DISTRICT MAP

GIRIHINDA HILL, SHEIKHPURA

Made of Granite stone the Girihinda Hill is situated 28 kms away from Lakhisarai on Lakhisarai-Gaya railhead. Natural beauty of the place full of hills and green forests attract many tourists in the area. It has got historical importance as well. The legend is that Hidimba, the devil daughter who was married the Bhim and who gave birth the Ghatotakach lived in the hills of Girihinda.

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 Census & 2001 Census 225

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 Census & 2001 Census 227

Annexure VI : Marital status of population as per 1991 Census & 2001 Census 330

Annexure VII : Age, sex and education in the district, 1991 Census & 2001 Census 337

Annexure VIII : Distribution of different mother tongues returned in 2001 Census 341

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including details on all slums instead of ‘notified slums’. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of ‘motif’ highlighting significant characteristic of the district and

analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and wholehearted co-operation, which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

District Highlights – 2001 Census

1. Sheikhpura ranks 36th in terms of population (5,25,502) and 36th in terms of area (689 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Sheikhpura is the 26th densely populated district in the state with 763 persons per sq.km as against the state's 881.
3. Sheikhpura ranks 17th in terms of sex-ratio (918) against the state's 919.
4. There are 53 uninhabited villages (out of 321 total villages) in the district of Sheikhpura.
5. Teus (under Barbigha C.D. Block) is the most populated village (8,069) and Gokhulpur (under Sheikhpura C.D. Block) and Raghunathpur (under Ghat Kusumbha C.D. Block) are the least populated villages (3 each) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 75% of the total workers are engaged in Primary sector.
7. C.D. Block Sheikhpura has the highest number of villages (97) in the district and C.D. Block Ghat Kusumbha has the lowest number of villages (24).
8. Kusmha (under Ghat Kusumbha C.D. Block) has the largest area (1,949 hectare) and Chhotki Milki and Kamta (under Sheikhpura C.D. Block) have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 99.3 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs

Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional C.D. Block/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary

and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 and / or 2001 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The district of Sheikhpura, lies almost on the middle portion of the south Bihar plain. It is adorned with natural beauty, replete with rivers, trees and hillocks. It was mainly carved out of Munger district on the 31st July,1994. It was formed by taking away Sheikhpura sub-division of old Munger district during 1991 Census, adding 24 villages of Lakhisarai district (old Lakhisarai sub-division of old Munger district) and 2 villages of Nalanda district. The district is the western portion of Munger division.

The district and sub-divisional headquarters with same name is located on Gaya-Kiul Railway line. Sheikhpura(M) is the principal town of the district. The district is bound on north side by the district of Nalanda, on south by Nawada and Jamui districts, on east by Lakhisarai district and on west by Nalanda and Nawada districts. The district of Munger was itself carved out

of the district of Bhagalpur around 1812. Till 1994, as aforesaid, the bulk of Sheikhpura district was integral part of the Munger district. During British period Sheikhpura got the status of Big Kotwali and after freedom of India it got the community development block status and in turn got the status of sub-division on the 14th April, 1983 which subsequently acquired district status adding 24 villages of Lakhisarai and 2 villages of Nalanda districts. It is in the Munger division.

The name of the district owes to Sheikhpura village which is an important village in the district. According to Buchanan the village had derived its origin and name from the tomb of Muslim saint named Sayed, who was a Sheikh. Another view supports that the name of the village was Sheshpur (Abode of legendary snake Shesh) which was corrupted as Sheikhpura. But this view cannot be taken seriously. Among the comity of 37 districts of state the district occupies 36th rank with respect to its area and stands at 36th rank with respect to population figure.

Early History

There is no authentic history of Sheikhpura available in any scripted books of records. It may be construed on the basis of recorded history of Munger district (a parent district) and collected knowledge. As per collected knowledge history of Sheikhpura relates to the Mahabharata age.

It is believed that a demon girl Hidimba of the great epic Mahabharata living in the hilly reigion of its eastern stretch entered into wed-lock with valiant Bhima, younger brother of the Pandava king Yudhishthir. Bhima won her as a reward of valour as he defeated and killed demon king Hidimba. By this marriage Bhima had a rare valiant son Ghatotkachh who was killed by *Akaghani*, arrow of Karna during epic war of the Mahabharata. Later on, this hill was came to be known as Girihinda. Hinda part of the Girihinda is corrupted form of the word Hidimba, Girihinda under Sheikhpura municipalities is a place known as such which was previously a village of Sheikhpura C.D., Block is still situated there. During period of the Mahabharata Magadha was ruled by mighty king Jarasandh.

As per available information the district of Sheikhpura formed the eastern portion of Madhyadesh (the mid-land) of the original Aryans settlers. Latter it came under the kingdom of mighty Magadhan empire whereas neighbouring districts were under the kingdom of Anga. During 6th century B.C. the king Brahmadatta of Anga was defeated by Bimbisara of Haranayak dynasty and consequently Anga was annexed to Magadh. For a very long span of time the history of Sheikhpura remained the history of Magadh Janapada.

The earliest written account related to the present district is available in the travel details of Hiuen-Tsang. He visited Sheikhpura district during the reign of Harshavardhana (606 A.D to 647 A.D.). Harshavardhana was known as Uttrapatheshwar or lord paramount of northern India. There is a great dearth of material on the history of North Bihar including Sheikhpura district for the period from the visit of Hiuen Tsang till the rise of Pala dynasty. After the visit of Hiuen-Tsanag there is conspicuous absence of written account of area for centuries to come. The district felt the influence of Pal King Dharam Pal during his stay at Munger. Dharam Pal was son of

Gopala Pal, the founder of Pala dynasty. Nagabhata II, son and successor of Vatsaraja of Pratihara dynasty, advanced eastward and inflicted a crushing defeat on Dharampala near Munger. Pala dynasty was spread over Gaud, Vanga and Magadha. Rahul Sankritayan in 'Budh Charya' has referred that the area lying north of the river Ganga was known as Anguttarap.

Muslim period

Towards the close of the twelfth century when Bakhtiar Khalji conquered Bihar, the district of Sheikhpura passed into the hands of Khaljis, without offering considerable resistance, Lakshamana Sena (1185-1206) of the Sena dynasty was in power when Muhammad Bakhtiar Khalji overran Bihar and Bengal towards the end of the twelfth century. He ransacked and razed to ground the ancient universities of Nalanda and Vikramshila, lying beyond the jurisdiction of present Sheikhpura district. Bakhtiar Khilji was the first Viceroy of Bihar and Bengal under the Turko-Afghan rulers of Delhi. Towards the close of the fourteenth century, virtually the whole of Bihar was annexed to the Kingdom of Jaunpur and remained under it for almost a hundred years. The kingdom of Jaunpur was successfully overran by Hussain Sah of Bengal.

As per Bengal list there is a rock-cut pass at a place called Pachna about 3 miles east of Sheikhpura. According to D.R. Patil it is an artificially cut pas about 100 cubits in length and its excavation is attributed to Sher Shah. Who, it is said, ordered the work to be carried out at the instance of milk-maid who, as story goes, watered the horse of the emperor and offered him milk to drink, when the latter was roaming about the region incognito. He further elaborates that the Bengal list and the District Gazetteer give slightly different versions of the same story, which explains, in a way, the local name of the pass as Goalin-Khand or Milk woman's road or pass.

On his accession to the throne in 1556, Akbar finally subdued the Afghan power and established Mughal authority on a sound footing. He created a separate Subah of Bihar and placed it under Mughal Governor. Sheikhpura belonged to Sarkar of Munger.

For the next two centuries Bihar including Sheikhpura was governed by the Muslim Viceroys of the Mughal Emperors, with their seat at Rajmahal. There was no event of great significance during the next century and a half until the arrival of the Britishers in the country.

British period

The decisive victory of the British in the battle of Buxar in 1764 made them undisputed lord over the lower provinces of Bengal. Finally in Augaust 1765 the Diwani of Bihar, Bengal and Orissa was conferred upon the East India Company. In 1774 a Provincial council was established at Patna which lasted till 1781 when Bihar was made a district under ra Collector and a Judge Magistrate. In 1865 district of Bihar was divided into Patna and Gaya districts. On the 1st of April, 1912, Bihar, Chotanagpur and Orissa were placed under a Lieutenant-Governor-in-council and a new Province came into existence with its capital at Patna. The newly created Province comprised of present states of Bihar, Jharkhand and Orissa. Thus, the district of Sheikhpura alongwith other

parts of Bihar passed under the control of the British. Finally, the history of the district thereafter is the part and parcel of the British rule in India. The British administrators had a comparatively quiet time till the famous movement of 1857.

National Liberation Movement, 1857

It has already been discussed that with the British victory at Buxar in 1764 the district of Sheikhpura alongwith the rest of Bihar passed under the British rule. After establishing their authority the Britishers took steps to strengthen their hold. Initially, their chief interest was in trade. In course of time, however, they emerged as rulers and succeeded in annexing the entire district Many Indian Chiefs and princes were opposed to alien rule. During 1856 Sidhu, Kanhu, Chand and Bhairav of present Santhal Pargana division led a limited revolt against the British which was a precursor of 1857 sepoy uprising. In 1857 nationalist fervour aroused in Indian public entered in the spine of Sheikhpura district as well.

