of the Indian Administrative Service
Director of Census Operations, Jharkhand

Foreword

The District Census Handbook (DCHB) is brought out for each district since the first Census after

Independence and is one of the most widely used publications compiled and prepared by the Census Organisation on behalf of the State Governments and the Union territory Administrations. This publication provides Primary Census Abstract (PCA) data up to village level for the rural areas and provides similar details ward-wise for each city or town, and also provides the present status on availability of important civic amenities/infra-structural facilities in villages and towns of the district concerned. This publication has proved to be of immense utility, as it is considered as an essential and basic document for the purpose of delimitation of constituencies, formulation of local level and regional plan and also as an aid to district administration.

The publication of District Census Handbook(DCHB) was first introduced during the 1951 Census which contained a few important Census tables and PCA for each village and town of the district. Thereafter, at each successive Censuses, the scope and coverage of this publication was enlarged. The DCHB published at the 1961 Census provided a comprehensive descriptive account of the district, administrative statistics, Census tables and a village and town directory including PCA. The 1971 Census-DCHB series was planned in three parts. Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some States, Part-C was confined to district Census tables and in a few cases altogether given up due to delay in compilation and printing. At the 1981 Census, new features along with the restructuring of the formats of village and town directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised village and town directories, the PCA of village and town (ward-wise) including the Scheduled Castes and the Scheduled Tribes PCA up to c.d.block/town level were provided in Part-B. In restructuring the format of Village Directory, all the amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as Adult Literacy Centres, Primary Health sub-Centres and Community Health Workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Similarly information on approach to the village was also provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, another statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and the Scheduled Tribes population and another on Adult Literacy classes/centres were added in the Statements IV and V respectively.

The manner of presentation of the DCHBs of the 1991 Census was by and large the same as followed in the 1981 Census. The format of PCA was, however restructured slightly in the 1991 Census. Nine-fold industrial classification of main workers was given as against four-fold

industrial classification presented in the 1981 Census. In addition, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. Another important addition in the DCHB of the 1991 Census was the Community Development Block level presentation of village directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, as the CD block is the lowest administrative unit for developmental planning. Further, in order to facilitate the administrators, planners and researchers intending to use village directory and PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village were provided for the 1991 Census along with the corresponding codes of the 1981 Census.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the village concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users.

This publication is a collaborative task of the State Government and the Census Organisation. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the direction of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna on behalf of the State Administration. At the same time, much effort has been made to ensure comparability with the corresponding 1991 Census data and also similar information brought out by the respective State Governments in annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of

record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft District Census Handbook manuscripts received from the Census Directorates have been scrutinised in the Social

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and since these are printed in every Census because of their wide ranging utility. Census after Census muchinnovations/modifications have taken place in the District Census Handbooks in terms of coverage and contents of population data. This is the most valuable district level publication brought out by the Census Organisation on behalf of the State Government. It, inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers. It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development.

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content. The content of Village Directory has been broadened by including additional facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. For the first time in this volume information on the most important commodity manufactured in village is provided. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town. During 1981 and 1991 Censuses this information was, however, restricted to class I and class II towns only. The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census. The eight digit permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users.

The District Census Handbooks are brought out in two parts, viz. (i) part A containing the village and town directories and (ii) part B – village and townwise primary Census Abstracts pertaining to general population. It also contains the District Primary Census Abstracts for Scheduled Castes and the Scheduled Tribes Population.

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the District/Sub-divisional level Officers.

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

This publication is a joint venture of the State Government and the Census organisation.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers.

In my office S/Shri Phool Singh Joint Director, A.K. Saxena Deputy Director and K.K. Verma, Assistant Director supervised the project at different stages. In this voluminous job valuable assistance was rendered by S/Shri D.P. Choudhary, S.K. Das Sudhakar, Statistical Investigators Grade-I and Ramesh Prasad, Statistical Investigator Grade-II who were responsible for supervision from beginning to end. Shri Mauleswar Singh, Assistant Director has also been associated to monitor the scrutiny work of Village Directory and Town Directory data. Sri K.K. Verma, Assistant Director prepared the first draft under the guidance of Sri S.K. Sinha, Deputy Director. The write-ups on fertility and mortality patterns and migration based on 1991 Census data are contributed by S/Shri D.P. Choudhary, S. K. Das Sudhakar and U.C. Lal, Statistical Investigators Gr.I. S/Shri D.P. Choudhary and S.K. Das Sudhakar prepared the analytical notes on inset tables based on the data of Village Directory, Town Directory and Primary Census Abstracts under the guidance of Shri K.K. Verma, Assistant Director. District and C.D. Block Maps were prepared in Map Section under the supervision of Sri M. Guria Research officer (Map). S/Shri Asharful Hoda and Surendra Mohan Prasad Lower Division Clerks typed the manuscript and S/Shri M.C. Sharma, STA (Ptg.) and N.K. Jain, Printing Inspector of ORGI helped in getting the volume printed. I am thankful to all of them.

I am personally indebted to Sri J.K. Banthia, Registrar General and Census Commissioner, India under whose guidance it has been rare privilege to strive for results. I am equally indebted to Shri R.G. Mitra, Deputy Registrar General (C & T), Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division and Dr. R.P. Singh, Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project. I am also thankful to Sri S.L. Jain, Dy. Director and Sri R.K. Mehta, Assistant Director of Social Studies Division who scrutinized the manuscript.

CHATRA

DISTRICT CENSUS HANDBOOK PART A&B

ANALYTICAL NOTE-2001

Brief history of the district

The newly created district of Chatra is situated within lush green area with salubrious climate. It was originally notified to be constituted on 1st June, 1991 which was later on re-notified by notification dated 29the May, 1991 to be actually constituted w.e.f. 1.7.91. Thus, erstwhile Chatra sub-division of Hazaribag district attained the status of district.

Chatra district forms the western flank of North Chotanagpur division of Jharkhand state. It is bounded on the north by district of Gaya (in Bihar state), on the south by district of Ranchi (Jharkhand), on the east by district of Hazaribag (Jharkhand) and on the west by districts of Palamu(Jharkhand) and Gaya(Bihar), Chatra(M) is the headquarters of both Chatra district and Chatra sub-division.

The district lies between ..... Latitude(N) and ..... to ..... longitude(E) within northern hemisphere, with respect to area it occupies ..... Position among the 18th district of Jharkhand at the time of 2001 census takings.

The district of Chatra had once glorious distinction of being the administrative headquarters of Chotanagpur region for 53 years, i.e., from the year 1780 to 1883. Raja Ram Mohan Roy, the great social reformer and herald of modern India had worked as a Deputy Registrar from the year 1805-06 A.D. at Chatra. It became a subdivision of Hazaribag district on 1914 and got the status of an independent district on 01.07.1991. As it remained a sub-division of Hazaribag district since 1914 to 30.6.91, hence the history of Chatra district almost resembles with that of its parent district of Hazaribag.

Early History

In very early times the district was covered with inaccessible hills and forests to which many non-Aryan tribals who refused to surrender to the steadily advancing Aryans, retired at different times. The entire territory of Chotanagpur known as Jharkhand (meaning forest territory) was presumably beyond the pale of direct Hindu influence during ancient India. However, Jarasandh, the mighty emperor of Rajgrih belonging to the Mahabharat period might have exercised some kind of loose supervision over the area. Similarly, Mahapadmanand Ugrasen of Magadh who subdued the entire country up to Orissa might have gained some control over Jharkhand as well. Possibly the area was included in Magadhan empire in the reign of Ashok (273-232 B.C.). It is believed that the ancient Chatra a part of Kikat province was under the administrative jurisdiction of Magadhan empire.

There is evidence to show that this tract was in touch with many other parts of India. Parshanath, the 23rd Tirthankar of the Jains attained Nirwan (enlightenment) at the summit of the Parasnath hill probably in the 8th century B.C. now lying in the Giridih district.

