Udhawa Jhil of Sahibganj

Udhwa Jhil - It is situated in Udhawa Block of Sahibganj District. It is at a distance of about 20 km from Rajmahal Sub divisional Headquarter. It is only bird's sanctuary in Jharkhand state. It is spread in a large area. Migratory birds of different kinds come to this lake every year during winter season. The lake is ideally located. One side of the lake hilly in nature and other side is plain land. Scenic beauty of the lake makes it an ideal picnic spot.

Annexure III : Various measures of fertility and mean age at marriage 1991 Census 797

Annexure IV : Percentage distribution of migrants by place of birth/place of last residence, 1991 Census 799

Annexure V : Brief account of main religions in the District/C.D. Blocks as per 1991 Census 80

Annexure VI : Marital status of population as per 1991 Census 805

Annexure VII : Age, sex and education in the district, 1991 Census 810

Annexure VIII: Distribution of different mother tongues returned in 1991 Census 814

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance-(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph.(post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only ClassI and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh , Director of Census Operations Jharkhand. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &
Census Commissioner , India

New Delhi

Preface

The history of District Census Handbooks (DCHB) goes back to the 1951 Census and since then these are brought out after every Census because of their wide ranging utility. Census after Census much innovations/modifications have taken place in the District Census Handbooks in terms of coverage and contents of population data.It, inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective districts. The DCHBs are of immense utility to the planners, administrators, academicians and researchers. It will serve the purpose of the ever increasing demand for the micro-level data.

The District Census Handbook (DCHB) in 2001 Census is made more informative and exhaustive in terms of coverage and content. The content of Village Directory is broadened by including information such as bank, recreational and cultural facilities, newspapers and magazines available in villages. For the first time information on the most important commodity manufactured in village is provided. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town. During 1981 and 1991 Censuses this information was, however, restricted to class I and class II towns only. The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition is analytical notes presented as annexure on important aspects concerning Census data on (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census. The eight digit permanent location code numbers (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to few copies for office use keeping in view the demand of data users.

The District Census Handbooks are brought out in two parts, viz. (i) part A containing the village and town directories and (ii) part B – village and townwise Primary Census Abstracts pertaining to general population. It also contains the District Primary Census Abstracts for Scheduled Castes and the Scheduled Tribes population.

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees.

The analytical note is prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

The work of this project has been initially supervised by Shri Sudhir Kumar Rakesh, IAS, ex-Director of Census Operations , Bihar and Jharkhand. I am deeply indebted to him.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the Deputy Commissioners, the Sub-Divisional Officers, the District Census Officers and the Block Development Officers.

In this office S/Shri Phool Singh, Joint Director , A.K. Saxena, Deputy Director and K.K. Verma, Assistant Director supervised the project at different stages. In this voluminous job valuable assistance was rendered by S/Shri D.P. Choudhary, ADCO(T) , S.K. Das Sudhakar, ex-ADCO(T) and Ramesh Prasad, Statistical Investigator Grade-I who were responsible for supervision from beginning to end. Shri Mauleswar Singh, ex-Assistant Director was associated to monitor the scrutiny work of Village Directory and Town Directory data. Sri K.K. Verma, ex-Assistant Director prepared the first draft under the guidance of Sri S.K. Sinha , ex-Deputy Director. The write-ups on fertility and mortality patterns and migration based on 1991 Census data were contributed by S/Shri D.P. Choudhary, ADCO(T) , S. K. Das Sudhakar, ex-ADCO (T) and U.C. Lal , ADCO (T). S/Shri D.P. Choudhary, ADCO (T) and S.K. Das Sudhakar, Ex-ADCO (T) prepared the analytical notes on inset tables based on the data of Village Directory, Town Directory and Primary Census Abstracts under the guidance of Shri K.K. Verma, ex-Assistant Director. District and C.D. Block Maps were prepared in Map Section under the supervision of Sri M. Guria, Research Officer (Map). S/Shri Asharful Hoda, UDC and Surendra Mohan Prasad, LDC typed the manuscript and Dr. Satyendra Kumar Gupta, Statistical Investigator Grade-I and Shri Sant Ram, Statistical Investigator Grade-II helped in getting the volumes ready. I am thankful to all of them.

I am personally indebted to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India under whose guidance, the project for 2001 Census was finalised. I am sincerly thankful to Sri D.K.Sikri , Additional Secretary (RGI) for his guidance in completing this project on time. I am also indebted to Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General (Social Studies) and Dr. R.P. Singh, ex-Deputy Registrar General (Map) and Sri S.L.Jain , Deputy Director for help and encouragement at different stages on time.

S.C.Tripathi
Deputy Director of Census Operations

District Highlights – 2001 Census

1. Sahibganj ranks 14th in terms of population (9,27,770) and 16th in terms of area (1,599 sq.km.) in the state of Jharkhand.
2. In terms of population per sq.km. Sahibganj is the 3rd densely populated district in the state with 580 persons per sq.km as against the state's 338.
3. Sahibganj ranks 10th in terms of sex-ratio (942) against the state's 941.
4. There are 512 uninhabited villages (out of 1,819 total villages) in the district of Sahibganj.
5. Ganga Parshad (under Sahibganj C.D. Block) is the most populated village (21,035) and Nawagachi (under Borio C.D. Block) is the least populated village (2) in the district.
6. The economy of the district mainly depends on cultivation or related work. More than 60% of the total workers are engaged in Primary sector.
7. C.D. Block Borio has the highest number of villages (344) in the district and C.D. Block Sahibganj has the lowest number of villages (32).
8. Kakri bandh bona (under Udhwa C.D. Block) has the largest area (2,739 hectare) and Lalchandpur (under Udhwa C.D. Block) has the smallest area (1 hectare) among the villages in the district.
9. Improved drinking water facility figures are impressive - it is available for 56.2 percent of the villages.

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as

followed during 1981 Census.However, the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four–fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census' of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far as

possible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Set within the lush green region, the district of Sahibganj, with a predominantly tribal population is one of the five districts comprising Santhal Pargana division and forms the eastern most tip of the division. The Rajmahal and Pakur subdivisions of old Santhal Pargana district (with an area of 3405 sq. km.) were carved out on 17th May, 1983 to form Sahibganj district. In fact the old district of Santhal Pargana was split up into 4 districts, viz., Dumka, Deoghar, Godda and Sahibganj on different dates and the old district was subsequently upgraded as division with Dumka town as its headquarters. In its geographical setting the district is almost parallel to its sister district, Godda. It is bounded in east by the state of West Bengal, on the south by the district of Pakaur in the North by river Ganges and on the west by the Godda district. Sahibganj is the administrative headquarter of the district and lies on the bank of the river Ganges. The district was further split up and Pakaur subdivision was carved out from it to form a new district of Pakaur, upgrading the Pakaur subdivision to the status of a district. The left over portion of Sahibganj district which comprised of Rajmahal subdivision only is now the territory of Sahibganj district with 2 subdivisions, 9 C. D. Blocks and 2 towns.

The part of the Sahibganj district lies under Damin-I-koh region. The vast tract of land enclosed between the hill ranges had been assigned this name; Damin-I-koh is a Persian word and means 'Skirts of the hills'. The Damin area stretches from loop line of the Eastern Railway in the extreme north to the river Brahmi in the south.

The history of Sahibganj district is rich and interesting. It centres mainly around the history of Rajmahal Town. The history of Sahibganj district is inseparable from the history of its parent district of Santhal Pargana and is interrelated with the histories of Godda, Dumka and Deoghar districts.

As direct consequence of the Santhal Hul or Rebellion of 1854-55 led by Sidhu and Kanhu brothers Santhal Pargana district was created as a separate district in 1855 by ceding portions of Bhagalpur (which is presently in Bihar) and Birbhum (which is presently in West Bengal) districts. The entire district of Santhal Pargana along with a portion of the present Hazaribag, Munger and Bhagalpur, districts was termed as 'Jungleterry (Jungle Terai) by the English on assumption of Diwani in 1763 from Shah Alam-II at Allahabad after the Allahabad treaty.

Early History

There is recorded evidence that the area was inhabited from very early times by only Malers (souria Paharia) to show that they were among the early settlers of this territory who still reside in some areas of Rajmahal hills. They are considered to be "Malli" mentioned in the notes of Greek ambassador of Seleukus Nikatger Megasthenese who happended to be in Bihar in 302 BC. Till the visit of Chinese traveler, Hiuen Tsang in 645 AD the history of this area was wrapped in obscurity. He probably referred to Taliagarhi Fort when he mentioned about 'the lofty brick and stone tower, not far from the Ganges'. From the description of the tower by Hiuen Tsang Cunninghem came to an idea that it must have been a Buddhist building.

Medieval Period

A continuous history of the district is available from 13th Century when 'Teliagarhi became the main gateway of Muslim armies marching to and fro from Bengal. During the slave dynasty rule in Delhi,Malik Ikhtiaruddin-bin-Bakhtiar Khilji marched towards Bengal and Assam trough Teliagrahi pass. He captured Bihar and its king Lakhshaman Sen fled away to Cooch Bihar. He made deoghar his capital in 1201 AD. In 1538, Sher Shah Suri made fort near Teliagarhi. On 12th July 1576 the battle of Rajmahal was fought and the foundation of the Mughal rule in Bengal was laid. It was Man Singh, the most trusted general of Akbar, who in the capacity of Viceroy of Bengal made Rajmahal the capital of Bengal in 1592. In fact Shah selected the site for the seat of his government but it was Man Singh who executed the plan. Man Singh did fortification and built a palace and established capital there. But this honour of Rajmahal was short-lived, for the capital was shifted to Dacca in 1608. Shortly after this, Teliagarhi became the site of a fierce battle between the rebellious Prince

Shahjahan and Ibrahaim Khan, Viceroy of Bengal and became the master of Bengal for the time being, losing finally in 1624 at Allahabad.

In 1639, Rajmahal regained its glory and was once more made the capital of Bengal by Shah Shiya, the second son of Emperor Shah Jahan, on his appointment as the Viceroy of Bengal. It continued as the seat of the Mughal Viceroy up to 1660 and a mint town till 1661. It was at Rajmahal that Dr. Gabriel Boughton cured a lady of Shah Shuja's harem and became the favourite of the Prince. According to another version the doctor is said to have cured the daughter of Emperor Shah Jahan. Whatever the situation the fact that Dr. Boughton succeeded in securing a *'firman'* from Shah Shuja giving the English the liberty to trade in Bengal. Thus a miunute foundation of the British rule, in a way, was laid here. After the fall of Shah Shuja, the English had to face a lot of trouble and they could regain their privileges after paying Rs.45,000 to the Mughal Governor in 1709. In the year 1757 Siraj-ud-daula was captured here during his flight from the Battle of Plasey.

British Period

The decisive victory at Plassey made the British master of the then Bengal which contained the present Sahibganj District also. In Santhal Pargana a band of simple but determined opponents, the Paharias, were up against them. Paharias were great lovers of freedom and could not tolerate any intruders in their homeland. The English were very much concerned and Warren Hastings organized a special corps of 800 men in 1772 to curb the Paharias. The corps was put under the command of Captain Brooke, who was appointed the Military Governor of Jungle terai. He partly succeeded in his mission. Captain Browne, who succeeded in 1774, found himself busy mostly in suppressing the rebellion of the Bhuiyas. He however, prepared a scheme to win over the Paharias, which was left to be elaborated and put into action actually by Augustus Cleveland. He introduced the system of trial of cases by an assembly of chiefs. This system received further sanction by Regulation I of 1796, which made it obligatory on the Magistrate to commit all important cases for the assembly of chiefs. The Magistrate was, of course, to attend the trial as a superintending officer and had the power to confirm or modify the punishment. This show of self-rule continued till 1827 when hill men were declared amenable to ordinary courts of law, though they even then enjoyed the privilege to settle pretty disputes.

One of the successors of Augustus Cleveland was Mr. Sutherland, who in the capacity of Joint Magistrate of Bhagalpur toured the old district of Santhal Pargana in 1818 to enquire into the causes of local unrest and in 1819 suggested, inter-alias, that the hill tracts inhabited by the tribals should be declared the direct property of Government so that they could be looked after better. As a follow up action of the above suggestion, in 1824. John Perty Ward was deputed to demarcate the Government Estate. He was assisted by Captain Tanner, a Survey Officer. This Estate was named "Damin-I-Kih", a Persian term meaning, 'skirts of the hills'. The work was over in 1837 and Mr. Pontet, Deputy collector was made In-charge of the revenue administration of the Damin area in the same year. The pouring in of Santhals were encouraged for clearing the jungle for the purpose of cultivation. One got the impression that all was well with the administration and that the Santhals were happy. But it was illusive. The internal set-up of the administrative system could not ensure proper justice to the common man and there was a deep underlying discontent among the simple minded but excitable santhals.

Santhal Reballion (Hul),1855

Santhal settled in the district migrating from Birbhum district in West Bengal between 1790 to 1810. As per William Hunter "The permanent Settlement for the land tax in 1790 resulted in general extension of tillage and the Santhals were hired to get rid of the lowland wild beasts which, since the great famine of 1769, had everywhere encroached upon the margin of cultivation".

The Santhals who were encouraged to settle in the district were simple and hardy. Their words were a knot of tie. Thus they fell an easy prey to the unscrupulous hill men and non-Santhal traders. Chaudhary, P.C. Roy held the view that "It was common practice for the hill men to apply for grant of land on condition of cultivating it themselves but they frequently gave it to the Santhals, in the hope of collecting rents from them. *Baniyas* and *Mahajans*, made heavy extraction from the innocent Santhals and there was no check on them. The local

administration was extremely corrupt. In the area where Santhals had settled in large numbers, the Naib Sayawals, assistants of the English superintendents, were greedy and oppressive". The police were equally corrupt. The Santhals were used to ready justice at no cost. But to add to their hardship they had to trek a long way, either to Jangipur in Murshidabad district or to Bhagalpur for justice as the civil and criminal courts were located there. If at all they could get the justice there, it proved too costly for them. To add to their injury the court staff and lawyers all pounced on them and exploited them to the maximum.

Besides, there was the '*Kamianti*' system. The idea of it was repayment of a debt by physical labour. In practice, however the debtor worked in many cases for a generation or two and yet the loan, no matter how small, could not be repaid. The mahajans were crooked and took advantage of the meekness of Santhals. Disgruntled, thus the Santhals felt insecure and their discontent was sharpened as their co-tribesmen outside the clutches of *Mahajans* and *Banias* earned handsome wages in the forests which were being cleared for the rail lines to be laid. These entire facts and circumstances led to the Santhal Hul or Rebellion of 1855.

