# Foreword

The District Census Handbook (DCHB) is brought out for each district since the first Census after

Independence and is one of the most widely used publications compiled and prepared by the Census Organisation on behalf of the State Governments and the Union territory Administrations. This publication provides Primary Census Abstract (PCA) data up to village level for the rural areas and provides similar details ward-wise for each city or town, and also provides the present status on availability of important civic amenities/infra-structural facilities in villages and towns of the district concerned. This publication has proved to be of immense utility, as it is considered as an essential and basic document for the purpose of delimitation of constituencies, formulation of local level and regional plan and also as an aid to district administration.

The publication of District Census Handbook(DCHB) was first introduced during the 1951 Census which contained a few important Census tables and PCA for each village and town of the district. Thereafter, at each successive Censuses, the scope and coverage of this publication was enlarged. The DCHB published at the 1961 Census provided a comprehensive descriptive account of the district, administrative statistics, Census tables and a village and town directory including PCA. The 1971 Census-DCHB series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States, Part-C was confined to district Census tables and in a few cases altogether given up due to delay in compilation and printing. At the 1981 Census, new features along with the restructuring of the formats of village and town directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised village and town directories, the PCA of village and town (ward-wise) including the Scheduled Castes and the Scheduled Tribes PCA up to c.d.block/town level were provided in Part-B. In restructuring the format of Village Directory, all the amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as Adult Literacy Centres, Primary Health sub-Centres and Community Health Workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Similarly information on approach to the village was also provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, another statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and the Scheduled Tribes population and another on Adult Literacy classes/centres were added in the Statements IV and V respectively.

The manner of presentation of the DCHBs of the 1991 Census was by and large the same as followed in the 1981 Census. The format of PCA was, however restructured slightly in the 1991 Census. Nine-fold industrial classification of main workers was given as against four-fold

industrial classification presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. Another important addition in the DCHB of the 1991 Census was the Community Development Block level presentation of village directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, as the CD block is the lowest administrative unit for developmental planning. Further, in order to facilitate the administrators, planners and researchers intending to use village directory and PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village were provided for the 1991 Census along with the corresponding codes of the 1981 Census.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the village concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users.

This publication is a collaborative task of the State Government and the Census Organisation. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the direction of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna on behalf of the State Administration. At the same time, much effort has been made to ensure comparability with the corresponding 1991 Census data and also similar information brought out by the respective State Governments in annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of

record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft District Census Handbook manuscripts received from the Census Directorates have been scrutinised in the Social

# Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and since these are printed in every Census because of their wide ranging utility. Census after Census muchinnovations/modifications have taken place in the District Census Handbooks in terms of coverage and contents of population data. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State Government. It, inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The content of Village Directory has been broadened by including additional facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town. During 1981 and 1991 Censuses this information was, however, restricted to class I and class II towns only. The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census. The eight digit permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users.

The District Census Handbooks are brought out in two parts, viz. (i) part A containing the village and town directories and (ii) part B – village and townwise primary Census Abstracts pertaining to general population. It also contains the District Primary Census Abstracts for Scheduled Castes and the Scheduled Tribes Population.

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

This publication is a joint venture of the State Government and the Census organisation.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office S/Shri Phool Singh Joint Director, A.K. Saxena Deputy Director and K.K. Verma, Assistant Director supervised the project at different stages. In this voluminous job valuable assistance was rendered by S/Shri D.P. Choudhary, S.K. Das Sudhakar, Statistical Investigators Grade-I and Ramesh Prasad, Statistical Investigator Grade-II who were responsible for supervision from beginning to end. Shri Mauleswar Singh, Assistant Director has also been associated to monitor the scrutiny work of Village Directory and Town Directory data. Sri K.K. Verma, Assistant Director prepared the first draft under the guidance of Sri S.K. Sinha, Deputy Director. The write-ups on fertility and mortality patterns and migration based on 1991 Census data are contributed by S/Shri D.P. Choudhary, S. K. Das Sudhakar and U.C. Lal, Statistical Investigators Gr.I. S/Shri D.P. Choudhary and S.K. Das Sudhakar prepared the analytical notes on inset tables based on the data of Village Directory, Town Directory and Primary Census Abstracts under the guidance of Shri K.K. Verma, Assistant Director. District and C.D. Block Maps were prepared in Map Section under the supervision of Sri M. Guria Research officer (Map). S/Shri Asharful Hoda and Surendra Mohan Prasad Lower Division Clerks typed the manuscript and S/Shri M.C. Sharma, STA (Ptg.) and N.K. Jain, Printing Inspector of ORGI helped in getting the volume printed. I am thankful to all of them.

I am personally indebted to Sri J.K. Banthia, Registrar General and Census Commissioner, India under whose guidance it has been rare privilege to strive for results. I am equally indebted to Shri R.G. Mitra, Deputy Registrar General (C & T), Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division and Dr. R.P. Singh, Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division who scrutinized the manuscript.

## District Census Handbook - 2001 Census

## ANALYTICAL NOTE

### History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications. It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities / facilities in each village and town of the respective districts. This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities. This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations / improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States / UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block / Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes / centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as followed during 1981 Census. However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census. It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level; one of the most important innovations in the 1991 Census was the Community Development Block-level presentation of data in the Village Directory and PCA instead of the traditional Tahsil / Taluka / PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory / PCA data, either from the magnetic tapes / floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes / accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth / place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures. Two lists, separately indicating names of colleges and hospitals available in the village / town concerned of the district are also being provided in the DCHB.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data. With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government / Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information / amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census

the depiction of the information / amenities in the maps has been done by utilizing Computer Assisted Cartography. The editing, annotation, incorporation of amenities and other concerned work related with district and community development block maps have done simultaneously, as far as possible, except the incorporation of population size of the villages which became ready when the Urban / Village Primary Census Abstract was made available through Computer Scanner.

## Brief history of the district

The erstwhile Garhwa Subdivision of Palamu district consisting of 8 Blocks was separated from Palamu district as an independent district "Garhwa" with effect from 1st April 1991. It is situated on south-west corner of Palamau Commissionery. The district is surrounded by the river Sone and parts of areas of the districts of Kaimur and Rohtas of the state of Bihar in the north, by the state of Chhatisgarh in the south; Palamu district in the east and Sarguja district of the state of Chhatisgarh and Sonebhadra district of the state of Uttar Predesh in the west. The district consists of 14 Community Development Blocks viz., .Garhwa, Meral, Ranka, Bhandaria, Majhiaon, Nagar-Untari, Bhawanathpur, Dhurki. Dandai, Chiniya, Kharoundhi, Ramna, Ramkanda and Kandi, 1 Municipal town namely Garhwa and 1 Census town Sinduria. There are altogether _____ villages in the district.

**Early History**

As regard early history of the distrct of Garhwa the same may be traced into the history of the district of Palamu from which the district was carved out in the year 1991. The earstwhile Palamu district consisted mostly of forest tracts. The territory seldom attracted the attention of invading armies, and the area remained outside the pale of influence of empires which were established in other parts of Bihar. The area was probably inhabited by autochthonous tribes in the past. The Kharwars, Oraons and Cheros, three oboriginal races practically ruled over this tract. Inscriptions and other relics which have been found indicate a fairly developed civilization inspite of the jungles and comparative inaccessibility of the area. The Oraons had their headquarters at Rohtas Garh in the then Shahabad district (which included the present district of Kaimur and Rohtas) and there is every indication that for sometime a portion of Palamu was ruled from the headquarters of Rohtas Garh. The Cheros reigned in Palamu for nearly 200 years and the most famous of the Chero rulers was Medni Rai who according to tradition made himself lord Paramount of the southern portion of Gaya and of large portions of Hazaribag and Sarguja (in Madhya Pradesh).

Prior to the domination of Palamu by the Cheros, Rakshel Rajputs held sway over the district. They in turn, supplanted early Marhatta settlers of whom, however, no trace is to be found now. They have probably been assimilated in the indigenous population.

A factual history of Palamu begins from the first half of the 16th century. In 1538 Sher Shah Suri had sent one of his officers to control the turbulent chiefs and free the Grand Trunk Road from their clutches who used to exploit the travellers. The Mughal influence extended to Palamu during the reign of Emperor Akbar when it was invaded by Raja Mansingh in 1574. The troops left by him were, however, driven out in 1605 when Akbar died.

In 1629, Emperor Shahjehan appointed Ahmad Khan as the sufedar of Patna. Palamu was conferred to him as his Jagir. Ahmad Khan imposed tax to the tune of Rs.1,36,000. The non-payment of this mandatory tax by Chero rulers of Palamu led to three successive attacks by the Mughals. The first invasion took place in the reign of Pratap Rai. The Mughal army was led by Shaista Khan the Governor of Bihar. The army reached the fort of Palamu, defeated Pratap Rai and compelled to pay tax of Rs.80,000.

The second invasion was called by internal bickerings. As a result of this Pratap Rai after negotiations agreed to pay an annual tax of Rs. One lakh only On the recommendation of Itaikad

Khan, successor of Shaista Khan, Emperor Shahjehan gave Palamu to him as a military chief on a jama of Rs. 2.5 laksh.

Despite two invasions the payment of tax by Chero Chiefs were never regular. As a last resort, Daud Khan, Governor of Bihar, left Patna with a strong force in 1660 and in spite of heavy drawbacks and difficult terrain, reached within three kilometers of palamu. There was an engagement and fighting which lasted three days, after which the fort was captured. Palamu was then placed in charge of Muhammadan Faujdar. But this system was done away soon and Palamu was placed under the direct control of the Viceroy of Bihar in 1660. Palamu was again invaded by Subedar Sarballand Khan. But actual fighting was warded off by the payment of one lakh of rupees in cash and in the shape of diamonds.

**British rule**

As in some other districts here also the British intervened at others' invitation. The circumstances leading to the stablishment of Bihar rule in Palamu sowed the seed of disaffection and enmity between the dispossessed Cheros and their new masters. The first intervention of the British in the affairs of the Chero Raj of Palamu occurred in 1772 owing to the protracted internecine quarrels between two rival Chero factions (1722-70). Two candidates claiming to be the rightful Raja, one Gopal Rai, grandson of Jaikishun Rai, the other Chitrajit Rai, grandson of the murdered ruling chief Ranjit Rai, brought their suits to the British. The British, more interested in revenue collection than in family quarrels, decided to occupy the fort of Palamu. As Chitrajit's Dewan, Jainath Singh, refused to agree to this even in return for recognition of Chitrajit's claim, the controlling council at Patna decided to support the cause of Goapl Rai. The fort was occupied by the British in February, 1771 and Gopal Rai was installed as the ruler on the agreeing to pay an annual tribute of Rs. 12,000. Gopal Rai was however, removed after trial in 1776. There followed a scramble for power. Bishwanath Rai, his minor brother, succeeded him while Gajraj Rai became the manager. But their position was assailed by Sugandh Rai, and Sheo Prasad Singh. However, Gajraj Rai could continue due to the support of the Collector of Ramgarh. Meanwhile in 1780 Daljit Rai, brother of Chatrapati Rai, attempted to revive the fortune of the house of Medni Rai. The Governor ordered that Bishwanth Rai, the third brother of Gopal Rai and not Gajraj or Sugandh, was the successor to the gaddi. Since this order was resisted Major Grawford was sent to Palamu with military force to restore peace. Major Crawford managed to capture Gajraj and Sugandha. Raja Bishwanath Rai died in 1783. he was followed by Churaman Rai who came of age in 1793.

Churaman Rai succeeded in resuming the estate of his weaker tenants. His action provoked the tenantry, and led to the Chero insurrection in 1800. The leader was Bhukhan Singh, a Chero. The British came with a force and suppressed the insurrection but by that time the Raja and the administration had been reduced to bankruptcy. An Assistant Collector of Bihar was apointed to look after the revenue collection in the western part of the province. Parry, the Assistant Collector who took over in 1811 made the first settlement of revenue in 1812. he annulled the Sanad, granted by Churaman Rai and took over direct collection. The Palamu estate was attacked. In 1812, the sale of Palamu estate was authorized and it was accordingly sold for Rs. 51,000 against arrears amounting to Rs. 65,000. The assessment of the estate was reduced to Rs. 9,000 in 1814 when it was granted to Ghanshyam Singh of Deo as a reward to his help to the British in suppressing the Cheros and the Kharwars.

