Annexure VII : Age, sex and education in the district, 1991 Census 388

Annexure VIII: Distribution of different mother tongues returned in 1991 Census 391

Mica Mines,Kodarma

Kodarma district of Jharkhand state has been famous worldwide for mica minning, specially for ruby mica. The district had the monopoly in producing mica for years and the mica was exported to many countries worldwide. The main reserve of mica is found under the forest of mild life sanctuary of Kodarma. Mica is also found in the area of Dhab, Dhodhakola, Khalagthambi, Dibour, Bandarchua, etc.

During sixties, about one lac workers were implied in mica industry and mica minning. It was exported to England, Japan, America and to other European countries on large scale. Mica industry slowly declined due to advent of fibre, a chemical product.

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh , Director of Census Operations Jharkhand. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &
Census Commissioner , India

New Delhi

Preface

The history of District Census Handbooks (DCHB) goes back to the 1951 Census and since then these are brought out after every Census because of their wide ranging utility. Census after Census much innovations/modifications have taken place in the District Census Handbooks in terms of coverage and contents of population data.It, inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective districts. The DCHBs are of immense utility to the planners, administrators, academicians and researchers. It will serve the purpose of the ever increasing demand for the micro-level data.

The District Census Handbook (DCHB) in 2001 Census is made more informative and exhaustive in terms of coverage and content. The content of Village Directory is broadened by including information such as bank, recreational and cultural facilities, newspapers and magazines available in villages. For the first time information on the most important commodity manufactured in village is provided. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town. During 1981 and 1991 Censuses this information was, however, restricted to class I and class II towns only. The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition is analytical notes presented as annexure on important aspects concerning Census data on (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census. The eight digit permanent location code numbers (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to few copies for office use keeping in view the demand of data users.

The District Census Handbooks are brought out in two parts, viz. (i) part A containing the village and town directories and (ii) part B – village and townwise Primary Census Abstracts pertaining to general population. It also contains the District Primary Census Abstracts for Scheduled Castes and the Scheduled Tribes population.

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees.

The analytical note is prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

The work of this project has been initially supervised by Shri Sudhir Kumar Rakesh, IAS, ex-Director of Census Operations , Bihar and Jharkhand. I am deeply indebted to him.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the Deputy Commissioners, the Sub-Divisional Officers, the District Census Officers and the Block Development Officers.

In this office S/Shri Phool Singh, Joint Director , A.K. Saxena, Deputy Director and K.K. Verma, Assistant Director supervised the project at different stages. In this voluminous job valuable assistance was rendered by S/Shri D.P. Choudhary, ADCO(T) , S.K. Das Sudhakar, ex-ADCO(T) and Ramesh Prasad, Statistical Investigator Grade-I who were responsible for supervision from beginning to end. Shri Mauleswar Singh, ex-Assistant Director was associated to monitor the scrutiny work of Village Directory and Town Directory data. Sri K.K. Verma, ex-Assistant Director prepared the first draft under the guidance of Sri S.K. Sinha , ex-Deputy Director. The write-ups on fertility and mortality patterns and migration based on 1991 Census data were contributed by S/Shri D.P. Choudhary, ADCO(T) , S. K. Das Sudhakar, ex-ADCO (T) and U.C. Lal , ADCO (T). S/Shri D.P. Choudhary, ADCO (T) and S.K. Das Sudhakar, Ex-ADCO (T) prepared the analytical notes on inset tables based on the data of Village Directory, Town Directory and Primary Census Abstracts under the guidance of Shri K.K. Verma, ex-Assistant Director. District and C.D. Block Maps were prepared in Map Section under the supervision of Sri M. Guria, Research Officer (Map). S/Shri Asharful Hoda, UDC and Surendra Mohan Prasad, LDC typed the manuscript and Dr. Satyendra Kumar Gupta, Statistical Investigator Grade-I and Shri Sant Ram, Statistical Investigator Grade-II helped in getting the volumes ready. I am thankful to all of them.

I am personally indebted to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India under whose guidance, the project for 2001 Census was finalised. I am sincerly thankful to Sri D.K.Sikri , Additional Secretary (RGI) for his guidance in completing this project on time. I am also indebted to Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General (Social Studies) and Dr. R.P. Singh, ex-Deputy Registrar General (Map) and Sri S.L.Jain , Deputy Director for help and encouragement at different stages on time.

S.C.Tripathi

District Highlights – 2001 Census

1. Kodarma ranks 17th in terms of population (4,99,403) and 17th in terms of area (1,494 sq.km.) in the state of Jharkhand.
2. In terms of population per sq.km. Kodarma is the11th densely populated district in the state with 381 persons per sq.km as against the state's 338.
3. Kodarma ranks 1st in terms of sex-ratio (1,001) against the state's 941.
4. There are 123 uninhabited villages (out of 649 total villages) in the district of Kodarma.
5. Domchanch (under Kodarma C.D. Block) is the most populated village (12,540) and Malkoko (under Kodarma C.D. Block) and Semratanr (under Jainagar C.D. Block) are the least populated villages (1 each) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 60% of the total workers are engaged in Primary sector.
7. C.D. Block Kodarma has the highest number of villages (178) in the district and C.D. Block Satgawan has the lowest number of villages (144).
8. Kothiar (under Satgawan C.D. Block) has the largest area (3,068 hectares) and Paharpur, Nawadpur and Derkurwa (under Satgawan C.D. Block) have the smallest area (1 hectare each) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 89.0 percent of the villages.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as

followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and nowAnchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as

possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Set within lush green area with sylvan atmosphere lying on the one of the northern tips of Jharkhand state mica kingdom is popularly known as gateway of Jharkhand state. The district of Kodarma forms the northern portion of the North Chotanagpur Division of Jharkhand state. Kodarma town is the principal town and administrative headquarters of the district. The newly created district which is only about 7 years of age was formed by trimming off Hazaribag district on 10th April, 1994. Smt. Shila Kisku Rapaz, I.A.S. was posted as a first Deputy Commissioner of the district. Previously Kodarma sub-division of Hazaribag district had 6 C.D. Blocks, viz., Kodarma, Barkatha, Chauparan, Markacho, Jainagar and Satgawan. But surprisingly enough by virtue of notification Kodarma attained districthood confined to only 4 C.D. Blocks, namely, Kodarma, Markacho, Jainagar and Satgawan. Barkatha and Chauparan C.D. Blocks remained tagged with parent district of Hazaribag.

The district is bounded on north by district of Nawada (in Bihar state), on south by district of Hazaribag, on the east by Giridih district and west by districts of Hazaribag and Nawada(in Bihar state). In the course of creation of C.D. Blocks Satgawan Block has been constituted from Jainagar and Chauparan C.D. Blocks. Chauparan is presently within Hazarbag district.

Early History

There is not any authentic recorded history available of the district. Since the district was an integral part of the Hazaribag district till recent past, i.e., 09.04.1994 the history of the district of Kodarma is upto the great extent history of Hazaribag district(old).

In very early times the district was covered with inaccessible hills and forests to which many non-Aryan tribals who refused to surrender to the steadily advancing Aryans, retired at different times. The entire territory of Chotanagpur known as Jharkhand (meaning forest territory) was presumably beyond the pale of direct Hindu influence during ancient India. However ,Jarasandh, the mighty emperor of Rajgrih in the Mahabharat period might have exercised some kind of loose supervision over the area. Similarly, Mahapadmanad Ugrasen of Magadh who subdued the entire country up to Orrisa might have gained some control over Jharkhand as well. Possibly the area was included in Magadhan empire in the reign of Ashok (273-232 B.C)

There is evidence to show that this tract was in touch with many other parts of India. With the decline of Mauryan power king Kharavela of Kalinga led an army through Jharkhand and ransacked Rajgrih and Pataliputra. Later, Samudragupta (335-380A.D.) must have passed through the area on his expedition to the Deccan. The Chinese traveller Itsing is believed to have journeyed through the Chotanagpur plateau on his travel to Nalanda and Bodh Gaya.

The Chotanagpur Raj is believed to have been set up in 5th century A.D. after the fall of the imperial Guptas. Phanimukut was elected the first king. It is said that just after his birth, he had been found by the side of a tank under the protection of huge 'nag' or serpent. For this reason the scions of the dynasty founded by him called themselves 'Nag Vanshi' or member of the 'Naga dynasty'.

Archaeological remains are found at Ghorsima in the district of Kodarma.

Muslim Period

The entire Chotanagpur plateau was referred to as Jharkhand by Mohammedan historians. Throughout the Turko-Afghan period up to 1526, the area remained virtually free from external influence. It was only with accession of Akbar to the throne of Delhi in 1556, the Muslim influence penetrated into Jharkhand, then known to the Mughals as Kokrah. In 1585 Akbar sent a force under the command of Shahabaz Khan to reduce the Raja of Chotanagpur to the position of a tributary. It is mentioned in the "Ain-e-Akbari" that Chotanagpur or Kokrah was included in the 'Subah of Bihar'.

After the death of Akbar in 1605 the area presumably regained its independence. This necessitated an expedition in 1616 by Ibrahim Khan

Fateh Jung, the Governor of Bihar and brother of Queen Noorjahan. Ibrahim Khan defeated and captured Durjan Sal the 46th Raja of Chotanagpur. He was imprisoned for 12 years but was later released and reinstated on the throne after he had shown his ability in distinguishing a real diamond from a fake one. The annual tribute to be paid by him was fixed at Rs.6000. In 1632 Chotanagpur was given as 'Jagir' to the Governor of Patna for an annual payment of Rs. 1,36,000. This was raised to Rs. 1,61,000 in 1636 A.D. During the reign of Muhammad Sah (1719-1745), Sarballand Khan, the Governor of Bihar, marched against the Raja of Chotanagapur and obtained his submission. Another expedition was led by Fakhruddoula, the Governor of Bihar in 1731. He came to terms with the Raja of Ramgarh who owned allegiance to the Raja of Chotanagpur. In 1735 Alivardi Khan had some difficulty in enforcing the payment of the annual tribute of Rs. 12,600 from the Raja of Ramgarh, as agreed to by the later according to the terms settled with Fakhruddoula. This situation continued until the occupation of the country by the Britishers. During the Muslim period, the main estates in the district were Ramgarh, Kunda, Kendi, Chai and Kharagdiha.

British Period

The Diwani of Bengal, Bihar and Orrisa was granted by Emperor Shah Alam II to the East India Company in 1765. The Diwani included Chotanagpur as a part of Bihar. .Hence, the East India Company derived the right to collect revenue or tribute.

The British came in contact with Hazaribag for the first time in 1769 when Capt. Camac visited Hazaribag to establish some sort of order in the "Jungleterry" district. The importance of Ramgarh increased with the rise of Maratha power in 1761-62 under Madhav Rao.In 1771 Capt. Camac was made the Military Collector of Ramgarh .

The tribute of the Raja of Chotanagpur was being paid through the Raja Ramgarh. This was, however, discontinued and since the British were dissatisfied with Mukund Singh, the Raja of Ramgarh at that time, they supported one Tej Singh a claimant to the Ramgarh throne. The forces under Lt. Goddard defeated Mukund Singh. Tej Singh was then installed as first throne and ultimately became the Raja. He transferred his capital to Ichak.

Capt. Camac was succeeded, in 1780, by Chapman, the first civilian administrator of Chotanagpur. The Ramgarh battalion consisting of Indian infantry men was raised in his time and stationed at Hazaribag.

Subsequent to the Kol rising in 1831 which, however, did not seriously affect Kodarma, the administrative structure of the territory was changed. The parganas Ramgarh, Kharagdiha, Kendi and Kunda of Hazaribag(old) became parts of the south west frontier agency and formed into a division named Hazaribag with Hazaribag as the administrative headquarters. In 1854 the designation of the south west Frontier agency was changed to Chutia Nagpur and it began to be administrered as Non-regulation province under Lt. Governor of Bihar. In 1855-56 there was the great uprising of the Santalis against the British but it was brutally suppressed.

1857 Revolt

As there was no Kodarma district during the gareat National revolt of 1857 the willing people of Kodarma contributed their might through the then Hazaribag district. Kodarma played an important role in the revolt of 1857. The Ramgarh battalion at Hazaribag rose in revolt on the 30th July. The Deputy Commissioner, Capt Simpson alongwith some other Europeans fled on foot to Ichak. Capt. Dalton,the Commissioner of Ranchi sent Lt. Graham with detachment of the Ramgarh Light Infantry to disarm the regiment at Hazaribag . But this detachment also mutinied and hurried back to Ranchi by the road via Badam. Capt. Dalton evacuated the Europeans of Ranchi to Hazaribag and to Bagodar. When Davis took charge of Hazaribag on 4th August he found the treasury empty and the records partially destroyed. However, Hazaribag was reoccupied by Dalton with the help of Sikh regiment under Col. Rattary. The insurgents, there after, did not receive much support in Hazaribag and very little in Ranchi. Hence, they started out to join Kuer Singh but were attacked and defeated on the 2nd October,1857 at Chatra by a British force Commanded by Major English. The revolt in Hazaribag was thus crushed. This sporadic uprisings of the Santals in the wake of their earlier efforts were also checked ruthlessly.