The Santhals got leaders in Sidhu, Kanhu, Chand and Bhairab-all the four brothers of village Bhognadihi near Barhait. They declared themselves to be the messengers of *Jahar*-era the celebrated deity of the Santhals. Soon their home became a place of pilgrimage for the Santhals and thousands started pouring in from different parts of the district. Chandrai and Simgrai were also the main figures. Singrai was the son of Baijal Manjhi of Littipara. Kanhu was killed in action and Sidhu was arrested and hanged at Barhait.

The object of the Santhal uprising was the economic emancipation of the Santhals. The first spark of the revolt was ignited at Littipara. Kena Ram Bhagat was a leading merchant and moneylender of Amrapara. The altercation, which took place, led to the arrest of Baijal Manjhi, who was sent to Bhagalpur jail where he died shortly after, without any trial. His son Singrai raised the banner of revolt who was also hanged in Barhait Bazar after summary trial. The Santhals became infuriated and Hul ensured as precursor of freedom movement.

Without going in depth of the disturbance, the foreign rulers took it as a challenge to their authority and pounced upon the Santhals with might and engaged troops to quell the disturbances. As the English tried to arrest the Santhals and thereby protect the 'dikus' or the disturber whom the Santhals had branded as their enemy, the trouble spread over a large area covering present Santhal Pargana division, Birbhum, Bankura and Hazaribag districts. A large number of troops were pressed into action and all sorts of atrocities were resorted to. But for a brief lull for about a month in September 1855, waves of rising continued upto December 1855. Martial law was proclaimed on the 10th November 1855 and with iron hands, the British Government succeeded in suppressing the rebellion ruthlessly by December 1855. On the 3rd January 1856, the operation of the Martial law was suspended.

Aftermath

No doubt, the Santhals were beaten up, but the extraordinary courage and resolve shown by them during the rebellion left their impression on the British rulers. They realized that reasonable demands of Santhals must be met if the government wanted to rule over the area. A separate district was created vide Act XXXVII of 1855 and it was given the name of Santhal Pargana division. This was done perhaps in order to appease the Santhals. Steps were taken to remedy the grievances of the Santhals and to give them a homeland with a sense of security.

The 1857 Revolt

The 1857 revolt touched the Santhal Pargana though the Santhals were too crippled to rise again so shortly after the *Hul*. The sepoys of the 5th Irregular Cavalry stationed at Rohini revolted and Adjutant Sir Norman Leslie was killed and commandant Major Macdonald and Dr. Grant were both wounded on the 8th of June 1857. In June 1857, the 5th Irregular Regiment at Bhagalpur also revolted and marched on to Rohini where they were joined by the comrades of their regiment. From Rohini they proceeded to Bounsi, where the 32nd Native Infantry was stationed. But the untimely leakage and forewarning to the British Officers foiled the attempts

of the sepoys, and thus, nothing noteworthy happened in the district in the First War of Independence.

Freedom Movement

Santhal Pargana was not immune from patriotic fervor, and played its role in the country's struggle for freedom from 1921 onwards. The decision of the Indian National Congress to boycott the Simon Commission and the subservent commotion aroused by it, had its repercussion all over India. Even in the hills and forests of Santhal Pargana, there was a patriot named Lambodar Mukherjee moving and rousing the people telling the simple folk who they really were and what they should be. He brought to them the outside world, so securely closed by the British, with the help of lantern slides.

The district played its role in the salt satyagrah and the Civil Disobedience Movement of 1930 and in the boycott of foreign liquors and cloths. The movement gathered momentum and Government had to send military forces and use violence to control the situation. Paharias reacted very favorably to the Civil disobedience Movement, and some of them moved about appealing the Santhals and the Paharias to join hands with the fighters for freedom.

The 1942 movement also spread to entire Santhal Pargana division and on the 11th August 1942 a general strike was observed. On the 12th August 1942 a procession was taken out at Godda and soon the entire district was aflame. Thus the district of Santhal Pargana marched hand-in-hand with other parts of the State in the protracted struggle for country's freedom which yielded the result on 15th August 1947 in the form of the end of slavery.

Post 1947

Government considered the tribals and hillmen as demographically underdeveloped section of society and embarked on policies and plans for their emancipation. But the major portion of Government activities meant for enlistment of tribals, percolated to implementing agencies. Exaction of tribals by *baniyas* and *dikus* continued. The Jharkhand Movement for more empowerment and demand for separate statehood thus gained momentum and finally on 15th November 2000, the separate state of Jharkhand came into existence comprising the 18 districts of the Chotanagpur and Santhal Pargana division.

(iii) Administrative set -up

The district of Sahibganj consists of the following administrative and civic units:

Name of Subdivision	Name of Community Development Block	Name of Town with civic status
1.Sahibganj	1.Sahibganj	1.Sahibganj(M)
	2.Borio	
	3.Mandro	
	4. Barhait	
2. Rajmahal	5. Rajmahal	2. Rajmahal(NA)
	6. Barharwa	
	7. Udhwa	
	8. Taljhari	
	9. Pathna	

The total number of villages in the district is 1773, of these 1260 are inhabited and 513 uninhabited.

Deputy Commissioner is posted in the district who is the top most official of Revenue and civil administration. He belongs to I.A.S. cadre. Deputy Commissioner conducts development and welfare works in the district. He is assisted by officers belonging to State cadre. The district has two subdivisions which is headed by a subdivisional officer either from I.A.S. or J.P.S.C. cadre. S.D.O. is under direct authority of D.C.

Judicial Administration : The Judges and Munsif magistrates are posted at district and sub-division who administer and deliver justice of different kinds.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

Police Administration : The Superintendent of Police, Sahibganj is the head of the district police administration who is either from the Indian Police Service or the Jharkhand Police Service. In the subdivision of the district, the Deputy Superintendent of Police is posted who keeps control on police administration.

(iv) Physical Features

The district may be divided into three natural divisions. One is the hilly portion stretching from the

bank of the Ganges in the north to the border of Bengal in the South. The hilly region may also be divided into once earmarked as Damin-I-koh area and non-Damin-I-koh area. Out of 9 C.D. Blocks Borio, Barhait, Taljhari, and Pathna lie under the Damin-I-koh area, which means 'skirts of the hills'. The hill ranges of entire Santhal Pargana division enclose about 5120 sq.km., of hilly t rack, out of which about 3471 sq.km. are kown as Damin-I-koh. Actually, the track known as Damin-I-koh is spread over portions of three districts Sahibganj, Godda and Dumka. Of the three districts, lions share of Damin area belongs to Sahibganj District. The hills and slopes are covered with forests, once dense but scanty now. The valleys have cultivable lands, yielding mostly paddy.

The second portion consists of the uplands, undulations long ridges and depressions. This area has plenty of fertile lands and is richly cultivated.

The third region is a narrow strip of low, fertile, alluvial plain laying between the Ganges and the hills running along the loop line of the Eastern Railway.

Rivers

The river Ganges forming the northern boundary of the district enters at its north western corner and journeys eastward up to Sakrigali where it takes a turn to the south and forms the eastern boundary of the district up to a little beyond Radhanagar in Rajmahal subdivision. The river has been drifting gradually to the north and the Sahibganj town, which was once on the riverbank, is now about a mile away. The average width of the Ganges in the district is about 4 and half kilometers. It generally swells during the rains and inundates the lowlands lying east of the loop line. There is a ferry across the river between Maharajpur ghat in the Sahibganj district on one side and Manihari ghat in the Katihar district on the other side. Country boats plying in the river also connect Rajmahal and Malada (W.B.).

River Gamani emerges from the southern region of the Rajmahal hills. It flows in a north-easterly direction up to Barhait valley where it is joined by the river Mural. The joint stream takes a south-eastern turn and joins the Ganges a little beyond the district boundary.

Forest

Owing to large scale unscrupulous felling the region once known for its thick and extensive forests is now bereft of much of its jungle wealth. The Forest department has under taken afforestation of these areas to some extent.

The most common tree found in the district is sal (Shorea robusta). Some teak of inferior variety is also found. Some other trees found are jackfruit, murga, simal, bamboos, asan and satsal. Sal and simal logs and jackfruit are exported in large quantities to the neighboring districts and also to the places outside State.

Live Stock

Stray cattle are a common site in the district. Despite the large population of cattle the yield of milk in the district is poor. A typical cow or bullock of the district is a low height rickety cattle wearing a gloomy look. In order to improve the breed of cattle quickly and also at low cost, artificial insemination centers and sub-centers have been opened at various places in the district.

Fisheries

The extensive bed of the river Ganges at Sahibganj and Rajmahal offers one of the best fields in the state for collection of fish spawn and fishing. The spawn of Rohu, Katla, Mirgal, Catfish and Hilsa is collected from the Barhait Valley. The Dolphin is also commonly seen in the Ganges.

Mines and Minerals

The Rajmahal Hills are the source of building and road stones. Most of the quarrying is done by the side of the loop line of the Eastern Railway. Kaolin is found near Mangal Hat in Rajmahal subdivision. Bentonite available in some places is used by women-folk as hair washing material and now a days it is getting popularity among urban ladies as *Multani Mitti* and opening the door for its exports to far flung metros.

Industry

There is large number of handloom units in the districts as the Santhals mostly use handloom fabrics. The traditional cottage and village industries practiced by the Santhals and the Paharias constitute tasar rearing, village blacksmithy and carpentry, handloom

weaving, rope making, bidi making, earthen ware making, stone ware making etc.

There is no large scale industry available in the area mainly due to lack of infrastructural support. A number of small-scale industries have been set up in the district. But still there is a large potential for setting up more industries.

Trade and Commerce

Sahibgang is by far the most important place for trade and commerce in the district. Wholesale trading in food grains is mostly carried on in Sahibganj. The main imports of the districts are linseed, mustard seed, tobacco, raw cotton, sugar refined and unrefined, molasses, salt, kerosene oil, coal, coke, gunny bags, gram, wheat and maize. The main exports are paddy. Jawar, sabai grass, stone chips, hides, fibres, kaolin and bentonite. The fish trade of Rajmahal and Sahibganj has considerable turnover and has an assured market in the nearby places especially Kolkata.

Communication

Road – The district has a good network of roadways and the river Ganges provides water link also for such purposes. No important place in the district is left unconnected by a metalled road. The Jamtara-Dumka-Sahibganj road provides a link with Asam after ferry across the Ganges and is quite busy. The road between Farakka and Bhagalpur has been upgraded as NationalLHighway.

Railway – The district is deprived of adequate railway communication as it lies on the Howrah-Bhagalpur loop line. Both the subdivisional headquarters have railway station. Presently there is rail connection to Howrah, New Delhi and Patna.

Waterways – The only navigable waterways is the river Ganges. The railways maintain a ferry steamer service between Maharajpur and Manihari Ghat, which is directly linked to the Guwahati highway.

Electricity and Power

The district receives most of the power supply from the Super Thermal Power Station at Kahalgaon. While all the main areas of the district have been electrified still the supply of power in the rural areas, is not up to the marks. Rural electrification is comparatively slow.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud,

may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

welling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be

one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for

rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i)A minimum population of 5,000;

ii)at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

UrbanAgglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Jharkhand are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Chamar, Mochi
6. Chaupal
7. Dabgar
8. Dhobi
9. Dom, Dhanger
10. Dusadh, Dhari, Dharhi
11. Ghasi
12. Halalkhor
13. Hari, Mehtar, Bhangi
14. Kanjar
15. Kurariyar
16. Lalbegi
17. Musahar
18. Nat
19. Pan, Sawasi
20. Pasi
21. Rajwar
22. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara

4. Bathudi
5. Bedia
6. Binjhia
7. Birhor
8. Birjia
9. Chero
10. Chik Baraik
11. Gond
12. Gorait
13. Ho
14. Karmali
15. Kharia
16. Kharwar
17. Khond
18. Kisan
19. Kora
20. Korwa
21. Lohra
22. Mahli
23. Mal Pahariya
24. Munda
25. Oraon
26. Parhaiya
27. Santhal
28. Sauria Paharia
29. Savar
30. Bhumij

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.—A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1,000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1,000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1,000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1,000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1,000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1,000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age and sex group per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1,000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$\text{IMR} = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$\text{NMR} = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$\text{PMR} = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high

in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect

unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

Population of the Sahibganj district during 1991 was 1,301,088 Hindus constitute over 68.6 percent (8,92,511persons) of the population in the district followed by Muslims 28.2 percent (3,66,961 persons) and Christians 2.7 percent (35,269). All other three major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Sahibganj district during 1991 was 1,301,088. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Sahibganj district, Hindi, the main mother tongue of the district was returned by 27.5 percent (358,268 persons) of the population. The corresponding percentage for the Bengali, the second most prominent language spoken in Sahibganj district, was 26.6 percent (345,973 persons). The third most prominent language spoken in Sahibganj district was Urdu which constituted 8.3 percent (108,393 persons). Speakers of other Scheduled languages were very thin in number than the three described above.

Note on important SCs and STs in the district of Sahibganj during 1991 Census

The population of the Scheduled Caste in Sahibganj district during 1991 was 70,788. The SC population is quite low in the district since Sahibganj district basically was dominated by Scheduled Tribes population as it formed part of Chota Nagpur plateau region. Numerically the five important SCs in the district were (i) Chamar/ Mochi (16,286) (ii) Dusadh / Dhari / Dharhi (8,607) (iii) Dom/Dhangad (7471) (iv) Rajwar (6559) and (v) Dhobi (5886). Their respective proportion to total SC population were 23.0%, 12.2%, 10.6%, 9.3% and 8.3%. It can be seen that Chamar/Mochis were numerically far ahead than the other four Scheduled Castes constituting little short of one-fourth of the total Scheduled Castes in the district. Dusadh and Dom were also quite in a good number in the district though they taken together constituted nearly 23.0 percent of the total SC population in the district. Turi and Bhuiya were numerically less as compared to the five SCs population mentioned above. Bauri and Nat were the other two Scheduled Castes in the district though small in proportion but are quite conspicuous. The other Scheduled Castes are quite insignificant so far their percentage to total SC population in the district is concerned.

The population of the Scheduled Tribes in the district of Sahibganj during 1991 Census was 507,321. Numerically the five important STs in the district were namely (i) Santal (ii) Sauria Paharia (iii) Mal Paharia (iv) Kharwar and (v) Oraon. The population of Santal was as high as 405,459 constituting as much as 79.9 percent of the Scheduled Tribes population. The other four STs were far behind in number. Sauria Paharia, with 27,504, Mal Paharia with 26,026, Kharwar with 14,950 and Oraon with 7118 population constituted meager 5.4 percent, 5.1 percent, 2.9 percent and 1.4 percent respectively of the total ST population. Munda which had a population of 6,352 comprised 1.3 percent of the ST population, Lohara/ Lohra with 5925 persons

constituted 1.2 percent, Parhaiya with 5395 constituted 1.1 percent while Mahli having 5167 persons during 1991 comprised only 1.0 percent of the total ST population in the district. The presence of all other Scheduled Tribes (other than the STs mentioned above) was very nominal or almost negligible in the district. Thus, Sahibganj district appeared to be dominated by Santalis, as the other STs were not in significant proportion in the district.