From the perusal of its cultural heritage, it is evident that the Swami Shital Nath (Shitla Swami) whose period ranged from 10th to 12th century B.C. and penanced in the courtyard of Bhadrakali (Bhaduli). As legend goes Lord Budda had meditated in the dense forest of Bhaduli during 6th century B.C. At Siddha Peeth Kuleshwari (Kolhai Hill-Hunterganj), the remains of cultural heritage of the Hindu, the Bnuddhist and the Jain sects are still available. Here two foot prints are carved out on a rock which the Hindus claim as footprints of Lord Vishnu while the Jains claim to be the footprints of Parsva Nath, the 23rd Tirthankanr.

With the decline of Mauryan power king Kharavela of Kalinga led an army through Jharkhand and ransacked Rajgrih and Pataliputra. Later, Samudragupta (335-380 A.D.) must have passed through the area on his expedition to the Deccan. The Chinese traveler Itsing is believed to have journeyed through the Chotanagpur plateau on his travel to Nalanda and Bodh Gaya.

The Chotanagpur Raj is believed to have been set up in 5th century A.D. after the fall of the imperial Guptas. Phanimukut was elected the first king. It is said that just after his birth, he had been found by the side of a tank under the protection of huge 'nag' or serpent. For this reason the scions of the dynasty founded by him called themselves 'Nag Vanshi' or member of the 'Naga dynasty'.

Muslim Period

The entire Chotanagpur plateau was referred to as Jharkhand by Mohammedan historians. Throughout the Turko-Afghan period from 1206 up to 1526, the area remained virtually free from external influence. The Rohtas fortress was the farthest limit of actual penetration made by them. Dr. Kalika Rongan Qanungo opines that Shershah threatened his way to Rohtas through the jungles of Jharkhand and he attacked (second attack on Gaur or Bengal) in 1538 A.D. It was only with accession of Akbar to the throne of Delhi in 1556, the Muslim influence penetrated into Jharkhand, then known to the Mughals as Kokrah. In 1585 Akbar sent a force under the command of Shahabaz Khan to reduce the Raja of Chotanagpur to the position of a tributary. It is mentioned in the "Ain-e-Akbari" that Chotanagpur or Kokrah was included in the 'Subah of Bihar'.

This region was famous for diamond mines, as it is mentioned in the Alamgir Nama. Jahangir in his autobiography, the Tuzuk-I-Jahangiri, has referred to the Kokrah Province.

After the death of Akbar in 1605 the area presumably regained its independence. This necessitated an expedition in 1616 by Ibrahim Khan Fateh Jung, the Governor of Bihar and brother of Queen Noorjahan. Ibrahim Khan defeated and captured Durjan Sal the 46th Raja of Chotanagpur. He was imprisoned for 12 years but was later on released and reinstated to the throne after he had shown his ability in distinguishing a real diamond from a fake one. The annual tribute to be paid by him was fixed at Rs.6000. In 1632, Chotanagpur was given as 'Jagir' to the Governor of Patna for an annual payment of Rs.1,36,000. This was raised to R.s.1,61,000 in 1636 A.D. Daud Khan the Mughal Governor of Bihar during the reign of Aurangzeb occupied Kothi on 5th May, 1660 without much opposition. Ram Singh was granted "Thanedari Jagir" by Daud Khan and Mangal Khan in 1669. During the reign of Muhammad Sah (1719-1745), Sarballand Khan, the Governor of Bihar, marched against the Raja of Chotanagpur and obtained his submission. According to Shaitab Rai another expedition was led by Fakhruddoula, the Governor of Bihar in 1731 against Kunda and after crushing the zamindars of the regions, he attacked the fort of Chatra (presently Mohalla Dibha Karballa Road Chatra), in 1734. The fort was dashed to dust. He came to terms with the Raja of Ramgarh who owned allegiance to the Raja of Chotanagpur. In 1735 Alivardi Khan had some difficulty in enforcing the payment of the annual tribute of Rs.12,600 from the Raja of Ramgarh, as agreed to by the later according to the terms

settled with Fakhruddoula. This situation continued until the occupation of the country by the Britishers. The battle of Plassey in 1757 and the battle of Buxar in 1764 handed over the fate of this region into the hands of the Britishers. During the Muslim period, the main estates in the parent Hazaribag district were Ramgarh, Kunda, Kendi, Chai and Kharagdiha.

British Period

The Diwani of Bengal, Bihar and Orissa was granted by Emperor Shah Alam II to the East India Company on 12th of August, 1765. The Diwani included Chotanagpur as a part of Bihar. Hence, the East India Company derived the right to collect revenue or tribute from Ramgarh, Kharagdiha, Kendi and Kunda.

The British came in contact of these regions for the first time in 1769 when Capt. Camac visited Hazaribag to establish some sort of order in the "Jungleterry" district. He first of al subdued the Rajas of Kharagdiha and Kunda in 1771. The importance of Ramgarh increased with the rise of Maratha power in 1761-62 under Madhav Rao. In 1771, Capt. Came was made the Military Collector of Ramgarh district.

The tribute of the Raja of Chotanagpur was being paid through the Raja of Ramgarh. This was, however, discontinued and since the Britishers were dissatisfied with Mukund Singh, the Raja of Ramgarh at that time, they supported one Tej Singh a claimant to the Ramgarh Gaddi. The forces under Lt. Goddard defeated Mukund Singh. Tej Singh was then installed as first Musatagir and ultimately became the Raja. He transferred his capital to Ichak.

Capt. Camac was succeeded, in 1780, by Chapman, the first civilian administrator of Chotanagpur. The Ramgarh battalion consisting of Indian infantry men was raised in his time and stationed at Hazaribag. From the year 1780 to 1833 Chatra remained the administrative headquarters of Chotangpur.

Subsequent to the Kol rising in 1831 which, however, did not seriously affect the area but the administrative structure of the territory was changed. The parganas Ramgarh, Kharaagdiha, Kendi and Kunda became parts of the south-west frontier agency and formed into a division named Hazaribag with Hazaribag as the administrative headquarters. In 1854 the designation of the south-west frontier agency was changed to Chutia Nagpur and it began to be administered as Non-regulation province under Lt. Governor of Bihar. In 1855-56 there was the great uprising of the Santhals against the British but it was brutally suppressed.

1857 Movement

Chatra played an important role in the movement of 1857. On 2nd October, 1857 this battle of independence was fought at Chatra in which 46 Britishers and 10 Sikhs, altogether 56 military personnels and administrative officers were killed and buried in a well with their arms and ammunitions. To immortalize their memory a grave yard had been created near present Catholic ashram. J.C.C. Daunt of the 70th Bengal Native infantry and sergeant Dynon of the 53rd regiment were posthumously awarded Victoria Cross for their gallantry.

In this battle 77 bodies of mutineers wee buried in one pire and 150 troops were hanged to death. Subedar Jai Mangal Pandey and Nadir Ali Khan were sentenced to death by hanging on a mango tree near the Phansihari Talab (Saheed Talab pond) under the provision of the act of XVII of 1857.

In the battle of Chatra Thamur Vishwa Nath Shahi (Barkagarh-Hatia), Pande Ganpat Rai (Bhaunro), Tikait Omrao Singh (Ormanjhi), Shaikh Bihakhari (Khudi-a-Kute), Zamindar Bhola Singh (Chutia), Zamindar Madhar singh, Chama Singh and others had participated. In the neighbourhood the Ramgarh battalion at Hazaribag rose in revolt on the 30th July. The Deputy Commissioner, Capt Simpson alongwith some other Europeans fled on foot to Ichak. Capt. Dalton, the Commissioner of Ranchi sent Lt. Graham with detachment of the Ramgarh light Infantry to disarm the regiment at Hazaribag. But this detachment also mutinied and hurried back to Ranchi by road via Badam. Capt. Dalton evacuated the Europeans of Ranchi to Hazaribag and then to Bagodar. When Davis took charge of Hazaribag on 4th August he found the treasury empty and the records partially destroyed. However, Hazaribag was re-occupied by Dalton with the help of Sikh regiment under Col. Rattary. The insurgents, thereafter, did not receive much support in Hazaribag and very little in Ranchi. Hence they started out to join Kuer Singh but were attacked and defeated on the 2nd October, 1857 at Chatra by a British force Commanded by Major English. The movement in Hazaribag was thus crushed. This sporadic uprisings of the Santhals in the wake of their earlier efforts were also checked ruthlessly.