The Non-co-operation Movement in 1920 influenced Kodarma district. Many students gave up their studies, and some lawyers their practice, to join the movement. Mahatma Gandhi visited the Hazaribag district in 1925. A large number of people participated in the Civil-Disobedience Movement of 1930. In the 1937 elections, the Congress party swept the polls in the district. The 53rd annual session of the Indian National Congress was held at Ramgarh in 1940. In the movement of 1942 also, there was large-scale participation by the people. The district of Koderma has, thus, played a prominent role in the freedom struggle of the country.

(iii) Administrative set up

It has already been mentioned that the district lies in the North Chotanagpur Division. The district administration is headed by the Deputy Commissioner. He belongs to I.A.S. cadre. He is assisted by a lot of officers mostly belonging to Jharkhand Public Service Commission. Police Administration is looked after by the Supdt. of the Police. For the administrative convenience the district has been divided into one sub-division, viz.,Kodarma and 4 C. D. Blocks.C.D. Blocks like sub-division are run under officers generally drawn from J.P.S.C. cadre.

Judicial Administration : The Judges and Munshif magistrates are posted at district and sub-division who administer and deliver justice of different kinds. The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Koderma is the head of the district police administration. The Deputy Superintendent of Police is posted to assist the Police Superintendent who is either from the Indian Police Service or the Jharkand Police Service. In the subdivision of the district, the Deputy Superintendent of Police is posted who keeps control on police administration.

(iv)Physical Features

The district forms part of Chotanagpur plateau. It is region of plateaus, residual hills and intermittent valley which occupy the most of the State of Jharkhand.

The district may be divided into two following broad natural divisions.

(i) The hilly tract, and

(ii) The valley.

Hills are generally tree-clad while some are barren as well. Valley is fit for human inhabitation and cultivation.

River

The Barakar rises in cultivatd fields near Ichak(in Hazaribag district), 11 kms. north of Hazaribag. It flows in Kodarma district as well. On the Barakar river famous Tilaiya Dam had been constructed by Damodar Valley Corporation. The foundation stone of the dam was laid by J.L. Nehru, the 1st Prime Minister of India. Dam is being maintained by D.V.C.

Climatic conditions

The district comes within the tropical monsoon region. The climate of Kodarma is much the same as that of Hazaribag , a bit differing from the other neighbouring districts. It is quite cold during the winter but not very hot during the summer. Three broad seasons can be categorized as:

(i) The cold season	-	November to February
(ii) The hot season	-	March to May
(iii) the rainy season	-	June to September

After the break of the rains in June, the first three months are usually quite pleasant. In the winter season the only drawback is the occasional excessive cold which grips the district. If there is some winter rain also the district remains cool till the middle of March. From April to the onset of monsoon, the day temperature remains a bit high and the nights are rarely oppressive. The hot weather winds are sometime dust-laden.

Rains set in June and last till September. Occasional winter rains between November and middle of February though scanty, cause cold spells.

Flora and Fauna

Kodarma is predominantly forest district and about 60.5 per cent of the total area is covered by forest (i.e. out of 131995.95 hectare of total area

79855.79 hectare is forest area) which are distributed almost uniformly throughout the district. The district is full with or without tree-clad hills or rocks, which provide lush green panoramic scenery with sylvan atmosphere.

Sal is the most famous and predominant species of tree in the jungles of the district. Among other common species are Bamboo, Khair, Gamhar, Salai, Semal, Mahua, Tamrind, Mango, Black-berry Peepal, Karanj, Jack-fruit, Margosa (Neem)., Kusum, Palas, Kend, Asan, Piar and Bhelwa.

Hyenas, jackal, foxes, pigs and hares are fairly common in most localities. Sambhar, spotted deer, hogdeer, four-horned deer and ravine deer are also found. Snakes and lizards are quite common.

Mines and Minerals

The district is famous for mica in the world. MITCO and Mining Institute are running in the district under cental and state Govt. respectively taking into account a broader perspective and possibilities in the field of mines and minerals. Ironically, production of mica has come down these days. The district is richly endowed with other precious stones as well.

Land use pattern

The district is mostly covered by hills and jungles. The total area of the district is 131995.95 hectare under which agricultural land is 37498 hectare. In other words culturable area forms about 28 per cent of the total area of the district. The major portion of the land is under forest area. The soil is acidic and the topography almost high and low making slopes. The major part of the land suffers from soil erosion rendering soil unfit for cultivation. Schemes for land leveling and prevention of soil-erosion have been taken up by district authorities.The main agricultural season in the district are Kharif and Rabi. The Kharif season starts from the third week of May and lasts till the end of October followed by Rabi season. Paddy is the main crop of the district and rice is the main staple food. Other important crops grown are bajra, maize, pulse such as red gram, arhar, etc.

Irrigation Facilities

Irrigation plays an important role in the agricultural economy of any district. However, in Kodarma district, due to the hilly topograph of the area, there is not much scope for exploitation of surface water. The Agriculture being rain based alternative arrangements for irrigation are being provided by constructing tanks deepwells lift irrigation and Chekdam, chek.Under watershed management scheme the development of land & water resources through people's participation have been undertaken.

Livestock

The term 'livestock' includes cattle (cows, bulls and bullocks), buffaloes, sheep, goats and pigs, The average yield of milk of the cows of the district is very poor. Bullocks and buffaloes are also of small stature. They are not suitable for hard ploughing.The bulls are of inferior strain. A veterinary hospital is opened at sub-divisional level. Grade I veterinary hospital and territorial hospital are also available at blocks level in the district.

Fisheries

The Baraker river is hilly. There are not regular big fisheries in the river. Fish trade is in the hands of fishermen who are located in Kodarma town.

Industrialisation

The main occupation of the people of Kodarma is cultivation but industries in the district are growing. There are rich mineral deposits in the district.Mica is the most important mineral found in abundance. Mica layer separation is done by hand which is finer than machine separated layer.Mica based industry is functioning at Chandwara, known as mica city which is 15 kms. away from the district headquarters. District credit plan envisages to cover small scale industries in the district. No remarkable achievement appears in this field and hence the district is far behind from industrial point of view.

Communication

The district headquarters is on rail-head. Kodarma railway station is an important railway station. Construction of a rail-line between Kodarma and Barkakana via Hazaribag is being taken up. The town is connected with many important cities through railways.

As Kodarma lies almost on the middle of the

Patna (state headquarters of present & old Bihar) and Ranchi (state headquarters of present Jharkhand) and occupies the northern boarder of the Jharkhand state and it is known as gateway of Jharkhand.

Just after entering into boarder of the district it appears that trees and leaves are inclined to make warm reception. Flowers of variegated colours with fascinating look usually attract the travelers by spreading fragrance. Valley and hills along the road covering 25 kms. distance standing with firmness seem to give message: "Be firm in ideas and action with studied adaptability and serenity".

Trade & Commerce

There are less number of organized markets in the district and sale and purchase in the rural areas usually take place in the hats/markets spread over whole of the district. The hats are the local markets where the local produce is generally bought and sold Within the district of Kodarma, the markets of lesser importance are Satgawan, Jainagar & Jhumri Tilaiya. Fairs are also important centres for the agricultural market.

Trade in Kodarma district consists mainly of export of mica, glass-sheets, etc., and import of kerosene oil, petrol, sugar, iron and steel, cement, salt, hardware, motor parts, food stuff, edible oil, clothes, etc.

Electricity and Power:

The Damodar Valley Corporation, which had constructed and since then maintaining Tenu Dam, has made power available in certain areas. Electrification has been made available to nearly 334 villages out of which 118 villages could not get electricity for the last 3 years. The State Electricity Board has created a circle office at Hazaribag for providing electric facilities to people of Kodarma as well.

Co-operative Society

Community Development Block level co-operative societies have been formed in the district. Through which co-operative bank provides agricultural loan to members of concerned PACS as detailed:

Name of C.D. Block	Number of members	Number of PACS
1	2	3
Kodarma	1,141	12
Jainagar	1,258	10
Markacho	917	10
Satgawan	800	4
Total	4,116	36

Education

For human development education is one of the key indicators. To cater the needs of people following schools and colleges are being run in the district:

Primary School	61
Middle School	61
High School	
(including project Girls High School)	16(11+5)
Inter College	02
College	03
Womens College	01
Buildingless School	08
Landless School	17

Medical Facilities

To extend medical facilities to the people Govt. have provided one subdivisional hospital alongwith team of doctors at district headquarters. 4 P.H.C., 62 A.P.H.C. and 5 A.P.H.S.C. are also running at each C.D. Block and some village level.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used

for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has

to be considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and

therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i)A minimum population of 5,000;

ii)at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

UrbanAgglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following

criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Jharkhand are given below :

Scheduled Castes :

1. Bantar

2. Bauri
3. Bhogta
4. Bhuiya
5. Bhumij
6. Chamar,Mochi
7. Chaupal
8. Dabgar
9. Dhobi
10. Dom,Dhanger
11. Dusadh,Dhari,Dharhi
12. Ghasi
13. Halalkhor
14. Hari,Mehtar,Bhangi
15. Kanjar
16. Kurariyar
17. Lalbegi
18. Musahar
19. Nat
20. Pan,Swasi
21. Pasi
22. Rajwar
23. Turi

8. Birjia
9. Chero
10. Chik Baraik
11. Gond
12. Gorait
13. Ho
14. Karmali
15. Kharia
16. Kharwar
17. Khond
18. Kisan
19. Kora
20. Korwa
21. Lohara,Lohra
22. Mahli
23. Mal Paharia
24. Munda
25. Oraon
26. Parhiya
27. Santal
28. Sauria Paharia
29. Savar

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Binjhia
7. Birhor

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that

the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.—A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as

an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age

span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Pre-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births}} \times 1{,}000$$

during the year

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii)

Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

The population of the Hazaribag district (from which the district of Kodarma was carved out) during 1991 was 2,843,544. Hindus constitute over 85 per cent (2,434,245 persons) of the population in the district followed by Muslims 13.2 percent (374,493 persons). All other four major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Hazaribag district (from which the district of Kodarma was carved out) during 1991 was 2,843,544. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census.

Note on important SCs and STs in the district of Kodarma during 1991 Census.

The population of the Scheduled Castes in the district of Hazaribag(from which Kodarma is carved

out) was 537,157 according to 1991 Census. Numerically, the five most prominent SCs in the district were (i) Bhuyia (190,033), (ii) Chamar, Mochi (120,452), (iii)Bhogta (74,028) (iv) Dusadh, Dhari and Dharhi (51,509) and (v) Dhobi (26,906). While Bhuiya constituted the maximum proportion of Scheduled Castes populaton, the percentage being 35.4(more than one third of the total SC population), Chamar and Bhogta , though numerically second and third in order comprised only 22.4 and 13.8 percent of the SC population in the district. Dusadh comprised 9.6 percent of the SC population in the district though numerically forth position of SC population in the district and Dhobi is much less in number as compared to the other four SCs mentioned above with only 5.0 percent of the total SC population of the district. Remaining Scheduled Castes were comparatively very less in number than the five SCs described above as their percentage to total SC population was less than even 2.0 percent except Turi and Rajwar whose percentages were 4.4 and 2.1 respectively.

The population of the Scheduled Tribes in the district of Hazaribag(from which Kodarma is carved out) during 1991 Census was 250,586. Numerically, the five important STs were namely (i) Santal (ii) Munda (iii) Oraon (iv) Bedia and (v) Karmali. Santal had 60,633 population which constituted 24.2 percent of the Scheduled Tribes population in the district. Munda with 52,254 population constituted 20.9 percent of the ST population. Oraon, which were 45,839 in number constituted 18.3 percent of the ST population. Bedia comprised 36,938 persons and constituted 14.7 percent of ST population while Karmali with 28,925 population constituted 11.5 percent of the total ST populaton in the district. The other Scheduled Tribes were almost negligible in proportion except Mali, Birhor, Lohara/Lohra and Kharwar whose percentages were 2.9, 1.4, 1.3 and 1.0 respectively.