(vii) 2001 Census findings- population,its distribution

The district of Sahibganj, with a population of 927,770 according to 2001 Census, is divided into 9 Community Development Blocks comprising 1773 villages and 2 towns. With 3.44 percent of the total population of the State, Sahibganj is a medium sized district and ranks 14th in the state in order of population. The population of males and females are 477,662 and 450,108 spread over 2.0 percent area of the State. Barharwa (143,433) is the most populous while Mandro (59,780) is the least populated C.D. Block in the district.

Tables 1 to 52 presented below are based on Primary Census Abstract, Village Directory, Town Directory and Houses and Households Amenities data of 2001 Census which give insight into the colour and texture of inhabitants in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial number	C.D. Block	Population 1991 Total	1991 Rural	1991 Urban	Population 2001 Total	2001 Rural	2001 Urban	Percentage decadal variation 1991-2001 Total	Rural	Urban	Percentage urban population 1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Sahibganj	106,624	57,367	49,257	139,809	59,655	80,154	31.1	4.0	62.7	46.2	57.3
2	Mandro	46,765	46,765		59,780	59,780	0	27.8	27.8		0	0
3	Borio	68,276	62,731	5,545	82,039	82,039	0	20.2	30.8	-100.0	8.1	0
4	Barhait	91,225	91,225		109,420	109,420	0	19.9	19.9		0	0
5	Taljhari	53,566	53,566		64,092	64,092	0	19.7	19.7		0	0
6	Rajmahal	104,393	90,435	13,958	131,283	113,306	17,977	25.8	25.3	28.8	13.4	13.7
7	Udhwa	103,417	103,417		130,184	130,184	0	25.9	25.9		0	0
8	Pathna	55,353	55,353		67,730	67,730	0	22.4	22.4		0	0
9	Barharwa	107,216	107,216		143,433	143,433	0	33.8	33.8		0	0
	District Total:	**736,835**	**668,075**	**68,760**	**927,770**	**829,639**	**98,131**	**25.9**	**24.2**	**42.7**	**9.3**	**10.6**

It transpires from Table-1 above that rise in the population of this district during 1991-2001 decade has been of the order of 25.9 percent. The rural population in the district has increased by 24.2 percent while the urban population growth over the decade has been to the extent of 42.7 percent. As we know, rural-urban migration is an important factor which always leads to rapid expansion of the urban unit. The district of Sahibganj also appears to have some impact in the growth of its population due to migratory movement towards urban sector of the district over the decade. Among the C.D. Blocks, Barharwa has shown the highest increase in population over the decade with 33.8 percent. The next highest increase in population is observed in Sahibganj C.D. Block with 31.1 percent followed by Mandro, Rajmahal and Udhwa C.D. Blocks with 27.8 25.8 and 25.9 percent respectively. Sahibganj Block has recorded higher percentage decadal variation probably due to Sahibganj town, the headquarters of the district, located in this block. Percentage decadal variation has been observed to be the least in the case of Taljhari and Barhait C.D. Blocks with 19.7 & 19.9 percent respectively. So far the increase in rural population among various C.D. Blocks during 1991-2001 is concerned, it is noticed that Barharwa block (having no urban unit contained in it) has registered the highest population growth with 33.8 percent while Sahibganj block has registered the least rural population growth with only 4.0 percent. Among the 2 C.D. Blocks, which comprise urban units within them, Sahibganj has experienced the maximum percentage decadal variation with 62.7 percent probably because of Sahibganj (M), the headquarters town of the district, located in this block. Rajmahal is the other C.D. Block which contains 1 urban unit, viz., Rajmahal (N.A), the percentage decadal variation of this town being 28.8 percent, lower than the district urban average of 42.7 percent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001 .

Serial number	District/C.D.Block	Total number of inhabited Village	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001 (CONCLD.)

Serial number	District/C.D.Block	Number and percentage of village	Population 5000-9999		Number and percentage of villages	Population 10000 and above	
			Males	Females		Males	Females
1	2	22	23	24	25	26	27
1	Sahibganj	2 (8.7)	8,410	7,707	1 (4.3)	11,126	9,909
2	Mandro	0 (0.0)	0	0	0 (0.0)	0	0
3	Borio	1 (0.4)	3,548	3,224	0 (0.0)	0	0
4	Barhait	1 (0.5)	3,860	3,740	0 (0.0)	0	0
5	Taljhari	0 (0.0)	0	0	0 (0.0)	0	0
6	Rajmahal	2 (2.0)	5,867	5,280	2 (2.0)	14,639	13,786
7	Udhwa	8 (10.1)	29,817	27,955	2 (2.5)	11,947	11,246
8	Pathna	0 (0.0)	0	0	0 (0.0)	0	0
9	Barharwa	2 (1.3)	5,998	5,647	1 (0.6)	5,904	5,356
	Districts (Rural) Total:	**16 (1.2)**	**57,500**	**53,553**	**6 (0.5)**	**43,616**	**40,297**

It can be seen from the Table that the maximum number of villages in the district lie in the population range of less than 200 accounting for 44.8 percent of the total inhabited villages, closely followed by villages in the population range of 200-499 accounting for 21.8 percent of the total inhabited villages. The percentages of population in the above two population ranges are 6.29 percent and 11.05 percent of the total rural population of the district respectively. The villages in the population range of 500-999 constitute 18.4 percent of the total inhabited villages and in these villages the percentage of population is as high as 20.31 percent. The proportion of villages lying in the higher population ranges are comparatively much lower vis-à-vis, those lying in low population ranges as is evident from the table above. It indicates that, by and large, the villages in the district of Sahibganj are sparsely populated.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicale in respect of Sahibganj district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	286	21.9	111,670	13.5
11-20	2	0.2	42	0.0
21-50	28	2.1	2,713	0.3
51-100	89	6.8	10,015	1.2
101-200	209	16.0	45,791	5.5
201-300	148	11.3	65,788	7.9
301-500	204	15.6	126,491	15.2
501 +	341	26.1	467,129	56.3
Not known	0	0.0	0	0.0
District Total:	1,307	100.0	829,639	100.0
Population Density (Rural) of the district:			541.8	

The data presented in the above table highlights the fact that maximum proportion of villages in Sahibganj district lie in the density range (persons per square kilometer) of 501 and above with 26.1 percent of the total inhabited villages. This constitutes as much as 56.3 percent of the rural population of the district. This group of villages is followed by villages in the density range of 0-10 which accounts for 21.9 percent of the total inhabited villages and comprise 13.5 percent of the total rural population. The next in order is the group of villages lying in the population density range of 301-500 comprising 15.6 percent of the inhabited villages in the district and constituting 15.2 percent of the total rural population which is slightly higher than the villages lying in the population density range of 0-10 as discussed above. It may further be seen that though the proportion of villages lying in the population density range of 101-200 is 16.0 percent, the percentage of population is meager 5.5 of the total rural population. The proportion of villages in the population density range of 11-20, 21-50, 51-100 are comparatively much lower and at the same time the percentage of rural population in these groups of villages are also significantly very low. The population density of the district (rural) is around 542 (persons per sq. km.).

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

	State			District		
Census Year	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,032	1,034	955	1,019	1,019	1,009
1911	1,021	1,024	913	1,017	1,024	932
1921	1,002	1,010	809	1,007	1,016	877
1931	989	998	792	1,000	1,011	849
1941	978	990	792	993	1,002	884
1951	961	976	803	988	999	879
1961	960	987	772	976	990	843
1971	945	982	769	959	972	854
1981	940	977	804	955	966	860
1991	922	950	826	924	931	863
2001	941	962	870	942	950	878

Note: Sex ratio has been defined here as the number of females per 1000 males.

In Census, as we know, sex ratio is defined as number of females per 1000 males. If number of females is less than 1000, it is said that sex ratio is unfavourable for females.

It transpires from Table-5 above that the sex ratio for the urban areas of Sahibganj district has comparatively been higher than the sex ratio of urban areas of the state right from Census year 1901 to 2001. During Census years 1901 to 1941 the sex ratio of the district remained quite favourable for females recording more than 1000 females per 1000 males, in the rural areas where as in the case of state, that favowrable situation remainedtill 1921 only. It is further observed that the sex ratio has remained more favourable in the rural areas in all the Censuses both in the district as well as the state. However, during post-independent era the sex ratio has shown a declining trend in the district as well as the state with small variations in some of the Censuses. During 2001 Census, however, the sex ratio has shown an upward trend in Sahibganj district as well as in the state as a whole with 942 and 941 females per 1000 males respectively, which is an encouraging trend.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Sahibganj	884	902	871
2	Mandro	977	977	
3	Borio	975	975	
4	Barhait	965	965	
5	Taljhari	970	970	
6	Rajmahal	926	929	911
7	Udhwa	942	942	
8	Pathna	973	973	
9	Barharwa	940	940	
	District Total:	**942**	**950**	**878**

It may be seen from above that in Sahibganj district there are, on an average, 942 females for every 1000 males. Among the C.D. Blocks, Mandro has recorded the highest sex ratio at the time of 2001 Census (977). It is followed by Borio and Pathna blocks (975 and 973 respectively). On the other hand, Sahibganj Block has registered the least sex ratio (884) in the district. In the rest of the C.D. Blocks, the sex ratio varies between 970 (Taljhari block) and 926 (Rajmahal block). Sahibganj, Barharwa and Rajmahal are the only three C.D. Blocks in the district where sex ratio is lower than the district average of 942. It is further seen that the sex ratio in the C.D. Blocks of Sahibganj and Rajmahal, which have urban components also, is comparatively much less than the C.D. Blocks which do not consist of any urban unit.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Sahibganj	902
2	Mandro	977
3	Borio	975
4	Barhait	965
5	Taljhari	970
6	Rajmahal	929
7	Udhwa	942
8	Pathna	973
9	Barharwa	940
	District (Rural) Total:	**950**

It has already been noticed in Table 6 above that in rural areas of Sahibganj district there are, on an average, 950 females for every 1,000 males. Within the district, the sex ratio varies from 977 in Mandro C.D. Block to 902 in Sahibganj C.D. Block. The C.D. Blocks of Mandro, Borio, Barhait, Taljhari and Pathna have sex ratio higher than the district rural average of 950. The urban areas of Sahibganj and Rajmahal Blocks have registered comparatively much lower sex ratio than the rural sectors of these blocks, as already seen from Table- 6.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	36	2.8	6,130	0.7
700-749	20	1.5	3,728	0.4
750-799	30	2.3	4,537	0.5
800-849	66	5.0	20,341	2.5
850-899	141	10.8	124,729	15.0
900-949	246	18.8	291,548	35.1
950-999	212	16.2	194,189	23.4
1000-1099	348	26.6	152,244	18.4
1100+	208	15.9	32,193	3.9
District Total:	1,307	100.0	829,639	100.0

It is noticed from the above table that the maximum proportion of villages in Sahibganj district lie in the sex ratio range of 1000-1099 and this accounts for 26.6 percent of the total inhabited villages in the district It further reveals that the villages falling in this sex ratio range account for only 18.4 percent of the district rural population. This is followed by villages falling in the sex ratio range of 900-949 constituting 18.8 percent of the total inhabited villages. This range comprises as high as 35.1 percent of the district rural population. The next highest proportion of villages fall in the sex ratio range of 950-999 accounting for 16.2 percent of the total inhabited villages constituting 23.4 percent of the district rural population. It is interesting to note that though there are 208 such villages which lie in the sex ratio range of 1100 and above accounting for 15.9 percent of the inhabited villages but contain only 3.9 percent of the total rural population. The number of villages lying in the sex ratio range below 850 are quite small in number and at the same time the rural population content in these group of villages is also quite negligible.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Sex ratio
1	2	3	4
1	Rajmahal	NA	911
2	Sahibganj	M	871
Sex ratio (Urban) for the district:			878

There is no urban agglomeration in the district of Sahibganj. Rajmahal (NA) and Sahibganj (M) are the only two towns in the district. The sex ratio is quite adverse for females in both the towns, particularly Sahibganj (M) where the sex ratio is as low as 871 females per 1000 males. The position of Rajmahal town is comparatively better with 911 females per 1000 males, which is higher than the district urban average of 878.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total/ Rural/ Urban	Total population in 0-6 age group			Sex-ratio for 0-6 age group

		Urban	0	0	0	

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001 (CONCLD.)

Serial number	Name of C.D.Block	Total/ Rural/ Urban	Total population in 0-6 age group			Sex-ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
8	Pathna	Total	13,703	6,937	6,766	975
		Rural	13,703	6,937	6,766	975
		Urban	0	0	0	
9	Barharwa	Total	30,635	15,484	15,151	978
		Rural	30,635	15,484	15,151	978
		Urban	0	0	0	
	District Total:	**Total**	**194,340**	**98,511**	**95,829**	**973**
		Rural	**177,705**	**89,990**	**87,715**	**975**
		Urban	**16635**	**8521**	**8114**	**952**

It is observed from the Table above that sex ratio of population in the age group 0-6, which works out to 973, is much higher than the sex ratio of the total population (942) in the district of Sahibganj. While the sex ratio for (0-6) population in the rural areas of the district is 975, the seme for the urban areas is only 952. It may further be noticed that the sex ratio in this age group varies between 995 in Taljhari C.D. Block to 941 in Sahibganj C.D. Block. The sex ratio for Sahibganj Block, which also contains Sahibganj town, the lowest in the district. Rajmahal is the other C.D. Block, which consists of an urban component, has also registered sex ratio (971) lower than the district average of 973. The C.D. Blocks of Borio, Taljhari, Udhwa, Pathna and Barharwa have a sex ratio higher than the district average of 973.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. Block	Total population in 0-6 age group			Sex ratio for 0-6 age Group
		Persons	Males	Females	
1	2	3	4	5	6
1	Sahibganj	14,306	7,383	6,923	938
2	Mandro	12,431	6,306	6,125	971
3	Borio	16,785	8,437	8,348	989
4	Barhait	22,267	11,291	10,976	972
5	Taljhari	13,515	6,773	6,742	995
6	Rajmahal	24,837	12,609	12,228	970
7	Udhwa	29,226	14,770	14,456	979
8	Pathna	13,703	6,937	6,766	975
9	Barharwa	30,635	15,484	15,151	978
	District (Rural) Total:	**177,705**	**89,990**	**87,715**	**975**

The above table deals with the sex ratio in the age group 0-6 among the rural population of the C.D. Blocks of the district. It is seen that the sex ratio of rural population varies between 995 in Taljhari Block to 938 in Sahibganj Block. The C.D. Blocks of Sahibganj, Mandro, Barhait and Rajmahal have a sex ratio for rural population lower than the district rural average of 955. Pathna C.D. Block has registered identical sex ratio as has been recorded for the district rural areas.

