Sudhir Kumar Rakesh
of the Indian Administrative Service
Director of Census Operations, Bihar

Carpet Industry of Obra

C.D. Block Obra and its adjoining areas under the district of Aurangabad had been the excellent centre of Carpet weaving Art since the medieval (Mughal) period of Indian history. Carpets woven by the magic of weaver's fingers here reflects the same fineness and spirituality of Iranian carpets which is often seen in the carpets of Bhadohi and of some other centres.

Annexure III : Various measures of fertility and mean age at marriage 1991 Census 905

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 Census 906

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 Census 909

Annexure VI : Marital status of population as per 1991 Census 914

Annexure VII : Age, Sex and Education in the district, 1991 Census 924

Annexure VIII : Distribution of different mother tongues returned in 1991 Census 930

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &

Census Commissioner, India

New Delhi

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex- Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

Deputy Director of Census Operations,
Bihar, Patna

District Highlights – 2001 Census

1. Aurangabad ranks 22nd in terms of population (20,13,055) and 7th in terms of area (3,305 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Aurangabad is the 33rd densely populated district in the state with 609 persons per sq.km as against the state's 881.
3. Aurangabad ranks 8th in terms of sex-ratio (934) against the state's 919.
4. There are 109 uninhabited villages (out of 1,848 total villages) in the district of Aurangabad.
5. Obra (under Obra C.D. Block) is the most populated village (12,096) and Bamahi (under Goh C.D. Block) is the least populated village (1) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 75% of the total workers are engaged in Primary sector.
7. C.D. Block Nabinagar has the highest number of villages (331) in the district and C.D. Block Daudnagar has the lowest number of villages (63).
8. Umga (under Madanpur C.D. Block) has the largest area (5,362 hectare) and Tendua Harkes (under Obra C.D. Block) has the smallest area (1 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 98.7 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census

for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) mortality (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, based on 1991 and/or Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography. The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Prior to 1973 Aurangabad was a subdivision of Gaya District. It acquired the status of an independent district in the year 1973 as a result of reorganisation of district boundaries. It has a rich heritage and close linkage with its parent district (Gaya). The administrative headquarters of the district is located at Aurangabad which is main town of the district. The district is bounded on the north and east by Gaya district, on the south by Palamu and part of Gaya district and on the west by the district of Rohtas.

The history of Aurangabad is part of the history of the ancient empire of Magadha which included the undivided districts of Patna and Gaya. Three-fourth of India's early history is the history of Magadha and the area which forms the present district of Aurangabad was a proud sharer of this glory. Although it was a part of the Mahajanpada of Magadha, it had its distinct racial and cultural character. Dr. Grierson in his 'Notes on the District of Gaya' has written that the northern and southern parts of Gaya (old Gaya district consisting also of Nawada and Aurangabad) a different from each other in many characteristics. Aurangabad which lied in the southern portion of old Gaya district escaped even the all embracing influence of Buddhism.

The area under Aurangabad district represents an **amalgam** of prehistoric and historic periods. The prehistoric period of Magadha is shrouded in obscurity and so is the history of its area. One thing is, however, certain that, as a part of Magadha, it remained outside the pale of Aryanism and was associated with the culture of Vratyas. The Vedas have displayed marked antipathy towards the people of this area. The Brahmans and Kshatriyas coming to the land were spoken of in a derisive tone as **Brahma-Bandhu** and **Khatra-Buhand**, that is, degraded Brahmanas and Kshatriyas. Migration to this land was forbidden and a penance was necessary having done so. The term 'Kikota', used to denote Magadha, means a non-Aryan people. A Vratya was admitted to the Aryan-fold after performing a rite called 'Vratyastoma'. This land was indeed on the extreme confines of Aryan civilization and culture. It was regarded at best as a settlement.'

Forming part of the vast territorial empire of Magadha, perhaps, the land we call Aurangabad today had the distinction of being ruled by Bimbisara and Ajatsatru and later on by Chandragupta Maurya and Ashoka. The river Sone has been accepted by several authorities as having been the western boundary of the Magadha Empire.

After the downfall of the Mauryas this area remained under the sovereignty of the Sungas and Kushanas. Harshavardhan also ruled over this land. When the Pala dynasty of Bengal rose to power it established its sway over this area. The Pratiharas were able to conquer it from the Palas but their sway lasted for a short period and Mahipala and later on Narayan Pala reconquered it to the Pala Kingdom.

The most prominent feature of Aurangabad is that although territorially it formed a part of the great Magadhan Empire, culturally it continued to enjoy its own identity. Even during the hay day of Ashoka, it was able to resist the flow of Buddhism. Later on people from the Rajputana came and settled here. The ruling houses of Deo, Mali, Pawai, Chandragarh and Siris were descendents of the warrior Rajput tribes who migrated from Rajasthan. This accounts for the fact that during Sultanate, Mughal and British periods, resistence to their domination was a usual phenomena in this area. The assertion that Bukhtiyar Khilji established his permanent occupation over this area is also not true. Modern researchers point out that Sen and Garhwal kings succeeded in maintaining their independence in parts of South Bihar embracing the area now termed as Aurangabad. Not until the time of Balban could this area be assimilated into the Sultanate.

During the reign of Sher Shah the area became strategically important. It formed part of the Rohtas Sirkar. The Afghan ruler built the famous Grand Trunk road which passed through the small town of Aurangabad.

The Afghan twilight under Sher Shah was followed by the long imperial domain under Akbar. The emperor had the news of Afghan upsurge in the area under the leadership of Masum, the leader of the rebels. Dalpat Shahi, a Hindu chieftain of Bhojpur was giving assistance to Masum. Akbar sent

Todarmal as the head of a strong army to suppress the revolt. The war, which took place at Shahr-I-Bahira or Sherghati, resulted in the total defeat of the Afghans. Todarmal, the shrewd and brave leader brought the entire area between Rohtas and Sherghati under the Mughal Empire.

The area between Daudnagar and Aurangabad assumed great strategic importance when Daud Khan, Aurangzeb's Subedar in Bihar marched against the Raja of Palamu. As a mark of victory against the Raja in the year 1664 Daud Khan founded the city of Daudnagar .Shamcher khan who succeeded Daud Khan as the Governor of Bihar got a tomb erected in his own life time at Shamshernagar. Hamidnagar and Ghausgarh are other small towns perpetuating the names of his two brothers.

After the downfall of the Mughal Empire, the area between Gaya and the river Sone came to be parcelled out into a number of Zamindaries, one of the being that of Siris-Kutumba. However, Allivardi subdued most of them. The area under review witnessed Maratha onslaught under Balaji Rao. Mid 18th century was marked by other such Maratha campaigns.

The rebellious character of the Zamindaries of Siris-Kutumba and Pawai is the proud preserve of the history of this area. The Deputy Governor of Bihar, Ram Narayan was forced to lead an expedition against Vishnu Singh of Siris-Kutumba.

The distinction of engineering one of the first rebellions against the British authority belongs to Raja Narain Singh of Pawai whose forefathers, said to be the descendents of Prithvi Raj Chauhan had captured the fort of Pawai in the 1248 A.D. Raja Narain Singh who succeeded the throne in 1764, had his sympathy for the Raja of Benaras, Cheyat Singh. A book named 'Early English Administration (1781-83)' by Reginald Hand has many things to say about Raja Narain Singh. The Raja along with Kulie Khan of Sasaram and Pitambar Singh of Tekari extended his support to Cheyat Singh. When the Raja resisted the advance of the British forces he was arrested on 5th March, 1786. Recorded evidences are there to corroborate the fact that the Raja was regarded as a threat to British position in the area. The Saga of Raja Narain Singh found expression during the movement of 1857 and India's struggle for freedom. The mutiny at Danapur and Benaras created commotion in the whole area. The district of Bihar as it was then called became the centre of this movement. In the years following the 1857 movement, Government took measures to tighten their grip over administration, and a separate district of Gaya was created in 1865 by ceding portions of the old districts of Behar and Ramgarh. Later subdivisions were also created with the same end in view. The subdivision of Aurangabad was created in 1865.

The district of Aurangabad (which was a part of Gaya district at that time) played a prominent role in all freedom movements in the subsequent period. A number of congressmen from this place including Sri Anugrah Narain Sinha and a few freedom revolutionaries scacrificed everything for attainment of country's independence. The '**Sahid Smarak**' at the Assembly gate in Patna bears the testimony to Jagat Pati Kuanar's valour and will to sacrifice for the cause of nation.

(iii) Administrative set up

The district of Aurangabad lies in the southern Bihar region of the state. It is adjacent to the district of Gaya. There are two subdivisions viz., Daudnagar and Aurangabad . The district has got eleven Community Development Blocks. The number of villages and towns in the district are 1,848 and 5 respectively

District Magistrate is posted in the district who is the top most official of Revenue and civil administration. He often belongs to I.A.S. cadre. District Magistrate conducts development and welfare works in the district. ADM and other officers are posted in order to help D.M. in the administration. The district has been divided into two subdivisions namely Aurangabad and Daudnagar which are headed by subdivisional officers either from I.A.S. or B.P.S.C. cadre. S.D.Os. are under direct authority of D.M. Subdivisions are divided in 11 Development Blocks where B.D.Os. are posted who undertake development and welfare projects.

Judicial Administration : The Judges and Munsif magistrates are posted at district and

subdivision who administer and deliver justice of different kinds. The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Aurangabad is the head of the district police administration. The Deputy Superintendent of Police are posted to assist the police superintendent who are either from the Indian Police Service or the Bihar Police Service. In each subdivision of the district, the Deputy Superintendent of Police are posted who keep control on police administration.

(iv)Physical Features

Natural Divisions

Aurangabad district consists of only two subdivision, viz., Aurangabad Sadar and Daudnagar subdivision comprising of 11 Development Blocks stretching over an area of 3,305.0 km^2. The district consists of flat alluvial plain. The northern portion of the district is mostly a plain formed a alluvial soil and is extremely fertile. In a few portion of Aurangabad, fertile alluvium is found. This is locally known as Kewal and is very suitable for paddy, wheat and sugar-cane. In the south-western part of this district, below the hills, sandy loam is found. It is suitable for cultivation of wheat and potato.

The only important and principal river of the district is the Sone which rises near the sources of Narbada and Mahanadi in the elevated plateau of Central India near Maikal Hills. It treverses a course of 520 kilometres through a hilly tract until it enters the gangetic valley opposite Akbarpur in Rohtas district. It then passes Barun and Daudnagar and then leaves the district. The Sone receives no tributary of any importance from the point where it enters the district until it joins the Ganges. The river, as a matter of fact, does not enter the district and after passing Barun and Daudanagar, leaves the district. At Barun there is a massive masonry dam on the river Sone. It feeds the Sone Canal System which provides irrigation to large area of aghani paddy, Rabi and hotweather crops. The Sone sand, noted for its large sized grains, is used extensively in construction works.