In 1813 there was a rising organized by great Jagirdars. This led to the attachment of the estates of Chainpur. Ranka, Lokaya, Bisrampur and Obra. The Kok rebellion of 1832 had its impact in Palamu also. The Cheros and the Kharwars rose against the administration, and non-tribal Hindus and Muslims. The insurgents were, however, defeated in an engagement with the British forces near Latehar.

**1857 Movement**

During the 1857 Movement, Palamu was the most severely affected district of the Chotanagpur plateau.

The brothers Nilambar and Pitambar were chiefs of Bhogta clan of the Kharwar tribe, who held ancestral jagirs. Immediately after they heard movement against the British rule they made up their minds to declare independence. They were joined by many Chero Jagirdars. On 21st October, 1857 a force of 500 persons was organised which was led by Nilambar and Pitamber. They attacked Raghubar Dayal at Chainpur since he had sided with the British. From there they proceeded to Leslieganj and caused heavy destruction. Lt. Graham, with only 50 persons at his disposal, could not do much to thwart the insurgents. The entire countryside appeared to be up in arms. Lt. Graham was besieged in the house of Raghubar Dayal. In December, two companies arrived under Major Cotter. He was able to capture Devi Baksh Rai, one of the principal leaders of the movement. In January Col. Dalton, the Commissioner of Ranchi himself came to Palamu and captured the Palamu Fort. Ultimately the insurgents were captured and peace was restored soon afterwards. It is noteworthy that the movement in Palamu was no mere sepoy mutiny but an uprising of the indigenous population of the district.

Palamu played an important part in the freedom movement of the country. The Bihar Students' Conference was held at Daltonganj in 1920 under the presidentship of Rev. C.F. Andrews. The participants included Mazharul Haque, Mahatma Gandhi and Dr. Rajendra Prasad visited Daltonganj in 1927. The August disturbances in 1942 had their echoes in Palamu. The people of Palamu took active part in all the subsequent movements which led to the country's independence.

## Census Concepts

### As per ORGI

## Non-Census Concepts

### As per ORGI

## Scope of Village Directory and Town Directory.

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

Village and Town Directories included in the District Census Handbook give the list of villages, their area, population, amenities such as educational, medical, drinking water, post & telegraph, market/hat and communication, etc; available there and the land use statistics for each village. A new feature of the format of the Village Directory of 1981 Census is that if any of the above mentioned six amenities is not available in the village in question, the distance of the nearest place in broad ranges of distance where the facilities is available is recorded. For towns various aspects of information relating to various Census from 1901, growth rates, density, sex ratio, physical aspects, communication, municipal finances, civil, medical, educational and other amenities as well as trade, commerce, industry and banking facilities have been provided. The columns relating to the population of the Scheduled Castes and Scheduled Tribes and adult literacy classes/centeres in

the statements of the Town Directory are the innovations of the 1981 Census made to meet the requirements of the Minimum Needs programme of the Planning commission.

Statement IV-A relating to civic and other amenities for each area/locality identified as slum in Class I and II towns has been included in DCHB since 1981 Census.

Primary Census Abstract which forms a part of the District Census Handbook provides basic information such as the number of occupied residential houses and households, total population, population of the Scheduled Castes and Scheduled Tribes, literates, main workers, cultivators, agricultural labourers, workers in household industry and other workers, marginal workers and non-workers by sex in respect of each village and each urban ward. In case of urban areas certain items of information have been provided down to the Enumerator's Block level.

As followed in the earlier Censuses, the District Primary Census Abstract in respect of SC/ST has been presented in the District Census Handbook, The information contained in it is almost similar to that in the General Primary Census Abstract and the level of presentation is also identical in both the cases.

For convenience of reference, an alphabetical list of villages in respect of each development block has been furnished and it precedes the Village Directory. Another interesting feature this time is the listing of those villages in the Village Directory which are either treated as 'outgrowth' of an urban agglomeration or are wholly merged in towns (provided they continue to be borne on the Thana Jurisdiction List pending revisional settlement survey) or are treated as Census towns (urban). Such types of villages have also been retained in the Primary Census Abstract(rural) for cross reference. This has been done to ensure that the villages figuring in the PCA (rural) and those in the Village Directory match and the list of villages is in conformity with the revenue and settlement records of the Stare Government. No data with regard to amenities and land use particulars as also the population figures have been presented for such villages either in the Village Directory or the PCA (rural).

## Administrative set up

Garhwa district is located in the extreme west of the state of Jharkhand. It consists of 2 sub-divisions and 14 Community Development Blocks. Garhwa is the only Municipal town of the district, the other being a Census town Singuria. There are altogether _____ villages in the district. The Deputy Commissioner is the administrative head of the district. Whereas Superintendent of Police heads the Police Administration. Judicial Commissioner heads the Judiciary in the district. Sub-divisional Officer is responsible for running the administration of the sub-division under the control and supervision of the Deputy Commissioner. Each Community Development Block is headed by Block Development Officer. The Block Development Officer functions under the direct control and supervision of the sub-divisional officer.

## Physical Feature

The average elevation of Garhwa district is about 1200 feet above the mean sea level. The

Block of the district. A village Saruat situated on hill Gulgulpath is well worth a visit by the hikers. The village is occupied mostly by Kharwars, a tribal people.

The district lies between $23^0 60'$ and $24^0 39'$ north latitude and $83^0 22'$ and $84^0 00'$ east longitude. The district is surrounded by the river Sone and parts of areas of the districts of Kaimur and Rohtas of the state of Bihar in the north; by the state of Chhatisgarh in the south; Palamu district in the east and Sarguja district of the state of Chhatisgarh and Sonebhadra district of the state of Uttar Predesh in the west.

Its region extends from the north to the south in the western portion of the state of Jharkhand. Sone Basin forms its boundary in the north, West Palamu Hills lies on the southern and the western whereas North Koel Valley falls on its eastern border. The region is comprised of Bhawanathpur, Majhiaon, Untari, Dhurki, Meral, Garhwa, Bhandaria and Ranka C.D. Blocks. It is an Upland region where the southern portion has an elevation of over 300 m from the mean sea level while in the northern portion near the Sone Basin, the height decreases. A large number of non-perennial streams are seen in this tract near the western hills, Banki, Uria, Danro and Arraj are the important ones among them. Geologically it has affinities with Dhotanagpur gneiss, Alluvium with patches of the Lower Gondwana system and Lower Vindhyan system. Soils are Fluvents-Psamments-Orthents and Ustalfs-Ochrepts. The average annual rainfall of the region is 1,142 mm. Paddy, maize, pulses and oilseeds are the main crops grown in this tract.

**River System:**

The general line of drainage is from south to north towards the river Koyal and Sone. Koyal forms the eastern boundary and Sone forms northern boundary of the district. There are also a host of smaller streams, most of which are from mountain currents with rock stream beds. Other important rivers of the district are Danro, Sarsatiya, Tahale, Annaraj, Urea, Bai Banki, Bellaiti, Pando, Biraha, and Sapahi. One notable river is Kanhar which forms south eastern boundary of the district for about 80 K.M. Due to its Geographical formation Garhwa district is rich in water resources.

**Climate Condition:**

The climate of this district is on the whole dry and bracing. The year can be divided in to three main seasons, the winter season form November to February, the summer season is from March to May and Monsoon season from June to September; October is a transitional month between Monsoon and Winter seasons. The average annual rainfall for the district as a whole is 1.142 mm. From the onset of the Monsoon by the middle of June, rainfall rapidly increases reaching its peak in August. The annual variation of rainfall is not much. December and January are the coolest months. By March temperature begin to rise steadily. In May and early part of June the maximum temperature can be as high as $47^0$C on individual days. Humidity is generally normal in this district, except in Monsoon months.

**Flora and Fauna:**

In Garhwa district more than 40% area of the total land is under forests. Forest are the source of the revenue and meet peoples demand for timber, firewood, fodder, etc. Many of the villages of this district lies in thick forest area. The mixed miscellaneous forest products consist of the following species:- Khair, Asan, Karam, Guri, Sidha, Mahua, Gamhar, Bid, Semal, Piar, Bel, Dhaura, Salai, Kusum, Sisam etc. The extensive forest is abode of so many types of wild animals. In the thick forest of Bhandariya and Ranka wild animals like Elephant, Leopard, Hyena, Jackle, Fox, Dear, Boar, Rabbit, Monkey, Beer, are found.

**Mines and Minerals:**

The district is rich in mineral. Dolomite-lime stone is found at many places in the district. Surrounding area of Bhawanathpur and Nagar-Untari blocks are rich in dolomite. Coal deposits are

found in Bhandaria block. Deposits of Graphite, China clay and Granite are also available in this district.

**Land Use pattern:**

Garhwa lies partially under the rain shadow area and often haunted by drought. Although yearly average rainfall is sufficient for agriculture work but unequal distribution of seasonal rain affects the main crops badly. During summer season water level of the district goes down and large number of villages have to face scarcity of water. Due to drought section of agricultural labour migrates every year to nearby district of other state for employment and livelihood. Recently due to development work of the Govt. and minor & major irrigational work, agricultural work has developed to a large extent. Rice is the main staple food of the district and it is chiefly grown. Maize and wheat are other notable crops. Sugarcane, Oilseeds, Pulses and vegetables are also grown in the district. Seed collection of Sal, Mahua, Semal and other forest produce like Lac, Kendu leaves, etc is a source of livelihood for many persons in the district.

**Industrialization:**

As the district is rich in minerals, so commercial exploitation of minerals are done here. The important minerals being commercially exploited are Limestone and Dolomite. Though this district is rich in minerals, it is devoid of any heavy industry . There exists only tiny and college industries based on local needs. There is no agriculture based industry in public or private sector in the district, though it is true that more than 80% of the population depend on agriculture.

Communication:-

Road communication of this district is not at par with the other districts of the state. There is no National Highways in this district. There are 210 Km. of State Highway and 96.95 Km. of district roads. Link road and corridors are altogether of 190 Km. There are two main roads in this district which are as follows:

Garhwa -- Murisemar Road: This road runs from Garhwa to Murisemar via Nagar-Untari. Its connect Garhwa and other parts of the State of Jharkhand to Mirzapur, Banaras and Allahabad in Uttar Pradesh. The length of this road from Garhwa to Murisemar is 45 Km.

Rehla – Godarmana Road: The length of this road is 57 Km. It connects Garhwa with the newly created state Chhatisgarh.

For rail communication there is a branch line from Garhwa Road to Mirzapur, which passes through the Garhwa town and Sub-divisional town Nagar-Untari. There is no landing ground for airways in the district.

## BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST IN THE TOWNS OF THE DISTRICT.

1. Gursendhu

It is a small waterfall situated on the south-west corner of village Champakali about 5 kms. From Ranka block headquarters. It is scenically situated amid forests.

2. Kanjia

The village lies about 8 kms. From Bhandaria and is noted for its catholic Ashram which was started in 1937.

3. Ketar

It is an important village on the bank of river Panda situated about 11 kms. North-west of Bhawanathpur. There is a temple of Bhagwati around which a month-long fair is held on the eve of Ramnavami.

4. Kotang

The village is situated in scenic grandeur some 16 kms. From the subdivisional headquarters at Garhwa. It contains a hillock about 1,000 ft. in height. There isw an image of a Goddess on horse-back on the hill top. People worship the image during the winter months.

5. Ranka

The village is the headquarters of the development block bearing the same name. The village is said to have derived its name from the Ranka Raj whose founder had given support to a lare number of beggars (ranki). There is still a garh (fort) of Ranka estate in dilapiddted condition.

6. Sukhadari

The village is situated on the river Kanhar about 35 Kms. South of Nagar Untari. It is noted for a beautiful waterfall. A fair is held annually on the eve of Makar Sankranti.