TABLE 12: SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	191	14.6	4,812	2.7
700-749	40	3.1	2,614	1.5
750-799	68	5.2	7,079	4.0
800-849	69	5.3	7,175	4.0
850-899	99	7.6	19,178	10.8
900-949	114	8.7	32,085	18.1
950-999	94	7.2	33,995	19.1
1000-1099	220	16.8	43,123	24.3
1100+	412	31.5	27,644	15.6
District (Rural) Total	**1,307**	**100.0**	**177,705**	**100.0**
Sex ratio (Rural) for District:		**975**		

It is observed from the above table that 31.5 percent of inhabited villages in Sahibganj district lie in the sex ratio range of 1100 and above for the population in the age group (0-6), which is the highest. This, however, constitutes only 15.6 percent of the district's rural population in the age group (0-6). This is followed by 16.8 percent of the inhabited villages lying in the sex ratio range of 1000-1099. This comprises as much as 24.3 percent of the total rural population of the district in the age group (0-6), which is the highest. It is interesting to note that 7.2 percent and 8.7 percent of the total inhabited villages, which respectively lie in the sex ratio range of 950-999 and 900-949, constitute as much as 19.1 and 18.1 percent of the total rural population in (0-6) age group respectively. These group of villages appear to be large sized as compared to those villages whose sex ratio is more than 1100, so far the population in the age group (0-6) is concerned. It can further be noticed that there are as much as 191 village lying in the sex ratio range of less than 700 constituting 14.6 percent of the inhabited villages but comprise meager 2.7 percent of the rural population in age group (0-6).

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATION/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Rajmahal	NA	3,458	1,744	1,714	983
2	Sahibganj	M	13,177	6,777	6,400	944
	District(Urban) Total		**16,635**	**8,521**	**8,114**	**952**

As already stated, there is no urban agglomeration in the district . So far the two towns are concerned, the sex ratio of population in the age group 0-6 is comparatively much higher and favourable for females in Rajmahal town (983 females per 1000 males) vis-à-vis the headquarters town of Sahibganj where the sex ratio has been recorded as 944 only. The sex ratio of population among 0-6 years of age in the districts urban areas works out as 952 only.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

		Urban	**98,131**	**12,716**	**4,406**	**13**	**4.5**

Census data provides important inputs about the Scheduled Castes and Scheduled Tribes for evolving suitable plans by planners and administrators for the welfare of these communities . The above table and a few other tables presented after this give some basic data about Scheduled Castes and Scheduled Tribes based on 2001 Census.

In 2001 Census, Sahibganj district returned 59,750 persons as Scheduled Castes and 270,423 persons as Scheduled Tribes. These accounted for 6.4 percent and 29.1 percent of the total population of the district respectively.

It can further be seen from the table above that the highest proportion of Scheduled Castes population is observed in Sahibganj C.D. Block accounting for 11.1 percent of the total population of the district. This is closely followed by C.D. Block Barharwa with 10.8% of the total population as Scheduled Castes. These are the only two blocks in the district in which the proportion of Scheduled Castes population is more than that of Scheduled Tribes. In all other C.D. Blocks of the district the percentage of Scheduled Castes is quite low as compared to that of Scheduled Tribes.

As regards Scheduled Tribes the C.D. Block of Borio in which as much as 65.3 percent of the total population is Scheduled Tribes is the highest

in the district. The other C.D. Blocks where the proportion of ST population to total population is quite high, are Pathna (61.8 %), Mandro and Taljhari (59.4 % each) and Barhait (56.3%). In these C.D. Blocks the percentage population content of Scheduled Tribes are almost double than that of the district.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage Scheduled Castes population to total population	Percentage Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Sahibganj	59,655	4,292	6,947	7.2	11.6
2	Mandro	59,780	3,103	35,504	5.2	59.4
3	Borio	82,039	1,773	53,582	2.2	65.3
4	Barhait	109,420	4,546	61,598	4.2	56.3
5	Taljhari	64,092	4,356	38,094	6.8	59.4
6	Rajmahal	113,306	5,316	7,468	4.7	6.6
7	Udhwa	130,184	4,478	7,657	3.4	5.9
8	Pathna	67,730	3,717	41,839	5.5	61.8
9	Barharwa	143,433	15,453	13,328	10.8	9.3
	District (Rural) Total:	**829,639**	**47,034**	**266,017**	**5.7**	**32.1**

The above tables deals with the population content of Scheduled Castes and Scheduled Tribes population in the rural areas of the C.D. Blocks in the district.

The table indicates that the percentage of the Scheduled Castes in Sahibganj district is of the order of 5.7 percent of the total rural population. The highest percentage of Scheduled Castes population is observed in Barharwa C.D. Block with 10.8 percent of the total rural population followed by Sahibganj and Taljhari C.D. Blocks with 7.2 and 6.8 percent respectively. In all the other C.D. Blocks the proportion of SC rural population is less than the district rural average of 5.7 percent.

So far Scheduled Tribes population is concerned, it can be seen from the table above that Borio C.D. Block has the highest proportion of ST population (65.3%) to total population followed by Pathna (61.8%), Mandro and Taljhari (59.4 % each) and Barhait (56.3%) C.D. Blocks. In the remaining 4 C.D. Blocks the proportion of ST population is comparatively much lower as shall be evident from the data presented in the Table above. The percentage of ST population in the rural areas of the district works out to 32.1 percent.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Sceduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Scheduled Castes Percentage
1	2	3	4	5
Nil	864	66.1	0	0.0
Less than 5	180	13.8	6,033	12.8
5-10	123	9.4	13,592	28.9
11-20	61	4.7	9,370	19.9
21-30	27	2.1	6,026	12.8
31-40	16	1.2	3,835	8.2
41-50	9	0.7	2,316	4.9
51-75	15	1.1	4,319	9.2
76 and above	12	0.9	1,543	3.3
District Total	1,307	100.0	47,034	100.0

The above Table furnishes information regarding distribution of villages according to percentage range of Scheduled Castes population to total population.

It is apparent from the Table that there are 864 villages accounting for as much as 66.1 percent of the total inhabited villages in the district where there are no Scheduled Castes population at all. There are 180 villages which lie in the SC percentage range of less than 5.0 percent accounting for 13.8 percent of the inhabited villages in the district comprising 12.8 percent of the SC population where as 123 villages are such which lie in the percentage range 5-10 (constituting 9.4 % of the inhabited villages) and comprise as much as 28.9 percent of SC population in the district. The number of villages in other ranges is comparatively less in number, though in some cases the percentage population content of SC is quite high (particularly in the range of 11-20 and 21-30). It further transpires from the table that percentage of SC is quite low in villages having higher percentage ranges of ST population in the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage Range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	207	15.8	0	0.0
Less than 5	50	3.8	1,811	0.7
5-10	20	1.5	2,027	0.8
11-20	38	2.9	7,119	2.7
21-30	36	2.8	10,956	4.1
31-40	39	3.0	15,746	5.9
41-50	34	2.6	16,349	6.1
51-75	97	7.4	47,319	17.8
76 and above	786	60.1	164,690	61.9
District Total	**1,307**	**100.0**	**266,017**	**100.0**

As regards the population of the Scheduled Tribes, it can be seen from the table above that there are 786 villages accounting for 60.1 percent of inhabitant villages in the district which lie in the percentage range of 76 and above and comprise as much as 61.9 percent of the district rural Scheduled Tribe population. This is followed by 97 villages lying in the ranges of 51-75 constituting 7.4 percent of the inhabited villages and comprising 17.8 percent of the rural ST population in the district. These 2 groups of villages taken together constitute around 68 percent of the inhabited villages and comprise approximately 80 percent of the district rural ST population. The other population ranges consist of less number of villages and at the same time the percentage ST population content is also quite low. .

It is interesting to note that there are 207 villages in the district where no ST population exists.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Rajmahal (NA)	17,977	1,524	153	8.5	0.9
2	Sahibganj (M)	80,154	11,192	4,253	14.0	5.3
District(Urban) Total		**98,131**	**12,716**	4,406	13	4.5

As has already been stated earlier there is no urban agglomeration in Sahibganj district.In the 2 towns of Sahibganj district viz. Rajmahal (NA) and Sahibganj (M) the proportion of Scheduled Castes population to total population is comparatively much higher than the Scheduled Tribes population. In Sahibganj town while the proportion of SC population is as high as 14.0 percent, the percentage population content of ST is only 5.3. Rajmahal town , on the other hand, has registered 8.5 percent of the total population as SC population against meager 0.9 percent ST population. The district urban average of SC & ST population works out to 13.0 & 4.5 percentages respectively.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Sahibganj	864	915
2	Mandro	938	1,023
3	Borio	938	1,002
4	Barhait	927	1,006
5	Taljhari	933	1,002
6	Rajmahal	923	993
7	Udhwa	969	1,012
8	Pathna	949	1,008
9	Barharwa	942	972
	District (Rural) Total	**933**	**1,003**

As has been observed, during various Censuses the number of males and females are rarely at parity and the males have been generally outnumbering the females. The sex ratio is an important demographic characteristics of the population.

It transpires from the table above that the sex ratio among Scheduled Tribes population is quite favourable for females in the rural areas of almost all the C.D. Blocks of the district and much higher as compared tothose of Scheduled Castes. The highest sex ratio among SC is found in case of Udhwa Block (969 females per 1000 males) while it is the lowest in case of Sahibganj Block (864). In the remaining C.D. Blocks the sex ratio among SC varies between 949 (Pathna) and 923 (Rajmahal).

So far Scheduled Tribes are concerned, the sex ratio has been found to be quite favourable for females as in 6 out of 9 C.D. Blocks (Mandro, Borio, Barhait, Taljhari, Udhwa and Pathna) the sex ratio is found to be more than 1000, the highest being 1023 in Mandro Block. Sahibganj Block has recorded the least sex ratio with 915 females per 1000 males.

The average sex ratio among Scheduled Castes is only 933 while among Scheduled Tribes it is observed to be as high as 1003 in the district rural population as a whole.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Rajmahal (NA)	969	889
2	Sahibganj (M)	871	830
	Sex ratio (Urban) for the district:	**882**	**832**

As already observed earlier, there is no urban agglomeration in Sahibganj district.

So far 2 towns of the district viz., Sahibganj (M) and Rajmahal (NA) are concerned, the situation is found to be quite different as compared to rural areas. The sex ratio of the Scheduled Castes population is found to be more than the sex ratio of the Scheduled Tribes population in both the towns. While the sex ratio of both the SC & ST population in Sahibganj town is found to be quite adverse for females, the sex ratio of Scheduled Castes population in Rajmahal town is observed to be favourable for females to a good extent (969 females per 1000 males) . However, in Rajmahal town also the sex ratio of ST population is found to be quite low (below 900).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C.D.BLOCKS,2001

	District Total:	**Total**	**275,829**	**181,716**	**94,113**	**651,941**	**295,946**	**355,995**	**37.6**	**47.9**	**26.6**	**21.4**
		Rural	**217,783**	**147,052**	**70,731**	**611,856**	**278,366**	**333,490**	**33.4**	**43.8**	**22.4**	**21.5**
		Urban	**58,046**	**34,664**	**23,382**	**40,085**	**17,580**	**22,505**	**71.2**	**79.3**	**61.9**	**17.4**

From the data presented in the table it can be seen that for the district as a whole, the literacy rate among males is much higher than that of females. The literacy rates for males is as high as 47.9 percent as against 26.6 percent for females, the difference is of almost 21 percentage points. The C.D. Block wise literacy rate shows that Sahibganj block with 59.5 percent literates is at the top while Udhwa block, with 26.4 percent, is at the bottom. It is also observed, in general, that C.D. Blocks having urban centers (Sahibganj & Rajmahal) have higher literacy rates than other C.D. Blocks corroborating the fact that urban centers have better infrastructure as far as educational facilities are concerned, but Barharwa block has registered comparatively higher literacy rate (42.7%) despite the fact that it does not contain any urban component. It is further seen that the other C.D. Blocks which do not contain any urban units have registered literacy rates lower than the district average of 37.6 percent.

As regards rural areas of the district, the literacy rate is observed to be 33.4 percent, with male literacy rate being 43.8 percent and female literacy accounting for 22.4 percent. On the other hand, the literacy rate in the urban areas of the district is to the extent of 71.2 percent, the male and female literacy rates being 79.3 and 61.9 percent respectively. The gap in male and female literacy rates is observed to be less in urban areas (17.4 percentage points) vis-à-vis rural areas (21.5

percentage points). Among the C.D Blocks, the literacy rate differential is found to be maximum in case of Taljhari C.D. Block (approx. 26 percentage points) while Udhwa C.D. Block has the minimum gap in male and female literacy rates (over 17 percentage points). It has already been seen that Udhwa is the least literate block in the district.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Serial Number	Name of C.D.Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

District (Rural) Total:		**217,783**	**147,052**	**70,731**	**611,856**	**278,366**	**333,490**	**33.4**	**43.8**	**22.3**	**21.5**

The above table deals with the literacy rates in the C.D. Blocks of Sahibganj district (rural population). It is discernable from the figures presented in the table that the literacy rate among rural population in the district is 33.4 percent, the male and female literacy rates being 43.8 and 22.3 percent respectively. Among the C.D. Blocks, the highest literacy rate is observed in Barharwa (42.7 %), while the lowest rate has been recorded in Udhwa block (26.4%). The C.D. Blocks of Borio, Barhait, Udhwa and Pathna (4 out of 9 Blocks) have returned literacy rates among its rural population lower than the district rural average of 33.4 percent. The gap in male-female literacy rate is found to be maximum in case of Taljhari block (25.8 percentage points) while Udhwa block has the lowest gap in male-female literacy rate (over 17 percentage points). The gap in male – female literacy rate in various other C.D. Blocks is observed to be between 20 to 24 percentage points, near to the district rural average of 21.5 percentage points. The table also furnishes data regarding number of illiterates in absolute number in the district rural population for the ready reference of the readers and data users.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001 (CONTD.)

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	79	6.0	4,050	0.5
1-10	252	19.3	61,356	7.4
11-20	264	20.2	120,217	14.5
21-30	282	21.6	229,175	27.6
31-40	188	14.4	170,684	20.6
41-50	114	8.7	102,261	12.3
51-60	55	4.2	73,877	8.9
61-70	38	2.9	42,221	5.1
71-80	22	1.7	19,726	2.4
81-90	6	0.5	4,299	0.5

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001 (CONCLD.)

