INDRADAMNESHWAR MAHADEO TEMPLE, LAKHISARAI

The legend is that the king of Pal dynasty Raja Narayan Pal who was also known as Indradaman held religious rituals at this place. It is also said that this was due place where Lord Sri Ram came to meet his elder sister Shauta who was married to Saiut Shringe. During his stay Lord Sri Ram worshiped Lord Shiva here. On 7th April, 1977 a Shivlinga appeared at this place where a massive temple of Mahadeo is being built in the town of Lakhisarai called 'Indradamneshwar Mahadeo' temple.

Annexure VII : Age, sex and education in the district, 2001 Census 349

Annexure VIII : Distribution of different mother tongues returned in 2001 Census 353

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged

by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/ modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

District Highlights – 2001 Census

1. Lakhisarai 35th in terms of population (802,225) and 35th in terms of area (1,228 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Lakhisarai is the 31st densely populated district in the state with 653 persons per sq.km as against the state's 881.
3. Lakhisarai ranks 11th in terms of sex-ratio (921) against the state's 919.
4. There are 115 uninhabited villages (out of 472 total villages) in the district of Lakhisarai.
5. Khutaha (under Barahiya C.D. Block) is the most populated village (13,302) and Aima Mustafapur (under Surajgarha C.D. Block) is the least populated village (13) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 75% of the total workers are engaged in Primary sector.
7. C.D. Block Surajgarha has the highest number of villages (184) in the district and C.D. Block Pipariya has the lowest number of villages (20).
8. Hill Block (under Surajgarha C.D. Block) has the largest area (7,580 hectare) and 5 villages (under Surajgarha C.D. Block) have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 96.6 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as

followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) mortality (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as

possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The district of Lakhisarai, which till the 1991 Census was a part of Munger district as one of its subdivisions, was elevated to the status of a district on 3rd July, 1994 by the Government of Bihar vide its Notification No. 16/जि0पु02-202/93 का0 123ण The district is situated in Central Bihar surrounded by Munger on the east, Patna and Nawada on the west, Jumui in the south and Begusarai in the north. There is only one subdivision viz., Lakhisarai in the district. The headquarters of the district and the subdivision is Lakhisarai. There are six Community Development Blocks viz., Barahiya, Piparia, Surajgarha, Lakhisarai, Ramgarh Chowk and Halsi in the district. Barahiya and Lakhisarai are the two Municipal Towns in the district. The district had got 472 villages.

As regards early history of the district it is imperative to look into the history of the district of Munger of which till recently the district of Lakhisarai was a part. The district of Munger comprised the eastern portion of Madhyadesh or the midland of the original Aryan settlers. Later, Munger formed part of the kingdom of Anga with its capital at Champa near Bhagalpur, although the western part of the district constituted part of the Magadh empire. Anga was overtaken by the Magadh Emperor Bimbisar in the sixth century B.C. when Brahmadatta, the last independent ruler of Anga, was overthrown. Hereafter, the history of Munger was virtually that of the Magadh empire.

It is believed that the town of Munger is also associated with Buddha's disciple Maudagalya. There is enough historical and archaeological evidence to show that Buddha himself had visited different places in the district and there are ruins and remains of stupas and viharas built by royal converts of Buddhism all other over the district. Recently scholars have also tried to prove conclusively that Mahavira Tirthankar was born at a place called Lachchuar lying in the southern part of the district. Thousands of Jain pilgrims visit this small hamlet, nestled high up in the hills, to celebrate the birth anniversary of Lord Mahavira.

The earliest written account of the district is available in the travel memoirs of Hiuen Tsang who travelled through some parts of the district towards the middle of the seventh century A.D. He has passed through the south portion of the district now corresponding to Sheikhpura, Kharagpur and Kajra.

There is a gap in the history of the district for a several centuries after Hiuen Tsang's visit. Dharma Pal, one of the Pala kings, resided in Munger in about 770 A.D. while Deva Pal carried out further conquest. A copper plate showing the grant of a village by Deva Pal in modern Patna was executed in Mudagiri or the present Munger. Another plate shows the grant of land by Narayan Pal, fifth in the line of Pala kings, who is described as the lord of Anga, i.e., Bhagalpur and Munger.

Towards the close of the twelfth century A.D., when Bakhtiar Khilji invaded and conqeured Bihar, Munger passed into the hands of Muslims without offering, much resistance. In 1225 A.D. Sultan Iltutmish probably met the forces of Sultan Gyasuddin Khilji of Bengal at Munger which ultimately led to signing of a treaty. During the time of early Muslims Munger was the second town in south Bihar. It continued to be a part of Bengal till 1332 when it was annexed to Delhi by Md. Tuglak. From 1397 Munger became a part of the kingdom of Jaunpur and continued as such for about one hundred years until the time of Bahlol Lodi, whose son Sikander Lodi over ran Bihar as far as the frontier of Bengal in 1489. Earlier, from 1449 to 1474 Munger was brought under the control of Rukmuddin Barburk. After a temporary control by Afghan Chiefs, prince Daniyal, son of Sultan Husain Sah of Bengal, met Sultan Sikander Lodi of Delhi near Barh in the year 1499 and the province was acknowledged as a part of Bengal. Prince Daniyal became the Governor of eastern Bihar. He repaired the fortification of Munger town. Hussain Sah was succeeded by Nasrat Sah in 1519. He conquered Tirhut and, after crossing the Ganga, took possession of the Munger fort and town,named Kutub Khan. Kutub Khan strove to build up an eastern kingdom. Munger became the headquarters of Bihar army of the Gour Kings. When

Babar invaded Bihar, the prince of Munger unhesitatingly accepted the terms of peace after the battle at Bogra in 1530. Kutub Khan remained in Munger till the accession of Mahmud Sah, the last independent king of Bengal in 1534. Then Sher Sah and Makhdum Alam rose in arms, defeated Kutub Khan and Mahmud Sah and captured Munger. From 1545 Munger was under the control of an Afghan called Mian Suleman, who held south Bihar for Islam Sah, son of Sher Sah. In 1563 Suleman acknowledged the Suzerainty of Akbar and became the rular of Bengal and Bihar. In 1572 he was succeeded by Daud Sah who refused to pay tribute to the Mughal emperor where upon Akbar invaded and conquered the country.

Munger was for sometime the station from where Akbar's forces led by Todar Mal directed their operations against the insurgents of the military revolt in Bengal in 1580. Todar Mal succeeded in winning over the rebel chiefs without much fighting. Raja Sangram of Kharagpur and Raja Puran Mal of Gidhaur thought it better to submit to Akbar than wage an infructuous war.

In 1745 Mustafa Khan, a rebel general of Ali Vardi Khan, Advanced upon Munger and captured the Fort. Two years earlier, the army of Balaji Rao, the Peshwa of Poona, had marched through Munger and caused heavy suffering to its people.

As the empire of the Moghuls weakened and disintegrated by the middle of the 18th century, Bihar came under the control of the Subah of Bengal which had become practically independent of Delhi. In the battle of Plassey in 1757, the forces of Nawab, Siraj-ud-daula of Bengal were defeated by the English forces mainly due to the treachery of Mir Jafar the Nawab's Commander-in-Chief. The English put Mir Jafar on the throne of Bengal but soon replaced him by Mir Kasim as Nawab of Bengal in 1760. Once again Munger came into prominence when in 1762 Kasim Ali Khan or Mir Kasim shifted his capital from Nurshidabad in Bengal to Munger. Mir Kasim Ali soon came in for trouble with the English when a company of sepoys was sent by the English Manager of the factory at Patna to search the Munger Fort on the suspicion that some deserters were harboured there. Subsequently, in the events that followed a British force under Major Adam defeated Mir Kasim's troops at Suti. Ultimately the Fort of Munger resulted in Mir Kasim's ordering the wholesale execution of his English prisoners. This act was perpetrated by Samru and resulted in what is known as the massacre of Patna.

The ramparts of the dilapidated fort of Munger and many other historical structures, both inside and outside the fort are reminiscent of the times of Mir Kasim. The most vivid testimony and historical landmark is found in the partially demolished road bridge on the Dakra-Nala, about 5 kms. south-west of Munger, on the Munger-Patna Road, which was blown up by Mir Kasim himself as he retreated towards Patna pursued by the English forces to whom he lost the battle of Baxar (1764).

With the extension of their dominion by the British, the town of Munger ceased to be an important military station. In the subsequent period, it owed its prominence more as a health resort than an administrative centre.

Unlike other parts of the state, the National Movement of 1857 did not effect Munger district to any appreciable extent. The timely dispatch of troops to the town of Munger nipped the trouble in the bud.

The part played by Munger in the freedom struggle can be said to be truly outstanding. The people of the district were receptive to new ideas. The Brahmo Samaj was established at Munger and Jamalpur in 1864. Munger was visited by religious leaders like Ramkrishna, Vivekanand, Dayanand and others. A branch of the Arya Samaj was also started in 1897. Surendra Nath Banerjee visited Munger in 1906 in connection with the Swadeshi movement. The late Dr. Sinha organised a conference under the auspices of the Bihar Students' Federation at Munger in 1917. It was presided over by Dr. Rajendra Prasad. The Home Rule League Movement of Annie Besant in 1917, and the Non-cooperation Movement of Mahatma Gandhi in 1921 received wide support. The district also played its role in the Non-cooperation Movement of 1931 as well as in the famous 'Quit India Movement of 1942'.

(iii) Administrative set up

There is only one subdivision viz., Lakhisarai in the district. The headquarters of the district and the subdivision is Lakhisarai. There are six Community Development Blocks viz., Barahiya, Piparia, Surajgarha, Lakhisarai, Ramgarh Chowk and Halsi in the district. Barahia and Lakhisarai are the two Municipal Towns in the district.

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He often belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has only one subdivision which is headed by a subdivisional officer either from I.A.S. or B.P.S.C. cadre. S.D.O. is under direct authority of D.M. There are six Community Development Blocks in the district where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration : The Judges and Munshif magistrates are posted at district and subdivision who administer and deliver justice of different kinds. The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Lakhisarai is the head of the district police administration. The Deputy Superintendent of Police is posted to assist the police superintendent who is either from the Indian Police Service or the Bihar Police Service. In the subdivision of the district, the Deputy Superintendent of Police is posted who keeps control on police administration.

(iv)Physical Features

The district lies on 25^0 15' north latitudes and 86^0 30' east longitudes. On the north of the district flows mighty holy river the Ganges which also forms the border with neighbouring district Begusarai. In its south lies the mountain which are the continuation of Kharagpur Hills range which is the outlying extension of Vindhyan range. Alluvial plain land lies in the eastern side of the district which is very fertile for growing paddy. In this area the whole land is irrigated and is connected by canals which is fed by Upper Kiul Dam. In the western side the topography of the land is basin type as such there is permanent water logging round the year. The Basin shaped land or Taal, as commonly called, is very fertile and is suitable for growing wheat, pulses and other cereals.

In the centre Kiul river dissects Lakhisarai district in two parts. The river Kiul rises in the Kharagdiha P.S. of Hazaribagh district of Jharkhand state and enters Jamui district near Satpahari hills and then it enters the Lakhisarai district near Mahisona and joins Ganges near Rehua. One of the important rivers which originate from the "Taal" is Harohar which traverses the eastern part of the "Taal" area and finally merges in holly Ganges near Barahiya.