(vii) 2001 Census Findings–Population and its Distribution

According to the 2001 Census, the total population of Kodarma district is 4,99,403 comprising 2,49,549 Males and 2,49,854 Females and constituting 1.9 percent of the State population spread over 1.6 percent of the area of the State in the 4 C.D.Blocks of the district. Kodarma is the most populous where as Satgawan is the least populated C.D. Block in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

Brief Analysis of PCA Data based on inset tables 1 to 36

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCKS BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001
1	Satgawan	44,314	44,314	0	55,816	55,816	0	26.0	26.0	0.0	0.0	0.0
2	Kodarma	173,527	107,286	66,241	221,147	134,398	86,749	27.4	25.3	31.0	38.2	39.2
3	Jainagar	95,922	95,922	0	119,961	119,961	0	25.1	25.1	0.0	0.0	0.0
4	Markacho	81,000	81,000	0	102,479	102,479	0	26.5	26.5	0.0	0.0	0.0
	District Total:	**394,763**	**328,522**	**66,241**	**499,403**	**412,654**	**86,749**	**26.5**	**25.6**	**31.0**	**38.2**	**17.4**

Table-1 shows that rise in the population of Koderma district during 1991-2001 has been of the order of 26.5 percent. The rural population in the district has increased by 25.6 percent while the urban population growth over the decade has been as much as 31.0 percent. Among the CD Blocks Koderma has shown the highest increase in population over the decade with 27.4 percent. It may be due to the fact that Koderma town, the district head quarters, is located in this CD Block. The next highest increase in population is observed in Markacho CD Block with 26.5 percent followed by Satgawan CD Block with 26.5 percent, while Jainagar CD Block with 25.1 percent decadal growth in total population stood lowest. The increase in rural population during 1991-2001 has been highest in Markacho CD Block with 26.5 percent while lowest 25.1 percent has been registered in Jainagar CD Block

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/C.D. Block	Total number of inhabited villages	Total rural population Persons	Males	Females	Number and percentage of villages	Population less than 200 Males	Females
1	2	3	4	5	6	7	8	9
1	Satgawan	112	55,816	27,974	27,842	36 (32.1)	1,412	1,400
2	Kodarma	142	134,398	67,413	66,985	32 (22.5)	1,668	1,654

3	Jainagar	11 (8.0)	15,869	14,909	1 (0.7)	3,250	3,267	0 (0.0)	0	0
4	Markacho	9 (6.7)	12,151	13,036	0 (0.0)	0	0	1 (0.7)	5,368	5,592
	Districts (Rural) Total:34 (6.5)		**47,494**	**46,814**	**3 (0.6)**	**9,382**	**9,202**	**2 (0.4)**	**11,712**	**11,788**

It may be observed in the table 2 that the maximum number of villages in the district lie in the population range of 200-499 accounting for 30.4 percent of the total inhabited villages closely followed by villages in the population range of 500-999 accounting for 27.6 percent of the total inhabited villages. The percentages of population in the above two population ranges are 12.8 percent and 25.3 percent of the total rural population of the district respectively. The villages in the population range of less than 200 constitute 19.2 percent of the total inhabited villages and in these villages the percentage of population is only 2.2 percent. There are 81 villages in the population range of 1000-1999 accounting for 15.4 percent of the total inhabited villages and in these villages the percentage of population is 26.6 percent of the total rural population. There are 34 villages in the population range of 2000-4999 accounting for 6.5 percent of the total inhabited villages and in these villages the percentage of population is 22.9 percent of the total rural population. There are only 3 villages in the population range of 5000-9999 accounting for 0.6 percent of the total inhabited villages and in these villages the percentage of population is 4.5 percent. There are only 2 villages in the highest population range of 10000 and above accounting for only 0.4 percent of the total inhabited villages and in these villages the percentage of population is 5.7.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicable in respect of Kodarma district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	6	1.1	408	0.1
11-20	10	1.9	855	0.2
21-50	36	6.8	6,284	1.5
51-100	33	6.3	8,330	2.0
101-200	47	8.9	14,742	3.6
201-300	52	9.9	28,892	7.0
301-500	102	19.4	79,542	19.3
501 +	240	45.6	273,601	66.3
Not known	0	0.0	0	0.0
District Total:	**526**	**100.0**	**412,654**	**100.0**
Population Density (Rural) of the district:			**383.4**	

The data presented in the above table highlight the fact that maximum proportion of villages in Koderma district lies in the density range (per square kilometer) of 501+ with 45.6 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 19.4 percent. It would further be seen that 52 villages fall in the density range of 201-300 which account for 9.9 percent of the total inhabited villages.

Maximum number of villages fall in the density range of 501+ covering 66.3 percent of the total population followed by villages in the density range of 301-500 which account for 19.3 percent of the population. 47 villages fall in the density range of 101-200 which account for 8.9 percent of the inhabited villages and these villages cover 3.6 percent of the population . Again 36 villages fall in the density range of 21-50 accounting for 6.8 percent of the inhabited villages. These villages account for 1.5 percent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

	State			District		
Census Year	Toatal	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,032	1,034	955	1,066	1,066	0
1911	1,021	1,024	913	1,048	1,048	0
1921	1,002	1,010	809	1,046	1,046	0
1931	989	998	792	1,018	1,018	0
1941	978	990	792	991	991	0
1951	961	976	803	1,053	1,070	783
1961	960	987	772	1,016	1,040	838
1971	945	982	769	1,030	1,067	880
1981	940	977	804	1,034	1,063	854
1991	922	950	826	986	1,009	877
2001	941	962	870	1,001	1,027	887

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table–5 shows that sex ratio for the urban areas of Kodarma district is comparatively high as compared to the urban areas of the state during 1991 and 2001 censuses. However, on the other hand, the sex ratio for the rural areas of the district is also found to be comparatively high as compared to the state during 1991-2001 censuses. It has already been discussed that district of Koderma was created after 1991 census. It is found that in case of sex ratio in the total population in the district it is higher than the sex ratio of the state of Jharkhand both in 1991 and 2001 censuses.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Satgawan	995	995	
2	Kodarma	950	994	887
3	Jainagar	1,017	1,017	
4	Markacho	1,104	1,104	
	District Total:	**1,001**	**1,027**	**887**

Note : Analysis of table is missing.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio
1	2	3
1	Satgawan	995
2	Kodarma	994
3	Jainagar	1,017
4	Markacho	1,104
	District (Rural) Total:	**1,027**

As for rural in Koderma district there are 1027 females for every thousand males. Within the district the sex ratio varies from 1104 in Markacho CD Block to 994 in Koderma CD Block. The sex ratios of Satgawan and Jainagar CD Blocks are 995 and 1017 respectively. The sex ratio of Markacho CD Block is highesr than the district rural average of 1027 while Satgawan (995), Koderma (994) and Jainagar (1017) CD Blocks have sex ratios below the district rural average.

TABLE 8: SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	10	1.9	4,798	1.2
700-749	4	0.8	377	0.1
750-799	9	1.7	4,300	1.0
800-849	16	3.0	4,458	1.1
850-899	34	6.5	16,125	3.9
900-949	70	13.3	59,067	14.3
950-999	74	14.1	83,637	20.3
1000-1099	148	28.1	133,214	32.3
1100+	161	30.6	106,678	25.9
District Total:	**526**	**100.0**	**412,654**	**100.0**
Sex ratio (Rural) for District:			**1,027**	

It is observed in the Table-8 that the maximum proportion of villages in Kodarma district lies in the very favorable sex ratio range of 1100+ and these villages account for 30.6 percent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 25.9 percent of the district rural population. 148 villages (28.1%) fall in the favorable sex ratio range of 1000-1099 and these villages account for 32.3 percent of the rural population of the district. 74 villages (14.1 %) are in the sex ratio range 950-999 and these villages account for 20.3 percent of the rural population. 70 villages (13.3 %) fall in the sex ratio range of 900-949 and these villages account for 14.3 percent of the rural population. 34 villages (6.5 %) are in the sex ratio range of 850-899 and these villages account for 3.9 percent of the rural population. 16 villages (3.0 %) are in the unfavorable sex ratio range of 800-849 and these villages account for only 1.1 percent of the rural population. 10 villages (1.9 %) are in the very unfavorable sex ratio range of less than 700 and these villages account for 1.2 percent of the rural population

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A/ Town	Urban status of town	Sex ratio
1	2	3	4
1	Kodarma (NA)		881
2	Jhumri Tilaiya (M)		888
Sex ratio (Urban) for the district:			**887**

There is no urban agglomeration in Koderma district. There are two urban units i.e. Koderma (NA) and Jhumri Tilaiya (M). The sex ratio of Koderma (NA) is 881 while the sex ratio of Jhumri Tilaiya (M) is 888.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total/ Rural/ Urban	Total population in 0-6 age group			Sex-ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Satgawan	Total	11,584	5,925	5,659	955
		Rural	11,584	5,925	5,659	955
		Urban	0	0	0	
2	Kodarma	Total	42,118	21,398	20,720	968
		Rural	27,574	13,885	13,689	986
		Urban	14,544	7,513	7,031	936
3	Jainagar	Total	25,496	12,923	12,573	973
		Rural	25,496	12,923	12,573	973
		Urban	0	0	0	
4	Markacho	Total	22,714	11,365	11,349	999
		Rural	22,714	11,365	11,349	999
		Urban	0	0	0	
	District Total:	**Total**	**101,912**	**51,611**	**50,301**	**975**
		Rural	**87,368**	**44,098**	**43,270**	**981**

It is observed from the above table that the sex ratio in the age group 0-6 in the district varies from 999 in Markacho CD Block to 955 in Satgawan CD Block. The sex ratio in the age group 0-6 of Koderma CD Block is 968 while the sex ratio of Jainagar CD Block is 973. The sex ratio of Markachho CD Block is higher than the district total and rural averages while the sex ratios of Satgawan, Koderma and Jainagar CD Blocks are lower than the district total and rural averages.

The urban sex ratio of Koderma district is lower than the total and rural sex ratios of the district.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population in 0-6 age group			Sex-ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Satgawan	11,584	5,925	5,659	955
2	Kodarma	27,574	13,885	13,689	986
3	Jainagar	25,496	12,923	12,573	973
4	Markacho	22,714	11,365	11,349	999
	District (Rural) Total:	**87,368**	**44,098**	**43,270**	**981**

It is observed in table-11 that the sex ratio in the age group 0-6 among the rural population in the CD Blocks of the district varies from 999 in Markacho CD Block to 955 in Satgawan CD Block. The sex ratio of Jainagar CD Block is 973 while the sex ratio of Koderma CD Block is 986. The sex ratio figures of Koderma and Markacho CD Blocks are higher than the district average while Satgawan and Jainagar CD Blocks have the sex ratios below the district average.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	51	9.7	2,512	2.9
700-749	17	3.2	1,456	1.7
750-799	26	4.9	3,089	3.5
800-849	43	8.2	7,681	8.8
850-899	36	6.8	6,592	7.5
900-949	55	10.5	11,786	13.5
950-999	38	7.2	12,189	14.0
1000-1099	119	22.6	26,559	30.4
1100+	141	26.8	15,504	17.7
District (Rural) Total	**526**	**100.0**	**87,368**	**100.0**
Sex ratio (Rural) for District:		**981**		

It is observed in the above table that 26.8 percent of inhabited villages in Koderma district lies in the sex ratio range of 1100+ in the age group 0-6. 119 villages (22.6 %) fall in the sex ratio range of 1000-1099 in the age group 0-6. 55 villages (10.5 %) are in the sex ratio range of 900-949. 51 villages (9.7 %) are in the sex ratio range of less than 700 and 43 villages (8.2 %) are in the sex ratio range of 800-849. 38 villages (7.2 %) are in the sex ratio range of 950-999. These villages constitute 14.0 percent of the rural population of the district. There are 36 villages (6.8 percent) in the district which lie in the unfavorable sex ratio range 850-899. These villages account for 7.5 percent of the rural population of the district. There are 26 villages (4.9%) in the district having very unfavorable sex ratio range of 750-799 which account for 3.5 percent of the rural population of the district.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION/TOWNS, 2001

Serial number	Name of UA/Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Kodarma	NA	2,994	1,573	1,421	903
2	Jhumri Tilaiya	M	11,550	5,940	5,610	944
	District(Urban) Total		**14,544**	**7,513**	**7,031**	**936**