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
91-99	4	0.3	1,754	0.2
100	3	0.2	19	0.0
District Total:	1307	100.0	829,639	100.0
Literacy rate for District:		37.6		

The literacy data presented in the above table reveal that there are 282 villages, accounting for 21.6 percent of the total inhabited villages in the district, where the literacy rate ranges between 21-30 percent. These villages comprise 27.6 percent of the total rural population of the district. This is followed by 264 villages, constituting 20.2 percent of the inhabited villages where the literacy rate ranges between 11-20 and this comprise only 14.5 percent of the total rural population. The above two villages are followed by 252 villages comprising 19.3 percent of the total inhabited villages where the literacy rate ranges between 1-10 percent and contain 7.4 percent of total rural population. The next in order is 188 villages constituting 14.4 percent of the total inhabited villages and containing as much as 20.6 percent of the total rural population. These four villages taken together account for more than 75 percent of the total inhabitant villages and constitute over 70 percent of the total rural population in the district. The next in numeric order comprises 114 villages (8.7 percent of the total inhabited villages) where the literacy rate ranges between 41-50 percent. These villages constitute 12.3 percent of the total rural population. The number of villages having literacy rate above 50 percent is very low and the proportion of rural population content is also comparatively much less. There are 79 such villages in the district inhabited by 4050 persons where none has been returned as literate.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status UA/Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Rajmahal (NA)	8,381	5,098	3,283	9,596	4,309	5,287	57.7	66.5	47.9	18.6
2	Sahibganj (M)	49,665	29,566	20,099	30,489	13,271	17,218	74.2	82.0	65.0	17.0
	District(Urban) Total	58,046	34,664	23,382	40,085	17,580	22,505	71.2	79.3	61.9	17.4

The district of Sahibganj has no urban agglomeration as already stated. So far literacy status in the towns of Sahibganj district is concerned, it can be seen from the data presented in the table above that Sahibganj town has comparatively much higher literacy rate (74.2 percent) vis-à-vis Rajmahal town (57.7 percent) probably because of being the headquarters town of the district and having more of educational facilities. In Sahibganj town the literacy rate among males and females (82.0 and 65.0%) is also comparatively higher than the male and female literacy rates of Rajmahal town (66.5 & 47.9 percent respectively). The male and female literacy rate differential in Sahibganj town is noticed to be of 17.0 percentage points which is slightly lower than the gap in male-female literacy rates of Rajmahal town (18.6 percent).

TABLE 25: NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial Number	Name of C.D.Block	Number of literates and illiterates									Gap in male-female literacy rate

9	Barharwa	3,149	2,272	877	12,304	5,686	6,618	26.4	36.8	15.3	21.5
District (Rural) Total:		**10,733**	**7,947**	**2,786**	**36,301**	**16,388**	**19,913**	**29.3**	**41.6**	**15.9**	**25.8**

The above Table furnishes data regarding literates and illiterates among the rural population in various C.D. Blocks of the district. It can be noticed from the table that the literacy rate of Scheduled Castes population in the district (rural) is 29.3 percent, the literacy rate among males being 41.6 percent and that of females being only 15.9 percent. The literacy rate is observed to be highest in Borio C.D. Block, with 35.9 percent, while it is found to be the lowest in the case of Udhwa block where literacy rate is only 25.0 percent. The highest and the lowest literacy rate among males are recorded in Borio (49.9 percent) and Barharwa (36.8 percent) blocks. So far female literacy rate is concerned, it transpires from the table that Borio block is again at the top with 21.3 percent literate females. Udhwa block retains the bottom position with female literacy rate of (12.1 percent). The gap in male-female literacy rate is found to be maximum in case of Sahibganj block (difference of 30.8 percentage points), while the literacy rate gap is the lowest in Barharwa block (21.5 percentage points), becouse male literacy rate is also on a lower side. The gaps in male-female literacy rate in Sahibganj, Borio, Barhait, Taljhari and Pathna C.D. Blocks are found to be more than the district rural average of 25.8 percentage points.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Castes Population	Percentage distribution of population
1	2	3	4	5
0	45	10.2	526	1.1
1-10	55	12.4	5,449	11.6
11-20	83	18.7	9,881	21.0
21-30	86	19.4	9,808	20.9
31-40	69	15.6	10,060	21.4

51-60	25	5.6	2,357	5.0
61-70	12	2.7	1,162	2.5
71-80	11	2.5	429	0.9
81-90	1	0.2	33	0.1
91-99	3	0.7	122	0.3
100	8	1.8	22	0.0
District Total:	443	100.0	47,034	100.0
Literacy rate for District (Rural):			29.3	

The table furnishes information regarding distribution of villages (where SC population exists) by different literacy rate ranges of Scheduled Castes. It can be seen from the table that there are 86 villages comprising 19.4 percent of the total inhabited villages in the district where the literacy rate of the Scheduled Castes population ranges between 21-30 percent. This group of villages happens to be the largest one in the district in numeric order and constitutes 20.9 percent of the total rural Scheduled Castes population. This is closely followed by 83 villages (18.7 percent of the inhabited villages) where the literacy rate is in the range of 11-20 percent constituting 21.0 percent of the rural SC population. The third group of villages in numeric order comprises 69 villages (15.6 percent of the total inhabited villages) where the literacy rate ranges between 31-40 percent constituting 21.4 percent of the total rural SC population, the highest in the district. The next in numeric order is a group of 55 villages (12.4 percent of the inhabited villages) falling in the literacy range of 1-10 comprising 11.6 percent of the rural SC population in the district. Aforesaid four groups of villages constitute over 66 percent of the SC inhabited villages in the district and constitute approximately 75 percent of the total rural SC population. The number of villages where the literacy rates of Scheduled Castes is in the literacy range of above 50 percent becomes quite low and the proportion of rural SC population in these groups of villages is also comparatively much less. 45 villages in the district are such where no literate SC population exist and these villages taken together comprise meager 1.1 percent of the total rural SC population in the district. As already seen in the earlier Table, the literacy rate among SC population in the rural areas of the district is to the extent of 29.3 percent only.

TABLE 27 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Rajmahal (NA)	582	368	214	942	406	536	48.8	60.8	36.5	24.4
2	Sahibganj (M)	5,371	3,459	1,912	5,821	2,523	3,298	59.1	71.0	45.4	25.6
	Sahibganj (Urban)	**5,953**	**3,827**	**2,126**	**6,763**	**2,929**	**3,834**	**57.9**	**69.8**	**44.3**	**25.6**

The above Table furnishes data on literates and illiterates among the Scheduled Castes in the towns of the district. It transpires from the table that the literacy rate among the Scheduled Castes in the urban areas of the district is 57.9 percent, the literacy rate in the case of males being 69.8 percent while that for females it is comparatively low, being 44.3 percent. Among the two towns of the district, Sahibganj (M) has recorded higher literacy rate, with 59.1 percent literate Scheduled Castes population as against 48.8 percent in case of Rajmahal (NA). While the male literacy rate is as high as 71.0 percent in Sahibganj town, the female literacy rate is of the order of 45.4 percent only. In Rajmahal town, the literacy rate of males is also quite appreciable being 60.8 percent, on the other hand, the literacy rate among females in the town is comparatively much less, being only 36.5 percent. The literacy gap among males and females is almost similar in both the towns being around 25 percent, the differential being slightly more in Sahibganj town which is identical to the district urban average. It is observed, in general, that males and females both are better educated in urban areas than their counterparts in rural areas. The literacy rate of Scheduled Castes population in urban areas both in case of males and females are found to be comparatively lower than the literacy rate of total population in urban areas of the district (males-79.3 percent, females- 61.9 percent as reflected in Table 24).

TABLE 28 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN C.D. BLOCKS, 2001

Serial Number	Name of C.D.Block	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Sahibganj	3,165	2,040	1,125	3,782	1,588	2,194	58.2	72.1	43.2	29.0
2	Mandro	7,173	4,882	2,291	28,331	12,668	15,663	25.2	34.9	15.9	19.0
3	Borio	8,007	5,775	2,232	45,575	20,984	24,591	18.7	27.0	10.4	16.6
4	Barhait	8,741	6,001	2,740	52,857	24,703	28,154	17.7	24.5	11.0	13.4
5	Taljhari	8,823	6,101	2,722	29,271	12,928	16,343	29.2	40.4	18.0	22.4
6	Rajmahal	1,776	1,262	514	5,692	2,485	3,207	30.2	42.8	17.5	25.3
7	Udhwa	1,028	736	292	6,629	3,070	3,559	17.1	24.6	9.6	15.0
8	Pathna	9,159	5,825	3,334	32,680	15,009	17,671	27.3	35.1	19.7	15.3
9	Barharwa	2,497	1,830	667	10,831	4,930	5,901	24.3	35.0	13.3	21.8
District (Rural) Total:		**50,369**	**34,452**	**15,917**	**215,648**	**98,365**	**117,283**	**23.8**	**32.6**	**15.0**	**17.7**

It can be noticed from the table above that the literacy rate of Scheduled Tribes population in the district (rural) is 23.8 percent, the literacy rate among males being 32.6 percent and the literacy rate of females being only 15.0 percent. The literacy rate is observed to be highest in Sahibganj C.D. Block (58.2) while it is found to be lowest in the case of Udhwa block where literacy rate is only 17.1 percent. The highest literacy rate among males is also recorded in Sahibganj (72.1) while the lowest male literacy rate is observed to be in the case of Barhait and Udhwa blocks with 24.5 and 24.6 percent respectively. So far female literacy rate is concerned, it transpires from the table that Sahibganj block is again at the top with 43.2 percent while Udhwa block retains the bottom position with only 9.6 percent literate females. The gap in male-female literacy rate is found to be maximum in the case of Sahibganj block (29.0 percentage points), while the literacy rate gap is the lowest in Barhait block (13.4 percentage points only). The low literacy rate differential between males and females in this block is on account of very low literacy rate registered both for males and females. The gap in male-female literacy rates in Borio, Barhait, Udhwa and Pathna C.D. Blocks is found to be less than the district rural average of 17.7 percentage points as the literacy rates among males and females have been found to be quite low in these C.D Blocks.

TABLE 29 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED TRIBES POPULATION, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Scheduled Tribes Population	Percentage distribution of population
1	2	3	4	5
0	92	8.4	4,108	1.5
1-10	250	22.7	44,891	16.9

100	18	1.6	112	0.0
District Total:	1100	100.0	266,017	100.0
Literacy rate for District (Rural):			23.8	

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial Number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Rajmahal (NA)	103	64	39	50	17	33	76.9	88.9	62.9	26.0
2	Sahibganj (M)	2,223	1,414	809	2,030	910	1,120	63.3	72.9	51.4	21.6
	Sahibganj (Urban)	**2,326**	**1,478**	**848**	**2,080**	**927**	**1,153**	**63.8**	**73.5**	**51.8**	**21.7**

It is discernable from the above table that the literacy rate among the Scheduled Tribes in the urban areas of the district is to the extent of 63.8 percent, the literacy rate in the case of males being 73.5 percent while that of females it is 51.8 percent. Among the two towns of the district, Rajmahal (NA) has registered higher literacy rate of 76.9 percent as against 63.3 percent literate ST population observed in case of Sahibganj (M), the headquarters town of the district. The situation is found to be just the opposite when compared to Scheduled Castes literate population where Sahibganj town had an edge over Rajmahal town (refer Table 27). So far male and female literacy rates are concerned it transpires from the table that Rajmahal town, with 88.9 and 62.9 percent male and female literacy rates, has an edge over Sahibganj town where male and female literacy rates have been recorded as 72.9 and 51.4 percent respectively. The literacy rate differential between males and females is observed to be higher in case of Rajmahal (NA), being 26.0 percentage points, as against 21.6 percentage points found in the case of Sahibganj (M) which is almost identical to the district urban average of 21.7 percentage points.

The literacy rate among Scheduled Tribes, both in case of males and females in urban areas of the district, is comparatively higher than the literacy rates among Scheduled Castes counterparts.

TABLE 31: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C.D.BLOCKS, 2001

The concept of economic activity and definition of work and workers as well as different classification of workers have already been explained in detail in earlier chapters of this volume. The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers.

Total workers in the district of Sahibganj account for 41.8 percent of the total population whereas the proportion of non-workers is as high as 58.2 percent. Main workers constitute 30.0 percent of the total population. The contribution of marginal workers is to the extent of 11.8 percent.

There is apparently a wide difference in proportion of workers including main workers between the two sexes. The proportion of total workers and main workers is 51.2 and 43.6 percent respectively for males as against 31.9 and 15.6 percent for females which indicates that the participation of females in economically productive work on full time basis is quite low. Another notable feature is the higher percentage of female marginal workers (16.3%) vis-a vis male marginal workers (7.5%) in the district. It may corroborate the fact that apart from household duties women do some work either to assist their counterparts or to supplement the household income, though it may be on a part -time basis. It can be seen from the data presented in the table that the same pattern prevails in most of the C.D. Blocks of the district.

The work participation rate (total workers) is observed to be the highest in the case of Barhait C.D. Block (50.0) closely followed by Mandro block with 48.1 and Udhwa with 48.0 percent workers. The lowest percentage of workers is found in Sahibganj block (27.9). So far main workers are concerned, the C.D. Block of Udhwa is at the top with 35.1 percent closely followed by Mandro (34.4%) and Borio (34.0) blocks while Sahibganj block retains the bottom position having least proportion of main workers (22.1 percent).

As already observed, the female marginal workers have outnumbered the male marginal workers in the district as well as in most of the C.D. Blocks. Barhait block has registered the highest percentage of female marginal workers (22.9) closely followed by Mandro

block (21.2%) and Borio block (20.5%). The lowest proportion of female marginal workers is noticeable in Rajmahal block (5.8%).

So far non-workers are concerned, females are far ahead than males with 68.1 percent against 48.8 percent male non-workers in the district. Shabiganj block has the highest proportion of total non-workers as well as female non-workers with 72.1 and 88.2 percent respectively. Barhait block, on the other hand, has the least proportion of total non-workers (50.0).