# District Highlights – 2001 Census

1. Garhwa ranks 13th in terms of population (10,35,464) and 8th in terms of area (4,044 sq.km.) in the state of Jharkhand.
2. In terms of population per sq.km. Garhwa is the 13th densely populated district in the state with 256 persons per sq.km as against the state's 338.
3. Garhwa ranks 13th in terms of sex-ratio (934) against the state's 941.
4. There are 48 uninhabited villages (out of 906 total villages) in the district of Garhwa.
5. Arsali (under Bhawanathpur C.D. Block) is the most populated village (10,011) and Hundraha (under Kandi C.D. Block), Chamar Bahiari (under Ramna C.D. Block) and Harnathpur (under Garhwa C.D. Block) are the least populated villages (2) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Garhwa has the highest number of villages (129) in the district and C.D. Block Kharaundhi has the lowest number of villages (20).
8. Madgari (under Bhandaria C.D. Block) has the largest area (4,213 hectare) and Naubhilma (under Kandi C.D. Block) and Nagwa (under Ranka C.D. Block) have the smallest area (7 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 91.0 percent of the villages.

## GARHWA, JHARKHAND

## FORT OF RANKA RAJ

The word 'Ranka' signifies the fact that the founder of Ranka Raj had supported a large number of beggars (Ranks). The Ranka Raj Garh which is now in dilapidated condition was built about 200 years ago by the Zamindars of Ranka Raj. The fort was the seat of administration before the abolition Zamindari Pratha.

# GARHWA DISTRICT

Table-1

This table shows rise in population of this district during 1991-2001 decade. Overall rise in population has been recorded 29.2 percent. The rural population of this district has increased by 28.3 percent whereas the urban population growth over the decade has been recorded as much as 53.6 percent. Rural urban migration is the important factor which always leads to rapid expansion of urban areas C.D. Block Dhurki has shown the highest increse in population over the decade with 37.5 percent among all the C.D. Blocks of this district followed by Majhiaon C.D. Block with 34.9 percent increase in its population. Other C.D. Blocks with higher proportion of increase in population than the district average (28.3 percent) are Kharaundhi (28.4 percent), Ramna (30.6 percent), Nagaruntari (29.3 percent), Dandai (33.4 percent), Chinia (32.3 percent), Meral (Pipra Kalan) (28.5 percent) and Ranka (29.0 percent). The C.D. Blocks with lower increase of its population than the district average are Bhawnathpur (27.3 percent), Garhwa (28.0 percent), Ranikanda (22.6 percent) and Bhandaria (19.7 percent). Newly created C.D. Block Kandi has the lowest increase in its population over the decade with 15.2 percent. 53.6 percent increase in population has been recorded in the urban population during the decade with 15.2 percent. 53.6 percent increase in population has been recorded in the urban population during the decade 1991-2001.

Table-3

Sinduria Census town has been created after 1991 Census which accounts for 5.5 percent of the total urban population. This town as been created in the administrative Jurisdiction of Bhawnathpur C.D. Block.

Table-4

The above table shows the distribution of villages by population density. Maximum number of villages in Garhwa district lie in the density range (per square kilometer) of 501 plus with 28.8 percent of the total inhabited villages and 39.4 percent of the total rural population. It is being followed by 182 inhabited villages with share of 21.2 percent of total inhabited villages and 25.7 percent of the total rural population. 113 villages lie in the density range of 201-300 accounting for 13.2 percent of the total inhabited villages and 15.2 percent of the total rural population. 138 villages lie in the density range of 101-200 which account for 16.1 percent of the total inhabited villages and 11.4 percent of the total rural population of Garhwa district. 97 villages lie in the density range of 51-100 accounting for 11.3 percent of total inhabited villages and 6.6 percent of the total rural population. 50 villages lie in density range of 21-50 accounting for 2.0 percent of the total inhabited village and 1.5 percent of total rural population. 17 villages lie in density range of 11-20 which accounts for 2.0 percent of the total inhabited villages and 0.2 percent of total rural population. Remaining 14 villages lie in the density range of 0-10 accounting for 1.6 percent of total inhabited villages and 0.04 percent of total rural population.

Table-5

This table furnishes the data of sex ratio among rural and urban areas of the state and the district. Sex ratio has been defined here as the number of females per 1000 males. The sex ratio of the state of Jharkhand in total is 941 females per 1000 males whereas it is 934 females per 1000 males in respect of Garhwa district. Sex ratio of the state is 962 in rural

areas and 870 in urban areas where as it is 937 in rural areas and 863 in urban areas in respect of Garhwa district. The sex ratio of the state and the district has increased marginally during last decade in both rural and urban areas. It has increased by 12 females in rural areas and by 8 females in respect of Garhwa district.

Table-6 & 7

It has already been mentioned above that sex ratios are 937 females per 1000 males in urban areas of the district. But in district a whole the sex ratio is 934 females per 1000 males. The sex ratio varies between 956 for Bhandaria and 916 for Kharaundi C.D. Block. The C.D. Blocks with higher sex ratio than the district sex ratio are Bhandaria (956), Ramkanda (941), Manjhiaon (939), Dandai (944), Chinia (941), Meral alias pipra Kalan (945), Garhwa (938) and Ranka (941). The C.D. Blocks with lower sex ratio than the district sex ratio are Kharaundhi (916), Kandi (936), Ramna (928), Nagaruntari (926) and Dhurki (934). The highest sex ratio (864) has been recorded in Garhwa Municipality where it is the lowest (859) in Sinduria census town in Bhawnathpur C.D. Block.

Table-8

This table shows the sex ratio of rural population by range 2001 census. This may be observed in this table that the maximum proportion of villages in Garhwa district lies in 900-949 and these villages account for 31.8 percent of the total inhabited villages. These villages account for 45.4 percent of the total rural population.

188 villages in sex ratio range of 950-999 account for 21.9 percent of the total inhabited villages. These 188 villages account for 25.5 percent of the total rural population. 146 villages (17.0 percent) lying in 1000-1999. Sex ratio range account for 10.1 percent of the rural population. 44 villages lie in the sex ratio range of 1100+ the highest one account for 5.1 percent of the total inhabited villages. These 44 villages account for 0.9 percent of the rural population. 42 villages lying in sex ratio range 800-849 account for 4.9 percent of the total inhabited villages and 2.0 percent of the rural population. 13 villages (1.5 percent) lie in sex ratio range 750-799 account for 0.4 percent of the rural population, 6 villages accounting for 0.7 percent of the total villages lie in sex ratio range of 700-749 account for 0.1 percent of the rural population. Remaining 10 villages (1.2 percent) lie in sex ratio range of less than 700 account for 0.1 percent of total rural population.

Table-9

This table shows the sex ratio in Urban areas of Garwah district. The sex ratio in urban area of this district is 863 females per 1000 males.

Among the two towns of the district. Garhwa Municipality has recorded the sex ratio of 864 females per 1000 males whereas it 859 in respect of newly created Sinduria Census town.

Table-10

This table furnishes the sex ratio of population in the age group 0-6 for C.D. Block of Garhwa district. The sex ratio in age group of 0-6 for the district is 962 females per 1000 males. Sex ratio varies from 995 in Ramkanda C.D. Block to 938 in Garhwa C.D. Block. The C.D. Blocks having higher sex ratio in 0-6 age group than district. Sex ratio (962) are. Kharaundi (986), Kandi (963), Majhiaon (976), Dhurki (985), Dandai (979), Chinia (989), and Ranka (983). The C.D. Block with lower sex rartio in 0-6 age group than the

district sex ratio (962) are. Ramna (953), Nagaruntari (959), Meral (956), Bhawnathpur (944) and Bhandaria (947). As regards the highest and the lowest sex ratio in 0-6 age group. It has been mentioned above.

Table-11
This table furnishes the information regarding the sex ratio among 0-6 age group in the rural areas of the district. The sex ratio in 0-6 age group for the rural areas of the district is 963 females per 1000 males. The C.D. Blocks having higher sex ratio than the district sex ratio in the age group 0-6 are. Kharaundi (986), Majhiaon (976), Dhurki (985), Dandai (979), Chinia (989), ranka (983) and Ramkanda (995). The C.D. Block with lower sex ratio than the district are Bhawnathpur (943), Ramna (953), Nagar untari (959), Meral alias Piprrakalan (956), Garhwa (938) and Bhandaria (947). The sex ratio of Kandi C.D. Blocks in 0-6 age group is equal to the district sex ratio (963).

**Table-12**

It is observed in the above table that the maximum number of village (179) lying in the sex ratio range 1000-1099 account for 20.9 percent of the total inhabited villages. These 179 villages account for 22.8 percent populations in 0-6 age group followed by 168 village accounting for 19.6 percent of the total inhabited villages and 11.8 percent of the total population in age group 0-6 are in the sex ratio range of 1100 and above. 114 villages lie in sex ratio range of 950-999 which account for 13.3 percent of total of total inhabited villages and 21.8 percent of the total population in age group 0-6. 143 percent of the inhabited village accounting for 123 villages lie in sex ratio range 900-949. These 123 village account for 19.5 percent of the population in age group 0-6. 88 villages in sex ration range of 850-899 account for 10.3 percent of total inhabited villages and 10.6 percent of the total population in age-group 0-6. 66 villages lying in sex-ratio range 800-849 account for 7.7 percent of total inhabited villages and 8.7 percent of population in age group 0-6. 4.4 percent of the inhabited villages lie in sex ratio range 750-799 account for 38 villages and 5020 population in the age group of 0-6. 24 villages accounting for 2.8 percent of the inhabited villages 1.2 percent of the rural population in 0-6 age group are in the sex ratio range 700-749. Remaining 58 villages in the sex ratio range of less than 700 account for 1.3 percent of the rural population in age group 0-6 and 6.8 percent of the total inhabited villages.

Table-13
This table reflects the sex ratio in population in age group 0-6 in urban areas of Garhwa district. The sex ratio in age group 0-6 in this district is 942 females per 1000 males. The highest sex ratio is recorded in Sinduria Census Town (953) and the lowest in Garhwa Municipality (941) in the age group 0-6 of the total urban population.

Table-14

The above table shows the number and proportion of scheduled castes and scheduled tribes in the Garhwa district. The proportion of scheduled castes and scheduled castes are 23.9 percent and 15.4 percent respectively. The highest proportion of scheduled caste can be observed in Kandi C.D.Block (30.3 percent) closely followed by Manjhion C.D. Block (29.6 percent). The other C.D. Blocks having higher proportion of schedule castes than the district proportion are Kharaundi (27.2 percent), Bhawnathpur (24.8 percent), Ramna C.D. Block (26.9 percent), Nagaruntari C.D. Block (25.3 percent), Dhurki (25.1 percent), Dandai (27.7 percent) and Ramkanda (29.8 percent). The C.D. Blocks with lower proportion of scheduled castes than the district average are Chinia (16.2 percent), Meral alias Piprakalan (23.2 percent), Garhwa (18.8 percent), Ranka (22.1 percent) and Bhandaria (10.3 percent). The highest proportion of scheduled castes in observed in Bhandaria C.D. Block (61.8 percent) followed by Chinia C.D. Block (49.5 percent) Other C.D. Blocks having higher proportion of scheduled tribes than the district average (15.4 percent) are Ramkanda (36.4 percent), Ranka (30.2 percent), Dandai (16.4 percent) and Dhurki (23.8 percent). The C.D. Blocks with lower proportion of scheduled tribes than the district average (15.4 percent) are Kharaundi (13.7 percent), Bhawnathpur (11.8 percent), Majhiaon (4.5 percent), Ramna (9.9 percent), Nagaruntari (10.4 percent), Meral cum Piprakalan (6.5 percent) and Garhwa (5.0 percent). The lowest proportion of scheduled tribes is observed in Kandi C. D. Block (0.2 percent).

