Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 Census & 2001 Census 527

Annexure VI : Marital status of population as per 1991 Census & 2001 Census 533

Annexure VII : Age, sex and education in the district, 1991 Census & 2001 Census 543

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 550

# Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

# Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

# District Highlights – 2001 Census

1. Munger 34th in terms of population (11,37,797) and 34th in terms of area (1,419 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Munger is the 22nd densely populated district in the state with 802 persons per sq.km as against the state's 881.
3. Munger ranks 37th in terms of sex-ratio (872) against the state's 919.
4. There are 336 uninhabited villages (out of 861 total villages) in the district of Munger.
5. Binda Diara (under Bariarpur C.D. Block) is the most populated village (26,889) and Chak Mirza Isakbeg (under Dharhara C.D. Block) is the least populated village (2) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 55% of the total workers are engaged in Primary sector.
7. C.D. Block Dharhara has the highest number of villages (186) in the district and C.D. Block Bariarpur has the lowest number of villages (45).
8. Tola Raunakabad Pahar (under Dharhara C.D. Block) has the largest area (13,372 hectare) and 27 villages have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 97.9 percent of the villages.

**(i) History and scope of the District Census Handbook**

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format

of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block

maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

**(ii) Brief history of the district**

Munger district lies in the eastern part of the state. It is most ancient place. It is 53 Meters high from sea level. It lies between 21°58'10" North Latitude and 83"19'50" East Longitude. It consists of 3 subdivision Munger sadar, Kharagpur and Tarapur Containing 9 Blocks with 103 panchayats constituting 860 villages.

Munger is bounded on the north by Khagariya district on the south by Lakhisarai district on the east by Bhagalpur district and on the west by Jamui district. Before 1972 Begusarai, khagariya, Jamui, Lakhisarai, Sekhpura were Subdivisions of old Munger district.

"Mohghyr" was the spelling adopted by the early Britishers which continued to be used till the 1971 Census. However, in the recent past it was decided to adopt the Hindi name which could be better spelt as 'Munger' There are various hypotheses about the origin of the name of the district. The Mahabharat mentions the places Muda-giri or moda – giri . It was also known as Maudagalayagiri after Maudagalya, a famous Buddhiust monk. However, a widely prevalent tradition ascribes the name to the sage Mudalya Rishi, the grandfather of the epical Ahilya, who was turned into stone on account or her husband's cure but was redeemed later in Tretayug Lord shri Ramachandra. Mudgalgiri, so named after Mudgala Rishi, was in course of time corrupted to Munger.

**Early History**

The district of Munger comprised the eastern portion of Madhyadesh or the midland of the original aryan settlers. Later, Munger formed part of the kingdom of Anga with its capital at Champa near Bhagalpur, although the Magadh empire, Anga was overtaken by the Magadh Emperor Bimbisar in the sixth century b.c. when Bramhadutta, the last independent rural of Anga, was over through. Here after, the history of Munger was virtually that of the Magadh empire.

It is believed that the town of Munger is also associated with Buddha's disciple Maudagalya. There is enough historical and archaeological evidence to show that Buddha himself had visited different place in the district and there are ruins and remains of stoups and viharas built by royal converts of Buddhism all over the district. Recently scholar's have also tried to process conclusively that Mahavira Tirthankar was born at a place called Lachchuar lying in the southern part of the district. Thousands of Jain pilgrims visit this small hamlet, nestled high up in the hills, to celebrate the birth anniversary of Lord Mahavira.

The earliest written account of the district is available in the travel memoirs of Hiuen Tsang who traveled though some parts of the district towards the middle of the seventh century AD He has passed through the south portion of the district now corresponding to Sheikhapura, Kharagpur and Kajra.

There is a gap in the history of the district for a several centuries after Hiuen Tsang's visit. Dharma pal, one of the pala kings, resided in Munger in about 770 A.D. while Deva pal carried out further conquest. A copper plate showing the grant of a village by Deva pal in modern Patna was executed in Mudagiril or the present Munger. Another plato shows the grant of land by Narayan Pal, fifth in the line of pala kings, who is described as the lord of Anga, i.e., Bhagalpur and Munger.

**Muslim period:**

Towards the close of the twelth century AD, when Bakhtiar khiljil invaded and conquered Bihar, Munger passed into the hands of Muslims without offering, much resistance. In 1225 AD Sultan Iltutmis probably met the forces of Sultan Gyasuddin Khilji of Bengal at Munger which ultimately led to signing of the treaty During the time of early Muslins Munger was the second town in south Bihar, It continued to be a part of Bengal till 1332 when it was annexed to Delhi by Md. Tuglak. From 1397 Munger became a part of the kingdom of Jaunpur and continued as such for about one hundred years until the time of Behol Lodi, whose son Sikander Lodi over ran Bihar as far as the frontier of Bengal in 1489. Earlier, from 1459

to 1474 Munger was brought under the control of Rukmuddin Barburk. After a temporary control by Afghan Chiefs, prince Daniyal , son of Sultan Husain Sah of Bengal, met Sultan Sikander Lodi of Delhi near Barh in the year 1499 and the province was acknowledged as a part of Bengal. Prince Daniyal became the Governor of eastern Bihar, He repaired the fortification of Munger town. Nasrat Sah succeeded Husain Sah in 1519. He conquered Tirhut and after crossing the Ganga, Took possession of the Munger fort and town, which was put under the charge of one his Generals named Kutub Khan, Kutub Khan strove to build up an eastern kingdom. Munger became the headquarter of Bihar army of the Gour kings. When Babar invaded with the prince of Munger unhesitatingly accepted the term's peace after the battle at Bogra in 1530. Kutub Khan remained in Munger till the accession of Mahmud Sah. The last independent king of Bengal in 1534. Then Sher Sah and Makhdum Sah and Makhdum Alam rose in arms, defeated Kutub Khan and Mahamud Sah and captured Munger, From 1545 Munger was under the control of an Afghan called Mian Suleman, who held south Bihar for Islam Sah, son of Sher Sah. In 1563 Suleman acknowledged the Suzerainty of Akbar and became the rular of Bengal and Bihar, In 1572 he was succeeded by Daud Sah who refused to pay tribute to the Muhgal emperor whereupon Akbar invaded and conquered the country.

Munger was for sometime the station from where Akbar's forces led by Todar Mal directed their operation against the insurgents of the military revolt in Bengal in 1580. Toder Mal succeeded in winning over the rebel chief without much fighting. Raja Sangram of Kharagpur and Raja Puran Mal of Gidhaur thought it better to submit to Akbar than wage an infractions war.

In 1745 Mustafa Khan, a revel general of All Vardi Khan, Advanced upon Munger and captured the Fort. Two years earlier, the army of Belaji Rao, the peshwa of Poona, had marched through Munger and caused heavy suffering to its people.

**British Period**:

As the compare of the Moghuls weakened and disintegrated by the middle of the 18th contury, Bihar came under the control of the Subah of Bengal which had became practically independent of Delhi. In the battle of plassely in 1757, the forces of Nawab's Siraj-ud-daula of Bengal were defeated by the English put Mir Jafar on the throne of Bengal in 1760. Once again Munger came into prominence when in 1762 Kasim , Ali Khan of Mir Kasim shifred his capital from Murshidabad in Bangal to Munger. Mir Kasim Ali soon came in for trouble with the English when a company of sepias was sent by the English when a company of sepoys was sent by the English Manager of the factory at Patna to search the Munger Fort on the suspicion that some deserters were harbored there. Subsequently, in the events that followed a British force under Major Adam defeated Mir Kasim's troops at Suti. Ultimately the Fort of Munger was taken over by the British in 1763. The news of capture of Munger resulted in Mir Kasim's ordering the whoklesalc execution of his English prisoners. This act was perpetrated by S. amru and ressultesd in what is known as the massacre of Patna.

The ramparts of the dilapidated fort of Munger and Many other histsorical strctures, both inside and outside the fort are reminiscent of the times of Mir Kasim. The most vivid testimony and historical landmark is found in the partially demolished road bridge on the Dakra Nala, about 5 kms. Soitj west of Munger, on the Munger-Patna Road, which was blown up by Mir Kasim himself as he reterated towards Patna pursued by the Englesh forces to whom he lost the battle of Buxar (1764).

With the extension of their dominion by the Britlish, the town of Munger ceased to be an important military station. In the subsequent period, it owed its prominence more as a health resort than an administrative centre.

Unlike other parts of the state, the national Movement of 1857 did not effect Munger district to any appreciable extent. The timely dispatch of troops to the town of Munger nipped the trouble in the bud.

**Freedom movement** :

The part played by Munger in the freedom struggle can be said to be truly outstanding. The people of the district were receptive to new ideas. The Brahma Samaj was established at Munger and Jamalpur UN 1864. Munger was visited by religious

like Ramkrishna, Vivekanand , Dayanand and others. A branch of the Arya Samaj was also started in 1897. Surendra Nath Banerjee visited Munger in 1906 in connection with the Swadeshi movement. The late Dr. Sri Krishna Sinha, the first chief Minister of Bihar was drawn to it in his early student days. Dr. Sinha organized a conference under the auspices of the Bihar student Federation at Munger in 1917. It was presided over by Dr. Rajendra prasad. The Home Rule League Movement of Annia Basant in 1917. and Non-cooperation Movement of Mahatama Gandhi in 1921 received wide support. The district also played its role in the Non-cooperation Movement of 1931 as well as in the famous 'Quit India Movement of 1942'.

**(iii) Administrative set up**

Munger is bounded on the north by Khagaria district on the south by Lakhisarai district on the east by Bhagalpur district and on the west by Jamui district. Presently the district of Munger has got three sub-divisions viz., Munger sadar, Kharagpur and Tarapur. There are nine Community Dev. Blocks in the district namely, Munger, Bariarpur, Jamalpur, Dharhara, Kharagpur, Asarganj, Tarapur, Tetia Bombar and Sangrampur. There are four towns namely Munger (M), Jamalpur(M), Kharagpur (NAC) and Asarganj (CT) in the district. Total number of villages in the district is 861.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He often belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has three subdivisions headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are nine C.D. Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

**Judicial Administration** : The Judges and Munshif magistrates are posted at district and sub-divisions who administer and deliver justice of different kind.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

**Police Administration** : The Superintendent of Police, Munger is the head of the district police administration who is either from the Indian Police Service or the Bihar Police Service. In the subdivisions of the district, the Deputy Superintendents of Police are posted who keep control on police administration.

**(iv) Physical Features**

The two subdivision of Munger District Munger Sadar and Tarapur constitutes of a part of all vial north Bihar plain and a part of Kharagpur subdivision has hilly area.

The hills in the southern part of the district consists of low ranges and isolated peaks. These may be considered to be the outlying extensions of the Vindhyan series. They enter from the south and gradually reach towards Munger town. In fact the lane and water routes. The biggest of the hill ranges are the Kharagpur hills extending from Jamalpur to Jamui. There are hot springs at Bhimband (near Kharagpur ), Sitakund(near Munger) and Rishilkund (near Bariyarpur ) Towards the south-western and of the hills is Sringirishi peak name after the famous sage. To the south-west three is other block of hills known locally as Gidheshwar hills of motes commonly known as Gidhaur hills.

**River systems:**

The Gangas flows through the district from west to east. At Munger proper it flows in northerly direction and assumes special religious significance because of its being Utter –Vahini (north flowing). Near Munger and towards the east, the river is continuously there are some large diara tracts and many Villages in Khagaria district have been eroded by the riverine action.

The Burhi Gandak joins the Ganges near Khagaria. The river is generally navigable. The Bagmati flows through the northern portion of Khagaria district joining the Tiljuga near Chautham. The Tiljuga, also called kamla and in its lower reaches, Ghari,enters ebters Khagaria districst a few kilometres north-east of Mohraghat in Alauli Block. It flows south east to Chautham where it is joined by the Bagmati and the combined river is known as Ghagri.

Among the rivers in the southern part of the district the most important one is Kiul. It rises in Kharagdiha thana of Hazaribag and after forming the boundary of that district near Satpahari hills and joins the Ganges near Surahgarha.

**Climatic conditions:**

Munger tsown has a rather salubrious climate as commented upon by the early British travelers on there way to the moist heat of Bengal. The northern portion of the district is somewhat cooler than the southern part which has an extreme type of climate. The months of May and June are quite hot.

The monsoon usually breaks in the second half of June and lasts till September. The average rainfall in the district is approximately 1020mm. The average maximum rainfall usually recorded in August is about 254mm.

**Flora and Fauna:**

In the northern part of the district, mango orchards ares common in most illagses, which are not subject to floods and mango, constitutes a onsiderable portion of the food of the people. The ijar or oak myrtle is another common tree. Trees such as peepal, banyan, gular and pakar are frequentle met with, Among other trees, jamun, Katahal and Bel are common. The southern part of the district has a more variegated vegetaion. Sal is the most important trees.

While tigers are no longer found, leopards can still be met with. Hyena and wild cats are common in the hills. There are many kinds of deer including Sambar and __Chittal or sported dear and barking deers. Nilgais are also found. The forests of Munger also contain peacocks.

**Mines and Minerals**:

The entire portion of North Munger and the plains of South Munger consist of old or recent deoisilts of alluvium. The hills in the south extending over Jamalpur, Dharhara , Kharagpur are comprised of Archaen schists including the iron ore and kolhan series predominantly.

Among the important minerals found in the district are the following:

State is found in the Kharagpur hills for some kilometres on the northern margin of the hills near Rishikund. Several slate quarries are worked.

**Landues pattern:**

Agricultural conditions are quite different in the north and south of the disstrict. To the north is a fertile alluvial plain devoid of hills or natural fertile eminences. In the portion south of the Ganges the cultivated area lies chiefly in the basin of the kiul river and its tributaries.In the centre are the Kharagpur Hills, a mass of rock and jungle with occasional patches of cultivation in the valleys.

Some of the most fertile lands in the district consist of the diara of the Ganges,i.e. lands in the bed of the river which are constantly being affected by the alluvial of diluvial action of the river in flood. Some diara lands are the most fertile in thes district, producing fine bhadai crops before the river rises and good rabi crops in the cold weather.

The soils of the district are also of different types. To the north of the district the soil is sandy alluvial having alkaline reaction and saline deposition here and there. Portions near the Ganges are comprised of newer alluvium along the river, as is also the case in the reverine areas of Barahiya, and Dharhara blocks south of the Ganges. The soil in the plains region of south Munger is described as alluvial soil of heavy texture having neutral or alkaline reaction.

Rice is the moans crop in the district. Wheat is the next main important crop grown in the district. Non-food crops coca a very small proportion and comprises mostly oil- seeds.

**Irrigational facilities:**

The district of Munger had hardly any big works of irrigation except the Kharagpur reservoir in the pre- independence days. It has, however, received adequate attention from the state Government in the post- independence period. A number of important irrigation schemes were taken up and implemented during the different five year plans. In addition to this, several medium and minor irrigation schemes have been executed in the district Irrigation through lift irrigation pumps, open borings rahat pumps, surface

percolation wells and tube – wells has also received adequate attention.

**Livestock:**

The terms 'livestock' includes cattle (cows, bulls,and bullocks buffalo, sheep, goat and pigs, ). The cattle are generally of small size and poor quality. Except the north Gangetic plains where grass land are available, the grazing land are generally deficient in the district. The usual fodder of the cattle consists of the scanty grass, which grows along the roadside, and the weeds, which spring up among the stubble after the crops, have been harvested. Even in the south of the district the jungle yields poor grazing during the dry season.