TABLE 32: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Serial number	Name of C.D.Block	Persons / Males / Females	Total Population	Main worker		Marginal worker		Total workers (Main and marginal Workers)		Non workers

		Males	73,952	33,177	44.9	3,892	5.3	37,069	50.1	36,883	49.9
		Females	69,481	10,708	15.4	10,548	15.2	21,256	30.6	48,225	69.4
District (Rural)											
	Total:	Persons	829,639	258,047	31.1	105,813	12.8	363,860	43.9	465,779	56.1
		Males	425,418	190,026	44.7	33,371	7.8	223,397	52.5	202,021	47.5
		Females	404,221	68,021	16.8	72,442	17.9	140,463	34.7	263,758	65.3

The above table deals with the same topic as Table 31, the only difference being that the present Table deals with only the rural areas of the district and its C.D. Blocks. The table reveals that the proportion of the total workers, main workers and marginal workers in the rural areas of the district is to the extent of 43.9 percent, 31.1 percent and 12.8 percent respectively which is more or less similar to the position as found in the case of rural and urban areas combined (i.e., for the total population of the district) as reflected in Table 31. The same trend prevails in all the C.D. Blocks, both for males and

females except Sahibganj C.D. Block which contains the headquarters town within its jurisdiction. The slight variation in proportion of total workers, main workers and marginal workers is observed in the rural areas of Rajmahal block which also consists of an urban component.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of Town	Persons / Males / Females	Total Population	Main worker		Marginal worker		Total workers (Main and marginal Workers)		Non workers

As already stated Sahibganj district has no urban agglomeration. The above Table furnishes details regarding distribution of total workers, main workers, marginal workers and non-workers in the two towns of the district. Among these two towns, Rajmahal (NA) has higher proportion of total workers (28.1), main workers (21.6) and marginal workers (6.5) as compared to Sahibganj (M) which has recorded proportion of total workers, main workers and marginal workers to total population as 23.9, 20.6 and 3.3 percentages respectively. The figures of these categories of workers in Sahibganj, the headquarters town is almost similar to the district urban average percentages. The proportion of male workers in the urban areas of the district (40.2) is considerably much higher than the proportion of female workers (6.9). The same situation prevails in both the towns of the district. As regards proportion of main workers in the towns of the district, it is discernable that, by and large, the position remains the same in the two towns. So far male main workers are concerned Rajmahal town with 36.6 percent male workers has an edge over Sahibganj town which has registered 34.8 percent male main workers. The percentage of female main workers in both the towns is quite low with slight variation. So far marginal workers are concerned Rajmahal town with 5.7 percent female marginal workers outnumber Sahibganj town where female marginal workers is only of the order of 1.7 percent.

It further transpires from the table that in contrast to rural areas of the district the proportion of marginal workers in urban areas is significantly low only 3.9 against 12.8 in rural areas. It is also interesting to note that the female marginal workers constitute lower proportion as compared to male marginal workers in urban areas of Sahibganj district (2.5% as against 5.1%). The same situation prevails in both the towns. It appears that females in rural areas are economically more active than their counterparts in urban areas probably due to more opportunities available for women to work in the sphere of agricultural sector in the rural areas.

TABLE 34 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D.BLOCKS, 2001

The relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of workers (main + marginal) according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers. The economic activity in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (30.8) and agricultural labourers (32.6) together constitute 63.4 per cent of the total workers of the district. The primary sector i.e., the agricultural sector has absorbed around two-third of the total workers of the district. Other workers (persons engaged in various types of activities other than cultivation, agricultural work and household industry work) are also in good number as their proportion to total workers in the district is to the extent of 29.4 percent. Household industry workers are meager 7.2 percent of the total workers. By and large, the same situation prevails in majority of the C.D. Blocks of the district. Sahibganj block has recorded higher proportion of "other workers"(53.0%) presumably on account of an urban unit contained in this block which also happens to be the district headquarters. This is followed by Barharwa block where the proportion of other workers is to the extent of 42.0 percent to the total workers. It can further be seen that household industry workers constitute comparatively small proportion (7.2) in the district of Sahibganj. Female household industry workers are more than the male household industry workers (12.3% as against 4.2%) in the district. In Rajmahal block the proportion of female household industry workers is the highest in the district with 34.9 percent may probably be on account of participation of large number of female workers in household industry work like *bidi* making, earthenware pots making etc. It may be interesting to note that in Rajmahal block the percentage of female household industry workers is more than proportion of female workers in other categories of work. However the trend is quite different in other C.D. Blocks of the district where the proportion of female household industry workers is generally less than other categories of female workers.

TABLE 35: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY IN C.D.BLOCKS, 2001

The above table deals with the same topic as Table 34 except that the data presented here relates only to the rural areas of the district as well as its C.D. Blocks.

The situation, as observed for the total areas / population in various C.D. blocks of the district (reflected in Table 34) is, more or less the same for the rural areas of the C.D. Blocks also as shall be evident from the data presented in the above Table. The situation is slightly different in the case of Sahibganj C.D. Block as this block contains an urban unit (the headquarters town) also. It is observed that the proportion of "other workers" in Sahibganj block (rural) is only 25.2 percent, while it was 53.0 percent in that block (rural & urban combined) as reflected in Table 34. Similarly in Rajmahal C.D. Block (rural) the proportion of "other workers" is 27.6 percent as against 31.5 percent in Rajmahal block (rural & urban combined), the variation being much less as compared to Sahibganj block.

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of Town	Persons/ Males/ Females	Total population	Total number of workers (Main + Marginal)	Category of workers			
					Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9

				(23.9)	(3.7)	(9.6)	(4.8)	(81.8)
		Males	42,837	16,914	607	1,518	622	14,167
				(39.5)	(3.6)	(9.0)	(3.7)	(83.8)
		Females	37,317	2,228	106	326	304	1,492
				(6.0)	(4.8)	(14.6)	(13.6)	(67.0)

TABLE 36: DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS, 2001 (CONCLD.)

Serial number	Name and urban status of Town	Persons/ Males/ Females	Total population	Total number of workers (Main + Marginal)	Category of workers: Cultivators	Agricultural Labourers	Household Industry workers	Other workers
1	2	3	4	5	6	7	8	9
District (Urban) Total:		Persons	98,131	24,185	1,015	2,701	1,572	18,897
				(24.6)	(4.2)	(11.2)	(6.5)	(78.1)
		Males	52,244	21,026	881	2,217	816	17,112
				(40.2)	(4.2)	(10.5)	(3.9)	(81.4)
		Females	45,887	3,159	134	484	756	1,785
				(6.9)	(4.2)	(15.3)	(23.9)	(56.5)

It transpires from the Table above that in both the towns of the district, the proportion of "other workers" is comparatively higher than the other three categories of workers, viz., cultivators, agricultural labourers and household industry workers. Sahibganj town has recorded higher proportion of "other workers" constituting 81.8 percent of the total workers as against 64.2 percent in case of Rajmahal (NA) which is comparatively much lower than the district urban average of 78.1 percent. In Sahibganj (M), cultivators, agricultural labourers and household industry workers taken together constitute very small proportion, being slightly over 18 percent only. However, in Rajmahal town the proportion of cultivators, agricultural labourers and household industry workers comprise around one-third of the total workers which is much higher than what is observed in Sahibganj town and also more than the district urban average of approximately 22 percent. Female workers engaged as agricultural labourers and household industry workers are comparatively higher than their male counterpart in both the towns of the district. However, this also holds good for the female workers engaged as cultivators in Sahibganj (M).

(b) Brief analysis of the Village Directory and Town Directory data based on inset tables 37 to 47:

TABLE 37 : DISTRIBUTION OF VILLAGES ACCORDING TO AVAILABILITY OF DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. Block	Number of inhabited village	Type of amenity available: Education	Medical	Improved drinking water *	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approch by pucca road	Power supply

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

This table and a few other tables presented hereafter are based on the infrastructure data published in the Village Directory of this volume.

The above table gives the distribution of villages according to the availability of different amenities in the district.

Educational amenity - There are as many as 609 villages accounting for 46.6 percent of the total number of inhabited villages (1307) in the district where educational facility is available. The situation regarding schooling facilities is observed to be the highest in Pathna block (68.5%) followed by Barharwa (64.5%), Barhait (53.7%) and Rajmahal (53.1%) C.D. Blocks. The proportion of villages having educational facility in rest of the blocks is below 50 percent, varying between 45.1 (Taljhari block) and 31.8 percent (Mandro block)

Medical amenity – Medical facilities of some or other type are available only in 69 villages (5.3 % of the total villages) which is significantly low from any standard. Among the C.D. Blocks, Udhwa has the largest proportion of villages with medical facility, the percentage being 16.5. It is followed by Barharwa (14.8%) and Rajmahal (10.2%) blocks. In rest of the C. D. Blocks the proportion of villages having some or other type of medical facilities is observed to be below 10 percent of their villages. The lowest proportion of villages having medical facilities is observed in the case of Taljhari block with 1.5 percent followed by Borio (1.9%) and Mandro (2.2%) blocks.

Improved drinking water – So far drinking water facility is concerned, it is quite heartening to note that one or other type of such facility is existing in 735 villages constituting 56.2 percent of the inhabited villages in the district. Among the C.D. Blocks, Barharwa, Rajmahal and Sahibganj are such where 75 percent or more proportion of villages have improved drinking water facility, the highest being in case of Barharwa block (93.5%). In Mandro C.D. Block, on the other hand, only 28 out of 179 villages (15.6%) has the privilege of having any kind of improved drinking water facility, which is the minimum in the district and comparatively much lower than other C.D. Blocks.

Post Office – As regards rural areas of the district, the facility of Post and Telegraph Office is available to only 84 villages constituting 6.4 percent of the total inhabited villages in the district. Udhwa C.D. Block has the maximum proportion of villages having postal facility (15.2%) in the district followed

by Barharwa block with 11.6 percent. The situation in these two blocks cannot be said to be satisfactory. The situation in other C.D. Blocks is still worse. It is very disheartening to note that none of the villages in Sahibganj block has the facility of post or telegraph office.

Telephone - The availability of telephone facility in the villages is quite low as only 18 villages constituting 1.4 percent of the total inhabited villages have access to this facility. Among the C.D. Blocks, Udhwa block has the maximum number of villages having telephone facility (6.3%) in the district which is also not a satisfactory situation. The other C.D. Blocks do not have even 2 percent of the villages where telephone facility is available, the worst being Sahibganj and Barhait blocks where none of the villages have access to telephone facility.

Transport and communication - Transport and communication facilities are available only in 79 villages in the district (6.0%). Majority of villages are not connected with any sort of transport, as is evident from the data presented in the table. Rajmahal C.D. Block has the highest proportion of villages (17.3.%) which are connected by bus or rail or navigable river/ canal services, etc. This is followed by Udhwa (13.9%) and Sahibganj (13.0%) C.D. Blocks. In rest of the C.D. Blocks the proportion of villages having transport communication facilities is less than even 10 percent, the least proportion of villages being in case of Borio block where only 3 out of 264 villages (1.1%) is connected by any transport means.

Bank - Banking facility is available only in 34 villages comprising 2.6 percent of the inhabited villages in the district. It can be seen that among C.D. Blocks, Shabiganj has the maximum proportion of villages having banking facility (8.7%) followed by Udhwa C.D. Block with 5.1 percent of villages enjoying banking facility. Mandro and Borio blocks, on the other hand, have only 1.1 percent of villages which enjoy banking facility. In all the other C.D. Blocks, the proportion of villages having banking facility is less than 5 percent of the total villages.

Agricultural Credit Societies - Agricultural Credit Societies are available in only 35 villages constituting meager 2.7 percent of the inhabited villages in the district. Barhait C.D. Block has the largest number of villages (15) having agricultural credit facilities (7.9%). The other C.D. Blocks have less than 5 percent of their villages where any agriculture credit society exists. Mandro is such a block in the district where not even single village has any agriculture credit society.

Approach by Pucca road – Approach road facility is the nerve system of any place. They act as a pull factor for the development and upliftment of the area. Roads may be of any kind but pucca road facilitates movement of transport easily and swiftly. It is discernable from the table that this facility is available in 300 villages constituting 23.0 percent of the inhabited villages in the district. Among C.D. Blocks, Rajmahal is much better placed with 55.1 percent villages having pucca approach road facility and tops the list followed by Barharwa (33.5%) and Udhwa (30.4%) C.D. Blocks, though they are far behind Rajmahal block. Mandro block, on the other hand, has only 5 percent of the villages which have pucca road approach facility, being the least in the district.

Power Supply – The position of electrification of the villages in the district is not very satisfactory as only 119 villages constituting 9.1 percent of the total number of inhabited villages in the district have access to power supply facility. Among the C.D. Blocks, Rajmahal has the largest number of electrified villages with 37.8 percent followed by Sahibganj block with 26.1 percent villages having power supply facility. These two are the only blocks in the district where more than 25 percent of the villages enjoy the facility of power supply. Borio block, on the other hand, has not a single village where power supply facility is available while Barhait block has only 1 village to its credit enjoying this facility.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. Block	Total population of inhabited village	Type of amenity available									
			Education	Medical	Improved drinking water *	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approch by pucca road	Power supply

	District Total:	**829,639**	**646,471**	**159,360**	**673,055**	**185,133**	**50,059**	**138,998**	**104,515**	**90,008**	**354,221**	**186,431**
		(100)	**(77.9)**	**(19.2)**	**(81.1)**	**(22.3)**	**(6.0)**	**(16.8)**	**(12.6)**	**(10.8)**	**(42.7)**	**(22.5)**

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

The above table deals with the proportion of rural population in the district and C.D Blocks served by various amenities and facilities.

The table reveals that 77.9 percent of the rural population is served by educational facility in the district. It would be seen from the table that educational facility is available to 90.9 percent of the rural population in Pathna C.D. Block, which is the highest in the district very closely followed by Barhait C.D. Block where 88.3 percent of the rural population avail of this facility. In Mandro block, on the other hand, only 51.1 percent of the population enjoy educational facility, which is lowest in the district. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 46.6 % as reflected from Table 37) as compared to the proportion of population served by educational facility in the district, which is as high as 77.9 percent. This may probably be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility, it can be seen that the proportion of rural population served by this amenity is of the order of 19.2 percent only which is also more than the proportion of villages served by medical facility in the district (5.3%). The inhabitants of Udhwa block are getting maximum benefit of medical facilities with 41.1 percent of its population availing of this facility while inhabitants of rural areas of Pathna block are getting minimum benefit of this facility (4.3%).

So far improved drinking water facility is concerned it may be observed that proportion of rural population served by the amenity is to the extent of 81.1 percent which is also considerably higher than the proportion of villages served by this facility in the district (56.2% as reflected from Table 37).

It further transpires from the data presented in the above table that the trend as observed for educational, medical and improved drinking water facility is also same in the case of other types of amenities and facilities available in the district as also in its various C.D. Blocks since the proportion of rural population served by these amenities is more than the proportion of villages enjoying these facilities. However, the proportion of rural population served by such amenities and facilities vary considerably among various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	522	168	18	708
(b) Middle School	513	466	215	1,194
(c) Degree College	104	291	909	1,304
2. Medical:-				
(a) Hospital	195	382	717	1,294
(b) PHC	216	421	654	1,291
3. Post Office	650	424	149	1,223
4. Telephone	155	298	836	1,289
5. Bus Service	302	512	441	1,255
6. Banks				
(a) Commercial Bank	416	530	329	1,275
(b) Cooperative Bank	145	349	809	1,303
7. Agricultural Credit Societies	347	468	457	1,272

As is evident from Table 38 that there are many villages in the C.D. Blocks of the district containing good proportion of rural population which do not have access to different kinds of facilities and amenities. The present table gives an idea about the distance range of places from the villages where various types of facilities are available.