Period after 1857

The Non-co-operation Movement in 1920 influenced Hazaribag district. Many students gave up their studies, and some lawyers their practices, to join the movement. In 1921, Dr. Rajendra Prasad addressed August meetings at Chatra and Hazaribag. Mahatma Gandhi visited the Hazaribag district in 1925. A large number of people participated in the Civil-disobedience Movement of 1930. In the 1937 elections, the Congress party swept the polls in the parent Hazaribag district. The 53rd annual session of the Indian National Congress was held at Ramgarh in 1940 under the chairmanship of Maulana Abul Kalam Azad. In preparation and arrangement of this conference the role of Babu Ram Narayan Singh (village Treraria Hunterganj) is praise-worthy who had been behind bars for eight times during 1931 to 1947.

On 9th August, 1942 father of the Nation Mahatma Gandhi had given a call to "do or die" or the Britishers quit India. At Chatra a procession was taken out. National Tricolour flags were hoisted in the Kutchehri and the post Several people had to suffer imprisonment Quit India Movement was one of the most striking event of 1942 during which Jai Prakash Narayan alogwith Shaligram Singh, Gulab Swarnakar, Ram Nandan Mishra, Yogendra Shukla, Suraj Narayan Singh escaped from the jail and came to Tatra (a village of Chatra) as per the plan of Babu Ram Narayan Singh. After that they moved towards Gaya, Bearas and Nepal via Barachath. All efforts for their detection failed. Growing national discontent made India free from the British Yoke of slavery on 15th August, 1947. The district of Chatra had, thus, played a prominent role in the freedom struggle of the country.

Administrative set up

State of Jharkhand was created on 15th Nov., 2000 by our Parliament with its creation it got 4 divisions namely, North Chotanagpur, South Chotanagpur, Palamu & Santhal Pargana divisions. In turn North Chotanagpur Division Possesses 6 districts, namely, Hazaribag, Kodarma, Chatra, Bokaro and Dhanbad, South Chotanagpur Division Possesses 4 districts, viz., Ranchi, Purbi Singhbhum, Paschimi Singhbhum and Gumla, Palamu division Comprises 3

districts, e.g. Palamu, Lohardaga & Garhwa whereas Santhal Pargana Division Consists of 5 districts, e.g., Godda, Sahibganj, Pakur and Dumka.

It has already been mentioned that the district lies in the North Chotanagpur Division. The district administration is headed by the Deputy Commissioner. He belongs to I.A.S. cadre. He is assisted by a lot of officers mostly belonging to Bihar Public Service Commission. Till date officials cadre has not been separated. Police Administration is looked after by the Supdt. Of the Police. For the administrative convenience the district has only one subdivision, e.g., Chatra subdivision which has in turn 10 C.D. Blocks, viz., Hunterganj, Pratappur, Kunda, Lawalaung, Chatra, Itkhori, Giddaur, Pathalgora, Simaria and Tandwa. In entire district thee is only one Town Chatra(M) under Chatra C.D. Block. There are Chatra & Simaria Legislative Assembly segment in the district Total no. of Panchayats in the district are 96 whereas total no. of villages are ----------.

Physical Features

The Chatra district is famous part of Chotanagpur plateau which is situated at the altitude of 1400 ft. from sea level. It is 75 kms. from Gaya in south-east and 135 from the capital city, Ranchi in north-east. Thee are Jori Hills on Chatra-Gaya road and Simaria Hill on Chatra-Hazaribag Raod. Out of ten C.D. Blocks six are actually inaccessible.

Rivers/Water falls

Mahane Balbhadra, Bheduli, Garhi, Nilanjan and Duari are the main rivers of the district. River Satvalini flows in Pratappur Block. Goa, Khowa, Maludah, Keridah, Dumer Sumer, and Tamarin are worth-visiting water falls.

Climatic Conditions

This district comes under tropical monsoon region. In winter season severe cold is felt while in summer season there is comparatively less hot. There are mainly three seasons as below:

Winter	-	November to February
Summer	-	March to May
Rainy	-	June to September.

After the break of the rains in June, the first three months are usually quite pleasant. In the winter season the only drawback is the occasional excessive cold which grips the district. If there is some winter rain also the district remains cool till the middle of March. From April to the onset of monsoon, the day temperature though high, is always below that of the neighbouring districts and the nights are rarely oppressive. The hot weather winds are sometime dust-laden.

Rains set in June and last till September. Occasional winter rains between November and middle of February though scanty, causes severe cold spells.

Flora and Fauna

Chatra is predominantly forest district with 216133.65 hectare of forested area. In other words about 65% of the total area of Chatra district is covered with forest. Forest are distributed almost uniformly throughout the district. The district is full with or without tree-clad hills or rocks, which provides lush green panoramic scenery with sylvan atmosphere.

Sal is the most famous and predominant species of tree in the jungles of the district. Among other common species abundantly found are Bamboo, Khair, Salai, Semal, Mahua, Tamrind, Mango, Black-berry Peepal, Karanj, Jack-fruit, Margosa (Neem), Kusum, Palas, Kend, Asan, Piar and Bhelwa.

Lion and tigers are extinct. Bear, jackal, boar, sambhar ae found in forsts while cow, ox, buffalow, goat, sheep are found in plain areas.

Mines and Minerals

Coal is the important mineral of this district. It is mined at Piparwar under Tandwa Block. From Utamore (Chatra Block) precious stones of astrological importance are also extracted.

Land use pattern

Nearly 65% of the land area of the district is covered with forests and rest nearly 35% land has rocky and alluvial soil. Aluvial soil is found mostly near river belts. Some soils near the river beds are alluvial. The culturable lands may be divided into two categories- low lands and up lands. The former are fertile and very little manure is needed, but the later are not so.

The main agricultural seasons in the district are Kharif and Rabi. The Kharif season starts from the third week of May and lapse till the end of October followed by the Rabi season. Culturable area forms about 39 per cent of the total area of the district. Rice is the main crop of the district. Other important crops grown are bazra, maize, pulses (Mainly Arhar and Gramme). Non-food crops mainly consists of oil-seeds. The area under cash crops (sugar cane, etc.) is small.

Irrigation Facilities

Irrigation plays an important role in the agricultural economy of any district. However, in Chatra district, due to the hilly topograph of the area, there is not much scope for exploitation of surface water. The other means of irrigation left are exploitation of ground water and taking recourse to lift irrigation. Tank irrigation is not very popular. Ground water exploitation has also its limitations. Rahat, Kudi-Latta, Wells are main sources of irrigation. Recently DRDA has taken up water shed schemes and has constructed check dams, pynes which have facilitated storage of water and its utilization.

Livestock

The tenn 'livestock' includes cattle (cows, bulls and bullocks), buffaldes, sheep, goats and pigs. The average yield of milk of the cows of the district is very poor. Bullocks and buffaloes are also of small stature. They are not suitable for hard ploughing. The bulls are of inferior variety.

Fisheries

The rivers being hilly, there are not regular big fisheries. The main fisheries consist of pisciculture in lakes, tanks, bandhs and ponds.

Industrialisation

The district of Chatra is really backward with respect to industrialisation. Big or middle category of factories or industrial set-up are completely scarce.

Communication : Chatra district is well connected by road transport. Railway and Airways are not present. The district headquarters is connected through state transport – Dobhi-Chatra-Hunterganj. These roads are in good condition.

Trade and Commerce : Hunterganj, Chatra, Simaria and Tandwa are main markets of this district. Katha, biri, tarkol, rive, wheat, mustard are exported from here. In Ghanghari, Pitiz, Chatra, Simaria, Tandwa, Itkhori, Pratappur weekly hats are held.

Electricity and Energy : No direct resource to produce electricity is present in this district. But Tandwa Thermal Electricity Production Plant is in the offing.

