DISTRICT MAP

SOKHO DEWARA ASHRAM, NAWADA

It is a village consisting of two-tolas, Sokho and Dewara located about 5 kms. south-west of Kawakole. It is known on account of its Sarvodaya Ashram set up by Shri Jai Prakash Narain in 1952. The ashram has been built at a beautiful site against the backdrop of hills. The Ashram launches rural development projects based on Sarvodaya principles and monitors and studies their extent of success and socio-economic impact on the people covered by them. The Ashram has assumed international importance and attracts scholars from far and wide.

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 Census & 2001 Census 683

Annexure VI : Marital status of population as per 1991 Census & 2001 Census 689

Annexure VII : Age, sex and education in the district, 1991 Census & 2001 Census 705

Annexure VIII: Distribution of different mother tongues returned in 2001 Census 713

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and ‘most important commodity’ manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified

and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri
Registrar General &
Census Commissioner, India

New Delhi

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and these are printed in every Census because of their wide range utility. In successive Censuses innovations/modifications have taken place in the District Census Handbooks in terms of coverage and content of data. This is an important publication district level brought out by the Census Organisation on behalf of the State Government. Its inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the district. This publication has, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The District Census Handbook project is joint venture of the State Government and the Census organization and is brought out in two parts, viz. (i) part A–containing the village and town directories and (ii) part B containing village and townwise Primary Census Abstracts, pertaining to total population. It also contains the District Primary Census Abstracts for the total population and the Scheduled Castes and the Scheduled Tribes Population by rural-urban break-up.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The village Directory mainly covers educational, medical, drinking water, post & telegraph, banking, credit societies, recreational & cultural and communication facilities and approach to villages available in the villages, besides, population and land use data. The content of Village Directory has been broadened by including additional facilities such as availability of banking, recreational and cultural facilities and reach of newspapers and magazines in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. The Town Directory basically contains growth trend of towns since 1901, physical aspects and location, municipal finance, civic and other amenities, medical, educational, recreational and cultural facilities, trade, commerce, industry banking, civic and other amenities available in slums. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided instead of notified slums for each statutory town. However, during 1981 and 1991 Censuses this information was restricted to class I and class II towns only.

The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is the inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) mortality (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of last residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, based on 1991 and/or 2001 Census, with the prime objective of analysing the extent of changes taken place in socio-cultural demographic and economic field during the last decade. The eight digit permanent location code (PLCN) has been assigned to all the villages to facilitate the link of data with future censuses.

It is worth mentioning that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demands of the data users.

The village and town level data of amenities have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees, who functioned as Charge Census Officers under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes, which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and wholehearted co-operation, which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office Shri Phool Singh ex-Joint Director, Sri R.K. Ram Joint Director and K.K. Verma, D. P. Choudhary, S.K. Das Sudhakar and Mritunjay Kumar, Manjul Mayank Pandey and Shri Ramesh Prasad, Assistant Director supervised the project at different stages. District and C. D. Block Maps were prepared in Map Section under the overall supervision of Sri M. Guria and Dr. H.K. Ram, Research Officer (Map). I am thankful to all of them. The name of other officers and officials who were associated with this project is shown in separate sheet of acknowledgements.

I am personally indebted to Sri D. K. Sikri, Registrar General and Census Commissioner, India under whose guidance project was completed. I am deeply grateful to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India and Sri Sudhir Kumar Rakesh, ex-Director of Census Operations, Bihar, Patna for their sustained support and unfailing guidance throughout our endeavours. I am equally indebted to Sri R.C. Sethi, Additional Registrar General, India, Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General of Social Studies Division and Dr. R.P. Singh, ex-Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division of Office of the Registrar General, India, New Delhi who scrutinized the manuscript.

Arun Kumar Saxena

Deputy Director of Census Operations,
Bihar, Patna

District Highlights – 2001 Census

1. Nawada ranks 23rd in terms of population (18,09,696) and 18th in terms of area (2,494 sq.km.) in the state of Bihar.
2. In terms of population per sq.km. Nawada is the 27th densely populated district in the state with 726 persons per sq.km as against the state's 881.
3. Nawada ranks 4th in terms of sex-ratio (946) against the state's 919.
4. There are 127 uninhabited villages (out of 1,091 total villages) in the district of Nawada.
5. Pakri Barwan (under Pakribarawan C.D. Block) is the most populated village (26,553) and Husen Chak (under Nawada C.D. Block) is the least populated village (11) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Rajauli has the highest number of villages (169) in the district and C.D. Block Kashi Chak has the lowest number of villages (36).
8. Ranigadar (under Kawakol C.D. Block) has the largest area (3,852 hectare) and Sorahipur (under Warisaliganj C.D. Block) and Arghu Chak (under Meskaur C.D. Block) have the smallest area (9 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 96.0 percent of the villages.

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications. It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements', which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to

this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional C.D.Block/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) mortality (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 and/or 2001 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously,

as far as possible, except the incorporation of population size of the villages which became ready when the Urban/Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

The district of Nawada, which acquired the status of an independent district on the 26th January, 1973 has a rich heritage and close linkage with its parent district of Gaya. The district has got 2 subdivisions viz., Nawada and Rajauli and 14 Community Development Blocks, viz., Nawada, Hisua, Narhat, Sirdala, Kashichak, Nardiganj, Roh, Rajauli, Akbarpur, Meskaur, Gobindpur, Pakri Barawan, Kawakole and Warisaliganj. The district is bounded, on the north by Nalanda and Sheikhpura districts, on the south by the State of Jharkhand, on the east by the district of Jamui and on west by the district of Gaya.

The history of Nawada is part of the history of the ancient empire of Magadh which included the undivided districts of Patna and Gaya. This empire gained prominence during the reign of king Bimbisar of Haranyakakul dynasty. During this period both Buddha and Mahabir preached their doctrines. This entire region in those days was full of forests, wild animals and aboriginal tribes. Even today a considerable part of the district say nearly 20 percent, is spread over the hills and forests situated towards south and west and mainly contained in the belt of Rajauli, Gobindpur, Kawakole, Hisua and Sirdala Blocks. The influence of Buddhism and Jainism at that time could extend only to the northern parts of the district of Nawada. Lord Buddha stayed in the undivided district of Gaya for a long time and he preached in many parts of the district of Nawada including Kurkihar, Parwati and Tapowan. Lord Mahabir also visited the northern parts of Nawada district.

With the fall of the Haranyakakul dynasty, the Sisunagas came to power and conquered Awanti (Malava). The Sisunagas were overpowered by Mahapadmananda, who founded the Nanda dynasty, and extended his domain over the entire northern India. They were succeeded by the Mauryas who founded their capital at Patliputra (present Patna). During the Ashok's reign Gaya gained prominence once again. The history of this region after the disintegration of the Mauryan Empire till the rise of the imperial Guptas is shrouded in obscurity.

Samudragupta of the Gutpa dynasty became the king of Magadh around 330 A.D. Local dynasties came into prominence after the fall of the Gupta Empire. Later Gaya came under the sway of Harshbardhan and formed a part of his empire. After the death of Harsha in 468 A.D. a Tibetan-Chinese-Nepalese army invaded Magadh to avenge the earlier attack on a Chinese mission on way to meet Harsha who was no more. However, Harsha's descendant Adityasen maintained independence of the region and his inscription has been found in Apsarh, a village in Warisaliganj Block of Nawada district, where remains of the ancient temples exist.

The control of Magadh thereafter by the Pala dynasty is evidenced by the inscription of king Rajayapala, son of king Narayan Pala, found in Kurkihar in Wazirganj Block of Gaya district. Kurkihar was the site of famous Buddhist monastery in the Pala period, and large number of bronze images of Buddhist and even Hindu deities have been found here during excavations and are presently stored in the Patna Museum.

Mahipak I ruled the kingdom during 978-1030 A.D. and an image found at Kurkihar bears an inscription dated 1009 A.D. Later this kingdom had to bear the brunt of repeated attacks of Gahedvala kings with their centre at Kashi. The kingdom was ultimately lost to the Gahedvala king Govindchanda but in Gaya district Varnamana and his son Rudraman continued to rule. An inscription of Rudraman dated 1137-38. A.D. has been found at Gobindpur in Nawada district. Govindpala, a Pala king, was ruling Gaya in 1162 A.D. Later, he was over thrown by the Senas of Bengal and Gahedvalas of Kanauj, and a clash over possession of Magadh ensued. Soon the Afghans overran Bihar.

Sometime after 1193 A.D. but before 1200 A.D. Mohammadbin-Bakhtiyar Khilji invaded Bihar. He stormed the monasteries at Biharsharif (Uddantapuri), Nalanda and Kurkihar and also the historical temples at Apsarh and other places of grandeur.

Biharsharif became the headquarters of Muslim rulers in Bihar. Around 1285 A.D. Gaya was made a part of Muslim Subah of Bihar. The control of Bihar passed into the hands of the Sherqui dynasty of Jaunpur from 1394 to 1486. After the fall of this dynasty the Mughals gained control of the district. Finally, the British succeeded in establishing their hold over this area.

In 1760, Shah Alam invaded Bihar with a view to establishing his claim over the throne of Delhi. He was helped by Kamdar Khan of Nawada but Shah Alam was repulsed at Barh by the combined army of the Nawab of Bengal and the British. Shah Alam invaded the district again on the advice of Kamdar Khan and others, and the Mughal army defeated the British force. Kamdar Khan besieged Patna which was relieved by the timely arrival of Knox and his army. Then Kamdar Khan withdrew to Bihar. Shah Alam, while withdrawing, was caught unawares and attacked by the British force supported by the army of Nawab Mirzafar and Governor Ram Narain. He was defeated and captured, brought to Patna and confined there. Kamdar Khan retreated to the hills of Ramgarh. A tomb of Kamdar Khan still exists at Hisua Block headquarters of Nawada district.

(iii) Administrative set up

The district of Nawada lies in the southern Bihar region of the state. It is adjacent to the district of Gaya. There are two sub-divisions viz., Hisua and Nawada. The district has got fourteen Community Development Blocks. The number of villages and towns in the district are 1090 and 3 respectively.

District Collector is head of the district administration, subdivision is headed by subdivisional officers. Community Development Blocks and Circle Offices are the primary level of civil administration and revenue collections in the district. Block Development Officers and Circle Officers are posted in these officer respectively who assist subdivisional and District officers of the district.

Senior Superintendent/Superintendent of Police is the head of the police administration of the district who is assisted by Dy.Superintendents and police/subdivisional police officer/posted in sub-divisions. A network of police thanas and police post and police outposts are in place manned by Inspectors/ Sub-Inspectors of police who keep vigil on crime in their respective area**s.**

(iv) Physical Features

Natural Divisions

The northern and southerm parts of the district constitute two distinct natural regions. The northern part which is plain, formed of alluvial soil, is very fertile. Consequently, it is densely populated and has a rich historical background. The Southern part is hilly and undulating with a gentle ascent towards the south merging into hills and hilly ranges. In fact these hills form the southern fringes of the Chotanagpur plateau. Fertility of the soil (Laterite) is comparatively low. This area remained outside the pale of prosperous Magadh and till 1865 it formed part of district of Ramgarh. The entire, southern boundary of the district is a conglomeration of ridges and spurs. Some of these hills attain a height of about 2250 ft. The area is also interspersed by bare granite rocks of gigantic proportions jutting out of the earth. The important hills in the area named after famous Rishis are Durbasa, Shringi, Lomas, Jagbali and Valmiki.

The district of Nawada does not have any important river. Some of these which are worthy of mention are Tilaiya, Ghaghra, Khuri, Sakri and Dhanarjya, the last mentioned having mythological significance. The beds of these rivers are shallow, wide and sandy. They remain dry all through the year except during rainy season when they are virtually in spate. The confluence of all these five rivers takes place at a point near Giriak in Nalanda district from where the river Panchane rises. The district of Nawada also has some important water falls such as Kakolat and Had-hadwa. In the southern part of Rajauli Block of this district the famous Safi Mica Mines are situated.

Forest

The northern part of the district is devoid of forests as the land is largely under cultivation. However, it is dotted with bamboo groves and mango orchards. Palm, tamarind, pipal and banyan trees are found near the village settlements. Neem, Bel, Siris, Sisam, Simal and Jack-Fruit trees are also found. In the southern part, the forests of Rajauli, Dilwa and Bhalua have greatly suffered due to unsystematic and large scale felling during the Zamindari period. However, some of them are still quite dense and shelter wild animals. Occasionally tigers, panthers, bears, deer, sambhars and wild boads can be seen in these jungles. The Government has banned shooting of wild life but poaching by the unscrupulous still poses a great hazard to the dwindling population of wild life.

Climatic conditions

The area suffers from extremes of climate. May and June are extremely hot. Although Gaya is said to have the distinction of being the hottest place in India, Nawada may not be far behind. This is mainly due to the barren rocky hills and vast sandy beds of the rivers.

Rainfall

The major portion of the district falls in the rain shadow zone. The average annual rainfall is 1,047.50 mm and it experiences, on an average, 64 rainy days in a year. The rains generally set in during the middle of June and last till the month of September. The district is always short of adequate rains and hence declared as a drought prone district.