There are 708 villages which do not have any facility of primary schools, 1194 villages are such which do not have middle school facility and 1304 villages are such where no degree college is available. As regards educational facility, it would be seen that educational institutions having higher level classes (degree colleges etc.) are situated beyond 10 kms from most of the villages which are not having such facilities meaning, thereby, that inhabitants residing in these villages have to cover much more distance to avail of facility of such type of institutions. On the other hand for availing education in institutions like primary and middle schools the larger proportion of villages are situated within the distance range of less than 5 kms and 5-10 kms.

There are 1294 villages in the district (99.0%) which are without the facility of hospital and out of these as many as 717 villages enjoy this facility at a distance range of 10 + kms. The number of villages enjoying this facility at a distance range of 5-10 kms is 382 whereas this facility is available at a distance of less than 5 Kms in respect of 195 villages. Similarly, there are 1291 villages in the district (98.8%)

which do not have primary health centers but the facility is available for these villages at various distance ranges, the maximum being in the range of 10 + kms.

1223 villages (93.6%) do not have post office facility but mor than half of these villages avail this facility at places situated at the distance range of less than 5 kms.

For the facilities such as telephone, bus services commercial bank and agricultural credit societies also more than 96 percent of the inhabited villages are deprived of these facilities inhabitants of these villages avail of these facilities by covering less than 5, 5-10 and 10 + kms respectively from their villages. So far Co-operative Bank is concerned big chunk of villages do 99.7% not have such facilities and people have to cover a distance of 5-10 kms distance to avail this facility.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited village in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	24	7	3	2	1	1	0	1	11
	(100.0)	(29.2)	(12.5)	(8.3)	(4.2)	(4.2)	(0.0)	(4.2)	(45.8)
5 -15	350	151	23	23	9	36	13	8	104
	(100.0)	(43.1)	(6.6)	(6.6)	(2.6)	(10.3)	(3.7)	(2.3)	(29.7)
16 - 50	668	298	37	45	6	23	15	15	147
	(100.0)	(44.6)	(5.5)	(6.7)	(0.9)	(3.4)	(2.2)	(2.2)	(22.0)
51+	265	153	6	14	2	19	6	11	38
	(100.0)	(57.7)	(2.3)	(5.3)	(0.8)	(7.2)	(2.3)	(4.2)	(14.3)
Unspecified	0	0	0	0	0	0	0	0	0
	0	0	0	0	0	0	0	0	0
District total	**1307**	**609**	**69**	**84**	**18**	**79**	**34**	**35**	**300**
	(100.0)	**(46.6)**	**(5.3)**	**(6.4)**	**(1.4)**	**(6.0)**	**(2.6)**	**(2.7)**	**(23.0)**

Post office includes Post office, Telegraph office and Post and telegraph office.
$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from the above table that maximum number of inhabited villages (51.1%) lie in the distance range of 16-50 kms from the nearest statutory town. This is followed by villages in the distance range of 5-15 kms from the nearest statutory towns with 26.8 per cent. It can further be seen from the table that the proportion of villages lying at the distance of more than 51 kms. is only 20.3 percent. The villages which are situated at a distance range of less than 5 kms from the nearest statutory town are significantly low in number (1.8%).

Interestingly, it can be observed from the table that the maximum proportion of villages having educational facility (57.7%) are situated at adistance 51+ kms from the nearest statutory town. There appears to be not so much difference in proportion of villages having educational facilities situated within 5-15 and 16-50 kms from the nearest town. Out of 24 villages which are situated less than 5 kms from the nearest town 3 villages (12.5%) only have medical facility. The number of villages having medical facilities which are situated within 5-15 kms is only 23 (6.6%). The villages situated at the distance range of 5-15 kms and 16-50 kms from the nearest town are found to be higher in proportion which are enjoying all other kinds of amenities and facilities. The villages having such kinds of amenities and facilities and which are situated at a distance of less than 5 kms from the nearest town are also good except banking facility which is not available in this range. Facility of pucca approach road where proportion of villages is highest in this category vis-à-vis villages situated from the nearest town at a distance of 5-15, 16-50 and beyond 51 kms.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001.

Population range	Number of inhabited village in each range	Type of amenity available

Post office includes Post office, Telegraph office and Post & Telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

The above table shows that the maximum number of villages, i.e., 871 (66.6%) in the district fall in the population range of less than 500, followed by 240 villages (18.4%) in the population range of 500-999. It is seen that the next in numeric order is 117 villages, lying in the population range of 1000-1999 and constituting less than 1 percent of the total inhabited villages in the district. The proportion of villages lying in higher population ranges is significantly low which implies that small-sized villages are more in number in the district of Sahibganj. It is also a fact that the villages of Jharkhand state are, in general, sparsely populated.

It further transpires from the table that larger proportion of villages having various types of amenities and facilities, by and large, lie in those population ranges where number of villages are comparatively more in number (1-499, 500-999 and 1000-1999).

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Sahibganj	23	15,789	46.8	2.7
2	Mandro	179	11,824	52.9	26.9
3	Borio	264	25,686	41	7
4	Barhait	190	30,256	58.7	11.3
5	Taljhari	195	14,672	61.7	2.2
6	Rajmahal	98	10,096	80.8	20.2
7	Udhwa	79	12,593	53.2	20.0

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001 (CONCLD.)

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
8	Pathna	124	15,977	43.5	34.2
9	Barharwa	155	16,242	75.5	16.1
	District Total:	**1,307**	**153,135**	**55.6**	**14.3**

Note : Cultivable area = irrigated area + unirrigated area

The above table furnishes information regarding the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It can be seen from the data presented in the table that 55.6 percent of the total area of the district is utilized for cultivation (cultivable area) and of this only 14.3 percent of the area is found to be irrigated. Among the C.D. Blocks, the highest proportion of cultivable area is observed in Rajmahal C.D. Block with 80.8 percent closely followed by Barharwa with 75.5 percent cultivable area. The lowest cultivable area is found in Borio C.D. Block (41.0%).

The highest proportion of irrigated area to total cultivable area is found in Pathna C.D. Block (34.2%), followed by Mandro (26.9%), Rajmahal (20.2%) and Udhwa (20.0%) C.D. Blocks. The least proportion of irrigated area is found in Taljhari C.D. Block with only 2.2 percent, closely followed by Sahibganj (2.7%) and Borio (7.0 %) C.D. Blocks which indicates that the villages in this block are deprived of required irrigational facilities. In other C.D. Blocks also the irrigation facilities are found to be very inadequate as the percentage of irrigated area lie between 10-20 percent only.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

		Per capita receipt			Per capita expenditure					
Serial number	Class,name &urban status of the town	Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	IV Rajmahal (NA)	1.7	0.1	1.6	1.3	0.9	0	0.4	0	0
2	II Sahibganj (M)	3.8	1.3	2.5	11.9	6.7	1.2	1.2	1.1	1.5
	District Total	**3.5**	**1.1**	**2.3**	**9.9**	**5.7**	**1**	**1.1**	**0.9**	**1.2**

The above table gives the details of finances in the statutory towns in terms of per capita receipt and expenditure. There are two statutory towns in the district viz., Rajmahal (NA) and Sahibganj (M). On going into the details of receipt under different heads it can be seen that the receipt from 'other sources ' is higher than through 'taxes' in both the towns. Per capita receipt in Sahibganj (M), the headquarters town, is much higher, almost twice as compared to Rajmahal (NA). So far per capita expenditure is concerned, again Sahibganj (M) is far ahead. It further transpires from the table that per capita expenditure on "general administration" is higher in both the towns as compared to the other "heads". While in Rajmahal town "public works" is the only other head apart from "general administration" where money is spent, in Sahibganj town, on the other hand, money is spent on various other public interest works, the per capita expenditure being, more or less, similar on each such "head".

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Rajmahal (NA)	3.3	1.7	1.1	0.6	0.6
2	Sahibganj (M)	4.7	2.5	0.5	0.2	0.1
	District Total	**4.5**	**2.3**	**0.6**	**0.3**	**0.2**

The above table gives the details of different categories of educational institutions per ten thousand population in the towns of the district. It would be seen from the table that there are, on an average, 4.5 primary schools per 10,000 population in urban areas of the district. While Sahibganj town has around 5 such schools per 10,000 population, Rajmahal (NA), has, on an average more than 3 schools per 10,000 population. As regards junior secondary/ middle level schools, it can be observed from the table that Sahibganj town has again an edge over Rajmahal town. It is further noticed from the data presented in the Table that so far secondary / matriculation level schools are concerned, there are, on an average, 1.1 such schools per 10,000 population in Rajmahal town which appears to be slightly better placed as compared to Sahibganj town with 0.5 such schools only, though the situation is not satisfactory in both the cases. The institutions like senior secondary schools and colleges, though these exist in both the towns, the position does not appear to be satisfactory as the number of such institutions are even less than 1 per 10,000 population, in Rajmahal (NA). Sahibganj town is in a more disadvantageous situation as compared to Rajmahal town. By and large, it can be said that educational institutions of higher category like Colleges, Senior secondary / Matriculation etc, are available in very small number for larger proportion of population in both the towns of Sahibganj district. Sahibganj (M), the district headquarters town, probably suffers most on this count.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Rajmahal(NA)	17
2	Sahibganj(M)	6
	Distrct Total	8

The above table furnishes information regarding availability of beds in medical institutions in the two towns of Sahibganj District.

The average number of beds in medical institutions per 10,000 populations for the urban areas of Sahibganj district works out to 8. The availability of beds in the medical institutions is higher in case of Rajmahal (NA), with 17 beds per 10,000 population vis-à-vis Sahibganj (M) which has only 6 beds per 10,000 population which may probably be because of the fact that Sahibganj (M), the headquarters town, is considerably more populated than Rajmahal town.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
There is no slum in Shibganj and Rajmahal Town				

The information regarding slums in the towns of the district could not be made available hence no data has been presented in the Table.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Rajmahal (NA)	China Clay Electric Goods Wooden Goods	China Clay Tomato Fish
2	Sahibganj (M)	Soap Sweet Curd	Stone Chips Mango Pickles Bari

The above table gives information regarding most important commodities manufactured in and exported out of the two towns of the district. In Rajmahal town, the most important commodities manufactured are China Clay, Electric Goods and Wooden goods. China Clay also happens to be the most important commodity exported from Rajmahal town. Tomato and Fish are the other two commodities which are exported from this town. In Sahibganj town the most important commodities manufactured are Soap, Sweet and Curd while Stone Chips, Mango Pickles and *Bari* are the most important commodities exported from the town though they are not manufactured there. It is interesting to observe that the most important commodities manufactured and the most important commodities exported are always not the same.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

	Three rooms	137	83	54	14	5	9	11	8	3
	3+ rooms	73	49	24	4	1	3	12	10	2
	Median number of rooms	1	1	1	1	1	1	1	1	2
	District total	**174,221**	**158,045**	**16,176**	**13,262**	**11,182**	**2,080**	**56,836**	**56,057**	**779**

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

It is quite evident from the data presented in the table above that there are as many as 167,086 households accounting for 95.9 percent of the total households of the district residing in owned houses. Of them, the proportion of households residing in single room dwelling is the highest (62.1 %). Households having no exclusive room in their possession constitute 1.3 percent of the households living in owned houses. The median number of rooms is 1 for the households having their own houses.

The households living in rented houses (4792 in number) are very small in proportion accounting for 2.8 percent of the total households in the district. Among them, the proportion of households having only one room in their possession is highest (54.9%) as observed in the case of households having owned houses . The median number of rooms for the households residing in rented houses also works out to 1. The same pattern is found to prevail in rural as well as in urban areas of the district.

There are 13,262 Scheduled Castes households in the district, out of which 12,457 households constituting 93.9 percent reside in their owned houses. The households residing in rented or other type of houses are very small in number. In case of owned houses the proportion of SC households having only one room in their possession is the highest comprising 69.7 percent of the households followed by 21.9 percent SC households in possession of two rooms. The median number of rooms of SC households residing in owned houses works out to 1. The SC households residing in rented houses is considerably low as stated above and of them households residing in 1 room houses is higher compared to those having two rooms or more in their possession. The SC households residing in 'other types of houses' is comparatively lower than the SC households residing in rented houses and of them households having one room in their possession are higher than the households having more rooms. The same trend can also be seen in rural and urban areas separately. The number of SC households having no exclusive room in their possession is significantly low.

The Scheduled Tribes households are to the extent of 56,836 and most of them are found to be residing in their owned houses (55,717 in number) constituting 98.0 percent of the total ST households . The proportion of such households having 1 room in their possession is the highest (76.7%) as observed for the SC households. The ST households residing in "rented" or 'other types of houses' are quite few in number and among them most of the ST households have one room in their possession. The median number of rooms in possession among the ST households works out to 1 as found in the case of general category of households and SC households also.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban		
		Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary	Permanent	Semi-permanent	Temporary
1	2	3	4	5	6	7	8	9	10	11
1	Sahibganj	47.6	29.4	23.0	20.8	34.7	44.4	69.3	25.2	5.6
2	Mandro	11.1	46.6	42.3	11.1	46.6	42.3	0.0	0.0	0.0
3	Borio	7.4	52.3	40.3	7.4	52.3	40.3	0.0	0.0	0.0
4	Barhait	7.1	51.0	41.9	7.1	51.0	41.9	0.0	0.0	0.0

8	Pathna	10.6	59.2	30.2	10.6	59.2	30.2	0.0	0.0	0.0
9	Barharwa	22.9	62.9	14.2	22.9	62.9	14.2	0.0	0.0	0.0
District Total:		**18.8**	**56.0**	**25.2**	**14.1**	**58.8**	**27.2**	**64.8**	**29.5**	**5.7**

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks. G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

The concept of permanent, semi-permanent and temporary houses, as adopted in census, has been explained in the footnote of the above table.

It transpires from the table that 18.8 percent of the households in the district reside in permanent houses while the households living in semi- permanent houses are to the extent of 56.0 percent. Only 25.2 percent of the households are found to be residing in temporary houses.

It would be further discernable from the data furnished in the table that of the total rural households largest proportion of households i.e. 58.8 percent live

in semi-temporary houses. The households living in permanent and temporary houses are considerably low, being 14.1 and 27.2 percent respectively in the district.

In the case of urban households in the district, however, the situation is found to be quite different as maximum proportion of households i.e. 64.8 percent live in permanent houses. The households living in semi-permanent houses are around 30 percent. It is quite encouraging to note that households residing in temporary houses are significantly low, being 5.7 percent only, much less than that observed in case of rural households.