Freedom Movement

During the freedom movement there was not Sheikhpura district as such but forefathers of creator of present district were there. Sheikhpura could have contributed its might through the then Munger district. The part played by Munger in the freedom struggle can be said to be outstanding. The people of the district were receptive to new ideas. The Brahmo Samaj was established at Munger and Jamalpur (both outside the present district) in 1864. A branch of Arya Samaj was also started in 1897. Surendra Nath Banerjee, one of the great leader of Congress, paid his visit to Munger in order to strengthen Swadeshi Movement. The late Dr. Shree Krishna Singh, who belonged to Sheikhpura and rose to the status of being the first Chief Minister of Bihar, was drawn to it in (Swadeshi Movement) his early student age. In the year 1917 Dr. Singh organized a conference at Munger under the auspices of Bihar students Federation. Conference was presided over by Dr. Rajendra Prasad.

Thus it is apparent that the political awakening in the country after the first World War (1914 to 1919) stimulated nationalist movement in the area presently known as Sheikhpura district as well. This District also participated in the non-cooperation movement and later on civil disobedience movement (Namak Satyagrah or famous Dandiyatra) of 1930-31. During 1942 the district amply responded to the Quit India Movement led by Mahatma Gandhi. The district also contributed its might in freedom movement in the year 1947.

Post Independence Era

Till creation the district of Sheikhpura was mainly under the district of Munger. The creation of district mainly owes credit to Rajo Singh who is towering personality of the district. After its inception during 7 years of its age district have not made any considerable stride.

(iii) Administrative set up

After upgradation from the Sheikhpura subdivision to Sheikhpura district the district was put under a District Magistrate. The District Magistrate is responsible for both maintenance of law and order and revenue collection. The District Magistrate generally belongs to The I.A.S. cadre.

The Superintendent of Police is at the helm of district police administration. He is part of criminal justice. Both the D.M. and the S.P. are helped by a number of able officers. The district consists of only one Subdivisional Officer (S.D.O.), mostly drawn from the Bihar Public Service Commission (BPSC) cadre. Sometime Subdivisional Officer belongs to the I.A.S. cadre as well. In turn he is also helped/assisted by a number of officers. The district consists of 6 Community Development Blocks, viz., 1. Sheikhpura, 2. Barbigha, 3. Ariari, 4. Sheikhopur Sarai, 5. Ghat Kusumbha and 6.Chewara C.D. Blocks contain 330 villages. C.D. Blocks are run under the Block Development Officers (B.D.O.'s.) who are junior to the S.D.O.

(iv) Physical Features

Sheikhpura district lies between about 84º 45' to 85º 55' longitude East of Greenwich and about 25º 0' to 25º 5' North latitude. Its physical aspect is akin upto some extent to Chotanagpur plateau. There is naked hill series in the heart of the district. Nature owes commendable contribution for its gifts. Sheikhpura district is adorned with natural beauty and is replete with rivers and hillocks.

River system

The Harohar river flows in the north of the district. The Korihari and the Shome river flow in the eastern-south portion whereas the Sakri and Tanti river beautify its south-eastern part. Harohar river divides Ghat Kusumbha C.D. Block in nearly two-equal parts as it flows through the middle of the C.D. Block.

Climatic conditions

The climate of the district is salubrious. The district is a bit cooler than its neighbouring districts. The months of May and June are quite hot. Monsoon usually breaks in the second half of the June and Lasts till September.

Flora and Fauna

Trees like peepal (Bo-tree), neem (Margosa indica), jack-fruit, palas (flame of the forest), bel (wood apple), tamarind, black-berry, wild berry jujube, gular, pakar, mango, etc., are frequently met with.

Mines and Minerals

There are stone quarries under Sheikhpura C.D. Block which is used as road, bridge and building material.

Land use pattern

There is vast alluvial plain in the district. Apart from hills, this alluvial plain is very fertile, producing fine bhadai crops before the river rises and good rabi crops in the cold weather. Main

crops of the district are paddy, wheat, gram, masoor, mustard, etc. In production of oil seeds and beverages this district hold key position in the state. Onion cultivation is done on the large scale and onion is sent from here across the country and also exported to abroad.

Irrigation Facilities

The district mostly depends upon traditional system of irrigation. There is hardly any big works of irrigation. In the post-independence period attention has been paid for irrigation work. Several medium and minor irrigation schemes have been executed in the district. Irrigation through lift irrigation, pumps, open borings, rahat pumps, surface percolation wells and tube-wells have received adequate attention.

Livestock

The terms 'livestock' includes cattle (cows, bullocks and bull), buffaloes, sheep, goat and pigs. The cattle are generally of small size and poor quality. The usual fodder for the cattle consists of scanty grass which grows along the road side and weeds spring up after harvesting of crops.

Fisheries

Fish are abundant in Sheikhpura. The principal species include the well known rohu, mirgal, katla, etc.

Industrialisation

Stone quarrying is done at Sheikhpura. Among the minor/cottage industries mention may be made of basket making, pottery making, earthen-ware making etc.

Communication

In the post independence period considerable improvement in the construction of metalled road has been done. A branch rail line running from Kiul to Gaya passes through Sheikhpura.

Trade & Commerce

Sheikhpura is hub of the trade and commerce in the district. Important items produced are paddy, gram and onion. Onion is exported extensively to outside the district.

Electricity and Power

130 villages of the district are electrified. Both the towns of district Sheikhpura(M) and Barbigha(NAC) are electrified. The State Government is paying attention to produce electricity for the villages.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a

kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but

within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.- -For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding

houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)

6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhanger
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Swasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa

22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} \text{ASFR}}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Munger district (from which the district of Sheikhpura not been carved out) during 1991 was 30,60,027 Hindus constitute over 91.7 per cent (28,05,717persons) of the population in the district followed by Muslims 8.1 percent (2,49,320 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous Censuses, the mother tongue as returned by each individual was collected.

The population of the Munger district (from which the district of Sheikhpura not been carved out) district during 1991 was 3,060,027. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Munger district, Hindi, the main mother tongue of the district was returned by 91.6 percent (2,802,381 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Munger district, was 6.7 percent (204,021 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Munger during 1991 census.

The proportion of the Scheduled Castes in the district of Munger (from which the district of Sheikhpura not been carved out) was 503,981 according to 1991 Census. Numerically the five most prominent SCs in the distirict were (i)Musaha (165,080)(ii)Dusadh,Dhari, Dhobi(136,984)(iii)Chamar, Mochi(107,081)(iv)Pasi (29,739)and (v) Dhobi (25,809) while Musahar constituted the maximum proportion of the Scheduled Castes population , the percentage being 32.8 (more than one forth of the total SC population) Dusadh and Chamar though numerically Second and third in order comprised only 27.2 and 21.2 percent of the SC population in the district. Pasi and Dhobi are much less in number as compared to the other three SCs mentioned above with only 5.9 and 5.1 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the five SCs described above as their percentages to total SC population was less than even 1.0 percent except Hari/Mehtar/Bhangi,Dom/Dhangad and Turi whose percentages were 1.8,1.7 and 1.6 respectively

The population of the Scheduled Tribes in the district of Munger (from which the district of Sheikhpura not been carved out) during 1991 Census was 70,660. Numerically, the five important STs were namely (i) Santal (ii) Kora (iii) kharwar (iv) Oraon and (v) Munda. Santal had

51,609 populations, which constituted 73.0 percent of the ST population. Kora with 15,160 populations constituted 21.5 percent of the ST population. Kharwar, which were 964 in number, constituted 1.4 percent of the ST population. Oraon comprised 602 persons and comprised 0.9 percent of ST population. While Munda with 359 population constituted 0.5 percent of the total ST population in the district. The other Scheduled Tribes were almost negligible in proportion.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Sheikhpura district is 5,25,502 comprising 2,73992 Males and 2,51,510 Females and constituting 0.6 percent of the State population spread over 0.7 percent of the area of the State in the 6 C.D.Blocks of the district. Sheikhpura is the most populous whereas Ghat Kusumbha is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D. BLOCKS BY RESIDENCE, 1991-2001

Serial number	Name of C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Barbigha	96,453	66,305	30,148	115,460	77,260	38,200	19.7	16.5	26.7	31.3	33.1
2	Shekhopur Sarai	46,721	46,721	0	58,833	58,833	0	25.9	25.9	0.0	0.0	0.0
3	Sheikhpura	130,610	96,181	34,429	165,018	121,905	43,113	26.3	26.7	25.2	26.4	26.1
4	Ghat Kusumbha	29,264	29,264	0	36,504	36,504	0	24.7	24.7	0.0	0.0	0.0
5	Chewara	47,373	47,373	0	61,563	61,563	0	30.0	30.0	0.0	0.0	0.0
6	Ariari	69,839	69,839	0	88,124	88,124	0	26.2	26.2	0.0	0.0	0.0
	District Total:	**420,260**	**355,683**	**64,577**	**525,502**	**444,189**	**81,313**	**25.0**	**24.9**	**25.9**	**15.4**	**15.5**

Table 1 shows rise in the population of this district during 1991-2001 decade which has been of the order of 25.0 percent. The rural population in the district has increased by 24.9 percent while the urban population growth over the decade has been as much as 25.9 percent. Rural – Urban migration is important factor which always leads to rapid expansion of the urban unit. Among the C.D. Blocks, Chewara has shown the highest increase in population over the decade with 30.0 percent. The next highest increase in population is observed in Sheikhpura C.D. Block with 26.3 percent followed by Ariari C.D. Block with 26.2 percent. Percentage decadal variation has been observed to be the least in the case of Barbigha C.D. Block with 19.7 percent.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Barbigha	44	77,260	40,041	37,219	1 (2.3)	113	85
2	Shekhopur Sarai	25	58,833	30,422	28,411	1 (4.0)	120	77
3	Sheikhpura	77	121,905	63,521	58,384	4 (5.2)	67	51