Irrigational facilities

The absence of any major perennial river has deprived the district of any important canal system that could provide water for agricultural operations round the year. The district gets but scanty rainfall. The general slope of the land is also rapid in most of the areas with the result that water runs off quickly.

However, these difficulties have been overcome by the ingenuity and diligence of the people who have devised the system of Ahars and Pynes by which the natural drainage is blocked and the water impounded for use. The river water is also harnessed by diverting it into the Pynes. The Pynes or diversionary channels are lid off from the rivers so as to convey water to the fields. Smaller channels or Bhoklas are taken off from the Pynes and if necessary, still smaller channels, Karhas or field channels are made for conveying water to the fields.

The Ahars are reservoirs of water formed by constructing retaining embankments to act as an artificial catchment basin. The embankments are raised on three sides while the fourth side

is left open for the drainage water to enter. The Ahars and Pynes were constructed by the Zamindars or landlords and used to be maintained by them but after the abolition of the intermediary system or Zamindari, the responsibility for their maintenance has devolved upon the State Government.

Proper utilisation of the sub-terranian water can be a good source of irrigation in such areas of the district where this is feasible. The land being hard and generally rocky, the southern part of the district is unsuitable for sinking deep tube-wells. This part comprises Sirdala, Kawakole and parts of Gobindpur, Akbarpur and Rajauli and the southern part of Hisua. These areas can have only hand pumps or open wells due to the proximity to the bedrock to the surface and lack of granular material. The areas between the Gaya-Nawada Railway line on the south and the Rajgir hills on the north are suitable for the sinking of small irrigation tube-wells with moderate yield. Nawada Block is suitable for high yielding tube-wells. This narrows towards Rajauli resulting into a marginal zone with moderate yield possibilities. Warisaliganj and Pakri Barawan Block are considered suitable for sinking large-sized State tube-wells.

A few medium and minor irrigation canals, Sakri canal scheme being the most important of them, have been constructed for augmenting the irrigational facilities. But these also are all rain fed and have limited utility.

Land use Pattern

Paddy is the main crop of the district. During recent years wheat sowing has also been encouraged. Other crops grown are maize, potato, gram, marua, sugarcane and Khesari In the district 5 types of soil are generally found. These are (i) Loam, (ii) Sandy, (iii) Clay, (iv) Sandy Loam and (v) Clay Loam. The areas where these kinds of soil are generally found and the crops for which they are useful are indicated below.

Loam - Found in Nawada, Sirdala and Akbarpur Blocks.
Sandy - Available in some parts of Nawada, Sirdala and Hisua Blocks. It is suited for crops like maize, oil-seeds and groundnut.
Clay - Available in parts of Pakri Barawan and Kawakole. It is suited for paddy, gram and wheat.
Sandy Loam - Found in the development Blocks of Nawada, Warisaliganj, Akbarpur, Narhat and Hisua. It is useful mainly for wheat, maize and paddy.
Clay Loam - Available in Rajauli and Sirdala Blocks. It is useful for paddy, wheat and potato.

Mines and Minerals

The district is quite rich in minerals and forests. The district has a number of mica and iron-ore mines. Siger and Dibaur villages near Rajauli have the concentration of mica mines. Iron-ore is found in Pachamba. Bamboos and canes are found extensively in the forests of the district.

Industrialisation

Nawada is considered to be a backward district mainly on account of lack of industrial development. The development Blocks of Rajauli, Gobindpur and Kawakole are quite rich so far as forest resources in the district are concerned. Catechu sticks are found in abundance in Rajauli

Block and there is scope for establishing catechu industry in this belt. Nawada being drought-prone, deters the industrialists from setting up industries in the district since availability of abundant water is an important consideration. Still concerted efforts are being made and many programmes have been launched to provide improved irrigational facilities as also to develop agriculture production and promote industrialisation in the district.

In Kadirganj and Gopalganj villages of Nawada Block a scheme for production of Tassar Silk on loom is underway. Similarly handloom industry is already in operation in the villages of Kadirganj, Gopalganj, Sheikhpura, Masaarha, Nawada, Mirbigha, Pakri Barawan, Jhagribigha in the district. There is a scheme to develop the handloom industry in the district under the TRYSEM Programme. The government has executed various schemes and programmes in order to popularise household industries, such as Black Smithy, Carpentry, Pottery, Leather industries, etc. as well as to develop other small scale industries in the rural areas of the district. A number of Gobar gas plants have also recently been established in the district.

Communication facilities

The communication facilities are coming up fast in the district. Over and above kutcha roads spread over the entire district, there are pucca roads including National Highway covering a considerable chunk of the district. There are pucca roads also leading to the main towns of Gaya and Rajgir via Hisua. The Grand Chord line of the Eastern Railway passes through the district headquarters. Nawada is the main station between Kiul and Gaya junction on this route. Further development of road communication is bound to open up even the remote areas of the district and catalyse the process of development.

Electrification

Electric supply was introduced at Nawada in the year 1953. There are two divisions of the Bihar State Electricity Board one for supply of power and the other for construction of electric line. Electric connections have been provided for domestic, commercial, irrigation State tube-wells and industrial and transmission of high tension electrical power.

(v) Census concepts

Building

A ‘Building’ is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following

materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i) A minimum population of 5,000;

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.- -For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that

under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Bihar are given below:

Scheduled Castes:

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij (excluding North Chotanagpur and South Chotanagpur divisions and Santal Parganas district)
6. Chamar, Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom, Dhanger
11. Dusadh, Dhari, Dharhi
12. Ghasi
13. Halalkhor
14. Hari, Mehtar, Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan, Swasi
21. Pasi
22. Rajwar
23. Turi

Scheduled Tribes:

1. Asur
2. Baiga

3. Banjara
4. Bathudi
5. Bedia

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or

groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only

household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage,
(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$\text{TFR} = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} (\text{ASFR})}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 : Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 : Probability of dying between birth and age 2.

q5 : Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/migration of people has been explained below as these are important components concerning migration:

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration. The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7 (5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety, health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Nawada district during 1991 was 13,59,694 Hindus constitute over 88.9 per cent (12,08,665persons) of the population in the district followed by Muslims 11.1 percent (1,50,646 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Nawada district during 1991 was 1,359,694. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Nawada district, Hindi, the main mother tongue of the district was returned by 91.8 percent (1,248,490 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Nawada district, was 8.1 percent (110,273 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Nawada during 1991 census.

The population of the Scheduled Castes in the district of Nawada was 331,997, according to 1991 Census. Numerically, the five most prominent SCs in the district were (i) Musahar (89,937) (ii) Rajwar (86,957)(iii) Pasi (49,432) (iv) Chamar, Mochi (44,652) and (v) Dusadh, Dhari, Dharhi (32,443) while Musahar constituted the maximum proportion of Scheduled Castes population the percentage being 27.1(more than one forth of the total SC population). Rajwar and Pasi though numerically Seconds and third in order comprised only 26.2 and 14.9 percent of the SC population in the district. Chamar and Dusadh are less in number as compared to the other three SCs mentioned above with only 13.4 and 9.8 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than five SCs described above as their percentage to total SC population was less than even 1.0 percent except Bhuiya, Dhobi and Turi whose percentages were 4.5, 2.0 and 1.0 respectively.

The population of the Scheduled Tribes in the district of Nawada during 1991 Census was 1246. Numerically, the four important STs were namely (i) Kharwar (ii) Santal (iii)) Munda and (iv) Banjara. Kharwar had 700 populations, which constituted 56.2 percent of the Scheduled Tribes population in district. Santal with 328 populations constituted 26.3 percent of the ST population Munda comprised 44 persons and 3.5 percent of ST population while Banjara with 31 populations constituted 2.5 percent of ST population. The other Scheduled Tribes were almost negligible in proportion except Oraon and Khond whose percentages were 2.1 and 1.0 respectively.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Nawada district is 18,09,696 comprising 9,29,960 Males and 8,79,736 Females and constituting 2.2 percent of the State population spread over 2.6 percent of the area of the State in the 14 C.D.Blocks of the district. Nawada is the most populous where as Kashi Chak is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA, V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36:

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D. BLOCKS BY RESIDENCE, 1991-2001

Serial number	Name of C.D. Block	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Nardiganj	72,139	72,139	0	96,891	96,891	0	34.3	34.3	0	0	0
2	Nawada	173,671	120,497	53,174	257,305	175,414	81,891	48.2	45.6	54.0	30.6	31.8
3	Warisaliganj	121,701	98,928	22,773	155,215	123,868	31,347	27.5	25.2	37.6	18.7	20.2
4	Kashi Chak	52,909	52,909	0	65,469	65,469	0	23.7	23.7	0	0	0
5	Pakribarawan	111,495	111,495	0	149,288	149,288	0	33.9	33.9	0	0	0
6	Kawakol	97,353	97,353	0	129,187	129,187	0	32.7	32.7	0	0	0
7	Roh	98,026	98,026	0	127,627	127,627	0	30.2	30.2	0	0	0
8	Gobindpur	60,962	60,962	0	77,764	77,764	0	27.6	27.6	0	0	0
9	Akbarpur	137,806	137,806	0	184,362	184,362	0	33.8	33.8	0	0	0
10	Hisua	89,514	70,905	18,609	114,703	89,498	25,205	28.1	26.2	35.4	20.8	22
11	Narhat	66,352	66,352	0	85,706	85,706	0	29.2	29.2	0	0	0
12	Meskaur	71,708	71,708	0	92,218	92,218	0	28.6	28.6	0	0	0
13	Sirdala	103,914	103,914	0	136,369	136,369	0	31.2	31.2	0	0	0
14	Rajauli	102,144	102,144	0	137,592	137,592	0	34.7	34.7	0	0	0
	District Total:	**1,359,694**	**1,265,138**	**94,556**	**1,809,696**	**1,671,253**	**138,443**	**33.1**	**32.1**	**46.4**	**7.0**	**7.7**

Table 1 shows that rise in the populations of this district during 1991-2001 decade has been of the order of 33.1 percent. The rural population in the district has increased by 32.1 percent while the urban population growth over the decade has been as much 46.4 percent.

Rural-urban migration is an important factor, which always leads to rapid expansion of the urban unit. Among the C.D.Block, Nawada has shown the highest increase in population over the decade with 48.2 percent.

The next highest increase in population is observed in Rajuli C.D.Block with 34.7 percent followed by Nardiganj C.D.Block with 34.3 percent. Decadal variation has been observed the least in the case of Kashiganj C.D.Block with 23.7 percent.

The increase in rural population during 1991-2001 has been the highest in Nawada C.D.Block with 45.6 percent followed by Rajuli C.D.Block with 34.7 percent.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District / C.D. Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Nardiganj	52	96,891	49,864	47,027	2 (3.8)	125	129

It may be observed in table 2 that the maximum number of villages in the district lies in the population range of 1000-1999 accounting for 28.4 percent of the total inhabited villages closely followed by villages in the population range of 500-999 accounting 27.6 percent of the total inhabited villages. The percentages of population in the above two-population range are 23.4 and 11.6 percent of the total rural population of the district respectively. The villages in the population range of 2000-4999 constitute 20.1 percent of the total inhabited villages and in these villages; the percentage of population is only 35.9 percent. There are 10 villages in the population range of 10000 accounting for 1.0 percent of the total inhabited villages and in these villages; the percentage of population is only 8.7 percent of the total rural population. There are only 46 villages in the population range of less than 200 accounting for 4.8 percent of the total inhabited villages and in these villages, the percentage of population is only 4.8 percent. There are only 44 villages in the population range of 5000-9999 and above accounting for only 4.6 percent of the total inhabited villages and in these villages the percentages of population is 17.1 percent.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED, AND MERGED TOWNS IN 2001 CENSUS

		Name of town
		1
(a)	**New**	
(i)	Statutary town	NIL
(ii)	Census town	NIL
(b)	**Denotified**	NIL
(c)	**Declassified**	NIL
(d)	**Wholly merged with other town(s)**	NIL

Note : Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.1	85	0.0
11-20	1	0.1	57	0.0
21-50	12	1.2	2,756	0.2
51-100	10	1.0	6,730	0.4
101-200	25	2.6	17,108	1.0
201-300	28	2.9	20,295	1.2
301-500	92	9.5	122,680	7.3
501 +	795	82.5	1,501,542	89.8
Not known	0	0.0	0	0.0
District Total:	**964**	**100.0**	**1,671,253**	**100.0**
Population Density (Rural) of the district:			**730.9**	

The data presented in Table 4 highlights the fact that maximum proportion of villages in Nawada district lies in the density range (per square Kilometer) of 501+ with 82.5 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 9.5 percent. It would further be seen that small number of villages falls in the density range of 11-20, which account for 1.2 percent of the total inhabited villages.