Climatic condition

Lakhisarai district have more or less tropical climate. Tropic of cancer which passes about 60 kms from this district which makes this district very hot in summer. The months of April to June are very hot. The monsoon usually breaks in last week of June and continues till August. After equinox of 23rd September, cold winds starts blowing which marks the beginning of pleasant weather and finally from November winter season starts which continues upto March. The average rainfall in this district is about 8-12 cm.

Flora & Fauna

Lakhisarai being a tropical zone mostly have tropical flora and fauna. In the eastern side of the district which is traversed by Vindhyan range bear most variegated vegetation in this region Sheesham (Dulbergia Sisso) and Sal (Shorea robusta) is commonly found in forests. In the non-forest areas commonly found species are Mango, Neem, Pipal, Banyan, Jamun and Mahua.

In hilly areas of Lakhisarai mostly in jungles of Abhaipur & Kajra, Hyena & wild cats are common. Sometimes Leopards are also spotted. Chital or spotted deer is also found. Nilgais can also be seen in the area.

Mines & Minerals

One of the important sources of minerals is sandy

loam of Kiul river which forms the important source of revenue in this district. The hills extending from Munger to Abhaypur, Kajra are comprised of archean schists including the iron ore and Kolhan series predominantly. Basalts are also found in the hilly tracts.

Land use pattern

Agricultural conditions are favourable in this district. The eastern part of the district near Ganges is fertile alluvial plains and the major cultivated area lies chiefly in the basin of Kiul river and its tributaries. The topoland in northern side is extremely fertile and is fit for growing rabi crops. The fertile alluvial plain in eastern side is bowl of rice. The " Taal" area on the western side is also extremely fertile and is the bowl of wheat and pulses.

The soil are mostly of sandy alluvial type having alkaline reaction and saline deposition here and there. The Ganges in northern side comprises of newer alluvium along the river in Barahiya and Surajgarha.

Cash crops cover a meagre portion in the district and comprises mostly oilseeds and spices.

Irrigation facilities

The irrigation facilities available in this district is from the canals and irrigation pump, tube-wells. A net-work of canal from Sringirishi starts from Morway Dam near the Ashram and irrigates the eastern portion of the district. Due to this canal system this area is very fertile. A scheme namely the Ganga Pump canal, Surajgarha was started in late seventies. But due to shifting of river course to other side this could not materialise.

Live Stock

The term livestock includes cattle (Cow-bulls), Buffalow, Goat, Sheep and Pigs. Due to availability of grasslands in the district the farmers are engaged in rearing of milch animals. This inclues cross breed Cows and upgraded Buffalows mostly in Northern and Western area. In Southern area cattles are generally of small size and poor quality as grazing lands are deficient in this part (Chanan).

Milk production in this area is high. Formerly there was no nodal agency to tap this potential. So therefore farmers had to sell their produce at throw away prices. Now the government owned Barauni Dairy Project and it has established its network of milk collection centres. It has established a milk chilling plant at Lakhisarai.

Fishery

In Lakhisarai district large veriety of fishes are found such as Katla, Rehu, Mirka etc. The mighty Hilsa traverses the Ganges during flood and rain and sprawl here. The delicious fish is found in abundance in Harohar river. Other fishes are mostly found in sairats which are abundantly found here and in hills streams.

Industries

Lakhisarai district presents a dismal picture of industry. Small scale industries privately owned in tiny sector are found here such as Rolling mill, Sindur Factory, from where finished Iron and Vermilion respectively is exported to other parts of state.

Communication

Lakhisarai is well connected by Rail as well as Road. The Road which passes through Lakhisarai has been accorded the number NH 80 which starts Road from Patna, Ranchi, Bhagalpur. It has got 3 way Road communication.

Lakhisarai is situated on Howrah, New Delhi Main line of Railway. The main line enters the district at Kunder, 5 km. From Jamui. By loop line Lakhisarai is connected to Jamalpur and also a branch line goes to Gaya.

Riverways is not developed in this district. Only Ganges is navigable.

The District is not linked with air.

Trade & Commerce

Lakhisarai is predominantly an agricultural district. Its export-trade comprises mostly of Rice, Wheat and other cereals. But the main agricultural trade comprises of dairy and horticultural products like milk and vegetables. The vast diara land and the Taal area of Barhiya are the source of dairy products.

Vermilion or Sindur is the widely know product of Lakhisarai for the last 100 years. From the small sector finished Iron products and vermilion is exported from here. Besides Lakhisarai is the market for adjoining areas of Chanan and other village areas.

Electricity & Power

Lakhisarai is well electrified and near about 70% of villages in Lakhisarai are electrified.

Public Health

There are a number of district dispensaries known as Primary Health Centres and Health Sub-centres located in different blocks of the district. Apart from allopathic dispensaries the district has a few Ayurvedic dispensaries also. Some of the state dispensaries are quite old and started before 1950.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.

In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but

this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.

If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be

treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a

statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).—

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:—

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall

for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik

12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewerage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of & locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the

mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49 years) in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49 years)}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49 years) in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49 years)}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49 years) assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age group and sex per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/ his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-statemigration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4

(500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999), towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

papulation of the Munger district (from which the district of Lakhisarai has been carved out during 1991-2001) during 1991 was 30,60,027 Hindus constitute over 91.7 per cent (28,05,717persons) of the population in the district followed by Muslims 8.1 percent (2,49,320 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Munger district (from which the district of Lakhisarai has been carved out during 1991-2001) during 1991 was 3,060,027. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Munger district, Hindi, the main mother tongue of the district was returned by 91.6 percent (2,802,381 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Munger district, was 6.7 percent (204,021 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Lakhisarai during 1991 census.

The population of the Scheduled Castes in the district of Munger (from which the district of Lakhisarai has been carved out during 1991-2001)) was 503,981 according to 1991 Census. Numerically the five most prominent SCs in the distirict were (i)Musahar (165,080) (ii) Dusadh,Dhari, Dharh (136,984) (iii) Chamar, Mochi(107,081) (iv) Pasi (29,739)and (v) Dhobi (25,802) while Musahar constituted the maximum proportion of the Scheduled Castes population , the percentage being 32.8 (more than one forth of the total SC population) Dusadh and Chamar though numerically Second and third in order comprised only 27.2 and 21.2 percent of the SC population in the district. Pasi and Dhobi are much less in number as compared to the other three SCs mentioned above with only 5.9 and 5.1 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the five SCs described above as their percentages to total SC population was less than even 1.0 percent except Hari/Mehtar/Bhangi. Dom/ Dhangad and Turi whose percentages were 1.8,1.7 and 1.6 respectively.

The population of the Scheduled Tribes in the district of Munger (from which the district of Lakhisarai

has been carved out during 1991-2001) during 1991 Census was 70,660. Numerically, the five important STs were namely (i) Santal (ii) Kora (iii) kharwar (iv) Oraon and (v) Munda. Santal had 51,609 populations, which constituted 73.0 percent of the ST population constituted 21.5 percent. Kora with 15,160 populations constituted 21.5 percent of the ST population. Kharwar, which were 964 in number, constituted 1.4 percent of the ST population. Oraon comprised 602 persons and comprised 0.9 percent of ST population. While Munda with 359 population constituted 0.5 percent of the total ST population in the district. The other Scheduled Tribes were almost negligible in proportion.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Lakhisarai district is 802,225 comprising 417,672 males and 384,553 females and constituting 1.0 percent of the State population spread over 1.3 percent of the area of the state in the 6 C.D.Blocks of the district. Lakhisarai is the most populous where as Pipariya is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001

	District Total:	**646,395**	**561,055**	**85,340**	**802,225**	**684,485**	**117,740**	**24.0**	**22.0**	**38.0**	**13.2**	**14.7**

Table 1 shows rise in the population of this district during 1991-2001 decade has been of the order of 24.0 percent. The rural population in the district has increased by 22.0 percent while the urban population growth over the decade has been as much as 38.0 percent. Rural-Urban migration is important factor which always leads to rapid expansion of the urban unit. Among the C.D. Blocks, Lakhisarai has shown the highest increase in population over the decade with 34.1 percent. It may be due to the fact that Lakhisarai town, the district headquarters is located in this C.D. Block. The next highest increase in population is observed in Ramgarh Chowk with 28.9 percent followed by Halsi C.D. Block with 28.2 percent. Percentage decadal variation has been observed to be least in the case of Pipariya C.D. Block with 8.6 percent.

The increase in rural population during 1991-2001 has been highest in Lakhisarai C.D. Block with 29.7 percent followed by Ramgarh Chowk C.D. Block with 28.9 percent.

Number and percentage of inhabited villages in specified population size ranges with the related population, 2001.

It may be observed in the Table-2 that the maximum number of villages lie in the population range of 1000-1999 accounting for 31.4 percent of the total inhabited villages closely followed by in the population range of 2000-4999 accounting for 26.1 percent of the total inhabited villages. The percentages of population in the above two

population ranges are 23.5 percent and 40.5 percent of the total rural population of the district respectively. The villages in the population range of 500-999 constitute 19.6 percent of the total inhabited villages and in these villages the percentage of population is only 7.6 percent. There are 23 villages in the population range of 5,000-9,999 accounting for 6.4 percent of the total inhabited villages and in these villages the percentage of population is 21.3 percent of the total rural population. There are 31 villages in the population range of 200-499 accounting for 8.7 percent of the total inhabited villages and in these villages the percentage of population is only 1.6 percent of the total rural population. There are 25 villages in the population range of less than 200 accounting for 7.0 percent of the total inhabited villages and in these villages the percentage of population is 0.4 percent. There are 3 villages in the highest population range of 10,000 and above accounting for 0.8 percent of the total inhabited villages and in these villages the percentage of population is 5.1 percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicable in respect of Lakhisarai district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometre)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.3	381	0.1
11-20	2	0.6	188	0.0
21-50	0	0.0	0	0.0
51-100	9	2.5	7,334	1.1
101-200	13	3.6	9,417	1.4
201-300	19	5.3	24,983	3.6
301-500	49	13.7	68,813	10.1
501 +	264	73.9	573,369	83.8
Not known	0	0.0	0	0.0
District Total:	**357**	**100.0**	**684,485**	**100.0**
Population Density (Rural) of the district:		**626**		

The data presented in the above table highlight the fact that maximum proportion of villages in Lakhisarai district lies in the density range (per square kilometre) of 501+ with 73.9 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 13.7 percent. It would further be seen that small number of villages falls in the density range of 201-300 which account for 5.3 percent of the total inhabited villages.

Maximum number of villages falls in the density range of 501+ covering 83.8 percent of the population followed by villages in the density range of 301-500 which account for 10.1 percent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,045	1,045	0
1911	1,051	1,056	942	1,046	1,046	0
1921	1,020	1,027	886	1,022	1,026	947
1931	995	1,005	820	998	1,001	911
1941	1,002	1,012	842	998	1,002	934
1951	1,000	1,010	859	988	998	920
1961	1,005	1,020	832	995	1,007	902
1971	957	968	833	944	950	896
1981	948	959	852	928	932	905
1991	907	913	857	880	881	876
2001	919	926	868	921	927	883

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 above Shows that sex ratio for the urban areas of Lakhisarai district is comparatively high as compared to the urban areas of the state during 1991 and 2001 censuses. However, on the other hand, the sex ratio for the rural areas of the state is found to be comparatively high as compared to the rural areas of Lakhisarai district during 1991 census but the sex ratio of the district for the rural areas during 2001 census has slightly higher than the rural sex ratio of the state. It has already been discussed that the district of Lakhisarai was created after 1991 census. It is found that in case of sex ratio of the total population in the district it is lower than the sex ratio of the state of Bihar in 1991 census but the sex ratio of the district in case of total population during 2001 is slightly higher than the sex ratio of the state.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C. D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Barahiya	899	905	887
2	Pipariya	894	894	
3	Surajgarha	937	937	
4	Lakhisarai	908	919	881
5	Ramgarh Chowk	941	941	
6	Halsi	941	941	
	District Total:	**921**	**927**	**883**

Table 6 shows that in Lakhisarai district as a whole there are 921 females for every thousand males. Within the district, the sex ratio varies from 941 in Halsi and Ramgarh Chowk C.D. Blocks to 894 in Pipariya C.D. Block. The sex ratio of Barahiya C.D. Block is 899 while, the sex ratio at Surajgarha C.D. Block is 937. The sex ratio of Lakhisarai C.D. Block is 908. The sex ratio figures for rural and urban areas of Lakhisarai district are 927 and 883 respectively.

