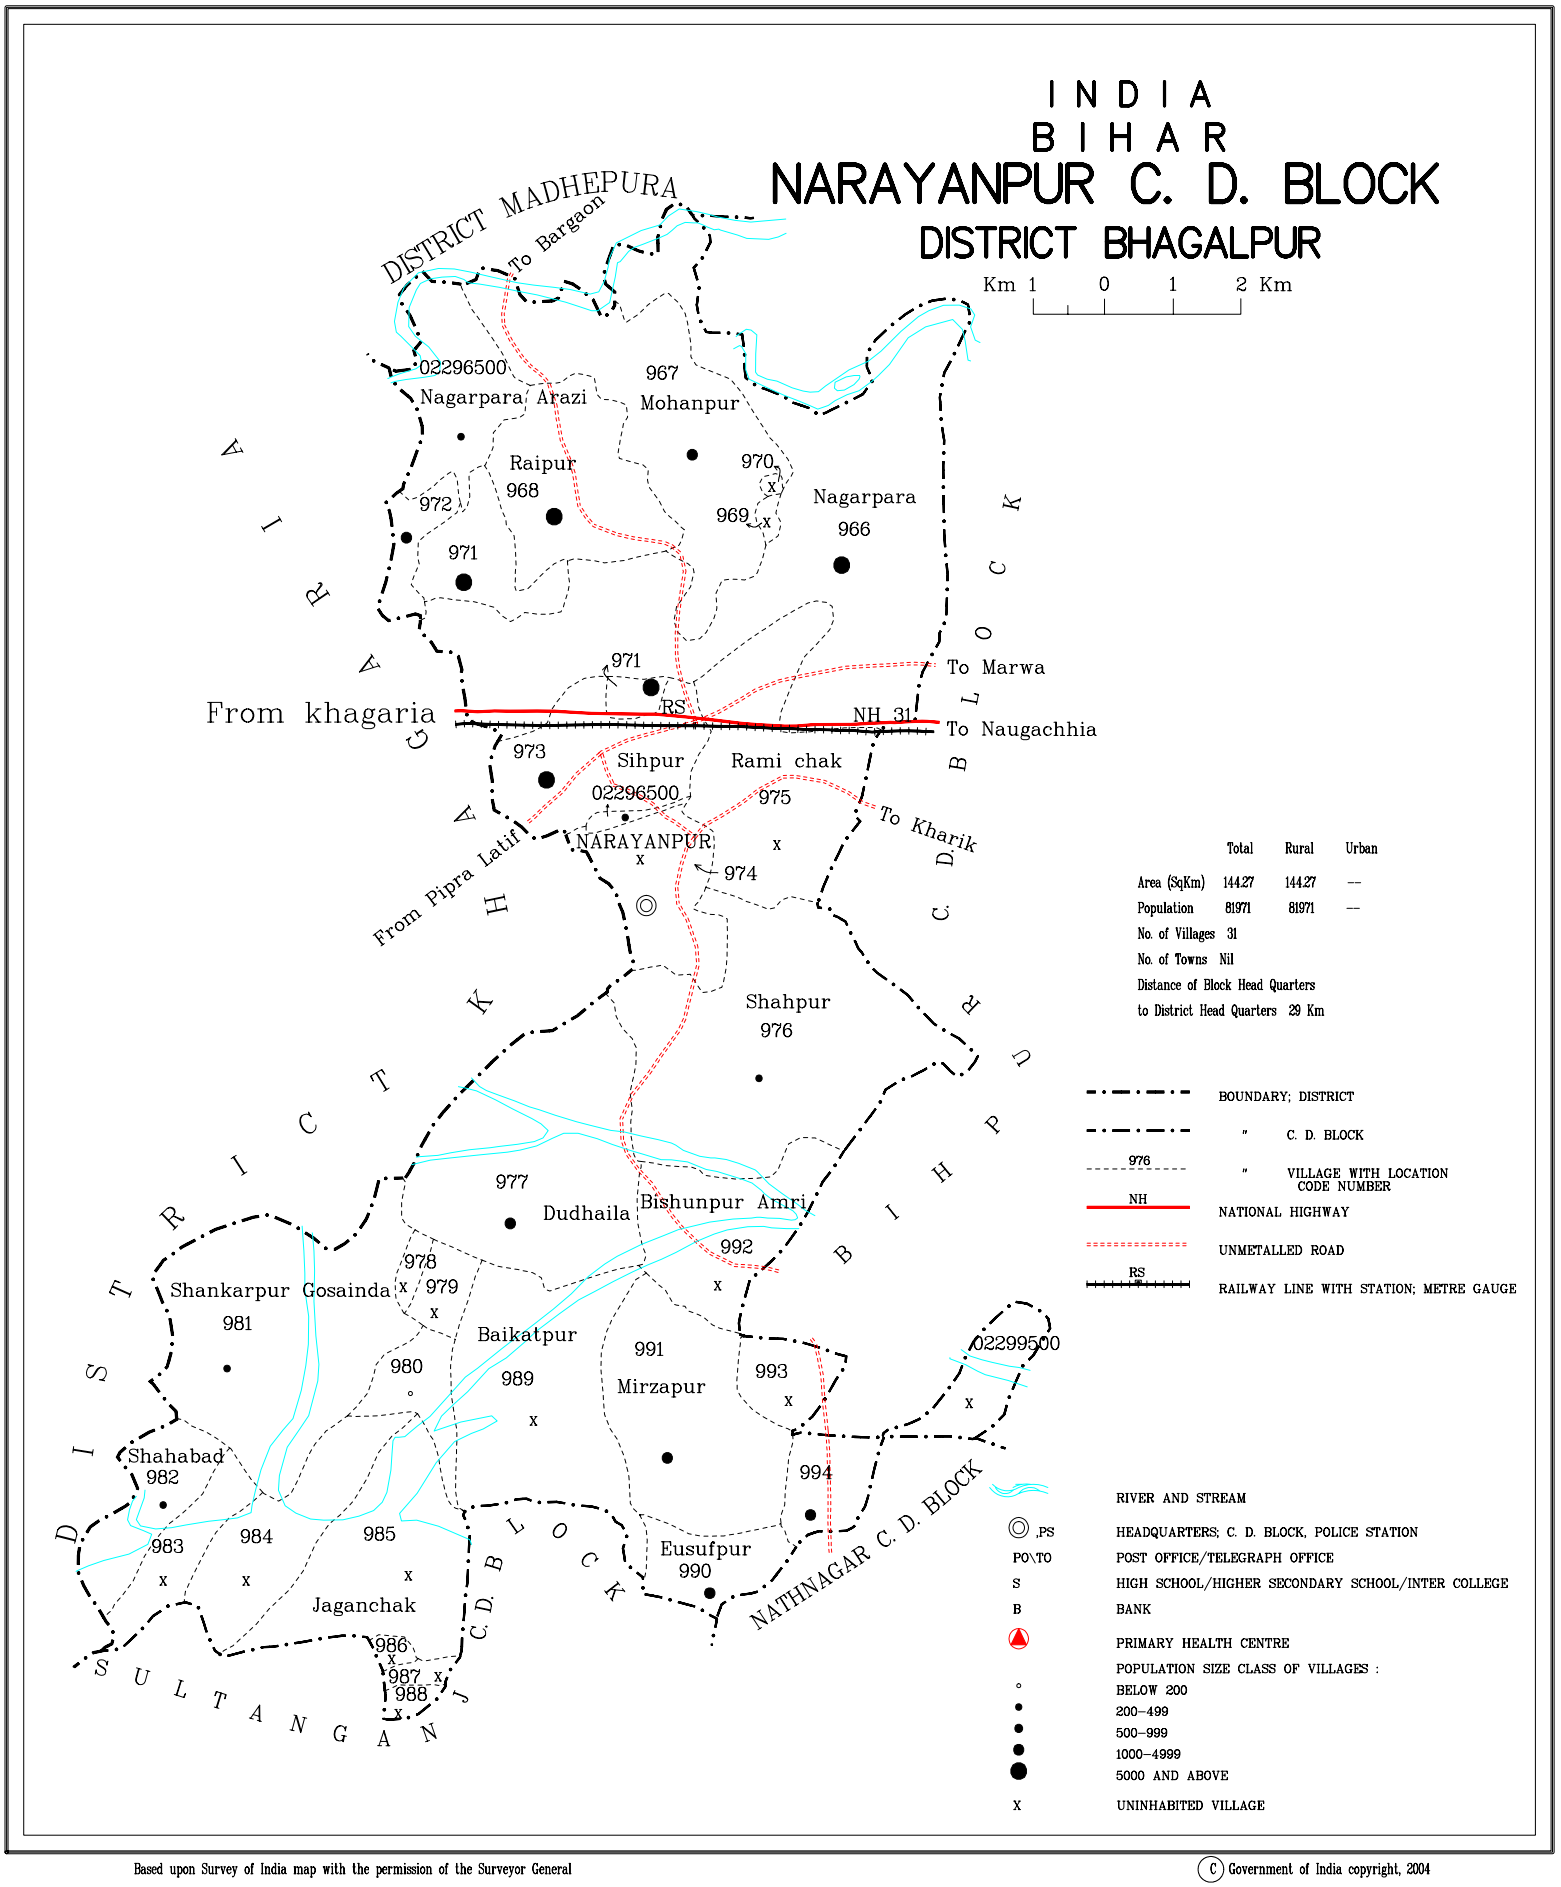

(xii) Total T

The village directory also carries the following appendices.

Appendix I	:	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix IA	:	Indicates number of villages CD Blockwise having one or more primary schools.
Appendix IB	:	Indicates number of villages CD Blockwise having primary, middle and secondary schools.
Appendix IC	:	Shows number of villages CD Blockwise with different sources of drinking water facilities.
Appendix II	:	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix IIA	:	Indicates list of Census Towns which do not have one or more amenities.
Appendix III	:	It gives the land utilization data in respect of Census Towns/non-municipal Towns.
Appendix IV	:	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix V	:	Summary showing number of villages not having Scheduled Castes population.
Appendix VI	:	Summary showing number of villages not having Scheduled Tribes population.
Appendix VIIA	:	The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges
Appendix VIIB	:	The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.
Appendix VIII	:	Number of Villages under each Gram Panchayat(C.D. block wise)
Appendix IX	:	Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Serial number	Name of Towns	Name of villages merged in towns	Name of villages identified for outgrowth	Location Code Number 1991 Census	Location Code Number 2001 Census (in case of partly OG)
1	2	3	4	5	6
There is no such village in the district of Bhagalpur.

N. A.							

Note: N.A. Stands for information not available

TOWN DIRECTORY

Section-II: Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP

(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB

(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matri-culation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely,

India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/C.D. Block / UA / City / Town
2. Primary Census Abstract for Scheduled Castes	District/C.D. Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/C.D. Block/Town
4. Village Primary Census Abstract	CD Block/Village wise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns.

The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Bhagalpur	1991	62	84	85	86

	1981	95	116	133	149

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in annexure as q(1), q(2), q(3) and q(5), it is observed that there has been decline in child mortality over decade (in 1991 Census as compared to 1981 Census) both in the district as well as the state. An interesting feature which can be noticed from the annexure is that the child mortality at the ages 1,2,3 and 5 higher were in the district during 1981 census as compared to the state average while at the time of 1991 Census the child mortality of the district was recorded lower than the state average (except at the age of 2 which has the same figure for the district and the state) indicating thereby that the pace of decline in child mortality had been faster in the district as a whole vis-a-vis the state.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

Various fertility measures for the district and the State(1991-Census)