There is no urban agglomeration in Koderma district. There are two statutory towns in Koderma district i.e. Koderma (NA) and Jhumri Tilaiya (M). The sex ratio in the age group 0-6 of Koderma (NA) is 903 while the sex ratio of Jhumri Tilaiya (M) is 944 which is higher than the district urban average.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total/ Rural/ Urban	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Cates population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7	8
1	Satgawan	Total	55,816	11,940	342	21.4	0.6
		Rural	55,816	11,940	342	21.4	0.6
		Urban	0	0	0	0	0
2	Kodarma	Total	221,147	29,505	1,807	13.3	0.8
		Rural	134,398	20,501	1,316	15.3	1
		Urban	86,749	9,004	491	10.4	0.6
3	Jainagar	Total	119,961	18,027	268	15	0.2
		Rural	119,961	18,027	268	15	0.2
		Urban	0	0	0	0	0
4	Markacho	Total	102,479	12,223	1,650	11.9	1.6
		Rural	102,479	12,223	1,650	11.9	1.6
		Urban	0	0	0	0	0
District Total:		**Total**	**499,403**	**71,695**	**4,067**	**14.4**	**0.8**
		Rural	**412,654**	**62,691**	**3,576**	**15.2**	**0.9**
		Urban	**86,749**	**9,004**	**491**	**10.4**	**0.6**

The above table shows that the percentage of scheduled castes in Koderma district is 14.4 percent of the total population in the district. Within the district highest percentage of scheduled castes population is in Satgawan C.D. Block with 21.4 percent closely followed by Jainagar, Koderma, and Markachho C.D. Blocks with 15.0, 13.3 and 11.9 percent respectively. The percentage of scheduled castes population in Koderma district for the urban areas is 10.4 percent which is lower than the rural areas (15.2%). The percentages of Scheduled Tribes population in the Markachho and Koderma C.D. Blocks are 1.6 percent and 0.8 percent respectively. In the rest of the C.D. Blocks in Koderma district, the percentage of Scheduled Tribes population is almost negligible.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Cates population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Satgawan	55,816	11,940	342	21.4	0.6
2	Kodarma	134,398	20,501	1,316	15.3	1
3	Jainagar	119,961	18,027	268	15	0.2
4	Markacho	102,479	12,223	1,650	11.9	1.6
	District (Rural) Total:	**412,654**	**62,691**	**3,576**	**15.2**	**0.9**

The above table indicated that the percentage of the scheduled castes in Koderma district is of the order of 15.2 percent of the total population. The highest percentage of scheduled castes population. The highest percentage of Scheduled caste population is in Satgawan CD Block with 21.4 percent of the total population closely followed by Koderma, Jainagar and Markacho CD Blocks with 15.3,15.0 and 11.9 percent respectively. The percentages of Scheduled Castes population in Satagwan and Koderma CD Blocks are higher than the district rural average (15.2 %). The percentage of Scheduled Tribes population

in the CD Blocks of Koderma district is 0.9 percent of the total population. The highest percentage of Scheduled Tribes population is in Markacho CD Block with 1.6 percent and the lowest percentage of Scheduled Tribes population is in Jainagar CD Block with 0.2 percent.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Sceduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	176	33.5	0	0.0
Less than 5	40	7.6	596	1.0
5-10	68	12.9	8,307	13.3
11-20	98	18.6	18,899	30.1
21-30	56	10.6	14,577	23.3
31-40	31	5.9	8,441	13.5
41-50	17	3.2	5,323	8.5
51-75	22	4.2	4,846	7.7
76 and above	18	3.4	1,702	2.7
District Total	**526**	**100.0**	**62,691**	**100.0**

From the table above , it is apparent that there are 98 villages accounting for 18.6 percent of the inhabited villages in the district where the population of the Scheduled Castes ranges between 11 and 20 percent of total population. This is closely followed by villages where the population of the scheduled castes ranges between 5 and 10 percent of the total population. These 68 villages account for 12.9 percent of the total inhabited villages. There are 56 villages which account for 10.6 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 21 and 30 percent. There are 40 villages which constitute 7.6 percent of the inhabited villages where the percentage of scheduled castes population to total population is less than 5 percent. 22 villages are such which constitute 4.2 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 51 and 75 percent. There is no scheduled castes population in 33.5 percent of the inhabited villages in the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Sceduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	432	82.1	0	0.0
Less than 5	49	9.3	487	13.6
5-10	13	2.5	445	12.4
11-20	5	1.0	361	10.1
21-30	7	1.3	342	9.6
31-40	0	0.0	0	0.0
41-50	2	0.4	95	2.7
51-75	5	1.0	696	19.5
76 and above	13	2.5	1,150	32.2
District Total	**526**	**100.0**	**3,576**	**100.0**

It can be seen from the above table that there are 49 villages accounting for 9.3 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is less than 5. There are only 13 villages accounting for only 2.5 percent of the inhabited villages where the percentage of Scheduled Tribes population to total population is between 5 and 10. There are as many as 432 villages accounting for 82.1 percent of the inhabited villages in the district which have no Scheduled Tribes population.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Kodarma (NA)	17,246	2,282	234	13.2	1.4
2	Jhumri Tilaiya (M)	69,503	6,722	257	9.7	0.4
	District(Urban) Total	**86,749**	**9,004**	**491**	**10.4**	**0.6**

It is apparent from the above table that there is no urban agglomeration in Koderma district. There are only two statutory towns in the district i.e., Koderma (NA) and Jhumri Tilaiya (M). The percentage of Scheduled Castes population to total population is 13.2 in Koderma (NA) which is higher than the Jhumri Tilaiya (M) (9.7) . While the percentage of Scheduled Tribes population to total population is 1.4 in Koderma (NA) which is higher than the Jhumri Tilaiya (M) (0.4) as has been observed in the above table.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C.D. block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Satgawan	976	1,012
2	Kodarma	1,014	896
3	Jainagar	1,077	696
4	Markacho	1,158	881
	District (Rural) Total	**1,051**	**883**

The above table shows that the sex ratio of scheduled castes varies from 1158 in Markacho CD Block to 976 in Satgawan CD Block. The sex ratio in Jainagar CD Block is 1077 while the sex ratio of Koderma is 1014. The sex ratio figures of Satgawan and Koderma CD Blocks are lower than the district average.

The sex ratio of Scheduled Tribes varies from 1012 in Satgawan CD Block to 696 in Jainagar CD Block. The sex ratio figures of Scheduled Tribes in Markacho and Jainagar CD Blocks are below the district average.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of U.A./Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Kodarma (NA)	945	814
2	Jhumri Tilaiya (M)	922	1,056
Sex ratio (Urban) for the district:		**928**	**933**

There is no urban agglomeration in Koderma district. There are two statutory towns in the district i.e. Koderma (NA) and Jumri Tilaiya (M). The sex ratio of Scheduled Castes in Koderma is 945 while the sex ratio of Scheduled Castes in Jhumri Tilaiya (M) is 922. The sex ratio of Scheduled Tribes of Koderma (NA) is 814 while the sex ratio of scheduled tribes in Jhumri Tilaiya (M) is 1056 according to 2001 census.

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY C.D.BLOCKS,2001

	District (Rural) Total:	**154,181**	**107,975**	**46,206**	**258,473**	**95,598**	**162,875**	**47.4**	**67.7**	**27.9**	**39.8**

Table 21 and 22 show that among the C.D. Blocks in the district Jainagar C.D. Block has the highest proportion of literate population (49.4 %) followed by Koderma C.D. Block (49.3 %). The literacy rates for Satgawan and Markacho C.D. Blocks are 46.4 and 43 percent respectively. Male literates out number female literates in all C.D. Blocks of Koderma district. The highest proportion of male literates is in Jainagar C.D. Block with 70.7 percent closely followed by Koderma, Satgawan and Markachho C.D. Blocks with 68.2, 64.0 and 65.5 percent respectively. Koderma C.D. Block has the highest fmale literacy rate with 30.3 percent while Markacho C.D. Block has the lowest literacy rate among the females with 23.2 percent. Male literacy rates for Koderma and Jainagar C.D. Blocks are higher than the corresponding figures of Koderma district. Only Markacho C.D. Block has the lower female literacy rate than the district average.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	11	2.1	478	0.1
1-10	15	2.9	1,889	0.5
11-20	36	6.8	10,067	2.4
21-30	64	12.2	30,984	7.5
31-40	123	23.4	93,425	22.6
41-50	122	23.2	99,855	24.2
51-60	99	18.8	98,707	23.9
61-70	47	8.9	67,349	16.3
71-80	6	1.1	6,889	1.7
81-90	2	0.4	2,746	0.7
91-99	1	0.2	265	0.1
100	0	0.0	0	0.0
District Total:	**526**	**100.0**	**412,654**	**100.0**
Literacy rate for District:		**52.2**		

The above table shows that in 23.4 percent of the inhabited villages literacy rate ranges between 31 and 40 percent. In these 123 villages 22.6 percent of the district rural population live. This is the largest group of villages in the district. This is closely followed by 122 villages with 24.2 percent of the district rural population. 23.2 percent of the inhabited villages are such where literacy rate ranges between 41 and 50 percent. 18.8 percent of the inhabited villages i.e. 99 villages are such where literacy rate ranges between 51 and 60 percent. These villages account for 23.9 percent of the district rural population. 8.9 percent of the inhabited villages i.e. 47 villages are such where literacy rate range between 61 and 70 percent and these villages account for 16.3 percent of the district rural population. 12.2 percent of the inhabited villages i.e. 64 villages are such where literacy rate ranges between 21 and 30 percent. These villages account for 7.5 percent of the district rural population. There are 36 villages accounting for 6.8 percent of the inhabited villages where literacy rate range between 11 and 20 percent and these villages account for only 2.4 percent of the district rural population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Numer of literaes			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Kodarma (NA)	10,644	6,397	4,247	6,602	2,770	3,832	74.7	84.2	63.8	20.4
2	Jhumri Tilaiya (M)	42,670	26,052	16,618	26,833	10,757	16,076	73.6	84.4	61.4	23.0
	District(Urban) Total	**53,314**	**32,449**	**20,865**	**33,435**	**13,527**	**19,908**	**73.8**	**84.4**	**61.8**	**22.5**

There is no urban agglomeration in Koderma district. Koderma (NA) and Jhumri Tilaiya (M) are the two statutory towns in the district. The literacy rates for Koderma (NA) and Jhumri Tilaiya (M) are 74.7 and 73.6 percent respectively. Male literates out number female literates as the male literacy rate for the district(urban) is 84.4 percent while the female literacy rate is 61.8 percent.

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial		Number of literates and illiterates									Gap in
		Numer of literaes			Number of illiterates			Percentage of literates			male/ female
Number	Name of C.D.Block	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	literacy rate
1	2	3	4	5	6	7	8	9	10	11	12
1	Satgawan	2,289	1,734	555	9,651	4,310	5,341	24.8	37.4	12.1	25.2
2	Kodarma	5,658	4,117	1,541	14,843	6,064	8,779	34.8	51.3	18.7	32.6
3	Jainagar	5,513	4,075	1,438	12,514	4,606	7,908	39.2	60.2	19.7	40.5
4	Markacho	3,410	2,511	899	8,813	3,153	5,660	35.7	58	17.3	40.7
District (Rural) Total:		**16,870**	**12,437**	**4,433**	**45,821**	**18,133**	**27,688**	**34.4**	**52.3**	**17.5**	**34.8**

The table above shows that literacy rate among the scheduled castes is highest i.e. 39.2 percent in the Jainagar CD Block where as it is lowest i.e. 24.8 percent in the Satgawan CD Block in the district. It is observed that the literacy rate among the schedule castes for the district is 34.4 percent . As regards percentage of male literacy rate among the scheduled caste it is highest i.e. 60.2 percent in Jainagar CD Block where as it is lowest i.e.37.4 percent in the Satgawan CD Block. In case of female literacy rate among the scheduled castes it is also highest i.e. 19.7 percent in Jainagar CD Block and the lowest i.e. 12.1 percent in Satgawan CD Block. It is found that the gap between male and female literacy rate is highest i.e. 40.7 percent in Markacho CD Block where as it is lowest i.e. 25.2 percent in Satgawan CD Block.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	16	4.6	568	0.9
1-10	23	6.6	3,764	6.0
11-20	57	16.3	9,082	14.5
21-30	50	14.3	9,194	14.7
31-40	85	24.3	19,069	30.4
41-50	59	16.9	12,189	19.4
51-60	30	8.6	6,449	10.3
61-70	13	3.7	1,888	3.0
71-80	9	2.6	432	0.7
81-90	2	0.6	18	0.0
91-99	1	0.3	22	0.0
100	5	1.4	16	0.0
District Total:	**350**	**100.0**	**62,691**	**100.0**
Literacy rate for District (Rural):			**34.4**	

The table above shows that in case of literacy among the scheduled castes in the villages of the district the highest number of villages i.e. 24.3 percent fall in the literacy range of 31-40 percent where as the lowest number of villages i.e.0.3 percent fall in the literacy range of 91-99 percent. It is observed that of the total villages in the district 1.4 percent villages are such which fall in the highest literacy range of 100.0 percent in case of literacy among the Scheduled Castes in the villages of the district. 59 villages i.e. 16.9 percent of the inhabited villages fall in the literacy range of 41-50 percent. 16.3 percent of the inhabited villages are such which fall in the literacy range 11-20 percent. 14.3 percent of the inhabited villages are such which fall in the literacy range of 21-30 percent. There are 30 villages accounting for 8.6 percent of the inhabited villages which fall in the literacy range of 51-60 percent. 16 villages (4.6 percent) of the inhabited villages fall in the no literacy range i.e. 0 percent.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Numer of literaes			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Kodarma (NA)	705	494	211	1,577	679	898	38.1	51.7	23.7	28.0
2	Jhumri Tilaiya (M)	2,339	1,650	689	4,383	1,848	2,535	42.7	57.4	26.5	30.9
	Kodarma * (Urban)	**3,044**	**2,144**	**900**	**5,960**	**2,527**	**3,433**	**41.6**	**56**	**25.8**	**30.2**

The above table shows that the literacy rate among the scheduled castes in the urban areas of the district is 41.6 percent in case of total population. 56.0 percent in case of males and 25.8 percent in case of females as compared to 52.2 percent in case of total population, 70.9 percent in case of males and 33.6 percent in case of females in the Kodarma district.