The sex ratio of Halsi, Ramgarh Chowk and Surajgarha C.D. Blocks are higher than the district rural average of 927 while Pipariya(894), Barahiya(905) and Lakhisarai(919) C.D. Blocks have sex ratios below the district rural average. The urban sex ratio of the district is 883 which is lower than the total and rural averages of the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C. D.Block	Sex ratio
1	2	3
1	Barahiya	905
2	Pipariya	894
3	Surajgarha	937
4	Lakhisarai	919
5	Ramgarh Chowk	941
6	Halsi	941
	District (Rural) Total:	**927**

From the table 7 it is clear that for rural area in Lakhisarai district there are 927 females for every thousand males. Within the district the sex ratio varies from 941 both in Ramgarh Chowk and Halsi C.D. Blocks to 894 in Pipariya C.D. Block. The sex ratios of Barahiya, Surajgarha and Lakhisarai C.D. Blocks are 905, 937 and 919 respectively. The sex ratios of Surajgarha, Ramgarh Chowk and Halsi C.D. Blocks are higher than the district rural average of 927, while Barahiya(905), Pipariya(894) and Lakhisarai(919) C.D. Blocks have sex ratios below the district rural average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	3	0.8	212	0.0
700-749	1	0.3	498	0.1
750-799	9	2.5	8,340	1.2
800-849	25	7.0	27,448	4.0
850-899	80	22.4	149,987	21.9
900-949	115	32.2	279,870	40.9
950-999	80	22.4	154,506	22.6
1000-1099	37	10.4	58,785	8.6
1100+	7	2.0	4,839	0.7
District Total:	**357**	**100.0**	**684,485**	**100.0**
Sex ratio (Rural) for District:		**927**		

It is observed in the above table 8 that the maximum proportion of the villages of Lakhisarai district lies in the sex ratio range of 900-949 and these villages account for 32.2 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 40.9 percent of the district rural population. 80 villages (22.4%) fall in the both sex ratio ranges of 950-999 and 850-899 and these villages account for 22.6 percent and 21.9 percent respectively of the rural population of the district. 37 villages (10.4%) are in the sex ratio range of 1000-1099 and these villages account for 8.6 percent of the total rural population. 25 villages (7%) falls in the sex ratio range of 800-849 and these villages account for only 4.0 percent of the rural population. 9 villages (2.5%) are in the sex ratio range of 750-799 and these villages account for only 1.2 percent of the rural population. Only 7 villages (2.0%) fall in the highest sex ratio range of 1100+ and this small proportion of villages accounts for only 0.7 percent of the population. Only 3 villages (0.8%) are in the lowest range of sex ratio (less than 700) which account for negligible percentage of the population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Urban status of town	Sex ratio
1	2	3	4
1	Barahiya	M	887
2	Lakhisarai	M	881
	Sex ratio (Urban) for the district:		**883**

\+ To be arranged in alphabetical order

There is no urban agglomeration in Lakhisarai district. There are only two urban unit i.e. Barahiya(M) and Lakhisarai(M). The sex ratios of Barahiya(M) and Lakhisarai(M) are 887 and 881 respectively according to 2001 census.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total/ Rural/ Urban	Total population in 0-6 age group			Sex-ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Barahiya	Total	24,201	12,518	11,683	933
		Rural	17,526	9,055	8,471	936
		Urban	6,675	3,463	3,212	928
2	Pipariya	Total	5,802	3,005	2,797	931

		Urban	0	0	0	0
3	Surajgarha	Total	48,240	24,850	23,390	941
		Rural	48,240	24,850	23,390	941
		Urban	0	0	0	0
4	Lakhisarai	Total	55,983	28,564	27,419	960
		Rural	40,669	20,669	20,000	968
		Urban	15,314	7,895	7,419	940
5	Ramgarh Chowk	Total	14,858	7,551	7,307	968
		Rural	14,858	7,551	7,307	968
		Urban	0	0	0	0
6	Halsi	Total	20,236	10,312	9,924	962
		Rural	20,236	10,312	9,924	962
		Urban	0	0	0	0
	District Total:	**Total**	**169,320**	**86,800**	**82,520**	**951**
		Rural	**147,331**	**75,442**	**71,889**	**953**
		Urban	**21,989**	**11,358**	**10,631**	**936**

It is observed from the above table that the sex ratio in the age group 0-6 in the district varies from 968 in Ramgarh Chowk C.D. Block to 931 in Pipariya C.D. Block. The sex ratio in the age group 0-6 of Lakhisarai C.D. Block is 960 while the sex ratio of Surajgarha C.D. Block is 941. The sex ratio figures in the age group 0-6 of Lakhisarai, Ramgarh Chowk and Halsi C.D. Blocks are higher than the district total and rural averages while Barahiya, Pipariya and Surajgarha C.D. Blocks have sex ratios below the district total and rural averages. The urban sex ratio of Lakhisarai district is lower than the total and rural sex ratios of the district.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Barahiya	17,526	9,055	8,471	936
2	Pipariya	5,802	3,005	2,797	931
3	Surajgarha	48,240	24,850	23,390	941
4	Lakhisarai	40,669	20,669	20,000	968
5	Ramgarh Chowk	14,858	7,551	7,307	968
6	Halsi	20,236	10,312	9,924	962
	District (Rural) Total:	**147,331**	**75,442**	**71,889**	**953**

Table 11 shows that the sex ratio in the age group 0-6 among the rural population in the C.D. Blocks of the Lakhisarai district varies from 968 both in Lakhisarai and Ramgarh Chowk C.D. Block to 931 in Pipariya C.D. Block. The sex ratio figures of Lakhisarai, Ramgarh Chowk and Halsi C.D. Blocks are higher than the district average while Barahiya, Pipariya and Surajgarha C.D. Blocks have sex ratios below the district average.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	5.0	1,458	1.0
700-749	8	2.2	1,541	1.0
750-799	13	3.6	2,882	2.0
800-849	30	8.4	9,346	6.3
850-899	43	12.0	21,525	14.6
900-949	62	17.4	35,503	24.1
950-999	69	19.3	33,765	22.9
1000-1099	67	18.8	31,371	21.3
1100+	47	13.2	9,940	6.7
District (Rural) Total	**357**	**100.0**	**147,331**	**100.0**
Sex ratio (Rural) for District:		**953**		

It is observed in the above table that 19.3 percent of inhabited villages in Lakhisarai district lies in the sex ratio range of 950-999 in the age group 0-6. 62 villages (17.4%) fall in the sex ratio range of 900-949 in the age group 0-6. 67 villages (18.8%) are in the sex ratio range of 1000-1099. 47 villages (13.2%) are in the sex ratio range of 1100+ and these villages having favourable sex ratio constitute 6.7 percent of the rural population of the district. There are 30 villages (8.4%) in the district which lie in the unfavourable sex ratio range of 800-849. These villages account for 6.3 percent of the rural population of the district. There are 18 villages in the district having very unfavourable sex ratio range of less than 700 which account for 1.0 percent of the rural population of the district.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7

2	Lakhisarai	M	15,314	7,895	7,419	940
	District(Urban) Total		**21,989**	**11,358**	**10,631**	**936**

\+ To be arranged in alphabetical order

There is no urban agglomeration in Lakhisarai district. There are only two statutory towns in Lakhisarai district i.e. Barahiya (M) and Lakhisarai (M). The sex ratio in the age group 0-6 of Barahiya (M) is 928 and the sex ratio in the age group 0-6 of Lakhisarai (M) is 940 according to 2001 census.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C. D.Block	Total/ Rural/ Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Barahiya	Total	122,741	14,245	5	11.6	0.0
		Rural	82,876	9,833	0	11.9	0.0
		Urban	39,865	4,412	5	11.1	0.0
2	Pipariya	Total	31,114	2,859	0	9.2	0.0
		Rural	31,114	2,859	0	9.2	0.0
		Urban	0	0	0	0.0	0.0
3	Surajgarha	Total	224,587	33,215	4,416	14.8	2.0
		Rural	224,587	33,215	4,416	14.8	2.0
		Urban	0	0	0	0.0	0.0
4	Lakhisarai	Total	261,871	41,836	1,192	16.0	0.5
		Rural	183,996	33,057	1,173	18.0	0.6
		Urban	77,875	8,779	19	11.3	0.0
5	Ramgarh Chowk	Total	71,112	14,417	0	20.3	0.0
		Rural	71,112	14,417	0	20.3	0.0
		Urban	0	0	0	0.0	0.0
6	Halsi	Total	90,800	20,003	23	22.0	0.0
		Rural	90,800	20,003	23	22.0	0.0
		Urban	0	0	0	0.0	0.0
	District Total:	**Total**	**802,225**	**126,575**	**5,636**	**15.8**	**0.7**
		Rural	**684,485**	**113,384**	**5,612**	**16.6**	**0.8**
		Urban	**117,740**	**13,191**	**24**	**11.2**	**0.0**

The above table shows that the percentage of scheduled castes in Lakhisarai district is 15.8 percent of the total population in the district. Within the district highest percentage of scheduled castes population is in Halsi C.D. Block with 22 percent closely followed by Ramgarh Chowk, Lakhisarai, Surajgarha, Barahiya and Pipariya C.D. Blocks with 20.3, 16.0, 14.8, 11.6 and 9.2 percent respectively. The percentage of scheduled castes population in Lakhisarai district for the urban areas is 11.2 percent which is lower than the rural areas (16.6%). The percentages of scheduled tribes population in the Surajgarha and Lakhisarai C.D. Blocks are 2 percent and 0.5 percent respectively. In rest of the C.D. Blocks of Lakhisarai district, the percentage of scheduled tribes population is almost negligible.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C. D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Barahiya	82,876	9,833	0	11.9	0.0
2	Pipariya	31,114	2,859	0	9.2	0.0
3	Surajgarha	224,587	33,215	4,416	14.8	2.0

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001 (*Concld.*)

Serial number	Name of C. D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7
4	Lakhisarai	183,996	33,057	1,173	18.0	0.6
5	Ramgarh Chowk	71,112	14,417	0	20.3	0.0
6	Halsi	90,800	20,003	23	22.0	0.0
	District (Rural) Total:	**684,485**	**113,384**	**5,612**	**16.6**	**0.8**