Table-15

The above table furnished the information relating to scheduled castes and scheduled tribes population in the rural areas of Garhwa district. The proportion of scheduled castes is 24.3 percent in the rural area of the district like the total area Kandi C.D. Block has the highest proportion of scheduled caste with 30.3 percent followed by Ramkanda C.D. Block (29.8 percent). Other C.D. Block with higher proportion of scheduled castes than the district proportion in rural areas are Kharaundi (27.2 percent), Bhawnathpur (24.9 percent), Majhiaon (29.6 percent), Ramna (26.9 percent), Nagaruntari (25.3 percent), Dhurki (25.1 percent) and Dandai (27.7 percent). The C. D. Blocks having lower proportion of scheduled castes than the district average in the rural areas are Chinia (16.2 percent), Meral cum Piprakalan (23.2 percent), Garhwa (20.4 percent), Ranka (22.1 percent) and Bhandaria (10.3 percent). The proportion of scheduled tribes in rural areas of the district is 15.8 percent only. Similar to the total areas of the district. Bhandaria C.D. Block has the highest proportion of scheduled tribes (61.8 percent) followed by Chinia C.D. Block with 49.5 percent. The other C.D. Block having higher proportion of scheduled tribes in rural area than the district average are Dhurki (23.8 percent), Ranka (30.2 percent) and Ramkanda (36.4 percent) and Dandai (16.4 percent). The C.D. Block with lower proportion than the district average are Kharaundi (13.7 percent), Bhawnathpur (11.9 percent), Manjhiaon (4.5 percent), Ramna (9.9 percent), Nagaruntari (10.4 percent), Meral cum Pipra Kalan (6.5 percent) and Garhwa (5.5 percent). Kandi C.d. Block has the lowest proportion of scheduled castes with 0.2 percent only.

Table-16

This table furnishes the information relating to proportion of scheduled castes population to total scheduled castes population in the villages of Garhwa district. It is apparent from the above table that 148 villages accounting for 17.2 percent of the total inhabited villages in the district do not have any scheduled castes population. 72 villages accounting for 8.4 percent of the total inhabited villages where the population of

scheduled castes ranges less than 5 percent of the total population. These 72 villages account for 0.6 percent of the total population 80 villages lying in percentage ranges between 5 and 10 account for 9.3 percent of the total inhabited villages. These village cover 8794 population figures the highest number of villages numbering 165 lying in population percentage range between 11 and 20 account for 19.2 percent of total inhabited villages and 17.0 percent of the total rural population. 134 inhabited villages lying in the population percentage ranges between 21 and 30 account for 15.6 percent of the total inhabited village and 24.4 percent of the total rural population 95 villages lying in population percentage ranges between 31 and 40 account for 11.1 percent of the total inhabited villages and 21.0 percent of the total rural population. 71 villages accounting for 8.3 percent of the total inhabited villages lie in the population percentage range between 51-50. These 71 villages account for 17.2 percent of the rural population of the district. 64 villages lying in population percentage ranges between 51 and 75 account for 7.5 percent of the total inhabited villages and 12.5 percent of the rural population of the district. Remaining 29 villages accounting for 3.4 percent of inhabited villages lie in the population percentage ranges 76 and above. These 29 inhabited villages account for 3.5 percent of the rural population.

Table-17

This table shows the information relating to proportion of scheduled tribes population to total population in the villages in different percentage ranges of population. It is apparent from the above table the highest number of villages (369 villages) accounting for 43.0 percent of the total inhabited villages do not have scheduled tribes population followed by 101 inhabited villages in percentage population range less than 5 account for 11.8 percent of inhabited villages and 2.2 percent of the rural population. 64 village lying in population percentage range between 5 and 10 account for 7.5 percent of the inhabited villages. These 64 villages account for 5.4 percent of the rural population. 50 villages lying in population percentage ranges between 11 and 20 account for 5.8 percent of the inhabited villages and 9.4 percent of the rural population.38 villages in ranges between 21 and 30 account for 4.4 percent of the total inhabited villages and 10.8 percent of the total rural tribal population. Similarly 34 lie between 31 and 40 ranges, 28 villages between 41 and 51 ranges and 85 villages between 51 and 75 ranges account for 4.0 percent, 3.3 percent and 9.9 percent of the total inhabited villages respectively. The above mentioned villages in the ranges between 31 and 40, 41and 50 & 51 and 75 account for 9.4 percent, 8.6 percent & 30.4 percent of the total rural tribal population. Remaining 89 villages lying in the percentage range 76 and above account for 10.4 percent of the total inhabited villages and 23.8 percent of the rural tribal population.

Table-18

This table furnishes the information relating to number and percentage of scheduled castes and scheduled tribes population in the urban areas of the district. There are two town viz. Garhwa Municipality and newly created Sinduria census town. The proportion of scheduled castes and scheduled tribes is 14.7 percent and d4.0 percent respectively in urban areas of Garhwa district. The highest percentage (24.0 percent) of scheduled caste population has been recorded in Sinduria census town while the lowest proportion can be observed in Garhwa Municipality (13.2 percent). Similarly the highest proportion of scheduled tribes population is observed in Sinduria census town (8.8

percent) and the lowest proportion exists in Garhwa Municipality (3.2 percent). There is no urban Agglomeration in Garhwa district.

Table – 19

This table shows the sex ratio among scheduled castes and schedule tribes in the rural areas of the district. The sex ratio of scheduled castes is 939 females per 1000 males in the rural areas of the district. The C.D. Blocks having higher sex ratio than the district ratio among scheduled castes are Bhawnathpur (942), Dandai (965), Chinia (949), Meral urf Piprakalan (942 and Ranka (952). The highest sex ratio among scheduled castes is observed in Bhandaria (92). The C.D. Blocks with lower sex ratio than the district sex ratio are Kharaundi (931), Kandi (925), Manjhiaon Ramna (933), Nagar untari ((33), Dhurki (924), Garhwa (938) and Ramkanda (934). The sex ratio among scheduled tribes in the district is higher than that of scheduled castes population. It is 939 females per 1000 males in respect of scheduled castes whereas it is 949 in respect of scheduled tribes population. The highest sex ratio among scheduled tribes has been recorded in Kandi C.D. Block (971) followed by Nagar untari and Manjhiaon C.D. Blocks with 961 each. Other C.D. Blocks having higher sex ratio than the district average (949) are Kharaundi (957), Dhurki ((53), Dandai (951), Chinia (955), Ramkanda (957) and Bhandaria (958). The C.D. Blocks with lower sex ratio than the district average among scheduled tribes population are Bhawnathpur (941), Meral urf Pipra kalan (946), Garhwa (932) and Ranka (940). The lowest sex ratio has been recorded in Ranka C.D. Block where there are 917 females only for 1000 males.

Table – 20

The table shows the sex ratio among scheduled castes and scheduled tribes in Urban Agglomerations/Towns in the district. There is no urban Agglomeration in Garhwa district. The sex ratio in urban areas of the district is 836 females per 1000 males among scheduled castes and 834 females per 1000 males among scheduled tribes. Among scheduled caste population the highest sex ratio is observed in Sinduria Census Town (849) while the lowest has been recorded in Garhwa Municipality with 832 females per 1000 males. Sex ratio of Sinduria Census Town has recorded 944 female per 1000 males among scheduled tribes population were are it is comparatively very low (788 females per 1000 males) in Garhwa Municipality.

Table – 21 & 22

Table 21 shows the literacy among total areas of Garhwa district as well as separately for urban and rural areas also. Literacy rate among total areas of the district is 39.2 percent of the total population. The highest proportion of literates is observed in Garhwa C.D. Block (50.8 percent) followed by Kandi C.D. Block (48.9 percent) in the total areas. Other C.D. Blocks with higher proportion than the district average (39.2 percent) are Bhawnathpur (41.0 percent), Manjhiaon (39.8 percent) and Nagaruntari (45.5 percent). The C.D. Blocks with lower proportion literate than the district proportion are Kharaundi (34.3 percent), Ramna (35.6 percent), Dhurki (29.8 percent), Dandai (28.4 percent), Chinia (24.8 percent), Meral urf Pipra Kalan (37.3 percent), Ranka (33.7 percent), Ramkanda (26.4 percent) and Bhandaria (34.0 percent). There are only two

C.D. Blocks viz., Bhawnathpur and Garhwa where urban areas exist and due to that some differences in the literacy rate can be observed in the rural areas and total areas. In Bhawnathpur C.D. Block which consists newly created Sinduria Census Town the literacy rate has been recorded as 41.0 percent in total areas and 39.1 percent in rural areas. Similarly fact may also be observed in Garhwa C.D. Block where in total areas literacy rate is 50.8 percent and 44.5 percent literacy rate has been recorded in rural area of the C.D. Block. The literacy rates in remaining 12 C.D. Blocks in total and rural areas are same. The urban literacy r ate in urban areas of the district is 80.8 percent. The highest proportion of literacy in the urban area of Garhwa (72.2 percent) whereas the lowest one is recorded in urban areas of Bhawnathpur C.D. Block (70.9 percent). Table 22 furnishes the information relating to the number and proportion of literates in rural area only. Among males 53.1 percent literates may be observed in the rural area of Garhwa district. The highest proportion of literates is observed in the Kandi C.D. Block (66.1 percent) followed by Garhwa C.D. Block (61.8 percent). Other C.D. Blocks with higher proportion of literates among males are Bhawnathpur (55.5 percent), Manjhiaon (55.0 percent), Nagaruntari (60.4 percent) and Meral urf Pipra Kalan (53.6 percent). The C.D. Blocks having lower proportion of literates than the district average in rural areas in respect of males are Kharaundi (50.0 percent), Ramna (51.5 percent), Dhurki (43.9 percent), Dandai (43.2 percent), Chinia (37.9 percent), Ranka (47.8 percent), Ramkanda (37.7 percent) and Bhandaria (46.6 percent). Among the females 21.2 percent of literates have been recorded in the rural area of the district. The highest proportion of female literates is observed in Kandi C.D. Block (30.4 percent) closely followed by Nagar Untari C.D. Block (29.3 percent). Other C.D. Blocks having higher literacy proportion than the district average are Bhawnathpur (21.6 percent), Manjhiaon (23.4 percent) and Garhwa (26.1 percent). The C.D. Block with lower literacy rate than the district literacy rates is Kharaundi (16.9 percent), Ramna (18.4 percent), Dhurki (14.5 percent), Dandai (12.5 percent), Meral urf Pipra Kalan (19.9 percent), Ranka (18.5 percent), Ramkanda (14.1 percent) and Bhandaria (20.8 percent). The lowest proportion of the district is observed in Chinia C.D. Block (10.6 percent).

Table - 23

This table shows the distribution of villages by literacy range with proportion of population in respective ranges. 7 villages with nil literacy account for 0.8 percent of the inhabited village and 149 population. 25 villages lie in the literacy rate ranges between 1 and 10 which account for 2.9 percent of total inhabited villages 0.6 percent of the total rural population. 98 villages lying in literacy rate ranges between 11 and 20 account for 11.4 percent of the total inhabited villages and 8.8 percent of the total rural population. 178 inhabited villages are in the literacy rate range between 21 and 30. These 178 villages account for 20.7 percent of the total inhabited villages and 23.0 percent of the total rural population. Maximum number of villages numbering 209 which account for 24.4 percent of total inhabited villages and 29.5 percent of total population are in the literacy rate range between 31 and 40. 19.0 percent inhabited villages accounting for 163 villages and 21.5 percent of the rural population are in the literacy rate range between 41 and 50. 101 village accounting for 11.8 percent of total inhabited villages and 105 percent of the rural population lie in the literacy rate range between 51 and 60. In literacy r ate range 71-80, 24 villages lie. These 24 villages accounting for 1.3 percent of rural population and 2.8 percent of the total inhabited villages. Remaining 9 villages lying in

literacy rate range 81-90 account for 1.0 percent of the inhabited villages and 0.3 percent of rural population. There is no any village in the literacy rate range 91-99 and 100.

Table – 24

The above table furnished the information relating to number and percentage of literates and illiterates by sex in urban Agglomerations/Town. There are only two towns in Garhwa district viz., Sinduria Census Towns and Garhwa Municipality. There is no urban Agglomeration in this district. The literacy rate in the urban areas of this district is 80.8 in respect males and 61.6 in respect to females. Maximum proportion of male literates is observed in Garhwa Municipality followed Sinduria Census Town (78.3 percent). But female literacy rate is higher in Sinduria Census Town (62.2 percent) than Garhwa Municipality (61.5 percent)

Table – 31

This table furnished the information relating to number and percentage of Main workers, Marginal workers and Non-workers by sex in total area of C.d. Block (Including Rural + Urban – 2001 census). The work participation for total workers is defined as the percentage of total workers to total population. In the same fashion it is defined for Main and Marginal workers also. The work participation rate (WPR) is Garhwa district is 22.3 percent as Main workers and 16.6 as Marginal workers. Proportion non-workers in the district is 61.1 percent.