Climatic Condition

The district, owing to its great distance from the sea, suffers from extremes of climate. It becomes very hot during the summer and quite cold during the winter. Summer begins in late March. May and June are extremely hot. The mercury shoots upto 46°C in May. The cold weather starts from the month of November and continues till the middle of March. Rainy season ranges between mid-June and early October. Generally October is not a rainy month but sometimes monsoon continues till this month and the last spell of rain (Hathia) does come during this month although its failure is not uncommon.

Rainfall

The district receives more than 90 percent of its total annual rainfall from the monsoon during the rainy season which lasts from the middle of June to early October. The rains bring great relief to the heat oppressed people of the district. The district receives an average annual rainfall of 44.96 inches. The district gets some winter rain also in January and February though the quantity is small.

Foresets

There is no forest area worth mentioning in the district. However, under the National Forest Policy Government has undertaken a programme of afforestation in certain parts of the district.

Land use Pattern

Agriculture is the principal economic activity of the majority of people in the district and nearly 82 percent of the total working population are engaged in it. The land in the western portion of the district is fairly levelled and is mostly under cultivation. It has the benefit of canal irrigation and hence it is considered to be a fertile tract. The greater part of the district was once the basin of the Sone river itself and the soil being largely composed of old alluvial deposit is naturally more productive than elsewhere.

The princpial crops grown in the district are rice (Bhadai and Aghani) and wheat. The system of pynes and ahors is not in a good shape, as it happened be earlier, and the agriculture has been, to a great extent left at the mercy of the vagaries of monsoon.

Irrigational facilities

Failure of monsoon and scantiness of total rainfall with its irregularity are the chief causes which have led the people of the district to resort to artificial irrigation. In certain pockets of the district the cultivators have the benefit of Sone Canal and are thus certain of an ample and regular supply of water, but elsewhere the people are dependent of methods of irrigation which have been practiced in the earlier days also such as Pynes, Ahras, wells, etc. The government has, however, been paying increasing attention to expansion and development of irrigational schemes and have been allotting considerable amount for minor irrigation works in all important sectors of the district. This will, naturally, tend to improve the fertility of the soil and will contribute to larger production of crops.

Mines and Minerals

No mineral is found in this district. Mines worth their name also do not exist in the district. However, traces of tin and tungsten are reported to be available in the Deo block.

Industrialisation

The district of Aurangabad has a few cottage industries like the manufacture of blanket, carpet and brass utensils located at Daudnagar and Obra. Lac was once an important industry in the town of Daudnagar. It has, however, died out because of deforestation and reclamation of land.

Tenancy

There have been changes in law which have altered the system of rent payment as has been observed by Mr. O'Malley in the District Gazetteer of Gaya. He mentions that about 70 to 75 percent of the cultivation is held under the system of payment of rent in kind. This was necessary due to the physical configuration of the country which made an extensive system of irrigation necessary and it is only the landlords that could maintain the irrigation channels. In the last survey and settlement operations it was found that about 60 percent of the cultivation was held under the system of payment of rent in kind. But there was clamour from the side of the cultivators against the system of **bhaoli** rent. There is no doubt that this system proved harsh to the cultivators. The commutation of cash rent was permissible under section 40 of the Bihar Tenancy Act. A rent commutation drive was launched by Government and a large number of Rent Commutation Officers with powers under section 40 of the Bihar Tenancy Act were appointed in 1946. The drive considerably reduced the percentage of produce rent. The produce rents were also commuted into cash rent by agreement between he parties during the same period'.

The District Gazetteer further mentions that the large-scale prevalance of produce rent in Gaya district may be attributed to the fact that the landlords generally maintained the irrigation works. Their construction required a large expenditure and also an annual maintenance charge. The landlords were the only persons who could supply the capital for the construction and repairs and so they fully utilized their initial outlay and insisted on bhaoli rent. The liability of the maintenance of the irrigation works rested on the landlords according to the fard-e-abpashi prepared at the time of the last survey and settlement operations. Landlords were the only persons who could help the tenants to convert bhith lands into paddy lands. The landlords previously used to give seed, grains, etc. in loan to the poorer tenantry. For all these reasons the average tenants could not very well insist on the commutation of rent. As a fitting sequel to the State's anxiety to evolve a Welfare State and to give relief to the tenants, the Bihar State Management Act was passed but had to be repealed shortly in 1950. This act intended to do away with the Zamidari system. Subsequently the Bihar Land Reforms Act was passed according to which all intermediary interests passed to the State Government.

Livestock

In the district, local breed of cattle are generally found which are mostly of poor quality. They are not very useful either for draught purposes or for milk purposes. The best type of cattle both in respect of condition and breed is localized in canal zone specially in areas of Obra. Cattle generally are utilized for ploughing and transportation purposes. Steps have been taken by the government to improve the cattle breed by supplying Hariana and Tharparkar varities of bulls. There is a veterinary hospital in the district

headquarters, Aurangabad where livestock are cured of diseases. A Goshala Improvement Scheme has also been launched in the district by the State Government.

Co**mmunications**

The district is well served by net work of roads. The famous Grand Trunk Road (National Highway No.2) passes via the town of Aurangabad. The Grand Trunk Road has put the district on the road map of the country and provides easy transport facility to Calcutta in the east and Delhi in the west. There are also a few roads maintained by the State Public Works Department connecting Aurangabad with other district headquarters, Now the district is well served by a network of State bus routes.

A railway line from daltonganj passes through the Aurangabad district, almost parallel to the river Sone and joins the Grand Chord line at Barun.

As regards river communication, Sone is the only navigable river in which too, only small boats can ply during the dry season.

Trade and Commerce

The chief centres of trade in the district are Daudnagar and Rafiganj. It is served by a network of markets consisting of a number of permanent shops dealing mainly in grains and vegetables. The more important markes meet daily and commodities are brought to the other markets.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such

improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.

In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.

If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 metres and a breadth of at least 1.5 metres and a height of 2 metres. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in

occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq.

km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).—

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:—

i) a city or town with one or more contiguous outgrowths;—

ii) two or more adjoining towns with their outgrowths; and—

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category of households would cover only those households where

a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below :

Scheduled Castes

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhangad
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Sawasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes :

1. Asur
2. Baiga

3. Banjara
4. Bathudi
5. Bedia
6. Bhumij (in North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
7. Binjhia
8. Birhor
9. Birjia
10. Chero
11. Chik Baraik
12. Gond
13. Gorait
14. Ho
15. Karmali
16. Kharia
17. Kharwar
18. Khond
19. Kisan
20. Kora
21. Korwa
22. Lohara, Lohra
23. Mahli
24. Mal Paharia
25. Munda
26. Oraon
27. Parhaiya
28. Santal
29. Sauria Paharia
30. Savar

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption

are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation

A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.

Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per

1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid -year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid -year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age group and sex per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that.

The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/ Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

The population of the Aurangabad district during 1991 was 1,539,988 Hindus constitute over 90.5 per cent (1,393,347 persons) of the population in the district followed by Muslims 9.5 percent (1,46,016 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Aurangabad district during 1991 was1,539,988 . As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Auranbad district, Hindi, the main mother tongue of the district was returned by 93.2 percent (14,35,465 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Aurangabad district, was 6.7 percent (1,03,264 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Aurangabad during 1991 Census

The population of the Scheduled Castes in the district of Aurangabad was 358,274 according to 1991 Census. Numerically, the five most important SCs in the district were (i) Chamar , Mochi (123,902), (ii) Dusadh, Dhari, Dharhi (118,844), (iii)Bhuiya (49,695), (iv) Pasi (25,306) and (v)Dhobi (15,821). while Chamar, Mochi constituted the maximum proportion of Scheduled Castes of the population the prcentage being 34.6 (more than one third of the

total Scheduled Castes population)Dusadh and Bhuiya though numerically Second and third in order comprised only 33.2 and 13.9 percent of the SC population in the district. Pasi and Dhobi are much less in number as compared to the other three SCs mentioned above with only 7.1 and 4.4 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the five SCs described above as their percentage to total SC population was less than even 1.0 percent except Rajwar whose percentage was 3.6 respectively.

The population of Scheduled Tribes in the district of Aurangabad during 1991 Census was 504.Numerically, the five important STs were namely (i) Gond (ii) Oraon (iii)Munda(iv)Santal and (v)unclassified. Gond had 192 population which constituted 38.1 percent of the Scheduled Tribes population in the district. Oraon with 123 population constituted 24.4 percent of the ST population, Munda, Which were 84 in number constituted 16.7 percent of the ST population. Santal comprised 37 persons and constituted 7.3 percent of the ST population and Unclassified with 17 population constituted 3.4 percent of the total ST population in the district. Remaining Scheduled Tribes were comparatively very less in number than the five STs described above as their percentage to total ST population was less than even1.0 percent except Ho. Lohara/Lohra and Gorait whose percentages were 3.2,3.0 and 1.4 respectively.

(vii) 2001 Census Findings–Population and its distribution

According to the 2001 Census, the total population of Aurangabad district is 20,13,055 comprising 10,40,945 Males and 9,72,110 Females and constituting 2.4 percent of the State population spread over 3.5 percent of the area of the State in the 11 C.D.Blocks of the district. Nabinagar is the most populous where as Haspura is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001

11	Madanpur	130,337	130,337	0	166,172	166,172	0	27.5	27.5	0	0	0
	District											
	Total:	**1,539,988**	**1,421,936**	**118,052**	**2,013,055**	**1,842,998**	**170,057**	**30.7**	**29.6**	**44.1**	**7.7**	**8.4**

Table 1 shows that rise in the population of this district during 1991-2001 decade has been of the order of 30.7 percent. The rural population in the district has increased by 29.6 percent while the urban population growth over the decade has been as much as 44.1 percent. Rural urban migration is important factor which always leads to rapid expansion of the urban units. Among the C.D. Blocks, Aurangabad

has shown the highest increase in population over the decade with 43.2 percent. It may be due to the fact that Aurangabad town, the district headquarters, is located in this C.D. Block. The next highest increase in population is observed in Barun C.D. Block with 34.9 percent followed by Rafiganj and Kutumba C.D. Blocks with 31.1 and 30.8 percent respectively. Percentage decadal variation has been observed to be the least in the case of Daudnagar C.D. Block with 25.1 percent.