The above table indicates that the percentage of the scheduled caste in Lakhisarai district is of the order of 16.6 percent of the total population. The highest percentage of scheduled castes population is in Halsi C.D. Block with 22 percent of the total population followed by Ramgarh Chowk, Lakhisarai, Surajgarha, Barahiya and Pipariya C.D. Blocks with 20.3, 18.0, 14.8, 11.9 and 9.2 percent respectively. The percentages of scheduled castes population in Halsi and Ramgarh Chowk and Lakhisarai C.D. Blocks are higher than the district rural average (16.6%). The percentages of scheduled tribes population in the Surajgarha and Lakhisarai C.D. Blocks are 2.0 and 0.6 percent respectively. The percentage of scheduled tribes population in other C.D. Blocks of Lakhisarai district is almost negligible as has been observed in the above table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	35	9.8	0	0.0
Less than 5	31	8.7	1,383	1.2
5-10	58	16.2	13,858	12.2
11-20	109	30.5	37,017	32.6
21-30	66	18.5	37,608	33.2
31-40	23	6.4	9,455	8.3
41-50	17	4.8	7,898	7.0
51-75	10	2.8	4,742	4.2
76 and above	8	2.2	1,423	1.3
District Total	**357**	**100.0**	**113,384**	**100.0**

From the above table it is apparent that there are 109 villages accounting for 30.5 percent of the inhabited villages in the district where the population of scheduled castes ranges between 11 and 20 percent of the total population. This is closely followed by villages where the population of the scheduled castes ranges between 21 and 30 percent of the total population. These 66 villages account for 18.5 percent of the total inhabited villages. There are 58 villages which account for 16.2 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 5 and 10. There are 31 villages which constitute 8.7 percent of the inhabited villages where the percentage of scheduled castes population to total population is less than 5. 10 villages are such which constitute 2.8 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 51 and 75. There is no scheduled caste population in 9.8 percent of the inhabited villages in the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Scheduled Tribes Percentage	Scheduled Tribes Population	Scheduled Tribes Percentage
1	2	3	4	5
Nil	330	92.4	0	0.0
Less than 5	16	4.5	489	8.7
5-10	3	0.8	448	8.0
11-20	2	0.6	815	14.5
21-30	1	0.3	236	4.2
31-40	1	0.3	1,266	22.6
41-50	1	0.3	1,428	25.4
51-75	0	0.0	0	0.0
76 and above	3	0.8	930	16.6
District Total	**357**	**100.0**	**5,612**	**100.0**

From the table above, it is apparent that there are 16 villages accounting for 4.5 percent of the inhabited villages in the district where the percentage of Scheduled Tribes population to total population is less than 5. There are 3 villages which account for 0.8 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is between 5 and 10. There are 2 villages which constitute 0.6 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is between 11 and 20. Again there are 3 villages accounting for 0.8 percent of the inhabited villages where the population of Scheduled Tribes ranges between 76 and above.

There are as many as 330 villages which constitute 92.4 percent of the total inhabited villages in the district which have no Scheduled Tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Barahiya (M)	39,865	4,412	5	11.1	0
2	Lakhisarai (M)	77,875	8,779	19	11.3	0
	District(Urban) Total	**117,740**	**13,191**	**24**	**11.2**	**0**

\+ To be arranged in alphabetical order

Table 18 above shows that there is no urban agglomeration in Lakhisarai district. There are only two statutory town in the district i.e. Barahiya (M) and Lakhisarai (M). The percentage of Scheduled Castes population to total population in Barahiya (M) is 11.1. The percentage of Scheduled Tribes population in Barahiya (M) is almost negligible as has been observed in the above table. The percentage of Scheduled Castes population to total population in Lakhisarai (M) is 11.3 and the percentage of Scheduled Tribes population is almost negligible as observed in the above table.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Barahiya	904	0
2	Pipariya	946	0
3	Surajgarha	915	942
4	Lakhisarai	919	917
5	Ramgarh Chowk	980	0
6	Halsi	945	533
	District (Rural) Total:	**929**	**935**

Table 19 shows that the sex ratio of Scheduled Castes varies from 980 in Ramgarh Chowk C.D. Block to 904 in Barahiya C.D. Block. The sex ratio figures of Barahiya(904), Surajgarha(915) and Lakhisarai(919) C.D. Blocks are lower than the district average (929).

The sex ratio of Scheduled Tribes varies from 942 in Surajgarha C.D. Block to 533 in Halsi C.D. Block. The sex ratio of Lakhisarai C.D. Block is 917. The sex ratio figures of Scheduled Tribes in Barahiya, Pipariya and Ramgarh Chowk C.D. Blocks are nil because these C.D. Blocks have no STs population. Lakhisarai and Halsi C.D. Blocks have sex ratios below the district average. It is worthwhile to mention that Scheduled Tribes population in the district is negligible.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town+	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Barahiya (M)	819	667
2	Lakhisarai (M)	916	357
	Sex ratio (Urban) for the district:	**882**	**412**

\+ To be arranged in alphabetical order

There is no urban agglomeration in Lakhisarai district. There are only two statutory towns in the district i.e. Barahiya(M) and Lakhisarai(M). The sex ratio of Scheduled Castes in Barahiya(M) is 819 while the sex ratio of Scheduled Castes in Lakhisarai(M) is 916 while the sex ratio of Scheduled Tribes is only 357 in Lakhisarai which is very adverse.

Among C.D. Blocks, Pipariya has the highest proportion of literate population (54.7%) followed by Barahiya (51.9%). The literacy rates for Surajgarha Halsi, Ramgarh Chowk and Lakhisarai C.D. Blocks are 51.1, 42.6, 42.1 and 46.0 percent respectively. Male literates outnumber female literates in all the C.D. Blocks of Lakhisarai district. The highest proportion of male literates is contained in Pipariya C.D. Block with 65.8 percent closely followed by Surajgarha, Barahiya, Lakhisarai, Ramgarh Chowk and Halsi C.D. Blocks are 63.5, 63.2, 59.2, 55.2 and 57.5 percent respectively. Pipariya C.D. Block has the highest female literacy rate with 42.2 percent while Halsi has the lowest literacy rate of females with 26.8 per cent. Male literacy rates for Halsi, Ramgarh Chowk and Lakhisarai C.D. Blocks are lower than the corresponding figures of Lakhisarai district. Surajgarha, Pipariya and Barahiya C.D. Blocks have the higher female literacy rates than the district average.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

6	Halsi	30,076	20,950	9,126	60,724	25,831	34,893	42.6	57.4	26.8	30.7
	District (Rural)										
	Total:	**245,014**	**164,586**	**80,428**	**439,471**	**190,555**	**248,916**	**45.6**	**58.8**	**31.2**	**27.6**

Table 22 shows that among the C.D. Blocks in the district Pipariya C.D. Block has the highest proportion of literate population (54.7%) followed by Surajgarha C.D. Block (51.1%). The literacy rates for Barahiya, Halsi, Ramgarh Chowk and Lakhisarai C.D. Blocks are 46.5, 42.6, 42.1 and 39.7 percent respectively. Male literates out number female literates in all the C.D. Blocks of Lakhisarai district. The highest proportion of male literates is in Pipariya C.D. Block with 65.8 percent closely followed by Surajgarha, Barahiya, Halsi, Ramgarh Chowk and Lakhisarai C.D. Blocks are 63.5, 59.0, 57.4, 52.2 and 53.9 percent respectively. Pipariya C.D. Block has the highest female literacy rate with 42.2 percent while Lakhisarai C.D. Block has the lowest literacy rate among the females with 24.0 percent. Male

literacy rates for Halsi, Ramgarh Chowk and Lakhisarai C.D. Blocks are lower than the corresponding figures of Lakhisarai district. Surajgarha, Pipariya and Barahiya C.D. Blocks have the higher female literacy rates than the district average.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	4	1.1	699	0.1
1-10	7	2.0	1,938	0.3
11-20	16	4.5	11,386	1.7
21-30	49	13.7	72,163	10.5
31-40	83	23.2	154,728	22.6
41-50	91	25.5	203,281	29.7
51-60	57	16.0	152,222	22.2
61-70	38	10.6	78,280	11.4
71-80	8	2.2	7,312	1.1
81-90	4	1.1	2,476	0.4
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**357**	**100.0**	**684,485**	**100.0**
Literacy rate for District:		**48.0**		

The above table shows that in 25.5 percent of the inhabited villages, literacy rate ranges between 41 and 50 percent. In these 91 villages, 29.7 percent of the district rural population live. This is the largest group of villages in the district. This is closely followed by 83 villages with 22.6 percent of the district rural population and 23.2 percent of the inhabited villages are such where literacy rate ranges between 31 and 40 percent. 16.0 percent of the inhabited villages i.e. 57 villages are such where literacy rate ranges between 51 and 60 percent. These villages account for 22.2 percent of the district rural population. 10.6 percent of the inhabited villages i.e. 38 villages are such where literacy rate ranges between 61 and 70 percent and these villages account for 11.4 percent of the district rural population. 13.7 percent of the inhabited villages i.e. 49 villages are such where literacy rate ranges between 21 and 30 percent. These villages account for 10.5 percent of the district rural population. There are only 16 villages accounting for 4.5 percent of the inhabited villages and these villages account for only 1.7 percent of the district rural population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status of UA/ Town+	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

\+ To be arranged in alphabetical order

From the table 24 it is clear that there is no urban agglomeration in Lakhisarai district. There are only two statutory town in the district i.e. for Barahiya (M) and Lakhisarai(M) literacy rate is 62.6 and 60.3 percent respectively. Male literates greatly out number female literates as the male literacy rate for Barahiya (M) is 71.3 percent while the female literacy rate is only 52.8 percent. The literacy rate for Lakhisarai (M) is 60.3 percent. Male literates greatly out number female literates as the male literacy rate for Lakhisarai (M) is 71 percent while the female literacy rate is only 48 percent.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial		Number of literates and illiterates						Percentage of literates			Gap in male-female
		Number of literates			Number of illiterates

	District (Rural)										
	Total:	**22,530**	**16,756**	**5,774**	**90,854**	**42,017**	**48,837**	**25.8**	**36.8**	**13.8**	**23.0**

The table above shows that the literacy rate among the Scheduled Castes is highest i.e. 32.5 percent in Surajgarha C.D. Block where as it is lowest i.e. 17.3 percent in Ramgarh Chowk C.D. Block in the district. It is observed that the literay rate of the district is 25.8 percent only. As regards percentage of male literacy rate among the Scheduled Castes it is highest i.e. 44.7 percent in Pipariya C.D. Block where as it is lowest i.e. 25.6 percent in Ramgarh Chowk C.D. Block. In case of female literacy rate among the Scheduled Castes it is highest i.e. 19.5 percent in Surajgarha C.D. Block and the lowest i.e. 8.8 percent in Ramgarh Chowk C.D. Block. It is found that the gap between male and female literacy rate is highest i.e. 29.3 percent in Pipariya C.D. Block where as it is lowest i.e. 16.8 percent in Ramgarh Chowk C.D. Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	13	4.0	991	0.9
1-10	45	14.0	13,240	11.7
11-20	71	22.0	29,854	26.3

	District (Rural) Total:	**544**	**447**	**97**	**5,068**	**2,454**	**2,614**	**12.6**	**19.8**	**4.7**	**15.0**

The table 28 above shows that among the Scheduled Tribes the percentage of literates is highest i.e. 27.8 percent in Halsi C.D. Block where as it is lowest i.e. 10.6 percent in Surajgarha C.D. Block in the district. It is observed that the literacy rate among the Scheduled Tribes for the district is 12.6 percent only. As regards percentage of male literacy rate among the Scheduled Tribes it is highest i.e. 36.4 percent in Halsi C.D. Block where as it is lowest i.e. 17.1 percent in Surajgarha C.D. Block. In case of female literacy rate among the Scheduled Tribes it is highest i.e. 14.3 percent in Halsi C.D. Block where as it is lowest i.e. only 3.6 in Surajgarha C.D. Block.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	4	14.8	333	5.9
1-10	7	25.9	3,263	58.1
11-20	4	14.8	954	17.0
21-30	4	14.8	927	16.5
31-40	1	3.7	3	0.1
41-50	0	0.0	0	0.0
51-60	0	0.0	0	0.0
61-70	0	0.0	0	0.0
71-80	1	3.7	42	0.7
81-90	0	0.0	0	0.0
91-99	2	7.4	82	1.5
100	4	14.8	8	0.1
District Total:	**27**	**100.0**	**5,612**	**100.0**
Literacy rate for District (Rural):		**12.6**		

The table above shows that in case of literacy among the Scheduled Tribes in the villages of the district the highest number of villages i.e. 25.9 percent fall in the literacy range of 1-10 percent where as the lowest number of villages i.e. 3.7 percent fall in the literacy range i.e. 31-40 and 71-80 percent. 4 villages i.e. 14.8 percent fall in the literacy range i.e. 11-20, 21-30, 100 and 0 percent (no literacy). Only 7.4 percent villages fall in the literacy range of 91-99 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

The work participation rate for total worker is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. For Lakhisarai district the work participation rate (WPR) recorded 28.2 percent of the district total population as main workers and 8.3 percent as marginal workers. Proportion of non workers in the district is 63.5 percent.