Social & Cultural events and Natural & Administrative Development :

With its inception on 1st on July, 1991 in erstwhile Bihar State the Chatra district has witnessed two great events of far reaching consequences as an outcome of long drawn Jharkhand movement, e.g., creation of Jharkhand Autonomous Council in 1996 and creation of Jharkhand state out of composite Bihar state on 15.11.2000. Creation of Jharkhand state finally replaced the Jharkhand Autonomous Council. With the creation of Jharkhand state the state capital for district shifted from Patna town to Ranchi town. Impact of modernity and urbanization is making a dent in remote hinterland of the district.

BRIEF DESCRIPTION OF PLACES OF RELIGIOUS, HISTORICAL AND ARCHAEOLOGICAL IMPORTANCE IN VILLAGES AND PLACES OF TOURIST INTEREST OF THE DISTRICT

1. Bhaduli (Bhadrakali) : It is at 35 kms. on the east of Chatra and at 16 kms. west of Chauparan, connected with G.T. Road. It is only half a km. away from Bhadrakali complex of Itkhori block headquarters; situated on the bank of river Mahanad(Mahane) surrounded by hill and forest. There is a water reservoir which has a natural beauty of its own. People flock to watch its eternal beauty on 'Bishua' (Kartik Purnima – a festival after Chhath) and enjoy bath & bask.

2. Bichldiliya : It is **'Dah'** or water reservoir on the bank of river Niranjana (Lilajan) at the distance of 11 kms. from Chatra in west. The road up to 5 kms. is motorable and the rest 6 kms. is a foot track. It is lovely to look at the water fall forming snow-white showers with musical tone inviting the lover of nature to have solace in the lap of nature. Due to in accessibility a nice picnic spot is neglected.

3. Duari : It is also known as Balbal Duari situated at a distance of 35 kms. in the east of Chatra district on Gidhaur Katkam sandy road. It can be reached from Hazaribag also. The road is motorable and one can visit this directly from Chatra During rainy season. It is difficult to travel but it is pleasant in winter and summer. There is a hot spring in the bed of river Balbal near the village, i.e., Duari. The water is supposed to have curative effect on skin diseases. As at Rajgir people flock to have hot bath for obtaining remedial effect, in the same way on Makar Sankranti people congregated here in a large number to have a holy dip. The sight is also charming & delightful.

4. Khay Banaroo : This notable picnic spot of Chatra is at about 10 kms. from the district headquarters on the south-west of the town. One can travel 8 kms. metalled road on Chatra-Chandwa Raod and 2 kms. fair-weather motorable road, the rest 2 kms. can be traveled on foot. The woods are lovely dark and deep. The scenery is exquisite with greenery. The Banaroo (Dah) reservoir or stream cuts its way through the rocks and at places it has cut terraces with balconies out of stone walls on its banks. The deep gorge with numerous shapes in the stones from the wall of the two sides of the gorge is a rare sight. At places it seems as if the portions of trees have been transferred into rocks. It appears as if the stone has become wax in the artistic hands of nature – the following river. The rocky river bed is peculiar. The whole valley is filled with echoing sound on the opposite direction of ones cry. There are some species of nogeisis trees by the side of the gorge on the bed of the river. If a stone is thrown in the reservoir several pigeons would flock together from their holes with the chirping sounds of their wings, reminding one of either Fatehpur Sikri or Mandu fort's pigeons flight. The dancing waves of the stream foaming at places producing gurgling sound is sure to attract the tourists since the whole valley appears to be echoing with the sounds, "O listen for the vale profound".

5. Keridah : A beautiful picnic spot situated at the distance of 8 kms. away from Chatra on the north west portion of the road is motorable and the rest to be scaled on foot. This water fall is in three parts between two hill rocks. It resembles with Jonha fall of Ranchi. Its beauty is sure to inspire poetic insight and would likely to prove the Thames for Tennyson & The west Minister Bridge for Wordsworth. Here one is bound to forget worries in the lap of nature which some times gives notion of fairy land.

6. Maloodah : It has another beautiful water fall at the distance of about 8 kms. on the west of Chatra. Upto 5 kms. it is jeepable and three 3 kms. is to be traveled on foot. The water falls from the height of about 50 ft. without touching the sides of the hillocks any where. It has been cut in semi-circle with steep walls. It is lovely to look at and soothing for solace reminding us. "A thing of beauty is joy for ever".

7. Tamasin : It is an attractive beauty spot of Chatra situated on the north-east at the distance of 26 kms. It is to be traveled through a 'Katcha' fair weather road via village Kolhaiya. There is a big reservoir of water at foot. It is famous for the imager of Goddess Bhagwati. Here one can enjoy the scenic beauty forgetting the worries of life.

8. Dumer Sumer : It is also another important beauty spot of Chatra district situated on the north at the distance of 12 kms. which 10 kms. can be covered by vehicle and the rest two kms. is a foot

track. The road is kutcha. There is a precipitations of water from a great height in the reservoir. On all sides there are hills. It looks nice to see the water fall from such a height. It appears as if the spring is dashing against the rocky walls fomenting white rays. One feels as if he is enjoying showerbath under the sun. Nights are lull with magical effect.

9. Goa : It is at a beautiful water fall at the distance of 6 kms. on the west of Chatra on way to Mallodah up to 4.5 kms. it can be reached by jeep or vehicle and the rest 1.5 kms. can be tracked on foot. On the way one has to cross a village named Sanghari. The water falls in the reservoir from the eight of 30 ft. On all the three sides there are rocks and in mid there is reservoir and onward the stream flows on each Monday during the month of Shrawan (rains). People flock here in multitude and enjoy the dip-dive, jumping in the fall frisking on the smooth rocks. It is the nearest beautiful picnic spot of Chatra District.

Thus the whole of the district of Chatra is full of rocks and ravine, fountain and flora, deep & dense forest, birds on wings with sweet song, nature smiling at dawn & dusk to look at the crimson colour round the horizon, offering silent but forceful invitation to the lovers of nature to stand and stare at the natural & eternal beauty of Chatra whispering "See you Again".

.....

CHATRA, JHARKHAND

Kauleshwari Devi Tample

Kauleshwari Devi Temple is situated on the top of Kolhua hill at the height of 1575' in Hunterganj block. It contains some ruined temples and historical monuments. It is the place of pilgrimage for the Hindus, the Budhists and the jains Trithankers. There is a temple of Maa Kali known as Kauleshwari Devi or Kuleshwari Devi the reverend deity of kol community. People co-relate this place with epic age i.e. the Ramayana and the Mahabharata. On Basant Panchmi and Ram Navmi a large number of pilgrims flock to the hill top for worship. It is a fascinating and enchanting picnic spot with a fair weather morerable road.

District Highlights – 2001 Census

1. Chatra ranks 15th in terms of population (7,91,434) and 9th in terms of area (3,706 sq.km.) in the state of Jharkhand.
2. In terms of population per sq.km. Chatra is the 16th densely populated district in the state with 214 persons per sq.km as against the state's 338.
3. Chatra ranks 7th in terms of sex-ratio (959) against the state's 941.
4. There are 121 uninhabited villages (out of 1,464 total villages) in the district of Chatra.
5. Jori Kalan (under Hunterganj C.D. Block) is the most populated village (6,725) and Koluapahar (under Hunterganj C.D. Block), Sustra (under Chatra C.D. Block), Bahera Chak, Sahibara and Gada (under Itkhori C.D. Block) are the least populated villages (1) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in Primary sector.
7. C.D. Block Chatra has the highest number of villages (306) in the district and C.D. Block Pathalgora has the lowest number of villages (30).
8. Angarah (under Pratappur C.D. Block) has the largest area (2,747 hectare) and Itkhori Chatti (under Itkhori C.D. Block) has the smallest area (1 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 92.8 percent of the villages.

CHATRA DISTRICT

Table – 1

Table 1 shows rise in the population of this district during 1991-2001 decade has been of the order of 29.2 percent. The rural population in the district has increased 28.9 percent while the urban population growth over the decade has been much as 34.9 percent. Rural urban migration is important factor which always leads to rapid Expansion of the urban unit.