The increase in rural population during 1991-2001 has been highest in Barun C.D. Block with 34.9 percent followed by Aurangabad, Kutumba and Rafiganj C.D. Blocks with 33.0, 30.8 and 30.6 percent respectively.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/C.D.Block	Total number of inhabited Village	Total rural population			Number and percentage of villages	Population less than 200

8	Nabinagar	16 (5.3)	22,865	22,043	0 (0.0)	0	0	0 (0.0)	0	0
9	Kutumba	17 (7.9)	24,720	22,937	1 (0.5)	3,804	3,589	0 (0.0)	0	0
10	Deo	11 (9.6)	16,128	15,528	0 (0.0)	0	0	3 (2.6)	18,808	17,805
11	Madanpur	17 (14.0)	26,502	24,820	4 (3.3)	12,430	11,925	1 (0.8)	9,434	8,946
	District (Rural)									
	Total:	**177 (10.2)**	**259,376**	**242,853**	**22 (1.3)**	**73,480**	**69,268**	**6 (0.3)**	**39,946**	**37,217**

It may be observed in the table 2 that the maximum number of villages in the district lie in the population range of 500-999 accounting for 33.4 percent of the total inhabited villages closely followed by villages in the population range of 200-499 accounting for 25.0 percent of the total inhabited villages. The percentages of population in the above two population ranges are 22.9 percent and 8.2 percent of the total rural population of the district respectively. The villages in the population range of 1000-1999 constitute 22.4 percent of the total inhabited villages and in these villages the percentage of population is 28.9 percent. There are 177 villages in the population range of 2000-4999 accounting for 10.2 percent of the total inhabited villages and in these villages the percentage of population is 27.3 percent of the total rural population. There are 129 villages in the population range of less than 200 accounting for 7.4 percent of the total inhabited villages and in these villages the percentage of population is only 0.8 percent of the total rural population. There are only 22 villages in the population range of 5000-9999 accounting for 1.3 percent of the total inhabited villages and these villages the percentage of population is only 7.7 percent. There are only 6 villages in the highest population range of 10,000 and above accounting for only 0.3 percent of the total inhabited villages and in these villages the percentage of population is 4.2 percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicable in respect of Aurangabad district as there has been no change between 1991 Census and 2001 Census

District Total:	**1,739**	**100.0**	**1,842,998**	**100.0**
Population Density (Rural) of the district:		**577.6**		

The data presented in the above table highlight the fact that maximum proportion of villages in Aurangabad district lies in the density range (per square kilometer) of 501+ with 59.9 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 27.5 percent. 136 villages are in the density range of 201-300 which account for 7.8 percent. 51 villages are in the density range of 101-200 which account for 2.9 percent of the total inhabited villages. It would further be seen that small number of villages fall in the density range of 21-50 and 51-100 which account for 0.7 and 0.8 percent of the total inhabited villages respectively. Maximum number of villages fall in the density range of 501+ covering 74.6 percent of the population followed by villages in the density range of 301-500 which account for 20.6 percent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,037	1,036	1,081
1911	1,051	1,056	942	1,035	1,032	1,119
1921	1,020	1,027	886	1,003	1,004	971
1931	995	1,005	820	1,001	1,006	868
1941	1,002	1,012	842	1,001	1,003	959
1951	1,000	1,010	859	991	994	911
1961	1,005	1,020	832	1,001	1,006	881
1971	957	968	833	964	967	899
1981	948	959	852	956	961	889
1991	907	913	857	915	918	885
2001	919	926	868	934	937	899

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table 5 shows that the sex ratio for the urban areas of Aurangabad district is comparatively high as compared to the urban areas of the state during 1991 and 2001 Censuses. The sex ratio for the rural areas of the state is found to be comparatively low as compared to the rural areas of Aurangabad district during 1991 and 2001 Censuses. It is found that in case of sex ratio in the total population in the district it is higher than the sex ratio of the state of Bihar both in 1991 and 2001 Censuses.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C. D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Daudnagar	930	935	911
2	Haspura	958	958	
3	Goh	936	936	
4	Rafiganj	936	939	909
5	Obra	928	928	
6	Aurangabad	909	928	881
7	Barun	919	919	
8	Nabinagar	942	942	948
9	Kutumba	938	938	
10	Deo	943	943	
11	Madanpur	944	944	
	District Total:	**934**	**937**	**899**

In Aurangabad district as a whole there are 934 females for every thousand males. Within the district, the sex ratio varies from 958 in Haspura C.D. Block to 909 in Aurangabad C.D. Block. The sex ratio of Madanpur,Deo, Nabinagar, Kutumba, Goh and Rafiganj C.D. Blocks are 944,943, 942, 938, 936 and 936 respectively. The sex ratio of Daudnagar, Obra Barun and Aurangabad C.D. Blocks are below the total district average. The sex ratio figures for rural and urban areas of Aurangabad district are 937 and 899 respectively.

The sex ratio of Haspura, Rafiganj, Nabinagar, Kutumba, Deo and Madanpur C.D. Blocks are higher than the district rural average of 937 while Daudnagar (935), Obra (928), Aurangabad (928) and Barun (919) C.D. Blocks have sex ratio below the district rural average. The urban sex ratio of the district is 899 which is lower than the total and rural averages of the district .

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C. D. Block	Sex ratio
1	2	3
1	Daudnagar	935
2	Haspura	958
3	Goh	936
4	Rafiganj	939
5	Obra	928
6	Aurangabad	928
7	Barun	919
8	Nabinagar	942
9	Kutumba	938
10	Deo	943
11	Madanpur	944
	District (Rural) Total:	**937**

As for rural in Aurangabad district there are 937 females for every thousand males. Within the district, the sex ratio varies from 958 in Haspura C.D. Block to 919 in Barun C.D. Block. The sex ratio figures of Daudnagar, Goh, Rafiganj, Obra, Aurangabad, Nabinagar, Kutumba, Deo, Madanpur C.D. blocks are 935, 936, 939, 928, 928, 942, 938, 943 and 944 respectively. The sex ratios of Haspura, Rafiganj, Nabinagar, Kutumba, Deo and Madanpur C.D. Blocks are higher than the district rural average of 937 while Daudnagar, Goh, Obra, Aurangabad, Barun C.D. Blocks have sex ratio below the district rural average.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	13	0.7	1,699	0.1
700-749	18	1.0	5,080	0.3
750-799	37	2.1	19,692	1.1
800-849	141	8.1	83,165	4.5
850-899	286	16.4	299,384	16.2
900-949	542	31.2	725,836	39.4
950-999	384	22.1	467,254	25.4

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001 (*Concld.*)

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
1000-1099	259	14.9	217,602	11.8
1100+	59	3.4	23,286	1.3
District Total:	**1,739**	**100.0**	**1,842,998**	**100.0**
Sex ratio (Rural) for District:		**937**		

It is observed in the table 8 that the maximum proportion of villages in Aurangabad district lies in the sex ratio range of 900-949 and these villages account for 31.2 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 39.4 percent of the district rural population. 384 villages (22.1%) fall in the sex ratio range of 950-999 and these villages account for 25.4 percent of the rural population of the district. 286 villages (16.4%) are in the sex ratio range of 850-899 and these villages account for 16.2 percent of the rural population. 259 villages (14.9%) fall in the favourable sex ratio range of 1000-1099 and these villages account for 11.8 percent of the rural population. 141 villages (8.1%) are in the sex ratio range of 800-849 and these villages account for only 4.5 percent of the population. 59 villages (3.4%) fall in the very favourable sex ratio range of 1100+ and this small proportion of villages accounts for 1.3 percent of the population. Only 37 villages (2.1%) are in the range sex ratio of 750-799 which account for 1.1 percent of the population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Sex ratio
1	2	3	4
1	Aurangabad	M	877
2	Daudnagar	M	911
3	Jamhaur	NA	920
4	Nabinagar	NA	948
5	Rafiganj	NA	909
	Sex ratio (Urban) for the district:		**899**

There is no urban agglomeration in Aurangabad district. There are only five urban units i.e. Daudnagar (M), Rafiganj (NA), Jamhaur (NA) Aurangabad (M) and Nabinagar (NA). The sex ratio of the urban areas of the district is is 899 according to 2001 Census. The sex ratio of Nabinagar (NA), Jamhaur (NA), Daudnagar (M) and Rafiganj (NA) are higher than the district urban average of 899 while Aurangabad (M) has sex ratio below the district urban average.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

	District (Rural)					
	Total:	**1,842,998**	**450,491**	**1,355**	**24.4**	**0.1**

The above table indicates that the percentage of the Scheduled Castes in Aurangabad district is of the Order of 24.4 percent of the total population. The highest percentage of Scheduled Castes population is in Madanpur C.D. Block with 32.7 percent of the total population closely followed by Deo, Kutumba, Nabinagar, Barun, Haspura, Daudnagar, Obra, Rafiganj, Aurangabad and Goh C.D. Blocks with 31.2, 27.1, 25.2, 23.1, 22.8, 22.7, 22.3, 22.0, 21.8 and 18.8 percent respectively. The percentages of Scheduled Castes population in Madanpur, Deo, Kutumba and Nabinagar C.D. Blocks are higher than the district rural average (24.4%). The percentage of Scheduled Tribes population in the C.D. Blocks of Aurangabad district is almost negligible as has been observed in the above table.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Castes population to total population	Number of villages	Percentage	Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	195	11	0	0.0
Less than 5	74	4	1,403	0.3
5-10	139	8	13,096	2.9
11-20	405	23	89,361	19.8
21-30	390	22	137,233	30.5
31-40	240	14	100,983	22.4
41-50	134	8	49,677	11.0
51-75	107	6	42,678	9.5
76 and above	55	3	16,060	3.6
District Total:	**1,739**	**100**	**450,491**	**100.0**

From the table above, it is apparent that there are 405 villages accounting for 23.0 percent of the inhabited villages in the district where the population of Scheduled Castes ranges between 11 and 20 percent of total population. This is closely followed by villages where the population of the Scheduled Castes ranges between 21 and 30 percent of the total population. These 390 villages account for 22.0 percent of the total inhabited villages. There are 240 villages which account for 14.0 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is between 31 and 40. There are 134 villages which constitute 8.0 percent of the inhabited villages where the percentage range of Scheduled Castes population to total population is 41 to 50. 107 villages are such which constitute 6.0 percent of the inhabited villages where the percentage range of Scheduled Castes population to total population is between 51 and 75 . There is no Scheduled Castes population in 195 villages which constitute 11.0 percent of the inhabited villages in the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	1,663	95.6	0	0.0
Less than 5	69	4.0	828	61.1
5-10	5	0.3	341	25.2
11-20	1	0.1	78	5.8
21-30	1	0.1	108	8.0
31-40	0	0.0	0	0.0
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	0	0.0	0	0.0
District Total	**1,739**	**100.0**	**1,355**	**100.0**

As regards the population of Schedules Tribes it can be seen from the table above that there are only 76 villages in the district where Scheduled Tribes Population exist. In all these villages the population of the Scheduled Tribes is as low as less than 5 percent of the total population. There are as many as 1,663 villages which constitute 95.6 percent of the total inhabited villages in the district which have no Scheduled Tribes population. There are 5 villages which account for 0.3 percent of the total inhabited villages where the percentage of Scheduled tribes population to total population is between 5 and 10. There is only one village which account for 0.1 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is between 11 and 20 and 21 and 30.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Daudnagar (M)	38,014	5,213	17	13.7	0.0
2	Rafiganj (NA)	24,992	3,021	21	12.1	0.1
3	Jamhaur (NA)	8,608	2,000	0	23.2	0
4	Aurangabad (M)	79,393	8,175	224	10.3	0.3
5	Nabinagar (NA)	19,050	3,866	23	20.3	0.1
	District(Urban) Total	**170,057**	**22,275**	**285**	**13.1**	**0.2**