Among the main workers male work participation rate in the district is 42.2 percent while that of females is only 12.9 percent as per 2001 Census. The proportion of main workers is the highest (32.0 %) in Halsi C.D. Block and the lowest (25.0 %) in Barhiya C.D. Block. Out of 6 C.D. Blocks, WPR of 2 C.D. Blocks are above the district average. The proportion of marginal workers is the highest (10.4%) in Barhiya C.D. Block and the lowest (5.2%) in Ramgarh Chowk C.D. Blcck. The proportion of total workers is the highest (39.8%) in Halsi C.D. Block and the lowest (34.7%) in Pipariya C.D. Block.

Among the non workers, male work participation rate in the district is 51.4 percent while that of females is 76.7 percent as per 2001 Census. The proportion of non workers is the highest (65.3%) in Pipariya C.D. Block and the lowest (60.2 %) in Halsi C.D. Block.

The work participation rater for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 32 shows that the work participation rate (WPR) in the Lakhisarai district is 28.8 percent as main workers and 8.5 percent as marginal workers. Proportion of non-workers in the district rural is 62.6 percent.

Among the main workers male work participation rate in the district rural is 42.7 percent while that of females is only 13.9 percent as per 2001 census. The proportion of main workers is the highest (32%) in Halsi C.D. Block and the lowest (26.3%) in Barahiya C.D. Block. Out of 6 C.D. Blocks, WPR of three C.D. Blocks are above the district rural average. The proportion of marginal workers is the highest (11.3%) in Lakhisarai C.D. Block and the lowest (5.2%) in Ramgarh Chowk C.D. Block. The proportion of total workers is the highest (40.6%) in Lakhisarai C.D. Block and the lowest (34.7%) in Pipariya C.D. Block.

The proportion of non-workers among males in the district is 51.1 percent while that of females is 75.1 percent as per 2001 census. The proportion of non-workers is the highest (65.3%) in Pipariya C.D. Block and the lowest (59.4%) in Lakhisarai C.D. Block.

\+ To be arranged in alphabetical order

There is no urban agglomeration in Lakhisarai district. The urban units in the district are Barahiya(M) and Lakhisarai(M). The work participation rate for total workers is defined as the percentage of total workers, to total population. In a similar way it is defined for main and marginal workers. For Barahiya(M) and Lakhisarai(M) the work participation rates (WPR) recorded are 22.5 and 25.7 percent respectively of the total population of the towns as main workers and 12.4 and 3.9 percent respectively as marginal workers. The proportion of non-workers in the towns of Barahiya(M) and Lakhisarai(M) are 65.1 and 70.5 percent respectively. The proportion of male and female main workers are 36.7 percent and 6.4 percent respectively for Barahiya(M). The proportion of male and female main workers of Lakhisarai(M) are 41.2 and 8.0 percent respectively. The proportion of marginal workers among males is 13.6 percent and that of for females is 11.1 percent in Barahiya(M) and 4.4 and 3.2 percent respectively in Lakhisarai(M). The proportion of male and female non-workers are 49.8 percent and 82.4 percent respectively in Barahiya(M) and 54.4 and 88.7 percent respectively in Lakhisarai(M).

Note: Percentage of Workers to total workers are given in brackets

From the Table 34, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four-fold classification namely, cultivators, agricultural labourers, household industry and other economic activities. The economic activity of the district is primarily dependent on agriculture which is supported by the fact that cultivators (32.3%) and agricultural labourers (43.6%) together constitute 75.9 percent of the total workers of the district. The agriculture sector has absorbed about three-fourth of the total main workers. The proportion of cultivators varies between 46.8 percent for Halsi C.D. Block to 25.9 percent for Barahiya C.D. Block. The proportion of agricultural labourers varies between 52.1 percent for Barahiya C.D. Block to 39.2 percent for Lakhisarai C.D. Block. The proportion of household industry workers is only 2.9 percent of the total workers of the district. The proportion of household industry workers varies between 3.7 percent for Lakhisarai C.D. Block to 1.2 percent for Halsi C.D. Block. The proportion of other workers varies between 27.3 percent for Lakhisarai C.D. Block to 6.5 percent for Halsi C.D. Block.

Table 35 deals with the same topic as Table 34, the only difference being that it deals with the rural areas of the district and its C.D. Blocks.

				(13.4)	**(6.8)**	**(54.1)**	**(10.8)**	**(28.2)**

Note: Percentage of Workers to total workers are given in brackets

There is no urban agglomeration in Lakhisarai district. There are two statutory towns in the district i.e. Barahiya(M) and Lakhisarai(M). From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other economic activities. The cultivators constitute 20.7 percent and agricultural labourers constitute 43.5 percent of the total workers of Barahiya(M). The cultivators constitute 7.5 percent and agricultural labourers constitute 17.8 percent of the total population of Lakhisarai(M). The proportion of male and female

cultivators are 26.2 and 3.2 percent respectively in Barahiya(M) and the proportion of male and female cultivators are 7.0 and 9.8 percent respectively in Lakhisarai(M). The proportion of male and female agricultural labourers in Barahiya (M) are 35.1 and 70.5 percent respectively and in Lakhisarai (M) the male and female agricultural labourers are 12.7 and 41.0 percent respectively. Household industry workers constitute 5.2 percent of the total workers of Barahiya (M) and 7.4 percent in Lakhisarai(M). Other workers constitute 30.6 percent of the total workers in Barahiya (M) and 67.4 percent in Lakhisarai (M). The proportion of male and female other workers are 34.7 and 17.1 percent respectively in Barahiya(M) and 74.0 and 37.0 percent respectively in Lakhisarai (M).

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table 37 gives the distribution of villages according to availability of different amenities in the district.

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational facility :– There are as many as 310 villages accounting for 86.8 percent of the total inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in the development block of Ramgarh Chowk with 96.8 percent while

Surarjgarha C.D. Block has the lowest proportion of villages with 77.7 percent.

Medical facility :– The availability of medical amenity in the villages is low and only 26.9 percent villages have got it. Among the C.D. Blocks, Ramgarh Chowk has the largest proportion of villages with medical facility, the percentage being 51.6 percent, Lakhisarai C.D. Block, on the other hand, has the smallest proportion of villages (15.7%) where medical amenity is available.

Improved drinking water :– There are as many as 345 villages accounting for 96.6 percent of the inhabited villages in the district where improved drinking water facility is available. Among C.D. Blocks, Barahiya, Pipariya and Halsi have the highest proportion of villages with 100.00 percent. Lakhisarai C.D. Block, on the other hand, has the lowest proportion of villages (92.6%) where improved drinking water facility is available.

Post office :– Postal facilities are available in 75(21.0%) villages out of 357 inhabited villages in the district. Ramgarh Chowk C.D. Block has the maximum number of villages having postal facility (32.3%). Surajgarha C.D. Block has the minimum number of villages having postal facility (14.3%).

Telephone :– The availabity of telephone facility in the villages is low and only 24.1 percent have got it. Among the C.D. Blocks, Lakhisarai C.D. Block has the maximum number of villages having telephone facility (29.6%).Halsi C.D. Block has the minimum number of villages having telephone facility (14.5%).

Transport Communication :– Transport Communication facilities are available in 63(17.6%) villages out of 357 inhabited villages in the district. Pipariya C.D. Block has the highest proportion of villages (35.7%) which are connected by bus, rail or navigable river/canal services. Surajgarha C.D. Block has the minimum number of villages having transport communication facilities (12.5%).

Bank :– Banking facility is available only in 31 (8.7%) villages out of 357 inhabited villages in the district. Among C.D. Blocks, Ramgarh Chowk C.D. Block has the maximum number of villages having banking facility (16.1%). Villages of Pipariya C.D. Block have got no banking facility.

Agricultural credit societies :– Agricultural credit societies are available only in 40(11.2%) villages out of 357 inhabited villages in the district. Among C.D. Blocks, Ramgarh Chowk C.D. Block has the maximum number of villages having agricultural credit societies (32.3%) while the villages of Pipariya C.D. Block has the minimum number of villages having agricultural credit societies (7.1%).

Approach by pucca road :– This facility is available in 125(35.0%) villages out of 357 inhabited villages in the district. Surajgarha C.D. Block has the maximum number of villages having pucca road approach (51.8%) while Pipariya C.D. Block has the minimum number of villages having pucca road approach (7.1%).

Power Supply :– Electrified villages in the district constitute 32.5 percent of the total number of inhabited villages. Among the C.D. Blocks, Surajgarha C.D. Block has the maximum number of electrified villages with 65.2 percent while the villages of Pipariya C.D. Block do not have electrification.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from the above that educational facility is available to 95.5 percent of the rural population of the district. The proportion varies between the maximum of 99.8 percent in Ramgarh Chowk block and the minimum of 91.4 percent in surajgarha block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 86.8 percent vide table 37) than the proportion of population which is 95.5 percent. This may be attributed to fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by this amenity is of the order of 43.3 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 98.1 percent which is more than the proportion of villages served by this facility in the district.

In the case of post office also it may be seen that the proportion of rural population served by the amenity is of the order of 37.7 percent which is more than the proportion of villages served by this amenity in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various development blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	46	1	2	49
(b) Middle School	185	38	9	232
(c) Degree College	60	99	196	355
2. Medical:-				
(a) Hospital	70	99	176	345
(b) PHC	83	119	143	345
3. Post Office	224	43	18	285
4. Telephone	84	72	115	271
5. Bus Service	102	104	118	324
6. Banks				
(a) Commercial Bank	138	118	74	330
(b) Co-operative Bank	83	121	146	350
7. Agricultural Credit Societies	78	85	154	317

As regards educational facility it would be seen from the above table that there are 49 villages in the district which do not have any primary school but the facility is available within 5kms. for 46 villages, in the range of 5-10 kms. for one village and in the range of 10+ kms for 2 villages.