	State	**District**
1	2	3
CBR	36.2	31.9
TFR	5.3	4.7
TMFR	5.9	5.2
GFR	163.0	148.0
GMFR	186.0	165.0
Child woman ratio	66.6	68.5
No. of children ever Born per woman age Group (45-49)	4.1	4.0
Mean age at marriage	16.5	16.1

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are lower in the district vis-à-vis the state for 1991 Census. The child woman ratio is found to be higher in Bhagalpur district as compared to the state. The mean age at marriage of females is, however, slightly higher for the state as compared to the district average.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

	(7.3)	(6.0)	(7.5)	(.1)	(.2)	(.1)	(100.0)	(100.0)	(100.0)

Note:-Total migrants exclude persons whose birth place is unclassifiable**.**

The growth of population for any area is influenced by the migratory movements of the people including in and out migration. However, for want of data on out-migration since such data is not collected in Census, it might not be possible to assess the net impact of out migration on growth of population, although such impact may not be much in most of the cases.

The tables show percentage distribution of migrants by place of birth based on data recorded during 1991 and 2001 Censuses. It can be seen from the tables that total migrants in the district of Bhagalpur are 568,497 whereas in the state as a whole the migrants are found to be 21,307,020 in number (Bhagalpur constitutes 2.7% of the migrants of the state). The corresponding figures for the district and the state for the year 2001 are 526,070 and 19,989,195 respectively. Bhagalpur constitues 2.6 percent of the total migrants coming to the state in 2001. Female migrants outnumber the male migrants both in the case of the district as well as the state in both the Censuses. While the male migrants constitute only 12.9 and about 14.9 percent in 1991 and 2001 respectively, the female migrants are as high as 87.1 and 95.1 percent of total migrants of Bhagalpur district in 1991 and 2001 respectively. The corresponding proportion of male and female migrants for the state as a whole works out to 10.9 and 89.1 percent respectively in 1991 and 10.5 and 89.5 percent respectively in 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of cases. It can further be seen from the tables that most of the migratory movement has taken place within the district of enumeration in Bhagalpur district particularly in case of males both in 1991 and 2001 (60.3% for females as against 71.7% for males in 1991 and 64.7% females and 72.5% males in 2001). The proportion of female migrants born in other districts of the state is quite high, being 38.5 percent males as against 26.9 percent for females in 1991 and 27.7 percent and 21.3 percent respectively in 2001. The state average figures are on opposite line in 1991 and 2001, as can be seen from the Annexure that females recorded higher percentage than males in case of intra district migration while males recorded higher percentage than females in inter district migration in both the Censuses in Bhagalpur district. The proportions of migrants (both males & females) born in other states and in other countries have been quite low in the district during 1991 and 2001 Census.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Bhagalpur		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL IGRANTS	Total	20,070,811	17,002,880	3,067,931	561,424	492,806	68,618

		(23.2)	(5.7)	(17.5)	(38.2)	(19.6)	(18.0)

Of the total intera-state migrants in the state, 82.6 percent were rural to rural, 3.1 percent were from urban to urban, 12.2 percent were from rural to urban and 1.9 percent were from urban to rural. In case of Bhagalpur district , of the total intra-state migrants, 84.1 percent were from

rural to rural, 4.4 percent were from urban to urban, 7.8 percent were from rural to urban and 3.7 percent were from urban to rural. In case of migrants from other states, 48.9 percent were from rural to rural, 17.5 percent were from urban to urban, 27.4 percent were from rural to urban and only 5.7 percent were from urban to rural for the state of Bihar. In case of Bhagalpur district, on the other hand, of the total migrants, 46.8 percent were from rural to rural, 18.0 percent from urban to urban, 10.9 percent were from rural to urban and 19.6 percent were from urban to rural.