Table 18 above shows that there is no urban agglomeration in Aurangabad district. There are only five statutory towns in the district i.e. Daudnagar (M), Rafiganj (NA), Jamhaur (NA), Aurangabad (M) and Nabinagar (NA). The percentage of Scheduled Castes population to total population is 13.1 in urban areas of the district. The percentage of Scheduled Tribes population in urban areas of the district is 0.2 percent. The percentage of Scheduled Castes population in Jamhaur (NA), Nabinagar (NA) and Daudnagar (M) are higher than the district urban average (13.1%) while Refiganj (NA) and Aurangabad (M) have the percentage of Scheduled Castes population below the district average.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Daudnagar	940	840
2	Haspura	940	615
3	Goh	932	375
4	Rafiganj	934	1,000
5	Obra	928	1,200
6	Aurangabad	910	1,077
7	Barun	916	761
8	Nabinagar	944	844
9	Kutumba	940	1,208
10	Deo	942	1,059
11	Madanpur	928	1,241
	District (Rural) Total	**933**	**958**

Table – 19 shows that the sex ratio of Scheduled Castes varies from 944 in Nabinagar C.D. Block to 910 in Aurangabad C.D. Block. The sex ratio in Barun C.D. Block is 916. The sex ratio in Deo, Kutumba, Daudnagar, Haspura, Rafiganj C.D. Blocks are higher than the district average. The sex ratio of Goh, Obra, Aurangabad, Barun and Madanpur C.D. Blocks are lower than the district average.

The sex ratio of Scheduled Tribes varies from 1241 in Madanpur C.D. Block to 375 in Goh C.D. Block. Sex ratio of Scheduled Tribes in Daudnagar, Haspura, Goh, Barun and Nabinagar C.D. Blocks are below the district average. The sex ratio of Scheduled Tribes relating to Rafiganj, Obra, Aurangabad, Kutumba, Deo and Madanpur C.D. Blocks are higher than the district average.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Aurangabad (M)	849	635
2	Daudnagar (M)	922	889
3	Jamhaur (NA)	921	0
4	Nabinagar (NA)	964	533
5	Rafiganj (NA)	935	750
	Sex ratio (Urban) for the district:	**903**	**647**

There is no urban agglomeration in Aurangabad district. There are only five statutory towns in the district i.e. Daudnagar (M), Rafiganj (NA), Jamhaur (NA), Aurangabad (M) and Nabinagar (NA).The sex ratio of scheduled castes in Nabinagar (NA), Rafiganj (NA), Daudnagar (M) and Jamhaur (NA) are higher than the district average while the sex ratio of Aurangabad (M) is lower than the district average. The sex ratios of Scheduled Tribes in Daudnagar (M), Rafiganj (NA), are higher than the district urban average.While the sex ratio of Aurangabad (M) and Nabinagar(NA) are lower than the district urban average.

Table 22 shows that among the C.D.Blocks in the district Barun C.D.Block has the highest proportion of literate population (59.3%) followed by Obra and Aurangabad C.D. Blocks with 59.2 and 59.1 percent respectively.The literacy rates for Daudnagar,Haspura, Goh, Rfiganj, Nabinagar, Kutumba,Deo and Madanpur C.D.Blocks are 57.8,56.5,53.9,51.3,54.3,55.7,52.7 and 53.0 percent respectively.Male literates out number female literates in all the C.D.Blocks of Aurangabad district. The highest proportion of male literates is in Barun C.D.Block with 73.9 percent closely followed by Aurangabad, Obra,Daudangar, Haspura, Goh, Kutumba, Nabinagar, Madanpur, Deo and Rafiganj C.D.Blocks with 73.8, 73.3, 72.9, 71.6, 70.6, 69.4, 68.5, 66.8, 66.2, 66.2 percent respectively. Obra C.D.Block has the highest female literacy with 44.0 percent while Rafighanj C.D.Block has the lowest literacy rate among the females with 35.5 percent .Male literacy rates for Daudnagar, Haspura, Goh, Obra, Aurangabad Barun and Goh C.D.Blocks are higher than the corresponding figures of Aurangabad district rural.Female literacy rates for Daudnagar,Haspura,Obra,Aurangabad,Barun and Kutumba C.D.Blocks are higher than the district rural average.Table 21 deals with the same topic but only difference is that it deals with the total population of the district.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.1	31	0.0
1-10	11	0.6	2,626	0.1
11-20	27	1.6	10,396	0.6
21-30	60	3.5	27,833	1.5

81-90	32	1.8	16,163	0.9
91-99	6	0.3	1,691	0.1
100	1	0.1	1	0.0
District Total	**1739**	**100.0**	**1,842,998**	**100.0**
Literacy rate for District	**57.0**			

The above table shows that maximum number of villages i.e, 32.8 percent of the inhabited villages literacy rate ranges between 51 and 60 percent. These 570 villages constitute 38.2 percent of the district rural population. This is the largest group of villages in the district. This is closely followed by 371 villages with 24.3 percent of the district rural population,constitutes 21.3 percent of the inhabited villages where literacy rate ranges between 61 and 70 percent. 20.9 percent of the inhabited villages i.e. 364 villages are such where literacy rate ranges between 41 and 50 percent. These villages account for 21.9 percent of the district rural population. There are 123 villages accounting for 7.1 percent of the inhabited villages where literacy rate ranges between 71 and 80 percent and these villages account for 6.1 percent of the district rural population. There are 60 villages accounting for 3.5 percent of the inhabited villages where literacy rate ranges between 21 and 30 and these villages account for only 1.5 percent of the district rural population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status / Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates

	District (Rural) Total:	**123,459**	**90,088**	**33,371**	**327,032**	**142,969**	**184,063**	**35.1**	**49.3**	**19.8**	**29.5**

The table above shows that literacy rate among the scheduled castes is highest i.e. 42.9 percent in Aurangabad C.D.Block whereas it is lowest i.e. 29.0 percent in Deo C.D.Block in the district. It is observed that the literacy rate among the scheduled castes for the district (rural) is 35.1 percent only. As regards percentage of male literacy rate among the scheduled castes it is highest i.e. 58.7 percent in Aurangabad C.D.Block where as it is lowest i.e 40.2 percent in Deo C.D.Block. In case of female literacy rate among the Scheduled Castes it is highest i.e 25.4 percent in Aurangabad C.D.Block and the lowest

i.e. 16.2 percent in Rafinganj C.D.Block. it is found that the gap between male and female literacy rate is highest i.e. 34.8 percent in Goh C.D.Block where as it is lowest i.e.23.5 percent in Deo C.D.Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	26	1.7	566	0.1
1-10	60	3.9	9,990	2.2
11-20	181	11.7	51,661	11.5
21-30	316	20.5	113,333	25.2
31-40	385	24.9	122,758	27.2
41-50	317	20.5	97,722	21.7
51-60	174	11.3	43,175	9.6
61-70	63	4.1	8,810	2.0
71-80	20	1.3	2,453	0.5
81-90	1	0.1	18	0.0
91-99	0	0.0	0	0.0
100	1	0.1	5	0.0
District Total:	**1544**	**100.0**	**450,491**	**100.0**
Literacy rate for District (Rural):		**35.1**		

The table above shows that in case of literacy among the Scheduled Castes in the villages of the district the highest number of villages i.e. 24.9 percent fall in the literacy range of 31-40 percent where as the lowest number of villages i.e. 0.1 percent fall in the literacy range of 81-90 and 100 percent. It is observed that of the total villages in the district 3.9 percent villages are such which fall in the literacy range of 1-10 percent among the Scheduled Castes in the villages of the district.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Aurangabad (M)	3,634	2,458	1,176	4,541	1,964	2,577	55.6	68.3	40.0	28.3
2	Daudnagar (M)	1,928	1,262	666	3,285	1,450	1,835	47.5	59.9	34.1	25.8

6	Aurangabad	19	11	8	8	2	6	90.5	91.7	88.9	2.8
7	Barun	108	69	39	128	65	63	55.7	61.1	48.1	12.9
8	Nabinagar	121	90	31	174	70	104	51.1	68.2	29.5	38.7
9	Kutumba	48	28	20	111	44	67	39.7	53.8	29.0	24.9
10	Deo	24	17	7	46	17	29	38.1	54.8	21.9	33.0
11	Madanpur	80	44	36	236	97	139	31.5	37.9	26.1	11.8
	District (Rural) Total:	**502**	**332**	**170**	**853**	**360**	**493**	**45.8**	**58.0**	**32.4**	**25.6**

The table 28 shows that among the Scheduled Tribes the percentage of literates is highest i.e. 90.5 percent in Aurangabad C.D. Block whereas it is lowest i.e. 27.9 percent in Daudnagar C.D. Block in the district. It is observed that the literacy rate among the Scheduled Tribes for the district is 45.8 percent. As regards percentage of male literacy rate among the Scheduled Tribes it is highest i.e. 100 percent in Obra C.D. Block whereas it is lowest i.e. 32.4 percent in Daudnagar C.D. block. In case of female literacy rate among the Scheduled Tribes it is highest i.e. 88.9 percent in Aurangabad C.D. Block. Such higher percentage of literacy rate among the Scheduled Tribes population is because of very then tribal population in the district.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	16	21.1	102	7.5
1-10	2	2.6	214	15.8
11-20	5	6.6	106	7.8
21-30	3	3.9	83	6.1
31-40	1	1.3	28	2.1
41-50	8	10.5	154	11.4
51-60	8	10.5	243	17.9
61-70	5	6.6	69	5.1
71-80	6	7.9	86	6.3
81-90	7	9.2	176	13.0
91-99	2	2.6	47	3.5
100	13	17.1	47	3.5
District Total:	**76**	**100.0**	**1,355**	**100.0**
Literacy rate for District (Rural):		**45.8**		

The table 29 shows that literacy rate among the Scheduled Tribes in the villages of the district The highest Proportion of villages i.e. 21.1 percent fall in the no literacy range of 0 percent whereas the lowest Proportion of villages i.e.1.3 percent fall in the literacy range of 31-40 percent. It is observed that of the total villages in the district 6.6 percent villages are such which fall in the literacy range of 11-20 & 61-70 percent in case of literacy among the Scheduled Tribes in the villages of the district.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Aurangabad (M)	122	80	42	102	57	45	68.2	72.7	60.9	11.9
2	Daudnagar (M)	11	9	2	6	0	6	78.6	100.0	40.0	60.0
3	Nabinagar (NA)	6	6	0	17	9	8	35.3	50.0	0.0	50.0
4	Rafiganj (NA)	18	11	7	3	1	2	94.7	100.0	87.5	12.5
	District (Urban) Total	**157**	**106**	**51**	**128**	**67**	**61**	**68.6**	**74.6**	**58.6**	**16.0**

The table above shows that literacy rate among the scheduled tribes in the urban areas of the district is 68.6 percent, while male and female literacy rates are 74.6 and 58.6% respectively. The literacy rate among the Scheduled Tribes is highest i.e. 94.7 percent in the Rafiganj (NA) whereas it is lowest i.e. 35.3 percent in Nabinagar (NA).