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial Number	Name of C.D. Block	Number of literates and illiterates						Percentage of literates			Gap in male- female literacy rate
		Numer of literaes			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Satgawan	59	48	11	283	122	161	21.9	36.1	8	28.1
2	Kodarma	354	245	109	962	449	513	33.6	45	21.4	23.7
3	Jainagar	123	95	28	145	63	82	54.7	70.4	31.1	39.3
4	Markacho	183	149	34	1,467	728	739	13.8	20.5	5.7	14.8
	District (Rural) Total:	**719**	**537**	**182**	**2,857**	**1,362**	**1,495**	**25**	**34.9**	**13.6**	**21.3**

The table 28 shows that among the scheduled tribes the percentage of literates is highest i.e.54.7 percent in Jainagar C.D. Block where as it is lowest i.e. 13.8 percent in Markacho C.D. Block in the district. It is observed that the literacy rate among the Scheduled Tribes for the district is 25.0 percent only. As regards percentage of male literacy rate among the scheduled tribes it is highest i.e. 70.4 percent in Jainagar C.D. Block where as it is lowest i.e. 20.5 percent in Markacho C.D. Block. In case of female literacy rate among the scheduled tribes it is highest i.e. 31.1 percent in Jainagar C.D. Block where as it is lowest i.e.5.7 percent in Markacho C.D.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	23	24.5	614	17.2
1-10	8	8.5	355	9.9
11-20	9	9.6	906	25.3
21-30	8	8.5	575	16.1
31-40	9	9.6	682	19.1
41-50	6	6.4	92	2.6
51-60	2	2.1	48	1.3
61-70	1	1.1	52	1.5
71-80	0	0.0	0	0.0
81-90	2	2.1	22	0.6
91-99	1	1.1	85	2.4
100	25	26.6	145	4.1
District Total:	**94**	**100.0**	**3,576**	**100.0**
Literacy rate for District (Rural):			**25**	

The table above shows that in case of literacy among the scheduled tribes in the villages of the district the highest number of villages i.e. 26.6 percent fall in the literacy range of 100.0 percent where as the lowest number of villages i.e. 1.1 percent fall in the literacy range i.e. 61-70 and 91-99 percent. 23 villages i.e. 24.5 percent of the inhabited villages fall in the no literacy range i.e. 0 percent. It is observed that of the total villages 9.6 percent fall in the literacy range of 11-20 and 31-40 percent.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male/ female literacy rate
		Numer of literaes			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Kodarma (NA)	121	68	53	113	61	52	62.1	65.4	58.2	7.1
2	Jhumri Tilaiya (M)	129	68	61	128	57	71	61.4	68.7	55	13.7

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table 31 and 32 show that in the Koderma district is the work participation rate (WPR) 21.8 percent of the district total population as main workers and 14.9 percent as marginal workers. The proportion of non-workers in the district is 63.3 percent.

Among the main workers male work participation rate in the district is 35.4 percent while that of females is only 8.5 percent as per 2001 census. The proportion of main workers is the highest (26.6 percent) in Satgawan C.D. Block and the lowest (18.9 percent) in Markachho C.D. Block. Out of 4 C.D. Blocks, WPR of 2 C.D. Blocks are above the district average. The proportion of marginal workers is the highest (18.1 percent) in Markachho and the lowest (3.4 percent) in Kishanganj C.D. Block. The proportion of total workers is the highest (34.1 percent) in Pothia and Dighalbank C.D. Blocks and the lowest (30.5) percent in Kochadhamin C.D. Block.

Among the non-workers male work participation rate in the district is 46.6 percent while that of females is 89.3 percent as per 2001 census.

There is no urban agglomeration in Kodarma district. There are two urban units in the district i.e. Kodarma (NA) and Jhumri Tilaiya (M). The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. For Kodarma (NA) the work participation rate (WPR) recorded is 21.2 percent of the total population of the town as main workers and 3.8 percent as marginal workers. In Jhumri Tilaiya (M) the work participation rate (WPR) is 22.8 percent of the total population of the town as main workers and 5.1 percent as marginal workers. The proportion of non-workers in the town is 72.6 percent. The proportion of male and female main workers in the town are 38.9 and 4.0 percent respectively. The proportion of male marginal workers in the town is 5.6 percent and that for females is 4.0 percent only. The proportion of male and female non-workers in the town are 55.5 and 92.0 percent respectively.

				(24.8)	**(55.7)**	**(29.8)**	**(3.0)**	**(11.4)**

Note: Percent of Worker to total worker are given in brackets

From the above table the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely cultivators, agricultural laborers, household industry workers and other workers. The economic activity in the rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (42.5 %) and agricultural laborers (20.2 %) together constitute (62.7 %) of the total workers of the district. The agriculture sector has absorbed more than half of the total main workers. The proportion of cultivators varies between 59.7 percent for Markacho C.D. Block to 25.0 percent for Kodarma C.D. Block. Proportion of agricultural laborers varies between 32.6 percent in Satgawan C.D. Block to 14.0 percent in Kodarma C.D. Block. The proportion of household Industry workers is only 2.9 percent of the total workers of the district. The proportion of household industry workers varies between 4.0 percent in Kodarma C.D. Block to 1.5 percent in Jainagar C.D. Block. The proportion of other workers is 34.3 percent of the total workers of the district. The Proportion of other workers varies between 57.0 percent in Kodarma C.D. Block to 11.4 percent in Satgawan C.D. Block.

				(8.0)	(12.6)	(19.0)	(15.5)	(52.8)

There is no urban agglomeration in Kodarma district. There are only two statutory towns in the district i.e. Kodarma (NA) and Jhumri Tilaiya (M). From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely cultivators, agricultural labourers, household industry workers and other economic activities. The cultivators constitute 1.5 percent and agricultural laborers constitute 8.4 percent of the total workers of Kodarma (NA). The proportion of male and female cultivators are 1.3 and 2.7 percent respectively. The proportion of male and female agricultural labourers are 6.2 and 23.0 percent respectively. The cultivators constitute 6.0 percent and agricultural labourers constitute 5.3 percent of the total workers of Jhumri Tilaiya (M). The proportion of male and female cultivators are 4.6 and 14.7 percent respectively. The proportion of male and female agricultural laborers are 3.3 and 18.2 percent respectively. Household industry workers constitute 3.9 percent and 5.5 percent of the total workers of Kodarma (NA) and Jhumri Tilaiya (M) respectively. The proportion of household industry workers among males is 2.6 percent and that of females is 12.2 percent of Kodarma (NA). The proportion of household industry workers among males is 3.7 percent and that of females is 16.2 percent for Jhumri Tilaiya (M). Other workers constitute 86.2 percent of total workers of Kodarma (NA).The proportion of male and female other workers are 88.4 and 50.9 percent respectively for Jumri Tilaiya(M).

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational amenity – There are as many as 277 villages accounting for 52.7 percent of the total inhabited villages in the district where educational facility is available. The highest proportion of villages with educational facility is in the development block of Kodarma with 60.6 percent while Jainagar C.D. Block has the lowest proportion of villages with 45.7 percent.

Medical facility – The availability of medical amenity in the villages is low and only 13.7 percent villages have got it. Among the C.D. Blocks, Markacho has the largest proportion of villages with medical facility, the percentage being 20.9 percent. Satgawan C.D. Block, on the other hand, has the smallest proportion of villages (8.9 %) where medical amenity is available.

Improved drinking water – There are as many as 468 villages accounting for 89.0 percent of the inhabited villages in the district where improved drinking water facility is available. Among the C.D. Blocks, Markacho C.D.Block has the largest proportion of village with improved drinking water with 96.3 percent. Jainagar C.D.Block has the lowest proportion of villages with improved drinking water with 81.2 percent.

Post office – Postal facilities are available in 45 villages out of 526 inhabited villages (8.6 %) in the district. Markacho C.D. Block has the maximum number of villages having postal facility (11.2 %). Satgawan C.D. Block has the minimum number of villages having postal facility (6.3%).

Telephone – The availabity of telephone facility in the villages is quit low and only 2.7 percent villages have got it. Among the C.D. Blocks, Kodarma C.D. Block has the maximum number of villages having telephone facility (7.0 percent) while the village of Satgawan C.D.Block still do not have telephone facility.

Transport Communication – Transport Communication facilities are available in 54 villages out of 526 inhabited villages (10.3%) in the district. Markacho C.D. Block has the highest proportion of villages (17.2%) which are connected by bus or rail

or navigable river/canal services. Satgawan C.D. Block has the minimum number of villages having transport communications facility (5.4 %).

Bank – Banking facility is available only in 28 villages out of 526 inhabited villages (5.3%) in the district. Among the C.D. Blocks, Jainagar C.D. Block has the maximum number of villages having banking facility (8.7%) whereas Kodarma C.D. Block has the minimum number of village shaving banking facility (3.5%).

Agricultural credit societies – Agricultural credit societies are available only in 76 villages out of 526 inhabited villages (14.4%) in the district. Among the C.D. Blocks, Jainagar C.D. Block has the maximum number of villages having agricultural credit societies (36.2%) while Satgawan C.D. Block has the minimum number of villages having agricultural credit societies (1.8%).

Approach by pucca road –This facility is available in 116 villages out of 526 inhabited villages (22.1%) in the district. Kodarma C.D. Block has the maximum number of villages having pucca road approach (34.5%) while Jainagar C.D. Block has the minimum number of villages having pucca road approach (11.6 percent).

Power Supply – Electrified villages in the district constitute 38.0 percent of the total number of inhabited villages. Among the C.D. Blocks, Jainagar C.D. Block has the maximum number of electrified villages with 50.0 percent while Satgawan C.D. Block has the minimum number of electrified villages with 17.0 percent.

TABLE 38 : NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial Number	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri cultural Credit Societies	Approach by pucca road	Power supply

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from table no.38 that educational facility is available to 77.8 percent of the rural population of the district. The proportion varies between the maximum of 89.1 percent in Kodarma CD Block and the minimum of 66.2 percent in Jainagar CD Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 52.7 percent vide table 37) than the proportion of population which is as high as 77.8 percent.This may be attributed to the fact that villages which passess educational facility usually contain larger population as compared to those villages which do not have this facility at all. In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 29.0 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 92.5 percent which is more than the proportion of villages served by this facility in the district.

Similar trend can be observed in respect of other amenities also both in the district as also in its various CD Block.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

	Distance range of place from the villages where the amenity is available			
Village not having the amenity of	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	205	47	5	257
(b) Middle School	308	142	30	480
(c) Degree College	20	42	461	523
2. Medical:-				
(a) Hospital	145	130	229	504
(b) PHC	131	178	204	513
3. Post Office	327	113	41	481
4. Telephone	86	170	256	512

6. Banks				
(a) Commercial Bank	213	203	83	499
(b) Cooperative Bank	32	103	390	525
7. Agricultural Credit Societies	178	170	102	450

There are as many as 480 villages in the district (91.3 percent) which do not have middle schools. Out of 480 villages, 308 villages have this facility at places situated within 5 kms, 142 villages have this facility at a distance range of 5-10 kms and only 30 villages at places beyond 10 kms. There are 523 villages in the district (99.4 percent) which are deprived of colleges. Out of 523 villages, 20 villages enjoy this facility at places situated within 5 kms, 42 villages enjoy this facility at a distance range of 5-10 kms and as many as 461 villages enjoying this facility at places beyond 10 kms.Similarly trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

		Type of amenity available

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that maximum number of inhabited villages lie in the distance range of 16-50 kms. from the nearest statutory town. This is followed by villages in the distance range of 5-15 kms. from the nearest statutory town with 19.6 percent. There are 10.1 percent villages in the distance range of 51 and above. Lastly 3.2 percent villages are found in the distance range of less than 5 kms.