Among the C.D. Blocks, Chatra has shown the highest increase in population over the decade with 34.2 percent.

The next highest increase in population is observed in Lawalaung C.D. Block with 34.1 percent followed by Pratappur C.D. Block with 32.2 percent.

Percentage decadal variation has been observed to be the least in case of Tandwa C.d. Block with 23.6 percent.

The increase in rural population during 1991-2001 has been highest Lawalaung C.D. Block with 34.1 percent followed by Chatra C.D. Block with 34 percent.

Table – 4

The data presented in the above table highlight the fact that maximum proportion of villages in Chatra district lies in the density range (per square kilometer) of 501+ with 24.1 percent of the total inhabited villages in the density range of 101-200 which account for 19.4 percent. It would further be seen that small number of villages fall in the density range of 11-20 which account for 2.0 percent of the total inhabited villages.

Maximum number of villages fall in the density range of 501+ covering 37.1 percent of the population followed by villages in the density range of 101-200 which account for 17.2 percent of the population.

Table – 5

Table 5 shows that sex ratio for the urban areas of Chatra district is comparatively high as compared to the urban areas of the state during 1991 and 2001 censuses. However, on the other hand, the sex ratio for the rural areas of the state is found to be comparatively high as compared to the rural areas of Chatra district during 1991 and 2001 censuses.

It has already been discussed that the district of Chatra was created after 1991 census.

It is found that in case of sex ratio in the total population in the district it is lower than the sex ratio of the state of Bihar both in 1991 and 2001 censuses.

Table – 6

In Chatra district as a whole there are 959 females for every thousand males. Within the district, the sex ratio varies from 1,034 in Itkhori C.D. Block to 921 in Kunda C.D. Block.

The sex ratio of Pathalgora C.D. Block is 986 while the sex ratio of Lawalaung C.D. Block is 930.

The sex ratio figures for rural and urban areas of Chatra district are 963 and 879 respectively.

The sex ratios of Itkhori and Pathalgora C.D. Blocks are higher than the district rural average of 963 while Tandwa (962%), Gidhaur (959%), Simaria (956%), Chatra (953%), Hunterganj (952%) and Pratappur (946%) C.D. Blocks have sex ratios below the district rural average.

The urban sex ratio of the district is 878 which is lower than the total and rural averages of the district.

Table – 7

As for rural Chatra district there are 963 females for every thousand males. Within the district, the sex ratio varies from 1,034 in Itkhori C.D. Block to 921 in Kunda C.D. Block.

The sex ratio of Pathalgora, Tandwa, Gidhaur and Simaria C.D. Blocks are 986, 962, 959 and 956.

And also the sex ratio of Chatra(953), Hunterganj(952), Pratappur(946) and Lawalaung(930) C.D. Blocks.

The sex ratio of Pathalgora C.D. Block are higher than the district rural average of 963 while all other C.D. Blocks have sex ratio below the district rural average.

Table - 8

It is observed in the table 8 that the maximum proportion of villages in Chatra district lies in the sex ratio range of 1000-1099 and these village account for 22.6 percent of the total inhabited villages.

It further reveals that these villages which fall in this sex ratio range account for 24.1 percent of the district rural population.

268 villages (20%) fall in the sex ratio range of 900-949 and these villages account for 27.8 percent of the rural population of the district. 229 villages (17.1%) are in the sex ratio range of 850-999 and these villages account 24.9 percent of the rural population.

183 villages (13.6%) are in the sex ratio range of 1100+ and above and these villages account 6.6 percent of the rural population. 151 villages (11.2%) are in the sex ratio range of 850-899 and these villages account 9.8 percent of the rural population.

42 villages (3.1%) are in the sex ratio range of 750-799 and these villages account for only 1.3 percent of the population.

34 villages (2.5%) are in the sex ratio range of 700-749 and these village account for 0.1 percent.

27 villages (0.6%) are in the sex ratio range of (less than 700) and these account for only 0.6 percent of the rural population.

Table – 9

There is no urban agglomeration in Chatra district. There is only one urban unit i.e. Chatra(M).

The sex ratio of this statutory town is 879 according to 2001 census.

Table – 10

It is observed from the above table that the sex ratio in the age group 0-6 in the district varies from 1,012 in Kunda C.D. Block to 935 in Gidhaur C.D. Block.

The sex ratio in the age group 0-6 of Simaria C.D. Block is 1,000 while the sex ratio of Tandwa C.D. Block is 966.

The sex ratio figures in the age group 0-6 of Kunda, Simaria, Pathalgora, Hunterganj, Pratappur C.D. Blocks are higher than the district total and rural averages while Gidhaur, Tandwa, Chatra, Itkhori, Lawalaung C.D. Blocks has sex ratio below the district total and rural averages.

The urban sex ratio of Chatra district is higher than the total and rural sex ratio of the district.

Table – 11

It is observed in table 11 that the sex ratio in the age group 0-6 among the rural population in the C.D. Blocks of the district varies from 1,012 in Kunda C.D. Block to 935 Gidhaur C.D. Block. The sex ratio of Simaria C.D. Block is 1,000 while the sex ratio of Tandwa C.D. Block is 966.

The sex ratio figures of Kunda, Simaria, Pathalgora, Hunterganj, Pratappur C.D. Blocks are higher the district average while Gidhaur, Tandwa, Dhatra, Itkhori, Lawalaung C.d. Blocks hare sex ratios below the district average.

Table – 12

It is observed in the above table that 28.1 percent of inhabited villages in Chatra district lies in the sex ratio range of 1100+ in the age group of 0-6. 246 villages (18.3%) fall in the sex ratio range of 1000-1099 in the age group 0-6. 183 villages (13.6%) are in the sex ratio range of (less than 700). 144 villages (10.7%) are in the sex ratio range of 900-949. 107 villages (8.0%) are in the sex ratio range of 800-849. 91 villages (6.8%) are in the sex ratio range of 950-999. 45 villages (3.4%) are in the sex ratio range of 700-749. These villages having favourable sex ratio constitute 2.4 percent of the rural population of the district. There are 89 villages (6.6%) in the

district which lie in the unfavourable sex range of 850-899. These villages account for 9.6 percent of the rural population of the district. There are 61villages in the district having very unfavourable sex ratio range of 750-799 which account for 3.5 percent of the rural population of the district.

Table – 13

There is no urban agglomeration in Chatra district. It is apparent from the above table that there is only one statutory town in Chatra district i.e. Chatra(M).

The sex ratio in the age group 0-6 of Chatra(M) 947.

Table – 14

The above table shows that the percentage of scheduled castes in Chatrra district is 31.9 percent of the total population in the district. Within the district highest percentage of scheduled castes population is in Kunda C.D. Block with 63 percent closely followed by Lawalung C.D. Block with 56 percent.

Within the district lowest is in Pathalgora C.D. Block with 21.9 percent.

The percentage of scheduled castes population in Chatra district for the urban areas is 12.2 percent which is lower than the rural areas (33.1%).

The percentage of scheduled tribes population in the C.D. Blocks of Chatra district is almost negligible.

Table – 15

The above table indicated that the percentage of the scheduled castes in Chatra district is of the order of 33.1 percent of the total population.

The highest percentage of scheduled castes population is in Kunda C.D. Block with 63 percent of the total population closely followed by Lawalaung C.D. Block with 56 percent.

The lowest percentage of scheduled castes is in Gidhaur C.D. Block with 21.9 percent.

The percentage of scheduled castes population in Kunda and Lawalaung C.d. Blocks are higher than the district rural average (33.1%).

The percentage of scheduled tribes population in the C.D. Blocks of Chatra district is highest is in Tandwa C.D. Block with (14.8%) and followed by Pathalgora C.D. Block with (9.5%).

And the percentages of scheduled tribes population in the C.D. Blocks of Chatra district is lowest is in Hunterganj and Itkhori C.D. Blocks with 0.3 percent.