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. block	Number and percentage of villages	Population 2000-4999		Number and percentage of villages	Population 5000-9999		Number and percentage of villages	Population 10000 and above	
			Males	Females		Males	Females		Males	Females
1	2	19	20	21	22	23	24	25	26	27
1	Barbigha	8 (18.2)	11,596	10,654	3 (6.8)	11,181	10,338	0 (0.0)	0	0
2	Shekhopur Sarai	4 (16.0)	5,914	5,623	5 (20.0)	16,878	15,725	0 (0.0)	0	0
3	Sheikhpura	13 (16.9)	20,480	18,724	4 (5.2)	11,756	10,888	0 (0.0)	0	0
4	Ghat Kusumbha	3 (13.0)	6,130	5,842	1 (4.3)	3,807	3,561	0 (0.0)	0	0
5	Chewara	9 (23.7)	13,018	11,759	1 (2.6)	3,759	3,387	0 (0.0)	0	0
6	Ariari	9 (14.8)	15,441	14,498	3 (4.9)	8,474	8,003	0 (0.0)	0	0
	Districts (Rural) Total:	**46 (17.2)**	**72,579**	**67,100**	**17 (6.3)**	**55,855**	**51,902**	**0 (0.0)**	**0**	**0**

It may be observed in the table-2 that the maximum number of villages in the district lie in the population range of 1000-1999 accounting for 36.2 percent of the total inhabited villages closely followed by villages in the population rante of 500-999 accounting for 22.4 percent of the total inhibited villages. The percentages of population in the above two population ranges are 31.1 percent and 10.0 percent of the total rural population respectively It can be seen thtat least number of villages (13) falls in the population range of less than 200 and those villges constitute only 03.3 percent of district's total rural population.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

		Name of town
		1
(a)	**New**	
(i)	Statutary town	NIL
(ii)	Census town	NIL
(b)	**Denotified**	NIL
(c)	**Declassified**	NIL
(d)	**Wholly merged with other town(s)**	NIL

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	3	1.1	25	0.0
11-20	0	0.0	0	0.0
21-50	0	0.0	0	0.0
51-100	1	0.4	42	0.0
101-200	5	1.9	3,262	0.7
201-300	12	4.5	6,996	1.6
301-500	47	17.5	64,353	14.5
501 +	200	74.6	369,511	83.2
Not known	0	0.0	0	0.0
District Total:	**268**	**100.0**	**444,189**	**100.0**
Population Density (Rural) of the district:		**689.3**		

The data presented in the Table 4 highlights the fact that maximum proportion of villages in Sheikhpura district lies in the population density range (per square kilometer) of 501+ with 74.6 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 17.5 percent of the total inhabited villages. It would further be seen that small number

of villages fall in the density range of 201-300 which account for 4.5 percent of the total inhabited villages.

Maximum number of villages fall in the density range of 501+ covering 83.2 percent of the rural population followed by villages in the density range of 301-500 which account for 14.5 percent of the rural population

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,045	1,038	1,146
1911	1,051	1,056	942	1,046	1,047	1,036
1921	1,020	1,027	886	1,021	1,017	1,070
1931	995	1,005	820	997	998	996
1941	1,002	1,012	842	998	998	996
1951	1,000	1,010	859	1,007	1,012	970
1961	1,005	1,020	832	1,008	1,019	939
1971	957	968	833	952	962	882
1981	948	959	852	942	948	911
1991	907	913	857	896	904	851
2001	919	926	868	918	924	883

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows that there is a decling trend of sex ratio from 1901 to 1991 in state as well as district having some execptings.However sex ratio increased during 1991-2001 as is evident from the tacle ,for both district as well as state.

TABLE 6: SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Barbigha	918	930	894
2	Shekhopur Sarai	934	934	
3	Sheikhpura	907	919	874
4	Ghat Kusumbha	934	934	
5	Chewara	906	906	
6	Ariari	930	930	
	District Total:	**918**	**924**	**883**

Table 6 shows that among the C.D.Blocks of the district Sheikhpura Sarai C.D.Blocks have recorded the highest sex ratio(934) and Chewara C.D.Block has recorded the lowest sex ratio with 906.It is also eviding from the table that rural sex ratio is greated than the urban sex ratio.

TABLE 7: SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Sex ratio
1	2	3
1	Barbigha	930
2	Shekhopur Sarai	934
3	Sheikhpura	919
4	Ghat Kusumbha	934
5	Chewara	906
6	Ariari	930
	District (Rural) Total:	**924**

Table 7 shows sex ratio of rural areas of the district.It can be seen that sex ratio varies from 934 to 906.Chewara C.D.Block has recorded the lowest ratio as there are 906 females per 1000.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	4	1.5	229	0.1
700-749	2	0.7	967	0.2
750-799	8	3.0	4,660	1.0
800-849	19	7.1	16,254	3.7
850-899	53	19.8	77,149	17.4
900-949	103	38.4	229,713	51.7
950-999	48	17.9	86,416	19.5
1000-1099	26	9.7	27,545	6.2
1100+	5	1.9	1,256	0.3
District Total:	**268**	**100.0**	**444,189**	**100.0**
Sex ratio (Rural) for District:		**924**		

It is observed in the table 8 that the maximum proportion of villages in Sheikhpura district lies in the sex ratio range of 900-949 and these village account for 38.4 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 51.7 percent of the district rural population. 53 villages (19.8 %) fall in the sex ratio range of 850-899 and these villages account for 17.4 percent of the rural population of the district. 48 villages (17.9%) are in the sex ratio range of 950-999 and these villages account for 19.5 percent of the rural population. 26 villages (9.7%) fall in the favourable sex ratio range of 1000-1099 and these villages account for 6.2 percent of the rural population. 19 villages (7.1%) are in the sex ratio range of 800-849 and these villages account for 3.7% of the population.

Only 8 villages (3.0%) fall in very favourable sex ratio range of 750-799 and this small proportion of villages accounts for 1.0% of the population. Only 5 villages (1.9%) are in the highest range of sex ratio. 1100+ which account for 0.3 percent of the population.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Barbigha	(NA)	894
2	Sheikhpura	(M)	874
Sex ratio (Urban) for the district:			**883**

There is no urban agglomeration in Sheikhpura district. There are two urban units in Sheikhpura(M). The sex ratio of Barbigha(NA) is 894 and the sex ratio of Sheikhpura(M) is 874 .It can be seen that Barbigha (NA) has recorded higher sex ratio than district average sex ratio than district average.

TABLE 10: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total / Rural / Urban	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Barbigha	Total	22,994	11,721	11,273	962
		Rural	15,545	7,872	7,673	975
		Urban	7,449	3,849	3,600	935
2	Shekhopur Sarai	Total	11,893	6,101	5,792	949
		Rural	11,893	6,101	5,792	949
		Urban	0	0	0	
3	Sheikhpura	Total	33,650	17,309	16,341	944
		Rural	25,600	13,169	12,431	944
		Urban	8,050	4,140	3,910	944
4	Ghat Kusumbha	Total	8,222	4,178	4,044	968
		Rural	8,222	4,178	4,044	968
		Urban	0	0	0	
5	Chewara	Total	13,528	6,968	6,560	941
		Rural	13,528	6,968	6,560	941
		Urban	0	0	0	
6	Ariari	Total	19,495	9,887	9,608	972
		Rural	19,495	9,887	9,608	972
		Urban	0	0	0	
	District Total:	**Total**	**109,782**	**56,164**	**53,618**	**955**
		Rural	**94,283**	**48,175**	**46,108**	**957**
		Urban	**15,499**	**7,989**	**7,510**	**940**

It is observed from the above table that sex ratio in the age group 0-6 in the district varies from 972 in Ariari C.D. Block to 949 Chewara C.D. Block. Shekhopur Sarai,Sheikhpura and Chewara C.D.Block have recorded lower sex ratio than the district whereas Barbigha,ghat Kusumbha and Ariari have recorded hgher sex ratio than the district in the age group 0-6.

TABLE 11: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Barbigha	15545	7872	7673	975
2	Shekhopur Sarai	11893	6101	5792	949
3	Sheikhpura	25600	13169	12431	944
4	Ghat Kusumbha	8222	4178	4044	968
5	Chewara	13528	6968	6560	941

		Rural	88,124	17,783	9	20.2	0
		Urban	0	0	0	0	0
	District Total:	**Total**	**525,502**	**103,732**	**211**	**19.7**	**0**
		Rural	**444,189**	**91,951**	**86**	**20.7**	**0**
		Urban	**81,313**	**11,781**	**125**	**14.5**	**0.2**

The Table 14 shows that the percentage of Scheduled Castes in Sheikhpura district is 19.7 percent of the total population in the district. Within the district the highest percentage of Scheduled Castes population is in Barbigha C.D. Block (21.1 %) whereas the lowest percentage of Scheduled Castes population is Ghat Kusumbha C.D.Block (17.9 %) The percentage of scheduled castes population in Skheikhpura district for the urban areas is 14.5 percent which is higher than the rural areas (20.7%). The percentage of scheduled tribes population in the C.D. Blocks of Sheikhpura district is almost negligible.

TABLE 15: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Barbigha	77,260	18,907	0	24.5	0
2	Shekhopur Sarai	58,833	12,023	33	20.4	0.1
3	Sheikhpura	121,905	23,914	28	19.6	0
4	Ghat Kusumbha	36,504	6,550	0	17.9	0
5	Chewara	61,563	12,774	16	20.7	0
6	Ariari	88,124	17,783	9	20.2	0
	District (Rural) Total:	**444,189**	**91,951**	**86**	**20.7**	**0**

The above table indicates that the percentage of the Scheduled Castes in Sheikhpura district is of the order of 20.7 percent of the total rural population. The highest percentage of Scheduled Castes population is in Barbigha C.D. Block with (24.5 %) The percentage of Scheduled Tribes population in the C.D. Blocks of Sheikhpura district is almost negligible as has been observed in the Table 15.