There are as many as 232 villages in the district (65.0%) which do not have middle schools. Out of 232 villages, 185 villages have this facility at places situated within 5 kms, 38 villages have this facility at a distance range of 5-10 kms and only 9 villages at places beyond 10 kms. There are 355 villages in the district (99.4%) which are deprived of colleges. Out of 355 villages, 60 villages enjoy this facility, at places situated within 5 kms, 99 villages enjoy this facility at a distance range of 5-10 kms and as many as 196 villages enjoying this facility at places beyond 10 kms.

Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited village in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road

	(100.0)	**(86.8)**	**(26.9)**	**(21.0)**	**(24.1)**	**(17.6)**	**(8.7)**	**(11.2)**	**(35.0)**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

From the above table it is observed that maximum number of inhabited villages (50.4%) lie in the distance range of 5-15 kms from the nearest statutory town. This is followed by villages in the distance range of 16-50 kms from the nearest statutory towns with 47.1 percent. 9 villages i.e. 2.5 percent lie in the distance range of less than 5 kms from the nearest statutory town. None of the villages is found to be in the distance range of more than 51 kms.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 100 percent for those situated in the distance range of less than 5 kms from the nearest town and decreases to 90 percent in the distance range of 5-15 kms. Thereafter it again decreases to 82.7 percent in the distance range of 16-50 kms. In the case of other amenities also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited village in each range	Type of amenity available									
		Education	Medical	Improved drinking water *	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road	Power supply

District total	**357**	**310**	**96**	**345**	**75**	**86**	**63**	**31**	**40**	**125**	**116**
	(100.0)	**(86.8)**	**(26.9)**	**(96.6)**	**(21.0)**	**(24.1)**	**(17.6)**	**(8.7)**	**(11.2)**	**(35.0)**	**(32.5)**

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It can be seen from the table no. 41 that the maximum number of villages i.e. 112 (31.4%) in the district fall in the population range of 1000-1999 followed by 93 villages (26.01%) having a population range of 2000-4,999. The lowest number of villages is observed in the population range of 10,000+ being only 3 (0.8%).

The proportion of villages having different amenities varies in direct relation to their population range. Generally the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10,000+ which further corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Barahiya	37	20,593	74.4	20.2
2	Pipariya	14	4,665	91.4	31.4
3	Surajgarha	112	34,624	60.0	42.5
4	Lakhisarai	108	24,376	75.3	59.5
5	Ramgarh Chowk	31	10,314	85.1	84.2
6	Halsi	55	14,740	82.1	86.2
	District Total:	**357**	**109,312**	**72.8**	**52.8**

Note : Cultivable area = irrigated area + unirrigated area

Table 42 above gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It would be seen from the table that 72.8 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 52.8 percent area is found to be irrigated. Among the C.D. Blocks the highest percentage of cultivable area is found in Pipariya C.D. Block with 91.4 percent closely followed by Ramgarh Chowk and Halsi C.D. Blocks with 85.1 and 82.1 percent respectively. The lowest cultivable area is found in Surajgarha C.D. Block which is 60.0 percent.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

		Per capita receipt			Per capita expenditure					
				From all		Public health				
Serial number	Class,name &urban status of the town	Total	Through taxes	other sources	Total	General administration	and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Barahiya (M)	2.6	0.3	2.3	1.9	1.1	0.2	0.5	0	0.1
2	II Lakhisarai (M)	2.9	0.2	2.7	3.2	1.9	0.1	0.1	0	1.1
	District Total	**2.8**	**0.3**	**2.5**	**2.7**	**1.7**	**0.1**	**0.2**	**0**	**0.7**

The above table 43 gives the details of finances in the statutory towns in terms of per capita receipt and expenditure. There are only two statutory towns in the district i.e. Barahiya(M) and Lakhisarai(M). On going into the details of receipt under different heads it can be seen in Barahiya(M) that the per capita receipt from all other sources is higher than the per capita receipt through taxes. The per capita expenditure incurred on general administration is higher than the per capita expenditure on public works and the public

health and conveniences. In Lakhisarai (M) the per capita receipt from all other sources is higher than the per capita receipt through taxes. The per capita expenditure incurred on general administration is higher than the per capita expenditure on public works and the public health and conveniences.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Barahiya (M)	6.3	2.0	1.3	0.0	1.0
2	Lakhisarai (M)	0.9	1.2	0.8	0.1	0.3
	District Total	**2.7**	**1.4**	**0.9**	**0.1**	**0.5**

The above table gives the details of different categories of educational institution per ten thousand population in the towns of the district. It would be seen from the above table that institutions like secondary/matriculation level school and college are situated in Barahiya (M) accounting for an average of 1.3 and 1.0 institution per ten thousand population respectively. In Lakhisarai (M), Secondary/ Matriculation level school and college account for an average of 0.8 and 0.3 institution per ten thousand population respectively. Primary School and middle school account for an average of 6.3 and 2.0 in Barahiya (M) respectively and 0.9 and 1.2 in Lakhisarai (M) respectively.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Barahiya(M)	4
2	Lakhisarai(M)	19
	District Total	**14**

The above table furnishes information regarding availability of beds in medical institutions in Barahiya(M) and Lakhisarai(M).

The number of beds in medical institutions per ten thousand population for Barahiya(M) works out to be 4 and in Lakhisarai(M) it works out to be 19.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Barahiya	39,865	17,307	43.4
2	Lakhisarai	77,875	25,017	32.1
	District Total	**117,740**	**42,324**	**35.9**

The above table gives the details of proportion of slum population to total population in the towns of the district. There are two statutory towns in the district. The percentages of slum population to total population in Barahiya(M) and Lakhisarai(M) are 43.4 and 32.1 percent respectively.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Barahiya (M)	Pulse Mustard Oil Sweets	Pulse Khowa Gram
2	Lakhisarai (M)	Colour Vermillion Abir	Colour Vermillion Abir

Table 47 presents the most important commodities manufactured in the town and exported from the towns of the district would be seen from the above table that in case of Barahiya (M) three items viz., Pulse, Mustard oil and Sweets are manufactured in the town and three items viz., Pulse, Khoba and Gram are exported from town. In case of Lakhisarai (M) three items viz., Colour, Veruilin and Abir are manufactured in the town and the same three items are exported from the town.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It would be clear from the above table that there are as many as 127,877 households accounting for 96.6 percent of the total households of the district who are dwelling in owned houses. The proportion of households is the highest (40.2%) who is occupying only single room and the proportion of households is the lowest (0.7%) who is occupying no exclusive room. The median number of rooms is 2 for the total households in the tenure status of owned category. There are 24,763 scheduled castes households accounting for 18.7 percent of the total households who are dwelling in owned houses. The median number of rooms is 1. There are 1199 scheduled tribes households accounting for only 0.9 percent of the total households who are dwelling in owned houses. The median number of rooms is 1. There are 3,213 households accounting for 2.4 percent of the total households of the district who are dwelling in rented houses. The proportion of households is the highest (46.1%) who is occupying only single room and the

proportion of households is the lowest (1.6%) who is occupying no exclusive room. The median number of rooms is 2.

There are 313 scheduled castes households accounting for 9.7 percent of the total households who are dewelling in rented houses. The median number of rooms is 1. There are 54 scheduled tribes households accounting for 1.7 percent of the total households who are dwelling in rented houses. The median number of rooms is 2.

Similar trend can be observed in respect of households who are dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Barahiya	53.7	29.4	16.8	46.7	33.2	20.0	72.2	19.4	8.4
2	Pipariya	56.7	35.1	8.1	56.7	35.1	8.1	0.0	0.0	0.0
3	Surajgarha	58.9	28.8	12.3	58.9	28.8	12.3	0.0	0.0	0.0
4	Lakhisarai	47.5	38.4	14.0	37.4	45.4	17.2	72.0	21.7	6.3
5	Ramgarh Chowk	37.1	45.0	17.9	37.1	45.0	17.9	0.0	0.0	0.0
6	Halsi	38.1	34.5	27.4	38.1	34.5	27.4	0.0	0.0	0.0
	District Total:	**50.2**	**34.3**	**15.5**	**46.7**	**36.4**	**16.9**	**72.0**	**21.0**	**7.0**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roof are made of pucca materials i.e. where burnt bricks' G.I. Sheets or other metal sheets, stone, cement, concrete is used for wall and tiles, slate, shingle, corrugated iron, zinc or other metal sheets, asbestos sheets, bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roof made of Kutcha materials i.e. where grass, leaves, reeds, bamboo, mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the above table that the maximum proportion of households having permanent houses constitute 46.7 percent of the rural households in the district followed by 36.4 percent having semi-permanent houses and 16.9 percent having temporary houses.

In the case of urban households in the district, however, the maximum proportion of urban households accounting for 72.0 percent live in permanent houses followed by 21.0 percent in semi permanent houses and 7.0 percent having temporary houses.

Among C.D. Blocks, Surajgarha C.D. Block has the maximum proportion of rural households living in permanent houses (58.9%) followed by Pipariya C.D. Block 56.7% and Barahiya C.D. Block (46.7%). Ramgarh Chowk C.D. Block has the minimum proportion of rural households living in permanent houses with 37.1 percent.

In the case of Semi permanent houses, Lakhisarai C.D. Block has the maximum proportion of rural households living in Semi permanent houses (45.4%) followed by Ramgarh Chowk (45.0%). Surajgarha C.D. Block has the minimum proportion of rural households living in Semi permanent houses with 28.8 percent.

In the case of Temporary houses, Halsi C.D. Block has the highest proportion of rural households (27.4%) followed by Barahiya C.D. Block with 20.0 percent. Pipariya C.D. Block has the lowest proportion of rural households living in Temporary houses with 8.1 percent.

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.
*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

There are as many as 54,034 households accounting for 47.3 percent of the rural households of the district who have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Halsi C.D. Block with 65.7 percent and the lowest proportion of households is in Surajgarha C.D. Block with 24.8 percent. There are 8930 households accounting for 7.8 percent of the rural households of the district who have electricity. The highest proportion of households with electricity is in Surajgarha C.D. Block with 12.0 percent and the lowest proportion of households is in the development block of Halsi with 1.8 percent.

There are 7833 households accounting for 6.9 percent of the rural households of the district who have the facility of bathroom. The highest proportion of households having bathroom facility is in Surajgarha C.D. Block with 8.6 percent and the lowest proportion of households having bathroom facility is in Halsi C.D. Block with 4.0 percent.

There are 19384 households accounting for 17.0 percent of the rural households of the district who avail of toilet facility. Among C.D. Blocks, Pipariya has the highest proportion of households having toilet facility (21.3%) and Halsi C.D. Block has the lowest proportion of households having toilet facility (13.0%).

As regards drainage facility, there are as many as 50740 households accounting for 44.4 percent of the rural households of the district who have drainage facility. Among C.D. Blocks, Ramgarh Chowk has the highest proportion of households having drainage facility (68.7%) and Surajgarha has the lowest proportion of households having drainage facility (31.2%).

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It would be seen from the above table that there are 22,986 households accounting for 20.1 percent of the rural households of the district who are using firewood as fuel for cooking. The highest proportion of households can be observed in Surajgarha C.D. Block (35.0%) while the lowest proportion of households is in Halsi C.D.Block with 2.1 percent.

There are as many as 26,738 households accounting for 23.4 percent of the rural households of the district who are using crop residue as fuel for cooking. Among the C.D. Blocks, the proportion of households is the highest (40.5%) in Ramgarh Chowk and the lowest (13.5%) in Surajgarha C.D.Block.