The position of livestock in the district according to the 1977 livestock census is indicated below:

| | |
|---|---|
| Cows | 391,635 |
| Buffaloes | 205,328 |
| Bulls and Bullocks | 290,464 |
| Sheep | 24,284 |
| Goat | 441,206 |
| Pigs | 35,541 |

A number of veterinary hospitals and dispensaries including artificial insemination centers have been opened in the district. There has been marked progress in veterinary services in the district in the resent past.

Considerable attention has been given to poultry development in various Community Development Blocks in the district.

**Fishery:**

Fish are abundant in Munger, being found in large numbers in the Ganges and its affluents, and in the marshes to the north, which are replenished yearly from the river floods. The principals species include the well known rohu, kelbans, mirgal, katla and many others. They grow with extra ordinary rapidilty, Hilsa pass up the Ganges in the rains and sprawn there. The woodmen delight in fishing in the hill streams. They use a fresh water shrimp for bait and besides fish, they catch and eat the little crab, which is plentiful wherever there is water.

**Industrialisation**:

Many of the old industries such as manufacture of iron utensils, furnitures made of black wood resembling ebony etc. still survives and flourish in the district. To them have been added large and medium sized important industries such as stone quarrying and the manufacture of locomotives at the great workshops of Jamalpur.

At present the largest industrial concern in the district consists of the workshops of the Eastern Railway at Jamalpur. These workshops, which are among the largest in India, have been established for the construction and repair of rolling stock and plant connected with the railway, and all the constituent parts of a locomotive engine can be manufactured them.

The next important industrial establishment in the district is the cigarette factory at Munger.The factory is owned by the India Tobacco Company , makers of certain famous brand of cigarettes under license from M/s W.D.& H.O. Wills, Bristol & London.

One of oldest and most interesting industries of Munger is iron and steel works, the particular the manufacture of guns, which dates back to the time when the Nawab, Mir Kasim All khan, made the town his headquarters.

Among other minor industries mention may be made of basket making, pottery making, manufacture of tubes for hookah or hubble – bubble etc.

**Communications:**

Roads during pre Independence days there were no metalloid or tarmac roads in the district except those within the urban areas of Munger and Jamui. Thereafter, there has been considerable improvement in the construction of metalloid roads in the district. The roads in the south are older and more extensive than those in the north which have been constructed mainly during recent years. Good road communication has been provided to the district from Patna. Bihar, Nawada, Giridih, Deoghar and Bhagalpur.

The construction of the Rajendra bridge on the Ganges at Hathidah in Patna district and a National

Highway called the Assam Access Road (N.H.27) have greatly benefited the people of North Munger. The important roads in the district and managed by the state P.W.D.

Railways- The district is well served by rail. The Eastern Railway enters the district at Lahaban about 13 kms. South- east of Simultala, joins the looop line at Kiul and proceeds further to Barahiya. The Loop line of the Eastern Railway starts from Kiul, passes through Jamalpur and proceeds to Bhagalpur and beyond. A Branch line also runs from Kiul to Gaya serving Lakhisarai and Sheikhpura within Munger district. Thes only other Branch lines in South Munger is from Jamalpur to Munger town a distance of about 9 kms. In the north a line runs from Khagaria to Samastipur via Salouna and Imli in the district in additional to these a short Branch line runs from Sahebpur Kamal to Munger Ghat.

Riverways- The district is well served by rivers, though river communication assumes some significance only in North Munger and also along the Ganges in South Munger.

Airways- Landing grounds are located at Safiabad (between Munger and Jamalpur), Jamui and Khagaria. These are, however, suitable only for small planes.

**Trade and Commerce:**

The district is favorable situated for trade both by rail and river, Munger, Barahiya, Jamalpur and , Bariarpur are the chief centers of trade on the railway, while a considerable volume of traffic passes via Tarapur to Sultanganj station in Bhagalpur district.

Munger being almost entirely an agricultural district, its export trade consists mainly of agricultural products such as various food grains oil seeds pulses, mustard chilies etc. The important items imported in the district are coal, iron and steel products salt sugar cement, Cotton and woolen textile kerosene oil spices and tobacco sindoor from Lakhisarai and slates from Dhrahara (near Jamalpur ) are also important items of export.

**Electricity and Power:**

At one time the district used to receive all its electrical energy from the power houses at Munger and Begusari. However with the Constitution of the state Electricity Board and the commissioning of the D.V.C. power generation system there has been a radical change in the position. Barauni has got a big thermal power station, which caters to the needs of a large area in North Bihar.

All the towns of Munger have electricity. In rural area however, the pace of electrification is comparatively slow, as only 61.1 per cent by inhabited villages have so far been electrified according to 2001 Census. However the State Government is paying full attention through its various schemes including the Rural Electrification Program to village electricity to the maximum number of villages.

**(v) Census concepts**

**Building**

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

**Permanent houses**

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

**Semi-permanent houses**

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

**Temporary houses**

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

**Room**

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

**Dwelling Room**

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

**Census house**

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which

buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

**Village**

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

**Rural-Urban area**

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

**City**

Towns with population of 1,00,000 and above are called cities.

**UrbanAgglomeration**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:—

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

**Household**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

**Institutional household :**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless household**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**Scheduled Caste and Scheduled Tribe :**

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

**Scheduled Castes :**

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi

10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

**Scheduled Tribes :**

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

**Language and Mother tongue**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate**

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but

cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy rate**

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

**Educational level**

The highest level of education a person has completed.

**Work**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

**Main worker**

Person who has worked for major part of the reference period ( i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

**Marginal worker**

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

**Non worker**

A person who has not worked at all in any economically productive activity during the reference period ( i.e. last one year preceding the date of enumeration ) is termed as 'Non worker'.

**Cultivator**

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

**Agricultural labourer**

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

**Household industry worker**

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in

household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

**Other worker**

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

**Work participation rate**

Percentage of workers (main + marginal) to total population.

**Population density**

Population density is the number of persons inhabited per square kilometre of the area.

**Age**

Age is measured in terms of the completed number of years.

**Sex-ratio**

Number of females per 1000 males in a population.

**(vi) Non-Census Concepts**

**Improved drinking water**

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

**System of sewerage**

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

**Type of latrine and Method of disposal of night soil**

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

**Fertility**

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

**Crude birth rate(CBR)**

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

**Crude death rate(CDR)**

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

**Natural growth rate**

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

**Age specific fertility rate (ASFR)**

**N**umber of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

**Age specific marital fertility rate (ASMFR)**

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

**General fertility rate (GFR)**

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

**General marital fertility rate (GMFR)**

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

**Total fertility rate (TFR)**

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels

indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

**Total marital fertility rate (TMFR)**

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

**Age-specific mortality rate (ASMR)**

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

**q1 :**

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

**q2 :**

Probability of dying between birth and age 2.

**q5 :**

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

**Infant mortality rate (IMR)**

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

**Neo-natal mortality rate (NMR)**

Number of infants dying within the first month of life (28 days or under ) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**Early neo-natal mortality rate**

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**Late neo-natal mortality rate**

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**Post neo-natal mortality rate (PNMR)**

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

**Peri-natal mortality rate (PMR)**

Number of still births plus deaths within 1st week

of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

**Still birth rate (SBR)**

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

**Maternal mortality rate (MMR)**

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

**Eligible couple (Couples per 1000 population)**

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

**Child woman ratio (0-4)**

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

**Child woman ratio (5-9)**

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

**Migration**

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place

of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

**Internal and International migration**

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

**Rural-Urban components of migration**

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

**Civic status of urban units**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

**Size class of UA/Town**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

**Slum area**

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

**Mega city**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

**Note on religion**

Population of the Munger district during 1991 was 30,60,027 Hindus constitute over 91.7 per cent (28,05,717persons) of the population in the district followed by Muslims 8.1 percent (2,49,320 persons). All other four major religious communities have almost negligible percentages.

**Note on mother tongue**

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Munger district during 1991 was 3,060,027. As per distribution of different mother

tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Munger district, Hindi, the main mother tongue of the district was returned by 91.6 percent (2,802,381 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Munger district, was 6.7 percent (204,021 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

**Note on important SCs and STs in the district of Munger during 1991 census.**

The proportion of the Scheduled Castes in the district of Munger was 503,981 according to 1991 Census. Numerically the five most prominent SCs in the distirict were (i) Musahar (165,080) (ii) Dusadh, Dhari, Dhobi (136,984) (iii) Chamar, Mochi (107,081) (iv) Pasi (29,739) and (v) Dhobi (25,802) while Musahar constituted the maximum proportion of the Scheduled Castes population , the percentage being 32.8 (more than one forth of the total SC population) Dusadh and Chamar though numerically Second and third in order comprised only 27.2 and 21.2 percent of the SC population in the district. Pasi and Dhobi are much less in number as compared to the other three SCs mentioned above with only 5.9 and 5.1 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the five SCs described above as their percentages to total Sc population was less than even 1.0 percentage except Hari/Mehtar/Bhangi. Dom/Dhangad and Turi whose percentages were 1.8,1.7 and 1.6 respectively.

The population of the Scheduled Tribes in the district of Munger during 1991 Census was 70,660. Numerically, the five important STs were namely (i) Santal (ii) Kora (iii) kharwar (iv) Oraon and (v) Munda. Santal had 51,609 populations, which constituted 73.0 percent of the ST population constituted 21.5 percent. Kora with 15,160 populations constituted 21.5 percent of the ST population. Kharwar, which were 964 in number, constituted 1.4 percent of the ST population. Oraon comprised 602 persons and comprised 0.9 percent of ST population. While Munda with 359 population constituted 0.5 percent of the total ST population in the district. The other Scheduled Tribes were almost negligible in proportion

**(vii) 2001 Census Findings–Population and its Distribution**

According to the 2001 Census, the total population of Munger district is 1,137,797 comprising 607,730 Males and 530,067 Females and constituting 1.4 percent of the State population spread over 1.5 percent of the area of the State in the 9 C.D. Blocks of the district. Kharagpur is the most populous where as Tetia Bombar is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA, V.D. & Household data give insight into the colour and texture of the population in the district.

## (a) Brief analysis of PCA data based on inset tables 1 to 36 :

**TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001**

| Serial | | Population | | | | | | Percentage decadal variation 1991-2001 | | | Percentage urban population | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | 1991 | | | 2001 | | | | | | | |
| number | C.D. Block | Total | Rural | Urban | Total | Rural | Urban | Total | Rural | Urban | 1991 | 2001 |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| 1 | Munger | 250,739 | 100,627 | 150,112 | 297,741 | 109,691 | 188,050 | 18.7 | 9.0 | 25.3 | 59.9 | 63.2 |
| 2 | Bariarpur | 74,320 | 63,886 | 10,434 | 92,406 | 92,406 | 0 | 24.3 | 44.6 | -100.0 | 14.0 | 0.0 |
| 3 | Jamalpur | 153,372 | 67,260 | 86,112 | 181,751 | 84,768 | 96,983 | 18.5 | 26.0 | 12.6 | 56.1 | 53.4 |
| 4 | Dharhara | 89,385 | 89,385 | 0 | 104,037 | 104,037 | 0 | 16.4 | 16.4 | 0.0 | 0.0 | 0.0 |
| 5 | Kharagpur | 140,931 | 115,612 | 25,319 | 181,409 | 154,334 | 27,075 | 28.7 | 33.5 | 6.9 | 18.0 | 14.9 |
| 6 | Asarganj | 51,974 | 47,048 | 4,926 | 59,507 | 53,768 | 5,739 | 14.5 | 14.3 | 16.5 | 9.5 | 9.6 |
| 7 | Tarapur | 70,173 | 63,911 | 6,262 | 84,694 | 84,694 | 0 | 20.7 | 32.5 | -100.0 | 8.9 | 0.0 |
| 8 | Tetiha Bambor | 47,456 | 47,456 | 0 | 57,734 | 57,734 | 0 | 21.7 | 21.7 | 0.0 | 0.0 | 0.0 |
| 9 | Sangrampur | 65,233 | 65,233 | 0 | 78,518 | 78,518 | 0 | 20.4 | 20.4 | 0.0 | 0.0 | 0.0 |
| | **District Total:** | **943,583** | **660,418** | **283,165** | **1,137,797** | **819,950** | **317,847** | **20.6** | **24.2** | **12.2** | **30.0** | **27.9** |

Table 1 shows rise in the population of Munger district during 1991-2001 decade and it has been of the order of 20.6 percent. The rural population in the district has increased by 24.2 percent while the

urban population growth over the decade has been 12.2 percent. Among the C.D. Blocks, Kharagpur has shown the highest increase in population over the decade with 28.7 percent followed by Bariarpur C.D. Block with 24.3 percent and Tetiha Bombar C.D. Block with 21.7 percent. Percentage decadal variation has been observed to be the least in the case of Asarganj C.D. Block with 14.3 percent.The increase in rural population during 1991-2001 has been highest in Bariarpur C.D. Block with 44.6 percent followed by Kharagpur C.D. Block with 33.5 percent.

**TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001**

| Serial number | District/C.D.Block | Total number of inhabited Village | Total rural population | | | Number and percentage of villages | Population less than 200 | |
|---|---|---|---|---|---|---|---|---|

| 9 | Sangrampur | 10 (15.4) | 15,271 | 13,520 | 0 (0.0) | 0 | 0 | 0 (0.0) | 0 | 0 |
| | **Districts (Rural)** | | | | | | | | | |
| | **Total:** | **97 ( 18.5)** | **159,249** | **138,620** | **15 ( 2.9)** | **56,218** | **49,034** | **6 ( 1.1)** | **57,173** | **49,640** |

It may be observed in table 2 that the maximum number of villages in the district lie in the population rage of 1000-1999 accounting for 26.9 percent of the total inhabited villages followed by villages in the population range of 500-999 accounting for 21.7 percent of the total inhabited villages. The percentage of population in the above two population ranges are 23.7 percent and 10.0 percent of the total rural population of the district respectively. The villages in the population range of 2000-4999 constitute 18.5 percent of the total inhabited villages and in these villages the percentage of population is 36.3 percent. There are 79 villages in the population range of 200-499 accounting for 15.0 percent of the total inhabited villages and in these villages the percentage of population is 3.3 percent of the total rural population. There are 73 villages in the population range of less than 200 accounting for 13.9 percent of the total inhabited villages and in these villages the percentage of population is only 0.8 percent. There are only 6 villages in the highest population range of 10,000 and above accounting for only 1.1 percent of the total inhabited villages and in these villages the percentage of population is 13.0.

**TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS**

Above table is not applicable in respect of Munger district as there has been no change between 1991 Census and 2001 Census

**TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001**

| Range of population density (per square kilometer) | Total number of villages in each population density range | Percentage of villages in each population density range | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0-10 | 2 | 0.4 | 158 | 0.0 |
| 11-20 | 4 | 0.8 | 223 | 0.0 |
| 21-50 | 6 | 1.1 | 1,669 | 0.2 |
| 51-100 | 8 | 1.5 | 2,416 | 0.3 |
| 101-200 | 23 | 4.4 | 26,539 | 3.2 |
| 201-300 | 25 | 4.8 | 61,757 | 7.5 |
| 301-500 | 42 | 8.0 | 29,090 | 3.5 |
| 501 + | 415 | 79.0 | 698,098 | 85.1 |
| Not known | 0 | 0.0 | 0 | 0.0 |
| **District Total:** | **525** | **100.0** | **819,950** | **100.0** |
| **Population Density (Rural) of the district:** | | **779** | | |

The data presented in the above table highlights the fact that maximum proportion of villages in Munger district lies in the density range (per square kilometer) of 501+ with 79.0 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 8.0 percent. It would further be seen that small number of villages fall in the density range of 201-300 which account for 4.8 percent of the total inhabited villages. There are 23 villages in the density range of 101-200 which account for 4.4 percent of the inhabited villages.