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	20	7.5	0	0.0
Less than 5	6	2.2	168	0.2
5-10	25	9.3	3,486	3.8
11-20	97	36.2	35,991	39.1
21-30	51	19.0	25,459	27.7
31-40	36	13.4	14,309	15.6
41-50	14	5.2	5,023	5.5
51-75	8	3.0	4,399	4.8
76 and above	11	4.1	3,116	3.4
District Total	**268**	**100.0**	**91,951**	**100.0**

From the Table 16 it is apparent that there are 97 villages accounting for 36.6 percent of the inhabited villages in the district where the population of Scheduled Castes ranges between 11-20 percent of total population 51.villages closely follow this where the population of the Scheduled Castes ranges between 21 and 30 percent of the total population. These 51 villages account for 19.0 percent of the inhabited villages. There are 36 villages which account for 13.4 percent of the inhabited villages.where the percentages of Scheduled Castes population to total

population is between 31and 40. There are 25 villages which constitute 9.3 percent of the Scheduled Castes population to total population is less than 5.

It can be seen that 7.5 percent villages are as such which do not have any Scheduled Castes population.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

76 and above	0	0.0	0	0.0
District Total	**268**	**100.0**	**86**	**100.0**

As regards the population of the Scheduled Tribes it can be seen from the Table – 17 that there are only 9 villages in the district where members of the scheduled tribes exist. In all these villages the population of the Scheduled Tribes is as low or less than 5 percent of the total population. There are as many as 259 villages which constitute 96.6 percent of the total inhabited villages in the district which have no scheduled tribes population.

TABLE 18: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA ^ / Town*+	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Barbigha (NA)	38,200	5,440	106	14.2	0.3
2	Sheikhpura (M)	43,113	6,341	19	14.7	0
District(Urban) Total		**81,313**	**11,781**	**125**	**14.5**	**0.2**

There is two statutory towns in the district. The percentage of Scheduled Castes population to total population is 14.5 in Sheikhpura district. The proportion of Scheduled Castes population in Sheikhpura (M) and barbigha (NA) are 14.7 and 14.2 percent respectively.These two urban units of the district have manyscatter proportion of Scheduled Tribes.

TABLE 19: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Barbigha	919	0
2	Shekhopur Sarai	902	571
3	Sheikhpura	906	1154
4	Ghat Kusumbha	945	0
5	Chewara	895	1000
6	Ariari	922	500
	District (Rural) Total	**912**	**792**

Table 19 shows that the sex ratio of Scheduled Castes varies from 945 in Ghat Kusumbha C.D. Block to 895 in Chewara C.D. Block. The sex ratio in Ariari C.D. Block is 922 while the sex ratio in Barbigha C.D. Block is 919. The sex ratio figures of Chewara and Shekhopur Sarai C.D. Blocks are lower than the district average.

The sex ratio of Scheduled Tribes varies from 1154 in Sheikhpura C.D. Blocks to 500 in Ariari C.D. Block. Sex ratio figures of Scheduled Tribes in Barbigha and Ghat Kusumbha C.D. Blocks are zero.Which indictes that those two C.D.Blocks donot have any Scheduled Tribes population.Scheduled Tribes are very abnormal due to sex ratio figures of its scanty population.

TABLE 20: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A.^ / Town +*	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Barbigha (NA)	888	963
2	Sheikhpura (M)	886	462
Sex ratio (Urban) for the district:		**887**	**866**

Table 20 shows that there are two statutory towns in the district i.e., Sheikhpura(M) and Barbigha(NA). The sex ratio of Scheduled Castes in Barbigha(NA) is 888 while the sex ratio of Sheikhpura(M) is 886.The sex ratio of Scheduled Tribes in Barbigha(NA) is 963 while the sex ratio of Scheduled Tribes Sheikhpura(M) is 462 according to 2001 Census.

Table 21 shows that among the C.D.Blocks in the district Barbigha C.D.Block has the highest proportion of total literates as well as made and female literates.While Ghaat Kusumba C.D.Block has the lowest proportion of total male and female literates .It is also evident that in all the C.D.Blocks of the district made literates out number female literates.Table 22 deals with same topic as Table 21 deals.Only difference is that Table 21 deals with total area of the district while Table 22 deals with rural area of the district.

TABLE 23: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	1	0.4	26	0.0
1-10	5	1.9	757	0.2
11-20	11	4.1	6,720	1.5
21-30	38	14.2	38,704	8.7
31-40	63	23.5	86,547	19.5
41-50	65	24.3	146,987	33.1
51-60	57	21.3	135,114	30.4
61-70	21	7.8	24,399	5.5
71-80	4	1.5	2,682	0.6
81-90	2	0.7	2,250	0.5
91-99	0	0.0	0	0.0
100	1	0.4	3	0.0
District Total:	**268**	**100.0**	**444,189**	**100.0**
Literacy rate for District:		**48.6**		

Table 23 shows that in 24.3 percent of the inhabited villages, literacy rate ranges between 41 and 50 percent. In these 65 villages 33.1 percent of the district rural population live. This is closely followed by 63 villages and with 19.5 percent of the district rural population these 23.5 percent of the inhabited villages where literacy rate ranges between 31 and 40 percent. 21.3 percent of the inhabited villages i.e. 57 villages are such where literacy rate ranges between 51 and 60 percent. These villages account for 30.4 percent of the district rural population. 14.2 percent of the inhabited villages i.e. 38 villages are such where literacy rate ranges between 21 and 30 percent and these villages account for 8.7 percent of the district rural population. 7.8 percent of the inhabited villages i.e. 21 villages are such where literacy rate ranges between 61 and 70 percent. These villages account for 5.5 percent of the district rural population. There are only 11 inhabited villages where literacy rate range between 11 and 20 percent and these villages account for only 1.5 percent of the district rural population.

TABLE 24: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA^/Town +*	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Barbigha (NA)	19,446	12,197	7,249	18,754	7,968	10,786	63.2	74.8	50.2	24.5
2	Sheikhpura (M)	21,588	13,375	8,213	21,525	9,632	11,893	61.6	70.9	50.7	20.2
	District(Urban) Total	**41,034**	**25,572**	**15,462**	**40,279**	**17,600**	**22,679**	**62.3**	**72.7**	**50.5**	**22.2**

Table 24 shows that there are two statutory towns in the district, Sheikhpura(M) and Barbigha(NA). The proportion of literates is marginally higher in Barbigha (NA) than Sheikhpura (M) .As usual it is evident from the table that male litertes significantly out munber female literates.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

6	Ariari	2,824	2,183	641	14,959	7,070	7,889	20.8	30.7	10	20.7
District (Rural) Total:		**16,867**	**13,079**	**3,788**	**75,084**	**35,004**	**40,080**	**24**	**35.2**	**11.4**	**23.8**

Table 25 shows the literacy rate among the Scheduled Castes is highest i.e. 29.4 percent in Barbigha C.D. Block .on the other side Ariari C.D.Block has the lowest with (20.8 %) in the district. It is observed that the literacy rate among the Scheduled Castes for the district is 24.0 prercent only. As regards percentage of male literacy rate among the Scheduled Castes, it is the highest i.e. 42.5 percent in Barbigha C.D. Block whereas it is lowest i.e. 30.7 percent in the Ariari C.D. Block. In case of female literacy rate among the Scheduled Castes also it is the highest i.e. 14.4 percent in Barbigha C.D. Block and the lowest i.e. both C.D. Blocks Ariari and Sheikhpura are 10 percent. It is found that the gap between male and female literacy rate is highest i.e. 28.2 percent in Barbigha C.D. Block whereas it is lowest i.e. 20.7 percent in Ariari C.D. Block.

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	3	1.2	375	0.4
1-10	34	13.7	7,591	8.3
11-20	75	30.2	30,817	33.5
21-30	66	26.6	28,233	30.7
31-40	43	17.3	19,737	21.5
41-50	16	6.5	3,732	4.1
51-60	5	2.0	683	0.7
61-70	3	1.2	644	0.7
71-80	3	1.2	139	0.2
81-90	0	0.0	0	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**248**	**100.0**	**91,951**	**100.0**
Literacy rate for District (Rural):			**24**	

The table alone shows that in case of literacy among the Scheduled Castes in the villages of the district the highest number of villages i.e. 30.2 percent fall in the literacy range of 11-20 percent whereas the lowest number of villages i.e. 1.2 percent fall in the literacy range i.e.,0

percent. It is observed that of the total villages in the district 6.5 percent villages are such which fall in the literacy range of 41-50 percent in the case of literacy among the scheduled castes in the villages of the district. It is worthforming here that only 11 out of 248 inhabited villages of the district have more than 50 percent literate Scheduled Castes population.

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Barbigha (NA)	1,482	1,064	418	3,958	1,817	2,141	35	47	21.3	25.7
2	Sheikhpura (M)	1,707	1,168	539	4,634	2,195	2,439	34.1	43.2	23.5	19.8
	Sheikhpura * (Urban)	**3,189**	**2,232**	**957**	**8,592**	**4,012**	**4,580**	**34.6**	**44.9**	**22.5**	**22.5**

The Table 27 shows that the literacy rate among the Scheduled Castes in the urban areas of the district is below i.e.34.6 percent in case of total population 44.9 percent in case of males and 22.5 percent in case of females as compared to 47.0 percent in case of total population, 59.7 percent in case of males and 33.1 percent in case of females in the states of Bihar and 35.3 percent in case of total population, 61.9 percent in case of males and 33.9 percent in case of females in the Sheikhpura district during 2001 Census..