ANNEXURE - IV (C)

ANNEXURE - IV (C)

INTERSTATE MIGRANTS, 2001 CENSUS

Bihar			Bhagalpur		
Place of Birth	Migrants	Percentage to total migrants	Place of Birth	Migrants	Percentage to total migrants
1	2	3	1	2	3
Uttar Pradesh	434,051	27.4	Jharkhand	30,006	78.9
Jharkhand	339,297	21.4	West Bengal	4,356	11.5
Assam	133,758	8.5	Uttar Pradesh	1,701	4.5
West Bengal	126,499	8.0	Gujarat	452	1.2
Nagaland	101,267	6.4	Total for four states	36,515	96.1
Chhatisgargh	90,469	5.7	Other states	1,492	3.9
Gujarat	65,996	4.2	**Total**	**38,007**	**100.0**
Orissa	42,215	2.7			
Maharashtra	38,244	2.4			
Rajasthan	20,542	1.3			
Haryana	20,505	1.3			
Andhra Pradesh	18,371	1.2			
Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

The data presented in the above tables pertaining to 1991 and 2001 Censuses deal with the magnitude of inter-state migration to the state of Bihar as also migrants coming from other states to Bhagalpur district. It will appear that the district received only 0.6 percent of the total migrants coming from other states to Bihar in 1991 and 2.4 percent in 2001 (6,493 out of 38,007 in 1991 and 104,335 out of 1,582,339 in 2001). The state of West Bengal and Uttar Pradesh in 1991 and Uttar Pradesh alongwith Jharkhand were the major contributors of migrants to the state in 2001. For the district of Bhagalpur West Bengal and Uttar Pradesh in 1991 and Jharkhand alongwith West Bengal in 2001 have been the major contributors. Nine major contributing states in 1991 and 14 such states in 2001 contributed 93.4 and 97.2 percent of the total migrants to the state of Bihar respectively. In case of Bhagalpur district 10 major states in 1991 and only 4 such states in 2001 contributed over 92 and 96 percent of total migrants to the district respectively.

The data presented in Annexure-V (A) show religion wise distribution of population according to 1991 and 2001 Censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the Censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001 respectively. The Muslims come next with 14.8 and 16.5 percent respectively. Christians had been the third most important religious community though it proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the state during both the Censuses. Persons categorized under "Other Religions & Persuasions" comprised 1.7 and 0.1 percent of the state's population during 1991 and 2001 Censuses.

In Bhagalpur district the proportion of Hindus to the total population of the district remained 86.0 percent in 1991 and 82.2 percent in 2001 which were comparatively much lower than the respective state averages. Muslims constituted 13.9 and 17.5 percent of the district's population in 1991 and 2001 respectively . The proportion of population of other religious communities remained almost negligible in the district of Bhagalpur during both the Censuses as Hindus and Muslims taken together comprised over 99 percent of the total population of the district during both the Censuses.

The above Annexures furnish religion wise distribution of population for the district of Bhagalpur and its C.D. Blocks in 1991 and 2001 Censuses.

As already observed in Annexure V (A) of 1991 and 2001Census, though the proportion of Hindus in the district of Bhagalpur is highest as compared to other religious communities still it was seen that Muslims also formed a sizeable chunk of population in the district.It can seen that all the C.D.Blocks of Bhagalpur district comprise Hindus as their predominant population . Muslims come next to Hindus in all the C.D.Blocks of the district. It is evident from Annexures that Jagdishpur C.D.Block has the highest proportion of Muslims during both the Censuses . The existence of other religious communities in various C.D. Blocks of the district is insignificant as their proportions to total population are almost negligible in both the Censuses.

Annexure V1 (A) furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991 and 2001 Censuses while Annexure (B) shows percentage distribution of population by marital status for the state. The Annexures V1 (C) and V1 (D) presented above give corresponding figures and percentages for the district of Bhagalpur.