Maximum proportion of total rural popultion (i.e 85.1%) fall in the density range of 501+ covering maximum number of villages in the district,followed by 7.5 % rural population in the density range of 301-500.

**TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001**

| Census Year | State | | | District | | |
|---|---|---|---|---|---|---|
| | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1901 | 1,061 | 1,064 | 1,003 | 1,045 | 1,058 | 971 |
| 1911 | 1,051 | 1,056 | 942 | 1,046 | 1,076 | 930 |
| 1921 | 1,020 | 1,027 | 886 | 1,022 | 1,058 | 900 |
| 1931 | 995 | 1,005 | 820 | 998 | 1,034 | 882 |
| 1941 | 1,002 | 1,012 | 842 | 998 | 1,042 | 873 |
| 1951 | 1,000 | 1,010 | 859 | 940 | 977 | 848 |
| 1961 | 1,005 | 1,020 | 832 | 943 | 969 | 880 |
| 1971 | 957 | 968 | 833 | 898 | 919 | 846 |
| 1981 | 948 | 959 | 852 | 891 | 904 | 861 |
| 1991 | 907 | 913 | 857 | 856 | 857 | 853 |
| 2001 | 919 | 926 | 868 | 872 | 875 | 866 |

**Note:** Sex ratio has been defined here as the number of females per 1000 males.

The above table 5 shows that the sex ratio for the urban as well as rural areas of Munger district is comparatively low as compared to state during 1991 and 2001 censuses. It is found that in case of sex ratio in the total population in the district it is lower than the sex ratio of the state of Bihar since 1941 and onward.

**TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001**

| Serial number | Name of C.D.Block | Sex ratio | | |
|---|---|---|---|---|
| | | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 |
| 1 | Munger | 859 | 861 | 857 |
| 2 | Bariarpur | 861 | 861 | |
| 3 | Jamalpur | 874 | 869 | 879 |
| 4 | Dharhara | 881 | 881 | |
| 5 | Kharagpur | 877 | 878 | 876 |
| 6 | Asarganj | 885 | 886 | 881 |
| 7 | Tarapur | 894 | 894 | |
| 8 | Tetiha Bambor | 863 | 863 | |
| 9 | Sangrampur | 883 | 883 | |
| | **District Total:** | **872** | **875** | **866** |

In Munger district as a whole there are 872 females for every thousand males. Within the district, the sex ratio varies from 894 in Tarapur C.D. Block to 859 in Munger C.D. Block. The sex ratio of Jamalpur C.D. Block is 874 while the sex ratio of Tetia Bombar C.D. Block is 863. The sex ratio figures for rural and urban areas of Munger district are 875 and 866 respectively.

**TABLE 7 : SEX RATIO BY CD BLOCKS, 2001**

| Serial number | Name of C.D.Block | Sex ratio |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Munger | 861 |
| 2 | Bariarpur | 861 |
| 3 | Jamalpur | 869 |
| 4 | Dharhara | 881 |
| 5 | Kharagpur | 878 |
| 6 | Asarganj | 886 |
| 7 | Tarapur | 894 |
| 8 | Tetia Bombar | 863 |
| 9 | Sangrampur | 883 |
| | **District (Rural) Total:** | **875** |

As for rural in Munger district there are 875 females for every thousand males. Within the district, the sex ratio varies from 894 in Tarapur C.D. Block to 861 in Munger and Bariarpur C.D. Blocks. The sex ratios of , Dharhara, Asarganj and Sangrampur C.D. Blocks are , 881, 886 and 883 respectively. The sex ratios of Dharhara, Kharagpur, Asarganj, Tarapur and Sangrampur C.D. Blocks are higher than the district rural average of 875 while Munger (861), Bariarpur(861), Jamalpur (869) and Tetia Bombar (863) C.D. Blocks have sex ratios below the district rural average.

**TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001**

| Range of sex ratio for villages | Number of inhabited villages | Percentage of villages in each range | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Less than 700 | 13 | 2.5 | 3,914 | 0.5 |
| 700-749 | 8 | 1.5 | 3,700 | 0.5 |
| 750-799 | 36 | 6.9 | 32,615 | 4.0 |
| 800-849 | 100 | 19.0 | 182,986 | 22.3 |
| 850-899 | 159 | 30.3 | 362,390 | 44.2 |
| 900-949 | 116 | 22.1 | 172,763 | 21.1 |
| 950-999 | 47 | 9.0 | 45,547 | 5.6 |
| 1000-1099 | 32 | 6.1 | 14,376 | 1.8 |
| 1100+ | 14 | 2.7 | 1,659 | 0.2 |
| **District Total:** | **525** | **100.0** | **819,950** | **100.0** |
| **Sex ratio (Rural) for District:** | | **875** | | |

It is observed in the Table 8 that the maximum proportion of villages in Munger district lies in the sex ratio range of 850-899 and these villages account for 30.3 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 44.2 percent of the district

rural population. 116 villages (22.1%) fall in the sex ratio range of 900-949 and these villages account for 21.1 percent of the rural population of the district. 100 villages (19.0%) are in the sex ratio range of 800-849 and these villages account for 22.3percent of the rural population. 47 villages (9.0%) fall in the sex ratio range of 950-999 and these villages account for only 5.6 percent of the rural population. Only 32 villages (6.1%) fall in the very favourable sex ratio range of 1000-1099 and this small proportion of villages accounts for 1.8 percent of the population. Only 13 villages (2.5%) are in the lowest range of sex ratio (less than 700) which account for 0.5 percent of the population.

**TABLE 9 : SEX RATIO OF TOWNS, 2001**

| Serial number | Name of Town+ | Urban status of town | Sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Asarganj | CT | 881 |
| 2 | Jamalpur | M | 879 |
| 3 | Kharagpur | NA | 876 |
| 4 | Munger | M | 857 |
| **Sex ratio (Urban) for the district:** | | | **866** |

There is no urban agglomeration in Munger district. These are four urban units. They are Munger(M), Jamalpur(M), Kharagpur(NA) and Asarganj(CT). The sex ratios of Jamalpur(M), Kharagpur(NA) and Asarganj(CT) are 879, 876 and 881 respectively which are higher than the sex ratio of the district. The sex ratio of Munger(M) is 857 which is lower than the sex ratio of the district.

**TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001 (*Concld.*)**

| Serial number | Name of C.D.Block | Total/ Rural/ Urban | Total population in 0-6 age group | | | Sex-ratio for 0-6 age group |
|---|---|---|---|---|---|---|
| | | | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 9 | Sangrampur | Total | 14,936 | 7,872 | 7,064 | 897 |
| | | Rural | 14,936 | 7,872 | 7,064 | 897 |
| | | Urban | 0 | 0 | 0 | 0 |
| | **District Total:** | **Total** | **205,735** | **107,485** | **98,250** | **914** |
| | | **Rural** | **155,507** | **81,478** | **74,029** | **909** |
| | | **Urban** | **50,228** | **26,007** | **24,221** | **931** |

**Note:** Sex ratio has been defined here as the number of females per 1000 males.

It is observed from the table above that sex ratio of population in the age group 0-6, which works out to 914, is much higher than the sex ratio of the total population (872) in the district of Munger. While the sex ratio of (0-6) population in the urban areas of the district is as high as 931,as compared to the sex ratio of (0-6) population for the rural areas is only 909. It may further be noticed that the sex ratio in the age group 0-6 varies between 965 in Bariarpur C.D. Block to 856 in Kharagpur C.D. Block. The sex ratio of Munger Block, which contains Munger town, the headquarters of the district, is 927. The C.D. Blocks of Munger, Bariarpur, Jamalpur, Asarganj, Tarapur and Tetiha Bambor have sex ratios of 0-6 population higher than the district average of 914.

**TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001**

| Serial number | Name of C.D. Block | Total population in 0-6 age group | | | Sex ratio for 0-6 age Group |
|---|---|---|---|---|---|
| | | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Munger | 21,275 | 10,981 | 10,294 | 937 |
| 2 | Bariarpur | 17,485 | 8,898 | 8,587 | 965 |
| 3 | Jamalpur | 15,832 | 8,286 | 7,546 | 911 |
| 4 | Dharhara | 20,124 | 10,620 | 9,504 | 895 |
| 5 | Kharagpur | 27,149 | 14,749 | 12,400 | 841 |
| 6 | Asarganj | 10,658 | 5,483 | 5,175 | 944 |
| 7 | Tarapur | 16,686 | 8,690 | 7,996 | 920 |
| 8 | Tetia Bombar | 11,362 | 5,899 | 5,463 | 926 |
| 9 | Sangrampur | 14,936 | 7,872 | 7,064 | 897 |
| | **District (Rural) Total:** | **155,507** | **81,478** | **74,029** | **909** |

From the above table it is observed that the sex ratio in the age group 0-6 among the rural population in the C.D. Blocks of of Munger district varies from 965 in Bariarpur C.D. Block to 841 in Kharagpur C.D. Block. The sex ratio of Munger C.D. Block is 937 while the sex ratio of Tarapur C.D. Block is 920. The sex ratio figures of Munger, Bariarpur, Jamalpur, Asarganj, Tarapur and Tetia Bombar C.D. Blocks are higher than the district average while Dharhara, Kharagpur and Sangrampur C.D. Blocks have sex ratios below the district average.

**TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001**

| Range of sex ratio for villages | Number of inhabited villages | Percentage distribution of villages | Population 2001 | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Less than 700 | 65 | 12.4 | 7,879 | 5.1 |
| 700-749 | 24 | 4.6 | 6,015 | 3.9 |
| 750-799 | 36 | 6.9 | 8,740 | 5.6 |
| 800-849 | 56 | 10.7 | 18,867 | 12.1 |
| 850-899 | 67 | 12.8 | 25,214 | 16.2 |
| 900-949 | 57 | 10.9 | 23,586 | 15.2 |
| 950-999 | 52 | 9.9 | 35,187 | 22.6 |
| 1000-1099 | 78 | 14.9 | 18,892 | 12.1 |
| 1100+ | 90 | 17.1 | 11,127 | 7.2 |
| **District (Rural) Total** | **525** | **100.0** | **155,507** | **100.0** |
| **Sex ratio (Rural) for District:** | | **909** | | |

It is observed in the above table that 17.1 percent of inhabited villages in Munger district lies in the sex ratio range of 1100+ in the age group 0-6. These villages having favourable sex ratios constitute 7.2 percent of the rural population of the district. 78 villages (14.9%) are in the sex ratio range of 1000-1099.67 villages (12.8%) fall in the sex ratio range of 850-899 in the age group 0-6.65 villages (12.4%) are in the sex ratio range of less than 700. 57 villages (10.9%) are in the sex ratio range of 900-949. 36 villages (6.9%) are in the sex ratio range of 750-799.

**TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF TOWNS, 2001**

| Serial number | Name of Town | Urban status of town | Total population in 0-6 age group | | | Sex ratio for 0-6 age group |
|---|---|---|---|---|---|---|
| | | | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Asarganj | CT | 853 | 448 | 405 | 904 |
| 2 | Jamalpur | M | 13,905 | 7,114 | 6,791 | 955 |
| 3 | Kharagpur | NA | 5,194 | 2,676 | 2,518 | 941 |
| 4 | Munger | M | 30,276 | 15,769 | 14,507 | 920 |
| | **District(Urban) Total** | | **50,228** | **26,007** | **24,221** | **931** |

There is no urban agglomeration in Munger district. The above table 13 shows that there are three statutory towns in Munger district. These are Munger(M), Jamalpur(M) and Kharagpur(NA). The sex ratios in the age group 0-6 of Jamalpur(M) and Kharagpur(NA) are 955 and 941 respectively which are higher than the district average. The sex ratios in the age group 0-6 of Munger(M) and Asarganj(CT) are 920 and 904 respectively which are lower than the district total.

**TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001**

The above table shows that the percentage of Scheduled Castes in Munger district is 13.3% of the total population in the district. Within the district the highest percentage of Scheduled Castes population is in Sangrampur C.D. Block with 20% followed by Dharhara, Kharagpur, Bariapur, Tetia Bombar, Jamalpur, Asarganj and Tarapur C.D. Blocks with 16.5%, 16.2%, 14.7%, 14.3%, 13.7%, 12.9% and 11.9% respectively. The percentage of Scheduled Castes population in Munger district for the urban areas is 9.5 percent which is lower than the rural areas (14.7%). The percentage of Scheduled Tribes in Munger district is only 1.6% of the total population in the district. The percentage of Scheduled Tribes population in Munger district for urban areas is 0.6% which is lower than the rural areas(2%).

| 9 | Sangrampur | 78,518 | 15,687 | 432 | 20.0 | 0.6 |
| | **District (Rural)** | | | | | |
| | **Total:** | **819,950** | **120,611** | **16,237** | **14.7** | **2.0** |

Table no.15 indicates that the percentage of the Scheduled Castes in Munger district is of the order of 14.7% of the total population. The highest percentage of Scheduled Castes population is in Sangrampur C.D. Block with 20% of the total population closely followed by Kharagpur, Dharhara, Bariarpur, Tetia Bombar, Asaragang and Jamalpur C.D. Blocks with 17.1%, 16.5%, 14.7%, 14.3%, 14% and 13.1% respectively. The percentages of Scheduled Castes population in Dharhara, Kharagpur and Sangrampur C.D. Blocks are higher than the district rural average (14.7%). The percentage of the Scheduled Tribes in Munger district is of the order of only 2 percent of the total population. The percentages of Scheduled Tribes population in Dharhara and Kharagpur C.D. Blocks have 4.9 and 6.3 percent respectively, which is higher than the district rural average (2%). The percentage of Scheduled Tribes population in rest of the C.D. Blocks of Munger district is almost negligible.

**TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001**

| Percentage Range of Scheduled Castes population to total population | Number of villages | Percentage | Population | Scheduled Castes Percentage |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Nil | 139 | 26.5 | 0 | 0.0 |
| Less than 5 | 64 | 12.2 | 3,405 | 2.8 |
| 5-10 | 70 | 13.3 | 14,071 | 11.7 |
| 11-20 | 102 | 19.4 | 40,583 | 33.6 |
| 21-30 | 55 | 10.5 | 25,768 | 21.4 |
| 31-40 | 33 | 6.3 | 12,249 | 10.2 |
| 41-50 | 20 | 3.8 | 13,847 | 11.5 |
| 51-75 | 20 | 3.8 | 6,961 | 5.8 |
| 76 and above | 22 | 4.2 | 3,727 | 3.1 |
| **District Total** | **525** | **100.0** | **120,611** | **100.0** |

From the above table, it is apparent that there are 139 villages accounting for 26.5 percent of the inhabited villages in the district where the population of Scheduled Castes is nil. This is closely followed

by villages where the population of the Scheduled Castes ranges between 11 and 20 percent of the total population. These villages account for 19.4 percent of the total in habited villages. There are 70 villages which account for 13.3 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is between 5 and 10. There are 64 villages which constitute 12.2 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is less than 5. 20 villages are such which constitute 3.8 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is between 41-50 and 51-75.

**TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001**

| Percentage Range of Scheduled Tribes population to total population | Number of villages | Percentage | Scheduled Tribes Population | Percentage |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| Nil | 462 | 88.0 | 0 | 0.0 |
| Less than 5 | 18 | 3.4 | 226 | 1.4 |
| 5-10 | 3 | 0.6 | 461 | 2.8 |
| 11-20 | 4 | 0.8 | 1,261 | 7.8 |
| 21-30 | 4 | 0.8 | 4,078 | 25.1 |
| 31-40 | 10 | 1.9 | 2,311 | 14.2 |
| 41-50 | 2 | 0.4 | 1,225 | 7.5 |
| 51-75 | 5 | 1.0 | 1,238 | 7.6 |
| 76 and above | 17 | 3.2 | 5,437 | 33.5 |
| **District Total** | **525** | **100.0** | **16,237** | **100.0** |

As regards the population of the Scheduled Tribes it is apparent from the above table that there are 462 villages accounting for 88.0 percent of the inhabited villages in the district which have no scheduled tribes population. This is followed by the villages where the population of the Scheduled Tribes ranges less than 5 percent of the total population. These 18 villages account for 3.4 percent of the total inhabited villages. There are 17 villages which account for 3.2 percent of the inhabited villages where the percentage of Schedule Tribes population to total population is 76 and above. There are 10 villages which constitute 1.9 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is between 31 and 40.Five villages are such which constitute 1.0 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is between 51 and 75.

**TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TOWNS, 2001**

| Serial number | Name of Town | Total population | Total Scheduled Castes population | Total Scheduled Tribes population | Percentage of Scheduled Castes population to total population | Percentage of Scheduled Tribes population to total population |
|---|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Asarganj (CT) | 5,739 | 174 | 0 | 3.0 | 0 |
| 2 | Jamalpur (M) | 96,983 | 13,810 | 1,416 | 14.2 | 1.5 |
| 3 | Kharagpur (NA) | 27,075 | 3,002 | 34 | 11.1 | 0.1 |
| 4 | Munger (M) | 188,050 | 13,350 | 373 | 7.1 | 0.2 |
| | **District(Urban) Total** | **317,847** | **30,336** | **1,823** | **9.5** | **0.6** |

The above table 18 shows that there is no urban agglomeration in Munger district. There are three statutory towns in the district, these are Munger(M), Jamalpur(M) and Kharagpur(NA). The percentage of Scheduled Castes population for the urban areas is 9.5 percent. The percentages of Scheduled Castes population are 14.2% and 11.1% in Jamalpur(M) and Kharagpur(NA) respectively which are higher than the district average. The percentages of Scheduled Castes population are 7.1% and 3% in Munger(M) and Asarganj(CT) respectively which are lower than the district average. The percentage of Scheduled Tribes population in Munger district is almost negligible i.e. 0.6 percent of Munger district as has been observed in the above table.

**TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001**

| Serial number | Name of C. D. Block | Scheduled Castes sex ratio | Scheduled Tribes sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Munger | 845 | 0 |
| 2 | Bariarpur | 860 | 950 |
| 3 | Jamalpur | 865 | 1,143 |
| 4 | Dharhara | 897 | 953 |
| 5 | Kharagpur | 885 | 940 |
| 6 | Asarganj | 901 | 0 |
| 7 | Tarapur | 882 | 0 |
| 8 | Tetia Bombar | 907 | 904 |
| 9 | Sangrampur | 934 | 937 |
| | **District (Rural) Total** | **887** | **944** |

Table 19 shows that the sex ratio of Scheduled Castes varies from 934 in Sangrampur C.D. Block to 845 in Munger C.D. Block. The sex ratio in Jamalpur C.D. Block is 865 while the sex ratio in Asarganj C.D. Block is 901. The sex ratio figures of Munger, Bariarpur, Jamalpur, Kharagpur and Tarapur C.D. Blocks are lower than the district rural average.

The sex ratio of Scheduled Tribes varies from 1143 in Jamalpur C.D. Block to 904 in Tetia Bombar C.D. Block. The sex ratio figures of Scheduled Tribes in Kharagpur, Tetia Bombar and Sangrampur C.D. Blocks are below the district average. The sex ratio figures of Scheduled Tribes relating to Bariarpur, Jamalpur and Dharhara C.D. Blocks are higher than the district rural average. It is worth while to mention that Scheduled Tribes population in the district is negligible.

**TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN TOWNS, 2001**

| Serial number | Name of Town | Scheduled Castes sex ratio | Scheduled Tribes sex ratio |
|---|---|---|---|
| 1 | 2 | 3 | 4 |
| 1 | Asarganj (CT) | 891 | 0 |
| 2 | Jamalpur (M) | 873 | 964 |
| 3 | Kharagpur (NA) | 908 | 700 |
| 4 | Munger (M) | 891 | 847 |
| **Sex ratio (Urban) for the district:** | | **884** | **933** |

There is no urban agglomeration in Munger district. There are three statutory towns in the Munger district. These are Munger (M), Jamalpur (M) and Kharagpur (NA). The sex ratio figures of Scheduled Castes and Scheduled Tribes in Munger District are 884 and 933 respectively. The sex ratio of Scheduled Castes in Kharagpur(NA) is highest 908 which is higher than district average 884 whereas the sex ratio of Scheduled Tribes in Jamalpur(M) is highest ( 964) which is higher than the district average 933.

Table 21 shows that in the district as a whole, the literacy rate of males is much higher than that of females. The literacy rate of males is as high as 69.9 percent as against 47.4 percent for females, the difference of 22.5 percentage points. The C.D. Block wise literacy rate shows that the Jamalpur block with 62.2 percent literates is at the top while Asarganj block, with 48.3 percent, is at the bottom. The difference of literacy rate between the highest and the lowest literate blocks is 13.9 percentage points. It is also observed, in general, that the C.D. Blocks having urban centers (Jamalpur and Munger) have higher literacy rates than other C.D. Blocks corroborating the fact that urban centers have better infrastructure as far as educational facilities are concerned. In the rest of the C.D. Blocks of the district except Munger,Tarapur & Sangrampur the literacy rates are found to be lower than the district average of 59.5 percent literates.

As regards rural areas of the district, the literacy rate is 52.8 percent with male literacy rate being 64.6 percent and female literacy accounting for 39.3

percent. On the other hand, the literacy rate in the urban areas of the district is to the extent of 76 percent, the male and female literacy rates being 83.1 and 67.8 percent respectively. The overall gap in male and female literacy rates is observed to be maximum in case of Kharagpur Block (over 26.7 percentage points) while Munger. Block has the minimum gap in male and female literacy rates ( 16.8 percentage points).

| | **District (Rural)** | | | | | | | | | | |
| | **Total:** | **350,890** | **229,708** | **121,182** | **469,060** | **207,656** | **261,404** | **52.8** | **64.5** | **39.3** | **25.3** |

The above table deals with the literacy rates in the C.D. Blocks of Munger district (rural population). It is discernable from the figures presented in the table that the literacy rate among rural population in the district is 52.8 percent, the male and female literacy rates being 64.5 and 39.3 percent respectively. Among the C.D. Blocks, the highest literacy rate is observed in Jamalpur block (62.27 %), while the lowest rate has been recorded in Aserganj block (48.2% each). The C.D.Blocks of Bariarpur, Dharhara, Kharagpur, Aserganj and Tetia Bomber have returned literacy rates among its rural population lower than the district rural average of 52.8 percent. The gap in male-female literacy rate is found to be maximum in case of Kharagpur block (over 28 percentage points) while Munger block has the lowest gap in male-female literacy rate (over 20 percentage points).

**TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0 | 7 | 1.3 | 598 | 0.1 |
| 1-10 | 13 | 2.5 | 3,095 | 0.4 |
| 11-20 | 23 | 4.4 | 10,261 | 1.3 |
| 21-30 | 30 | 5.7 | 35,852 | 4.4 |
| 31-40 | 63 | 12.0 | 121,168 | 14.8 |
| 41-50 | 120 | 22.9 | 194,095 | 23.7 |
| 51-60 | 112 | 21.3 | 215,131 | 26.2 |
| 61-70 | 82 | 15.6 | 157,374 | 19.2 |
| 71-80 | 46 | 8.8 | 65,657 | 8.0 |
| 81-90 | 20 | 3.8 | 11,812 | 1.4 |

**TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001 (*Concld.*)**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 91-99 | 7 | 1.3 | 4,899 | 0.6 |
| 100 | 2 | 0.4 | 8 | 0.0 |
| **District Total:** | **525** | **100.0** | **819,950** | **100.0** |
| **Literacy rate for District:** | | **59.5** | | |

The above table shows that in 22.9 percent of the inhabited villages literacy rate ranges between 41 and 50 percent. In these 120 villages 23.7 percent of the district rural population live. This is the largest group of villages in the district. This is closely followed by 112 villages with 26.2 percent of the district rural population are such where literacy rate ranges between 51 and 60 percent. Eighty two villages (15.6) percent of the inhabited villages are such where literacy rate ranges between 61 and 70. These villages account for 19.2 percent of the district rural population. 8.8 percent of the inhabited villages i.e. 46 villages are such where literacy rate ranges between 71 and 80 percent and these villages account for 8.0 percent of the district rural population. 12.0 percent of the inhabited villages i.e. 63 villages are such where literacy rate ranges between 31 and 40 percent. These villages account for 14.8 percent of the district rural population. There are only 7 villages accounting for 1.3 percent of the inhabited villages where literacy rate ranges between 91-99 and zero percent and these villages account for 0.6 and 0.1 percent of the district rural population respectively.

**TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001**

There is no urban agglomeration in Munger district. There are three statutory towns in the district. These are Munger(M), Jamalpur(M) and Kharagpur(NA). The literacy rates for Jamalpur(M) and Asarganj(CT) are 83.1% and 80.9% respectively which are higher than the district average i.e. 76%. The literacy rates for Munger(M) and Kharagpur(NA) are 74.8% and 56.8% respectively which are lower than the district average.

**TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001**

| | **Total:** | **35,456** | **25,016** | **10,440** | **85,155** | **38,915** | **46,240** | **37.0** | **49.0** | **23.4** | **25.6** |

The table above shows that literacy rate among the Scheduled Castes is highest i.e. 60.8 percent in the Jamalpur C.D. Block where as it is lowest i.e. 23.8 percent in the Tetia Bombar C.D. Block in the district. It is observed that the literacy rate among the Scheduled Castes for the district is 37 percent only. As regards percentage of male literacy rate among the Scheduled Castes it is highest i.e. 74.6 percent in Jamalpur C.D. Block where as it is lowest i.e. 34.9 percent in the Tetia Bombar C.D. Block. In case of female literacy rate among the Scheduled Castes also it is highest i.e. 44.6 percent in Jamalpur C.D. Block and the lowest i.e. 11.6 percent in Tetia Bombar C.D. Block. It is found that the gap between male and female literacy rate is highest i.e. 30.0 percent in Jamalpur C.D. Block where as it is lowest i.e. 21.9 percent in Dharhara C.D. Block.

**TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Scheduled Castes Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 0 | 13 | 3.4 | 894 | 0.7 |
| 1-10 | 41 | 10.6 | 9,149 | 7.6 |
| 11-20 | 49 | 12.7 | 13,962 | 11.6 |

| 61-70 | 21 | 5.4 | 10,014 | 8.3 |
| 71-80 | 15 | 3.9 | 3,593 | 3.0 |
| 81-90 | 10 | 2.6 | 1,202 | 1.0 |
| 91-99 | 2 | 0.5 | 33 | 0.0 |
| 100 | 0 | 0.0 | 0 | 0.0 |
| **District Total:** | **386** | **100.0** | **120,611** | **100.0** |
| **Literacy rate for District (Rural):** | | **37.0** | | |

The table above shows that range of literacy rate among the Scheduled Castes in the villages of the district The highest number of villages i.e.74 (19.2) percent fall in the literacy range of 21-30 percent where as the lowest number of villages i.e. 2(0.5%) fall in the 91-99 percent literacy range. It is observed that of the total villages in the district 11.4 percent villages are such which fall in the literacy range of 51-60 percent among the Scheduled Castes in the villages of the district.

There are 59 villages accounting for 15.3 percent of the total villages which fall in the literacy range of 31-40 percent. 15.0 percent of the total villages are such which fall in the literacy range of 41-50 percent. There are only 13 villages (3.4%) which fall in the no literacy range i.e. 0 percent.

**TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001**

| Serial number | Name and urban status of Town | Number of literates and illiterates | | | | | | Percentage of literates | | | Gap in male-female literacy rate |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Number of literates | | | Number of illiterates | | | | | | |
| | | Persons | Males | Females | Persons | Males | Females | Persons | Males | Females | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| 1 | Asarganj (CT) | 88 | 53 | 35 | 86 | 39 | 47 | 62 | 71.6 | 51.5 | 20.2 |
| 2 | Jamalpur (M) | 8,484 | 5,221 | 3,263 | 5,326 | 2,153 | 3,173 | 73.7 | 83.8 | 61.8 | 22.0 |
| 3 | Kharagpur (NA) | 610 | 420 | 190 | 2,392 | 1,153 | 1,239 | 25.9 | 33.2 | 17.5 | 15.7 |
| 4 | Munger (M) | 6,776 | 4,216 | 2,560 | 6,574 | 2,845 | 3,729 | 61.7 | 71.4 | 50.5 | 20.9 |
| | **District (Urban)** | | | | | | | | | | |
| | **Total** | **15,958** | **9,910** | **6,048** | **14,378** | **6,190** | **8,188** | **63.9** | **73.6** | **52.6** | **21.0** |

It transpires from the table no. 27 that the literacy rate among the Scheduled Castes in the urban areas of the district is 63.9 percent, the literacy rate in the case of males being 73.6 percent while that of females it is quite low, being only 52.6 percent. Among the Four towns of the district, Jamalpur(M) has the highest literacy rate, as 73.7 percent of the scheduled castes population are found to be literates. While the male literacy rate is as high as 83.8 percent, the female literacy rate is comparatively much lesser, being only 61.8 percent. The other three towns of the district, viz., Munger(M) Kharagpur(NA) and Asarganj CT have literacy rates lower than the district urban average. The female literacy status in case of Kharagpur town is quite disappointing (17.5%) when compared to literacy rates of females in other three towns. In all the four towns of the district the differential literacy rate between males and females is above 15 percentage points, the highest being in the case of Jamalpur town (over 22 percentage points). It is observed, in general, that males and females both are better educated in urban areas than their counterparts in rural areas. The literacy rates of Scheduled Castes population in urban areas both in case of males and females are found to be comparatively lower than the literacy rates of total population in urban areas of the district (males-83.1%, females- 67.8% as reflected in Table 21).

It can be observed from the table above that the literacy rate of Scheduled Tribes population in the district (rural ) is 31.6 percent, the literacy rate among males being 47.2 percent and the literacy rate of females being only 15.3 percent. The literacy rate is observed to be the highest in Jamalpur C.D. Block (78.6%) while it is found to be the lowest in case of Dharhara C.D block where literacy rate is only 20.5 percent.The highest and the lowest literacy rates among males are also recorded in Jamalpur (100%) and Dharhara (32.4%) blocks. So far female literacy rate is concerned, it transpires from the table that again Jamalpur and Dharhara blocks retain the top and bottom positions with 57.1 and 7.9 percent literate females respectively. The gap in male-female literacy rate is found to be maximum in case of Jamalpur block (difference of over 42 percentage points), while the literacy rate gap is the lowest in Dharhara block(over 24 percentage points only). The gap in male-female literacy rate in Bariarpur,Kharagpur,Tetia Bomber, Sangrampur C.D. Blocks is found to be more than the district rural average of 31.9 percentage points.

**TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001**

| Range of literacy rate for villages | Number of inhabited villages | Percentage distribution of villages | Scheduled Tribes Population | Percentage distribution of population |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |

| 91-99 | 0 | 0.0 | 0 | 0.0 |
| 100 | 9 | 14.3 | 72 | 0.4 |
| **District Total:** | **63** | **100.0** | **16,237** | **100.0** |
| **Literacy rate for District (Rural):** | | **31.6** | | |

The above table shows that there are only 63 villages in the district which contain Scheduled Tribes population. 12 villages comprising 19.0 percent of the inhabited villages in the district have recorded literacy rate of the Scheduled Tribes population ranging between 21-30 percent. This group of villages happens to be the largest group in the district in number and constitutes 20.3 percent of the total rural Sched-

uled Tribes population. This is followed by 11 villages (17.5% of the inhabited villages comprising ST population) where the literacy rate is in the range of 31-40 percent constituting 41.3 percent of the rural Scheduled Tribes population. The third group of villages in numeric order comprises 9 villages (14.3% of the inhabited villages) where the literacy rate is 100 percent constituting only 0.4 percent of the total rural ST population of the district. These three groups of villages constitute 50.7 percent of the inhabited villages in the district containing ST population and constitute slightly over 62 percent of the total rural ST population of the district. Five villages in the district are such where there is no literate ST population. However, these villages taken together comprise only 0.4 percent of the total rural ST population in the district. There are 8 villages (12.7%of the villages) which lie in the literacy rate range of 1-10 percent constituting approximately 12 percent of the rural ST population. There are only 16 villages having literacy rate above 50 percent in the district and the percentage of rural ST population contained in these villages is quite negligible.

**TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001**

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 32 show that the work participation rate (WPR) in the district is 20.9 percent main workers and 10.7 percent as marginal workers. The proportion of non-workers in the district is 68.5 percent.

Among the main workers male work participation rate in the district is 33.3 percent while that of females is only 6.7 percent as per 2001 census. The proportion of main workers is the highest (22.9 percent) in Sangrampur C.D. Block and the lowest (18.8 percent) in Jamalpur C.D. Block. Out of 9 C.D. Blocks, WPR of 5 C.D. Blocks are above the district average. The proportion of marginal workers is the highest (15.1 percent) in Asarganj and the lowest (6.7 percent) in Munger C.D. Block. The proportion of total workers is the highest (36.1 percent) in Asarganj C.D. Block and the lowest (26.2) percent in Jamalpur C.D. Block.

Among the non-workers male work participation rate in the district is 55.4 percent while that of females is 83.4 percent as per 2001 census.Table 31 deals with total number of persons which includes both the rural and urban population whereas table 32 deals with only rural population.

There is no urban agglomeration in Munger district. The urban units in the district are Munger(M.), Jamalpur(M) and Kharagpur(NA) and Asarganj (C.T). The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. The work participation rate for the urban areas of the district is 19.7 percent as main workers and 3.2 percent as marginal workers. The proportion of male and female main workers are 33.4 and 3.8 percent respectively. The proportion of marginal workers among males is 5 percent and that for females is 1.3 percent. The proportion of male and female non-workers are 61.7 and 94.9 percent respectively.For Munger(M.) the work participation rate (WPR) is 19.4 percent of the total population of the town as main workers and 3.1 percent as marginal workers. The proportion of non-workers in the town is 77.5 percent.

From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four-fold classification namely, cultivators, agricultural labourers, household industry workers and other economic activities. The economic activity on the rural areas of the district is primarily dependent on agriculture which is supported by the fact that cultivators (16.2%) and agricultural labourers (41.6%) together constitute 57.8 percent of the total workers of the district. The agriculture sector has absorbed more than half of the total main workers. The proportion of cultivators varies between 28.7 percent for Tetia Bombar C.D. Block to 8.5 percent for Munger C.D. Block. The proportion of agricultural labourers varies between 59.7 percent for Tetia Bombar C.D. Block to 17.6 percent for Jamalpur C.D. Block. The proportion of household industry workers is only 4.5 percent of the total workers of the district. The proportion of household industry workers varies between 7.6 percent for Asarganj C.D. Block to 1.9 percent for Tetia Bambor C.D. Block. The proportion of other workers varies between 69.5 percent for Jamalpur C.D. Block to 9.7 percent for Tetia Bombar C.D. Block.

Note: Percent of Worker to total worker are given in brackets

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of workers (main + marginal) according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (20.0%) and agricultural labourers (51.0%) together constitute 71.0 percent of the total workers of the district. The primary sector i.e., the agricultural sector has absorbed more than 70% of the total workers of the district. Other workers are 24.8 percent of the total workers. By and large, the same situation prevails in various C.D. Blocks of the district. Jamalpur block has recorded the highest proportion of "other workers"(48.5%) presumably on account of having an urban unit contained in this block. This is followed by Munger block ( having headquarters town of Munger), where the proportion of other workers is 41.2 percent to the total workers. Household industry workers constitute very small proportion (4.2%) in the district of Munger. Female household industry workers are more than the male household industry workers (6.7 % as against 3.3%) in the district. This is the analysis of Table No. 35 The same trend is observed in various other C.D. Blocks of the district. Palasi C.D. Block has recorded 10.4 percent female household industry workers which is the highest among the C.D. Blocks in the district.

| | | | | (4.7) | (3.6) | (10.8) | (12.0) | (73.6) |
| | **District (Urban)** | | | | | | | |
| | **Total:** | **Persons** | **317,847** | **72,778** | **1,992** | **5,818** | **4,169** | **60,799** |
| | | | | **(22.9)** | **(2.7)** | **(8.0)** | **(5.7)** | **(83.5)** |
| | | **Males** | **170,366** | **65,282** | **1,716** | **4,896** | **3,016** | **55,654** |
| | | | | **(38.3)** | **(2.6)** | **(7.5)** | **(4.6)** | **(85.3)** |
| | | **Females** | **147,481** | **7,496** | **276** | **922** | **1,153** | **5,145** |
| | | | | **(5.1)** | **(3.7)** | **(12.3)** | **(15.4)** | **(68.6)** |

**Note :-** Percentage of workers to total workers are given in brackets

From the above table it is observed that cultivators constitute 2.7 percent of the total urban workers in Munger district. The proportion of male and female cultivators in Munger district are 2.6 and 3.7 percent respectively. The proportion of agricultural labourers for Munger district is 8.0 percent of the total urban population. The proportion of male and female agricultural labourers are 7.5 and 12.3 percent respectively. The proportion of household industry workers is 5.7 percent of the total urban workers. The proportion of male and female household industry workers are 4.6 and 15.4 percent respectively. The proportion of other workers is 83.5 percent of the total urban workers. The proportion of other workers among males is 85.3 percent and that for females is 68.6 percent.

From the above table it is obvious that the maximum proportion of Cultivators is in Kharagpur(NA) with 7.5%, whereas it is lowest (1.5%) in Asarganj (CT). As for agricultural labourers Kharagpur(NA) has maximum proportion with 24.1% while Jamalpur(M) has the lowest proportion i.e. 3.1%.

**Note :** Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table gives the distribution of villages according to the availability of different amenities in the district.

**Educational facility** :– There are as many as 400 inhabited villages accounting for 76.2 percent of the total inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D. Block Kharagpur with 89.2 percent while Munger C.D. Block has the lowest proportion of villages with 57.7 percent.

**Medical facility** :– The availability of medical amenity in the villages is low and only 28.4 percent villages have got it. Among the C.D. Blocks, Munger has the largest proportion of villages with medical facility, the percentage being 46.2 percent. Asarganj C.D. Block, on the other hand, has the smallest proportion of villages (13.6%) where medical amenity is available.

**Improved drinking water** :– There are as many as 514 villages accounting for 97.9 percent of the

inhabited villages in the district where improved drinking water facility is available. Among C.D. Blocks, Munger, Asarganj, Tetia Bombar and Sangrampur C.D. Blocks have those where 100%( 19.0%) improved drinking water facility is available. Tarapur C.D. Block, on the other hand, has the lowest proportion of villages (94.6%) where improved drinking water facility is available.

**Post office** :– Postal facilities are available in 100 (19.0%) villages out of 525 inhabited villages in the district. Munger C.D. Block has the maximum number of villages (26.9%) having postal facility.Tetia Bombar C.D. Block the minimum number of villages (9.8%) having postal facility.

**Telephone** :– The availability of telephone facility in the villages is low and only 25 percent have got it. Among the C.D. Blocks, Munger C.D. Block has the maximum Proportion of villages (53.8%) having telephone facility while Kharagpur C.D. Block has the minimum Proportion of villages (10.8%) having telephone facility .

**Transport Communication** :– Transport Communication facilities are available in 106 villages out of 525 inhabited villages (20.8%) in the district. Jamalpur C.D. Block has the highest proportion of villages (52.3%) which are connected by bus, rail or navigable river/canal services. Asarganj C.D. Block has the minimum Proportion of villages (9.1% ) having transport communication.

**Bank** :– Banking facility is available only in 39 villages (7.4%) out of 525 inhabited villages in the district. Among C.D. Blocks, Sangrampur C.D. Block has the maximum Proportion of villages (10.8%)having banking facility whereas Kharagpur C.D. Block has minimum proportion of villages (4.3%)having banking facility .

**Agricultural credit societies** :– Agricultural credit societies are available only in 52 villages (9.9%)out of 525 inhabited villages in the district. Among C.D. Blocks, Munger C.D. Block has the maximum number of villages i.e 26 having agricultural credit societies while the villages of Asarganj and Tetia Bombar C.D. Blocks still do not have agricultural credit societies.

**Approach by pucca road** :– This facility is available in 337 villages (64.2%) out of 525 inhabited villages in the district. Asarganj C.D. Block has the maximum proportion of villages (90.9%) having pucca road approach while Kharagpur C.D. Block has the minimum proportion of villages (35.5%) having pucca road approach.

**Power Supply** :– Electrified villages in the district constitute 61.1 percent of the total number of inhabited villages. Among the C.D. Blocks, Asarganj C.D. Block has the maximum porportion of electrified villages with 86.4 percent.whereas Tetia Bombar C.D. Block has the minimum proportion of villages(19.6%) having power supply.

**TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001**

**Note** : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from the table No.- 38 that educational facility is available to 92.3 percent of the rural population of the district. The proportion varies between the maximum of 96.6 percent in Tarapur and Tetia Bombar CD blocks and the minimum of 81.5 percent in Munger CD block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 76.2 percent vide table 37) than the proportion of population which is as high as 92.3 percent. This may be attributed to fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by this amenity is of the order of 55.4 percent which is more than the proportion of villages served by medical facility in the district.

But in the case of improved drinking water facility it may be observed that proportion of rural population served by the amenity is of the order of 95.4 percent which is less than the proportion of villages served by this facility in the district.

In the case of post office it may be seen that the proportion of rural population served by the amenity is of the order of 41.1 percent which is more than the proportion of villages served by this amenity in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

**TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001**

| Village not having the amenity of | Distance range of place from the villages where the amenity is available | | | |
|---|---|---|---|---|
| | Less than 5 kilometres | 5-10 kilometres | 10+ kilometres | Total (Col. 2-4) |
| 1 | 2 | 3 | 4 | 5 |
| 1. Education :- | | | | |
| (a) Primary School | 139 | 4 | 0 | 143 |
| (b) Middle School | 355 | 41 | 2 | 398 |
| (c) Degree College | 125 | 165 | 228 | 518 |
| 2. Medical:- | | | | |
| (a) Hospital | 191 | 197 | 117 | 505 |
| (b) PHC | 195 | 165 | 147 | 507 |
| 3. Post Office | 391 | 30 | 8 | 429 |
| 4. Telephone | 191 | 95 | 108 | 394 |
| 5. Bus Service | 271 | 123 | 37 | 431 |
| 6. Banks | | | | |
| (a) Commercial Bank | 330 | 100 | 57 | 487 |
| (b) Co-operative Bank | 140 | 185 | 193 | 518 |
| 7. Agricultural Credit Societies | 149 | 147 | 177 | 473 |

As regards educational facility it would be seen from the above that there are 143 inhabited villages (27.2%)in thedistrict which do not have any primary schools. Out of 143 villages, 139 villages have this facility at places situated within 5 kms and 4 villages have this facility at a distance range of 5-10 kms.

There are as many as 398 (75.8%) villages in the district which do not have middle schools. Out of 398 villages, 355 villages have this facility at places situated within 5 kms, 41 villages have this facility at a distance range of 5-10 kms and only 2 villages at places beyond 10 kms. There are 518 villages (98.7%) in the district which are deprived of colleges. Out of 518 villages, 125 villages enjoy this facility at places situated within 5 kms, 165 villages enjoy this facility at a distance range of 5-10 kms and as many as 228 villages enjoying this facility at places beyond 10 kms.

# Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the no.- 40 table that the maximum number of inhabited villages (i.e 50.8%) lie in the distance range of 5-15 kms. from the nearest statutory town. This is followed by 187 villages in the distance range of 16-50 kms. from the nearest statutory town. There are 25 villages accounting for 4.8 percent of the total inhabited villages which lie in the distance range of more than 50 kms.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 76.1 percent for those situated in the distance range of less than 5 km from the nearest statutory town which marginally increases to 76.4 percent in the next higher distance range of 5-15 kms. from the nearest statutory town. Thereafter it decreases to 74.3 percent in the distance range of 16-50 kms from the nearest statutory town and it again increases to 88 percent in the distance range of 51+ kms.

In the case of other amenities also more or less the same trend can be observed from the above table.

**TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001**

# Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The above table shows that the maximum number of villages, i.e., 152 (29.0%) in the district fall in the population range of 1-499, followed by 141 villages (26.9 %) and 114 villages(21.7%) in the population range of 1000-1999 and 500-999 respectively. The proportion of villages lying in the population range of 10,000 and above is quite low which shows that very large sized villages are less in number in the district of Munger.It further transpires from the table that larger proportion of villages having various types of amenities and facilities, by and large, lie in the population range of 5000-9999, 2000-4999 and 1000-1999.In case of villages having facilities like post and telegraph, telephone, and Power supply, the proportion of villages lying in the population range of 5000-9999 is also quite high.

**TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001**

| Serial number | Name of C. D. Block | Number of inhabited villages | Total area | Percentage of cultivable area to total area | Percentage of irrigated area to total cultivable area |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Munger | 52 | 17,758 | 21.8 | 53.1 |
| 2 | Bariarpur | 28 | 15,396 | 71.8 | 18.0 |
| 3 | Jamalpur | 44 | 5,518 | 81.1 | 23.2 |
| 4 | Dharhara | 92 | 8,690 | 49.5 | 0 |
| 5 | Kharagpur | 93 | 27,922 | 43.9 | 47.7 |
| 6 | Asarganj | 44 | 5,437 | 85.3 | 72.2 |
| 7 | Tarapur | 56 | 6,476 | 84.9 | 89.7 |
| 8 | Tetia Bombar | 51 | 9,782 | 79.1 | 69.6 |
| 9 | Sangrampur | 65 | 8,295 | 78.9 | 73.1 |
| | **District Total:** | **525** | **105,274** | **57.4** | **48.7** |

**Note :** Cultivable area = irrigated area + unirrigated area

The table no.42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various development blocks.

It would be seen from the table that 57.4 percent of the total area of the district is utilised for cultivation (cultivable area) of this only 48.7 percent area is bound to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Asarganj C.D. Block with 85.3 percent closely followed by Tarapur and Jamalpur C.D. Blocks with 84.9 and 81.1 percent respectively. The lowest percentage of cultivable area is found in Munger C.D. Block with 21.8 percent.

**TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS**

| | | Per capita receipt | | | Per capita expenditure | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| Serial number | Class,name &urban status of the town | Total | Through taxes | From all other sources | Total | General administration | Public health and conveniences | Public works | Public institutions | Other(s) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 |
| 1 | II Jamalpur (M) | 7.1 | 2.4 | 4.7 | 7.0 | 2.1 | 0 | 1.4 | 0.0 | 3.5 |
| 2 | III Kharagpur (NA) | 7.0 | 2.2 | 4.8 | 19.8 | 14.0 | 0 | 5.5 | 0.0 | 0.2 |
| 3 | I Munger (M) | 6.7 | 2.7 | 4.0 | 10.1 | 9.0 | 0.9 | 0.1 | 0.0 | 0.1 |
| | **District Total** | **6.8** | **2.6** | **4.3** | **10.0** | **7.3** | **0.6** | **1.0** | **0.0** | **1.2** |

The above table gives the details of finances in the statutory town in terms of per capita receipt and expenditure. There are three statutory towns in the district and these are Jamalpur (M.), Kharagpur (NA) and Munger (M.). On going into the details of receipt under different heads it can be seen that the per capita total receipt is slightly higher than the per capita total expenditure in case of Jamalpur (M) whereas per capita total receipt is much less than the per capita total expenditure in case of Kharagpur (NA) and Munger(M). The per capita expenditure on general administration is higher than the per capita expenditure on public works in case of Jamalpur (M.), Kharagpur (NA) and Munger (M).

**TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001**

| Serial number | Name and urban status of Town | Type of educational institution | | | | |
|---|---|---|---|---|---|---|
| | | Primary | Junior Secondary / Middle | Secondary / Matriculation | Senior Secondary | College |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| 1 | Jamalpur (M) | 0.4 | 0.2 | 0.9 | 0.6 | 0.4 |
| 2 | Kharagpur (NA) | 3.7 | 1.5 | 0.7 | 1.5 | 1.5 |
| 3 | Munger (M) | 3.7 | 2.1 | 0.8 | 0.2 | 0.2 |
| | **District Total** | **2.7** | **1.4** | **0.8** | **0.4** | **0.4** |

The table no. 44 gives the details of different categories of educational institutions per ten thousand population in the towns of Munger district.

It would be seen from the table that institutions like Secondary/Matriculation level school and college are situated in Jamalpur (M.) accounting for an average of 0.9 and 0.4 institution per ten thousand population respectively. In Kharagpur (NA) the Secondary/Matriculation level school and college are accounting for an average of 0.7 and 1.5 institution per ten thousand population respectively and in Munger (M) the Secondary/Matriculation level school and college are accounting for an average of 0.8 and 0.2 institution per ten thousand population respectively. Primary school and middle school account for an average of 0.4 and 0.2 school per ten thousand population respectively in Jamalpur (M) whereas in Kharagpur (NA) and Munger (M) the primary school and middle school account for an average of 3.7, 1.5 and 3.7, 2.1 school per ten thousand population respectively. In Jamalpur (M.), Kharagpur (NA) and Munger (M.) the Senior Secondary School accounts for an average of 0.6, 1.5 and 0.2 institution per ten thousand population respectively.

**TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001**

| Serial number | Name and urban status of the Town | Number of beds in medical institutions per 10,000 population |
|---|---|---|
| 1 | 2 | 3 |
| 1 | Asarganj(CT) | 9 |
| 2 | Jamalpur(M) | 27 |
| 3 | Kharagpur(NA) | 4 |
| 4 | Munger(M) | 14 |
| | **Distrct Total** | **17** |

The above table furnishes information regarding availability of beds in medical institutions in the towns of Munger district. The number of beds in medical institutions per ten thousand population for Jamalpur (M) is 27 which is highest followed by Munger (M) with 14. The least number of beds in medical institutions per ten thousand population is only 4 in Kharagpur (NA).

**TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001**

Slum Data is not available

**TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001**

| Serial number | Name and urban status of Town | Most important commodity | |
|---|---|---|---|
| | | Manufactured | Exported |
| 1 | 2 | 3 | 4 |
| 1 | Asarganj (CT) | Rice,Flattened Rice | Rice Wheat Maize |
| 2 | Jamalpur (M) | Crane, Locomotives | Stone Chips Nut-Volts Locomotives |
| 3 | Kharagpur (NA) | Rice, Mustard Oil Kendu Leafs | Rice, Wood, |
| 4 | Munger (M) | Cigarette, Gun, Stone Chips | Cigarette Gum, Stone Chips |

The above table presents the most important commodities manufactured in the towns and exported out of four towns of Munger district.It would be seen from the table that rice and flattened rice are manufactured in Assarganj (CT) and commodities like rice,wheat,maize are exported from Asarganj(CT) whereas in Munger (M) Commodities like Cigarette,Gun and stone chips are manufactured and exported also.

## (c) Brief analysis of the data on houses and household amenities ( Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

**TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001**

**Data source:** Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It would be clear from the table that there are as many as 188792 households accounting for 93.2 percent of the total households of the district who are dwelling in owned houses. The proportion of households dwelling in single room is the highest (50.5%) whereas it is lowest (1.2%) dwelling in no exclusive room. The median number of rooms is 1 for the total households in the tenure status of owned category. There are 29740 scheduled castes households accounting for 15.8 percent of the total households who are dwelling in owned houses. The median number of rooms is 1. There are 4126 scheduled tribes households accounting for only 2.2 percent of the total households dwelling in owned houses. The median number of rooms is 1. There are 10876 households accounting for 5.4 percent of the total households of the district dwelling in rented houses. The proportion of households dwelling in single room is the highest (42.6%) whereas it is lowest (0.9%) dwelling in no exclusive room. The median number of rooms is 2.

There are 1240 scheduled castes households accounting for 11.4 percent of the total households who are dwelling in rented houses. The median number of rooms is 1. There are 376 scheduled tribes households accounting for 3.5 percent of the total households dwelling in rented houses. The median number of rooms is 2.

Similar trend can be observed in respect of households dwelling in the tenure status of others.

**TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001**

| Serial number | District/ C.D.Block | Total | | | Rural | | | Urban | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Permanent | Semi-permanent | Temporary | Permanent | Semi-permanent | Temporary | Permanent | Semi-permanent | Temporary |

| 9 | Sangrampur | 44.0 | 19.2 | 36.8 | 44.0 | 19.2 | 36.8 | 0.0 | 0.0 | 0.0 |
| | **District Total:** | **50.5** | **26.0** | **23.5** | **41.8** | **28.0** | **30.1** | **75.3** | **20.2** | **4.5** |

**Data source :** Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

**Note :** 1. Permanent : Permanent houses refers to those houses whose wall & roof are made of pucca materials i.e. where burnt bricks, G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roof made of Kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the above table that of the total rural households the maximum proportion of households i.e. 41.8 percent live in permanent houses followed by 30.1 percent living in temporary houses and 28.0 percent living in semi-permanent houses.

In the case of urban households in the district, however, the maximum proportion of households i.e. 75.3 percent live in permanent houses followed by 20.2 percent in semi permanent houses and 4.5 percent in temporary houses.

Among the C.D. Blocks, Jamalpur C.D. Block has the maximum proportion (62.1%) of rural households living in permanent houses followed by Tarapur C.D. Block (46.2%) and Bariarpur C.D. Block with 45.6%.Tetia Bombar C.D. Block has the minimum proportion of households living in permanent houses with 33.2 percent.

In the case of temporary houses, Tetia Bombar C.D. Block has the maximum proportion (40.8%) of rural households living in temporary houses followed by Asarganj (39.8%). Jamalpur C.D. Block has the minimum proportion of rural households living in temporary houses with 9.7 percent.

In the case of semi permanent houses, Dharhara C.D. Block has the highest proportion of households (48.2%) followed by Kharagpur C.D. Block with 33.0 percent. Munger C.D. Block has the lowest proportion of households living in semi permanent houses with 17.2 percent.

**Data source :** Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

**Note :** Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

The above table shows that of the total rural households 57535 households i.e. 38.3 percent have access to improved drinking water facility in the district. The position is slightly better in the urban areas with 69.8 percent households availing of this facility. Among the C.D. Blocks, the highest proportion of households with improved drinking water facility can be observed in Munger C.D block with 71.1 percent whereas it is the lowest in case of Kharagpur block with 25.3 percent.

As regards electricity facility available to households it is found that only 23.7 percent of the households in the district have electricity. The people living in the urban areas are more privileged as 59.6 percent of the urban households have the facility of electricity as against only 11.1 percent of rural households enjoying this facility. Jamalpur block tops the list as 47.6 percent of the households in this block have electricity facility followed by Munger block with 42.9 percent. This may presumably be due to the fact that these two blocks contain urban units also. In the rest of the C.D. Blocks the proportion of households enjoying electricity facility is less than 12.3 percent except Tarapur block where 17.6 percent have this facility.

It is also interesting to note that only 15.3 percent

of the total households in the district have bathroom facility. In the urban areas, the proportion of households which have the privilege of having bathroom facility is quite high with 35.7 percent while only 8.3 percent of the rural households have bathroom facility. Among the C.D. Blocks again Jamalpur and Munger are much ahead of the other C.D. Blocks with probably the same reason as stated for electricity facility.

Households having toilet facility are found to be higher in number as compared to bathroom and electricity facility as 32.9 percent of the households in the district enjoy toilet facility. The relative position is, by and large, the same as found in the case of bathroom and electricity facilities as Munger and Jamalpur C.D. Blocks are again much better placed as compared to other C.D. Blocks. The position with regard to toilet facility in other C.D. Blocks are not so disappointing as observed for electricity and bathroom facilities.

More than 115 percent of the total households in the district have drainage facility. While 77.4 percent of the urban hoseholds have got the facility of drainage and, only 34.4 percent of the rural households have this privilege. Among the C.D Blocks, once again Jamalpur, Munger C.D.Blocks are much ahead of the other C.D.Blocks.

Percentage in brackets

**Data source:** Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It would be seen from the above table that 44.2 percent of the rural households in the district use firewood as fuel for the purpose of cooking while 29.5 percent of the urban households are using firewood for cooking. The highest proportion of households using firewood as fuel for cooking is seen in Dharhara C.D. Block (68.2%) where as it is the lowest in Asarganj C.D. Block with 13.8 percent.

There are 19.0 percent of the rural households of the district use crop residue as fuel for cooking .Among the C.D.Blocks,the proportion of rural households is the highest (24.0%) in Bariarpur C.D.Block and the lowest (8.7 %) in jamalpur C.D.Block .

Cowdung cake is also an important type of fuel used for cooking in households of various blocks of the district as quite a good proportion of households use it. More than 60 percent of the households in Asarganj block use cowdung cake for cooking, followed by Tarapur with 45.2 percent. However in

the C.D. Blocks of Munger, Jamalpur and Dharhara less than 20 percent of households use cowdung cake for the purpose of cooking.In the C.D. Block of Munger, where the headquarters town is also located, the proportion of households using cowdung cake is relatively low, being only 17.4 percent.

Electricity, and bio-gas are the types of fuel which appear to be very uncommon as the proportion of households using these fuels for cooking purpose is found to be almost negligible in various C.D. Blocks of the district.

As regards cooking gas (L.P.G.), there are only 16,375 households accounting for 8.1 percent of the total households in the district using it for cooking. However, the proportion of urban households using cooking gas is relatively quite high as 26.4 percent of urban households use it for cooking. Except in case of Munger and Jamalpur blocks (where urban units exist) the proportion of households using cooking gas as fuel is almost negligible in various C.D. Blocks of the district. Even in Jamalpur and Munger blocks percentage of households using L.P.G. for cooking purpose are 20.6 and 16.6 respectively.

Kerosene and all "other" types of fuel are not commonly used for cooking purpose as the proportion of households using these for cooking purpose is almost insignificant in the district. There are 390 households constituting 0.2 percent of the total households in the district where no cooking takes place.

**Data source:** Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in the above table gives details regarding availability of household assets to rural and urban households in the district of Munger and its C.D. Blocks.

It would be seen from the table that there are 66035 households accounting for 32.6 percent of the total households in the district availing banking services. While 25.2 percent of the rural households avail banking facility in the district, the proportion of households in the urban areas availing banking services is to the extent 53.7 percent. Among the C.D. Blocks the highest proportion of households availing of banking facility is observed in Jamalpur C.D. Block (47.4 %) where as, on the other hand, the lowest proportion of households enjoying this service is observed in case of Tetia Bombar C.D. Block 18.1 percent.

There are 52212 households accounting for 25.8 percent of the total households in the district possessing radio / transistor. It is noteworthy that in all the 9 C.D. Blocks the proportion of households having radio/ transistor is above 20 percent, the highest being in Jamalpur block with 30.0 percent.

Only 38523 households accounting for 19.0 percent of the total households in the district possess televisions. Among the C.D. Blocks, the highest proportion of households possessing televisions is observed in Jamalpur C.D. Block (37.8%) while it is the lowest in Tetia Bombar C.D. Block (3.0%).

The proportion of households enjoying telephone households, the proportion of urban households having telephone facility is to the extent of 9.0 percent. So far availability of telephone facility in C.D. Blocks is concerned, it can be seen that only Jamalpur and Munger C.D. Blocks, which contains urban units within them, have telephone service facility to more than 5.0 percent of the total households (6.8% & 5.1 % respectively) which is higher than above the district average. In other C.D. Blocks the position is quite discouraging as the proportion of households possessing telephone facility is less than even 2 percent, the lowest being in case of Tetia Bombar block (0.4%).

Bicycle appears to be the most common mode of conveyance in the district and its C. D. Blocks as 32.5 percent of the total households in the district possess bicycles. The proportion of households having bicycles is relatively lower in rural areas with 26.3 percent as against 50.5 percent among the urban households in the district. In the various C.D. Blocks of the district quite a good number of households are possessing bicycles for their day to day use.

The number of households having scooter / motorcycle /moped in the district constitute 4.2 percent of the total households. The proportion of rural households having these modes of conveyances is only 2.5 percent while 9.1 percent of the urban households have scooter / motorcycle / moped in their possession. The position in this regard is not very

different in various C.D. Blocks of the district.Possession of car, jeep, van is very uncommon in the district as only 0.8 percent of the total households have the privilege of having these modes of conveyances. Urban households having these modes of conveyance is slightly more with 1.5 percent as against 0.6 percent in case of rural households.

There are as many as 111061 households accounting for 54.8 percent of the total households in the district where none of these specified assets is available in the district. While 62.6 percent of the rural households are deprived of these household assets, the proportion of households having none of these specified assets is to the extent of only 32.5 percent in the urban areas of the district. The same trend is, more or less, observed in various C.D. Blocks.

**(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade**

Major social and cultural events, which normally take place in the district, have already been described earlier. The district holds a number of fares and *melas* at different places,

Old Munger district has been divided into four district, namely, Munger, Lakhisarai, Sheikhpura and Jamui.

**(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district**

**Deoghara**

It is a village in Sangrampur block, named after the Deoghara hill situated off the Sangrampur-Ganga road. There is a small masonry temple of Lord Shiva at the summit of the hill which is approachable with some difficulty. Another temple built of stone and bricks, is located at a lower height. A large fair, lasting three days, is held here annually on the occasion of *Shivaratri*.

**Kali Pahar**

It is a small hill located in Ashikpur village situated just south of Jamalpur town. It is a favorite picnic spot. A fair is held on the occasion of *Shivaratri*.

**Kharagsahi**

The village, which is situated about 6 kms. North-west of Ratanpur railway station, is noted for its hot-water spring known Kund, which attracts tourists even from out side the state. A triennial fair is held in the village on the occasion of *Malemas.*

**Rampur**

It is village is Sangrampur block lying on the route followed by pilgrims collecting Ganges water at Sultanganj and proceeding to Baidyanathdham (Deoghar) on foot. There is a very commodious *Dharamshala* at this place which is very convenient for such pilgrims.

**Sangrampur**

The village is the headquarters of the block bearing the same name. It derives its name from a battle (*Sangram*) waged between the insurgent Santals and the British troops towards the middle of the nineteenth century. Sultanganj is the nearest railway station.