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Shekhopur Sarai	0	0	0	33	21	12	0	0	0	0
2	Sheikhpura	11	6	5	17	7	10	45.8	54.5	38.5	16.1

		Females	**213,369**	**33,419**	**15.7**	**25,126**	**11.8**	**58,545**	**27.4**	**154,824**	**72.6**

Work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 31 shows that the work participation rate (WPR) in the Sheikhpura district is 28.8 percent as main workers and 8.2 percent as marginal workers. Proportion of non workers in the district is 61.4 percent.

Among the main workers male work participation rate in the district is 42.2 percent while that of females is only 14.3 percent as per 2001 Census. The proportion of main workers is the highest (32.5%) in Chewara C.D. Block and the lowest (26.2%) in Barbigha C.D. Block. Out of 6 C.D. blocks, WPR of four C.D. Blocks are above the district average. The proportion of marginal workers is the highest (13.2%) in Ghat Kusumbha C.D. Block and the lowest (7.2%) in Barbigha C.D. block. The proportion of total workers is the highest (42.9%) in Ghat Kusumba C.D. Block and the lowest (33.3% in Barbigha C.D. Block.

The proportion of non-workers among males in the district is 52.0 percent while that of female is 75.0 percent as per 2001 census. The proportion of non-workers is the highest (63.6%) Shekhopur Sarai C.D. Block and the lowest (61.8%) in Chewara C.D. Block.Table 32 deals with same topic.Only difference is that it deals with rural areas of the district.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA^ / Town +*	Persons / Males / Females	Total Population	Main workers		Marginal workers		Total workers (Main and marginal workers)		Non workers

Note: Percentage of Worker to total worker are given in brackets

From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent

an agriculture which is supported by the fact that the cultivators (37.5%) and agricultural labourers (42.2%) together constitute 79.7 percent of the total workers of the district. the agricultural sector has observed more than three fourth of the total main workers. The proportion of cultivators varies between 52.6 percent for Ariari C.D.Block to 26.5 percent for Barbigha C.D.Block. Proplortion of agricultural labourers varies between 56.3 percent in Ghat Kusumbha C.D.Block to 36.0 percent in Sheikhpura C.D.Block. The proportion of household's industry workers is only 3.2 percent of the total workers of the district. Proportion of household industry workers varies between 4.7 percent in Barbigha C.D.Block to 1.8 percent in Ghat Kusumbha C.D.Block.

The proportion of other workers is 17.1 percent of the total workers of the district. Proportion of other workers varies between Sheikhpur C.D.Block with 27.3 percent to 7.3 percent in Chewara C.D.Block.

				(27.4)	**(32.5)**	**(58.4)**	**(2.8)**	**(6.4)**

Note: Percentage of Worker to total worker are given in brackets

The Table 35 deals with the same topic as Table 34 deals only difference is that is that Table 35 deals for rural areas of the district only. The proportion of cultivators varies between 52.6 percent for Ariari C.D. Block to 31.6 percent for Barbigha C.D. Block. Proportion of agriculture labourers varies between 56.3 percent for Ghat Kusumbha C.D. Block to 37.5 percent for Ariari C.D. Block. The proportion of Household Industry workers is only 2.5 percent of the total workers of the district. Proportion of household industry workers varies between 3.9 percent for Shekhopur Sarai C.D. Block to 1.8 percent for Ghat Kusumbha C.D. Block. The proportion of other workers is 11.5 percent of the total workers of the district. Proportion of other workers varies between 17.0 percent for Sheikhpura C.D. Block to 7.3 percent for Chewara C.D. Block.

Table 35 shows that the district's rural areas priminarly depends on agriculture.

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA^ / Town*+	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9
	1 Barbigha (NA)	Persons	38,200	10,648	1,418	2,865	932	5,433
				(27.9)	(13.3)	(26.9)	(8.8)	(51.0)
		Males	20,165	8,661	1,126	1,782	745	5,008
				(43.0)	(13.0)	(20.6)	(8.6)	(57.8)
		Females	18,035	1,987	292	1,083	187	425
				(11.0)	(14.7)	(54.5)	(9.4)	(21.4)
	2 Sheikhpura (M)	Persons	43,113	12,195	918	2,257	996	8,024
				(28.3)	(7.5)	(18.5)	(8.2)	(65.8)

				(43.0)	**(10.1)**	**(17.4)**	**(7.8)**	**(64.7)**
		Females	**38,141**	**4,281**	**467**	**1,894**	**477**	**1,443**
				(11.2)	**(10.9)**	**(44.2)**	**(11.1)**	**(33.7)**

Note: Percentage of Workers to total workers are given in brackets

Table 36 shows distribution of workers by sex in four major categories of economic activities of urban areas of the district.It is apparent from the table that only 10.2 percent of total workers in urban areas of the district are engaged as cultication.Further,it can be seen that major portion of urban worker are engaged in other workers(58.9%).

It can be urban areas of the district total workers (main+ marginal) consticutes 28.1 percent of the total population.Among those workers cultivators constitutes 28.1 percent,agricultural labourer 10.2 percent,household industries worker 8.4 percent and out of worker 58.9 percent.

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37: DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Type of amenity available					Type of amenity available				
			Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road	Power supply

Note: - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well Situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows the C.D Blockwise of villages and activity of amenity their. It can be learn that out of a total of 286 inhabited villages, 239 villages have one another type of education facilities 72 villages have medical facilities ,266(99.3%) villages have across to improved drinking water using the village 63 (23.5%) villages have prepid off facilities and telephone facility only 70 (26.1%) villages have transport facilities. 12(4.5%) villages have banks and 130 (48.5%) villages of power suppuly .174 villages i.e 64.9 percent villages have approach by pucca road.

TABLE 38: NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table- 38 shows the number and percentage of rural population learnd by different amenities out of total rural population of 444,189, 96.8 percent i.e 430,152 have educational facility of one other type. Hence to metu that perentage of villages of village toward different amenities is best than the percentage of population learned by different amenityes.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometers	5-10 kilometers	10+ kilometers	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	27	3	0	30
(b) Middle School	140	33	0	173
(c) Degree College	56	103	104	263
2. Medical:-				
(a) Hospital	49	102	114	265
(b) PHC	45	125	91	261
3. Post Office	173	27	5	205
4. Telephone	92	68	45	205
5. Bus Service	80	86	35	201
6. Banks				
(a) Commercial Bank	86	103	67	256
(b) Cooperative Bank	56	113	96	265
7. Agricultural Credit Societies	126	44	48	218

Table 39 present distribution of vllages not having amenities but those amenities are available at curtain distance.

As regards educational facility, it would be seen that there are 30 villages in the district (11.1%), which do not have any primary school, but the facility is available at places situated within 5 kms. for 27 villages and for 3 villages within the ranges of 5-10 kms. There are as many as 173 villages in the district (64.5%) which do not have middle school but the facility is available at places situated within 5 kms. for 140 villages, 33 villages within range of 5-10 kms. it is interestingly to observed that cent percent inhabited villages of the district are deprived of college but the facility is available at places situated within 5 kms for 56 villages for 103 villages within the range of 5-10 km and for 104 villages within the range of 10+ kms.

There are 265 villages in the district (98.8%) which are without the facility of hospital and as many 114 villages enjoying this facility at a distance range of 10+kms. the number of villages enjoying this facility at a distance range of 5-10 kms is 102 whereas the same is available at a distance of less than 5 kms. For 49 villages. There are 261villages in the district (97.3%), which do not have primary health centre.

Similar trend can be observed in respect of other amenities in the distict.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available				Type of amenity available			
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	29	24	3	3	9	9	1	1	22
	(100.0)	(82.8)	(10.3)	(10.3)	(31.0)	(31.0)	(3.4)	(3.4)	(75.9)
5 -15	201	180	62	53	40	51	11	40	129
	(100.0)	(89.6)	(30.8)	(26.4)	(19.9)	(25.4)	(5.5)	(19.9)	(64.2)
16 - 50	38	35	7	7	14	10	0	9	23
	(100.0)	(92.1)	(18.4)	(18.4)	(36.8)	(26.3)	(0.0)	(23.7)	(60.5)

	(100.0)	**(89.2)**	**(26.9)**	**(23.5)**	**(23.5)**	**(26.1)**	**(4.5)**	**(18.7)**	**(64.9)**
less than 5	29	24	3	3	9	9	1	1	22

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above Table 40 that maximum number of inhabited villages (201) are situated at a distance range of 5-15 kms. From the nearest statutory towns,29 villages are as such that they are situated at distance range of last than 5 kms from thenearest statutory towns.It can be seen that there are still 29 villages (268-239=29) which do not have any educational facility and those villages still depend on nearest urban units of the district.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available					Type of amenity available				
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

	0	0	0	0	0	0	0	0	0	0	0
District total	**268**	**239**	**72**	**266**	**63**	**63**	**70**	**12**	**50**	**174**	**130**
	(100.0)	**(89.2)**	**(26.9)**	**(99.3)**	**(23.5)**	**(23.5)**	**(26.1)**	**(4.5)**	**(18.7)**	**(64.9)**	**(48.5)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the Table 41 that the maximum number of villages i.e. 97(36.1%) in the district fall in population range of 1000-1999 followed by 60 villages (22.3%) having population range of 500-499 . the lowest number of villages i.e.17(6.3 %) observed in the population range of 5000-9999 .