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C.D.BLOCKS, 2001

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 32 shows that the work participation rate (WPR) in the Aurangabad district is 24.0 percent as main workers and 10.2 percent as marginal workers. The proportion of non workers in the district is 65.8 percent.

Among the main workers male work participation rate in the district is 38.1 percent while that of females is only 9.0 percent as per 2001 Census. The proportion of main workers is the highest (26.0%) in Obra C.D. Block and the lowest (20.2%) in Barun C.D. Block.The proportion of marginal workers is the highest (12.0%) in Goh and Nabinagar C.D. Blocks and the lowest (8.6%) in Madanpur C.D. Block. The proportion of total workers is the highest (36.6%) in Goh C.D. block and the lowest (30.1%) in Barun C.D. Block out of 11 C.D. Blocks WPR of 6 C.D.Blocks are above the district average.The proportion of non workers among male in the district is 53.8 percent while that of females is 78.6 percent as per 2001 Census. The proportion of non workers is the highest (69.9%) in Barun C.D. Block and the lowest (63.4%) in Goh C.D.Block.Table 31 deals with the same topic but only difference is that it deals with the total population of the district.

There is no urban agglomeration in Aurangabad district. There are five urban units in the district i.e. Daudnagar (M), Rafiganj (NA), Jamhaur (NA), Aurangabad (M) and Nabinagar (NA). The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. For the urban areas of the district the work participation rate (WPR) recorded is 19.9 percent of the total population of the towns as main workers and 4.2 percent as marginal workers. The percentage of main workers in Daudnagar (M), Rafiganj (NA) and Nabinagar (NA) are higher than the district urban average (19.9%). The proportion of non workers in the urban areas of the district is 75.9 percent. The proportion of male and female main workers are 34.2 percent and 4.0 percent respectively. The proportion of marginal workers among males is 5.5 percent and that of for females is 2.7 percent. The proportion of male and female non workers are 60.3 percent and 93.3 percent respectively. The proportion of marginal workers is the highest i.e. 12.7 percent in Jamhaur (NA) and the lowesti.e. 3.1 percent in Rafiganj (N.A.). The proportion of non workers is the highest (78.6%) in Aurangabad (M) and the lowest (69.3) in Jamhaur (NA).

Note: Percentage of Workers to total workers are given in brackets

From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers' household industry workers and other workers. The economic activity in rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (36.9%) and agricultural labourers (42.2%) together constitute 79.1 percent of the total workers of the district. The agriculture sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 48.2 percent for Deo C.D. Block to 27.9 percent for Aurangabad C.D. Block. The proportion of agricultural labourers varies between 46.7 percent in Obra and Kutumba C.D. Blocks to 33.4 percent in Aurangabad C.D. Block. The proportion of Household

Industry workers is only 4.2 percent of the total workers of the district. The proportion of household industry workers varies between 5.8 percent in Kutumba C.D. Block to 3.0 percent in Deo C.D. Block the proportion of other workers is 16.7 percent of the total workers of the district. The proportion of other workers varies between 34.1 percent in Aurangabad C.D. Block to 9.8 percent in Goh C.D. Block.

Note: Percentage of Workers to total workers are given in brackets

From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, Cultivators, agricultural labourers, household industry workers and other economic activities. The economic activity in the rural areas of the district is primarily dependent on agriculture which is supported by the fact that cultivators (39.0%) and agricultural laborers (44.0%) together constitute 83.0 percent of the total

workers of the district. The agriculture sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 48.2 percent for Deo C.D. Block to 33.4 percent for Kutumba C.D. Block. The proportion of agricultural labourers varies between 49.8 percent for Daudnagar C.D. Block to 38.4 percent for Deo C.D. Block. The proportion of Household Industry workers in only 4.1 percent of the total workers of the district. The proportion of household industry workers varies between 5.8 percent for Kutumba C.D. Block to 2.5 percent for Daudnagar C. D. Block. The proportion of other workers is 12.9 percent of the total workers of the district. The proportion of other workers varies between 16.3 percent for Madanpur C.D. Block to 9.8 percent for Goh C.D. Block.

Note : Percentage of workers to total workers are given in brackets

There is no urban agglomeration in Aurangabad district. There are only five statutory towns in the district i.e. Daudnagar (M), Rafiganj (NA), Jamhaur (NA), Aurangabad (M) and Nabinagar (NA). From the table-36,, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other economic activities. The cultivators constitute 5.4 percent and agricultural labourers constitute 14.3 percent of the total workers of the urban areas of the district. The proportion of male and female cultivators are 5.7 and 3.1 percent respectively. The proportion of male and female agricultural labourers are 12.3 and 27.4 percent respectively. Household industry workers constitute 6.3 percent of the district total workers of the urban areas of the district. The proportion of household industry workers among males is 5.0 percent and that of females is 14.7 percent. Other workers constitute 74.1 percent of the total workers of the urban areas of the district. The proportion of male and female other workers are 77.0 and 54.9 percent respectively. The proportion of Daudnagar (M) and Nabinagar (NA) of cultivators are 5.7 and 12.5 percent which are higher than total district average and agricultural labourers constitute 23.3 percent for Daudnagar (M) , Jamhaur (NA) 38.9 percent and Nabinagar (NA) 18.9 are percent higher than total district average. The proportion of household industry workers among Daudnagar (M), Rafiganj (NA), Jamhaur (NA) and Nabinagar are (NA) 6.0%, 7.8%, 12.7% and 9.5% of the total workers which are higher than the district average.

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational facility:- There are as many as 1158 villages accounting for 66.6 percent of the total number of inhabited villages (1739) in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D. Block Daudnagar with 91.7 percent closely followed by Haspura and Madanpur C.D. Blocks with 88.7 and 81.0 percent. The smallest proportion of villages with educational facility is observed in C.D. Block Kutumba with 57.4 percent.

Medical facility:- The availability of medical facility in the villages is quite low and only 15.5 percent villages have got it. Among the C.D. Blocks, Daudnagar has the largest proportion of villages with medical facility, the percentage being 61.7 percent. It is followed by Haspura, Obra and Barun C.D. Blocks with 47.9, 38.9 and 21.2 percent respectively. Nabinagar C.D. Block, on the other hand, has the minimum proportion of villages (5.0%) where medical facility is available.

Improved drinking water: There are as many as 1717 villages accounting for 98.7 percent of the total inhabited villages in the district where improved drinking water facility is available . Among the C.D. Blocks, Daudnagar, Haspura, Goh, Barun and Madanpur have 100.0 percent proportion of villages where improved drinking water facility is available. Kutumba C.D. Blocks on the other hand, has the minimum proportion of villages (94.4%) where improved drinking water facility is available.

Post Office:- Postal facilities are available only in 228 (13.1%) villages out of 1739 inhabited villages in the district. Haspura C.D. Block has the maximum number of villages having postal facility (26.8%) followed by Daudnagar C.D. Block with 25.0 percent. Kutumba C.D. Block has the minimum number of villages having postal facility (7.4%).

Telephone :- The availability of the telephone facility in the villages is quite low and only 3.9 percent villages have got it. Among the C.D. Blocks, Obra has the maximum Proportion of villages having telephone facility (14.6%) followed by Deo and Daudnagar C.D. Blocks with 13.0 and 11.7 percent.

Transport communication:- Transport communication facilities are available only in 279

(16.0%) villages out of 1,739 inhabited villages in the district. Majority of villages have this facility. Barun C.D. Block has the highest proportion of villages (37.5%). It is followed by Aurangabad and Haspura C.D. Blocks with 24.0 and 21.1 percent respectively. Goh C.D. Block, on the other hand, has the minimum proportion of villages (7.3%) where transport communication amenity is available.

Bank:- Banking facility is available only in 95(5.5%) villages out of 1739 inhabited villages in the district. Among C. D. Blocks, Haspura has the maximum number of villages having banking facility (14.1%) followed by Rafiganj C.D. Block with 10.0 percent. Aurangabad has the minimum Proportion of villages having banking facility (2.6%).

Agricultural Credit Societies :- Agricultural Credit Societies are available only in 160 (9.2%) villages out of 1739 inhabited villages in the district. Rafiganj C.D. Block has the maximum number of villages having agricultural credit facilities (24.8%). It is followed by Haspura and Daudnagar C.D. Blocks with 23.9 and 21.7 percent respectively while Nabinagar C.D. Block has the minimum Proportion of villages with 2.3 percent.

Approach by pucca road:- This facility is available in 445(25.6%) villages out of 1739 inhabited villages in the district. Among C.D. Block, Daudnagar with 46.7 percent villages having pucca approach road followed by Aurangabad C.D. Block (38.3%) while Nabinagar C.D. Block has the least number of villages having this facility with 17.3 percent.

Power Supply :- Electrified villages in the district constitute as low as 30.3 percent of the total number of inhabited villages. Among the C.D. Blocks, Barun has the maximum number of electrified villages with 69.0 percent while Goh has the minimum Proportion of villages with only 11.0 percent.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from table no. 38 that educational facility is available to 85.1percent of the rural population of the district. The proportion varies between the maximum of 98.8 percent in Daudnagar C.D. Block and the minimum of 73.3 percent in Nabinagar C.D. Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 66.6 percent vide table – 37) than the proportion of population which is as high as 85.1 percent. This may be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 31.2 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 99.1 percent which is more than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	507	76	8	591
(b) Middle School	1,043	413	63	1,519
(c) Degree College	194	426	1,115	1,735

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
2. Medical:-

(b) Cooperative Bank	460	632	597	1,689
7. Agricultural Credit Societies	522	447	610	1,579

As regards educational facility it would be seen that there are 591 (34.0%) villages in the district which do not have any primary school but the facility is available at places situated within 5 kms. for 507 villages and 76 villages within the range of 5-10 kms. .There are as many as 1,519 (81.2%) villages in the district which do not have middle schools.Out of these 1519 villages 1043 villages,have this facility at places within 5 Kms,413 villages have this facility at a distance range of 5-10 kms and only 63 villages at places beyond 10 Kms.It is to observe that 1735 inhabited villages of the district are deprived of college but the facility is available at places situated within 5 kms. for 194 villages and within the range of 5-10 kms. for 426 villages.

There are 1,694 (97.4%) villages in the district which are without the facility of hospital and as many as 607 villages enjoy this facility at a distance range of 10+ kms. the number of villages enjoying this facility at a distance range of 5-10 kms. is 606 where as the same is available at a distance of less than 5 kms. for 481 villages. There are 1686 villages in the district (97.0 %) which do not have primary health centre.

Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that maximum number of inhabited villages e.i 1010 lie in the distance range of 5-15 kms. from the nearest statutory town. This is followed by 65.9 villages in the distance range of 16-50 kms. from the nearest statutory towns.Only 1 village is found in the distance range of more than 51 kms. Interestingly, it can be observed from the table that the proportion of villages having educational facility is 60.9 percent for those situated within 5 kms. from the nearest town and increases to 65.7 percent in the distance range of 5-15 kms. Thereafter it again increases to 68.4 percent in the distance range of 16-50 kms. from the nearest town. In the case of other amenities also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the table no. 41 that the maximum number of villages i.e. 581 (33.4%) in the district fall in the population range of 500-999 followed by 563 (32.4%) villages having a population range of 1-499 and 390 (22.4 %)villages in the population range of 1000-1999. The lowest number of villages is observed in the population range of 10,000+ being only 6(0.3%).

The proportion of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10,000+ which further corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Daudnagar	60	18,073	83.3	98.0
2	Haspura	71	13,627	86.1	86.9
3	Goh	164	29,798	89.8	81.8
4	Rafiganj	210	37,759	84.8	79.4
5	Obra	144	26,302	84.7	97.2
6	Aurangabad	154	25,582	82.5	77.8
7	Barun	184	30,431	82.4	84.8
8	Nabinagar	300	50,443	78.1	65.9
9	Kutumba	216	25,634	81.0	72.7
10	Deo	115	26,837	60.0	64.2
11	Madanpur	121	34,587	69.2	70.4
	District Total:	**1,739**	**319,073**	**79.7**	**78.6**

Table 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It would be seen from the table that 79.7 percent of the total area of the district is utilized for cultivation (cultivable area) and of this 78.6 percent area is found to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Goh C.D. Block with 89.8 percent closely followed by Haspura, Rafiganj, Obra and Aurangabad C.D. Blocks with 86.1, 84.8, 84.7 and 82.5 percent respectively. The lowest cultivable area is found in Deo C.D. Block which is 60.0 percent. The highest proportion of irrigated area (98.0%) to total cultivable area is found in Daudnagar C.D. Block followed by Obra, Haspura, Barun, Goh and Rafiganj 97.2, 86.9, 84.8, 81.8, 79.4 percent respectively. The least proportion of irrigated area is found in Deo C.D. Block with 64.2 percent which indicates that the villages in this block are deprived of required irrigational facilities.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	II Aurangabad (M)	3.1	0.3	2.8	2.9	0.4	0.8	1.4	0.0	0.3
2	III Daudnagar (M)	0.5	0.1	0.4	0.5	0.3	0.1	0.1	0.0	0.1
3	V Jamhaur (NA)	2.3	0.2	2.2	2.0	0.9	0.1	0.9	0.1	0.0
4	IV Nabinagar (NA)	1.9	0.1	1.8	2.4	0.9	0.0	1.1	0.0	0.4
5	III Rafiganj (NA)	2.4	0.4	2.0	2.1	1.9	0.0	0.1	0.0	0.0
	District Total	**2.2**	**0.3**	**2.0**	**2.1**	**0.7**	**0.4**	**0.9**	**0.0**	**0.2**

The above table gives the details of finances in the statutory towns in terms of per capita receipt and expenditure. There are only five statutory towns in the district i.e. Aurangabad (M), Daudnagar (M), Jamhaur (NA), Nabinagar (NA) and Rafiganj (NA). On going into the details of receipt under different heads it can be seen that the receipt from all other sources is the highest in case of Aurangabad (M)) and it is largest in case of Daudnagar (M).The per capita expenditure incurred on public works is higher than the per capita expenditure on general administration in case of urban areas of the district. . Per capita total receipt is higher than the per capita total expenditure in case of urban areas of the district.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Aurangabad (M)	2.8	0.9	0.4	0.3	0.5
2	Daudnagar (M)	4.7	2.9	1.6	1.1	0.8
3	Jamhaur (NA)	2.3	2.3	2.3	0.0	0.0
4	Nabinagar (NA)	5.2	1.0	1.0	0.5	0.5
5	Rafiganj (NA)	3.2	9.6	1.2	0.4	0.4
	District Total	**3.5**	**2.7**	**0.9**	**0.5**	**0.4**

The above table gives the details of different categories of educational institutions per ten thousand population in the towns of the district. It would be seen from the above table that institution like secondary / matriculation level school and college for an average of 0.9 and 0.4 institution per ten thousand population respectively in the urban areas of the district. Primary school and Middle School account for an average of 3.5 and 2.7 per ten thousand population in urban urban areas of the district. Senior Secondary School account for an average of 0.5 institution per ten thousand population in the urban areas of the district.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Aurangabad(M)	11
2	Daudnagar(M)	3
3	Jamhaur(NA)	6
4	Nabinagar(NA)	19
5	Rafiganj(NA)	3
	Distrct Total	**9**

The above table furnishes information regarding availability of beds in medical institutions in Aurangabad (M), Daudnagar (M), Jamhaur (NA), Nabinagar (NA) and Rafiganj (NA).

The number of beds in medical institutions per ten thousand population for total urban areas of the district works out to be 9.

The highest number of beds in medical institutions is available in Nabinagar (NA) while the lowest number is available in Daudnagar (M) and Rafiganj (NA).

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5

Data not finalized

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Aurangabad (M)	Iron Rod	Rice
		Aluminium Utensils	Vegetable
		Crockery	Cattle Bone
2	Daudnagar (M)	Brass Utensils	Rice
		Aluminium Utensils	Sand
		Blanket	Milk
3	Jamhaur (NA)	Sweets	Rice
4	Nabinagar (NA)	Cloth	Blanket
		Blanket	Leather
		Rice	Paddy
5	Rafiganj (NA)	Tisi Oil	Pulse
		Agarbatti	Tisi Oil
		Sawey Rope	Raw Leather

Table 47 presents the most important commodities manufactured in the towns and exported from the towns of the district.

It would be seen from the above table that in the town items like, iron rod, aluminium utensils and crockery manufactured and also items like rice, vegetable and cattle bone are exported from Aurangabad (M).Items viz brass utensils, aluminium utensils and blanket are manufactured in the town and three items rice, sand and milk are exported from Daudnagar (M). No any item is manufactured in Jamhaur (NA) and only one item i.e. rice is exported from the town.In Nabinagar (NA) that items like Cloth, blanket and rice are manufactured in the town and also blanket, leather and paddy are exported. There are three items viz., tisi oil, agarbatti and sawey rope ,are manufactured in the town and also three item viz., pulse, tisi oil and row leather are exported from Rafiganj (NA).

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 shows that there are as many as 281,019 households accounting for 97.3 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in more than three rooms is the highest (37.5%) whereas it is the lowest (0.4 %) dwelling in no exclusive room. The median number of rooms is 3 for the total households in the tenure status of owned category.

There are 77,436 scheduled castes households accounting for 27.6 percent of the total households dwelling in owned houses and the median number of rooms is 2. There are 2083 Scheduled Tribes households accounting for only 0.7 percent of the total households dwelling in owned houses and the median number of rooms is 2.

There are 5,587 households accounting for 1.9 percent of the total households of the district dwelling in rented houses the proportion of households dwelling in two rooms is the highest (38.2%) where as it is the lowest (0.7 %) dwelling in no exclusive room. There are 635 scheduled castes households accounting for 11.4 percent of the total households dwelling in rented houses and the median number of rooms is 2. There are 111 Scheduled Tribes households accounting for 2.0 percent of the total households dwelling in rented houses and the median number of rooms is 2.

Similar trend can be observed in respect of houses holds dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo' mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the above table that of the total rural households maximum proportion of households i.e. 54.6 percent live in semi permanent houses followed by 30.4 percent living in per manment houses and 15.0 percent living in temporary houses.

In the case of urban households in the district, however, the maximum proportion of households i.e. for 69.7 percent live in permanent houses followed by 25.6 percent in semi permanent houses and 4.8 percent in temporary houses. Among the C.D. Blocks in the district Daudnagar has the maximum proportion of rural households living in temporary houses (20.3%) followed by Goh (19.1%) and Haspura, (18.7%) . In case of permanent houses Obra C.D. Block has the maximum proportion of households living in permanent house (39.5%), Rafiganj C.D. Block has minimum proportion of households living in permanent houses with 22.7 percent. In case of Semi permanent houses, Madanpur C.D. Block has the maximum proportion of households (64.7%) followed by Rafiganj C.D. Block 63.2 percent.

Data source : Census of India 2001, H-series: Tables on Houses, Household Amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as'Improved'or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table 50 shows that out of the total rural 265821 households 200,529 Households i.e. 75.4 percent have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Obra C.D. Block with 89.8 Percent whereas it is lowest in Deo C.D.

Block with 58.1 percent.

As regards electricity it is found that only 4.1 percent of the rural households in the district have electricity. The highest proportion of household is in Barun C.D. Block with 13.3 percent where as it is lowest in Haspura C.D. Block with 0.7 percent. Only 10.1 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Aurangabad C.D.Block with 27.6 percent whereas it is lowest in Nabinagar C.D.Block with 8.3 percent.

Only 16.3 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is in Aurangabad C.D. Block with 37.9 percent whereas it is lowest in Nabinagar C.D. Block with 10.8 percent.

74.1 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Obra C.D. Block with 81.0 percent whereas it is lowest in Nabinagar C.D. Block with 63.7 percent.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 51 shows that 15.0 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Deo C.D. Block (39.4%) whereas it is lowest in Goh C.D. Block with 3.9 percent.

7.3 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D. Blocks, highest proportion households using crop residue as fuel for cooking is 9.9 percent in Rafiganj C.D. block where as it is lowest (4.8%) in Nabinagar C.D. Block.

72.8 percent of the rural households in the district use cowdung cake as fuel for cooking. Among the C.D. Blocks, the proportion of households using cow dung cake as fuel for cooking is highest (86.6%) in Goh C.D. Block whereas it is lowest (47.4%) in Deo C.D. Block.

In the case of cooking gas ((LPG) there are only 5060 households accounting for 1.8 percent of total households in the district using it for cooking. As regards Kerosene there are only 2370 households accounting for 0.8 percent of the total households in the district using it for cooking.

Data source : Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It would be seen from the table above that there are 76,831 households accounting for 26.6 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in Aurangabad C.D. Block (33.6 %) whereas the lowest is in Madanpur C.D. Block (18.4 %) . There are 101996 households accounting for 35.3 percent of the total households in the district possessing radio/transistor. In this regard the highest proportion of households is in Aurangabad C.D. Block (41.4 %) where as it is lowest in Deo C.D. Block (30.2 %) .