Among the Main workers male work participation rate (WPR) in the district is 35.3 percent while that of females is only 8.5 percent. Tkhe highest proportion of main workers is observed in Dandai C.D. Block (27.1 percent) followed by Dhurki C.D. Block (26.5). Other C.D. Blocks with higher proportion of main worker than the district average (22.3 percent) are Kharaundi (25.3 percent), Bhawnathpur (23.6 percent), Meral urf Piprakalan (24.4 percent), Ramkanda (22.6 percent) and Bhandaria (23.5 percent). The C.D. Blocks with lower proportion of main workers than the district average are Kandi (15.8 percent), Manjhiaon (18.7 percent), Chinia (21.1 percent), Garhwa (21.5 percent) and Ranka (20.4 percent). The proportion of main workers in Nagar Untari and Ramna C.D. Blocks is a par with district proportion (22.3 percent).

Proportion of Marginal workers is 16.6 percent in the district of Garhwa. Among male marginal workers work participation rate is 12.0 percent where as that of females is 21.5 percent. The highest proportion of marginal workers can be seen in Bhandaria C.D. Block (23.5 percent) closely followed by Ramkanda C.d. Block (22.4 percent). The C.D. Blocks with higher proportion of marginal workers than the district proportion (16.6 percent) are Kharaundi (20.6 percent), Bhawnathpur (17.3 percent), Kandi (20.0 percent), Manjhiaon (21.1 percent), Dandai (17.9 percent), Chinia (20.4 percent) and Ranka (17.6 percent).

Proportion of non-workers in the total areas of this district is 61.1 percent. The highest proportion of non-worker is observed in C.d. Block Garhwa (67.3 percent) followed by C.D. Block Nagaruntari (65.3 percent). Other C.D. Blocks having higher proportion of Non-workers than the district average are Ranka (62.6 percent) and Kandi (64.2 percent). The C.D. Block having lower proportion of Non workers are Kharaundhi

(54.1 percent), Bhawnathpur (59.1 percent), Majhiaon (60.3 percent), Dhurki (58.4 percent), Dandai (55.0 percent), Chinia (58.5 percent), Meral urf Pipra Kalan (60.9 percent), Ramkanda (55.0 percent) and Bhandaria (53.0 percent).

Table - 32

Main worker is observed in Dhurki C.D. Block (40.0 Percent) followed by Kharaundhi C.D. Block (38.8 percent). Other C.D. Blocks with higher proportion of male main workers than the district proportion are Bhawnathpur (36.5 percent), Ramna (35.5 percent), Nagaruntari (35.9 percent), Dandai (38.5 percent), Meral of Pipra Kalan (37.6 percent) and Bhandaria (38.6 percent). The C.D. Blocks with lower proportion of male main worker than the district average (35.1 percent) are Kandi (26.9 percent), Majhaon (31.3 percent), Chinia (32.2 percent), Garhwa (33.7 percent), Ranka (33.2 percent) and Ramkanda (33.7 percent).

Proportion female main worker in rural areas of the district is only 8.6 percent. The highest proportion of female main workers is observed in Dandai C.D. Block (14.9 percent) followed by Dhurki C.D. Blocks (11.9 percent). Other C.D. Blocks with higher proportion of female main workers than the district average (8.6 percent) are Kharaundhi (10.6 percent), Bhawnathpur (10.0 percent), Chinia (9.4 percent), Meral of Pipra kalan (10.5 percent) and Ramkanda (10.8 percent). The C.D. Blocks with lower proportion of female male workers than the district average are Kandi (3.9 percent), Majhiaon (5.2 percent), Ramna (8.0 percent), Nagaruntari (7.6 percent), Garhwa (7.5 percent), Ranka (6.9 percent) and Bhandaria (7.7 percent).

Proportion of marginal workers among males is 12.3 percent in the district. The highest proportion of male marginal workers is observed in Kandi C.D. Block (18.0 percent) followed by Majhion C.D. Block (15.5 percent). Other C.D. Blocks with higher proportion of male marginal workers than the district proportions (12.3 percent) are Kharaundhi (12.8 percent), Bhawnathpur (12.6 percent), Chinia (15.4 percent), Ranka (13.6 percent) and Ramkanda (15.1 percent). The C.D. Blocks having lower proportion of male marginal workers than the district average are Bhandaria (12.0 percent), Garhwa (11.6 percent), Ramna (11.6 percent), Nagaruntari (11.0 percent), Dhurki (7.9 percent), Dandai (9.9 percent) and Meral of PipraKalan (9.8 percent). 52.6 percent non workers may be observed in the rural areas of the district in respect of males. The highest proportion of non workers can be observed in Kandi C.D. Block (55.1 percent) followed by Garhwa C.D. Block (54.7 percent) where as the lowest proportion of non workers are seen Kharaundi C.D. Block (48.4 percent). 69.1 percent female non workers are in rural areas of Garhwa district. Proportion of female non workers varies between 77.0 percent in Garhwa C.D. Block and 58.7 percent in Dandai C.D. Block.

Table-33

The above table shows the number and percentage of Main workers, Marginal worker and non workers by sex in urban Agglomeration/Town. There is no urban Agglomeration in this district. Two urban units are in the district. The work participation rate in the urban areas of this district is 22.9 percent of the total population of towns as main workers and 3.3 percent as marginal workers. The work participation rate of main workers in respect males is 38.5 percent of the total male population. Garhwa Municipality leads with 38.6 percent work participation as main workers followed by Sinduria Census towns with 38.4 percent. Proportion female main worker in Sinduria Census town is 5.0 percent and in Garhwa Municipality it is 4.8 percent. It is worth to

mention here that proportion of female main workers is 4.8 percent for the urban areas of the district. Proportion of marginal workers in the urban area of the district is 3.3 percent. Proportion of male marginal worker and female marginal worker is 4.1 percent and 2.4 percent respectively. Garhwa Municipality has recorded 4.2 percent male marginal workers whereas it is 3.7 percent in respect of newly created Sinduria Census town. As regard the female marginal worker. Sinduria Census town has recorded 2.6 percent followed by Garhwa municipality with 2.3 percent. The proportion of non workers in urban areas of the district is 73.8 percent. Female proportion is 92.8 percent as non worker and 52.3 percent as male non worker. Maximum proportion from work in respect of male is observed in Sinduria Census town (57.9 percent) closely followed by Garhwa Municipality is 92.9 percent while it is 92.4 percent in Sinduria Census town.

Table-34

It is evident from the table that the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to broad four fold classification namely cultivators, agricultural laborers, household industry workers and other workers. The economic activity in rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (25.6 percent) and agricultural laborers (48.0 percent)together constitute 83.9 percent of the total workers in the district. The agricultural sector have absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 49.7 percent in Bhandaria C.D. Block to 27.1 percent in Garhwa C.D. Block, Proportion of agricultural laborers varies between 61.4 percent in Ramkanda C.D. Block to 39.7 percent in Garhwa C.D. Block. The proportion of household industry workers is only 2.6 percent of the total workers in the district. Proportion of household industry workers varies between 3.9 percent in Ramna C.D. Block to 1.2 percent in Ramkanda C.D. Block. The Proportion of other workers is 13.5 percent of the total workers in the district. Proportion of other workers varies between 29.8 percent in Garhwa C.D. Block to 5.5 percent in Ramkanda C.D. Block

Table-35

The above table furnishes the figures relating to distribution of workers by sex in four categories of economic activity in the C.D. Blocks. It is evident from the above table that the economic activity in rural areas of this district is primarily dependent on agriculture, which is supported by the fact that the cultivators (36.7 percent) and agricultural laborers (49.1 percent) together constitute 85.8 percent of the total workers in the district. The agriculture sector has absorbed more than three fourth of the total main workers. Proportion of cultivator among males for the district is 40.8 percent. The C.D. Blocks having higher male cultivators than the district average are Kharaundhi (40.9 percent), Bhawnathpur (41.9 percent), Ramna (45.0 percent), Dandai (46.1 percent), Meral of Piprakalan (43.4 percent), Ranka (42.8 percent) and Bhandaria (54.3 percent). The C.D. Blocks with lower proportion of male cultivators as main workers than the district proportion are Dhurki (39.8 percent), Chinia (40.0 percent), Garhwa (34.0 percent), Kandi (34.6 percent), Majhiaon (40.5 percent), Nagaruntari (35.6 percent) and Ramkanda (38.2 percent). Proportion of female cultivators in the rural areas of the district is 30.0 percent. The C.D. Block with higher proportion of female cultivators are Kharaundhi (32.3 percent), Ramna (32.4 percent), Nagaruntari (6.9 percent), Chinia (5.9

percent), Garhwa (5.6 percent) and ranka (4.0 percent). The C.D. Block with lower proportion than the district average are Bhandaria (3.0 percent), Meral of Piprakalan (3.6 percent), Dandai (2.9 percent), Dhurki (1.9 percent), Ramna (2.1 percent) and Kandi (1.9 percent). Proportion of female other workers in respect of Kharaundhi and Ramkanda C.D. Blocks is the same as the district proportion.

Table-36

This table furnishes the information of workers by sex in four categories of economic activities of urban Agglomerations / Towns of Garhwa district. There is no urban Agglomeration is the district. The proportion of four categories of workers viz. Cultivator, Agricultural laborers, Household industry worker and other worker is 6.4 percent, 10.0 percent, 4.7 percent and 78.9 percent respectively. Proportion of male cultivator in urban areas of the district is 6.4 percent. While comparing the proportion of cultivators among two towns viz. Garhwa Municipality and Sinduria Census town, it has been found Sinduria Census town leads with 8.0 percent followed by Garhwa Municipality (6.5 percent). 9.3 percent female cultivators have recorded in the urban areas of Garhwa district. Garhwa Municipality has higher percentage of female cultivators (10.3 percent) than Sinduria census town (3.8 percent).

Proportion of male agricultural laborers is 8.1 percent in urban areas of Garhwa district. The highest proportion of agricultural laborers can be seen in Sinduria census town (9.6 percent) while it is 7.8 percent in Garhwa Municipality. Among female agricultural laborers 35.1 percent has been recorded in Sinduria census town and 20.8 percent can be observed in Garhwa Municipality as against the district average of 22.9 percent.

Proportion of household industry worker is 3.2 percent in the urban areas of the district Garhwa Municipality has recorded 3.3percent of male household industry worker followed by Sinduria Census town with 2.4 percent participation. 15.2 percent household industry worker is observed in the urban areas of Garhwa district. The highest proportion of female household industry workers is 17.4 percent in Garhwa Municipality and the lowest in Sinduria census town (2.4 percent),.

The proportion of male other workers is 82.8 percent in the urban areas of Garhwa district. The highest proportion of male other workers is observed in Sinduria census town (85.4 percent) where as Garhwa Municipality has recorded 82.3 percent. 52.6 percent female other workers have be recorded in the urban areas of garhwa district. The highest proportion of female other workers has been recorded in Sinduria census town while it is 51.5 percent in Garhwa Municipality.

Table-37

This table shows the distribution of villages according to availability of different amenities in the district.

Educational facility:- 587 villages out of 858 villages accounting for 68.4 percent in the district have educational facilities. The highest proportion of village with educational facility is in Ramkanda C.D. Block (90.6percent) closely followed by Kharaundhi C.D. Block. The lowest proportion of villages with the amenity is observed in Kandi C.D. Block with 57.0 percent only.

Medical Amenity:- The availability of medical amenity is very low in the villages of this district and only 13.5 percent of villages have got it. Among the C.D. Blocks Ramna has

the highest proportion of villages with medical facility, percentage being 28.8 percent only. This is followed by Chinia C.D. Block with 23.3 percent of it villages have got it. This is again followed by Dhurki C.D. Block with 20.5 percent of it's villages have got it . On the Other hand Ramkanda C.D. Block has the minimum proportion of villages (3.1 percent) where medical facility is available.