Table – 16

From the above table it is apparent that there are 234 villages accounting for 17.4 percent of the inhabited villages in the district where the population of scheduled castes ranges 76 and above of total population. This is closely followed by villages where the population of the scheduled castes ranges between 51-75 percent of the total population. These 177 villages account for 13.2 percent of the total inhabited villages. There are 162 villages which account for 12.1 percent of the inhabited villages where the percentage of scheduled castes population to total population is 31 and 40. There are 154 villages which constitute 11.5 percent of the inhabited villages. Where the percentage of Scheduled Castes population to total population is 9.2 percent villages are such which constitute 5.7 percent of the inhabited villages where the percentage of Scheduled Castes population to total population is between 5 and 10.

There is no Scheduled castes population in 2.5 percent of the inhabited villages in the district.

Table – 17

As regards the population of the Scheduled Tribes it can be seen from the table above that there are 10,048 villages accounting for 78.0 percent of the inhabited villages in the district where the population of Scheduled Tribes ranges nil of total population.

94 villages account for 7.0 percent of the total inhabited villages. There are 52 villages account for 3.9 percent of the total inhabited villages. There are 47 villages which account for 3.5 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is between 5 and 10.

There are 36 villages which constitute 2.7 percent of the inhabited villages range 76 and above. 28 villages which constitute 2.1 percent of the total inhabited villages. The ranges between 21 and 30 percent of the total population. 20 villages accounting for 1.5 percent of the inhabited villages of Scheduled Tribes ranges between 51-75.

6 villages accounting for only 0.4 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is between 41 and 50.

Table – 18

Table 18 above shows that there is no urban agglomeration in Chatra district. There is only one statutory town in the district i.e. Chatra(M).

The percentage of Scheduled Castes population to total population is 12.2 in Chatra(M).

The percentage of Scheduled Tribes population in Chatra(M) is almost negligible as has been observed in the above table.

Table – 19

Table 19 shows that the sex ratio of Scheduled Castes varies from 1007 in Itkhori C.d. Block to 931 in Kunda C.D. Block.

The sex ratio in Pathalgora(987), Gidhaur(985), Tandwa(970), Simaria(964) C.D. Blocks and Chatra(969) are higher than the district average.

The sex ratio of Hunterganj(955), Lawalaung(939), Pratappur(936) C.D. Blocks are lower than district average.

The sex ratio of Scheduled Tribes varies from 1065 in Gidhaur to 816 in Lawalaung C.D. Blocks.

The sex ratio of Hunterganj, Chatra, Simaria and Tandwa C.D. Blocks are higher than the district average.

And the sex ratio of Itkhori, Pathalgora, Kunda, Pratappur and Lawalaung C.D. Block are lower than district average.

Table – 20

There is no urban agglomeration in Chatra district. There is only one statutory town in the district i.e. Chatra(M).

The sex ratio of Scheduled Castes in Chatra(M) is 884 while the sex ratio of Scheduled Tribes is only 853 which is very adverse.

Table – 21 and 22

Table 21 and 22 show that among the C.D. Blocks in the district Itkhori C.D. Block has the highest proportion of literate population (49.2%) followed by Pathalgora C.D. Block(47.8).

The literacy rats for Simaria, Tandwa, Chatra, Hunterganj and Pratappur C.D. Blocks are 46.2, 41.7, 38.7 and 36 percent respectively.

Also Lawalaung C.D. Block is 28.2 and Kunda C.D. Block is 24.7 percent.

Male literates out number female literates in all the C.D. Blocks of Chatra district. The highest proportion of male literates is in Itkhori C.D. Block with 64.4 percent closely followed by Pathalgora C.D. Block 64.3 percent.

And the lowest proportion of female literates is in Kunda C.D. Block with 35.7 percent.

Itkhori C.D. Block has the highest female literacy rate with 34.7 percent while Kunda C.D. Block has the lowest literacy rate among the female with 12.4 percent.

Male literacy rates for Chatra, Itkhori, Gidhaur, Pathalgora, Simaria and Tandwa C.D. Blocks are higher than the corresponding figures of Chatra district.

Itkhori, Pathalgora and Simaria C.D. Blocks has the lower female literacy rate than the district average.

Table – 23

The above table shows that in 17.3 percent of the inhabited villages, literacy rate ranges between 41 and 50 percent. In these 233 villages 23.4 percent of the district rural population live.

This is the largest group of villages in the district. This is closely followed by 227 villages and with 19.8 percent of the inhabited villages where literacy rate ranges between 31 and 40 percent. 15.3 percent of the inhabited villages i.e. 205 villages are such where literacy rate ranges between 51 and 60 percent. These villages account for 19.7 percent of the district rural population 14.3 percent of the inhabited villages i.e. 192 villages such a re where literacy rate between 21 and 30 percent and these villages account for 13.8 percent of the district rural population. 12.7 percent of the inhabited villages i.e. 171 villages are such where literacy rate ranges between 11 and 20 percent. These villages account for 8.5 percent of the district rural population. 8.8 percent of the inhabited villages 118 villages are such where literacy rate ranges between 1 and 10 percent. These villages account for 3.8 percent of distribution of population.

6.7 percent of the inhabited villages i.e. 90 villages are such where literacy rate range between 61 and 70 percent. These village account for 7.6 percent of the distribution of population.

3.4 percent of the inhabited villages i.e. 45 villages are such w here literacy rate ranges 71 and 80 percent. These villages account for 2.9 percent of the distribution of population.

2.5 percent of the inhabited villages i.e. 34 villages are such where literacy range ranges is zero percent. These villages account for 0.2 percent of the distribution of population.

Table – 24

There is no urban agglomeration in Chatra district. There is only one statutory town in the district i.e. Chatra(M).

The literacy rate for Chatra(M) is 77.2 percent. Male literates greatly out number female literates as the male literacy rate for Chatra(M) is 83.8 percent while the female literacy rate is only 69.5 percent. According to census 2001.

Table – 25

The table above shows that literacy rate among the scheduled castes is highest i.e. Pathalgora with 28.5 percent where as it is lowest i.e. 16.5 percent in the Kunda C.D. Block in the district.

It is observed that the literacy among the Scheduled Castes for the district is 21.1 percent only. As regards percentage of male literacy rate among the scheduled castes it is highest i.e. 26 percent in the Chatra C.D. Block.

In case of female literacy rate among the scheduled castes also it is highest i.e. 15.4 percent is in Pathalgora and Tandwa C.D. Blocks and lowest i.e. 7.2 percent in Kunda C.D. Block.

It is found that the gap between male and female literacy rate is highest i.e. 25.9 percent in Pathalgora C.D. Block where as it is lowest i.e. 14.7 Lawalaung C.D. Block.

Table – 26

The table above shows that is case of literacy among the scheduled castes in the villages of the district the highest number of villages i.e. 26.2 percent fall in the literacy range of 11-20

percent whereas the lowest number of villages i.e. 0.3 percent fall in the no literacy range i.e. 100 percent.

It is observed that of the total villages in the district 0.5 percent villages are such which fall in the literacy among the scheduled castes in the villages of the district.

Table – 27

The table above shows that the literacy rate among the scheduled castes in the urban areas of the district is far below i.e. 33.9 percent in case of total population on 42.9 percent in case of male and 23.3 percent in case of females as compared to 47.0 percent in case of total population, 59.7 percent in case of males and 33.1 percent in case of females in the state of Bihar and 35.3 percent in case of males and 23.9 percent in case of females in the Chatra district.

Table – 28

The table 28 shows that among the scheduled tribes the percentage of literates is highest i.e. Chatra with 56.6 percent where as it is lowest i.e. 16.5 percent in Pratppur C.D. Block in the district.

It is observed that the literacy rate among the scheduled tribes for the district is 36.9 percent only. As regards percentages of male literacy rate among the scheduled tribes is highest i.e. 66.7 percent in Chatra C.D. Block where as it is lowest i.e. 23.1 percent in Pratappur C.D. Block.

In case of female literacy rate among the scheduled tribes it is highest i.e. 46.6 percent in Chatra C.D. Block where as it is lowest i.e. 8.8 percent in Pratappur C.D. Block.