Maximum number of villages falls in the density range of 501+covering 89.8 percent of the population followed by villages in the density range of 301-500, which account for 7.3 percent of the population.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,061	1,064	1,003	1,037	1,037	1,043
1911	1,051	1,056	942	1,035	1,034	1,049
1921	1,020	1,027	886	1,003	1,001	1,065
1931	995	1,005	820	1,001	1,001	988
1941	1,002	1,012	842	1,001	1,002	981
1951	1,000	1,010	859	1,040	1,044	984
1961	1,005	1,020	832	1,054	1,063	917
1971	957	968	833	1,017	1,021	945
1981	948	959	852	1,002	1,008	916
1991	907	913	857	936	939	894
2001	919	926	868	946	950	898

Note: Sex ratio has been defined here as the number of females per 1000 males.

It would be seen in Table 5 that sex ratio for Nawada district is comparatively high as compared to the state during 1991 and 2001census.

However on the other hand the sex ratio for the rural areas of the state is found to be comparatively high as compared to the rural areas of Nawada district during 1991 and 2001 census. It has already been discussed that the district of Nawada was created before 1991 census. It is found that in case of sex ratio in the total population in the district it is lower than the sex ratio of the state of Bihar both in 1991 and 2001 census.

TABLE 6: SEX RATIO BY C.D.BLOCKS, 2001

Serial number	Name of C.D. Block	Sex ratio		
		Total	Rural	Urban

950-999	252	26.1	522,290	31.3
1000-1099	197	20.4	232,077	13.9
1100+	50	5.2	25,220	1.5
District Total:	**964**	**100.0**	**1,671,253**	**100.0**

Sex ratio (Rural) for District: 950

It is observed in Table 8 that the maximum proportion of villages in Nawada district lies in the sex ratio range of 900-949 and these villages account for 29.0 percent of the total inhabited villages. It further reveals that these villages, which fall in the sex ratio, range account for 39.9 percent of the rural population. 252 villages (26.1%)fall in the sex ratio range of 950-999 and these villages account for 31.3 percent of the rural population of the district. 197 villages (20.4%) are in the favourable sex ratio range of 1000-1999 and these villages account 13.9 percent of the rural population. 136 villages (14.1%) fall in unfavourable sex ratio range of 850-899 and these

village account for only 11.0 percent of the rural population. 50 villages (5.2%) are in the sex ratio range of 1100+and these villages account for only 1.5 percent of the rural population. 35 villages (3.6%)are in the adverse sex ratio range of 800-849 and these villages account for 2.1 percent of the rural population. 10 villages (1.0%) are in the sex ratio range of 750-799 and these villages account for only 0.2 percent of the rural population. Only 3 villages (0.3%) fall in the very unfavourable sex ratio range of 700-749 and this small proportion of villages account for 0.1 percent of the rural population.

TABLE 9: SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Urban status of town	Sex ratio
1	2	3	4
1	Nawada	M	880
2	Warisaliganj	NA	913
3	Hisua	NA	939
Sex ratio (Urban) for the district:			**898**

There is no urban agglomeration in Nawada district. There are three urban units in Nawada district. It can be seen in Table 9 that among the urban units of the district. Hisua (NA) has the highest sex ratio (939) while Nawada (M) has the lowest sex ratio. Overall sex ratio for urban areas of district is 898.

	District (Rural) Total:	**335,659**	**169,435**	**166,224**	**981**

It is observed in Table11 that the sex ratio in the age group 0-6 among the rural population in the C.D.Blocks of the district varies from 1,006 in Kashichak C.D.Block to 954 in Nawada C.D.Block. The sex ratio figures of Warisaliganj, Kashichak, Kawakol, Roh, Gobindpur, Narhat, Sirdala and Rajauli C.D.Blocks are higher than the district rural average while Nardiganj, Nawada, Pakribarawan, Akbarpur, Hisua and Meskaur C.D.Blocks have sex ratio below the district rural average.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	35	3.6	2,943	0.9
700-749	20	2.1	2,529	0.8
750-799	33	3.4	5,961	1.8

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
800-849	57	5.9	15,179	4.5
850-899	101	10.5	32,885	9.8
900-949	140	14.5	60,620	18.1
950-999	143	14.8	84,373	25.1
1000-1099	229	23.8	89,711	26.7
1100+	206	21.4	41,458	12.4
District (Rural) Total	**964**	**100.0**	**335,659**	**100.0**
Sex ratio (Rural) for District:			**981**	

It is observed in Table 12 that 23.8 percent of inhabited villages in Nawada district lies in the sex ratio range of 1000-1099 in the age group 0-6. 206 villages (21.4%)fall in the sex ratio range of 1100+ in the age group 0-6. 143 villages (14.8%) are in the sex ratio range of 950-999. 140 villages (14.5%) villages are in the sex ratio of 900-949. 101 villages (10.5%) are in the sex ratio range of 850-849 in the age group 0-6. There are 57 villages (5.9%) in the district which lies in the unfavorable sex ratio range of 800-849. These villages account for 4.5 percent of the rural population of the district. There are 35 villages in the district having very unfavorable sex ratio range of less than 700 which account for 0.9 percent of the district .33 villages (3.4%) are in the sex ratio range of 750-799. 20 villages (3.4%) are in the sex ratio range of 700-749.

TABLE 13: SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Nawada	M	13,450	7,044	6,406	909
2	Warisaliganj	NA	5,570	2,867	2,703	943
3	Hisua	NA	4,731	2,390	2,341	979
District (Urban) Total			**23,751**	**12,301**	**11,450**	**931**

It is apparent from Table 13 that there are three statutory towns in Nawada district. Hisua (NA) has recorded the highest sex ratio with 979 while Nawada (M) has recorded the lowest sex ratio with 909. Overall sex ratio in the age group 0-6 in urban areas of the district is 931.

		Rural	137,592	38,279	402	27.8	0.3
		Urban	0	0	0	0.0	0.0
	District Total:	**Total**	**1,809,696**	**435,975**	**2,158**	**24.1**	**0.1**
		Rural	**1,671,253**	**421,112**	**2,086**	**25.2**	**0.1**
		Urban	**138,443**	**14,863**	**72**	**10.7**	**0.1**

Table 14 shows that the percentage of Scheduled Castes in Nawada district is 24.1 percent of the total population in the district. Within the district highest percentage of Scheduled Caste population is in Sirdala C.D.Block with 34.1 percent closely followed by Gobindpur C.D Block with 28.5 percent. The percentage of Scheduled Caste population in Nawada district for the urban areas is 10.7 percent, which is lower than the rural areas (25.2%) percent of the district.

The percentage of Scheduled Tribes population in the C.D.Blocks of Nawada district is almost negligible.

TABLE 15: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population

14	Rajauli	137,592	38,279	402	27.8	0.3
	District (Rural) Total:	**1,671,253**	**421,112**	**2,086**	**25.2**	**0.1**

Table 15 indicates that the percentage of the Scheduled Castes in rural areas of Nawada district is of the order 25.2 percent of the total rural population. Sirdala C.D.Block has returned 34.1 percent of its population as Scheduled Castes which is the highest proportion in the district. Pakribarawan C.D. Block has recorded the lowest proportion (19.9) of Scheduled Castes population.

Gobindpur C.D.Block in Sirdala C.D. Block with 34.1 percent of the total rural population closely follows the highest percentage of scheduled caste population with 28.5 percent.

The percentage of Scheduled Castes population in Gobindpur, Akbarpur, Hisua, Sirdala and Rajuli C.D.Blocks are higher than the district rural average (25.2%).

The percentage of Scheduled Tribes population in the C.D.Blocks of Nawada district is almost negligible as can be observed in the table.

TABLE 16: PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	36	3.7	0	0.0
Less than 5	25	2.6	612	0.1
5-10	67	7.0	11,517	2.7
11-20	209	21.7	87,914	20.9
21-30	265	27.5	150,213	35.7
31-40	161	16.7	86,226	20.5
41-50	68	7.1	33,682	8.0
51-75	74	7.7	31,497	7.5
76 and above	59	6.1	19,451	4.6
District Total	**964**	**100.0**	**421,112**	**100.0**

From Table 16 it is apparent that there are 265 villages accounting for 27.5 percent of the inhabited villages in the district where the population of Scheduled Castes ranges between 21-30 percent of the total population. 209 villages closely follow this where the population of the Scheduled Castes ranges between 11-20 percent of the total population. These 209 villages account for 21.7 percent of the total inhabited villages. There are 161 villages, which account for 16.7 percent of the inhabited villages where the percentage of Scheduled Caste population to total population is between 31-40. These three ranges (11-20, 21-30 and 31-40) together constitute 65.9 percent (635 villages) of total inhabited villages and account for 77.1 percent of total rural population. There are 74 villages, which constitute 7.7 percent of the inhabited villages where the percentage of Scheduled Caste population to total population is less between 51-75. 68 villages are such which constitute 7.1 percent of the inhabited villages where the percentage of Scheduled Caste population to total population is between 41-50. There are 67 villages accounting for 7.0 percent of the inhabited villages in the district where the population of Scheduled Castes ranges between 5-10 percent of the total population. There are 59 villages accounting for 6.1 percent of the inhabited villages where the percentage of Scheduled Tribes population ranges between 76 and above. There are 25 villages, which account for 2.6 percent of the total inhabited villages where the percentage of Schedule Caste population to total population is between less than 5.

TABLE 17: PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	914	94.8	0	0.0
Less than 5	41	4.3	785	37.6
5-10	4	0.4	394	18.9
11-20	1	0.1	26	1.2
21-30	1	0.1	453	21.7
31-40	1	0.1	286	13.7
41-50	0	0.0	0	0.0
51-75	0	0.0	0	0.0
76 and above	2	0.2	142	6.8
District Total	**964**	**100.0**	**2,086**	**100.0**

As regards the population of the Scheduled Tribes it can be seen from Table 17 above that there are 41 villages in the district where member of the Scheduled Tribes exist. In all these villages, the population of the Scheduled Tribes is less than 5 percent of the total population.

There are as many as 914 villages, which constitute 94.8 percent of the total inhabited villages in the district, which do not have any Scheduled Tribes populaton.

TABLE 18: NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA /Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Nawada (M)	81,891	6,540	70	8.0	0.1
2	Warisaliganj (NA)	31,347	4,404	1	14.0	0.0
3	Hisua (NA)	25,205	3,919	1	15.5	0.0
District (Urban) Total		**138,443**	**14,863**	**72**	**10.7**	**0.1**

Table 18 shows that in Hisua (N.A) the percentage of Schedule Caste population is 15.5 percent and the percentage of Scheduled Tribes population is almost negligible. Further, in Warisaliganj (N.A) the percentage of Scheduled Castes population is 14 percent and the percentage of Scheduled Tribes population is also almost negligible. In Nawada (M) the district Headquarter, the percentage of Scheduled Castes population is only 8 percent and the percentage of Scheduled Tribes population is 0.1 percent as has been observed in the above table.

TABLE 19: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C.D. Block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Nardiganj	957	1,167
2	Nawada	933	939
3	Warisaliganj	924	857
4	Kashi Chak	915	966
5	Pakribarawan	924	607
6	Kawakol	917	948
7	Roh	929	619
8	Gobindpur	989	500
9	Akbarpur	947	500
10	Hisua	961	1,000
11	Narhat	980	562
12	Meskaur	967	781
13	Sirdala	972	1,259
14	Rajauli	950	951
	District (Rural) Total	**948**	**909**

Table 19 shows that the sex ratio of Scheduled Castes varies between 989 in Gobindpur C.D.Block to 915 in Kashichak C.D.Block. The sex ratio figures of Nardiganj, Gobindpur, Hisua, Narhat, Meskaur, Sirdala and Rajauli C.D.Blocks are higher than the district rural average.

The sex ratio of Scheduled Tribes varies from 1259 in Sirdala C.D.Block to 500 in Gobindpur and Akbarpur C.D.Blocks. Sex ratio figures of Scheduled Tribes in Meskaur, Narahat, Gobindpur, Akbarpur, Pakribarawan, Warisaliganj C.D.Blocks are below the district rural average. The sex ratio figures of Scheduled Tribes relating to Nardiganj, Nawada, Kashi Chak, Kawakol, Hisua, Sirdala and Rajauli C.D.Blocks are higher than the district rural average. It is worthwhile to mention that Scheduled Tribes population in the district is negligible.

TABLE 20: SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Nawada (M)	898	1,500
2	Warisaliganj (NA)	932	0
3	Hisua (NA)	987	0
Sex ratio (Urban) for the district:		**931**	**1,400**

Table 20 gives sex ratio figures for Scheduled Castes and Scheduled Tribes by towns of the district. It can be observed that Hisua (NA) has recorded the highest sex ratio as 987 while Nawada (M) has recorded the lowest sex ratio for 898 for Scheduled Castes in urban areas of the district.

Nawada (M) has recorded a rare high Scheduled Tribes sex ratio as 1500 which can attributed to the fact that this town has a very thin Scheduled Tribes population.