The population of villages having different amenities varies in direct relation to their population range. Generally the maximum percentage of villages having different amenities have a population range of 5000-9999 which further corroborates the fact that more facilities are generally available in larger villages than in smaller ones

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Barbigha	44	7690.49	86.7	86
2	Shekhopur Sarai	25	5382.54	83.9	86.3
3	Sheikhpura	77	16409	79.5	41.9
4	Ghat Kusumbha	23	9210	89.5	20.1
5	Chewara	38	11439	92.9	67.6
6	Ariari	61	14308	88.1	42.9
	District Total:	**268**	**64439.03**	**86.5**	**52.7**

Note: - Cultivable area = irrigated area + unirrigated area

Table-42 gives the percentage of cultivable area to total area also the proportion of irrigated area to total cultivable area in the district and its various C.D.Blocks.

It would be seen from the Table 42 that 86.5 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 52.7 percent area is found to be irrigated. Among the C.D.Blocks the highest percentages of cultivable area is found in Chawara C.D.Block with 92.9 percent closely followed by Ghat Kusumbha C.D.Block with 89.5 percent. The lowest cultivable area is found in Sheikhpura C.D.Block, which is 79.5 percent. The highest proportion of irrigated area (86.3%) to total cultivable area is found in Sheikhopur Sarai C.D.Block followed by Barbigha C.D.Block with 86 percent.

The least proportion of irrigated area is found in Ghat Kusumbha C.D.Block with 20.1 percent, which indicates that the villages in this block are deprieved of required irrigational facilities

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Barbigha (NA)	3.9	0.1	3.8	1.9	0.3	0	1.4	0	0.2
2	III Sheikhpura (M)	1.5	0.6	0.9	0.5	0.4	0	0	0	0
District Total		**2.6**	**0.4**	**2.3**	**1.1**	**0.4**	**0**	**0.7**	**0**	**0.1**

The above table gives the details of finances in the statutory towns of the district in terms of per capita receipt and expenditure. There are only two statutory towns in the district i.e. Barbigha and Sheikhpura. On going into the details of receipt under different heads in can be seen that the receipt from all other sources is the major source of rceipt in both the towns of the district.

Per capita total receipt is higher than the per capital total expenditure in both the towns of the district.This is not an healthy indicators.

TABLE 44: SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Barbigha (NA)	4.7	2.1	0.8	0.3	0.3
2	Sheikhpura (M)	3.5	1.9	1.9	1.2	0.5
District Total		**4.1**	**2**	**1.4**	**0.7**	**0.4**

The Table 44 shows the details of different categories of educational institutions per ten thousand population in the towns of the district. It would be seen from the above table Barbigha (NA) has dedge over Sheikhpura (M) in lower of educational institutional.However Sheikhpura has an edge over. Barbigha (NA) at senior level of educational institutionals (matriculation seconday and colleges)

TABLE 45: NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Barbigha(NA)	8
2	Sheikhpura(M)	30
	Distrct Total	**20**

Table 45 furnishes information regarding availability of bed in medical institutions in urban areas of Sheikhpura district. The number of beds in medical institutions per ten thousand population for Sheikhpura(M) works out to be 30 and on the other side in Barbigha(NA) the number of beds in medical institutions per ten thousand population works out to be 8.

.

TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Barbigha	38200	11850	31
2	Sheikhpura	43113	4900	11.4
	District Total	**81313**	**16750**	**20.6**

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Barbigha (NA)	Threshur	Pulse
		Bidi	Rice
			Cattle Food
2	Sheikhpura (M)	Agarbatti	Stone
			Onion
			Vegetable

The Table show that the most important commodities manufactured in and exported from the towns of the district . It would be seen from the table that Barbigha(NA) manufactures.In Sheikhpura(M) one item viz., Agarbatti is manufactured in the town and three items Stone, Onion and Vegetable are exported from the town

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

District total		**84,388**	**71,765**	**12,623**	**21,737**	**19,221**	**2,516**	**309**	**284**	**25**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 gives insight into the data almost the number of households by tenure status and number of rooms occupied in the district.The total number of households in the district are 84,388 having 71,765 in rural areas and 12,623 in urban areas of the district.Out of total household,21,737 belong to Scheduled Castes and only 309 households belong to Scheduled Tribes.

It can be informed from the Table that almost 95 percent of the total households,SC hhs and ST hhs occupy own houses.Only few percent (approximately) of total households live in rented houses and less than one percent of total household have terms stated others.Almost similar trend can be observed in case of Sc and St households.Further it can be seen from the table that maximum number of rooms available to each household is equal to two in all the each from category of tenure status.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/C.D. Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Barbigha	54.1	37.5	8.4	48.3	42.0	9.7	66.3	27.9	5.8

	District Total:	**47.1**	**41.4**	**11.5**	**43.5**	**43.8**	**12.6**	**67.2**	**27.5**	**5.3**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It would be seen from the above table that of the total rural household's maximum proportion of household i.e 43.8 percent live in semiparmanent houses followed by 43.5 percent living in permanent houses and 12.6 percent living in temporary houses.

In the case of urban households in the district, however, the maximum proportion of household i.e. for 67.2 percent live in permanent house followed by 27.5 percent in semi parmanent houses and 5.3 percent in temporary houses.

Among the C.D. Blocks in the district, Chewara has the maximum proportion of rural households living in temporary houses (17.4%) followed by Ariari (17.3%) and Sheikhpura, Ghat Kusumbha (7.4%) has the minimum proportion of households living in temporary houses with also (7.4%). In case of permanent houses Barbigha C.D. Blocks has the maximum proportion of households living in permanent houses (54.1%) followed by Shekhopur Sarai C.D. Blocks and Sheikhpura C.D. Block (53.3%) and (53.1%) has minimum proportion of households living in permanent houses with 30.3 percent in Ariari C.D. Block.

In case of semi permanent houses, Shekhopur Sarai C.D. Block has the maximum proportion of households living in permanent houses (53.3%) followed by Ghat Kusumbha C.D. Block (52.0%). Ariari C.D. Block has the minimum proportion of households living in permanent houses with 30.3%. In case of semi permanent houses, Ariari C.D. Block has the maximum proportion of household (52.2%) followed by Chewara C.D. Block (49.8%).

Sheikhpura C.D. Block has the minimum proportion of households having semi permanent houses with 38.9%

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table-50 shows that of the total rural households 71765 households 45.0 percent have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Ghat Kusumbha C.D.Block with 63.8 percent whereas it is lowest in Shekhopura Sarai C.D.Block with 32.9 percent.

As regard electricity it is found that only 5.1 percent of the rural households in the district have electricity. The highest proportion of households with electricity is in Ariari C.D.Block with 5.9 percent where as it is lowest in Shekhopura Sarai C.D.Block with 1.2 percent.

Only 7.5 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Shekhopur Sarai C.D.Block with 10.0 percent whereas it is lowest in Chweara C.D.Block with 5.9 percent.

Only 19.9 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is in Shekhopur Sarai C.D.Block with 25.9 percent whereas it is lowest in Ghat Kusumbha C.D.Block with 14.2 percent.

It can be seen from the table 68.4 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Shekhopur Sarai C.D.Block with 80.7 percent whereas it is lowest in Chewara C.D.Block with 58.2 percent.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table-51 above shows that 3.5 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of rural households using firewood as fuel for cooking is in Shakopur Sarai C.D.Block (5.3%) whereas it is lowest in Chewara C.D.Block with 0.6 percent.

22.1 percent of the rural households in the district use crop residue as fuel for cooking Among the C.D.Blocks highest proportion of rural households using crop residue as fuel for cooking is 24.5 per cent in Shekhpur Sarai C.D.Block whereas it is lowest (16.3%) in Chewara C.D.Block.

71.2 percent of the rural households in the district use cow dung cake as fuel for cooking. Among the C.D.Blocks the proportion of rural households using cow dung cake as fuel for cooking is highest (80.1%) in Chwara C.D.Block whereas it is lowest (66.5%) in Sheikhpura C.D.Block.

In the case of cooking gas (L.P.G) there are only 2219 households accounting for 2.6 percent of the total households in the district using it for cooking. As regards Kerosene there are only 1382 households accounting for1.6 percent of the total households in the district using it for cooking.

Similar trend can be observed in respect of other types of fuel

TABLE 52: NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

This table shows number of household availing Banking facilities and number of households having each of the specified assets.It can be seen that proportion of households having each of the assets or availing banking facilities an greated than rural areas.In rural areas of the district 17.0 percent (12187 households) are availing Banking facilities whereas in urban areas this proportion is 30.0 percent (3879 households). It can be further seen that 24 percent households Radio,only 4.7 percent have Television,0.8 percent havw Telephone,23.1 percent have

Bicycle,only 1.9 percent have motorized two wheeler i.e. Scooter,motorcycle etc. and only 0.6 percent of rural households of the distict have motorized four wheelers i.e. car,jeep and van etc.

It can be noticed in the table that Barbigha C.D.Block has the highest proportion of rural households (21.4 %) availing banking facilities while Ariari C.D.Block has the lowest proportion of rural households availing banking facilities.

Similar observation can be noticed for other households assests also.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

Within the short span of about 7 years the district has witnessed two events of far reaching consequences, (1) creation of district on 31.7.94 and (2) bifurcation of state into Bihar and Jharkhand on 15.11.2000. On the date of separation Bihar got 37 districts while Jharkhand got 18 districts. Separation has created problem of cadre separation of staff, imbalance of electric power etc. After separation of state electric tariff rate has been enhanced in Bihar state.