There are 60,339 households accounting for 52.8 percent of the rural households of the district who are using cowdung cake as fuel for cooking. Among the C.D. Blocks, Pipariya has the highest proportion of households (68.3%) using cowdung cake as fuel for cooking and Surajgarha has the lowest proportion of households using cowdung cake as fuel with 48.6 percent.

In the case of electricity there only 103 households accounting for only 0.1 percent of the rural households of the district. In the case of coal/lignite there are 1640 households accounting for 1.4 percent of the rural households of the district. In the case of cooking gas (L.P.G.) there are 993 households accounting for 0.9 percent of the rural households of the district who are using cooking gas as fuel for cooking. In the case of urban households the situation is different. There are as many as 2,404 households accounting for 13.3 percent of the urban households of the district who are using cooking gas as fuel for cooking.

	District										
	Total:	**Total**	**132,356**	**35,649**	**31,069**	**10,352**	**2,564**	**25,402**	**2,074**	**814**	**87,536**
		Rural	**114,303**	**28,807**	**26,058**	**6,506**	**1,413**	**22,042**	**1,483**	**579**	**77,158**
		Urban	**18,053**	**6,842**	**5,011**	**3,846**	**1,151**	**3,360**	**591**	**235**	**10,378**

It would be seen from the above table that 28807 households accounting for 25.2 percent of the rural households of the district who are availing of the banking services. The highest proportion of households can be observed in Surajgarha C.D. Block (35.4%) who is availing of banking services and the lowest proportion of households in Ramgarh Chowk C.D. Block (15.8%).

There are as many as 26058 households accounting for 22.8 percent of the rural households who are possessing radios, transistors. Among the C.D. Blocks, Pipariya has the highest proportion of households (24.8%) possessing radio, transistor and Lakhisarai has the lowest proportion of households with 20.9 percent.

As regards television there are 6,506 households accounting for 5.7 percent households of the rural households of the district who are possessing televisions. Among the C.D. Blocks, Surajgarha has the highest proportion of households (9.4%) possessing television and Ramgarh Chowk has the lowest proportion of households with 2.4 percent. As regards telephone there are 1,413 households accounting for 1.2 percent of the rural households of the district who are availing telephone services. Among C.D. Blocks, Surajgarha has the highest proportion of households (2.0%) availing telephone services and Pipariya has the lowest proportion of households with 0.7 percent.

Similar trend can be observed in respect of other specified asset also both in the district as also in its development blocks.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

The district of Lakhisarai, which till the 1991 Census was a part of Munger district as one of its sub-divisions, was elevated to the status of a district on 3rd July, 1994 by the Government of Bihar vide its Notification No. 16/जि0पु02-202/93 का0 123. The district is situated in Central Bihar surrounded by Munger on the east, Patna and Nawada on the west, Jumui in the south and Begusarai in the north. There is only one subdivision viz., Lakhisarai in the district. The headquarters of the district and the subdivision is Lakhisarai. Threre are six Community Development Blocks viz., Barahiya, Piparia, Suryagarha, Lakhisarai, Ramgarh Chock and Halsi in the district. Barahiya and Lakhisarai are the two Municipal Towns in the district. The district had got 472 villages.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Shringirishi Ashram

The most ancient and holy place with natural scenic beauty is the place called Shringirishi Ashram. It is in the Vindhyan range and is 20 kms. from district headquarters. It is said to have been the abode of the great sage Sringirishi who performed the Putrayesthi Yagnya for the King Dashrath. The King gave his adopted daughter Shanta to the Rishi.; There is a temple of Lord Mahadeo at this place. This place presents a picturesque natural scene. It is situated near a big reservoir and is surrounded by forests.

Ashok Dham or Indra Damaneshwar Mahadeo

It has been proved from scriptures like Padma-Puran that Lord Rama crossed to the Southern side of the Ganga on his way to Shringirishi and performed Pooja of Lord Shiva named as Shri Indra Damaneshwar Mahadeo at Ashok Dham. From historical records it has been established that Lord Buddha resided here for one full year for this discourses on Niravana. By this time, Ashok Dham had become a very important religious place of Hindus. In the 2nd century A.D. a large temple was built by the Vakatak King Prasenjeet. With Bauddha ascendancy to political power this temple was transformed into a Chaitya. During the Pal period in the 12th century its ruler Dharmapal reconstructed the temple. The Muslims under the leadership of Bakhtiar Khiljee destroyed the temple for the second time.

In 1977 the remains of the temple and one of the largest Shivlingas was found here by a boy 'Ashok'. The Archelogy Department of the Govt. of India did some excavation work and found that the Shivalinga gaoes to a depth of more than 24ft. The foundation of the temple was also found. Now a huge Mandir Complex is being developed.

Jalappa Asthan

It is situated near about 4 km. from Dhanauri Station in loop line section. It is the abode of Goddess Jalappa who is known as Goddess of milch cattles.

Tripur Bala Sundari Maharani Asthan

It is situated in Barahiya. It is the abode of Goddess Tripur Sundari. The temple is made of the finest white Makrana marble. It is famous as Shakti Peeth.

Jainagar Pahaari

Situated on the Southern part of Lakhisarai town it contains the foundation of the fort of the Pal rulers at the top of a hillock called Jainagar. It is on the main Road of the town.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

This district is mainly agrarian in nature. In its south lies the mountain which are the continuation of Kharagpur Hills range which is the outlying extension of Vindhyan range. Alluvial plain land lies in the eastern side of the district which is very fertile for growing paddy. In this area the whole land is irrigated and is connected by canals which is fed by Upper Kiul Dam. In the western side the topography of the land is basin type as such there is permanent water logging round the year. The Basin shaped land or Taal, as commonly called, is very fertile and is suitable for growing wheat, pulses and other cereals.

Some important events during the freedom struggle, is commonly told by the freedom fighters of this area.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village

in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from

the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in English and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I : Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II : Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III : Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement- IV : Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V : Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI : Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII : Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though