It shall be evident from Annexures V1 (A) to V1 (D) pertaining to 1991 and 2001 Censuses that the state of Bihar as well as Bhagalpur district have relatively higher proportion of males in the "never married" category. The proportion of females, however, is found to be larger in the "married" category. This may, perhaps, be attributed to the fact that women, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 55.4 percent of "never married" males in 1991 Census and 56.3 and 59.3 percent in 2001 Census in Bihar state and Bhagalpur district respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 45.0 percent in 1991 and 47.3 and 49.4 in 2001 Census. Females are found to be higher in proportion in the "married" category than males both in the state and the district in both the Censuses, the percentages being 49.8 and 50.3 percent in 1991 and 47.8 and 45.4 percent in 2001. The corresponding figures for males in 1991 and 2001 Censuses stand at 43.6 and 42.8 and 41.6 and 39.0 respectively. So far the proportion of "widowed" is concerned, it transpires from the tables pertaining to 1991 and 2001 Censuses that female "widowed" are higher in proportion than male "widowed" both in the state as well as in the district. The proportion of "divorced or separated" is found to be negligible both in case of males and females in the state of Bihar and Bhagalpur district.

While analyzing tables for 1991 and 2001 Censuses regarding marital status of the male and female population by age groups, one notices that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than in males. It may, however, be interesting to note that during 1991 Censuses proportion of married males and females in the age group 10-14 is less in Bhagalpur district as a whole compared to the state average figure but as far as married females are concerned , their proportion are higher compared to the state average figure. During 2001 Census proportion of married males and females in the age group 10-14 is less in the district compared to the state . It is also discernable from the table that child marriage is more prevalent in the rural areas i.e., villages of the state and the district than the urban areas i.e., towns.

It is further noted from the tables pertaining to both 1991 and 2001 Censuses that the proportion of "married" females in the state as a whole and the district is relatively higher upto the age group 35- 39 or 40-44 while above these age group the proportion of "married" males are found to be higher than females.

Annexures VII(A),VII (B), VII (C) and VII (D) furnish position of literacy and level of education by various age –groups of population for the State of Bihar and the district of Bhagalpur respectively as per data collected during 1991 and 2001 Census. Among these, Annexures VII (A)and VII (B) provide literacy position absolute in numbers whereas Annexures VII (C) and VII (D) give these figures in terms of percentages.

Literacy is one of the most important characteristics of population on which information are collected during Censuses. The concept of literacy adopted in Census has already been explained in the beginning of this volume.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The rate of literacy for Bihar(excluding population of 0-6 years) in 1991 stood at 38.5 percent which rose to 47.0 percent in 2001. The corresponding proportion for Bhagalpur district in 1991 and 2001 remained 38.89 and 49.5 percents respectively.

It can be seen from the Annexures that 14.4 percent males and 18.5 percent females in 1991 were literate without educational level in Bhagalpur. The corresponding proportions in 2001 including Below Primary remained 19.2 and 24.8 percent respectively. The proportions of Primary passed Males and females in 1991 were 22.6 and 27.3 percents respectively which became 23.2 and 28.8 percent in 2001 in the district. In 1991 there were 28.9 and 32.3 percent males and females who had passed middle whereas in 2001, the corresponding figures remained lower at 14.9 and 14.5 percent, respectively. The proportion of those who had passed Matriculation and above in 1991 were 34.2 and 21.9 percent for males and females respectively in the district, the corresponding figures in 2001 remained 37.4 and 26.1 percent only which were higher than the previous Census. Males out numbered females in the matter of literacy particularly in higher levels of education comprising Matriculation and above during both the Censuses. At lower level education (up to middle) the female recorded higher proportion than the males in the district during both the Censuses .Almost similar trend prevail for the state also barring some deviations.

Total Population	**82,998,509**	**100.0**	**Total Population**	**2,423,172**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Bhagalpur district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Bhagalpur 13.1 percent of the district population have returned urdu as their mother tongue. Hindi as mother tongue has been returned by 13.1 percent of Bhagalpur district's population. Bhojpuri has got third position with 2.7 percent of the district population having returned it as their mother tongues.Hindi and Urdu got almost equal proportion in the district.Bhagalpur district has recorded 69.8 percent of its population as speakers of other mother tongue. Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions or very low proportion of the respective population of the state and the district as mother tongues as per 2001 Census.