.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Sheikhpura – It is sub-divisional and district headquarters. It is principal town and hub of the trade and commerce being carried in the district. Its antiquarian character was observed by Buchanan which was later on confirmed by Begler and Cunnigham. Bengal list mentions a rock-cut pass near the village. Buchanan opined that village had derived its origin and name from the tomb of a Muslim Saint named Syed, who was a Sheikh. A view has been advanced that the village name is corrupted form of Sheshpur which seems to possess lesser probability.

Matokhardah – Matokhardah is at about 6 kms. west from district headquarters. There is a tank which is known in nearby as Kali Matokhar Tal. Matokhar may be corrupted form of the Mata-Pokhar. Thee is an old mosque at Matokhardah.

Girihinda hill – There is a Lord Shiva temple on the Girihinda hill where worshippers congregate on the occasion of Mahashivratri and other other occasion to pay their obeisance.

Shamas – Shamas village is at 10 kms. distance in north-west direction from Sheikhpura town. Here an idol of Lord Shiva is said to have emerged.

Hussainabad – It is at 3 kms. distance from Sheikhpura town. Here one can see the grand Old buildings of Nawab.

Pind Sharif – Pind Sharif village is located at 8 kms. distance from Sheikhpura town in south direction. Here Ursha fair is held every year. Ursha is attended by assemblage of muslim community coming in Lakhs.

.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

This districts lies almost on the middle portion of the south Bihar plain . It is adorned with natural beauty replete with rivers, tree and hillocks. The district is westen portion of Munger division. The name of the district owes to Sheikhpura village of the district.

(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest

administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy

of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or

maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as ‘Yes’ or ‘No’. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

(a). Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

	(i)	Allopathic Hospital H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T

(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i) Government Canal	GC
(ii) Private Canal	PC
(iii)Well (without electricity)	W
(iv) Well (with electricity)	WE
(v) Tubewell (without electricity)	TW
(vi) Tubewell (with electricity)	TWE
(vii)Tank	TK
(viii)River	R
(ix)Lake	L
(x)Waterfall	WF
(xi)Others	O
(xii) Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

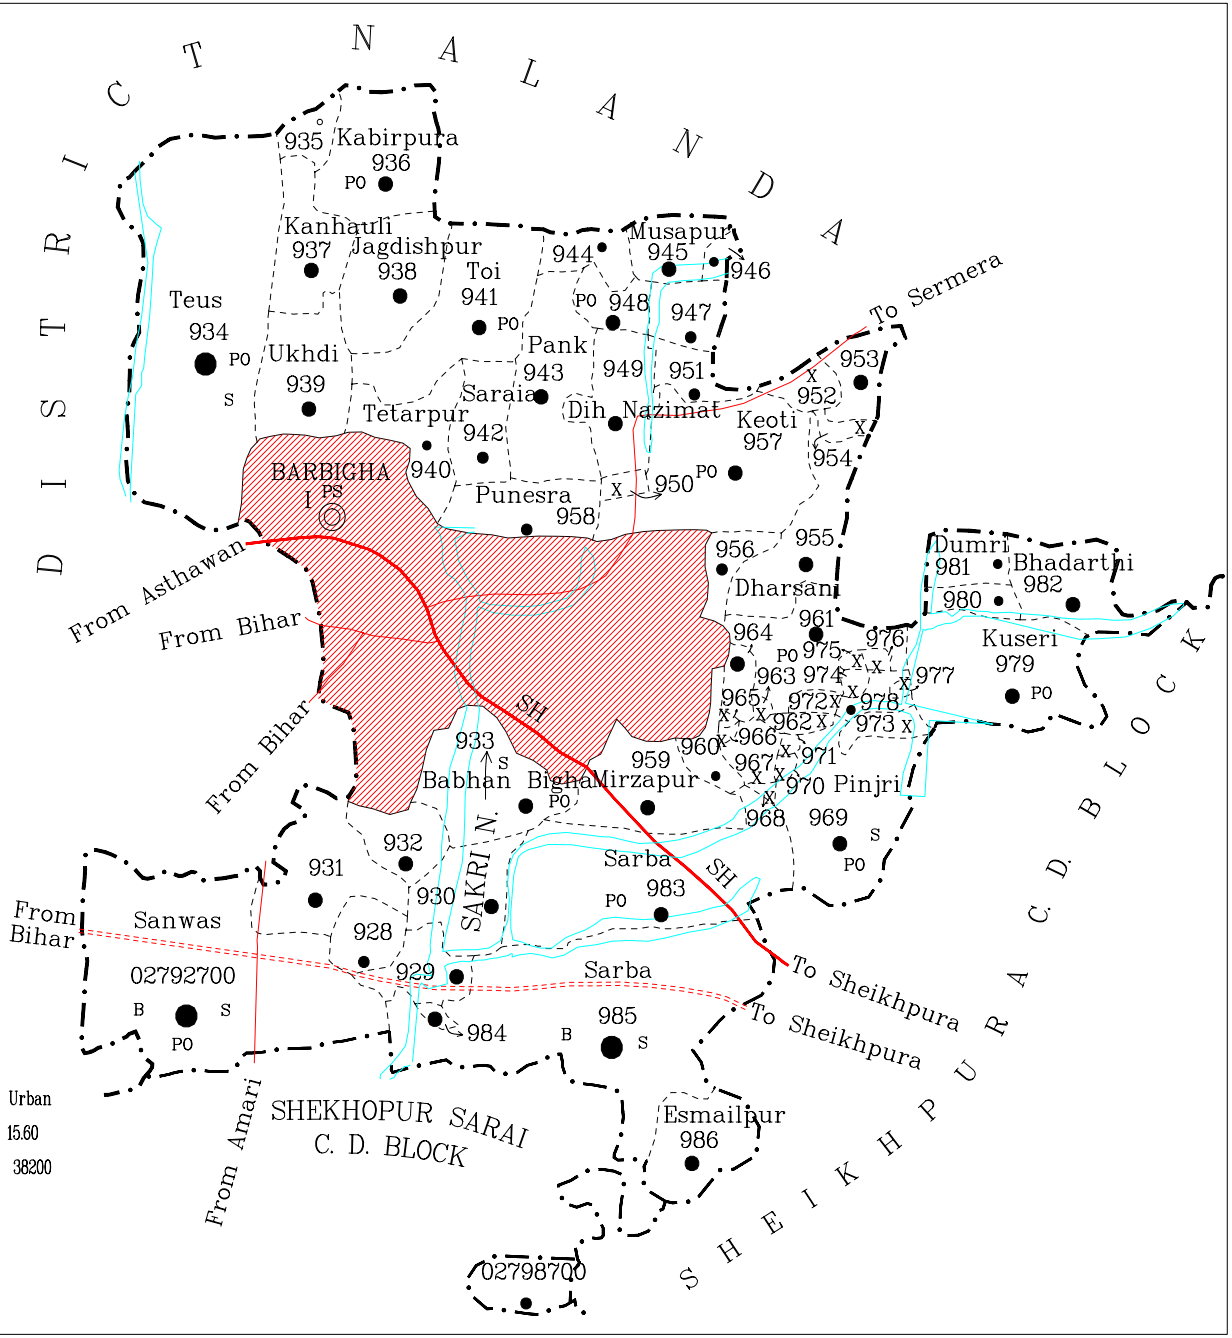

Appendix IA	:	Indicates number of villages CD Blockwise having one or more primary schools.
Appendix IB	:	Indicates number of villages CD Blockwise having primary, middle and secondary schools.
Appendix IC	:	Shows number of villages CD Blockwise with different sources of drinking water facilities.
Appendix II	:	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix IIA	:	Indicates list of Census Towns which do not have one or more amenities.
Appendix III	:	It gives the land utilization data in respect of Census Towns/non-municipal Towns.
Appendix IV	:	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix V	:	Summary showing number of villages not having Scheduled Castes population.
Appendix VI	:	Summary showing number of villages not having Scheduled Tribes population.
Appendix VIIA	:	The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges
Appendix VIIB	:	The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.
Appendix VIII	:	Number of Villages under each Gram Panchayat(C.D. block wise)
Appendix IX	:	Statement showing number of girls schools in the villages

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST

(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD

(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town ‘yes’ is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matri-culation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preli-minary Census 2001 Population Enumeration results and finally clear them for use. The

responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In

addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/C.D. Block / UA / City / Town
2. Primary Census Abstract for Scheduled Castes	District/C.D. Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/C.D. Block/Town
4. Village Primary Census Abstract	CD Block/Village wise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled

Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II
ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	**1991**	**75**	**84**	**86**	**89**
	1981	**94**	**112**	**125**	**141**
Munger	1991	77	82	94	99
	1981	100	120	140	158

From the estimates of child mortality (number of deaths by ages 1,2,3 and) given in above Annexure as q(1),q(2),q(3) and q(5) for the state of Bihar and district of Munger(from which the district of Sheikhpura has been carved out in 2001 Census). It is observed for 1981 and 1991 that there has been a general decline in child mortality over the decade 81-91 both in the district and the state as a whole. It is interesting to observe that child mortality in the district for 1,2,3 and 5 years of children in 1981 and 1991 was higher in comparison to the state of Bihar. In 1991, the child mortality in 2 years age in the district was a bit lower than the state's average. The estimate suggests that there has been a decline in the child mortality in both the state and the district but the pace of the decline has been a bit slower in the district than the state as a whole.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

Various fertility measures for the district and the State(1991-Census)

1	State 2	District 3
CBR	36.2	40.6
TFR	5.3	6.2
TMFR	5.9	6.7
GFR	163.0	184.0
GMFR_	186.0	204.0
Child woman ratio	66.6	66.7
No. of children ever Born per woman age Group (45-49)	4.1	4.2
Mean age at Marriage	16.5	16.1