Improved drinking water:- 91.0 percent of the villages of this district have got improved drinking water facility which accounts for 781 villages out of858 inhabited villages. The highest proportion of villages having improved drinking water facility is observed in Ramna C.D. Block (98.5 percent) followed by Nagaruntari C.d. Block with 97.2 percent of village with this facility. The lowest proportion of villages with improved drinking water facility has been recorded in Chinia C.D. Block (76.7 percent).

Post Office:- Post office is available in only 98 village out of 858 inhabited villages in the district which account for 11.4 percent of its inhabited villages. Kharaundhi C.D. Block having 35.0 percent of its inhabited villages with Post offices is heading the list followed by Dandai C.D. Block (25.0 percent). The lowest proportion of villages with Post office facility is observed in Ranka C.D. Block (5.2 percent) where four villages out of 77 inhabited villages have Post offices.

Telephone:- Telephone facility is quite low in the inhabited villages of this district. Only 45 villages out of 858 inhabited villages which account for 5.2 percent of the total inhabited villages. The highest proportion of villages having telephone facility is observed in Nagaruntari C.D. Block (26.8 percent) followed by Dandai C.D. Block with 21.4 percent villages. The lowest proportion of villages with facility can be seen in Ranka C.D. Block (1.3 percent). The C.D. Blocks having no facility of telephone are Kharaundhi, Kandi, Dhurki, Chinia, Ramkanda and Bhandaria.

Transport Communication:- Transport communication facility is available to only 105 villages out of 858 villages in the district which account for 12.2 percent. The highest proportion of villages is observed in Nagaruntari C.D. Block (25.4 percent) followed by Kandi C.D. Block (24.1 percent). The lowest proportion of villages with transport communication facility is seen in Dandai C.D. Block (3.6 percent). Dhurki is the only C.D. Block where non of the inhabited villages have the facility.

Bank:- Bank facility is available in 29 villages out of 858 villages in this district which account for 3.4 percent only. The highest proportion of villages having this facility is in Meral of PipraKalan C.d. Block (6.8 percent) followed by Bhawnathpur with 5.2 percent and Kharaundi (5.0 percent) of their inhabited villages. The lowest proportion is observed in Majhiaon C.D. Block (1.2 percent). The only C.D. Block having no bank in the villages is Kandi.

Agricultural Credit Societies:- Agricultural Credit Society is available in 43 villages out of 858 villages in the district which account for 5.0 percent only. The highest proportion of villages having this facility is observed in Chinia C.D. Block (26.7 percent) followed by Dandai C.D. Block (10.7 percent). The lowest proportion of villages having this facility can be seen in Majhiaon (1.2 percent). Kharaundhi C.d. Block has no any facility of Agricultural Credit Society.

Approach by Pucca road:- This facility is available to only 180 villages out of 858 villages in this district which account for 21.0 percent. The maximum proportion of villages having this facility is available in Bhandaria C.D. Block (38.4 percent) followed by Ramna C.D. Block (30.3 percent) and Kharaundhi C.D. Block (30.0 percent). The lowest proportion of villages having this facility can be seen in Kandi C.D. Block (6.3 percent).

Power Supply:- Only 190 villages out of 858 inhabited villages accounting for 21.1 percent of the total villages in this district are electrified. Among the C.D. Blocks Nagaruntari has the highest proportion of villages with this facility (54.9 percent) followed by Ramna C.D. Block (42.4 percent). The lowest number of villages having this facility is observed in Bhandaria (2.7 percent). There is no electrified village in Kharaundi C.D. Block, Chinia C.D. Block and Ramkanda C.D. Block.

Table-38

The above table shows the number and percent of rural population served by different amenities.

Educational facility:- This facility is available to 87.7 percent population in rural areas of this district. The highest proportion of rural population having this facility is observed in Kharaundhi C.D. Block (97.3 percent) closely followed by Ramkanda C.D. Block with 97.2 percent population. The lowest proportion of population having this facility is observed in Meral of Piprakalan C.D. Block (78.1 percent).

Medical facility: Medical facility is available to 26.2 percent population of population in rural areas of this district. The maximum proportion of population having this facility is available in Meral of Piprakalan C.D. Block (38.8 percent) followed by Bhawnathpur C.D. Block (36.3 percent). The lowest proportion of population availing this facility can be seen in Dandai C.D. Block (4.2 percent).

Improved drinking water:- This facility is available to 95.8 percent population in the rural areas of this district. The maximum proportion of population availing this facility is observed in Ramkanda C.D. Block with 99.8 percent each. The lowest proportion of population having this facility can be seen in Majhiaon C.D. Block where only 88.2 percent of its population avail this facility.

Post Office:- This facility is available to 26.8 percent population in rural areas of this district. The highest proportion of population served by this facility is observed in Kharaundhi C.D. Block (46.2 percent) followed by Bhawnathpur C.D. Block (45.1 percent). The lowest proportion of population with this facility can be observed in Bhandaria C.D. Block (12.1 percent).

Telephone:- Telephone facility is available to only 11.2 percent of the total rural population in this district. The highest proportion of population availing this facility is observed in Dandai C.D. Block (43.1 percent) followed by Nagaruntari C.D. Block (42.1 percent). The lowest proportion of population having this facility can be observed in

Garhwa C.D. Block (4.6 percent). The C.D. Blocks having no facility of telephone are Kharaundhi, Kandi, Dhurki, Chinia, Ramkanda and Bhandaria.

Transport Communication:- This facility is available to 20.4 percent rural population of the district. The highest proportion of rural population availing this facility is observed in Bhandaria C.D. Block (29.4 percent) followed by Bhawnathpur C.D. Block (27.3 percent). The lowest proportion of population served by this facility can be observed in Ramna C.D. Block (9.2 percent). Transport communication is not available in Dhurki C.D. Block.

Bank:- Banking facility is available to only 9.2 percent rural population in this district. The highest proportion of rural population availing Bank facility is observed in Ramkanda (15.9 percent) followed by Meral of Pipra Kalan (15.7 percent). The lowest proportion of population having this facility can be observed in Dhurki C.D. Block (3.8 percent). There is no bank facility in Kandi C.D. Block.

Agricultural Credit Societies:- Agricultural Credit Society is available to 11.0 percent population in the rural areas of this district. Dandai C.D. Block has the highest proportion of rural population (27.7 percent) having this facility followed by Chinia C.D. Block (27.1 percent). The lowest proportion of population availing this facility can be seen in Dhurki C.D. Block (3.8 percent). This facility is not available in Kharaundhi C.D. Block.

Approach by Pucca Road:- This facility is available to 29.5 percent rural population of this district. The highest proportion of rural population availing this facility is observed in Bhandaria C.D. Block (52.4 percent) followed by Kharaundhi C.D. Block (39.7 percent). The lowest proportion of rural population availing this facility is found in Kandi C.D. Block. This facility is not available to the dwellers of Chinia C.D. Block.

Pucca Supply:- 30.9 percent rural population avail this facility in the rural areas of this district. Maximum proportion of population availing this facility can be observed in Nagaruntari C.D. Block (58.2 percent) followed by Ramna C.D. Block (53.8 percent). The lowest proportion of rural population having this facility is found in Dhurki C.D. Block (6.5 percent). There is no power supply in the rural areas of Ramna, Ramkanda and Kharaundhi C.D. Blocks.

Table-39

This table furnishes the information relating to distribution of villages not having certain amenities, arranged by distances from the places where these are available there are as many as 292 villages in the district which do not have primary school but this facility is available to 224 villages at places situated within 5 KM to 66 villages within the distance range of 5 – 10 KM and to remaining 2 villages within the range of 10 + Km. 703 villages of the districts do not have any middle school . However 461 villages avail this facility within the distance range of less than 5 KM.,193 villages avail this at the distance range of 5 to 10 KM. And remaining 49 villages avail this facility at he distance range of 10+ KM.856 inhabited villages do not have the facility of degree colleges . However 64 villages avail the facility with the distance range of 5 KM. 117 villages avail this at the distance range between 5 to 10 KM and remaining 675 villages avail this facility at the distance range 10+ Km.

There are 848 inhabited villages which do not have hospital facility in the district. 134 villages avail this within the distance range 5 KM. 238 villages avail the hospital facility at the distance range between 5 to 10 Km. And remaining 476 villages avail it at the distance range of 10+ Km. Primary health center (PHC) is not available in 840 inhabited villages of this district. 151 villages avail this with in the distance range 5 KM. 231 villages avail this facility at the distance range between 5 to 10 kms and remaining 458 inhabited villages avail this at the distance range 10+ kms.

760 inhabited villages do not have post office facility in it. However, 473 inhabited villages avail this facility with the distance range of 5 kms. 236 villages avail this at the distance range between 5 and 10 kms. Remaining 458 village have this facility at the distance range 10+ kms.

Telephone facility is not available in 813 inhabited villages in the district. However this facility is availed by 127 villages within the distance range of 5 kms. 186 villages avail this facility at the distance range between 5-10 kms. Remaining 500 villages avail this facility at the distance range of 10+ kms.

Bus service is not available to 759 inhabited villages of this district, 250 villages avail this facility within the distance range of 5 kms. 275 villages avail this at the distance range between 5 and 10 kms. Remaining 234 villages avail this at the distance range of 10+ kms.

836 villages are deprived of Commercial Bank facility. 212 villages avail this facility with the distance range 75 kms. 235 villages avail this at the distance range between 5-10 kms. Remaining 299 village avail this facility at the distance range of 10 kms and above.

Co-operative Bank facility is not available to 846 inhabited villages of this district. However, this facility is availed by 120 villages within the distance range of 5 kms, 233 villages at the distance range between 5-10 kms and remaining 493 villages avail this at the distance range of 10 kms and above.

815 villages are deprived of Agricultural Credit societies. 236 villages avail the facility within the distances range of 5 kms., 294 villages avail this at the distance ranges between 5-10 kms and remaining 285 village avail this facility at the distance range of 10 kms and above.

Table-40

This table shows the distribution of villages according to distance from Statutory town and availability of different amenities. 587 villages accounting for 68.4 percent of the total inhabited villages are availing the educational facility in the nearest statutory town in different distance ranges. Out of 587 villages 6 villages avail this facility within the distance range 5 kms, 86 inhabited villages out of 128 villages in the distance range between 5 and 15 kms avail the educational facility in the nearest statutory town. 370 inhabited villages accounting for 67.6 percent of the total village in the distance ranges between 16 and 50 kms avail educational facility in the nearest statutory town. Remaining 125 inhabited villages avail this facility in distance range of 51+ kms from the nearest statutory town.

116 villages accounting for 13.5 percent of the total inhabited villages avail the medical facility in different distance ranges from the nearest statutory town. Out of these 116 inhabited villages 3 villages avail this facility within the distance range 5 Kms only. 23 villages avail this facility at the distance ranges between 5 and 15. Maximum number of villages (66) accounting for 12.1 percent of the village in the ranges between 16 and

50 kms from the nearest statutory towns avail this facility. Remaining 24 villages avail medical facility at the distance range 51+ kms.

98 inhabited villages avail the post office facility in different distance distance ranges of the nearest statutory town. One village avails this facility within the distance range of 5 kms. 16 villages avail this facility at the distance ranges between 5 and 15 kms 57 villages avail the facility at the distance ranges between 16 and 50 kms. Remaining 24 villages avail this at the distance range of 51+ kms. from the nearest statutory town.

As regards the telephone facility to be availed in the nearest statutory town 2 villages avail this facility within the distance range of 5 kms from the nearest statutory town. 3 villages avail this at the distance ranges between 5-15 kms from the statutory town. 37 inhabited villages avail this facility at the distance ranges between 16 and 50 kms from the statutory town. Remaining 3 village avail this facility at the distance range 51+ km from the statutory town.

105 inhabited villages avail the transport communication facility at the different ranges of distance from the statutory town. 4 villages avail this facility within the distance range of 5 kms from the nearest statutory town, 15 villages avail at the distance ranges between 5-15 kms, 67 village avail this facility at the distance ranges between 16-50 km and remaining 19 villages avail at the distance range of 51+ villages avail at the distance range of 51+ km from the nearest statutory town.

Bank facility is availed by 29 inhabited villages in the nearest statutory town at the different distance ranges from the nearest statutory town. 31 villages avail this at the distance ranges between 16 and 50 kms, 7 villages between 5 and 15 km and remaining 5 villages avail this facility at the distance range of 51+ km from the nearest statutory town.