TABLE 21: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY C.D. BLOCKS, 2001

Table 21 gives detail of number and percentage of literates and illiterates by sex in C.D. Blocks of the district. It can be seen in the table that literacy rate varies between 56.5 percent in Nawada C.D. Block to 38.1 percent in Kawakol C.D.Block. 46.8 percent of district populations are literate. It can be seen that again Nawada C.D. Block leads the table as 68.3 percent of males are literate in their C.D. Block while lowest literacy rate has been recorded in Kowakol C.D. Block with 52.0 percent. District's average literacy rate for males has been recorded as 60.6 percent. As far as female literacy is concerned, it can be seen from that the table that the district has recorded 32.2 percent of its female population as literate. Nawada C.D. Block with 43.2 percent has recorded the highest literacy rate while Kawakol C.D. Block has recorded the lowest female literacy rate with 23.2 percent. The highest male/female literacy rate gap has been recorded in Sirdala C.D. Block (32.5%) while the lowest male/female literacy rate gap has been recorded in Nawada C.D. Block.

TABLE 22: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Table 22 shows that among the C.D.Block in the district Narhat C.D.Block has the highest proportion of literate population (52.3%) followed by Kashi Chak C.D.Block (50.8%). The male literates outnumber female literates in all the C.D.Block of Nawada district. The highest proportion of male literates is in Narhat C.D.Block with 67.5 percent closely followed by Kashi Chak C.D. Block with 64.1 percent.

Nahat C.D.Block has the highest female literacy rate with 37 percent while Kawakol C.D.Block has the lowest literacy rate among the females with 23.2 percent and among the C.D. Blocks, gap in male-female literacy rate is highest in Sirdala C.D. Block whereas it is lowest in Pakribarawan and Akbarpur C.D. Blocks (27.9 each).

TABLE 23: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	7	0.7	650	0.0
1-10	34	3.5	12,223	0.7
11-20	69	7.2	43,098	2.6
21-30	112	11.6	130,875	7.8
31-40	209	21.7	393,648	23.6
41-50	261	27.1	524,856	31.4
51-60	203	21.1	467,352	28.0
61-70	54	5.6	87,762	5.3
71-80	12	1.2	9,843	0.6
81-90	3	0.3	946	0.1
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**964**	**100.0**	**1,671,253**	**100.0**
Literacy rate for District:		**46.8**		

Table 23 shows that in 27.1 percent of the inhabited villages literacy rate ranges between 51-60 percent. In these 261 villages 31.4 percent of the district rural population lives. This is the largest group of villages in the district, this is closely followed by 209 villages and with 23.6 percent of the district rural population 21.7 percent of the inhabited villages where literacy rate ranges between 31-40 percent. 21.1 percent of the inhabited villages i.e.203 villages are such where literacy ranges between 51-60 percent. These villages account for 28.0 percent of the district rural population .11.6 percent of the inhabited villages I, e, 112 villages are such where literacy rate ranges between 21-30 percent and these villages account for 7.8 percent of the district. 7.2 percent of the inhabited villages i.e, 69 villages are such where literacy rate ranges between 11 and 20 percent. These villages account for 2.6 percent of the district rural population. There are 54 villages and with 5.3 percent of the district rural population, 5.6 percent of the inhabited villages where literacy rate ranges between 61and 70. 3.5 percent of the inhabited villages (34) are such where literacy rate ranges between 1-10 percent. These villages account 0.7 percent of the district rural popultion. There are 12 villages with 0.1 percent of the district rural population and 1.2 percent of the inhabited villages where literacy ranges between 71-80 percent of the inhabited villages. 7 villages are such where literacy rate zero.

TABLE 24: NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Nawada (M)	52,752	30,663	22,089	29,139	12,897	16,242	77.1	84.0	69.2	14.8
2	Warisaliganj (NA)	16,221	9,840	6,381	15,126	6,545	8,581	62.9	72.8	52.1	20.7
3	Hisua (NA)	12,607	7,600	5,007	12,598	5,399	7,199	61.6	71.6	50.8	20.9
	District (Urban) Total	**81,580**	**48,103**	**33,477**	**56,863**	**24,841**	**32,022**	**71.1**	**79.3**	**61.9**	**17.4**

Table 24 shows number and percentage of literates by sex in urban units of the district. It can be seen in the table that 71.1 percent persons of urban areas of the district are literate, 79.3 of males are literate while 61.9 percent of females are literate. Further if transpires from the table that Nawada (M) has maximum proportion of literate population while Hisua (NA) has minimum population of literates. Literate males outnumbered literate females in all the three urban units of the district.

.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

13	Sirdala	9,302	7,102	2,200	37,166	16,461	20,705	25.6	38.2	12.4	25.8
14	Rajauli	6,758	5,126	1,632	31,521	14,500	17,021	22.8	33.4	11.4	22.0
	District (Rural) Total:	**71,757**	**55,047**	**16,710**	**349,355**	**161,185**	**188,170**	**21.8**	**32.3**	**10.5**	**21.7**

The table above shows that literacy rate among the Scheduled Castes is highest i.e. 26.6 percent in the Narhat C.D.Block whereas it is lowest i.e. 16.6 percent in the Warisaliganj C.D.Block in the district. It is observed that the literacy rate among the Scheduled Castes for the district is 21.8 percent only. As regards percentage of male literacy rate among the Scheduled Castes it is highest i.e. 40.7 percent in Narhat C.D.Block whereas it lowest i.e. 24 percent in Warisaliganj C.D.Block. In case of female literacy rate among the Scheduled Castes it is highest i.e.12.6 percent in Gobindpur C.D.Block and the lowest i.e.7.8 percent in Hisua C.D.Block. It is found that the gap between male and female literacy rate is highest i.e.28.8 percent in Narhat C.D.Block whereas it lowest i.e.15.7 in Warisaliganj C.D.Block.

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	26	2.8	2,077	0.5
1-10	179	19.3	61,891	14.7
11-20	264	28.4	138,299	32.8
21-30	241	26.0	137,424	32.6
31-40	126	13.6	57,716	13.7
41-50	51	5.5	14,768	3.5

TABLE 26: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
51-60	29	3.1	7,894	1.9
61-70	7	0.8	536	0.1
71-80	4	0.4	506	0.1
81-90	0	0.0	0	0.0
91-99	0	0.0	0	0.0
100	1	0.1	1	0.0
District Total:	**928**	**100.0**	**421,112**	**100.0**
Literacy rate for District (Rural):		**21.8**		

Table 26 shows that in case of literacy among the Scheduled Castes in the villages of the district the highest number of villages i.e.28.4 percent fall in the literacy range of 11-20 percent whereas the lowest number of villages i.e.2.8 percent fall in the no literacy range i.e. nil. It can be seen literacy rate ranges 11-20 and 21-30 together constitute 65.4 percent of Scheduled Castes population residing in 605 villages account for 54.4 percent of inhabited villages.

TABLE 27: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Nawada (M)	2,407	1,578	829	4,133	1,867	2,266	46.2	56.9	34.0	23.0
2	Warisaliganj (NA)	1,077	723	354	3,327	1,557	1,770	31.2	40.6	21.2	19.4
3	Hisua (NA)	992	717	275	2,927	1,255	1,672	32.6	46.4	18.4	28.0
	Nawada (Urban)	**4,476**	**3,018**	**1,458**	**10,387**	**4,679**	**5,708**	**38.2**	**49.5**	**26.0**	**23.5**

Table 27 shows distribution of number and percentage of Scheduled Castes literates and illiterates by sex in towns of the district. This table indicates that Nawada (M) leads the table with 46.2 percent of its population are literate. Nawada (M) also leads with regards to males literate and females literate. Further, it can be observed in the table that gap in male/female literacy rate is maximum in Hisua (NA) while it is minimum in Warisaliganj (NA).

TABLE 28: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C. D. Block	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate

Table 28 shows that among the Scheduled Tribes the percentage of literates is highest i.e. 100 percent in Gobindpur C.D.Block whereas it is lowest i.e. 3.2 percent in Warisaliganj C.D.Block in the district.It is observed that the literacy rate among the Scheduled Tribes for the district 17.9 percent only. As regards percentage of male literacy rate among the Scheduled Tribes it is highest i.e.100 percent in Gobindpur and Hisua C.D.Blocks whereas it is lowest i.e.5.7 in Warisaliganj C.D.Block. In case of female literacy rate among the Schedule Tribes it is highest i.e.100 percent in Gobindpur C.D.Block whereas it is lowest i.e. 2 percent in Kawakol C.D.Block.

Such higher percentage (in some cases) in literacy rate among the Schedule Tribes population is because of very thin tribal population in the district.

TABLE 29: DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	16	32.0	567	27.2
1-10	5	10.0	710	34.0
11-20	5	10.0	351	16.8
21-30	4	8.0	120	5.8

100	8	16.0	39	1.9
District Total:	**50**	**100.0**	**2,086**	**100.0**

Literacy rate for District (Rural): 17.9

Table 29 shows that in case of literacy among the Scheduled Tribes in the villages of the district the highest number of villages i.e.32.0 percent fall in the no literacy range i.e. zero percent literacy whereas the lowest number of villages i.e. 2.0 percent fall in the literacy range i.e.91-99, 81-90, 51-60 & 31-40 percent and these literacy ranges altogether constitute only 57 persons. Majority of Scheduled Tribes population fall in literacy ranges 1-10 and 11-20. These two literacy ranges constitute more than 50 percent of Scheduled Tribe population.

TABLE 30: NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban Status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Nawada (M)	55	24	31	15	4	11	91.7	88.9	93.9	-5.1
2	Warisaliganj (NA)	0	0	0	1	1	0	0.0	0.0	0.0	0.0
3	Hisua (NA)	1	1	0	0	0	0	100.0	100.0	0.0	100.0
	Nawada (Urban)	**56**	**25**	**31**	**16**	**5**	**11**	**90.3**	**86.2**	**93.9**	**-7.7**

Table 30 gives number and percentage of Scheduled Tribes literates and illiterates by sex in towns of the district. It is evident from the table that Hisua (NA) has recorded the highest literacy rate for total population and males while Nawada (M) has recorded the highest literacy rate for females. It is also very interesting to note that literate females outnumbers literate males in Nawada (M) which is a very rare phenomenon.

Although proportion of literate is very high in urban areas of the district but it cannot be very significant, as it can be seen in the table that Scheduled Tribes population in urban areas of the district are very thin or scanty.

Table 31 gives the absolute number and percentage of main workers, marginal workers and non workers by sex at C.D. Block level. The proportion of total workers is 37.3 percent of total population. Which constitutes 28.1 percent of main workers and 9.2 percent of marginal workers. The remaining 62.7 percent of total population are non workers. Among the total workers 48.1 percent are males and 25.8 percent are females. As regards main workers, male workers account for 41.9 percent and female workers account for 13.5 percent. As women are primarily engaged in domestic work, the percentage of female marginal workers is as high as 12.3 percent as compared to 6.3 percent of male marginal worker.

Table 32 shows that the work participation rate (WPR) in the Nawada district is 38.3 percent. Proportion of non-workers in the district is 61.7 percent.

Among the main workers males work participation rate in the district is 42.3 percent while that of females is only 14.2 percent as per 2001 census. The proportion of main workers is the highest (33.5 %) percent in Nardiganj C.D.Block and the lowest (26.2 %) in Sirdala C.D.Block.

The proportion of marginal workers is the highest (12.4%) in Rajauli C.D.Block and the lowest (8%) in Akabarpur C.D. Block .

The proportion of non-workers among males in the district is 51.2 percent while that of females is 72.8 percent as per 2001 Census. The proportion of non-workers is the highest (65.4%) in Pakribarawan C.D.Block and the lowest (58.4%) in Nardiganj C.D.Block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table 33 Shows the absolute number with percentage of main worker, marginal workers, total workers and non workers for towns in the district.

Of 138,443 total population of the district, 21.5 percent has been categorised as main workers whereas marginal workers stands only 3.4 percent. A high percentage of 75.0 percent of the district urban population is reported to be non workers.

It district level the sex wise breakup shows that 36.9 percent of males is main workers, which is remarkably higher than the corresponding percentage of 4.4 percent for females main workers.

Among the urban units of the district Warisaliganj (NA) has the highest proportion (28.9%) of total workers whle Nawada (M) has the lowest proportion (22.5%) of total workers.

Note: Percent of Worker to total worker are given in brackets

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture, which is supported by the fact that the cultivators (90.3 percent) and agricultural labourers (40.3 percent) together constitute 80.6 percent of the total workers of the district. The agriculture sector has absorbed about three fourth of the total workers. The proportion of cultivators varies between 51.3 percent for C.D. Block Meskaur to 31.1 percent in C.D. Block Nawada. Proportion of Agricultural labourers varies between 45.8 percent for C.D. Block Kashi Chak to 31.7 percent for C.D. Block Nawada. The proportion of Household Industry workers is only 3.7 percent of the total workers of the district. Proportion of Household Industry workers varies between 6.4 percent in C.D. Block Rajauli and 2.3 percent in C.D. Block Akbarpur. The proportion of other workers is highest i.e. 31.7 percent in C.D. Block Nawada and the lowest i.e. 8.5 percent in C.D. Block Roh. The higher proportion of non-agricultural sector denotes urban character of the area.