Interestingly it can be observed from the table that the proportion of villages having educational facility is 70.6 percent for those situated within 5 kms from the nearest town and decreases to 49.5 percent in the distance range of 5-15 kms.. Thereafter it increases to 52.4 percent in the distance range of 16-50 kms. from the nearest town and again it increases to 54.7 percent in the distance range of 51 and above. In the case of other amenities also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the table no.41 that the maximum number of villages i.e. 261 (49.6 percent)in the district fall in the population range of 1-499 followed by 145 villages (27.6percent) having a population range of 500-999. There are 81 villages (15.4 percent)which fall in the population range of 1000-1999. The lowest number of villages is observed in the population range of 10000+ being only (0.4 percent).

The proportion of villages having different amenities varies in direct relation to their population range. Generally the maximum percentage of villages having different amenities have a population range of 5000-9999 and 10000+ which further corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Satgawan	112	25,595	18	33
2	Kodarma	142	31,851	29	12
3	Jainagar	138	20,434	61	14
4	Markacho	134	29,754	47	30
	District Total:	**526**	**107,634**	**37**	**21**

Table 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various CD Blocks. It would be seen from the table that 37.2 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 21.4 percent area is found to be irrigated. Among the CD Blocks, the highest percentage of cultivable area is found in Jainagar C.D. Block with 61.4 percent closely followed by Markacho and Kodarma C.D. Blocks with 46.7 and 28.6 percent respectively. The lowest cultivable area is found in Satgawan C.D.Block which is 17.6 percent.

The highest proportion of irrigated area (33.0 percent) to total cultivable area is found in Satgawan C.D. Block followed by Markacho and Jainagar C.D. Blocks with 30.0 and 14.1 percent respectively. The least proportion of irrigated area is found in Kodarma C.D. Block with 12.3 percent which indicates that the villages in this block are deprived of required irrigational facilities.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

		Per capita receipt			Per capita expenditure					
Serial number	Class,name &urban status of the town	Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	II Jhumri Tilaiya (M)	40.7	17.3	23.4	43.3	13.8	8.5	4.3	0	16.8
2	IV Kodarma (NA)	17.7	0	17.7	8.8	0	3.5	5.3	0	0
	District Total	**36.1**	**13.9**	**22.3**	**36.5**	**11**	**7.5**	**4.5**	**0**	**13.4**

The above table gives the details of finances in the statutory towns in terms of per capita receipt and expenditure. There are only two statutory towns in the district i.e. Jumri Tilaiya(M) and Kodarma(NA). On going into the details of receipt under different heads it can be seen in Jumri Tilaiya(M) that the per capita receipt from all other sources is higher than the per capita receipt through taxes. The per capita expenditure incurred on general administration is higher than the per capita expenditure on public works and the public health and conveniences.It can be seen that the receipt from all other sources are the only head for per capita receipt in cases of Koderma (NA) the expenditure incured on public works is higher than the per capita expenditure on public health and expenditure .

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban statis of Town	Type of educational institution				
		Primery	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Jhumri Tilaiya (M)	1.2	1	0.3	0.1	0.1
2	Kodarma (NA)	4.6	1.7	1.2	0.0	0.0
	District Total	**1.8**	**1.2**	**0.5**	**0.1**	**0.1**

The above table gives the details of different categories of educational institutions per ten thousand population in the towns of the district. It would be seen from the above table that institutions like secondary/Matriculation level school and college are situated in Jhumri Tilaiya(M) accounting for an average of 0.3 and 0.1 institution per ten thousand population respectively. Primary school and Middle school account for an average of 1.2 and 1.0 per ten thousand population respectively. Senior Secondary School accounts for an average of 0.1 institution per ten thousand population. Secondary / Matriculation level school is available in Kodarma (NA) accounting for an average of 1.2 institution per ten thousand population. Primary school and Middle school account for an average of 4.6 and 1.7 per ten thousand population respectively. Senior secondary school and college are not available in Kodarma (NA).

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Jhumri Tilaiya(M)	0
2	Kodarma(NA)	68
	Distrct Total	**13**

The above table furnishes information regarding availability of beds in medical institutions in Kodarma district.

The number of beds in medical institutions per ten thousand population for Kodarma (NA) works out to be 68. Jhumri Tilaiya (M) does not have the facility of beds in the medical institution.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Jhumri Tilaiya (M)	69,503	5,640	8.1
	District Total	**69,503**	**5,640**	**8.1**

The table above indicates that slum population in Jhumri Tilaiya (M) constitutes 8.1 percent of the total population of the town.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001 *(Contd.)*

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Jhumri Tilaiya (M)	Mica Articles Iron Rods Glass Products	Mica Mica Articles
2	Kodarma (NA)	Rice	Mica

Table – 47 presents the most important commodities manufactured in the towns and exported from the towns of Kodarma district. It would be seen from the above table that three items viz. Mica's articles, Iron Rods and Glass product are manufactured in the town and two items viz. Mica and mica articles are exported from Jhumri Tilaiya (M). In Kodarma (NA) it has been observed that only one item i.e. rice is manufactured and only mica is exported from the town.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling households	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11
Owned	No exclusive room	299	253	46	59	52	7	19	19	0
	One room	16,631	14,542	2,089	5,324	4,661	663	423	378	45
	Two rooms	23,674	20,698	2,976	4,176	3,744	432	273	241	32
	Three rooms	13,794	11,935	1,859	1,583	1,432	151	103	86	17
	3+ rooms	20,109	16,880	3,229	1,651	1,454	197	78	63	15
	Median number of rooms	2	2	2	2	2	2	2	1	2
Rented	No exclusive room	34	17	17	7	4	3	1	1	0
	One room	1,631	556	1,075	169	77	92	27	20	7
	Two rooms	1,547	469	1,078	108	54	54	40	16	24
	Three rooms	576	173	403	25	11	14	10	7	3
	3+ rooms	322	90	232	17	9	8	5	3	2
	Median number of rooms	2	2	2	1	1	1	2	2	2
Others	No exclusive room	30	25	5	4	3	1	1	1	0
	One room	619	457	162	158	113	45	19	16	3
	Two rooms	556	398	158	103	75	28	29	24	5
	Three rooms	162	91	71	16	5	11	7	6	1
	3+ rooms	122	73	49	5	1	4	7	6	1
	Median number of rooms	2	2	2	1	1	1	2	2	2
	District total	**80,106**	**66,657**	**13,449**	**13,405**	**11,695**	**1,710**	**1,042**	**887**	**155**

It would be clear from the table that there are as many as 74507 households accounting for 93.0 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in two rooms is the highest (31.8%) who is occupying only single room whreas as it is lowest (0.4%) dwelling in no exclusive room. The median number of rooms is 2 for the total households in the tenure status of owned category. There are 12793 Scheduled Castes households accounting for 17.2 percent of the total households dwelling in owned houses. The median number of rooms is 2. There are 896 Scheduled Tribes households accounting for only 1.12 percent of the total households dwelling in owned houses. The median number of rooms is 2. There are 4110 households accounting for 5.1 percent of the total households of the district who are dwelling in rented houses. The proportion households dwelling single room and the proportion of households is the where as it is lowest (0.8%) dwelling in no exclusive room. The median number of rooms is 2.

There are 326 scheduled castes households accounting for 7.9 percent of the total households dwelling in rented houses. The median number of rooms is 1. There are 83 Scheduled Tribes households accounting for 2.0 percent of the total households dwelling in rented houses. The median number of rooms is 2.

Similar trend can be observed in respect of households dwelling in the tenure status of others.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary

4	Markacho	19.4	80.5	0.1	19.4	80.5	0.1	0.0	0.0	0.0
District Total:		**34.0**	**65.3**	**0.7**	**26.8**	**72.4**	**0.8**	**69.9**	**29.7**	**0.4**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note :

1. Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.
2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.
3. Temporary : Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from the above table that of the total rural households maximum proportion of households i.e. 72.4 percent live in semi permanent houses followed by 26.8 percent living in permanent houses and 0.8 percent living in temporary houses.

In the case of urban households in the district, however, the maximum proportion of household i.e. 69.9 percent live in permanent houses followed by 29.7 percent in semi permanent houses and 0.4 percent in temporary houses.

Among the CD Blocks in the district Markacho has the maximum proportion of rural households living in semi permanent houses (80.5 %) followed by Satgawan (74.2 %) and Jainagar (70.5 %) Kodarma C.D. Block has the minimum proportion of households living in semi permanent houses with 67.3 percent. In case of permanent houses Kodarma C.D. Block has the maximum proportion of households living in permanent houses (32.4 %) followed by Jainagar C.D. Block (28.3 %). Markachho C.D. Block has the minimum proportion of households living in permanent houses with 19.4 percent. In case of temporary houses Satgawan C.D. Block has the maximum proportion of households (2.5 %) followed by Jainagar C.D. Block (1.2 %).

Markacho C.D. Block has the minimum proportion of households having temporary houses with 0.3 percent.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001 *(Contd.)*

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.
Bathroom means bathroom within the house.
Toilet means toilet within the house.
Drainage means closed and open drainage.

The above table shows that of the total rural households 11,632 households i.e. 17.5 percent have access to improved drinking water facility in the district. The position is better in the urban areas with 23.6 percent households availing of this facility. Among the C.D. Blocks, the highest proportion of households with improved drinking water facility can be observed in Satgawan block with 50.5 percent whereas it is lowest in case of Markacho and koderma blocks with 11.0 percent.

As regards electricity available to households it is found that only 21.7 percent of the households in the district have electricity. The people living in the urban areas are more privileged as 55.4 percent of the urban households have the facility of electricity as against only 14.9 percent of rural households enjoying this facility. Kodarma block tops the list as 26.7 percent of the households in this block have electricity facility. In the rest of the C.D. Blocks the proportion of households enjoying electricity facility

is less than 4.0 percent except Jainagar block where 16.7 percent have this facility.

It is also interesting to note that only 9.7 percent of the total households in the district have bathroom facility. In the urban areas, the proportion of households which has the privilege of having bathroom facility is quite high with 37.2 percent while only 4.2 percent of the rural households have bathroom facility.

Households having toilet facility are found to be higher in number as compared to bathroom facility as 14.3 percent of the households in the district enjoy toilet facility. The relative position is, by and large, the same as found in the case of bathroom and electricity facility as Kodarma C.D. Block is again much better placed as compared to other C.D. Blocks.

36.2 percent of the total households in the district have drainage facility. While 51.4 percent of urban population has got the facility of drainage, only 33.1 percent of the rural households have this privilege. Among the C.D. Blocks, the highest proportion of households with drainage facility can be observed in Satgawan block with 42.9 percent whereas it is the lowest in case of Markacho block with 31.6 percent.

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

Serial number	C.D.Block	Total/ Rural/ Urban	Total household	Fire wood	Crop residue	Cowdung cake	Electricity	Coal / Lignite (charcoal)	Cooking gas (L.P.G.)	Bio-gas	Kerosene	Others	No cooking

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The above table shows that 74.9 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Satgawan CD Block (93.3%) whereas it is lowest in Jainagar CD Block with 50.5 percent.

2.5 percent of the rural households in the district use crop residue as fuel for cooking among the C.D. blocks heighest proportiopn of household is 3.1 percent. In Satgawan C.D. Block where as it is lowest (1.5percent) in Kodarma C.D. Block 15.2 percent of the rural households in the district use cowdung cake as fuel for cooking. Among the C.D. Blocks the proportion of households using cow dung cake as fuel for cooking is highest (31.8 %) in Jainagar C.D. Block where as it is lowest (2.0 %) in Satgawan C.D. Block.