There are 15,302 households accounting for 5.3 percent of the total households in the district possessing television. In this regard the highest proportion of households is in Aurangabad C.D. Block (17.8%) whereas it is lowest in Madanpur C.D. Block (2.7%). There are only 4159 households accounting for 1.4 percent of the total households in the district possessing telephone. In this regard the highest proportion of households is in Aurangabad C.D Block (5.9%) whereas it is lowest in Haspura C.D. Block (0.5%).

Similar trend can be observed in respect of other specified assets also both in the district as also in its development blocks.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

No major social or cultural event has taken place in the newly created district of Aurangabad since it came into existence. This district consists of 11 development blocks, viz. Aurangabad, Deo, Kutumba, Nabinagar, Barun, Obra, Daudnagar. Haspura, Goh, Rafiganj and Madanpur. Fairs and festivals are, however, held regularly in the district by various communities.

(ix)Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Deo

A village, situated 10 Kms. south-east of Aurangabad, has a temple dedicated Sun, which is known as Surya Mandir. With an umbrella like top,

the temple is about 100 feet high and is believed to have been built in the 15th century by Bhairvendra Singh, a Chandravanshi king of Umga. The religious importance of worship of God Sun and taking bath in the Brahma Kund is traced from the time of Raja Ayel. In Chhatha festival (both Kartik and Chait) people from the vicinity and the neighbouring districts come in thousands for performing puja.

Deo Kund

The village Deo Kund is reported to be an important historic place of antiquity. It is situated on the border of Aurangabad and Jehanabad blocks and has an ancient temple fo Mahadeo and also an old tank near it. According to the Pauranic legend it was the ashram of famous Chayavan Rishi. There is a shrine of Lord Shiva where pilgrims come to offer oblation of Shiva during the Shivaratri festival.

Chalho

The place is situated some 11 kms. east of Salaiye in Madanpur block. There is a tract of seven hills with a cave here which is believed to have an under-ground passage upto Umga.

Cheon

The village, which lies 5 kms. south-east of Rafiganj block, contains ruins of saive temple.

Daudnagar

The town was founded by Daud Khan, the Governor of Bihar under Aurangzeb. It is said that on his way back from the conquest of Palamu, he camped on the spot where the town now stands. Though the place was full of jungles and infested by robbers, he liked it. He got the jungles cleared and set up a township here. He also got a palace built for himself which was named after him Remnants of fortress built by Ahmad Khan, the grandson of Daud Khan, and his tomb nearby, bear testimony to these. Daudnagar is also commercial centre.

Nabinagar

A village lying in the development block of the same name is situated on the left bank of Punpun, about 30 kms. south of Aurangabad. The village contains a tiled hut, known as the temple os Sokha Baba, a legendary saint. Persons suffering from snake-bites are brought there as a last resource. If the patient recovers, clarified butter and molasses are offered to Sokha Baba.

Pawai, Mali and Chandangarh

There are remains of old forts in all the three Zamindaries whose princes, said to be the migrants from Rajputana, played key role during the medaeival and modern periods of history of this part of the land. Excavations may reveal fascinating details.

Piru

Piru is believed to be 'Pritikuta' of the old days which was the birth place of Vanabhatta, the great poet and State chroncler of Harshvardhana.

Siris

Siris was a pargana under Sher Shah and the Mughal Empire. Later on it became the play ground of Raja Narain Singh and the heroes of 1857. A mosque believed to have been built during the reign of Aurangzeb with persian inscriptions stands there.

Umga

Umga, situated at a distance of about 24 kms. east of Aurangabad is famous for its Vaishnava temple. It was built a little before the one built at Deo. There is similarity in their architecture. The walls of the temple are made of square granite blocks. There are 3 images within the temple, viz., the Ganesh, the Surya and the Shiva. The assemblage of these deities at one place can be of interest to archaeologists and historians.

(x)Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district.

Aurangabad district consists of only two sub-division, viz., Aurangabad Sadar and Daudnagar sub-division comprising of 11 development blocks stretching over an area of 3,305.0 km^2. The district consists of flat alluvial plain. The northern portion of the district is mostly a plain formed a alluvial soil and is extremely fertile. In a few portion of Aurangabad, fertile alluvium is found. This is locally known as Kewal and is very suitable for paddy, wheat and

sugar-cane. In the south-western part of this district, below the hills, sandy loam is found. It is suitable for cultivation of wheat and potato.

The district of Aurangabad (which was a part of Gaya district at that time) played a prominent role in all freedom movements in the subsequent period. A number of congressmen from this palce including Sri Anugrah Narain Sinha and a few freedom revolutionaries scacrificed everything for attainment of country's independence. The '**Sahid Smarak**' at the Assembly gate in Patna bears the testimony to Jagat Pati Kumar's valour and will to sacrifice for the cause of nation.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publication which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or

creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to

the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests

ii) Irrigated

iii) Unirrigated

iv) Culturable waste (including Gauchar and Groves)

v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the

statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants

as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

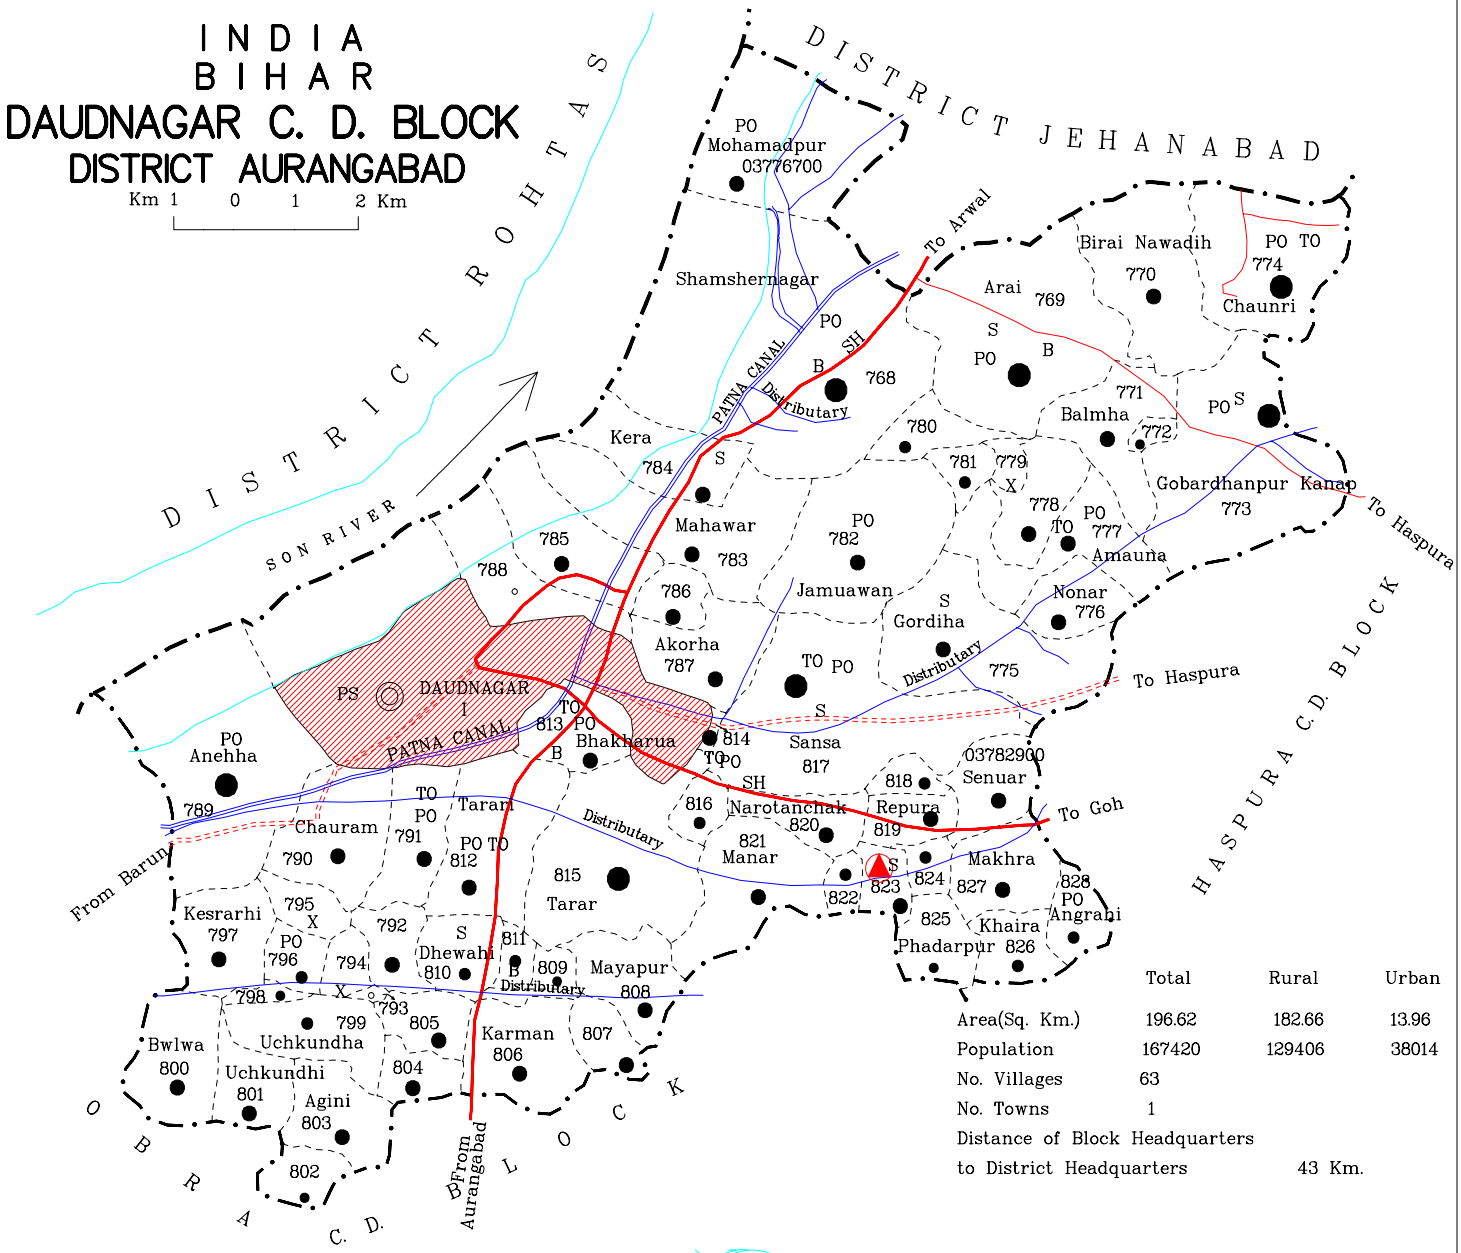

Appendix IX : Statement showing number of girls schools in the villages

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

APPENDIX VIIB - VILLAGE DIRECTORY (*Concld.*)

LIST OF VILLAGES ACCORDING TO THE PROPORTION OF THE SCHEDULED TRIBES TOTHE TOTAL POPULATION BY RANGES

Range of Scheduled Tribes population (percentages)	Location code number	Name of village
1	2	3
11-20	**Nil**	**Nil**
21-30	**Nil**	**Nil**
31-40	**Nil**	**Nil**
41-50	**Nil**	**Nil**
51-75	**Nil**	**Nil**
76 and above	**Nil**	**Nil**

Note:- Villages having NIL Scheduled Tribes Population have been excluded

APPENDIX VIII - VILLAGE DIRECTORY

NUMBER OF VILLAGES UNDER EACH GRAM PANCHAYAT (C. D. BLOCK WISE)

Serial number	Name of Gram Panchayat and location code number	Area of Gram Panchayat in hectare	Number of villages with location code numbers		Number of households	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Income and expenditure of Panchayat / Gram Panchayat (in Rs.'000)	
			Number	Location code numbers					Total income	Total expenditure
1	2	3	4	5	6	7	8	9	10	11
N.A.										