It can be observed from the other fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR), General Fertility Rate (GFR) and General Marital Fertility Rate (GMFR) are higher in parrent district (Munger) in comparison to the state as whole in1991 Census.The child woman ratio and No. of children ever born per woman in age Group (45-49) are also higher than the State everage. The mean age at marriage in district is lower than the State everage mean age at marriage.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 2001 CENSUS

State/District	Born elsewhere in the district of enumeration			Born in other districts of Bihar			Born in Bihar		
	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10
Bihar	**13,662,859**	**1,303,785**	**12,359,074**	**4,532,117**	**585,005**	**3,947,112**	**18,194,976**	**1,888,790**	**16,306,186**
	(68.4)	**(62.0)**	**(69.1)**	**(22.7)**	**(27.8)**	**(22.1)**	**(91.0)**	**(89.8)**	**(91.2)**
Sheikhpura	39,584	4,008	35,576	79,568	4,961	74,607	119,152	8,969	110,183
	(32.5)	(43.1)	(31.6)	(65.2)	(53.4)	(66.2)	(97.7)	(96.5)	(97.8)

State/District	Born in other states			Born in other countries			Total migrants		
	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	**1,582,339**	**195,360**	**1,386,979**	**211,880**	**18,501**	**193,379**	**19,989,195**	**2,102,651**	**17,886,544**
	(7.9)	**(9.3)**	**(7.8)**	**(1.1)**	**(0.9)**	**(1.1)**	**(100.0)**	**(100.0)**	**(100.0)**
Sheikhpura	2,785	321	2,464	8	3	5	121,945	9,293	112,652
	(2.3)	(3.5)	(2.2)	(0.0)	(0.0)	(0.0)	(100.0)	(100.0)	(100.0)

The growth of population for any area (be it any district or state) is influenced by the pattern of migration (in-migration as well as out-migration). However, for want of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population, although such impact may not be much in most of the cases.

It is apparent from Annexure IV(A) that out of 19,989,195 migrants in the State as per place of birth the share of Sheikhpura district is 121,945, i.e., 0.6 percent of state total. Female migrants outnumber the male migrants both in the district and the state. In case of migrants born in Bihar there is wide gap between male and female population in absolute number. With respect to percentage figures of born elsewhere in the district of enumeration the district percentage (32.5) is less than the state percentage of (68.4).

When we compare the percentage figures of migrants born in other districts of Bihar it is crystal clear that the district percentage (65.3) is higher than the state percentage (22.7).The percentage figure for born in other states and in other countries and lower in the district than the state as per 2001 Census.

ANNEXURE - IV (B)

INTERSTATE MIGRANTS TO BIHAR

	2001 Census	
Place of Birth	**Migrants**	**Percentage to total migrants**
1	**2**	**3**
Uttar Pradesh	434,051	27.4

Total	**1,582,339**	**100.0**

INTERSTATE MIGRANTS TO SARAN

Place of Birth	2001 Census Migrants	2001 Census Percentage to total migrants
1	2	3

Annexure-IV(B) deals with interstate migrants to the district of Sheikhpura and the state of Bihar. The district received only 0.2 per cent of the migrants from outside the state in comparison to total migrants coming to the state. The State of Uttar Pardesh and Jharkhand have been the major contributor as regards immigration, to the state is concerned in 2001 Census. In case of Bihar 14 states, namely Uttar Pardesh, Jharkhand, Assam,West Bengal, Nagaland, Chhatisgarh, Gujarat, Uttranchal, J&k, Orissa, Maharashtra, Rajasthan, Haryana and Andhra Pradesh together account for 15.4 lakh (97.2%) of the 15.8 lakh interstate migrants, Uttar Pradesh and Jharkhand states are prominent in contributing 27.4 and 21.4 percent of migrants respectively to the state in 2001. In respect of Sheikhpura of the total of 2,785 interstate migrants, Jharkhand and West Bengal states contributed 45.2 and 22.3 percent respectively to the district altogather 6 major states contributed 96.3 percent of the total inter state migrants to Sheikhpura district in 2001 Census.

The Indian census has always attempt to give a realistic and interesting picture of the religious persuasions of people of the state. While collecting information on religion at the time of census, the enumerator had clear instructions to record the religion as actually returned by respondents. Six religions have been treated as major religions as they are numerically prominent. These are Hindus, Muslims, Christians, Sikhs, Buddhists and Jains. Those not belonging to any of these religious communities have been classified under the category "other religions and persuasions", while those who did not state any religion have been classified under the category religion not stated.

It may be seen that Hindus are by far the numerically most important religious community as it accounts for as much as 83.2 percent of the state population and 92.7 percent of the population of Sheikhpura district. The Muslims come next with 16.5 percent of the state population. The percentage of Muslims in the district of Sheikhpura is 7.2 percent which is lower than the state average. The proportion of Christians, Sikhs and Buddhists population in the state is very low (0 to 0.1 percent only). In Sheikhpura district, the proportion of Christians, Sikhs, Jains and Buddhists is almost negligible (0 to 0.1 percent only).

Annexure V(B) above shows religion-wise distribution of population of 2001 census. Both, for Sheikhpura district of Bihar and its C.D. Blocks, Hindus form great chunk of society . In various C.D.Blocks of the district, the Hindus and Muslims are the two major religious communities and trends are more or less the same as in case of the district. Ghat Kusumbha C.D. Block has the highest proportion of Hindus (98.3%) whereas Shekhopur Sarai C.D. Block has the maximum proportion of Muslims (11.6%). Followers of other religions e.g., Christians, Sikhs, Jains, Buddhists, etc., form very small chunk of the society in all the C.D. Blocks of the district.

It is quite evident from above annexures that Sheikhpura district as well as the state have a relatively higher proportion of never married males and married females. This may be attributed to the fact that women enter into marital knot at comparatively younger ages than males. As against 56.3 and 55.1 percentages of never married males in Bihar state and Sheikhpura district respectively, the corresponding percentages among married females is 47.8 and 49.0.

While analyzing marital status by broad age groups one finds that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than males. However, it is interesting to note that the proportion of married males and females in the age group 10-14 or 0-14 is comparatively more in Sheikhpura district. It is also found that child marriage is more prevalent in rural areas of the state and the district than urban areas.

It is also significant to note that the proportion of never married females in Sheikhpura district and state as a whole in the age group 15-19 and above is much lower than the never married males. The proportion of divorced or separated males and females is significantly low in Sheikhpura district as also in Bihar state.

Literacy is one of the important demographic characteristics. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the census has already been explained in the beginning of this publication.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 2001census was 47.0. Male literates greatly out numbered female literates as the literacy

rate for males, according to 2001 census, was 61.9 while for females the literacy rate was only to the extent of 33.9 percent.

The overall literacy rate for the district of Sheikhpura, according to 2001 census was only 48.6 percent, about 1.6 percentage points higher than the state average. Male literates in the district accounted for 61.9 percent whereas female literates constituted only 33.9 percent of the total population. The literacy rates for males and females in sheikhpura district are higher than the corresponding figures for Bihar state.

Annexures VII(A),VII(B),VII(C) and VII(D) furnish informations regarding absolute number of illiterates in Bihar state and Sheikhpura district as also percentage distribution of literates by different level of education by different age-groups are also provided.

A breakup of literate population by various educational levels of 2001 census shows that 23.0 percent males and 30.0 percent females in the state were literate below primary but had not attained any specific level of education. 5.4 percent males and 5.8 percent females in the state and crossed the primary standard, 14.6 percent males and 13.2 percent females had passed the middle examination while 32.1 percent males and 20.4 percent females in the State were matriculates and above. The contrast between males and females was significant among matriculates and above as the percentage of female literates who had passed the matriculation and above examination were about 11.7 percentage points less than literate males population.

According to 2001 census the proportion of literates by different levels of education in Sheikhpura district remained lower in lower levels upto Primary standard and remained higher in higher standards from Matriculation and above.

ANNEXURE - VIII
PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

STATE			**DISTRICT**		
Bihar			Sheikhpura		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Magadhi/Magahi	422,875	80.5
Hindi	14,524,035	17.5	Hindi	67,669	12.9
Magadhi/Magahi	12,132,383	14.6	Urdu	33,759	6.4
Maithili	11,830,684	14.3	Bhojpuri	243	0.0
Urdu	9,457,544	11.4	Mundari	230	0.0
Surjapuri	928,458	1.1	Maithili	144	0.0
Bengali	442,352	0.5	Arabic/Arbi	135	0.0
Santali	382,866	0.5	Santali	81	0.0
Kurukh/Oraon	57,952	0.1	Bengali	51	0.0
Marwari	27,152	0.0	Marwari	25	0.0
Total of Other Mother Tongues	12,842,100	15.5	Total of Other Mother Tongues	290	0.1
Total	**82,998,509**	**100.0**	**Total Population**	**525,502**	**100.0**

Mother tongue, which is medium of expression, is an important attribute of population. The Census of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 2001 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

Annexure VIII presents distribution of different mother tongues as returned during the 2001 Census both for Sheikhpura district and Bihar state.

It can be seen from the above annexure that Magadhi/Magahi language as mother tongue constitutes the major proportion (80.5 %) of the population in Sheikhpura district where as Bhojpuri has been the main mother tongue in (24.5 %) the state of Bihar. Hindi,one of the main mother tongue of the district was returned by 12.9 percent of the population. The corresponding percentage for the Urdu, the third most prominent mother tongue in Sheikhpura district, is 6.4. Hindi has got the second place in the state with 17.5 percent.