8 villages avail the approach by pucca road facility within the distance range of 5 kms from the nearest statutory town. 33 villages avail the facility at the distance ranges between 5 and 15 kms. 91 villages avail this facility at the distance ranges between 16 and 50 kms. Remaining 48 inhabited villages avail this facility at the distance ranges 51+ km from the nearest statutory town.

Table-41

The above table shows the distribution of villages according to population and amenities available to these 269 villages out of 858 inhabited villages lie in the population ranges between 1 and 499. Of the 269 inhabited villages in this range 75 avail the educational facility, 8 villages avail medical facility, 219 village avail inprove drinking water facility. 5 villages avail Post office facility, 4 villages avail telephone facility, 14 villages avail transport communication facility, 3 villages each only avail Banks and Agricultural credit Societies facilities, 29 villages avail approach by pucca road facility and 32 villages have power supply facility.

228 inhabited villages lie in population range of 500-999 in this range 181 villages avail educational facility, 27 villages avail the medical facility, 218 villages avail improved drinking water facility, 13 villages avail post office and Telephone facilities 24 villages Bank facility, 10 villages Agricultural Credit Societies facility, 53 villages approach to pucca road facility and 6dl village have electric supply facility.

218 inhabited village lie in the population ranges between 1000-1999. Of these 218 villages 193 village avail educational facilities, 26 villages avail medical facility, 204 villages avail improved drinking water facility. 22 villages avail post office facility 8 villages avail telephone facility, 27 villages avail transport communication facility, 6 villages avail 8 bank facility, 8 villages avail agricultural credit societies facility, 49

villages avail approach by pucca road facility and 48 villages have electric power supply. 131 inhabited villages lie in the population ranges between 2000 and 4999. Out of these 131 villages, 128 villages villages avail educational of facility, 46 villages avail medical facility, 128 villages avail improved drinking water facility, 46 villages avail post office facility, 14 villages avail telephone facility. 32 villages avail transport communication, 11 villages avail Bank facility, 15 villages avail Agricultural Credit Societies facility, 41 villages avail approach by pucca road facility and 42 villages have electric power supply. 11 inhabited villages lie in population ranges between 5000-9999. 10 villages avail the educational facility, 9 villages avail medical facility, 11 villages avail improved drinking water facility and post office facility. 6 villages avail the telephone facility. 8 villages avail transport communication facility, 7 villages avail bank facility and agricultural credit society facility, 8 villages avail approach by pucca road facility and 6 villages avail electric power supply facility. Only one village lies in population range of 10000+ above. It possesses educational, improved drinking water facility, Post office facility and power supply facility. The proportion of villages having different amenities varies in direct relation to their population ranges Generally, the maximum percentage of villages having different amenities have the higher population ranges which further corroborates the fact that more facilities are generally available in larger villages than in smaller one.

Table-42

This table furnishes the information relating land use in the C.D. Blocks of this district. Only 38.0 percent of the total areas of the district are cultivable and of these only 29.5 percent areas are irrigated. The maximum proportion of village having cultivable land is observed in Garhwa C.D. Block (61.5 percent) followed by Manjhiaon C.D. Block (56.9 percent). Other C.D. Blocks with higher proportion of cultlivable areas than the district average are Kharaundhi (47.8 percent), Kandi (56.4 percent), Ramna (51.5 percent), Nagaruntari (48.8 percent) and Dandai (47.8 percent). The C.D. Blocks with lower proportion of cultivable land than the district average (38.0 percent) are Bhawnathpur (34.1 percent), Dhurki (28.1 percent), Chinia (25.1 percent), Ranka (28.1 percent) and Bhandaria (17.8 percent). Only 29.5 percent of the total land are irrigated in the district. The maximum portion of land with irrigation facility is observed in Kharaundhi (69.3 percent) followed by Ramna (66.1 percent). Other C.D. Blocks with more irrigation facility than the district average are Dandai (59.4 percent) and Nagaruntari (34.6 percent). The C.D. Blocks with lesser irrigation facility than the district average are Bhawnathpur (28.2 percent), Kandi (29.1 percent), Majhiaon (24.3 percent), Dhurki (11.9 percent), Meral of Pipra kalan (22.4 percent), Garhwa (27.8 percent), Ranka (18.7 percent), Ramkandi (20.2 percent), Bhandaria (10.4 percent) and Chinia (8.9 percent).

Table-43

The above table furnishes the details of finances in the only statutory town in terms of per capita receipt and expenditure. Garhwa Municipality in only one statutory town in the district. On going into the details of receipt under different heads per capita receipt through taxes is 8.4 percent and from all other sources is 50.3 percent total amounting to 58.7 percent. The per capita expenditure on general administration is 78.8 percent and on public works it is 207.9 percent. Total per capita expenditure is 286.7 percent only. Per capita expenditure on other works is 4.3 percent and public health and conveniences is

0.9 percent only. It is observed here that total per capita receipt is higher than the per capita total expenditure in this town.

Table-44

This table furnishes the details of different categories of educational institutions per ten thousand population in the town of the district. It would be seen from the above table that institution like Primary School, Junior secondary/Middle school, Secondary/Matriculation, senior secondary and college are available in this town, Primary and Junior Secondary/Middle school account for 1.4 and 2.2 institution per ten thousand population respectively, Secondary/Matriculation and senior secondary school account for 0.5 and 0.3 per ten thousand population respectively. College accounts for 0.5 per thousand population in this town.

Table-45

The above table give the details regarding availability of bed in different medical institution in Garhwa Municipality. The number of beds in medical institution in Garhwa town per ten thousand population work out to be 20. There is no medical institution in Sinduria census town. Thus the number of beds per ten thousand population in the urban areas of Garhwa district work out to be 17 beds only.

Table-46

The above table furnishes the details of slum population in Garhwa Municipality. The slum population in the urban area is 5350 only which account for 14.6 percent of the total urban population.

Table-47

This table gives the details of the most important commodity exported out and manufactured in the towns of this district In Garhwa Municipality Blanket, Icecream and bisxuit are manufactured only for their consumption. Lac, oil seed and Kendu Leaf for Biri manufacturing are exported out of this town. In Sinduria census town neither any commodity is manufactured nor exported out.

Table-48

This table furnishes the details of households by tenure status and number of rooms occupied by them in the district. There are as many as 174049 households accounting for 97.6 percent of the total households in the district dwelling in owned houses. The proportion of households dwelling in no exclusive room is 0.4 percent only. 30.4 percent of the households dwell in one room owned houses. The maximum proportion of households accounting for 36.0 percent dwell in two rooms owned houses. 14.4 percent of the households dwell in three rooms owned houses. Remaining 32672 households accounting for 18.8 percent dwell in three room houses. The median number of rooms is 2 for total households in the tenure status of owned category. 3355 households accounting for 1.9 percent of the total households dwell in rented houses. Out of these households 0.6 percent dwell in no exclusive room houses. 994 households accounting for 29.6 percent of the households dwell in single room houses. Maximum proportion of households accounting for 45.4 percent dwell in two rooms houses in the tenure status of rented. 16.4 percent households dwell in three room houses in tenure

status of rented. Remaining 116 households accounting for 8.3 percent dwell in 3+ rooms outfit. The median number of rooms is 2 in the rented tenure status. The maximum proportion of households accounting for 38.5 percent dwell in one room houses in tenure status of others followed by two rooms outfit with 32.4 percent dwelling in two rooms houses in tenure status of others. The minimum number of households accounting for 2.7 percent dwell in no exclusive room in this tenure status. The median number of rooms is 2 total households in tenure status of others.

45471 scheduled castes households accounting for 99.2 percent of the scheduled castes households dwell in tenure status of owned house. Maximum proportion of scheduled castes accounting for 38.3 percent dwell in two rooms in the tenure status of owned house followed by one room dwellers accounting for 37.9 percent. The minimum proportion of scheduled castes households dwell in no exclusive room outfit. The median number of rooms is 2 in the tenure status of owned almost the same the same trend is observed in the tenure status of rent for scheduled castes. As regards in the category of tenure status of others. 52.4 percent scheduled castes households dwell in one room outfit followed by twto rooms outfits with 29.7 percent households. Minimum proportion of scheduled castes households dwell in no exclusive roo,. The median number of room is 1 in the tenure status of others among scheduled castes households.

28374 scheduled tribes households dwell in owned houses out of these scheduled tribes households maximum proportion accounting for 37.7 percent household dwell in two rooms houses followed by one room dweller with 30.7 percent. The minimum number of households numbering 85 accounting for 0.3 percent dwell in no exclusive room in owned tenure status. The median number rooms is 2 for scheduled tribes in this tenure status. 271 scheduled tribes in this tenure status. 271 scheduled tribes households dwell in rent houses. The same trend as shown in owned tenure status is observe here also. There are as many as 156 scheduled tribes households in the tenure status 'others'. 33.3 percent scheduled tribes households dwell in single room closely followed by two rooms dwelled with 32.7 percent scheduled tribes households. The minimum proportion of scheduled tribes households (4.5 percent) is observed in no exclusive room dwellers. The median number of rooms is 2 in this tenure status for scheduled tribes.

Table-49

This table furnishes percentage distribution of households living in permanent, semi permanent and temporary houses in the district as well as in C.D. Blocks. It would be seen from the above table that of the total rural households 92.3 percent households live in Semi permanent houses followed by 7.0 percent in permanent houses and 0.7 percent in temporary houses in this district. The maximum proportion of households living permanent houses has been recorded in Garhwa C.D. Block (12.7 percent) closely followed by Nagaruntari C.D. Block (12.6 percent). Other C.D. Blocks with higher proportion of households living in permanent houses than the district average are Kandi (7.3 percent) and Bhawnathpur and Majhion with 7.4 percent households each. The lowest proportion of households living in permanent houses is observed in Chinia C.D. Block (1.3 percent). The highest proportion of households living in semi-permanent house is observed in Chinia C.D. Block (98.5 percent) closely followed by Dandai C.D. Block (97.9 percent). Other C.D. Blocks with higher proportion of households living in semi-permanent houses can be seen in Kharaundhi (97.5 percent), Dhurki (97.4 percent), Meral of Piprakalan (92.6 percent), Ranka (93.1 percent), Ramkanda (93.5 percent) and Bhandaria (95.5 percent). The lowest proportion of household living in semi-permanent

houses can be seen inGarhwa C.D. Block (86.5 percent). 0.7 percent households live in temporary houses in the rural areas of the district. The highest proportion of households living in temporary houses is observed in Ramkanda C.D. Block (3.2 percent) followed by Meral of Piprakalan C.D. Block (1.4 percent). Other C.D. Blocks having higher proportion of households living in temporary houses than the district average are Kandi and Majhion with 1.3 percent each. The proportion households living in temporary houses in Garhwa C,D. Block is a par with the district average (0.7 percent). The lowest proportion of households living in temporary houses has been recorded in Kharandhi C.D. Block (0.1 percent).

In urban areas of the district 57.7 percent households reside in permanent houses. The highest proportion of households living in permanent houses has been recorded in Bhawnathpur C.D. Block (68.8 percent) followed by Garhwa C.D. Block with 54.9 percent only. As regards the households living in semi-permanent houses it is reverse as 44.7 percent households reside in Garhwa C.D. Block followed by Bhawnathpur C.D. Block with 26.3 percent.

The highest proportion of households living in temporary houses in urban area of the district is observed in Bhawnathpur C.D. Block (4.9 percent) followed by Garhwa with 0.4 percent only being the lowest proportion. The proportion of households living in temporary houses in the urban areas of the district is 1.3 percent only.

Table-50

This table furnishes the details the households having improved drinking water source, electricity, bathroom, toilet and drainage facility in the district. 63060 rural households accounting for 36.7 percent of the total rural households have improved drinking water facility only. The highest proportion of households awaiting this facility is observed in Kandi C.D. Block (57.9 percent) followed by Nagar untari C.D. Block (47.8 percent). The lowest proportion of household having this facility can be seen in Ramkanda C.D. Block where 21.7 percent of the total rural households only avail the facility of improved drinking water.