Table – 29

The table above shows that in case of literacy among the scheduled tribes in the villages of the district the highest 14.2 percent fall in the literacy range i.e. 31-40 where as the lowest number of villages i.e. 0.3 percent fall in the literacy range i.e. 91-99 percent.

According to Census 2001.

Table – 30

The table above shows that the literacy rate among the scheduled tribes in the urban areas of the district is 86.4 percent.

There are all together 159 persons including 96 males and 63 female and they all are literates.

Table – 31 & 32

The work participation rate for total workers is defined as the percentages of total workers to total population. Ion a similar way it is defined for main and marginal workers.

Table 31 and 32 show that the work participation rate (WPR) in the Chatra district 24.1 percent as main workers and 14.5 percent as marginal workers. Proportion of non workers in the district is 61.4 percent.

Among the main workers male work participation r ate in the district is 35.7 percent while that of females is only 12.1 percent as per 2001 census. The proportion of main workers is highest (27.4%) in Hunterganj C.D. Block and lowest (21.1%) in Lawalaung C.D. Block. Out of 10 C.D. Blocks, WPR of three C.D. Blocks are above the district average.

The proportion of marginal workers is the highest (22.4%) in Lawalaung C.D. Block and the lowest (10.8%) in Pratappur C.D. Block. The proportion of total workers is the highest (45.5%) is in lawalaung C.D. Block and the lowest (33.7%) is in Chatra.

Table – 33

There is no urban agglomeration in Chatra district. The only urban unit in the district is Chatra(M).

The work participation rate for total workers is defined as the percentage of total workers to total population.

In a similar way it is defined for main and marginal workers. For Chatra(M) the work participation rate(WPR) recorded is 19.2 percent of the total population of the town as main workers and 4.7 percent as marginal workers.

The proportion of non workers in the town is 76.1 percent. The proportion of male and female main workers are 32.3 percent and 4.2 percent respectively.

The proportion of marginal workers among males is 6.2 percent and that of for females is 2.9 percent.

The proportion of males and females non workers are 61.4 percent and 92.2 percent respectively.

Table – 34

From the above table, the relative importance of the main spheres of Economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, Cultivators, Agricultural Labourers, Household Industry workers and Other workers. The Economic activity in the rural and urban are as in the district is primarily dependent on agricultural which is supported by the fact that the cultivators (42.1%) and agricultural labourers (39.4%) together constitute 81.5 percent of the total workers of the district.

The agricultural sector has observed more than three fourth of the total main workers. The proportion of cultivators varies between 59 percent for Gidhaur C.D. Block to 29.4 percent for Pratappur C.D. Block.

Proportion of agricultural labourers varies between 51.8 percent in Pratappur C.D. Block to 1.8 percent in Gidhaur C.D. Block.

The proportion of Household Industry Workers is only 4.1 percent of the total workers of the district.

Proportion of household industry workers varies between 5.4 percent in Chatra C.D. Block to 1.8 percent in Gidhaur C.D. Block

The proportion of other workers is 14.4 percent of the total workers of the district.

Proportion of other workers varies between 26.8 percent in Chatra C.D. Block to 3.6 percent in Kunda C.D. Block.

Table – 35

From the above table, the relative importance of the main spheres of Economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, Cultivators, Agricultural Labourers, Household Industry Workers and Other Economic Activities.

The Economic Activity in the rural areas of the district is primarily dependent on agriculture which is supported by the fact that the cultivators (42.1%) and agricultural labourers (39.4%) together constitute 81.5 percent of the total workers of the district.

The agriculture sector has observed more than three fourth of the total main workers. The proportion of cultivators various between 59 percent for Gidhaur C.D. Block to 24.9 percent for Pratappur C.D. Block. Proportion of agricultural labourers varies between 51.8 percent in Paratappur C.D. Block to 32.4 percent in Gidhaur C.D. Block.

The proportion of Household Industry Workers is only 4.1 percent of the total workers of the district.

Proportion of household industry workers varies between 5.4 percent in Chatra C.D. Block to 1.8 percent in Gidhaur C.D. Block.

The proportion of other workers is 14.4 percent of the total workers of the district.

Proportion of other workers varies between 26.8 percent for Chatra C.d. Block to 3.6 percent for Kunda C.D. Block.

Table - 36

There is no urban agglomeration in Chatra district.

There is only one statutory town in the district i.e. Chatra(M).

From the above table, the relative importance of the main spheres of Economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, Cultivators, Agricultural Labourers, Household Industry Workers and Other Economic activities.

The cultivators constitute 3.7 percent and agricultural labourers constitute 4.6 percent of the total workers of Chatra(M).

The proportion of male and female cultivators are 3.8 and 3.1 percent respectively. The proportion of male and female agricultural labourers are 3.9 and 8.6 percent respectively. Household Industry Workers of Chatra.

Table – 37

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational amenity : - There are as many as 568 villages accounting for (42.3) percent of the total number of inhabited villages (1343) in the district where Educational facility is available. The highest proportion of villages with Educational facility is in C.D. Block Simaria with 68.8 percent closely followed by Pathalgora C.D. Block with 56.7 percent. The smallest proportion of villages with Educational facility is observed in C.D. Block Itkhori with 33.6 percent.

Medical amenity : - The availability of medical amenity in the villages is quite low and only 2.2 percent village have got it. Among the C.D. Block Simaria has the largest proportion of villages with medical facility, the percentage being 6.3 percent. It is followed by Gidhaur C.D. Block with 5.4 percent. Itkhori C.D. Block has the lowest proportion of villages with 0.4 percent and other hand Kunda and Lawalaung C.D. Block where medical amenity is not available.

Improved Drinking Water :- There are as many as 1246 villages accounting for 92.8 percent of the total inhabited villages in the district where improved drinking water facility is available. Among the C.D. Blocks, Pathalgora has 100.0 percent proportion of villages where improved drinking water facility is available. Lawalaung C.D. Block on the other hand has the minimum proportion of villages (81.7%) where improved drinking water facility is available.

Post Office :- Postal facility are available only in 67 villages out of 1343 inhabited villages(5.0%) in the district. Tandwa C.D. Block has the maximum number of villages having postal facility (10.7%) followed by Simaria C.D. Block with 10.4 percent. Lawalaung C.D. Block has the minimum number of villages having postal facility (2.2%). Kunda C.D. Block where improved drinking water facility is not available.

Telephone :- The availability of telephone facility in the villages is quite low and only 1.0 percent villages have got it. Among the C.D. Blocks, Simaria has the maximum number of villages having telephone facility (4.2%) followed by Pathalgora C.D. Block with 3.3percent while the villages of Pratappur, Kunda, Lawalaung, Itkhori and Gidhaur C.D. Blocks still do not have telephone facility.

Transport Communication :- Transport communication facility are available only 47 villages out of 1343 inhabited villages (4.0%) in the district. Tandwa C.D. Block has the highest proportion of villages (17.9%) which are connected by bus or rail or navigable river/canal services etc., followed by Simaria C.D. Block with 16.7 percent. Itkhori C.D. Block has the lowest proportion with (0.4%).

Bank :-Banking facility is available only in 47 villages out of 1343 inhabited villages (3.5%) in the district. Among C.D. Blocks, Hunterganj C.D. Block maximum number of villages having banking facility (12.7%) Pratapganj has the minimum number of villages having banking facility 0.6%). Kunda, Lawalaung, Gidhaur C.D. Blocks still do not have any Bank facility.

Agricultural Credit Societies :- Agricultural credit societies are available only 45 villages out of 1343 inhabited villages (3.4%) in the district. Pathalgora C.D. Block has the maximum number of villages having agricultural credit facilities (26.7%) and lowest is Pratappur C.d. Block with 0.6 percent. Kunda, Lawalaung and Gidhaur C.D. Blocks still do not have agricultural credit societies.

Approach by Pucca Road :- This facility is available in 172 villages out of 1343 inhabited villages (12.8%) in the district. Among the C.D. Blocks, Simaria with 34.4 percent villages having Pucca approach road followed by Tandwa C.D. Block (23.8%) while Kunda C.D. Block has the least number of villages having this facility with only 1.3 percent.