Note : N.A. stands for information not available.

APPENDIX IX - VILLAGE DIRECTORY

STATEMENT SHOWING NUMBER OF GIRLS SCHOOLS IN THE VILLAGES

Serial number	Name of C. D. Block	Village location code number	Name of village	Number of girls school			
				Primary School	Middle School	Matriculation / Secondary School	Higher Secondary / PUC / Intermediate / Junior college
1	2	3	4	5	6	7	8
N.A.							

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	S H Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT (I TO VII)

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full

possiblecleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in differentPCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Aurangabad	1991	69	81	82	89
	1981	100	118	135	155

The estimates of child mortality for the ages 1, 2, 3 and 5 are denoted here as q(1), q(2), q(3) and q(5) respectively of the children of the district and the state. It is evident that child mortality for the district has been lower in q(1), q(2) and q(3) and equal in q(5) as compared to state average pertaining to 1991 census. On the other hand, just reverse trend can be observed in the district as compared to state with respect to 1981 census. It is encouraging to note that Aurangabad district has taken a great leap with respect to women and child welfare between 1981 and 1991. The mortality estimates for 1981 shows a higher rate of child mortality in the district compared to state average, while child mortality estimates in 1991 was lower or equal to the district of Aurangabad compared to the state with respect to all ages.

ANNEXURE - III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

	Various fertility measures for the districts and the state(1991-Census)	
	State	**District**
1	2	3
CBR	36.2	36.0
TFR	5.3	5.2
TMFR	5.9	5.7
GFR	163	162.0
GMFR	186	180.0
Child woman ratio	66.6	66.5
No. of children ever born per woman age group(45-49)	4.1	4.2
Mean age at marriage	16.5	15.2

It transpires from the annexure above that some other fertility measures such as CBR, TFR, TMFR, GFR, GMFR, CWR and mean age at marriage in Aurangabad district have been on the lower side compared to the state average as a whole. Only Number of Children ever born per woman in age-group 45-49 with respect to the district is slightly on the higher side compared to the state average. Annexure III, provides a comparative data on other fertility measures with respect to state vis-à-vis district Aurangabad.

ANNEXURE - IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Aurangabad	37,308	3,271	34,037	91	24	67	499,882	52,734	447,148
	(7.5)	(6.2)	(7.6)	(0.0)	(0.0)	(0.0)	(100.0)	(100.0)	(100.0)

The growth of population for any area (be it any district or state) is influenced by the pattern of migration (in-migration as well as out-migration). However, for want of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population,although such impact may not be much in most of the cases.

It is apparent from Annexures IV(A) that out of 21,307,020 and 19,989,195 migrants in the State as per place of birth in 1991 and 2001 censuses, the share of Aurangabad district is 377,108 and 499,882 i.e., 2.9 and 3.3 percent respectively of state's total.Female migrants out number the male migrants both for the district and the state. In case of percentage of migrants born in Bihar there is wide gap between male and female population. With respect to percentage figures of born elsewhere in the district of enumeration the district percentages (71.7 and 74.3) are more than the state percentage of 67.8 and 68.4 respectively during 1991 and 2001 censuses.

When we compare the percentage figures of migrants born in other districts of Bihar it is crystal clear that the

district percentage (27.5 & 18.2) are higher than the state percentage (26.4) in 1991 Census while during 2001 Census, it is considerably lower (18.2%) than the state percentage (22.7).The percentage figures for born in other states and for born in other countries is lower in the district than the state during both the censuses.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Aurangabad		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	373,945	341,628	32,317
(1) within the state		(100.0)	(84.7)	(15.3)	(100.0)	(91.4)	(8.6)
	Rural	19,010,120	16,570,646	2,439,474	355,935	330,098	25,837
		(94.7)	(82.6)	(12.2)	(95.2)	(88.3)	(6.9)
	Urban	990,737	375,267	615,470	15,230	8,980	6,250
		(4.9)	(1.9)	(3.1)	(4.1)	(2.4)	(1.7)
(2) In other states of India	Total	1,049,969	575,484	474,485	2,693	1,980	713
		(100.0)	(54.8)	(45.2)	(100.0)	(73.5)	(26.5)
	Rural	800,601	512,444	288,157	1,750	1,530	220
		(76.2)	(48.8)	(27.4)	(65.0)	(56.8)	(8.2)
	Urban	243,448	60,040	183,408	943	450	493
		(23.2)	(5.7)	(17.5)	(35.0)	(16.7)	(18.3)

It is evident from the annexure that of the total intrastate migrants in the state of Bihar, 82.6 percent were from rural to rural, 3.1 percent from urban to urban, 12.2 percent from rural to urban and only 1.9 percent were from urban to rural areas.

In case of Aurangabad district, of the total intrastate migrants 88.3 percent were from rural to rural, 6.9 percent from rural to urban, 2.4 percent from urban to rural and only 1.7 percent intrastate migrants were from urban to urban areas.

The number of migrants in the state of Bihar who were "Born in other state of India" was about 10.5 lakhs in 1991 while in the district of Aurangabad the corresponding figure was only 26.9. Of the 1,049,969 interstate migrants in Bihar state 48.8 percent were from rural to rural, 27.4 percent from rural to urban, 5.7 percent from urban to rural and 17.5 percent of the interstate migrants were from urban to urban areas. With respect to Aurangabad district out of a total of 2,693 inter start migrants 56.8 percent were from rural to rural, 8.2 percent from rural to urban, 16.7 percent from urban to rural and 18.3 percent of interstate migrants were from urban to urban areas. A markable difference with respect to urban to rural movements of interstate migrants can be noticed in the district of Aurangabad (16.7 %) and state of Bihar (5.7 %) which perhaps indicates home coming of old natives from outside Bihar.

ANNEXURE - IV (C)

INTERSTATE MIGRANTS, 1991 CENSUS

Annexures IV(C) deals with interstate migrants to the district of Aurangabad and the state of Bihar. The district received only 0.3 and 0.2 percent of the migrants from outside the state in comparison to total migrants coming to state in 1991 and 2001 censuses respectively. The State of West Bengal is major contributor as regards immigration, both in the case of district and the state in 1991 Census whereas it is State of Uttar pradesh which is the major contributor as regards immigration in the case of state and State of Jharkhand in the case of district in 2001 census. Uttar Pradesh which comes after Jharkhand contributes only 2.4 percent of total immigrants coming from outside the state to the district in 2001 Census.

Annexures V(A) and V(B) show religion wise distribution of population of 1991 and 2001 census. Both, for the state of Bihar and Aurangabad district, Hindus form great chunk of society with 82.4 percent and 90.5 percent in 1991 Census and with 83.2 percent and 90.1 percent in 2001 Census respectively. The percentage of Hindu population is slightly lower in the state than the district whereas in case of Muslims the percentage in the district is lower than the state in both the Censuses. It is apparent from Annexure V(B) that Rafiganj C.D. Block has the highest proportion of Muslims during both the Censuses. Almost similar trend prevails in all the C.D. Blocks of the district during both the Censuses.The proportion of population of other religious communities is almost negligible in the district of Aurangabad and its C.D. Blocks.

It is quite evident from above annexures that Aurangabad district as well as the state have a relatively higher proportion of never married males and married females both in 1991 and 2001 censuses. This may be attributed to the fact that women enter into marital knot at comparatively younger ages than males. As against 54.2 and 51.4 percentages of never married males in 1991 and 56.3 and 53.9 in 2001 Census in Bihar state and Aurangabad district respectively, the corresponding percentages among females in 1991 are 45.2 and 44.5 and 47.3 and 47.0 percent in 2001. It is apparent from annexures that the state has slightly lower proportion of male widowed and higher proportion female widowed during both in 1991 and 2001Censuses.

While analyzing marital status by broad age groups one finds that married females outnumber married males in the age group 10-14 both in the year 1991 and 2001 suggesting that child marriage among females is more prevalent than males. It transpires from the annexures that the proportion of married males and females in the age group 10-14 or 0-14 is comparatively more in Aurangabad during 2001 Census whereas during 1991 Census the district has higher proportion of married males and slightly lower proportion of married females than the state. It is also found that child marriage is more prevalent in rural areas of the state and the district than urban areas.

It is also significant to note that the proportion of never married females in Aurangabad district and state as a whole in the age group 15-19 and above is much lower than the never married males. The proportion of divorced or separated males is slightly high in Aurangabad district in 2001 Censuses.

Literacy is one of the important demographic characteristics. Apart from collecting data on number of literate, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the census has already been explained in the beginning of this publication.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 census was 38.5 percent. Now it has risen to 47.0 percent in 2001 census. The corresponding propotions for Aurangabad district in 1991 and 2001 are 45.1 and 57.0 percent respectively.

Annexures VII(A),VII(B),VII(C) and VII(D) furnish informations regarding absolute number of

illiterates and literates in Bihar state and Aurangabad district as also percentage distribution of literates by different level of education by different age-groups in 1991 and 2001 censuses.

A break up of literate population by various educational level (of 1991 census) shows that 20.3 percent males and 27.2 percent females in the state are literate but have not attained any educational level. These proportins have risen to 28.4 and 35.8 percent (including Below Primary)for males and females respectively in the state in 2001census. It can be also seen from the Annexures that more or less same trend prevails in Aurangabad district during 1991 and 2001 Censuses. It is interesting to see that at lower levels of education (up to 'Primary') the female's proportions are on higher side than the male's proportions in state as well as in the district in both the Censuses.

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Aurangabad district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returning by only 17.5 percent while Magadhi/Magahi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population. As far as the district of Aurangabad is concerned 72.8 percent of district's population have returned Magadhi/Magahi as their mother tongue. Hindi has got second position with 19.1 percent of the district's population having returned it as their mother tongue. Urdu has got third position with 7.6 percent. Bhojpuri has been returned by only 0.3 percent of the district population except these languages analysed above both for the state and the district, other have been returned by insignificant proportions of the respective population of the state and the district as mother tongues as per Census 2001.