In the case of cooking gas (LPG) there are only 4778 households accounting for 6.0 percent of the total households in the district using it for cooking. As regards Kerosene there are only 840 households accounting for 1.0 percent of the total households in the district using it for cooking. Similar trend can be observed in respect of other types of fuel.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

					Availability of household assets						
Serial number	C.D.Block	Total/ Rural/ Urban	Total number of household	Total number of households availing banking services	Rado / Transistor	Television	Tele-phone	Bicycle	Scooter, Motor Cycle Moped	Car, Jeep, Van	None of the specified assets

		Urban	**13,449**	**7,355**	**5,159**	**4,664**	**1,507**	**6,205**	**1,800**	**445**	**4,218**

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It would be seen from the above table that 22545 households accounting for 33.8 percent of the rural households of the district availing the banking services. The highest proportion of households can be observed in Jainagar C.D. Block (40.3%) availing banking services and the lowest proportion of households is in Satgawan C.D. Block (20.4%).

There are as many as 18511 households accounting for 27.8 percent of the rural households in the district. Who are possessing radio, transistor. Among the C.D. Blocks, Jainagar has the highest proportion of households (34.1%) possessing radio transistor and Satgawan has the lowest proportion of households with 17.5 percent.

As regards television there are 3783 households accounting for 5.7 percent of the rural households of the district are possessing television. Among the C.D. Blocks, Kodarma has the highest proportion of households (8.6%) possessing television and Markacho has the lowest proportion of households

with 2.6 percent. As regards telephone there are 568 households accounting for 0.9 percent of the rural households of the district the availing telephone services. Among C.D. Blocks, Kodarma has the highest proportion of households (1.2%) availing telephone services and Markachho has the lowest proportion of households with 0.5 percent.

Similar trend can be observed in respect of other specified assets also both in the district as also in its development blocks.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

The district has seen in its very short span of life two administrative development of far reaching consequences, first creation of district on 10.04.1994 and second separation of Jharkhand state from Bihar State. Due to separation of Jharkhand state entire state is facing a silent transitional lull.

(ix)Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Kodarma- Kodarma is administrative headquarters of the district. It is linked with various important places via rail line. Lying on the Patna Ranchi road the Kodarma wildlife sanctuary provides opportunity for watching various wild animals.

Jhumri Tilaiya- There is multi-purpose Tilaiya Dam on Barakar river which had been constructed and being maintained by D.V.C. It is situated at a distance of 22 kms. south of Kodarma. A Sainik School is running near Tilaiya Dam under the auspices of Defence Ministry. This is singleton Sainik School in both the Jharkhand and Bihar states. Jhumri Tilaiya is one of the principal centers of mica industry.

Jharnakund- It is a sight-seeing place under Kodarma C.D. Block.

Petro water fall- Under Satgawan C.D. Block lies Petro water fall which is a scenic spot for tourists.

Ghorsima- It is site where archaeological remains has been excavated. The village is situated about 6 kms. west of the C.D. Block headquarters at Satgawan. It is noted for its Shiva Temple around which an annual fair is held on the occasion of Shivaratri.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The district is richly endowed with mineral resources essential for industries. The rich Mica Mines located in Kodarma district form the backbone of the industrial activities in the district. Mica mining activities emply a sizable chunk of industrial workers of the district. Extensive deposits of Mica in this district are of importance within the country as also in some other countries.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all

statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Bihar first PLCN 00000100 has been assigned to village 'KHOKHA' in Kharaundhi C.D. Block of Garhwa district and the last PLCN 03261500 has been assigned to the last village 'KUMRASHOL' of the state in Baharagora C.D. Block of Purbi Singhbhum district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit

societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put

under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a

statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Blank

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i) Commercial Bank	CM
(ii) Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i) Agricultural Credit Society	ACS
(ii) Non- Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i) Cinema/Video Hall	CV
(ii) Sports Club	SP
(iii) Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i) Bus	BS
(ii) Railway Station	RS
(iii) Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road	PR
(ii) Mud road	MR
(iii) Foot path	FP
(iv) Navigable River	NR
(v) Navigable Canal	NC
(vi) Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use	ED
(ii) Electricity for agricultural use	EAG
(iii) Electricity for other purposes	EO
(iv) Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i) News Paper	N
(ii) Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i) Government Canal	GC
(ii) Private Canal	PC

(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

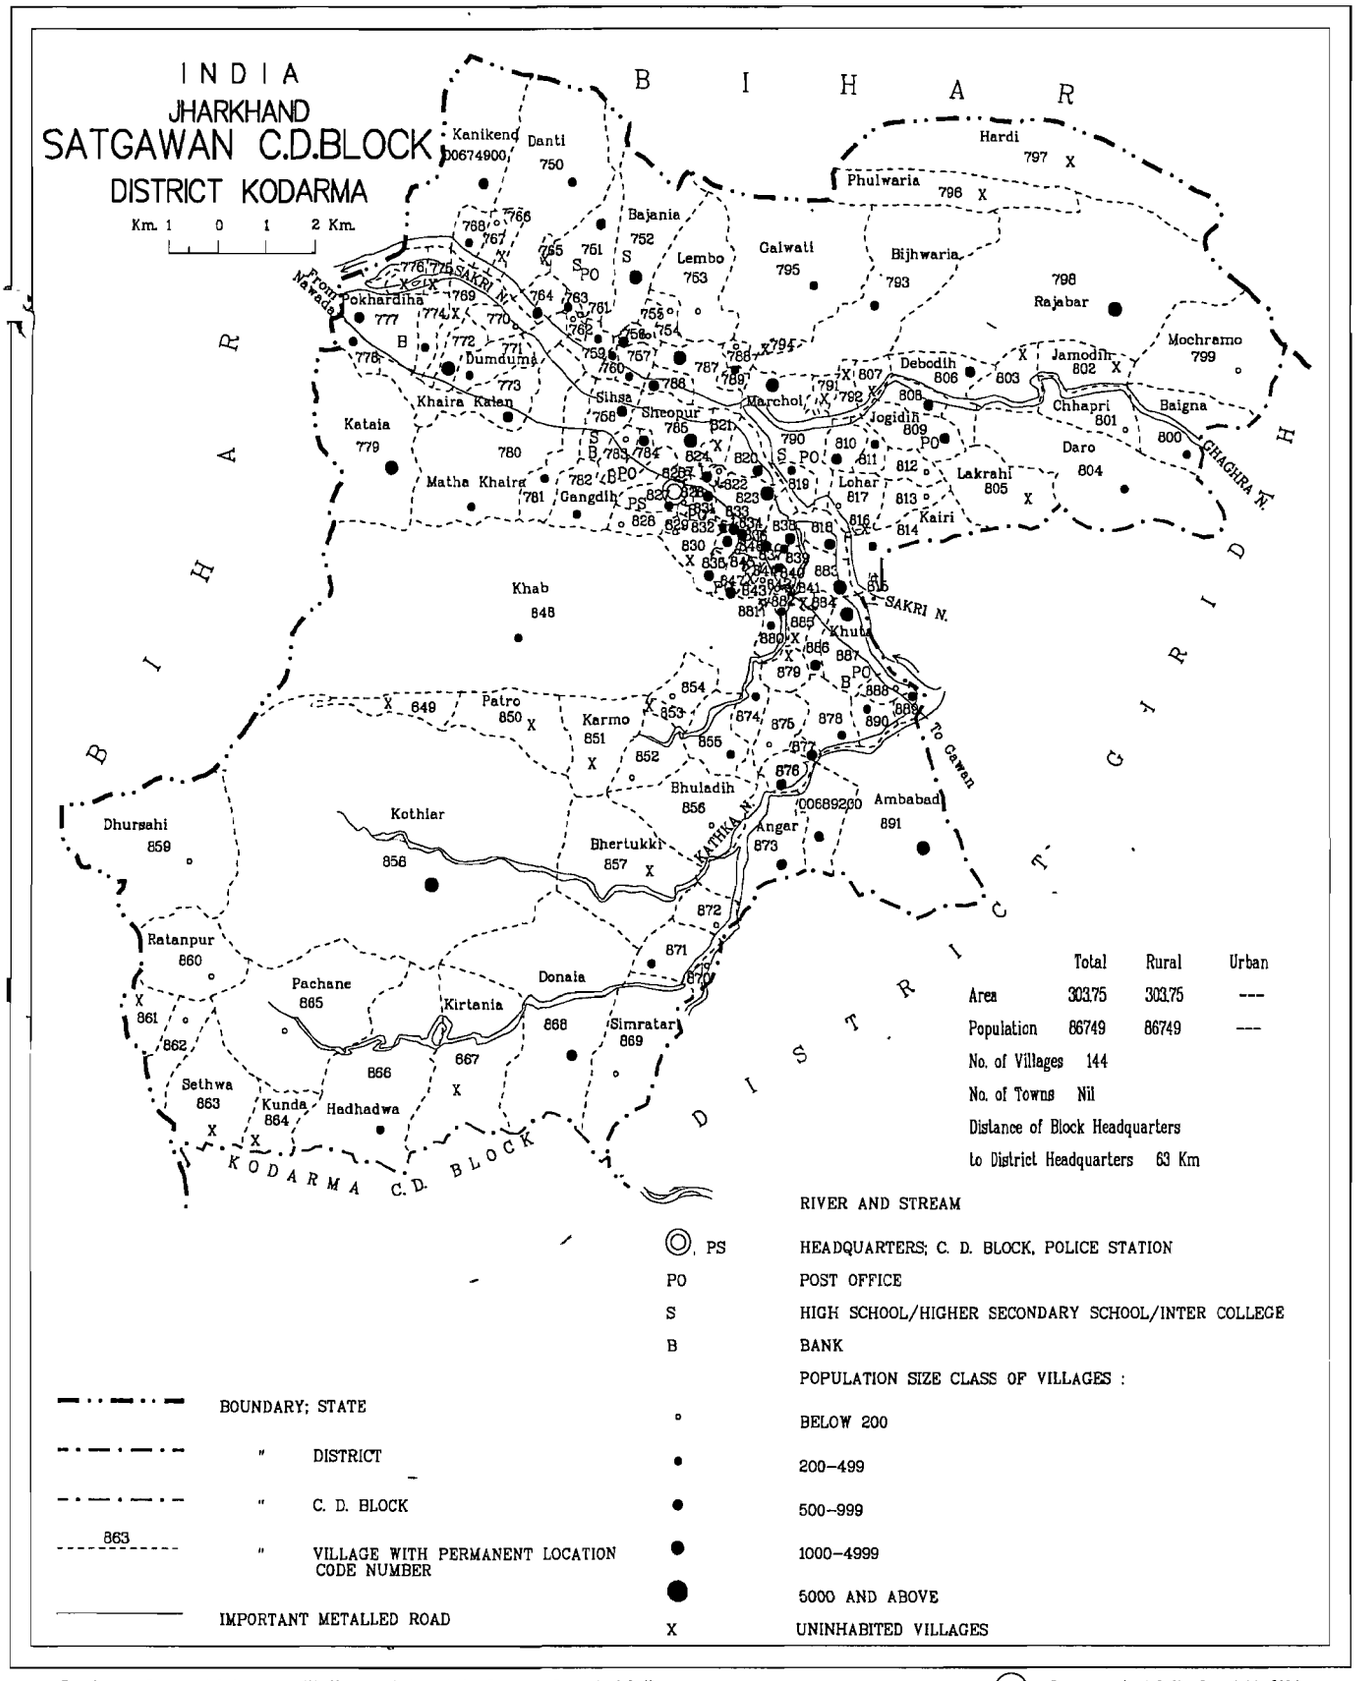

List of Villages merged in towns and outgrowths in 2001 Census

There is no such village in the district of Kodarma.

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Serial number	Name of Towns	Name of villages merged in towns	Name of villages identified for outgrowth	Location Code Number 1991 Census	Location Code Number 2001 Census (in case of partly OG)
1	2	3	4	5	6

Note: N.A.stands for information not available.

TOWN DIRECTORY

Blank

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting Type	S H
(iv)	Others	O

The vocational institutions like - Applied Art/ Craft, Fine college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

APPENDIX TO TOWN DIRECTORY

TOWNS SHOWING THEIR OUTGROWTHS WITH POPULATION

Serial Number	Name of the town with location code	Population of core town	Name of outgrowth	Population of outgrowth
1	2	3	4	5
There is no outgrowth(s) in any of the towns of Kodarma district.				

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Hazaribag	1991	55	68	76	80
	1981	90	104	118	138

An estimate regarding child mortality rate for the year 1981 and 1991 had been presented below for the sake of comparison of decadal variation in child mortality rate with respect to the district of Hazaribag and the state of Bihar. These estimates are based on the information collected on the question on children ever born and children surviving canvassed for all ever married women during 1991 census and compiled by age of the mother.