Note: Percent of Worker to total worker are given in brackets

From the above table the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural laborers household industry workers and other economic activities. The economic activity in the rural areas of the district is primarily dependent on agricultural, which is supported by the fact that the cultivators (42.0%) and agricultural laborers (41.7%) together constitute 83.7 percent of the total workers of the total workers of the district. The agricultural sector has observed more than three fourth of the total main workers. The proportion of cultivators varies between 46.4 percent for Pakribarawan C.D.Block to 35.7 percent for Rajauli C.D.Block. Proportion of agricultural laboureres varies between 45.8 percent for Kashi Chak C.D.Block to 35.6 percent for Meskaur C.D.Block. The proportion of household industry workers is only 3.6 percent for the total workers of the district. Proportion of household industry workers varies between 6.4percent in Rajauli C.D.Block to 2.3 percent for Akbarpur & Hisua C.D.Block. The proportion of other workers is 12.7 percent of the total workers of the district. Proportion of other workers varies between 19.4 percent for Rajauli C.D.Block to 8.5 percent for Roh C.D.Block.

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA / Town	Persons / Males / Females	Total population	Total number of workers (Main + Marginal)	Category of workers

Note: - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Educational facility

There are as many as 753 villages accounting for accounting for 78.1percent of the total number of inhabited villages (964) in the district where educational facilities are available. Hisua C.D. Block has the highest proportion (98.0%) of villages with educational facility. The least proportion of villages with educational facility is observed in C.D Block Rajauli with 56. 0

Medical facility

The availability of medical facility in the villages is quite low and only 16.2 percent villages have it. Among the C.D.Blocks, Kawakol has the largest proportion of villges with medical facility, the percentage being 41.3 percent. Nardiganj C.D.Block on the other hand has the minimum proportion of villages (9.6%) where the medical facility is available.

Improved Drinking Water

There are as many as 925 villages accounting for 96.0 percent of the total inhabited villages in the district where improved drinking water facilities is available. Among the C.D.Block Hisua, Narhat and Kawakal C.D. Block has cent percent villages where improved drinking water facilities is available. Sirdala C.D.Block has the minimum proportion of villages (91.2%) where this facility available.

Post Office

Post facilities are available only in 161 village out of 964 inhabited villages (16.7%) in the district, Kashi Chak C.D.Block has the maximum proportion of villages having postal facilites (40.0%) followed by Kawakol C.D.Block with 28.3 percent Rajauli C.D.Blolck has the minimum proportion of villages having postal facility (6.4%).

Telephone

The available of telephone facilities in the villages is quite low and only 8.4 percent villages have it. Among the C.D.Blocks Kashi Chak has the maximum proportion of villages having telephone facility (13.4%) followed by Gobindpur C.D.Block with 12.5 percent while the villages of Nardiganj C.D.Block still do not have telephone.

Transport Communication

Transport communication facilites are available only in 121 villages of 964 inhabited villages (12.6%) in the district. Sirdala C.D.Block has the highest proportion of villages (26.2%), which are connected by bus or rail or navigable river/canal services etc. followed by Gobindpur C.D.Block with (25.0%), Nardignj C.D.Block has the minimum proportion of villages banking facility 2.2.

Bank

Banking facilities is available only in 61 villages out of 964 inhabited villages (6.3%) in the district. Among C.D.Blocks Nawada has the maximum proportion of villages having banking facility (11.3%) Nardiganj C.D.Block has the minimum proportion of villages having banking facility (1.9%) .

Agricultural Credit Society

Agricultural credit societies are available only in 85 villages out of 964 inhabited villages (8.8%) in the district. Kawakol C.D. Block has the maximum proportion of villages having agricultural credit facilities (30.4%) while Warisaliganj , Akbarpur, Hisua and Narhat C.D.Blocks still do not have any agricultural credit societies.

Approach By Pucca Road

This facility is available in 363 villages out of 964 inhabited villages (37.7%) in the district. Among the C.D.Blocks Kahi Chak with 66.7 percent villages having pucca approach road followed by Warisaliganj C.D.Block (55.4%) while Rajauli C.D.Block has the least proportion of villages having this facility with only 26.6 percent.

Power Supply

Electrified villages in the district constitute as low as 52.8percent of the total number of inhabited villages. Among the C.D. Blocks Sirdala has the maximum proportion of electrified villages with 77.5 percent while Kashi Chak has the minimum proportion of villages with only 13.3 percent.

Note: - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from Table 38 that educational facility is available to 93.6 percent of the rural population of the district. The proportion varies between the maximum of 99.2 percent in Hisua C.D.Block to minimum of 83.8 percent in Akbarpur C.D. Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 78.1 percent vide table 37) than the proportion of population, which is as high a s 93.6 percent. This may be attributed to the fact that villages which has educational facility usually contain large population as compared to those villages which do not have this facility at all.

In the case of medical facilities, also it can be seen that the proportion of rural populaltion served by the amenity is of the order of 32.6 percent, which is more than the proportion of villages served by medical facility in the district.

In the case of improved driniking water facility, also it may be observed that proportion of rural population served by the amenity is of the order 97.9 percent which is more than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various C.D.Block.

TABLE 39: DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometers	5-10 kilometers	10+ kilometers	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	182	27	6	215
(b) Middle School	579	198	28	805
(c) Degree College	78	198	685	961
2. Medical:-				
(a) Hospital	205	306	436	947
(b) PHC	300	323	304	927
3. Post Office	580	191	34	805
4. Telephone	396	278	209	883
5. Bus Service	380	316	160	856
6. Banks				
(a) Commercial Bank	463	336	106	905
(b) Co-operative Bank	241	379	327	947
7. Agricultural Credit Societies	405	283	191	879

As regards educational facility it would be seen that there are 215 villages in the district (22.3%) which do not have any primary school but the facility is available at places situated within 5 Kms. for 182 villages and for 27 villages within the range of 5-10 Kms. There are as many as 805 villages in the district (83.5%) which do not have middle school but the facility is available at places situated within 5 kms. for 579 villages, for198 villages on the range of 5-10 kms and for 28 villages in the range of 10+kms. It is interesting to observe that 99.7 percent inhbited villages of the district are depreived of college but the facility is available at places situated within 5 kms for 78 villages, 198 villagles within the range of 5-10 kms and 685 villages in the range of 10+kms.

There are 947 villages in the district (98.2%) which are without the facility of hospital and as many as 436 villges enjoy this facility at distance range of 10+kms. The number of villages enjoying this facility at a distance range of 5-10 kms. is 306 whereas the same is available at a distance of less than 5 kms for 205 villages. There are 927 villages in the district (96.2%) which do not have primary health centre.

Similar trend can be observed in respect of other amenities in the district.

TABLE 40: DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	46	39	4	6	7	6	4	2	20
	(100.0)	(84.8)	(8.7)	(13.0)	(15.2)	(13.0)	(8.7)	(4.3)	(43.5)
5 -15	429	353	65	82	38	50	27	21	168
	(100.0)	(82.3)	(15.2)	(19.1)	(8.9)	(11.7)	(6.3)	(4.9)	(39.2)
16 - 50	483	355	86	72	36	65	28	60	172
	(100.0)	(73.5)	(17.8)	(14.9)	(7.5)	(13.5)	(5.8)	(12.4)	(35.6)
51+	6	6	1	1	0	0	2	2	3
	(100.0)	(100.0)	(16.7)	(16.7)	(0.0)	(0.0)	(33.3)	(33.3)	(50.0)

	0	0	0	0	0	0	0	0	0
District total	**964**	**753**	**156**	**161**	**81**	**121**	**61**	**85**	**363**
	(100.0)	**(78.1)**	**(16.2)**	**(16.7)**	**(8.4)**	**(12.6)**	**(6.3)**	**(8.8)**	**(37.7)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that maximum number of inhabited village (50.1%) lie in the distance range of 16-50 kms. from the nearest statutory town. Villages in the distance range of 5-15 kms follow this. None of the villages is found to be in the distance range 'Unspecified'.

Interestingly it can be observed from the table that the proportion of villages having educational facility is 84.8 percent for those situated within in 5 kms. from the nearest town and it decreases to 82.3 percent in the distance range of 5-15 kms. Thereafter, it again decreases 73.5 percent in the distance range of 16-50 kms. Form the nearest town. This table indicates that those villages which are situated for from any statutory town have more facilities than those villages which are situated near a statutory town.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communications $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the Table 41 that the maximum number of villages i.e. 274 (28.4%) lie in the population range of 1000-1999 followed by 266 villages (18.3%) having a population range of 500-999. The lowest number of villages is observed in the population range of 10,000+ being only 10 (1.0%).

The proportion of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range peof 5000-9999 and 10,000+ which further corroborates the fact that more facilities are generally available in large villages than smaller ones.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Nardiganj	52	10,152	88	54
2	Nawada	71	17,107	79.3	71.1
3	Warisaliganj	65	14,620	75.3	77.1
4	Kashi Chak	30	7,972	76.2	71.9
5	Pakribarawan	64	19,883	81.8	47.8
6	Kawakol	46	28,538	40.6	73.4
7	Roh	70	16,168	73.3	49
8	Gobindpur	64	14,415	51.9	74.4
9	Akbarpur	146	19,400	83.2	81
10	Hisua	50	11,525	65.8	39.6
11	Narhat	56	7,560	83.5	38.9
12	Meskaur	61	12,039	78.1	68.3
13	Sirdala	80	23,154	58.6	60.7
14	Rajauli	109	26,138	33.2	65.2
	District Total:	**964**	**228671**	**64.9**	**63.2**

Note: - Cultivable area = irrigated area + unirrigated area

Table 42 gives the percentage of cultivable area as also the propjortion of irrigatged area to total cultivable area in the district and its various C.D.Block. It would be seen from the table that 64.9 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 63.2 percent area is found to be irrigated. Among the C.D.Blocks the highest percentage of cultivable area is found in Nardiganj C.D.Block with 88 percent closely followed by Akbarpur C.D.Block with 83.5 percent. The lowest cultivable area is found in Rajauli C.D.Block, which is 33.2 percent. The highest proportion of irrigated area (81%) to total cultivable area is found in Akbarpur C.D.Block followed by Warisaliganj C.D.Block with 77.1 percent. The least proportion of irrigated area is found in Kawakol C.D Block with 49 percent, which indicates that the villages in this Block are deprived of required irrigational facilities.

TABLE 43: PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Hisua (NA)	0.7	0.3	0.3	0.6	0.2	0.2	0.2	0.0	0.0
2	II Nawada (M)	8.4	1.4	7.0	7.1	1.1	1.2	4.5	0.0	0.3
3	III Warisaliganj (NA)	2.4	1.0	1.4	1.4	0.7	0.0	0.0	0.0	0.7
	District Total	**5.6**	**1.1**	**4.5**	**4.6**	**0.8**	**0.7**	**2.7**	**0.0**	**0.4**

The above table gives the details of finances in the statutory town in the terms of per capita receipt and expenditure. There are only three statutory towns in the district. Hisua (N.A) Nawada (M) and Warisaliganj (N.A). On going into the details of receipt under different heads it can be seen that the receipt from all other sources is the major head for per capita receipt in case of Hisua (N.A), Nawada (M) and Warisaliganj (N.A). It can be seen from the table that in Nawada (M) the per capita expenditure incurred on public works is higher than the per capita expenditure on general administration. In Hisua (N.A) per capita expenditure incurred on general administration and public works are equal.

TABLE 44: SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Hisua (NA)	3.2	2.0	1.2	0.4	0.4
2	Nawada (M)	2.2	0.6	0.6	0.1	0.6
3	Warisaliganj (NA)	3.2	1.3	0.6	0.0	0.3
	District Total	**2.6**	**1.0**	**0.7**	**0.1**	**0.5**

The Table 44 gives the details of different categories of education institutes per ten thousand populations in the statutory towns of the district. It would be seen from the table that institutions like secondary/ matriculation level school and college are situated in Nawada district.

On going into the details of the table, it can be observed that Hisua (NA) and Warisaliganj (NA) have more number of primary school (3.2) per 10,000 population than Nawada (M) with 2.2 primary school per 10,000 population. Further, it can also be seen Nawada (M) is also lagging behind Hisua (NA) and Warisaliganj (NA) in case of availability of junior secondary/Middle school per 10,000 population. Only in the case of availability of college per 10,000 population Nawada (M) has an edge over Hisua (NA) and Warisaliganj (NA).

TABLE 45: NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Hisua (NA)	2
2	Nawada (M)	16
3	Warisaliganj (NA)	12
	Distrct Total	**13**

The Table 45 furnishes information regarding availability of beds in medical institutions in different towns of Nawada district.

It is apparent from the table that Nawada(M) has maximum number of beds in medical institutions per 10,000 population while Hisua(NA) has the minimum number of beds (2) available for every 10,000 population.