Electricity is available to 6910 households accounting for 4.0 percent households of the total rural households in the district. The highest proportion of rural households availing this facility can be observed in Nagaruntari C.D. Block (12.3 percent) followed by Garhwa C.D.Block(8.7 percent). The lowest proportion of household availing this facility is observed in Kharaundhi and Dhurki C.D. Blocks with 0.1 percent each only availing this facility.

Bathroom facility is available 3145 rural households accounting to 1.8 percent of the total rural households. The highest proportion of households availing this facility is observed in Nagar untari C.D. Block (4.0 percent) followed by Garhwa C.D. Block (2.5 percent). The lowest proportion of households availing this facility is recorded in respect of Chinia C.D. Block (0.6).

Toilet facility is available to 3.1 percent households in the rural areas of the district. The highest proportion of households having this facility is observed in Nagar untari C.D. Block (6.3 percent) followed by Bhawnathpur C.D. Block (5.4 percent). The lowest proportion of households availing this facility can be seen in Chinia C.D. Block (0.5 percent).

26,122 households accounting for 15.2 percent of the total rural households avail the drainage facility in rural areas of this district. The highest proportion of households availing this facility is observed in Kandi C.D. Block (36.8 percent) followed by

Bhawnathpur C.D. Block (24.1 percent). The lowest proportion of rural households availing this facility can be seen in Ramkanda C.D. Block (3.3 percent) only.

There are two urban units in this district namely. Garhwa Municipality and Sinduria Census town in Bhawnathpur C.D. Block. Improved drinking water facility is available to 68.9 percent of the urban household in respect of Garhwa Municipality whereas it 67.9 percent in respect of Sinduria Census town Bhawnathpur C.D. Block.

Electricity is available to 57.4 percent households in Garhwa Municipality wher as it is available to 52.1 percent is Sinduria Census town Bhawnathpur C.D. Block.

Bathroom is available to 64.6 percent of the total urban household and 30.7 percent households in Garhwa Municipality. 50.2 percent household avail the facility of toilet in Garhwa Municipality wheras it is availed by 65.9 percent households in Sinduria Census town (Bhawnathpur C.D. Block) and 61.7 percent in Garhwa Municipality.

Table-51

This table give the details of the number and percent of households by types of fuel used for cooking 74.8 percent households use firewood for cooking in the rural areas of the district. The highest proportion of households using firewood as fuel for cooking is observed in Bhandaria C.D. Block (99.0 percent) whereas only 23.4 percent households use it in Kandi C.D. Block. 44.3 percent urban households use firewood fuel for cooking in the urban areas of this district. It is used by 45.1 percent households in Bhawnathpur urban area (Sinduria census town) and 44.1 percent household use it in Garhwa Municipality.

Crop residue is used by 4.0 percent households in rural areas and 3.4 percent households in urban areas as fuel for cooking in the district. The highest proportion of households using crop residue as fuel for cooking in rural areas is oserved in Kharaundhi C.D. Block followed by Kandi C.D. Block with 7.4 percent households. The lowest proportion is recorded in Ranka C.D. Block (0.5 percent) using this fuel. In urban areas Bhawnathpur (Sinduria Census town), 3.3 percent households use crop residue as fuel for cooking where as Garhwa Municipality has recorded 1.9 percent households using this fuel for cooking.

Cowdung cake is used by 20.1 percent households in the rural areas and 1.6 percent households in urban areas as fuel for cooking in the district. The highest proportion of households using this fuel for cooking is observed in Kandi C.D. Block followed by Meral of Piprakalan C.D. Blocks where 31.9 percent household uses this as fuel. The lowest proportion of household numbering only one uses cowdung cake as fuel for cooking. In urban areas Bhawnathpur (Sinduria Census town) has only 3 households accounting for 0.2 percent of the total households use this fuel for cooking in Garhwa Municipality.

In rural area 0.1 percent accounting for 213 households use electricity as fuel for cooking where as 5.7 percent household use this fuel for cooking in urban areas of the district. The highest proportion of households using this a fuel in rural areas can be seen in Bhawnathpur C.D. Block (0.3 percent) accounting for 45 households only where as Kandi and Bhandaria C.D. Block with 5 household each use electricity as fuel for cooking. In urban areas 275 households accounting for 28.4 percent of the households use electricity as fuel for cooking in Bhawnathpur (Sinduria Census town) whereas in Garhwa Municipality only 6 households accounting for 0.1 percent household use this as fuel for cooking.

Coal/lignite (Charcoal) is used by 0.1 percent households in rural areas and 8.3 percent households in urban areas of this district. The highest proportion of households using this as fuel in rural area can be observed in Garhwa C.D. Block (0.3 percent). This fuel is not used by even a singlel household in Dandai, Chinia and Ranka C.D. Blocks. In urban areas the highest proportion of households using this fuel for cooking is observed in Garhwa Municipality with 10.3 percent households. Bhawnathpur (Sinduria Census town) is well behind in this respect with only 3 households accounting for 0.2 percent using coal/lignite (Charcoal) as fuel for cooking.

Cooking gas (LPG) is used by 0.4 percent hoseholds in rural areas and 25.7 percent households in urban areas of the district. The highest proportion of households using Cooking gas (LPG) as fuel for cooking is observed in the rural areas of Bhawnathpur C.D. Block (0.9 percent) closely followed by Garhwa C.D. Block with 0.8 percent households. None of the rural household uses cooking gas (LPG) as fuel for coking in Dandai and Ramkanda C.D. Blocks. In urban areas the highest proportion of household using this as fuel can be observed in Garhwa Municipality (28.4 percent) followed by Bhawnathpur (Sinduria Census town) with 14.6 percent household using this.

Biogas is used by only 39 households in rural areas and 6 households in urban areas of the district. The maximum number of households using this fuel in rural area can be seen in Nagaruntari C.D. Block where 16 households use this fuel followed by Majhiaon C.D. Block with 9 households only. None of the household use bio gas as fuel for cooking is Bhawnathpur, Dhurki, Dandai, Chinia, Ranka, Ramkanda and Bhandaria C.D. Blocks. In the urban areas only three households use this and in Bhawnathpur (Sinduria Census town) only one household uses biogas as fuel for cooking.

Kerosene is used by only 0.4 percent households in rural areas and 10.3 percent households in urban areas of the district. The highest proportion of households using Kerosene as fuel for cooking in rural area can be seen in Nagaruntari C.D. Block (2.6 percent) followed by Garhwa C.D. Block (0.6 percent). 0.4 percent households each for Meral of Piprakalan C.D. Block which at par with district rural average can also be observed. Only one household uses this as fuel for cooking in Chinia C.D. Block uses this fuel for cooking in Chinia C.D. Block.

Table-52

This table furnishes the details of number of households availing banking services and availability of specified assets to the households in Garhwa district. It would be seen from the table that there are 24779 households in rural areas of the district accounting for 14.4 percent of the total rural households availing the banking facility. The highest proportion of households availing the banking services in rural areas is observed in Majhion C.D. Block (23.1 percent) followed by Bhawnathpur C.D. Block (17.7 percent) and Garhwa C.D. Block (17.9 percent). The lowest proportion of household availing this services can be seen in Dandai C.D. Block (4.14 percent). In urban areas Bhawnathpur (Sinduria Census town) has recorded 66.5 percent of its households availing the services whereas Garhwa has shown 51.1 percent households.

Radio/Transistor is available to 25.6 percent households in rural areas and 39.1 percent households in urban areas of the district. The highest proportion of households having radio/Transistor in rural area is observed in Majhion C.D. Block (33.3 percent) followed by Garhwa C.D. Block (31.4 percent). The lowest proportion of households having radios/Transistor can be seen in Ramkanda C.D. Block (17.0 percent). In urban areas Garhwa Municipality with 39.6 percent of the households having radios/transister is ahead of Bhawnathpur (Sinduria Census town-37.4 percent).

Television is available to 2.8 percent households in rural areas and 39.3 percent in urban areas of this district. The maximum proportion of households having this asset is observed in the rural areas of Nagar untari C.D. Block (6.5 percent) followed by Garhwa C.D. Block (4.0 percent). The lowest proportion of households having this asset may be seen in China C.D. Block (0.8 percent). In urban areas of the district 42.2 percent households in Bhawnathpur (Sinduria Census town) have television of its own followed by Garhwa Municipality with 38.6 percent household having this asset.

Telephone facility is available to 1013 households (0.6 percent) out of 171674 households in rural areas and 705 households (10.5 percent) in urban areas of this district. The highest proportion of households having telephone is observed in Nagaruntari C.D. Block (1.4 percent) followed by Bhawnathpur C.D. Block (0.9 percent). The lowest proportion of households with telephone can be seen in Bhandaria C.D. Block (0.2 percent). In urban areas 11.7 percent households have telephone in Garhwa Municipality whereas in urban areas of Bhawnathpur (Sinduria Census town) 5.6 percent of households have this asset.

Bicycle is available to 40.0 percent in urban areas of this district. The maximum proportion of households having this asset is observed in Garhwa C.D. Block (50.8 percent) followed by Meral of Pipra kalan C.D. Block (46.5 percent). The lowest proportion of households having this asset can be seen in Ramkanda C.D. Block (26.2 percent). In urban areas 50.5 percent households having this asset in Garhwa Municipality is ahead of bhawnathpr urban area in Sinduria Census town (39.5 percent).

Scooter/Motor cycle/ Moped is available to 1.9 percent households in rural areas and 16.7 percent households in urban areas of this district. The highest proportion of households having this asset in rural areas is observed in Bhawnathpur C.D. Block (3.2 percent) followed by Garhwa C.D. Block (2.3 percent). The lowest proportion of household having this asset can be seen ini Kharaundhi C.D. Block (0.7 percent). In urban areas Bhawnathpur (Sinduria Census town) with 24.4 percent of the households having this asset is ahead of Garhwa Municipality where only 14.8 percent households have this asset.

Car/Jeep/Van is available to 910 households (0.5 percent) in rural areas and 187 households (2.8 percent) in urban areas of this district. The maximum proportion of households in rural area having these asset can be observed in Nagaruntari C.D. Block (1.1 percent) followed by Garhwa C.D. Block (0.6 percent) only 14 households (0.3 percent) have this asset in Chinia C.D. Block. Garhwa Municipality having 3.0 percent) of its household with this asset is ahead of Bhawnathpur (Sinduria Census town) with 1.8 percent households only.

None of these above mentioned asset is available to 52.7 percent households in rural areas and 32.1 percent households in urban areas of this district.

Note : - Percentages are given in brackets.

*Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to `Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

# TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

| Village not having the amenity of | Distance range of place from the villages where the amenity is available | | | |
|---|---|---|---|---|
| | Less than 5 kilometres | 5-10 kilometres | 10+ kilometres | Total (Col. 2 - 4) |
| 1 | 2 | 3 | 4 | 5 |
| 1. Education :- | | | | |
| (a) Primary School | 224 | 66 | 2 | 292 |
| (b) Middle School | 461 | 193 | 49 | 703 |
| (c) Degree College | 64 | 117 | 675 | 856 |
| 2. Medical:- | | | | |
| (a) Hospital | 134 | 238 | 476 | 848 |
| (b) PHC | 151 | 231 | 458 | 840 |
| 3. Post Office | 473 | 236 | 51 | 760 |
| 4. Telephone | 127 | 186 | 500 | 813 |
| 5. Bus Service | 250 | 275 | 234 | 759 |
| 6. Banks | | | | |
| (a) Commercial Bank | 212 | 325 | 299 | 836 |
| (b) Cooperative Bank | 120 | 233 | 493 | 846 |
| 7. Agricultural Credit Societies | 236 | 294 | 285 | 815 |

## TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

| Distance range from the nearest statutory town ( in kilometres) | Number of inhabited villages in each range | Type of amenity available | | | | Type of amenity available | | | |

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.
Bathroom means bathroom within the house
Toilet means toilet within the house.
Drainage menas closed and open drainage.

# TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING. 2001

| Serial number | Tahsil | Total/ Rural/ Urban | Total households | Fire wood | Crop residue | Cowdung cake | Electricity | Coal / Lignite (charcoal) | Cooking gas (L.P.G.) | Bio-gas | Kerosene | Others | No cooking |