Power Supply :- Electrified villages in the district constitute as low as 9.8 percent of the total number of inhabited villages. Among the C.D. Blocks, Hunterganj has the maximum number of electrified villages with 26.1 percent while the Lawalaung C.D. Block with (1.1%).

Kunda and Pathalgora C.D. Blocks still do not have power supply.

Table – 38

It would be see from table no. 38 that Educational facility is available to 72.5 percent of the rural population of the district. The proportion varies between the maximum of (88%) Simaria C.D. Block. It may be of interest to note that proportion of villages in the district enjoying Educational facility is less than the proportion of population which is as high as 72.5 percent. This may be attributed to the fact that villages which possess Educational facility usually contain larger as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 7.1 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 93.8 percent which is more than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various C.D. Blocks.

In case of semi permanent houses, Kunda C.D. Block has the maximum proportion of households (95.1%) followed boy Lawalaung C.D. Block (93.6%).

Itkhori C.D. Block has the minimum proportion of households having semi permanent houses with 75.8 percent.

Table – 39

As regard Educational facility it would be seen that there are 785 villages in the district (58.5%) which do not have any Primary School but the facility is available at places situated within 5 kms. For 653 villages and only 121 village within the range of 5-10 kms. There are as many as 1239 villages in the district (92.3%) which do have 11 middle schools but the facility is available at places situated within 5 kms. For 736 villages, 384 villages range of 5-10 kms and

119 village within the range of 10+ kms. It is interesting to observed that cent percent inhabited villages of the district are deprived of college but the facility is available at places situated within 5 kms for 99 villages, 249 villages with the range of 5-10 kms and 994 villages within the range of 10+ kms.

There are 1332 villages in the district (99.2%) which are without the facility of hospital and as many as 242 villages Enjoy this facility at a distance range of 5-10 kms is 340 where as the same is available at a distance of less than 5 kms for 750 villages. There are 1335 villages in the district (99.4%) which do not have primary health centre.

Similar trend can be observed in respect of other amenities in the district.

Table – 40

It would appear from the above table that maximum number of inhabited village (52.9%) lie in the distance range of 16-50 kms. From the nearest statutory town. This is followed by villages in the distance of 5-10 kms. From the nearest statutory town with 25.4 percent.

12.9 percent of villages is found to be in the distance range of more than 51 kms. And last that minimum number of village (8.9%) lie in the distance range of less than 5 kms.

Interestingly, it can be observed from the table that the proportion of villages having Educational facility is 48.7 percent for those situated within 5 kms from the nearest town and decreases to 44.3 percent in the distance range of 5-15 kms.

There after it again decreases to 40.1 percent in the distance range of 16-50 kms. From the nearest town. In the case of other amenities (except approach by pucca road) also more or less the trend is same.

Table – 41

It can be seen from the table no.1that the maximum number of villages i.e. 836 (62.2%) in the district fall in the population range of 1-499 followed by 299 villages (22.3%) having a population range of 500-900.

The lowest number of villages is observed in the population range of 5000-9999 only 3 (6.2%).

The proportion of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities.have a population range of 500-999 and 10,000+ which further corroborates the fact that more facilities are generally available in large village than in smaller ones.

Table,– 42

Table 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.d. Blocks.

It would be seen from the table that 40 percent of the total area pf the district is utilized for cultivation (cultivable area) and of this only 44.4 percent area is found to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Lawalaung C.D. Block with

79.9 percent closely followed by Simaria C.D. Block with 64.8 percent. The lowest cultivable area is found in Kunda C.D. Block which is 13.6 percent.

The highest proportion of irrigated area (73.7%) to total cultivable area is found in Lawalaung C.D. Block followed by Simaria C.D. Block with 52.5 percent.

The least proportion of irrigated area is found in Tandwa C.D. Block with 8.9 percent which indicates that the villages in this block are deprived of required irrigational facilities.

Table – 44

The above table gives the details of different categories of educational institutions per ten thousand population in the town of the district.

It would be seen from the above table that institution like Secondary/Matriculation level School and College are situated in Chatra(M) accounting for an average of 2.6 and 0.2 institution per ten thousand population respectively.

Primary School and Middle School account for an average of 3.6 and 1.2 each per ten thousand population.

In Chatra town there is 0.5 Senior Secondary School.

Table – 45

The above table furnishes information regarding availability of beds in medical institution in Chatra town.

The number of beds in medical institutions per ten thousand population for Chatra(M) works out to be 10.

Table – 47

Table 47 presents the most important commodities manufactured in the town and Exported from Chatra(M).

It would be seen from the above table that two item only Leaf Plate is manufactured in the town and also only one item Kendu Leaf Exported from Chatra town.

Table – 49

It would be seen from the above table that of the total rural households maximum proportion of households i.e. 1.4 percent live in temporary houses followed by 14.9 percent living in permanent houses and 84.3 percent living in Semi permanent houses.

In the case of urban households in the district, however, the maximum proportion of household i.e. for 53.5 percent live in permanent house followed by 0.8 percent in temporary houses and 45.7 percent in semi permanent houses.

Among the C.D. Blocks in the district, Kunda and Lawalaung C.D. Block has the maximum proportion of rural lhouseholds living in temporary houses (2.8%) followed by

Hunteraganj C.D. Block with (2.3%). The minimum proportion of households living in temporary houses in Chatra C.D. Block with (0.5%).

In case of permanent houses, Itkhori C.D. Block has the maximum proportion of households living in permanent houses (23.3%) followed by Hunterganj C.D. Blocks (15.8%). Kunda C.D. Block has minimum proportion of households living in permanent houses with (2.1%) percent.

Table – 50

Table 50 shows that of the total rural households 125198 household i.e. 25 percent have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Hunterganj C.D. Block with 45.2 percent where as it is lowest in Tandwa C.D. Block with 10.2 percent.

As regards electricity it is found that only 4.0 percent of the rural households in the district have electricity. The highest proportion of households with Electricity is in Itkhori C.D. Block with 11.3 percent where as it is lowest in Lawalaung C.D. Block with 0.1 percent.

Only 2.6 percent of the rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Pratappur C.D. Block with 3.9 percent where as it lowest in Kunda C.d. Block with 0.3 percent.

Only 5.6 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is in Pratappur and Kunda C.D. Blocks with 8.8 percent where as it is lowest in Lawalaung C.D. Block with 2.2 percent.

Only 29.2 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Simaria C.D. Block with 47.5 percent where as it is lowest in Kunda C.D. Block with 18.6 percent.

Table – 51

Table 51 above shows that 86.1 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using fire wood as fuel for cooking is in Gidhaur C.D. Block (98.8%) where as it is lowest in Tandwa C.D. Block with 67.1 percent.

3.0 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D. Blocks, highest proportion of households using Crop residue as fuel for cooking is 4.8 percent in Hunterganj C.D. Block where as it is lowest (1.6%) in Tandwa C.D. Block.

6.5 percent of the rural households in the district use cowdung cake as fuel for cooking is highest (21.1%) in Itkhori C.D. Block where as it is lowest (0.2%) in Gidhaur and Simaria C.D. Block.

In case of cooking gas (L.P.G.P there are only 1538 households accounting for 1.2 percent of the total households in the district using it for cooking. As regards Kerosene there are only 353 households accounting for 0.3 percent of the total households in the district using it for cooking. Similar trend can be observed in respect of other types of fuel.

Table – 52

It would be seen from the table above that there are 131022 households accounting for 21.4 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in Chatra C.D. Block (26.8%) where as the same is lowest in Kunda C.D. Block (4.7 percent).

There are 36,215 households accounting for 27.6 percent of the total households in the district possessing radio/transistor.

In this regard the highest proportion of households is in Gidhaur and Pathalgora C.D. Blocks (36.2%) where as it is lowest in Lawalaung C.D. Block (18.7%).

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage is to be given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house.

Drainage menas closed and open drainage.