TABLE 46: PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
Data is not available				

TABLE 47: MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Hisua (NA)	Leather Materials	Betal
		Wooden Materials	Mung
		Agarbatti	Rice
2	Nawada (M)	Leather Goods	Rice
		Wax	Wheat
		Silk Cloth	Maize
3	Warisaliganj (NA)	Sandal Dust	Rice
		Yarn	Wheat
		Agarbatti	Potato

Table 47 presents the most important commodities manufactured in the town and exported from the towns of the district. It is apparent in the table that Leather materials, wooden materials Agarbatti, Wax, Silk cloth and Sandal Dust are being manufactured in the towns of the district. Further it can be seen that Betal, Mung, Rice, Maize, Wheat and Patato are being exported from the towns of the district.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52:

TABLE 48: HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households

	District total	**266,407**	**247,648**	**18,759**	**82,588**	**79,861**	**2,727**	**1,782**	**1,648**	**134**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 shows that there are as many as 258914 households accounting for 97.2 percent of the total households of the district dwelling in owned houses of such households the proportion of households dwelling in 3+ room is highest i.e. 39.8 percent where as it is the lowest i.e. 1.4 percent for those dwelling in no exclusive room. The median number of rooms is 3 for total households in the tenure status of owned dwellings.

There are 81303 Scheduled Castes households accounting for 98.4 percent of the total Scheduled Castes households in the district and are dwelling in owned houses and the median number of room is 1. There are 2328 scheduled tribes households accounting for 93.8 percent the total Scheduled Tribes households are residing in owned houses and the median number of room is 2.

There are 5298 households accounting for 2.0 percent of the total households of the district dwelling in rented houses. The proportion of such households dwelling in single room and double room are the highest i.e. 33.0 each percent whereas it is lowest i.e. 0.9 percent for those dwelling in no exclusive room. There are 498 Scheduled Castes households accounting for 0.6 percent of the total Scheduled Castes households who are dwelling in rented houses and the median number of room is 2. Only 47 households accounting for 2.6 percent of the total Scheduled Tribes households reside in rented houses in the district and the median number of room is 2 for such households.

A similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/C.D. Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

	District Total:	**38.9**	**47.5**	**13.6**	**35.8**	**49.9**	**14.3**	**79.8**	**15.7**	**4.5**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note:-

Permanent:- 1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt briks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

Semi permanent:- 2 Semi-permanent houses refer to those houses made of other types of materials.

Temporary:- 3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc.are used for roofs.

It would be seen from Table 49 that of the total rural households maximum proportion of households i.e. 14.3 percent live in temporary houses followed by 35.8 percent living in permanent house and 49.9 percent living in sumi permanent houses. In the case of urban household in the district however the maximum proportion of household i.e. for 79.8 percent live in temporary houses followed by 15.7 percent in semi permanent houses.

Among the C.D.Blocks in the district, Hisua has the maximum proportion of rural households living in temporary houses (20.6%) followed by Meskaur (19.0%) Kawakol C.D.Block has the minimum proportion of household's living in temporary houses with 6.1 percent. In case of permanent houses, Nawada C.D.Block has the maximum proportion of rural households living in permanent houses (47.9%)followed by Kashi Chak C.D.Block (47.6%). Sirdala C.D.Block has minimum proportion of rural households living in permanent houses with 23.4 percent.

In case of semi permanent houses, Sirdala C.D. Block has the maximum proportion of households (60.4%) followed by followed by Gobindpur C.D. Block (59.3%). Kashi Chak C.D. Block has the minimum proportion of households living semi permanent houses with 36.2 percent.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage means closed and open drainage.

Tables 50 shows that of the total rural households 247,648 households, 61.9 percent have improved drinking water facility. The highest proportion of households with improved dinking water facility can be observed in Nawada C.D with 73.2 percent where as it is lowest in Meskaur C.D.Block with 51.0 percent.

As regards electricity it is found that only 3.0 percent of the rural households in the district have electricity. The highest proportion of households with electricity is in Nawada C.D.Block with 7.4 percent whereas it is lowest in Kashi Chak C.D.Block with 0.5 percent.

Only 8.2 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is Pakribarawan C.D.Block with 12.6 percent, whereas it is lowest in Hisua C.D. Block wih 4.8 percent.

Only 15.5 percent of the rural households in the district have toilet facilty. The highest proportion of households having toilet facility is in Narhat C.D.Block with 19.3 percent. Whereas it is lowest in Sirdala C.D. Block with 9.7 percent.

Only 66.2 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Gobindpur C.D.Block with 75.8 percent whereas it is lowest in Sirdala C.D.Block with 49.1 percent.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table 51 shows that 24.7 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Gobindpur C.D.Block (64.5) whereas it is lowest in Kashi Chak C.D.Block with 3.9 percent.

16.0 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D.Blocks highest proportion of households using crop residue, as fuel for cooking is 24.5 percent in Kashichak C.D.Block whereas it is lowest (8.3%) in Meskaur C.D.Block.

54.0 percent of the rural households in the district use cowdung cake as fuel for cooking. Among the C.D.Block the proportion of households using cowdung cake as fuel for cooking is highest (82.6%) in Meskaur C.D.Block whereas is lowest (24.4%) in Gobindpur C.D.Block.

In the case of cooking (L.P.G) there are only 4620 households accounting for 1.7 percent of the total households in the district using it for cooking as regards Kerosene there are only 3694 households accounting for 1.4 percent of the total households in the district using it for cooking .

Data source: Census of India 2001, H-series: Table on Houses, Household amenities and Assets.

It would be seen from the table above that there are 26,6407 households accounting for 13.8 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in Nawada C.D.Block (23.8%) whereas the same is lowest in Meskaur C.D.Block (9.7%).

There are 60,219 households accounting for 22.6 percent of the total households in the district possessing radio / transistor. In this regard the highest proportion of households is in Nawada C.D.Block (28.7%) whereas it is lowest in Gobindpur C.D.Block (22.7%).

17,266 households accounting for 6.5 percent of the total households in the district possess television. In this regard the highest proportion of households is in Nawada C.D.Block (2.9%). whereas it is lowest in Kashi Chak C.D.Block.

As regards telephone there are only 3629 households accounting for only 1.3 percent of the total households in the district availing telephone services. In this regard the proportion of households is in Nawada C.D.Block (4.8%) where as it is lowest in Pakribarawn C.D.Block (0.5%).

183097 households accounting for 19.0 percent of the total households in the district possess bicycles. In this regard the highest proportion of households is in Nawada C.D.Block (25.4%) where as it is lowest in Meskaur C.D.Block with (14.3%).

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

No major social or cultural event has taken place in the new district of Nawada since it came into existence.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

1. Nawada

Nawadah, the district headquarters, is situated on both sides of the Khuri river on the Patna-Ranchi National Highway. The part of the town on the left bank is older and is called Dih while the other part is of recent origin. Nawada which has so far developed at a slow pace is expected to witness faster growth with the location of district headquarters. There are quite a few places of interest in Nawada.

About a mile north of Nawada on Patna - Ranchi road lies Gonava village. It is a place of pilgrimage for the Jains of both sects. The Digambar Jain temple is just by the side of main road while the Swetambar Jain temple is at the back of it. The Digambar Jain temple built in 1925 is quite beautiful and, alongwith the Swetambar temple could be developed into a good tourist spot. The Digambar Jain Mandir has a large marble idol of Lord Mahavira about 48 years old. The Swetambar Jain temple which was built more than 800 years ago has an impressive approach road. Ashoka trees, palnted on the flanks, shade the road and lend serenity to the atmosphere. The temple has got a marble idol of Lord Mahavira flanked by a granite idol of Sudharmaji and idol of Panch Parmesthi made of asthadhatu (an alloy of eight metals) and also a marble idol of Gautama.

About a mile away from Nawada towards Hisua by the side of Sobh Nala there is a Shiv temple, which has got great religious significance. Virtually on every Purnima as well as on each Hindu religious festival, a mela is held here.

2. Narhat

Narhat, which is the Block headquarters of the blcok bearing the same name, is at a distance of about 22 Kms. from Nawada on a pucca road via Hisua, which is 15 Kms away on the Nawada-Gaya main road. The soil is comparatively fertile but there do not exist commensurate facilities of irrigation. The places of interest in this Block are the following:

Sitamarhi - Sitamarhi is a small village about 32 Kms. from Nawada and is a place of great religious and mythological importance. There is an elliptical cave carved inside a huge hemispherical block of granite rock. The legend is it that it was in this cave that Sita had to take refuge after having been exiled by Rama. Built by Vishwakarma, the divine builder at he behest of saint poet Valmiki, as the legend goes it was the haven for Sita and provided her protection in the dense forest which was infested with wild beasts. One and a half kilometres north-east of Sitamarhi there is a village called Barat, where the saint poet Valmiki is said to have lived when Sita was exiled. It was on the wide high level ground near this cave that Sita’s sons Lava and Kusha are said to have fought against Rama’s army.

Barauta (also Beraounta) - The village is situated 6 Kms. south-east of Tilaiya Railway Station. It has an old brick temple of Patal Devi, the Goddess of the Nether world. There is a hole in the temple leading to the nearly tank. According to the legend the temple had its origin during

Mahabharat. It is said that Beraounta is the distorted form of Biratnagar thus connecting the place with the famous king Virat of Mahabharat.

3. Hisua

Hisua, the Block headquarters, is at a distance of 14 kilometres from Nawada on Nawada-Gaya main road. In Hisua itself there is a tomb of Kamdar Khan. There is also a mosque of the same period. Other palces interest are given below:

Kahuare - This village has a 200 years old fortress, which is known as Mahabirgarh and also as Jiachhiamaigarh. Images of Lord Hanuman and Jiachhiamai are enshrined in it. On excavation, statues of Lord Mahavira have also been found.

Sakra - This village has a temple with idols of Laxminarayan, Suryanaraya, Satyanarayan, and Gauri Shanker, which are said to be very old although the temple itself was built at a later date. There are inscriptions in Pali script at the base of the image of Lord Laxminaryan.

Orro - This village is identified with Ondup, which was on the southern boundary of Jarasandh's capital Rajgir. It finds mention in Buddhist litterature. Ruins of brick walls and some stone images have been found here.

4. Kawakole

Kawakole, Block headquarters, is at a distance of 45 kms. from Nawada on pucca road. A few furlongs away from this village is a hilly feature called Echo peak where Rishi Kag Bhusundi is said to have delivered his sermons. The mythological aspect apart, this peak presents are of the finest examples of echo of sound. The peak is about 1,000 ft. high. There is a big piece of rock at a distance of about 400 yards from the base of the peak. Whatever is spoken on the second rock is marvellously echoed by the first rock.

Hadhadva - At a distance of about 6 kms. from Kawakole there is a seasonal waterfall called Hadhadva in Macchaudra village. The name onomatopoeic in character suggests the rhythmic sound made by the cascading waterfall during the rainy season. It is favourite picnic spot.

Sokho Dewara - It is a village consisting of two-tolas, Sokho and Dewara located about 5 kms. south-west of Kawakole. It is known on account of its Sarvodaya Ashram set up by Shri Jai Prakash Narain in 1952. The ashram has been built at a beautiful site against the backdrop of hills. The Ashram launches rural development projects based on Sarvodaya principles and monitors and studies their extent of success and socio-economic impact on the people covered by them. The Ashram has assumed international importance and attracts scholars from far and wide.

5. Warisaliganj

Warsaliganj is sitauted at a distance of 23 Kms. from Nawada on the Nawada-Barbigha (Munger district) pucca road. It is the most prosperous town in Nawada district and the land area is also very fertile. In fact, Warisaliganj is the main centre of trade of Nawada district and feeds the rest of it. A few places of historical significance within the Blocks are mentioned below:

Apsarh and Parwati - Apsarh village lies at a distance of about 14 Kms. from Warisaliganj and is connected to it by a pucca PWD road. There are a few sites and temples in the village, which are of great historical and archaeological interest. Inside one of the temple there is a gigantic stone idol of Varah (Lord Vishnu). According to an inscription found here this statue was installed by king Adityasen of the Gupta dynasty in 600 A.D. This is located by the side of a hillock, more precisely a mound of earth and baked bricks. Excavations by the archaeological department on one side of this hillock have brought to light a three-walled cordon with engravings connected with the various episodes in the life of Rama, viz., Rama, Laxman and Sita crossing river Ganges on Kewat's boat, the scene of Valmiki Ashram, the scene of Chitrakut, Rama and Sita seated under a tree while Laxman plucks fruits perched on top of the tree, the

meeting of Rama and Bharath. There is a Shiva temple in the village also and it enshrines a Shivalinga alongwith the image of Parvati engraved in the same granite block. Opposite to this temple also there is a Shivalinga of huge size.

Parwati to the north of Apsarh is another place of great importance. On the Parwati hill there is a large cave inside which there are two tunnels which extend to a long distance and most probably meet together. According to the leged Lord Buddha, after attaining enlightenment at Bodh Gaya, delivered a sermon on this hill during the course of his excursions for the spread of his religion.

Thera - 8 Kms. away from Warisaliganj there is a Shiva temple by the side of the village Thera. A shivaling, though almost broken, seems to posses much religious significance and a fair is held here every year.