**Sitakund**

It is a hot spring situated about 8 kms. east of Munger town. According to the local legend, Sita, the consort of Lord Ramchandra, underwent her ordeal of standing on fire at this place; and after she took bath in the spring, its cold water became very hot. A large fair is held here on the *Maghi Purnima* day when religious minded persons come and bath in the spring.

**Sringirikh**

It is a hill in the Kharagpur range, about 30 kms. south-west of Munger. It is said to have been the abode of the great sage, Sringi, who performed the *Putrayesthi Yajna* for Kind Dashrath. There is a temple of Lord Mahadeo to which people flock on the *Shivaratri* day.

**Tarapur**

The village, which is the headquarters of the block bearing the same name, is situated about 19 kms. from Sultanganj railway station. Its temple of Lord Mahadeo is known as *Ulta Mahadeo,* since instead

of the Shiva temple in the west, facing Parvati temple in the east, the two temples here are located in exactly opposite directions. The temples are, however now almost in ruins.

**Bhimbandh**

The place is surrounded by ranges of the Kharagpur hills and dense forests lying in the sothern part of the Munger district. As the local legend had it, a massive dam was being built by Bhim while the Pandavas were under exile and living incognito in the forests. He was intending to create a reservoir for the benefit of the jungle tribals, but for some unknown reason the construction was left incomplete. The only physical evidence lending credence to this story is a tall column of massive rock that has the appearance of a natural dam blocking the flow of a hill-stream known as the 'Man' river. At the base of this rock column is a pool of water which has come to be known as Bhimkund. This site lies at the foot of a hill known as 'Mahadev Hill' and around this site lie a number of hot springs of scalding water issuing out of the base of the hill. The area lies deep inside the forest with enchanting natural scenery. It has a crisscross of hot and cold streams intermingling at various points and finally combining, to form the river 'Man' which flows north-east towards Kharagpur and finally joins the river Ganga a few kilometers west of Sultanganj.

**Kharagpur**

Kharagpur town has a Notified Area Committee and is the headquarters of the block bearing the same name. It is situated on the Munger-Jamui road, about 37 kms. from Munger and 19 kms. from Bariarpur which is the nearest rail head. It used to be the seat of the Rajas of Kharagpur.

Kharagpur lake, situated 3 kms. west of Kharagpur town, is famous for its scenic beauty. It has a large reservoir formed by a dam which is built across the river 'Man'. It also provides irrigation to a vast area of land.

**Munger**

Munger is the most important town and headquarters of the district. It is an old Municipality and has got a long history. There are several ancient monuments in it including the Karna-Chaura. There is another famous shrine of goddess Chandi or Kali in the twon itself which is popularly known a Chandisthan. The fort area, the remnants of which contained once upon a time the palaces of Nawab Mir Kasim, now has the administrative buildings and some residential houses.

Another famous temple of Lord Vishnu lies at Kastaharnighat where there is a cluster of six temples. The place is very attractive, situated at a point in the fort where the Ganga actually becomes Uttaravahini, and that has probably made it more holy for devotees. It is said that Lord Rama had rested here with his consort Sita after crossing the stream and thus the place has become specially sacred for the devotees.

The cigarette factory located in Munger town is one of the largest in the country.

**(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district**

**Material/data is not available**

**(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data**

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible

are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

**Column-1**

Serial number of the village is indicated in this column.

**Column-2**

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

**Column-3**

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

**Columns - 4 & 5**

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

**Columns 6 to 9**

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities

have been explained separately in the subsequent section.

**Column-10**

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

**Column-11**

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

**Column-12**

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

**Column-13**

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

**Column-14**

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

**Column-15**

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

**Column-16**

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

**Column-17**

Gives the information as to whether newspapers/ magazines are received in the village.

**Column-18**

Gives the information of most important commodities manufactured in the village.

**Columns-19 to 23**

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

**Column 20 and 21**

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

**Column 22**

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with

shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

**Column-23**

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

**Column-2 & 1**

Indicate the name of the village in Hindi and serial number of village respectively.

**Town Directory :**

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

**Statement-I Status and Growth History**

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

**Statement-II Physical Aspects and Location of Towns**

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

**Statement-III Municipal Finance**

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

**Statement IV Civic and Other Amenities**

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

**Statement-V Medical, Educational, Recreational and Cultural Facilities**

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number

of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

**Statement-VI Trade, Commerce, Industry and Banking**

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

**Statement-VII Civic and other amenities in Slums**

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

# Part-A : Village and Town Directory

# Section-I : Village Directory

**Note explaining the abbreviations used in the Village Directory**

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

**Column 1 : Serial Number**

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

**Column 2 : Name and Location Code Number of Village**

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

**Column 3 : Area of the village**

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

**Column 4 : Total population**

The total population of the village as per 2001 Census is given against this column.

**Column 5 : Number of households**

The number of households as per 2001 Census is given in this column.

**Amenities :**

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

**Column 6 : Educational**

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High

secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

| | | |
|---|---|---|
| (i) | Primary School | P |
| (ii) | Middle School | M |
| (iii) | Secondary School | S |
| (iv) | Senior Secondary School | PUC |
| (v) | College | C |
| (vi) | Industrial School | I |
| (vii) | Training School | Tr |
| (viii) | Adult literacy class/centre | AC |
| (ix) | Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc. | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

**Column 7 : Medical**

Availability of medical facility within the village is indicated by following codes :

| | | |
|---|---|---|
| (i) | Allopathic Hospital | H |
| | Ayurvedic Hospital | HA |
| | Unani Hospital | HU |
| | Homeopathic Hospital | H Hom |
| (ii) | Allopathic Dispensary | D |
| | Ayurvedic Dispensary | DA |
| | Unani Dispensary | DU |
| | Homeopathic Dispensary | D Hom |
| (iii) | Maternity & Child Welfare | MCW |
| (iv) | Maternity Home | MH |
| (v) | Child Welfare Centre | CWC |
| (vi) | Health Centre | HC |
| (vii) | Primary Health Centre | PHC |
| (viii) | Primary Health Sub-Centre | PHS |
| (ix) | Family Welfare Centre | FWC |
| (x) | T.B. Clinic | TB |
| (xi) | Nursing Home | NH |
| (xii) | Registered Private Medical Practitioner | RMP |
| (xiii) | Subsidised Medical Practitioner | SMP |
| (xiv) | Community Health Worker | CHW |
| (xv) | Others | O |

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

**Column 8 : Drinking Water**

The type of the drinking water supply sources available within the village are indicated by codes as follows :

| | | |
|---|---|---|
| (i) | Tap Water | T |
| (ii) | Well Water | W |
| (iii) | Tank Water | TK |
| (iv) | Tubewell Water | TW |
| (v) | Handpump | HP |
| (vi) | River Water | R |
| (vii) | Canal | C |
| (viii) | Lake | L |
| (ix) | Spring | S |
| (x) | Others | O |
| (xi) | Summer Source | SS |

**Column 9 : Post, Telegraph and Telephone**

It is indicated by codes as shown below whether within the village exists the following amenities :

| | | |
|---|---|---|
| (i) | Post Office | PO |
| (ii) | Telegraph Office | TO |
| (iii) | Post & Telegraph Office | PTO |
| (iv) | Telephone Connection | PH |

**Column 10 : Commercial and Co-operative Banks**

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the

number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

| | | |
|---|---|---|
| (i) | Commercial Bank | CM |
| (ii) | Co-operative Bank | CP |

**Column 11 : Credit Societies**

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

| | | |
|---|---|---|
| (i) | Agricultural Credit Society | ACS |
| (ii) | Non- Agricultural Credit Society | NCS |
| (iii) | Other Credit Society | OCS |

**Column 12 : Recreational and cultural facilities**

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

| | | |
|---|---|---|
| (i) | Cinema/Video Hall | CV |
| (ii) | Sports Club | SP |
| (iii) | Stadium/Auditorium | ST |

**Column 13: Communications**

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

| | | |
|---|---|---|
| (i) | Bus | BS |
| (ii) | Railway Station | RS |
| (iii) | Navigable Waterway | NW |

**Column 14 : Approach to village**

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

| | | |
|---|---|---|
| (i) | Paved Road | PR |
| (ii) | Mud road | MR |
| (iii) | Foot path | FP |
| (iv) | Navigable River | NR |
| (v) | Navigable Canal | NC |
| (vi) | Navigable waterways other than River, Canal | NW |

**Column 15 : Nearest Town and distance**

The distance is given in kilometers in brackets against the name of the town nearest to the village.

**Column 16 : Power supply**

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

| | | |
|---|---|---|
| (i) | Electricity for domestic use | ED |
| (ii) | Electricity for agricultural use | EAG |
| (iii) | Electricity for other purposes | EO |
| (iv) | Electricity for all purposes | EA |

**Column 17 : News Paper / Magazine**

If village receives any News Paper/Magazines the same is noted in this column using following codes :

| | | |
|---|---|---|
| (i) | News Paper | N |
| (ii) | Magazine | M |

**Column 18 : Most important commodities manufactured**

The name of three most important commodities manufactured in the village is recorded against this column.

**Columns 19 to 23 : Land use i.e. area under different types of land use**

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

| | | |
|---|---|---|
| (i) | Government Canal | GC |
| (ii) | Private Canal | PC |

| | | |
|---|---|---|
| (iii) | Well (without electricity) | W |
| (iv) | Well (with electricity) | WE |
| (v) | Tubewell (without electricity) | TW |
| (vi) | Tubewell (with electricity) | TWE |
| (vii) | Tank | TK |
| (viii) | River | R |
| (ix) | Lake | L |
| (x) | Waterfall | WF |
| (xi) | Others | O |
| (xii) | Total | T |

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat( C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages.

**LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS**

| Serial number | Name of Towns | Name of villages merged in towns | Name of villages identified for outgrowth | Location Code Number 1991 Census | Location Code Number 2001 Census (in case of partly OG) |
|---|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 |

There is no change during 1991-2001 Census in Munger District.

| N.A. | | | | | | | | | | |

**Note** : N.A. stands for information not available.

## APPENDIX IX - VILLAGE DIRECTORY

## STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

| Serial number | Name of C. D. Block | Village location code number | Name of village | Number of girls school | | | |
|---|---|---|---|---|---|---|---|
| | | | | Primary School | Middle School | Matriculation / Secondary School | Higher Secondary / PUC / Intermediate / Junior college |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| N.A. | | | | | | | |

**Note :** N.A. stands for information not available

# TOWN DIRECTORY

# Section-II : Town Directory

**Note explaining the abbreviations used in the Town Directory**

**Statement I : Status and Growth History**

**Column (2) : Class, name and civic administration status of town :**

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

| Population | Class |
|---|---|
| 100,000 and above | I |
| 50,000 - 99,999 | II |
| 20,000 - 49,999 | III |
| 10,000 - 19,999 | IV |
| 5,000 - 9,999 | V |
| Below 5,000 | VI |

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

| | | |
|---|---|---|
| (i) | Municipal Corporation | M. Corp. |
| (ii) | Municipal Committee | MC |
| (iii) | Municipal Council | M Cl |
| (iv) | City Municipal Council | CMC |
| (v) | Town Municipal Council | TMC |
| (vi) | Municipal Board | MB |
| (vii) | Municipality | M |
| (viii) | Cantonment Board/ Cantonment | CB |
| (ix) | Notified Area | NA |
| (x) | Notified Town | NT |
| (xi) | Notified Area Committee/ Notified Area Council | NAC |
| (xii) | Notified Town Area | NTA |
| (xiii) | Industrial Notified Area | INA |
| (xiv) | Industrial Township | ITS |
| (xv) | Township | TS |
| (xvi) | Town Panchayat | TP |
| (xvii) | Nagar Panchayat | NP |
| (xviii) | Town Committee/Town Area Committee | TC |
| (xix) | Small Town Committee | ST |
| (xx) | Estate office | EO |
| (xxi) | Gram Panchayat | GP |
| (xxii) | Census Town | CT |

Others columns need no comments.

**Statement II : Physical Aspects and Location of towns, 1999.**

**Column 3 to 5 : Physical Aspects**

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

**Column 6, 7 and 8**

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

**Column 9 & 10**

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

**Column 11, 12 and 13**

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

**Statement III : Municipal Finance 1998-1999**

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

**Statement IV : Civic and Other amenities, 1999**

**Column (1 to 5) : Self explanatory.**

**Column (6) : Road length (in kms.)**

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

| | | |
|---|---|---|
| (i) | Pucca Road | PR |
| (ii) | Kutcha Road | KR |

**Column (7) : System of Sewerage**

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

| | | |
|---|---|---|
| (i) | Sewer | S |
| (ii) | Open Surface Drains | OSD |
| (iii) | Box Surface Drains | BSD |
| (iv) | Sylk Drains | SD |
| (v) | Cesspool method | CP |
| (vi) | Pit System | Pt |
| (vii) | Others | O |

**Column 8 to 11 : Number of latrines**

Number of various types of latrines both Public and Private are given in these columns.

**Column 12 : Method of disposal of night soil**

The various prevalent methods of disposal of night soil are given below with codes :

| | | |
|---|---|---|
| (i) | Head Loads | HL |
| (ii) | Basket | B |
| (iii) | Wheel Barrows | WB |
| (iv) | Septic Tank | ST |
| (v) | Pit System | Pt |
| (vi) | Sewerage | S |
| (vii) | Others | O |

**Column 13 and 14 : Water supply**

Source and capacity of storage system. The following codes are used in these columns:

**Column 13 :**

| | | |
|---|---|---|
| (i) | Tap water | T |
| (ii) | Tube-well water | TW |
| (iii) | Tank Water | TK |
| (iv) | Well water | W |

**Column 14 :**

| | | |
|---|---|---|
| (v) | Over Head Tank | OHT |
| (vi) | Service Reservoir | SR |
| (vii) | River Infiltration Gallery | RIG |
| (viii) | Bore Well Pumping System | BWP |
| (ix) | Pressure Tank | PT |

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

**Column 15 : Fire Fighting Service**

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

**Column 16 to 20 : Electrification (Number of connections)**

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

**Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999**

**Column 1 to 3 : Self explanatory.**

**Column 4 & 5 :**

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

| | | |
|---|---|---|
| (i) | Hospital | H |
| (ii) | Dispensary | D |

| | | |
|---|---|---|
| (iii) | Health Centre | HC |
| (iv) | Family Welfare Centre | FWC |
| (v) | T.B. Clinic | TB |
| (vi) | Nursing Home | NH |
| (vii) | Others | O |

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

| | | |
|---|---|---|
| (i) | Ayurvedic | A |
| (ii) | Unani | U |
| (iii) | Homoeopathic | Hom. |

**Column 6 to 9**

The codes used for these columns are as follows :

| | | |
|---|---|---|
| (i) | Arts only | A |
| (ii) | Science only | S |
| (iii) | Commerce only | C |
| (iv) | Arts & Science only | AS |
| (v) | Arts & Commerce only | AC |
| (vi) | Combined for all categories– Arts, Science and Commerce | ASC |
| (vii) | Law | L |

**Column 10 Recognized shorthand, typewriting and vocational training institutes**

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

| | | |
|---|---|---|
| (i) | Shorthand | SH |
| (ii) | Typewriting | Type |
| (iii) | Shorthand & Typewriting | S H Type |
| (iv) | Others | O |

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

**Column 11 to14**

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

**Column 15 : Adult literacy class/centres**

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

**Column 16 : Working Women's hostels with number of seats**

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

**Column 17 to 19 : Recreational and Cultural Facilities**

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

**Column 20 : Public Libraries, Reading Rooms**

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

| | | |
|---|---|---|
| (i) | Public Library | PL |
| (ii) | Reading room | RR |

**Statement VI : Trade, Commerce, Industry and Banking, 1999**

**Column 3 to 8**

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

**Column 9 : Number of Banks**

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

**Column 10 & 11** : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

**Statement VII : Civic and other Amenities in Slums, 1999**

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

# STATEMENT (I TO VII)

**STATEMENT**
**STATUS AND**

# Part-B : Primary Census Abstract

# Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

**Data Processing**

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

**Task Force on Quality Assurance**

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

**Primary Census Abstract**

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

**Level of presentation in District Census Handbooks:**

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

| | Name of the Primary Census Abstract | Level of presentation |
|---|---|---|
| 1. | District Primary Census Abstract | District/CD Block/UA/City/Town |
| 2. | Primary Census Abstract for Scheduled Castes | District/CD Block/Town |
| 3. | Primary Census Abstract for Scheduled Tribes | District/CD Block/Town |
| 4. | Village Primary Census Abstract | CD Block/Village wise |
| 5. | Urban Primary Census Abstract | Town/Ward level |

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

**Area Figures**

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

**ANNEXURE - II**

**ESTIMATE OF CHILD MORTALITY, 1981 AND 1991**

| | | Persons | | | |
|---|---|---|---|---|---|
| State/District | Year | q (1) | q (2) | q (3) | q (5) |
| Bihar | 1991 | 75 | 84 | 86 | 89 |
| | 1981 | 94 | 112 | 125 | 141 |
| Munger | 1991 | 77 | 82 | 94 | 99 |
| | 1981 | 100 | 120 | 140 | 158 |

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in Annexure II as q(1),q(2),q(3) and q(5) it is observed that there has been decline in child mortality over the decade (in 1991 census as compared to 1981 census) both in the district as well as on the state. An interesting feature which can be noticed from the annexure is that the child mortality at the ages 1,2,3 and 5 was higher in the district compared to the state average at the time of 1981 and 1991 Census (except for q(2) in 1991 Census). It indicates that the pace of decline in child mortality has been slower in the district vis-à-vis the state.

