CENSUS OF INDIA
2001

लोकाभिमुख
PEOPLE ORIENTED

Sudhir Kumar Rakesh
of the Indian Administrative Service
Director of Census Operations, Jharkhand

Foreword

The District Census Handbook (DCHB) is brought out for each district since the first Census after Independence and is one of the most widely used publications compiled and prepared by the Census Organisation on behalf of the State Governments and the Union territory Administrations This publication provides Primary Census Abstract (PCA) data up to village level for the rural areas and provides similar details ward-wise for each city or town, and also provides the present status on availability of important civic amenities/infra-structural facilities in villages and towns of the district concerned This publication has proved to be of immense utility, as it is considered as an essential and basic document for the purpose of delimitation of constituencies, formulation of local level and regional plan and also as an aid to district administration

The publication of District Census Handbook(DCHB) was first introduced during the 1951 Census which contained a few important Census tables and PCA for each village and town of the district Thereafter, at each successive Censuses, the scope and coverage of this publication was enlarged The DCHB published at the 1961 Census provided a comprehensive descriptive account of the district, administrative statistics, Census tables and a village and town directory including PCA The 1971 Census-DCHB series was planned in three parts Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census tables and certain analytical tables based on PCA and amenity data in respect of villages However, in some States, Part-C was confined to district Census tables and in a few cases altogether given up due to delay in compilation and printing At the 1981 Census, new features along with the restructuring of the formats of village and town directory were introduced in the DCHB These were published in two parts for each district While Part-A comprised village and town directories, the PCA of village and town (ward-wise) including the Scheduled Castes and the Scheduled Tribes PCA up to c d block/town level were provided in Part-B In restructuring the format of Village Directory, all the amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given Information on some new items such as Adult Literacy Centres, Primary Health sub-Centres and Community Health Workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme Similarly information on approach to the village was also provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district In the Town Directory, another statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns Apart from this, one column on the Scheduled Castes and the Scheduled Tribes population and another on Adult Literacy classes/centres were added in the Statements IV and V respectively

The manner of presentation of the DCHBs of the 1991 Census was by and large the same as followed in the 1981 Census The format of PCA was, however restructured slightly in the 1991 Census Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census In addition, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census Another important addition in the DCHB of the 1991 Census was the Community Development Block level presentation of village directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, as the CD block is the lowest administrative unit for

intending to use village directory and PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village were provided for the 1991 Census along with the corresponding codes of the 1981 Census.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post-Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the village concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users.

This publication is a collaborative task of the State Government and the Census Organisation. The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the direction of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna on behalf of the State Administration. At the same time, much effort has been made to ensure comparability with the corresponding 1991 Census data and also similar information brought out by the respective State Governments in annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G. Mitra, Deputy Registrar General (C&T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft District Census Handbook manuscripts received from the Census Directorates have been scrutinized in the Social.

J.K. Banthia
Registrar General &
Census Commissioner, India

New Delhi
24th November 2003.

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and since these are printed in every Census because of their wide ranging utility Census after Census muchinnovations/modifications have taken place in the District Census Handbooks in terms of coverage and contents of population data This is the most valuable district level publication brought out by the Census Organisation on behalf of the State Government It, inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective districts This publication has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content The content of Village Directory has been broadened by including additional facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages For the first time in this volume information on the most important commodity manufactured in village is provided In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town During 1981 and 1991 Censuses this information was, however, restricted to class I and class II towns only The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements A significant addition in the publication is inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census The eight digit permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users

The District Census Handbooks are brought out in two parts, viz (i) part A containing the village and town directories and (ii) part B – village and townwise primary Census Abstracts pertaining to general population It also contains the District Primary Census Abstracts for Scheduled Castes and the Scheduled Tribes Population

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the District/Sub-divisional level Officers

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract It takes note of the social, economic and demographic changes which have taken place in the districts during the decade District and C D Block Maps containing useful information on many items have also been included in this volume

This publication is a joint venture of the State Government and the Census organisation

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers

In my office S/Shri Phool Singh Joint Director, A K Saxena Deputy Director and K K Verma, Assistant Director supervised the project at different stages In this voluminous job valuable assistance was rendered by S/Shri D P Choudhary, S K Das Sudhakar, Statistical Investigators Grade-I and Ramesh Prasad, Statistical Investigator Grade-II who were responsible for supervision from beginning to end Shri Mauleswar Singh, Assistant Director has also been associated to monitor the scrutiny work of Village Directory and Town Directory data Sri K K Verma, Assistant Director prepared the first draft under the guidance of Sri S K Sinha, Deputy Director The write-ups on fertility and mortality patterns and migration based on 1991 Census data are contributed by S/Shri D P Choudhary, S K Das Sudhakar and U C Lal, Statistical Investigators Gr I S/Shri D P Choudhary and S K Das Sudhakar prepared the analytical notes on inset tables based on the data of Village Directory, Town Directory and Primary Census Abstracts under the guidance of Shri K K Verma, Assistant Director District and C D Block Maps were prepared in Map Section under the supervision of Sri M Guria Research officer (Map) S/Shri Asharful Hoda and Surendra Mohan Prasad Lower Division Clerks typed the manuscript and S/Shri M C Sharma, STA (Ptg) and N K Jain, Printing Inspector of ORGI helped in getting the volume printed I am thankful to all of them

I am personally indebted to Sri J K Banthia Registrar General and Census Commissioner, India under whose guidance it has been rare privilege to strive for results I am equally indebted to Shri R G Mitra, Deputy Registrar General (C & T), Dr I C Agrawal, Senior Research Officer of Social Studies Division and Dr R P Singh, Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project I am also thankful to Sri S L Jain, Dy Director and Sri R K Mehta, Assistant Director of Social Studies Division who scrutinized the manuscript

District Highlights – 2001 Census

1 Giridih ranks 7th in terms of population (19,04,430) and 7th in terms of area (4,919 sq km) in the state of Jharkhand

2 In terms of population per sq km Giridih is the 8th densely populated district in the state with 387 persons per sq km as against the state's 338

3 Giridih ranks 3rd in terms of sex-ratio (982) against the state's 941

4 There are 224 uninhabited villages (out of 2,756 total villages) in the district of Giridih

5 Pihra (under Gawan C D Block) is the most populated village (11,603) and Tikuli (under Gawan C D Block) is the least populated village (2) in the district

6 The economy of the district mainly depends on cultivation or related work More than 70% of the total workers are engaged in Primary sector

7 C D Block Jamua has the highest number of villages (315) in the district and C D Block Bagodar has the lowest number of villages (140)

8 Parasnath Hill (under Pirtanr C D Block) has the largest area (6,489 hectare) and Charkapathal (under Deori C D Block) and Pandedih (under Bengabad C D Block) have the smallest area (1 hectare each) among the villages in the district

9 Improved drinking water facility figures are impressive - it is available for 78 5 percent of the villages

Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

+ Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

[4] Based on the improved drinding water source, drinking water source, drinding water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note Percentage is to be given in brackets after the number of households
Bathroom means bathroom within the house
Toilet means toilet within the house
Drainage menas closed and open drainage