5. Akbarpur

Akbarpur is at a distance of about 17 Kms. from Nawada on the Nawada-Gobindpur road. Though Akbarpur has got very few places of interest it is associated with the names of some famous historical personalities. It is said that during the period of Aurangzeb General Kamdar Khan and his brother Namdar Khan established their control over this area. Two places, viz., Barew and Nemdargunj are worthy of mention.

Barew - It has the remains of a mud fortress probably built during Aurangzeb's time by the well-known Mughal General Kamdar Khan. Within the compound of this fortress there is the image of Lord Shiva, which is worshipped by the local people. There is also mosque and a Karbala said to have been constructed by Kamdar Khan within this same fortress. This is suggestive of the communal harmony, which must have prevailed under Kamdar Khan.

Nemdargunj - Five Kms. from Barew on Kulcha road is a village named Nemdargunj after Namdar Khan, the brother of Kamdar Khan.

6. Gobindpur

Gobindpur is at a distance of about 37 Kms. on the pucca road from Nawada. From the Nawada-Ranchi main road one has to turn to the east at Fatehpur road junction about 16 Kms. from Nawada.Gobindpur Block is largely drought-prone. It has got many places of historical interest and scenic beauty.

Kakolat falls - Kakolat falls, which is at a distance of about 9 Kms. from Akbarpur (Block headquarters) situated between Fatehpur road junction and Gobindpur, presents a very fascinating view as one moves towards it. It is virtually hidden in the thickets of the jungles and the sylvan surrounding do provide an escape from he humdrum of routine life. Although Kakolat is not a very big waterfall it has got its own charm considering the surroundings. After falling from the height of 150 ft. it gently flows down a few yards where from it again takes a leap down to the ground level forming into a perennial stream. The falls derives its name from Kol, a tribal people who inhabited this area once upon a time. Since according to a local legend persons taking bath in the falls would not become snakes in any of their rebirths, a large number of people take bath in the falls and every year a fair is held during Chaitra Sankranti. This place can be developed into a beautiful tourist spot.

Kol Mahadev - Kol Mahadev is at a distance of about two Kms. from Kakolat. There is a Dam by this name at this location which, alongwith its reservoir, presents a picturesque sight. By the side of the Dam there is a Shiva temple named Kol Mahadev. In enshrines a grantie Shivalinga which is about 18 in height. There is an imprint of Trishul, Lord Shiva's trident, on this Shivalinga. Besides, there is an idol of Gauri alongwith idols of Ganesha, Mahavira (the Hindu diety) and Bhairava, all engraved in one single granite stone block. According to a local legend, these idols are very ancient and have been there since time immemorial.

Siur - About 8 Kms. north-west of Govindpur the village of Siur is remarkable for some very large mounds of ruins which deserve excavation and archaeological study.

7. Rajauli

Rajauli is at a distance of about 30 Kms. from Nawada on the Patna-Ranchi Highway and is situated on the bank of river Dhanarje. The southern part of Rajauli abounds in low hill ranges and spurs. In fact it forms the southern boundary of the vast hill ranges running across the districts of Hazaribagh and Palamu of present Jharkhand state. These hill ranges are of great religious and mythological interest as many famous saints had set up their Ashrams here and presents a beauteous sight composed of hills and forests.

About 4 Kms. south of Rajauli there is a thick forest named after the famous saint Shringi. He had set up his Ashram on the peak of this hill, which is about 2,300 ft. high. On the top of the hill there is a flat ground about 100 sq. ft. whereat a brick enclosure of vary recent origin enshrines two granite stone idols of the saint, Shringi and Goddess Durga on a lion (Singhvahini).

On the eastern side of the road there is a hill called Durvasa. It was on the top of this hill that irascible saint Durvasa had his Ashram. This hill is about 2,250 feet high. There is nothing of great interest about the hill except that it is thickly forested and has an arduous climb.

About 3 kms. further to the west of Shringi hill there is the Gautama hill on the top of which Gautama had his Ashram. It carried great religious significance for the nearby villages who offer prayers during the periods of drought to appease the rain God.

On the north-east of Rajauli about 6 Kms. away there is a turn-hill feature. The height is not much and it is all rocky with hardly any vegetation. The small hill has has an open cave said to be the Ashram of saint Jagbali or Yagyavalkya. This hill connects the second and higher hill which has a nice cave said to have been the Ashram of saint Loam's Shringi is said to have been his son. Two big melas on Sravan Purnima and Gopasthmi are held at this place.

In Rajauli there is also a mausoleum of Hazrat Daata Kalal Shah called Khan-Ka-Takh. This Fakir an ascetic had come to this place about 200 years ago from Punjab.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The northern and southern parts of the district constitute two district natural region. Northern part is plain, alluvial soil and very fertile on the other hand southern parts is hilly. Infact these hills form the southern fringes of the Chotanagpur plateau.

(xi) Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic

Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KALAPANI' in Sidhaw C.D. Block of Pashchim Champaran district and the last PLCN 04509800 has been assigned to the last village 'TOLA SUNDARI' of the state in Chakai C.D. Block of Jamui district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is

available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows:

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste: This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation: This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in English and serial number of village respectively.

Town Directory:

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. Block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as ‘Yes’ or ‘No’. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km

. upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the villages are as follows:

Column 1: Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3: Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4: Total population

The total population of the village as per 2001 Census is given against this column.

Column 5: Number of households

The number of households as per 2001 Census is given in this column.

Amenities:

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes:

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H (3), D (4), etc.

Column 8: Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows:

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12: Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes:

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes:

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17: News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18: Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23: Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

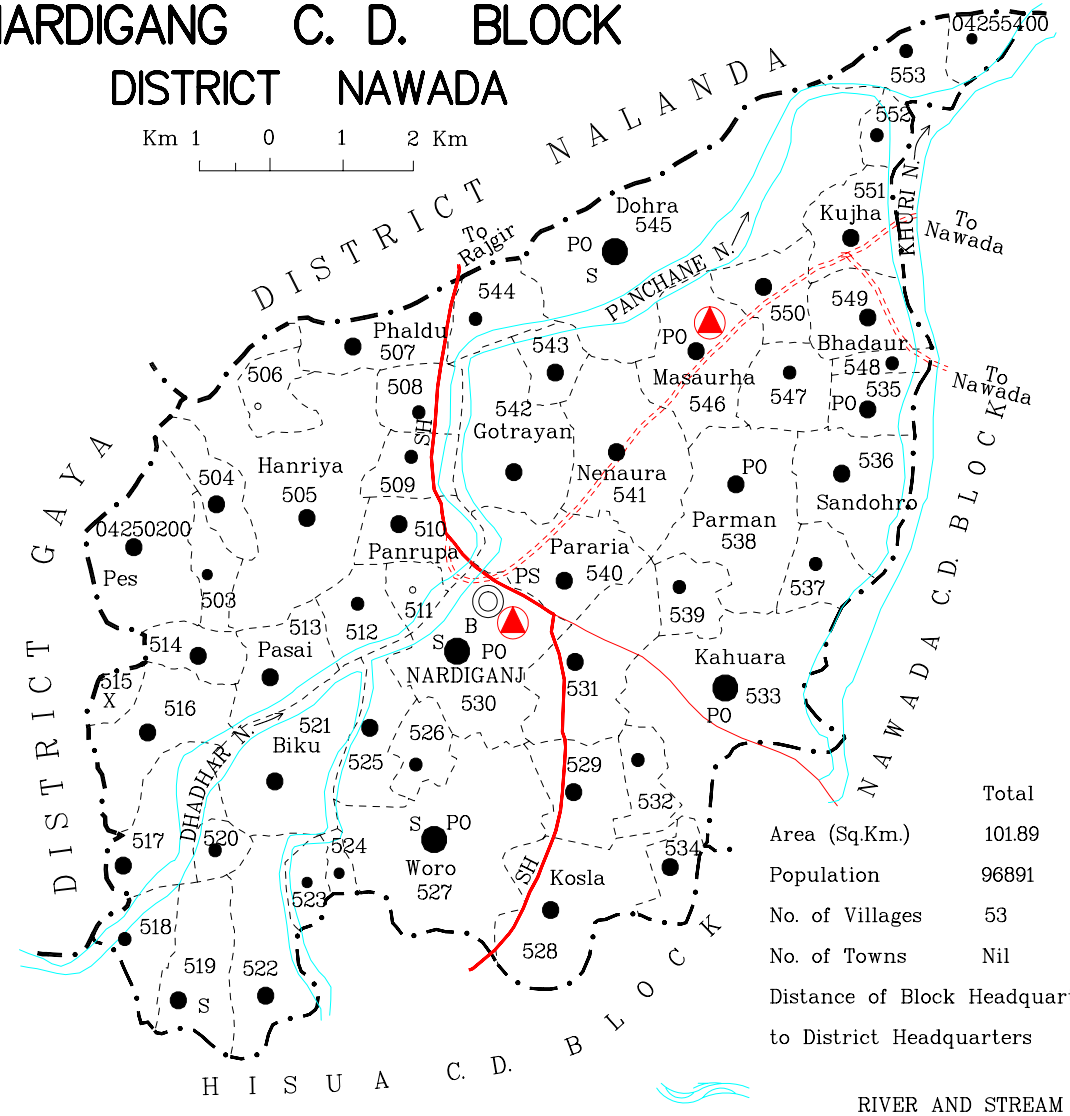

Appendix I	:	It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.
Appendix IA	:	Indicates number of villages CD Blockwise having one or more primary schools.
Appendix IB	:	Indicates number of villages CD Blockwise having primary, middle and secondary schools.
Appendix IC	:	Shows number of villages CD Blockwise with different sources of drinking water facilities.
Appendix II	:	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix IIA	:	Indicates list of Census Towns which do not have one or more amenities.
Appendix III	:	It gives the land utilization data in respect of Census Towns/non-municipal Towns.
Appendix IV	:	CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.
Appendix V	:	Summary showing number of villages not having Scheduled Castes population.
Appendix VI	:	Summary showing number of villages not having Scheduled Tribes population.
Appendix VIIA	:	The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges
Appendix VIIB	:	The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.
Appendix VIII	:	Number of Villages under each Gram Panchayat (C.D. Block wise)
Appendix IX	:	Statement showing number of girls schools in the villages

Town directory

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows:

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II: Physical Aspects and Location of towns, 1999.

Column 3 to 5: Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III: Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV: Civic and Other amenities, 1999

Column (1 to 5): Self-explanatory.

Column (6): Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7): System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows:

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes:

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15: Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20: Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V: Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3: Self-explanatory.

Column 4 & 5:

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes:

(i)	Hospital	H

(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D (3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below:

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used:

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/PUC/Junior College level, Secondary/ Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matri-culation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P (4), M(3).

Column 15: Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16: Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19: Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20: Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows:

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI: Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9: Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11: **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII: Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

APPENDIX TO TOWN DIRECTORY

TOWNS SHOWING THEIR OUTGROWTHS WITH POPULATION

Serial number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
There is no outgrowth in any of the towns of Nawada district.				

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The

responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices, which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and

Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/C.D. Block / UA / City / Town
2. Primary Census Abstract for Scheduled Castes	District/C.D. Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/C.D. Block/Town
4. Village Primary Census Abstract	CD Block/Village wise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Nawada	1991	79	87	91	100
	1981	95	120	133	155

Information on the question on children ever born and children surviving canvassed for all ever married women during 1981 and 1991 Census has been compiled by age of the mother. Estimates of child mortality thus worked out are presented in Annexure II .

The estimates of child mortality for the ages 1,2,3 and 5 are denoted here as q(1),q(2),q(3) and q(5)respectively of the children of the district and the state. It is evident that child mortality for the district has level in higher side than the state average with respect to both 1981 and 1991 Censuses.

ANNEXURE – III

VARIOUS MEASURES OF FERTILITY AND MEAN AGE AT MARRIAGE, 1991 CENSUS

Various fertility measures for the district and the State(1991-Census)

1	State 2	District 3
CBR	36.2	36.2
TFR	5.3	5.3
TMFR	5.9	5.6
GFR	163.0	162.0
GMFR	186.0	176.0
Child woman ratio	66.6	64.9
No. of children ever Born per woman age group (45-49)	4.1	4.1
Mean age at marriage	16.5	14.3

Here are some important fertility indices, which need attention while discussing fertility such as crude Birth rate (CBR), Total Fertility rate (TFR), Total Marital fertility rate (TMFR), General fertility rate (GFR), General marital fertility rate (GMFR), Child woman ratio (CWR) etc. The fertility indices for the district and the state are presented in Annexure –III.

It transpires from the Annexure that all the fertility measures from CBR to GFR with respect to Nawada district is more or less same as the state of Bihar. Only GMFR in Nawada district is noticeably lower than the state average. Child woman ratio, and mean age at marriage with respect to Nawada District are lower compare to state averages while number of children even born per woman in age group 45-49 is same for the district and the state.