The estimates of child mortality for the ages 1, 2, 3 and 5 are denoted here as q(1), q(2), q(3) and q(5) respectively of the children of the district and the state. It is evident that child mortality for the district both in 1981 and 1991 was significantly lower compared to the state average. However estimates of child mortality show that in 1991 child mortality was lower as compared to 1981 figures both in the district of Hazaribag and state of Bihar with respect to all ages i.e. q(1), q(2), q(3) and q(5). The credit for such improvement in life expectancy of children may be attributed to improvement in and availability of medical care facilities particularly in women and child welfare activities in the state as well as in the district.

Kishanganj	38.0	5.6	6.9	172.0	221.0	67.7	4.7	17.6

Some other fertility measures for 1991 pertaining to the district of Hazaribag and Bihar state as a whole are presented in Annexure III above.

It transpires from the annexure placed above that some other fertility indices such as CBR, TFR, TMFR, GFR, GMFR and mean age at marriage have been lower in the district of Hazaribag as compared to the state averages. On the other hand child woman ratio and number of children ever born per woman in age-group 45-49 are higher in the district compared to state average

as per 1991 census data. The other fertility indices for state and all other districts can be viewed from annexure III presented above.

ANNEXURE - IV (A)

	(4.93)	(12.25)	(4.02)	(0.87)	(1.32)	(0.82)	(100.00)	(100.00)	(100.00)
Hazaribag	46,418	21,190	25,228	2,320	1,170	1,150	864,369	167,843	696,526
	(5.4)	(12.6)	(3.6)	(0.3)	(0.7)	(0.2)	(100.0)	(100.0)	(100.0)

The growth of population for any area is influenced due to effect of migration (in-migration as well as out migration). However, for want of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population, although such impact may not be much in most of the cases.

The percentage distribution of migrants by place of birth according to 1991 census is furnished in Annexure IV(a) above.

It may be viewed from the annexure that migrants by place of birth are 21,307,020 in Bihar state comprising of 2,343,005 males and 18,964,015 females. The migrants constitute 24.7 percent of the total population of the state according to 1991 census.

With respect to Hazaribag district to total number of migrants by place of birth is 864,369 of which 167,843 are males and 696,526 are females. The migrants in the district comprise 30.4 percent of total population of the district. It reflects that a good proportion of the district population is migrants.

It can also be seen from the distribution of total migrants in Bihar that 67.8 percent were intra district and 26.4 were inter district migration. In other words 94.2 percent of total migrants were born within the state (intra-state) while 4.9 and 0.9 percents of the migrants were from out side the state and country respectively. With respect to the district of Hazaribag 64.1 and 30.3 percents of total migrants of the district were intra and inter district migrants respectively. In other words 94.4 percent of the total migrants were born in Bihar state (intra state) while 5.4 and 0.3 percents were inter state and international migrants respectively in the district.

It can also be seen from the sex-wise distribution of total migrants in Bihar as well as in the district of Hazaribag that females predominate in intra district migration while males predominate in inter-district, inter-state and international migration in terms of percentage of total sex-wise migration.

This may be due to movements of females from their place of birth to place of marriage and this phenomena is more pronounced within the district of birth. However, female migrants according to their place of birth are numerically predominant everywhere be it intra or inter district or intra or inter state or international.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

		(23.2)	(5.7)	(17.5)	(25.7)	(5.7)	(20.0)

The rural and urban composition of internal migration with respect to Bihar state and Hazaribag district based on 1991 census data by place of birth is presented in Annexure IV(b) above.

With respect to Bihar state so far the rural-urban breakup is concerned, majority of the migration within India had taken place from rural to rural be it within the state or from other states of India. 82.6 and 73.8 percents of migration with respect to the state and the district respectively were from rural to rural in case of intra state migration. Only 12.2 and 18.2 percent of the migration in the state and the district respectively were from rural to urban so far the intra state migration was concerned. In this segment only 1.9 and 2.6 percent of migration were from urban to rural with respect to state and the district respectively while the corresponding figure for urban to urban migration stood at 3.1 and 4.8 percent.

In case of inter state migration 48.8 and 27.0 percent of migration were from rural to rural for the state and the district respectively. While corresponding figures for rural to urban migration were 27.4 and 46.6 percent.

About equal proportion (5.7 percent) of inter state migration took place from urban to rural areas with respect to both state and the district. While corresponding figures for urban to urban migration were from 17.5 to 20.0 percent.

It is evident from the annexure IV(b) that migration from rural to urban areas occupied second place after rural to rural migration both in case of state and district, be it intra or inter state migration.

ANNEXURE - IV (C)

INTERSTATE MIGRANTS, 1991 CENSUS

Bihar			Hazaribag		
Place of Birth	Migrants	Percentage to total Migrants	Place of Birth	Migrants	Percentage to total Migrants
1	2	3	1	2	3
Andhra Pradesh	20,240	1.9	Andhra Pradesh	560	1.2
Assam	11,670	1.1	Arunachal Pradesh	610	1.3
Haryana	27,270	2.6	Kerala	450	1.0
Madhya Pradesh	56,100	5.3	Orissa	2,190	4.7
Orissa	75,040	7.2	Gujarat	590	1.3
Punjab	20,785	2.0	Haryana	4,160	9.0
Rajasthan	28,353	2.7	Himachal Pradesh	620	1.3
Uttar Pradesh	322,183	30.7	Madhya Pradesh	4,100	8.8
West Bengal	418,759	39.9	Maharashtra	390	0.8
Total for nine states	980,400	93.4	Punjab	2,380	5.1
Other states	69,569	6.6	Rajasthan	1,720	3.7
Total	1,049,969	100.0	Uttar Pradesh	13,970	30.1
			West Bengal	12,898	27.8
			Total for thirteen states	44,638	96.2
			Other states	1,780	3.8
			Total	46,418	100.0

The annexure presented above provides a glimps of main contributory states of migrants to the state of Bihar and the district of Hazaribag.

The annexure provides a breakup of the total inter state migration to Bihar and the district by place of birth. It is crystal clear that out of a total of 1,049,969 inter state migrants in case of Bihar state only 9 states contributed over 93 percent of the migrants of these state, West Bengal and Uttar Pradesh, the two neighbouring states, contributed over 40 and 31 percents of inter state migrants respectively. Orissa (7.2 percent) and Madhya Pradesh (5.3 percent) were 3rd and 4th largest contributor of inter state migrants to Bihar state as a whole.

In case of Hazaribag district out of a total of 46,418 inter state migrants, 96.2 percent had come from 13 states among which Uttar Pradesh (30.1 percent) and West Bengal (27.8 percent) contributed about 58 percent of such migrants to the district. Haryana (9.0 percent) and Madhya Pradesh (8.8 percent) contributed about 9 percent each. Punjab, Orissa and Rajasthan were also significant contributors of inter state migrants to the district.

			85.5	13.3	0.8	0.2	0.1	0.0	0.1	0.0

The Indian census has always attempted to provide a realistic and interesting picture of the religious persuasions of the people of the state. While collecting information on religion at the time of census, the enumerator had clear instruction to record the religion as actually returned by respondents. Six religious (Hindus, Muslims, Christianity, Sikhs, Buddhists and Jains) have been treated as major religions as they are numerically prominent. Those not belonging to any of those religious communities have been classified under the category "other religions and persuasions" while those who did not state any religion have been classified under the category "religion not stated".

Annexure V(a) below presents religionwise data of the state of Bihar and district of Hazaribag alongwith their percentage distribution according to the 1991 census.

It is evident from the above annexure that Hindus form the main bulk of the society both in the state (82.4 %) and in the district (85.6 %). Next major constituent of the society are Muslims both in Bihar state (14.8 %) and Hazaribag district (13.2 %). The proportion of Muslims in the district is on the lower side compared to state average. Except Hindus and Muslims the proportion of all other religions and persuasions are negligible both in case of the state and the district. However, numerically with respect to state, Christians (8,43,717), Sikhs (78,212), Jains (23,049) and Buddhists (3,518) have been returned in 1991. With respect to district Christians (20,767), Sikhs (8,595), Jains (2,907) and Buddhist (67) have also registered their presence.

The Annexure reveals that proportion of Hindus in district of Hazaribag and most its C.D. Blocks are higher compared to the state average and inverse is true with respect to Muslim population in the district. Hindus are in lower proportion in C.D. Blocks Jainagar(82.2%), Katkamsandi(73.9%), to the

state average. The proportion of Sikhs, Jains and Buddhists are negligible in all the C.D. Blocks except Ramgarh from which about 2 percent Sikhs have been returned. 1 to 2 percent Christians have been reported from C.D. Blocks Simaria, Keredari, Katkamsandi, Hazaribag, Churchu and Patratu. The percentages are on the higher side of both state and district averages.

Annexure VI(a), VI(b), VI(c) and VI(d) presented above furnish relevant data on marital status pertaining to the district of Hazaribag and state of Bihar as a whole based on 1991 census along with the percentage distribution by various age-groups.

It is quite clear from the annexures placed above that Hazaribag district as well as the state of Bihar have a relatively high proportion of "never married" males and "married" females. This may be attributed to the fact that women get married at younger ages than males. As against 54.2 and 54.7 percentage of "never married" males in Bihar state and Hazaribag district respectively, the corresponding proportion among females is 45.2 and 46.8 only. With respect to 'widowed' males are on the lower side compared to females both in the state and the district. The difference between males and females population under this category of marital status is significant but the difference is more marked in the district as against 1.6 percent males there are 5.1 percent females widowed in the district of Hazaribag. With respect to "divorced or separated" the proportion of males is on the lower side compared to females in the district though the figure is only 0.2 percent.

The age-group wise data clearly show that in the lower age group such as 10-14 years married females outnumber married males both in the district and the state suggesting that child marriage among females is more common than males.

It is also interesting to observe that the proportion of "never married" females in age-group 15-19 and above was much lower than the males both in case of the district and the state.

Literacy is one of the important characteristics of population on which information is collected in census. Apart from collecting data on number of literates the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the census has already been explained in the beginning of this publication.

A proper index of literacy is provided by the proportion of literates and educated persons to the total population. The literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 census was 38.5 percent. Male literates greatly outnumber female literates as the literacy rate for males according to 1991 census was 52.5 while for females the literacy rate was 22.9 percent. That is to say for every 15 male literates there were only 6 female literates.

With respect to Hazaribag district the over all literacy rate according to 1991 census was 38 percent, about half percent less than the state literacy average and this due to poor female literacy rate compared to male literacy in Hazaribag district.

The male literacy in the district was nearly one percent higher at 53.4 and female literacy lower by over one and half percent at 21.2 compared to the state female literacy rate.

Annexure VII(A) and VII(B) presented above furnish data regarding absolutes number of illiterates literates and educated person by different level of education for various age-groups.

A breakup of literate population by various educational levels reveals that 20.3 percent males and 27.2 percent females in the state were such who were literates but without attaining any educational level, 21.6 and 26.2 percent males and females respectively in the state according to 1991 census had crossed the primary or junior basic standard, 26.4 and 26.9 percent males and females respectively had passed the middle examination while 31.7 and 19.7 percent males and females respectively in the state were such who were matriculates and above. The difference between males and females was significant among matriculates and above as the proportion of female literates who had passed the matriculation and above examination were in the state 12 percentage points less than males. It was suggestive of a higher rate of female drop out at higher level of education. With respect to the district of Hazaribag the position of literacy by various levels of education was more of less same compared to state average with a difference that in case of district the proportion of literacy in lower levels (primary and below) were on the higher side compared to state average while inverse was true for middle and above levels of education. Sexwise level of literacy also disclosed

female dominance over males in term of proportion in lower levels of education such as Primary and below in the district but in case of the state that trend continued upto middle level.

Language, which is the medium of conversation is an important attribute of population. The census of India has brilliant history of collecting and publishing data on language during successive decennial censuses over a century. During 1991 census also, as in previous censuses, the mother tongue as returned by each individual was collected. Annexure VIII(A) placed below presents distribution of different mother tongues (languages mentioned under 8th schedule of constitution of India) as returned during 1991 for the state of Bihar and district of Hazaribag.

It can be observed from the annexure that speakers of the scheduled languages constitute the major proportion of population in the state of Bihar as well as in the district of Hazaribag. Hindi, the main mother tongue of district was returned by 87.9 percent of total population while 80.9 percent of state population had returned Hindi as their mother tongue during 1991 census. Urdu was the second most popular language both in the district and the state as 7.4 percent of district and 9.9 percent of state population havereturned it as their mother tongue. The proportion of Hindi speakers in the district in the district was higher by over 7 percentage points. While Urdu speakers were lower by over 2 percentage points in comparison to state average during 1991 census. The proportion of speakers of other scheduled languages were negligible or nil in the district and the state except Bengali which was returned by 0.7 and 2.9 percent of the population in the district of Hazaribag and state of Bihar respectively.