**ANNEXURE - III**

**VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS**

| | Various fertility measures for the districts and the state(1991-Census) | |
|---|---|---|
| | State | District |
| 1 | 2 | 3 |
| CBR | 36.2 | 40.6 |
| TFR | 5.3 | 6.2 |
| TMFR | 5.9 | 6.7 |
| GFR | 163.0 | 184.0 |
| GMFR | 186.0 | 204.0 |
| Child woman ratio | 66.6 | 66.7 |
| No. of children ever born per woman in age group (45-49) | 4.1 | 4.2 |
| Mean age at marriage | 16.5 | 16.1 |

Some other fertility measures for Munger district and the state are furnished in above annexure III. It can be seen from fertility data presented above that fertility measures such as crude Birth Rate (CBR)Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR) General

Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are higher in Munger district compared to the state average in 1991 census whereas mean age at marrage lower in the district in comparison to the state average. The child woman ratio is and number of children ever born per woman in the age-group 45-49 in Munger district is slightly high compare to the state average.

The growth of population in any area (be it any district or state) is influenced due to effect of migration (in-migration as well as the out-migration). However, for desire of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population, although such impact may not be much in most of the cases.

| | Born in other states | | | Born in other countries | | | Total migrants | | |
|---|---|---|---|---|---|---|---|---|---|
| State/District | P | M | F | P | M | F | P | M | F |
| 1 | 11 | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 |
| Bihar | 1,582,339 | 195,360 | 1,386,979 | 211,880 | 18,501 | 193,379 | 19,989,195 | 2,102,651 | 17,886,544 |
| | (7.9) | (9.3) | (7.8) | (1.1) | (0.9) | (1.1) | (100.0) | (100.0) | (100.0) |
| Munger | 11,578 | 2,180 | 9,398 | 243 | 82 | 161 | 251,162 | 31,598 | 219,564 |
| | (4.6) | (6.9) | (4.3) | (0.1) | (0.3) | (0.1) | (100.0) | (100.0) | (100.0) |

Migrants by place of birth are 213.1 and 199.9 lakhs in Bihar state as a whole in 1991 and 2001 censuses respectively comprising 23.4 lakh and 21.0 lakh males and 189.6 lakh and 178.9 lakh females respectively. The migrants constitute 24.7 and 24.1 percent of the total population in the state according to 1991 and 2001 censuses respectively. The proportion of male and female migrants, in 1991 census, is approximately 5.2 percent and 46.1 percent respectively whereas it is 5.0 percent and 45.0 percent respectively in 2001 census.

In munger district, in 1991 and 2001 censuses, the total number of migrants by place of birth is 7.09 lakh and 2.51 lakh migrants respectively of which only 0.32 lakh are males while 6.76 lakh migrants are females in 1991 census whereas 0.32 lakh are males and 2.20 lakh are female in 2001 census. The migrants in munger district comprise 23.2 percent and 22.1 percent of the total population of the district in 1991 and 2001 Census respectively . Male and female migrants account for 2.0 percent and 47.2 percent respectively of the total population in 1991 and 5.2 percent and 41.4 percent respectively during 2001 census.

From the distribution of total migrants in Bihar state by place of birth it can be clearly seen in both the censuses that females predominate in Intra district migration while males generally predominate in inter district, inter state and international migration. In the case of Munger district males predominate in intra district migration during 2001 Census while females predominate in inter district migration. The inter state and international migration in 2001 Census and all the migrational trends in 1991 Census have followed the trend of state.Migrats born in other state of India as also those born outside India have lower proportion of female vis-a-vis males in both the Censuses.

**ANNEXURE - IV (B)**

**RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS**

| Place of Birth | Total/ Rural/ Urban | Place of enumeration | | | | | |
|---|---|---|---|---|---|---|---|
| | | Bihar | | | Munger | | |
| | | Total | Rural | Urban | Total | Rural | Urban |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| TOTAL INTERNAL MIGRANTS | Total | 20,070,811 | 17,002,880 | 3,067,931 | 697,920 | 591,353 | 106,567 |
| (1) within the state | | (100.0) | (84.7) | (15.3) | (100.0) | (84.7) | (15.3) |
| | Rural | 19,010,120 | 16,570,646 | 2,439,474 | 672,141 | 575,666 | 96,475 |
| | | (94.7) | (82.6) | (12.2) | (96.3) | (82.5) | (13.8) |
| | Urban | 990,737 | 375,267 | 615,470 | 22,822 | 12,910 | 9,912 |
| | | (4.9) | (1.9) | (3.1) | (3.3) | (1.9) | (1.4) |
| (2) In other states of India | Total | 1,049,969 | 575,484 | 474,485 | 9,109 | 5,130 | 3,979 |
| | | (100.0) | (54.8) | (45.2) | (100.0) | (56.3) | (43.7) |
| | Rural | 800,601 | 512,444 | 288,157 | 6,542 | 3,950 | 2592 |
| | | (76.2) | (48.8) | (27.4) | (71.8) | (43.4) | (28.5) |
| | Urban | 243,448 | 60,040 | 183,408 | 2,517 | 1,130 | 1,387 |
| | | (23.2) | (5.7) | (17.5) | (27.6) | (12.4) | (15.2) |

The annexure presented above gives an idea of rural - urban distribution of enternal migration by place of bith.Out of the total migrants in the state, 82.6 percent were from rural to rural, 3.1 percent were from urban to urban, 12.2 percent were from rural to urban and 1.9 percent from urban to rural. In case of Munger district, of the total intra-state migrants, 82.5 percent were from rural to rural, 1.4 percent were from urban to urban, 13.8 percent were from rural to urban and 1.9 percent were from urban to rural.

In case of migrants from other states of India, 48.8 percent were from rural to rural, 17.5 percent were from urban to urban, 27.4 percent were from rural to urban and 5.7 percent were from urban to rural for the state of Bihar. In case of Munger district, 43.4 percent were from rural to rural, 15.2 percent from urban to urban, 28.5 percent were from rural to urban and 12.4 percent were from urban to rural.

**ANNEXURE - IV ( C )**

**ANNEXURE - IV ( C )**
**INTERSTATE MIGRANTS, 2001 CENSUS**

| Bihar | | | Munger | | |
|---|---|---|---|---|---|
| Place of Birth | Migrants | Percentage to total Migrants | Place of Birth | Migrants | Percentage to total Migrants |
| 1 | 2 | 3 | 1 | 2 | 3 |
| Uttar Pradesh | 434,051 | 27.4 | Jharkhand | 5,675 | 49.0 |
| Jharkhand | 339,297 | 21.4 | West Bengal | 3,283 | 28.4 |
| Assam | 133,758 | 8.5 | Uttar Pradesh | 1,145 | 9.9 |
| West Bengal | 126,499 | 8.0 | Gujarat | 307 | 2.7 |
| Nagaland | 101,267 | 6.4 | Assam | 293 | 2.5 |
| Chhatisgargh | 90,469 | 5.7 | Orissa | 148 | 1.3 |
| Gujarat | 65,996 | 4.2 | Total for six states | 10,851 | 93.7 |
| Uttranchal | 63,527 | 4.0 | Other states | 727 | 6.3 |
| Jammu & Kashmir | 43,737 | 2.8 | **Total** | **11,578** | **100.0** |
| Orissa | 42,215 | 2.7 | | | |
| Maharashtra | 38,244 | 2.4 | | | |
| Rajasthan | 20,542 | 1.3 | | | |
| Haryana | 20,505 | 1.3 | | | |
| Andhra Pradesh | 18,371 | 1.2 | | | |
| Total for fourteen states | 1,538,478 | 97.2 | | | |
| Other states | 43,861 | 2.8 | | | |
| **Total** | **1,582,339** | **100.0** | | | |

It transpires from the above annexure that in case of Bihar 9 States, namely, Andhra Pradesh, Assam, Haryana, Madhya Pradesh, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal together account for 9.80 lakh (93.4%) of the 10.5 lakh interstate migrants in 1991 Census. West Bengal and Uttar Pradesh states are predominant among them contributing 39.9 and 30.7 percent of migrants respectively. In respect of Munger

district, of the total 9190 interstate migrants, West Bengal and Utter Pradesh states contribute 56.9 and 16.2 percentages respectively.

It can be further seen that during 2001 census States of Uttar pradesh and Jharkhand are the major contributors of migrants to the state. For the district of Munger the state of Jharkhand, West Bengal and Uttar Pradesh have been major contributors of migrants in 2001 Census.

It may be observed that Hindus are by far the numerically most important religious community as it accounts for as much as 82.4 percent of the state's population and 91.7 percent of the population of Munger district in 1991 census. The Muslims come next with 14.8 percent of the state's population. The percentage of Muslims in the district of Munger is comparatively lower than the state average accounting for only 8.1 percent of the district's population. The proportion of Christians, Sikhs, Jains and Buddhists population in the state as well as in the district is very low. Almost same trend continued in state as well as in district in 2001 Census also.

Annexure-V(B) furnish religion wise distribution of population for district of Munger and its C.D.blocks according to 1991 and 2001 Censuses

As already obserbed in annexure V(A), Though the proportion of Hindus in Munger District is the highest as compared to other religious communities still it is seen that Muslims also formed a big chunk of population in the district during both the Censuses. Among the C.D.Blocks proportion of Hindus is above 85 percent in eighteen out of twenty C.D.Blocks of Munger District, the highest being in Barchiya C.D.Block (99.0%) during 1991 Census During 2001 Census this district has only nine C.D.Blocks and Tetia Bombar C.D.Block has return the maximum(99.6 %) Hindu population. The proportion of Muslim population is the highest in Jhajha C.D.Block with 16.2 percent in 1991 Census while Munger C.D.Block has the highest proportion of Mushlims (16.4%) during 2001 Census. The existence of other religious commonities in various C.D.Blocks of the district, is insignificant during both the Censuses as their proportion to total population is almost negligible.

It is quite apparent from annexures VI A,VIB,VIC& VI D that Khagaria district as well as the state have a relatively higher proportion of 'never married' males and 'married' females. This may be attributed due to the fact that women get married at younger ages than males. As against 54.2 and 53.2 percentages of 'never married' males in Bihar state and Munger district respectively, the corresponding proportion among females is 45.2 and 43.5 only in 1991 census. Same trend contnued in 2001 census also. As against 56.3 and 58.7 percentages of never married males in Bihar and Munger district respectively, the corresponding proportions among females is 47.3 and 48.4 only. There is no much difference in situation in Munger district as compared to Bihar state as a whole during both the Censuses. The district of Munger has slightly lower proportion of widowed for (both males and females ) during 1991 Census but during 2001 Census the district has lower proportion of male widowed and higher prortion of female widowed than the state.

While analysing marital status by broad age-groups one finds that married females outnumber married males in the age-group 10-14 suggesting that child marriage among females is more prevalent than males.

It is also significant that the proportion of 'never married' females in the age-group 15-19 and above is much lower than the 'never married' males in Munger district as well as for the state as a whole during both the Censuses .

One of the important characteristics of the population on which information is collected in the Census is literacy. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the Census has already been explained in the beginning of this publication.

A proper index to the extent of literacy is provided by the proportion of literate and educated persons to the total population. The literacy rates for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 and 2001 censuses are 38.5 and 47.0 percent respectively.Male literates outnumbered female literates as the literacy rates for males, according to 1991 and 2001 censuses are 52.5 and

59.7 percent respectively while for females the literacy rates are only to the extent of 22.9 and 33.1 percent respectively. The literacy rates for Munger district according to 1991 and 2001 censuses, are 32.3 and 41.3 percent respectively which are lower than the state average. Male literates in the district accounted for 55.6 percent during 1991 Census and 69.8 percent during 2001 Census while female literates in the district constitute 25.3 percent of the total population during 1991 Census and 47.4 percent of the total population in 2001 Census.

Annexure VII(A) and VII(B) furnish information regarding absolute number of illiterates and literates and educated persons in Bihar state and Munger district as also percentage distribution of literate persons by different level of education by different age-groups.

A break-up of literate population by various educational level shows that 20.3 percent males and 27.2 percent females during 1991 Census and 5.4 percent males and 5.8 percent females during 2001 Census in the state are such who are literate without attaining any educational level. 21.6 percent males and 26.2 percent males and females during 1991 Census 24.9 percent females during 2001 Census in the state have crossed the primary or junior basic standard, 26.4 and 26.9 percent males and females in 1991 Census and 14.6 percent males and 13.2 percent females during 2001 Census have passed the middle examination while 31.7 and 19.7 percent males and females in 1991 Census and 32.1 males and 20.4 percent females in 2001 Census in the state are such who are matriculates and above. The contrast between males and females is significant among matriculates and above as the percentage of female literates who have passed the matriculation and above examination are roughly 12 percentage points less than male literate population who have attained this level of education.

The position of literates by different level of education in Munger district, according to 1991 and 2001 Censuses, is more or less the same as observed for Bihar state as a whole.Here it is worth-while to mention that in 1991 Census Munger district Comparised of pokets four districts namely Munger,sheikhpura ,Jamui and Lakhisarai whereas in 2001 Census Munger district.Figures exclusively belong to Munger district only.

| **Total Population** | **82,998,509** | **100.0** | **Total Population** | **1,137,797** | **100.0** |

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Munger district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population where as in the district of Munger 7.4 percent of the district population have returned urdu as their mother tongue and got second position in the disrict. Hindi as mother tongue has been returned by 29.6 percent of Munger district's population. Santals has been returned by only 1.0 percent of the district population except these languages analysed above both for the state and the district, other have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per Census 2001.