ANNEXURE - IV (A)

Nawada	294,567	30,410	264,157	84,421	8,049	76,372	378,988	38,459	340,529
	(65.8)	(70.0)	(65.4)	(18.9)	(18.5)	(18.9)	(84.7)	(88.5)	(84.3)

State/District	Born in other states			Born in other countries			Total migrants		
	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,582,339	195,360	1,386,979	211,880	18,501	193,379	19,989,195	2,102,651	17,886,544
	(7.9)	(9.3)	(7.8)	(1.1)	(0.9)	(1.1)	(100.0)	(100.0)	(100.0)
Nawada	67,929	4,948	62,981	612	38	574	447,529	43,445	404,084
	(15.2)	(11.4)	(15.6)	(0.1)	(0.1)	(0.1)	(100.0)	(100.0)	(100.0)

Growth of population for any area is influenced by the migratory movements of the people including in and out migration. However, for want of data on out-migration since such data is not collected in Census, it might not be possible to assess the net impact of out migration on growth of population, although such impact may not be much in most of the cases. In the

The above tables show percentage distribution of migrants by place of birth based on data recorded during 1991 and 2001 Censuses. It can be seen from the tables that total migrants in the district of Nawada are 276,895 whereas in the state as a whole the migrants are found to be 21,307,020 in number (Nawada constitutes 1.3% of the migrants of the state). The corresponding

figures for the district and the state for the year 2001 are 447,529 and 19,989,195 respectively. Nawada constitutes 2.2 percent of the total migrants coming to the state in 2001. Female migrants outnumber the male migrants both in the case of the district as well as the state in both the Censuses. While the male migrants constitute only 9.3 and about 9.7 percent in 1991 and 2001 respectively, the female migrants are as high as 90.7 and 90.3 percent of total migrants of Nawada district in 1991 and 2001 respectively. The corresponding proportion of male and female migrants for the state as a whole works out to 10.9 and 89.1 percent respectively in 1991 and 10.5 and 89.5 percent respectively in 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of cases.

It can further be seen from the tables that most of the migratory movement has taken place within the district of enumeration in Nawada district both in 1991 and 2001 (68.7% for females and 79.1% for males in 1991 and 65.4% females and 70.0% males in 2001). The proportion of female migrants born in other districts of the state is high, being 30.8 percent to female as against 19.9percent for males in 1991 and 18.9 percent and 18.5 percent respectively in 2001. The state figures are on the reverse line. Here proportion of male migrants is higher than the proportion of females migrants, which can be clearly seen in the table.

The proportions of migrants (both males & females) born in other states and in other countries have been quite low in the district during 1991 Census. Although proportion of migrants born in other States during 2001 Census is significantly high for males as well as females in the district. However, the state average figures are found to be comparatively lower in case of migrants born in other states as compared to corresponding figures of migrants in the district during 2001 Census.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Nawada		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL IGRANTS	Total	20,070,811	17,002,880	3,067,931	275,285	248,530	26,755
(1) Within the state		(100.0)	(84.7)	(15.3)	(100.0)	(90.3)	(9.7)
	Rural	19010120	16570646	2439474	263,285	244,920	18,365
		(94.7)	(82.6)	(12.2)	(95.6)	(89.0)	(6.7)
	Urban	990737	375267	615470	10,690	3,500	7,190
		(4.9)	(1.9)	(3.1)	(3.9)	(1.3)	(2.6)
(2) In other states of India	Total	1049969	575484	474485	1,500	1,000	500
		(100.0)	(54.8)	(45.2)	(100.0)	(66.7)	(33.3)

		(76.2)	(48.8)	(27.4)	(53.3)	(38.7)	(14.7)
	Urban	243448	60040	183408	700	420	280
		(23.2)	(5.7)	(17.5)	(46.7)	(28.0)	(18.7)

The Annexure IV (B) presented provides a glimpse of rural-urban movements of migrants within India. It is clearly observed that of the total intrastate migrants in the state of Bihar, 82.6 percent were from rural to rural, 3.1 percent from urban to urban, 12.2 percent were from rural to urban and 1.9 percent from urban to rural. In case of Nawada district, of the total intrastate migrants, 89.0 percent were from rural to rural, 1.3 percent from urban to rural 2.6 percent of the intra state migrants were from urban to urban areas, and 6.7 percent from rural to urban areas.

The number of migrants in the state of Bihar who were born in other state of India was about 10.5 lakhs in 1991 while in the district of Nawada the corresponding figures was merely 1500 as is evident from the annexure above. As stated earlier the proportion of interstate migrants in Nawada district is not significant as compared to the state of Bihar as a whole. The rural-urban movements of interstate migrants in the district and the state can be viewed from the Annexure IV (B).

ANNEXURE - IV (C)

INTERSTATE MIGRANTS, 1991 CENSUS

Total for fourteen states	1,538,478	97.2			
Other states	43,861	2.8			
Total	**1,582,339**	**100.0**			

The data presented in the above tables pertaining to 1991 and 2001 Censuses deal with the magnitude of inter-state migration to the state of Bihar as also migrants coming from other states to Nawada district. It will appear that the district received only 0.1 percent of the total migrants coming from other states to Bihar in 1991 and 4.3 percent in 2001 (1,500 out of 1,049,969 in 1991 and 67,929 out of 1,582,339 in 2001). The state of West Bengal and Uttar Pradesh in 1991 and Uttar Pradesh alongwith Jharkhand were the major contributors of migrants to the state in 2001. For the district of Nawada West Bengal, Uttar Pradesh and Haryana in 1991 and Gujarat alongwith Jharkhand and Uttar Pradesh in 2001 have been the major contributors. Nine major contributing states in 1991 and 14 such states in 2001 contributed 93.4 and 97.2 percent of the total migrants to the state of Bihar respectively. In case of Nawada district 9 major states in 1991 and only 6 such states in 2001 contributed over 98 percent of total migrants to the district.

The data presented in Annexure-V (A) show religion wise distribution of population according to 1991 and 2001 Censuses. It may be observed that Hindus have been numerically the most important religious community in the state of Bihar during both the Censuses as it accounts for as much as 82.4 and 83.2 percent of the state's population in 1991 and 2001 respectively. The Muslims come next with 14.8 and 16.5 percent respectively. Christians had been the third most important religious community though it proportions remained only 1.0 percent in1991 and 0.1 percent in 2001. Sikhs, Jains and Buddhists remained very small in proportion as each of these constituted less than even 1.0 percent of the population of the state during both the Censuses. Persons categorized under "Other Religions & Persuasions" comprised 1.7 and 0.1 percent of the state's population during 1991 and 2001 Censuses.

In Nawada district the proportion of Hindus to the total population of the district remained 88.9 percent in 1991 and 88.6 percent in 2001 which were comparatively higher than the respective state averages. Muslims they constituted 11.1 and 11.3 percent of the district's population in 1991 and 2001. The proportion of population of other religious communities remained almost negligible in the district of Nawada during both the Censuses as Hindus and Muslims taken together comprised over 99 percent of the total population of the district during both the Censuses.

Annexures VB furnish religion wise distribution of population for the district of Nawada and its C.D. Blocks in 1991 and 2001 Censuses.

As already observed in Annexure V (A) of 1991 and 2001Census, though the proportion of Hindus in the district of Nawada is highest as compared to other religious communities still it was seen that Muslims also formed a sizeble chunk of population in the district. Among the C.D.Blocks of the district it can be seen that almost all the the C.D.Blocks of 1991 and 2001 Census constituted Hindus as their predominant population as they constitute over 85 percent of the total population of the C.D. Blocks . Muslims come next to Hindus.The existence of other religious communities in various C.D. Blocks of the district is insignificant as their proportions to total population are almost negligible in both the Censuses.

Annexure V1 (A) furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991 and 2001 Censuses while Annexure (B) shows percentage distribution of population by marital status for the state. The Annexures V1 (C) and V1 (D) presented above give corresponding figures and percentages for the district of Nawada.

It shall be evident from Annexures V1 (A) to V1 (D) pertaining to 1991 and 2001 Censuses that the state of Bihar as well as Nawada district have relatively higher proportion of males in the "never married" category. The proportion of females, however, is found to be larger in the "married" category. This may, perhaps, be attributed to the fact that women, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 49.3 percent of "never married" males in 1991 Census and 56.3 and 52.7 percent in 2001 Census in Bihar state and Nawada district respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 41.7 percent in 1991 and 47.3 and 45.6 in 2001 Census. Females are found to be higher in proportion in the "married" category than males both in the state and the district in

both the Censuses, the percentages being 49.8 and 54.2 percent in 1991 and 47.8 and 50.1 percent in 2001. The corresponding figures for males in 1991 and 2001 Censuses stand at 43.6 and 48.4 and 41.6 and 45.2 respectively. So far the proportion of “widowed” is concerned, it transpires from the tables pertaining to 1991 and 2001 Censuses that female “widowed” are higher in proportion than male “widowed” both in the state as well as in the district. The proportion of “divorced or separated” is found to be negligible both in case of males and females in the state of Bihar and Nawada district. However, it can be seen that females recorded higher proportion than males in 2001 Census in district as well as in the state.

While analyzing tables for 1991 and 2001 Censuses regarding marital status of the male and female population by age groups, one notices that married females outnumber married males in the age group 10-14 suggesting that child marriage among females is more prevalent than in males. It may, however, be interesting to note that proportion of married males and females in the age group 10-14 is significantly very high in Nawada district as compared to the state average figure in both the Censuses. It is also discernable from the table that child marriage is more prevalent in the rural areas i.e., villages of the state and the district than the urban areas i.e., towns.

It is further noted from the tables pertaining to 2001 Censuses that the proportion of “married” females in the state as a whole and the district is relatively higher upto the age group 30- 34 while above these age group the proportion of “married” males are found to be higher than females. This is also true for 1991 Census, Only difference is that the dividing age group is 35-39.

Annexures VII (A), VII (B), VII (C) and VII (D) furnish position of literacy and level of education by various age groups of population for the State of Bihar and the district of Nawada respectively as per data collected during 1991 and 2001 Census. Among these, Annexures VII (A)and VII (B) provide literacy position absolute in numbers whereas Annexures VII (C) and VII (D) give these figures in terms of percentages.

Literacy is one of the most important characteristics of population on which information are collected during Censuses. The concept of literacy adopted in Census has already been explained in the beginning of this volume.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The rate of literacy for Bihar (excluding population of 0-6 years) in 1991 stood at 38.5 percent, which rose to 47.0 percent in 2001. The corresponding proportion for Nawada district in 1991 and 2001 remained 38.48 and 59.7 percents respectively.

It can be seen from the Annexures that 14.6 percent males and 20.9 percent females in 1991 were literate without educational level in Nawada. The corresponding proportions in 2001 including Below Primary remained 26.1 and 35.9 percent respectively. The proportions of Primary passed males and females in 1991 were 26.0 and 35.3 percents respectively, which became 26.2 and 33.0 percent in 2001 in the district. In 1991 there were 30.0 and 28.4 percent males and females who had passed middle whereas in 2001, the corresponding figures remained lower at 13.3 and 11.2 percent respectively. The proportion of those who had passed Matriculation and above in 1991 were 29.4 and 15.4 percent for males and females respectively in the district, the corresponding figures in 2001 remained 34.4 and 20.1 percent only which were higher than the previous Census. Males out numbered females in the matter of literacy particularly in higher levels of education comprising of Middle and Matriculation and above.

ANNEXURE – VIII

PERCENTAGE DISTRIBUTION OF MAJOR MOTHER TONGUES AS RETURNED IN CENSUS-2001 FOR STATE & DISTRICT

Bihar			Nawada		
Mother Tongue	Population	Percentage	Mother Tongue	Population	Percentage
1	2	3	1	2	3
Bhojpuri	20,372,983	24.5	Magadhi/Magahi	1,197,199	66.2
Hindi	14,524,035	17.5	Hindi	429,595	23.7
Magadhi/Magahi	12,132,383	14.6	Urdu	163,989	9.1
Maithili	11,830,684	14.3	Maithili	9,947	0.5
Urdu	9,457,544	11.4	Nepali	2,270	0.1

Marwari	27,152	0.0	Rajasthani	58	0.0
Total of Other Mother Tongues	12,842,100	15.5	Total of Other Mother Tongues	5,214	0.3
Total Population	**82,998,509**	**100.0**	**Total Population**	**1,809,696**	**100.0**

The Census of India has been the richest source of language data collected and published during the successive decennial Censuses over a century. Annexure VIII furnished above provides data on mother tongue as returned by each individual irrespective of its status as scheduled or non-scheduled languages during 2001 Census for Bihar State as well as for Nawada district.

Amongst 10 major mother tongues in the State, Bhojpuri tops the list with 24.5 percent of the total population having returned it as their mother tongue. Hindi has been returned by only 17.5 percent while Magadhi/Maghi and Maithili have been returned by 14.6 and 14.3 percent of the total population of the state as their mother tongue respectively in 2001. Urdu in the state has been returned by 11.4 percent of the total state's population whereas in the district of Nawada 9.1 percent of the district population have returned it as their mother tongue. Magadhi/Magahi as mother tongue has been returned by 66.2 percent of Nawada district's population and it got first position in the list. Hindi has got second position with 23.7 percent of the district population having returned it as their mother tongues. Except these languages analysed above both for the state and the district, other have been returned by insignificant proportions or very low proportion of the respective population of the state and the district as mother tongues as per Census 2001.