the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area

not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

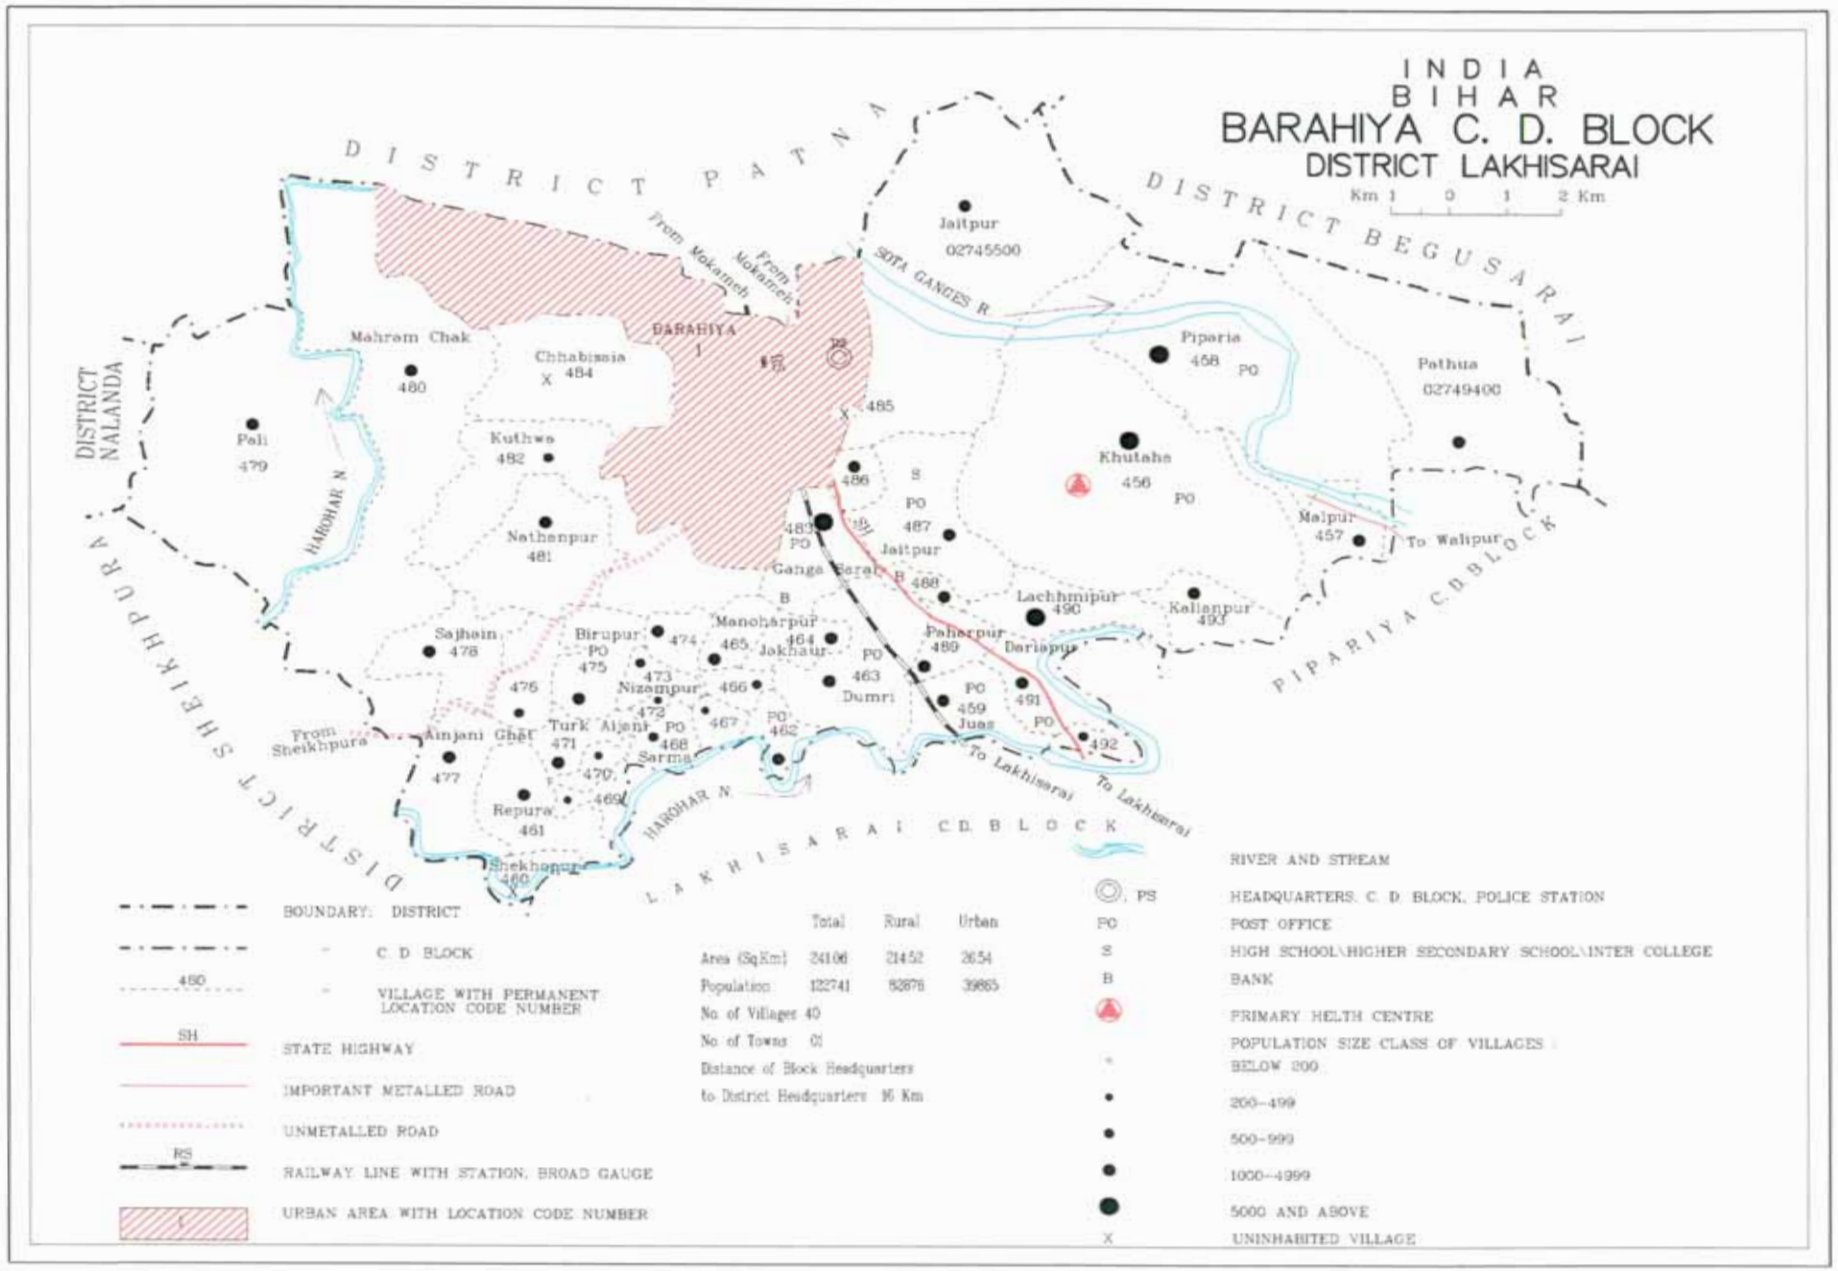

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Serial number	Name of Towns	Name of villages merged in towns	Name of villages identified for outgrowth	Location Code Number 1991 Census	Location Code Number 2001 Census (in case of partly OG)
1	2	3	4	5	6

There is no such village in the district of Lakhisarai.

N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II
ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

		Persons			
State/District	Year	q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Munger	1991	77	82	94	99
	1981	100	120	140	158

Here q(1), q(2), q(3) and q(5) denote estimates of child mortality for the different ages 1, 2, 3 and 5 respectively for the children of the district and the state. It is evident that child mortality for the district (from which the district of Lakhisarai was carved out) for both censuses (1981 & 1991) is in higher-side (except q(2) for 1991 Census) than the state average.

ANNEXURE - III (*Concld.*)

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for all the districts and the state(1991-Census)							
State / District	CBR	TFR	TMFR	GFR	GMFR	Child Woman Ratio	No. of Children ever born per Woman in age group 45-49	Mean age at marriage
1	2	3	4	5	6	7	8	9
Lohardaga	38.5	5.7	6.8	172.0	208.0	67.9	4.6	17.2
Gumla	37.9	5.4	7.2	160.0	211.0	64.0	4.1	17.9
Ranchi	33.9	4.7	6.4	145.0	187.0	60.1	4.0	17.4
Purbi Singhbhum	27.7	3.5	5.0	112.0	147.0	48.6	3.7	17.9
Pashchimi Singhbhum	33.9	4.5	6.5	138.0	192.0	61.0	3.9	18.4
Araria	36.8	5.3	5.9	169.0	190.0	70.0	4.3	16.5
Kishanganj	38.0	5.6	6.9	172.0	221.0	67.7	4.7	17.6

Annexure III shows that the fertility measures (from CBR to GMFR) for 1991 census are higher for Munger district (from which the district of Lakhisarai was carved out) than the state. Also the child woman ratio and number of children ever born per woman in age-group 45-49 are higher in the district of Munger than the state of Bihar. In case of mean age at marriage the district have lower figure than State figure.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

	Born elsewhere in the district of enumeration			Born in other district of Bihar			Born in Bihar

	(68.4)	(62.0)	(69.1)	(22.7)	(27.8)	(22.1)	(91.0)	(89.8)	(91.2)
Lakhisarai	95,385	9,882	85,503	101,739	8,863	92,876	197,124	18,745	178,379
	(47.0)	(50.5)	(46.6)	(50.1)	(45.3)	(50.6)	(97.1)	(95.9)	(97.2)

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(.9)	(1.1)	(100.0)	(100.0)	(100.0)
Lakhisarai	5,846	793	5,053	60	17	43	203,030	19,555	183,475
	(2.9)	(4.1)	(2.8)	(0.0)	(0.1)	(0.0)	(100.0)	(100.0)	(100.0)

The growth of population for any area (be it any district or state) is influenced by the pattern of migration (in-migration as well as out-migration). However, for want of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population,although such impact may not be much in most of the cases.

It is apparent from Annexure IV(A) that out of 19,989,195 migrants in the State as per place of birth the share of Lakhisarai district is 203,030, i.e., 1.0 percent of state total. Female migrants out number the male migrants both in the district and the state. In case of migrants born in Bihar there is wide gap between male and female population in absolute number. With respect to percentage figures of born elsewhere in the district

of enumeration the district percentage (47.0) is less than the state percentage of (68.4).

When we compare the percentage figures of migrants born in other districts of Bihar it is crystal clear that the district percentage (50.1) is higher than the state percentage (22.7).The percentage figures for born in other states and other coutries are lower for the district than the state as per 2001 Census.

ANNEXURE - IV (B)
INTERSTATE MIGRANTS, 2001 CENSUS

Bihar			Lakhisarai		
Place of Birth	Migrants	Percentage to total Migrants	Place of Birth	Migrants	Percentage to total Migrants
1	2	3	1	2	3
Uttar Pradesh	434,051	27.4	Jharkhand	2,692	46.0
Jharkhand	339,297	21.4	West Bengal	1,661	28.4
Assam	133,758	8.5	Assam	521	8.9

Haryana	20,505	1.3			
Andhra Pradesh	18,371	1.2			
Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

Annexure-IV(B) deals with interstate migrants to the district of Lakhisarai and the state of Bihar. The district received only 3.7 per cent of the migrants from outside the state in comparison to total migrants coming to the state. The State of Jharkhand and Uttar Pardesh have been the major contributor as regards immigration, both to the district and the state. In case of Bihar 14 states, namely Uttar Pardesh, Jharkhand, Assam,West Bengal, Nagaland, Chhatisgarh, Gujarat, Uttranchal, J&k, Orissa, Maharashtra, Rajasthan, Haryana and Andhra Pradesh together account for 15.4 lakh (97.2%) of the 15.8 lakh interstate migrants, Uttar Pradesh and Jharkhand states are prominent in contributing 27.4 and 21.4 percent of migrants respectively to the state in 2001 Census. In respect of Lakhisarai, of the total of 5,846 interstate migrants, Jharkhand and West Bengal states contributed 46.0 and 28.4 percent respectively to the district altogather five major states contributed 95.8 percent of the total inter state migrants to Lakhisarai district in 2001 Census.

It is evident from the above Annexure V(A) that Hindus form the bulk of the society both with regard to the district (95.5%) and the state (83.2%) followed by Muslims (16.5% for state and 4.4% for district). Followers of other religions e.g., Christians, Sikhs, Jains, Buddhists, etc., form very small chunk of the society.

Annexure V(B) above shows religion wise distribution of population of 2001 census. Both, for the district and its C.D. Blocks. In various C.D.Blocks, the Hindus and Muslims are the two major religious communities and trends are more or less the same as in case of the district. Pipariya C.D. Block has the highest proportion of Hindus with 99.8 percent whereas Ramgarh Chowk C.D. Block has the highest proportion of Muslims with 8.0 percent. Followers of other religions e.g., Christians, Sikhs, Jains, Buddhists, etc., form very small chunk of the society in all the C.D. Blocks of the district.

It is quite evident from above annexures that Lakhisarai district as well as the state have a relatively higher proportion of never married males and married females. This may be attributed to the fact that women enter into marital knot at comparatively younger ages than males. As against 56.3 percentage of never married males in Bihar state and Lakhisarai district, the coresponding percentages among married females are 47.8 and 48.2.

While analyzing marital status by broad age groups one finds that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than males. However, it is interesting to note that the proportion of married males and females in the age group 10-14 or 0-14 is comparatively less in Sheohar district. It is also found that child marriage is more prevalent in rural areas of the state and the district than urban areas.

It is also significant to note that the proportion of never married females in Lakhisarai district and state as a whole in the age group 15-19 and above is much lower than the never married males. The proportion of divorced or separated males and females is significantly low in Lakhisarai district as also in Bihar state.

Literacy is one of the important demographic characteristics. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the census has already been explained in the beginning of this publication.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 2001census was 47.0. Male literates greatly out numbered female literates as the literacy rate for males, according to 2001 census, was 59.7 while for females the literacy rate was only to the extent of 33.1 percent.

The overall literacy rate for the district of Lakhisarai, according to 2001 census was only 48.0 percent. Male literates in the district accounted for 60.7 percent whereas female literates constituted only 34.0 percent of the total population. The literacy rates

for males and females in Lakhisarai district are higher than the corresponding figures for Bihar state.

Annexures VII(A),VII(B),VII(C) and VII(D) furnish informations regarding absolute number of illiterates in Bihar state and Lakhisarai district as also percentage distribution of literates by different level of education by different age-groups are also provided.

A breakup of literate population by various educational levels of 2001 census shows that 28.4 percent males and 35.8 percent females in the state were literate including below primary but had not attained any specific level of education. 24.9 percent males and 30.6 percent females in the state had crossed the primary standard, 14.6 percent males and 13.2 percent females had passed the middle examination while 32.1 percent males and 20.4 percent females in the State were matriculates and above. The contrast between males and females was significant among matriculates and above as the percentage of female literates who had passed the matriculation and above examination were about 12 percentage points less than literate males population.

According to 2001 census the proportion of literates by different levels of education in Lakhisarai district remained lower upto Below Primary standard, higher in Primary standard, lower in Middle standard and remained higher in Matriculation and above.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Lakhisarai		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Magadhi/Magahi	502,010	62.6
Hindi	14,524,035	17.5	Hindi	211,924	26.4
Magadhi/Magahi	12,132,383	14.6	Urdu	22,789	2.8
Maithili	11,830,684	14.3	Maithili	3,054	0.4
Urdu	9,457,544	11.4	Santali	833	0.1
Surjapuri	928,458	1.1	Mundari	824	0.1
Bengali	442,352	0.5	Bhojpuri	717	0.1
Santali	382,866	0.5	Marwari	584	0.1
Kurukh/Oraon	57,952	0.1	Bengali	462	0.1
Marwari	27,152	0.0	Rajasthani	355	0.0
Total of other mother tongues	12,842,100	15.5	Total of Other Mother Tongues	58,673	7.3
Total Population	**82,998,509**	**100.0**	**Total Population**	**802,225**	**100.0**

Mother tongue, which is medium of expression, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 2001 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

Annexure VIII presents distribution of different mother tongues as returned during the 2001 Census both for Sheohar district and Bihar state.

It can be seen from the above annexure that Magadhi/Magahi language as mother tongue constitutes the major proportion of the population in Lakhisarai district whereas Bhojpuri has been the major mother tongue in the state of Bihar. Magadhi/ Magahi, the main mother tongue of the district was returned by 62.6 percent of the population. The corresponding percentage for the Hindi, the second most prominent mother tongue in Lakhisarai district, is 26.4. Hindi has got the second place in the state with 17.5 percent.