Among the C.D. Blocks, the same trend, by and large, is found to prevail. The highest proportion of households living in permanent houses is observed in Sahibganj C.D. Block (47.6%). In other C.D. Blocks where the proportion of households living in permanent houses are more than 20 percent include Rajmahal (24.7%) and Barharwa (22.9%). The better position as observed in case of Sahibganj and Rajmahal blocks are probably on account of urban components contained in these blocks. Barhait C.D. Block has recorded the lowest proportion of population living in permanent houses (7.1%). In the rest of the C.D. Blocks the proportion of households living in permanent houses varies between 7.4 percent (Borio block) and 12.2 percent (Udhwa block). There are 7 out of 9 C.D. Blocks where the proportion of households living in semi-permanent houses are more than 50 percent. Only in Sahibganj and Mandro C.D. Blocks the households residing in semi-permanent houses are less than 50 percent. In the rural areas of the C.D. Blocks almost the same pattern is discernable.

The C.D. Blocks where towns also exist, viz., Sahibganj and Rajmahal, it is quite evident from the table that the proportion of households living in permanent houses is quite high. While in Sahibganj block, the district headquarters town, 69.3 percent of households have permanent nature of houses in their possession, the 47.6 percent households in Rajmahal block live in such houses. The households residing in temporary nature of houses are significantly low (around 6%) in both the towns as shall be seen from the table.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Serial number	C. D. Block	Total/ Rural/ Urban	Number of household	Number and percentage of household having				
				Improved drinking water	Electricity	Bathroom	Toilet	Drainage

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

As mentioned in the footnote of the above table, if the household has access to drinking water supplied from a tap or hand pump/ tube well within or outside the premises it is considered as having access to "improved drinking water source". This concept is, however, state specific and need to be considered in that light.

The above table shows that of the total households, only 47.4 percent of the households have access to improved drinking water facility in the district. Among the rural households also almost equal proportion of households (47.1%) enjoy this facility. The position is slightly better in the urban areas with 50.4 percent households availing of this facility. Among the C.D. Blocks, the highest proportion of households with improved drinking water facility can be observed in Sahibganj block with 66.0 percent. The other C.D. Blocks where proportion of households with improved drinking water facility is more than 50 percent are Udhwa (59.1%), Taljhari (53.7%) and Barharwa (51.3%). Mandro block, on the other hand, is the least privileged on this count as only 25.1 percent of households have access to this facility. Rajmahal block, which also contains an urban unit has 48.3 percent of households enjoying this facility.

As regards electricity facility available to households, it is found that only 8.1 percent of the households in the district have electricity. The people living in the urban areas are more privileged as 50.8 percent of the urban households have the facility of electricity as against only 3.8 percent of rural households enjoying this facility. Sahibganj block tops the list as 33.0 percent of the households in this block have electricity facility followed by Rajmahal block with 11.3 percent though it is far behind Sahibganj block. This may presumably be due to the fact that these two blocks contain urban units also. In the rest of the C.D. Blocks the proportion of households enjoying electricity facility is far from satisfactory as even less than 5.0 percent are having electricity facility except Barharwa block (7.2%) where slightly more than 5 percent of the households have this facility. In some of the blocks the situation is very alarming as not even 1 percent of the households are having this facility.

It is also interesting to note that only 6.6 percent of the total households in the district have bathroom facility. In the urban areas, the proportion of households which has the privilege of having bathroom facility is quite high with 34.8 percent while only 3.7 percent of the rural households have access to this facility. Among the C.D. Blocks, Sahibganj is again much ahead of the other C.D. Blocks probably because of Sahibganj (M), located in this block. In C.D. Blocks other than Sahibganj, the situation is, by and large, similar to one observed in the case of electricity facility.

Households having toilet facility are found to be higher in number as compared to bathroom and electricity facility as 11.7 percent of the households in the district enjoy toilet facility. The relative position among C.D. Blocks is, by and large, the same as found in the case of bathroom and electricity facility as Sahibganj block is again much better placed with 38.4 percent of the households having this facility. It is followed by Barharwa and Rajmahal blocks with 13.1 and 12.7 percent respectively. The position with regard to toilet facility in most of the other C.D. Blocks are not so discouraging as observed for electricity and bathroom facilities.

16.1 percent of the total households in the district have drainage facility. While 51.2 percent of urban households have got the facility of drainage, only 12.5 percent of the rural households have this privilege. Among the C.D Blocks, Sahibganj block with 32.4 percent households having drainage facility is at the top, followed by. Rajmahal (20.0%), Udhwa (17.5%), Barharwa (16.6%), Mandro (14.2%) and Borio (11.2%). In rest of the blocks also the situation is observed to be slightly better as compared to availability of facilities like electricity, bathroom and toilet.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It would be seen from the above table that 61.6 percent of the households in the district use firewood as fuel for the purpose of cooking. The proportion of rural households using firewood is to the extent of 63.6 percent while proportion of urban households is as much as 42.2 percent in the district. Among the C.D. Blocks, the highest proportion of households using firewood as fuel for cooking is seen in Taljhari C.D. Block (94.5%) very closely followed by Borio block (94.0%). The other C.D. Blocks where the proportion of households using firewood as fuel for the purpose of cooking is more than 70.0 percent are Mandro (89.2%), Barhait (84.8%) and Pathna (74.0%). The least proportion of households using firewood for cooking are Barharwa (31.7%) and Udhwa (38.7%).

Crop residue does not appear to be commonly used as fuel for cooking purpose in the C.D. Blocks of the district, except in the case of Udhwa (38.8%) and Barharwa (34.1%) blocks where the households using crop residue as fuel for cooking is more than 30 percent. The lowest proportion of households using crop residue as fuel for cooking purpose is observed in case of Borio, Barhait and Taljhari blocks where the percentage is less than even 3 percent. In Rajmahal and Sahibganj C.D. Blocks which contain urban components also, the proportion of households using crop residue as fuel for cooking is 20.4 and 11.5 percent respectively.

In the district as a whole 11.0 percent of the household use cowdung cake as fuel for cooking. In the C.D. Blocks of Sahibganj, Rajmahal, Udhwa and Barharwa more than 15 percent of the households use this kind of fuel for the purpose of cooking. In the rest of the C.D. Blocks the proportion is comparatively lower particularly in the case of Borio (0.6%), Taljhari (1.4%), Barhait (2.0%) and Mandro (3.2%) where cow-dung as fuel is less preferred.

Electricity, Kerosene and bio-gas are the types of fuel which appear to be very uncommon as the proportions of households using these fuels for cooking purpose are found to be almost negligible the district. Coal/lignite is used as fuel by 7.9 percent of the households in the dostrict.

As regards cooking gas (L.P.G.), there are only 3237 households accounting for 1.9 percent of the total households in the district using it for cooking. In rural areas the proportion of households using L.P.G is almost negligible. The proportion of urban households using cooking gas is as high, as 17.6 percentage in the district. Coal/lignite (Charcoal) is used by 7.9 percent of the total households in the district. In urban areas it is used as fuel for cooking by 27.6 percent of the total urban households in the district Almost insignificant proportion of households in rural and urban areas of the district use "other" types of fuel for cooking purpose. On the other hand there are 259 households constituting 0.1 percent of the total households in the district in wich no cooking takes place.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET, 2001

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

The data presented in the above table gives details regarding availability of household assets to rural and urban households in the district of Sahibganj and its C.D. Blocks.

It would be seen from the table that there are 28,095 households accounting for 16.1 percent of the total households in the district avail banking services. While 13.0 percent of the rural households avail banking facility in the district, the proportion of households in the urban areas availing banking services is to the extent 46.5 percent. Among the C.D. Blocks the highest proportion of households availing banking facility is observed in Sahibganj C.D. Block (33.8%) followed by Rajmahal block (23.6%) as these two blocks also have urban units contained in them. On the other hand, the C.D. Blocks which comprise of only rural areas, the proportion of households enjoying this service is observed to be quite low, the lowest being in the case of Udhwa Block (9.9%).

There are 34,954 households accounting for 20.1

percent of the total households in the district possessing radio / transistor. It is noteworthy that in almost all the C.D. Blocks the proportion of households having radio/ transistor are handsom, the highest being in Rajmahal & Sahibganj Blocks with 24.7 & 24.6 percent respectively.

Only 10,609 households accounting for 6.1 percent of the total households in the district possess televisions. Among the C.D. Blocks, the highest proportion of households possessing televisions is observed in Sahibganj C.D. Block (21.6%) while it is the lowest in Barhait C.D. Block (1.5%).

The proportion of households enjoying telephone facility in the district is meager 1.4 percent while this facility is available to only 0.6 percent of the rural households, the proportion of urban households having telephone facility is to the extent of 9.3 percent. So far availability of telephone facility in C.D. Blocks is concerned, it can be seen that only Sahibganj C.D. Block, which consists of district headquarters town also has telephone service facility to 6.1 percent of the total households which is above the district average. In other C.D. Blocks the position is quite discouraging as the proportion of households possessing telephone facility is very low, the lowest being in case of Udhwa Block (0.3%).

Bicycle appears to be the most common mode of conveyance in the district and its C.D. Blocks as 28.6 percent of the total households in the district possess bicycles. The proportion of households having bicycles is relatively lower in rural areas with 27.9 percent as against 36.2 percent among the urban households in the district. In the various C.D. Blocks of the district quite a good number of households are possessing bicycles for their day- to-day use.

The number of households having scooter / motorcycle /moped in the district constitute 1.7 percent of the total households. The proportion of rural households having these mode of conveyance is only 1.3 percent while 6.3 percent of the urban households have scooter / motorcycle / moped in their possession. The position in this regard is not very different among the various C.D. Blocks of the district.

Possession of car, jeep, van is very uncommon in the district as only 0.3 percent of the total households have the privilege of having these modes of conveyance. Urban households having one of these modes of conveyance is slightly more with 0.8 percent as against 0.2 percent in case of rural households.

There are as many as 109,862 households accounting for 63.1 percent of the total households in the district where none of these specified assets are available. While 64.9 percent of the rural households are deprived of these household assets, the proportion of households having none of these specified assets is to the extent of only 44.9 percent in the urban areas of the district. The same trend is, more or less, observed in various C.D. Blocks also.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

No major social or cultural event has taken place in the district of Sahibganj during the decade. The subdivision of Pakaur was carved out of Sahibganj district and elevated as an independent Pakaur district in the year 1994. The remaining portion formed the territorial jurisdiction of the present Saibganj district.

Fair and festivals are held regularly in the district. *Shivratri* is an important Hindu festival on the occasion of which seasonal faires are held as is done during Durga Puja festival. Some important tribal fair and festivals are also held in different parts of the district as followed in other tribal districts of Jharkhand state.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Rajmahal

Situated on the right bank of the river Ganges, Rajmahal is a small but historically impressive town. It was the seat of Government during the Mughal period. Even today relics of the old and prosperous Rajmahal are visible in this on one time capital of Bengal. The town has following important monuments.

(i) Singhi Dalan.

(ii) Akbari Masjid.

(iii) Tomb of Maina-Bibi.

(iv) Tomb of Miran.

Kanaiyasthan

Situated on the bank of the Ganges this village is about 13 km. north-west of Rajmahal town and own its name from the temple of Lord Krishna (Kanhaiya) located in the village. It is believed that Chaitanya Mahaprabhu once stayed here on his way back from Bengal and got the vision of Lord Krishna. Footstep of Chaitanya Mahaprabhu is also preserved here.

Sahibganj

It is situated on the southern bank of the Ganges in the north-eastern region of Rajmahal subdivision. Sahibganj is the sub-divisional headquarters since 1944 and presently is the district headquarters as well. It has a municipality, which was constituted in 1883. The town has a well, constructed in 1915 known locally as "Badhua Kua" which was constructed in the memory of Edward VII. Residents still use the well for drinking water.

Teliagarhi

There are remains of an old fort known as Teligarhi after its builder a Teli Zamindar, who later embraced Islam at Sahibganj. It is said that there is underground road for 10 km. from this fort.

Shivgadi

Located in the Barhait block this is a Shiva temple, which is situated in the cave. Water from the mountain drips continuously on the *Shivling*. Devotees gather here in large numbers on the occasion of *Mahashivratri* festival.

Binduvasini Temple

Devotees gather in large numbers on the auspicious day of *Ram-Navmi* at this temple located in the Pathna block. The fair lasts for 9 days.

Shukravasini Temple

This is a place of worship of goddess situated in the Barharwa block.

Raksi

Situated near the Karamtola railway station this goddess temple is considered very pious by the tribals.

Maghi Mela

Organized on full moon of Magh month at Rajmahal, this mela has an important place in the tribal life. Tribals from all over the district gather here along with the family priest to perform the pooja, which lasts for three days.

Bhoganadih and Panchkathiya

The village of Sidhu and Kanhu, the legendary brothers, who led the Santhal revolution in 1855 is very sacred for the tribals. There is also a memorial for the brothers in this village. Panchkathiya is a place where these brothers were hanged by the British.

Udhwa Bird Sanctuary

The only bird sanctuary in the entire state of Jharkhand is situated near Udhwa; locally called as Patauda Lake. Hundreds of migratory birds reach here every winter.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The district is mainly agrarian in nature. Wholesale trading in food grains is mostly carried on in Sahibganj. The main imports of the districts are linseed, mustard seed, tobacco, raw cotton, sugar refined and unrefined, molasses, slat, kerosene oil, coal, coke, gunny bags, gram, wheat and maize. As already discussed earlier the main exports are paddy. Jawar, sabai grass, stone chips, hides, fibres, kaolin and bentonite. The fish trade of Rajmahal and Sahibganj has considerable turn over and has an assured market in the near by places especially Kolkata.

There is no large scale industry available in the area mainly due to lack of infrastructural support. A number of small-scale industries have been set up in the district. But still there is a large potential for setting up more industries for which planners and government agencies must be taking care of.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to

analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Jharkhand first PLCN 00000100 has been assigned to village 'KHOKHA' in Kharaundhi C.D. Block of Garhwa district and the last PLCN 03261500 has been assigned to the last village 'KUMRASHOL' of the state in Baharagora C.D. Block of Purbi Singhbhum district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The

information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20

columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Blank

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23 .

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is

indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i) Commercial Bank	CM
(ii) Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i) Agricultural Credit Society	ACS
(ii) Non- Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i) Cinema/Video Hall	CV
(ii) Sports Club	SP
(iii) Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i) Bus	BS
(ii) Railway Station	RS
(iii) Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road	PR
(ii) Mud road	MR
(iii) Foot path	FP
(iv) Navigable River	NR
(v) Navigable Canal	NC
(vi) Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use	ED
(ii) Electricity for agricultural use	EAG
(iii) Electricity for other purposes	EO
(iv) Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i) News Paper	N
(ii) Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i) Government Canal	GC

(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

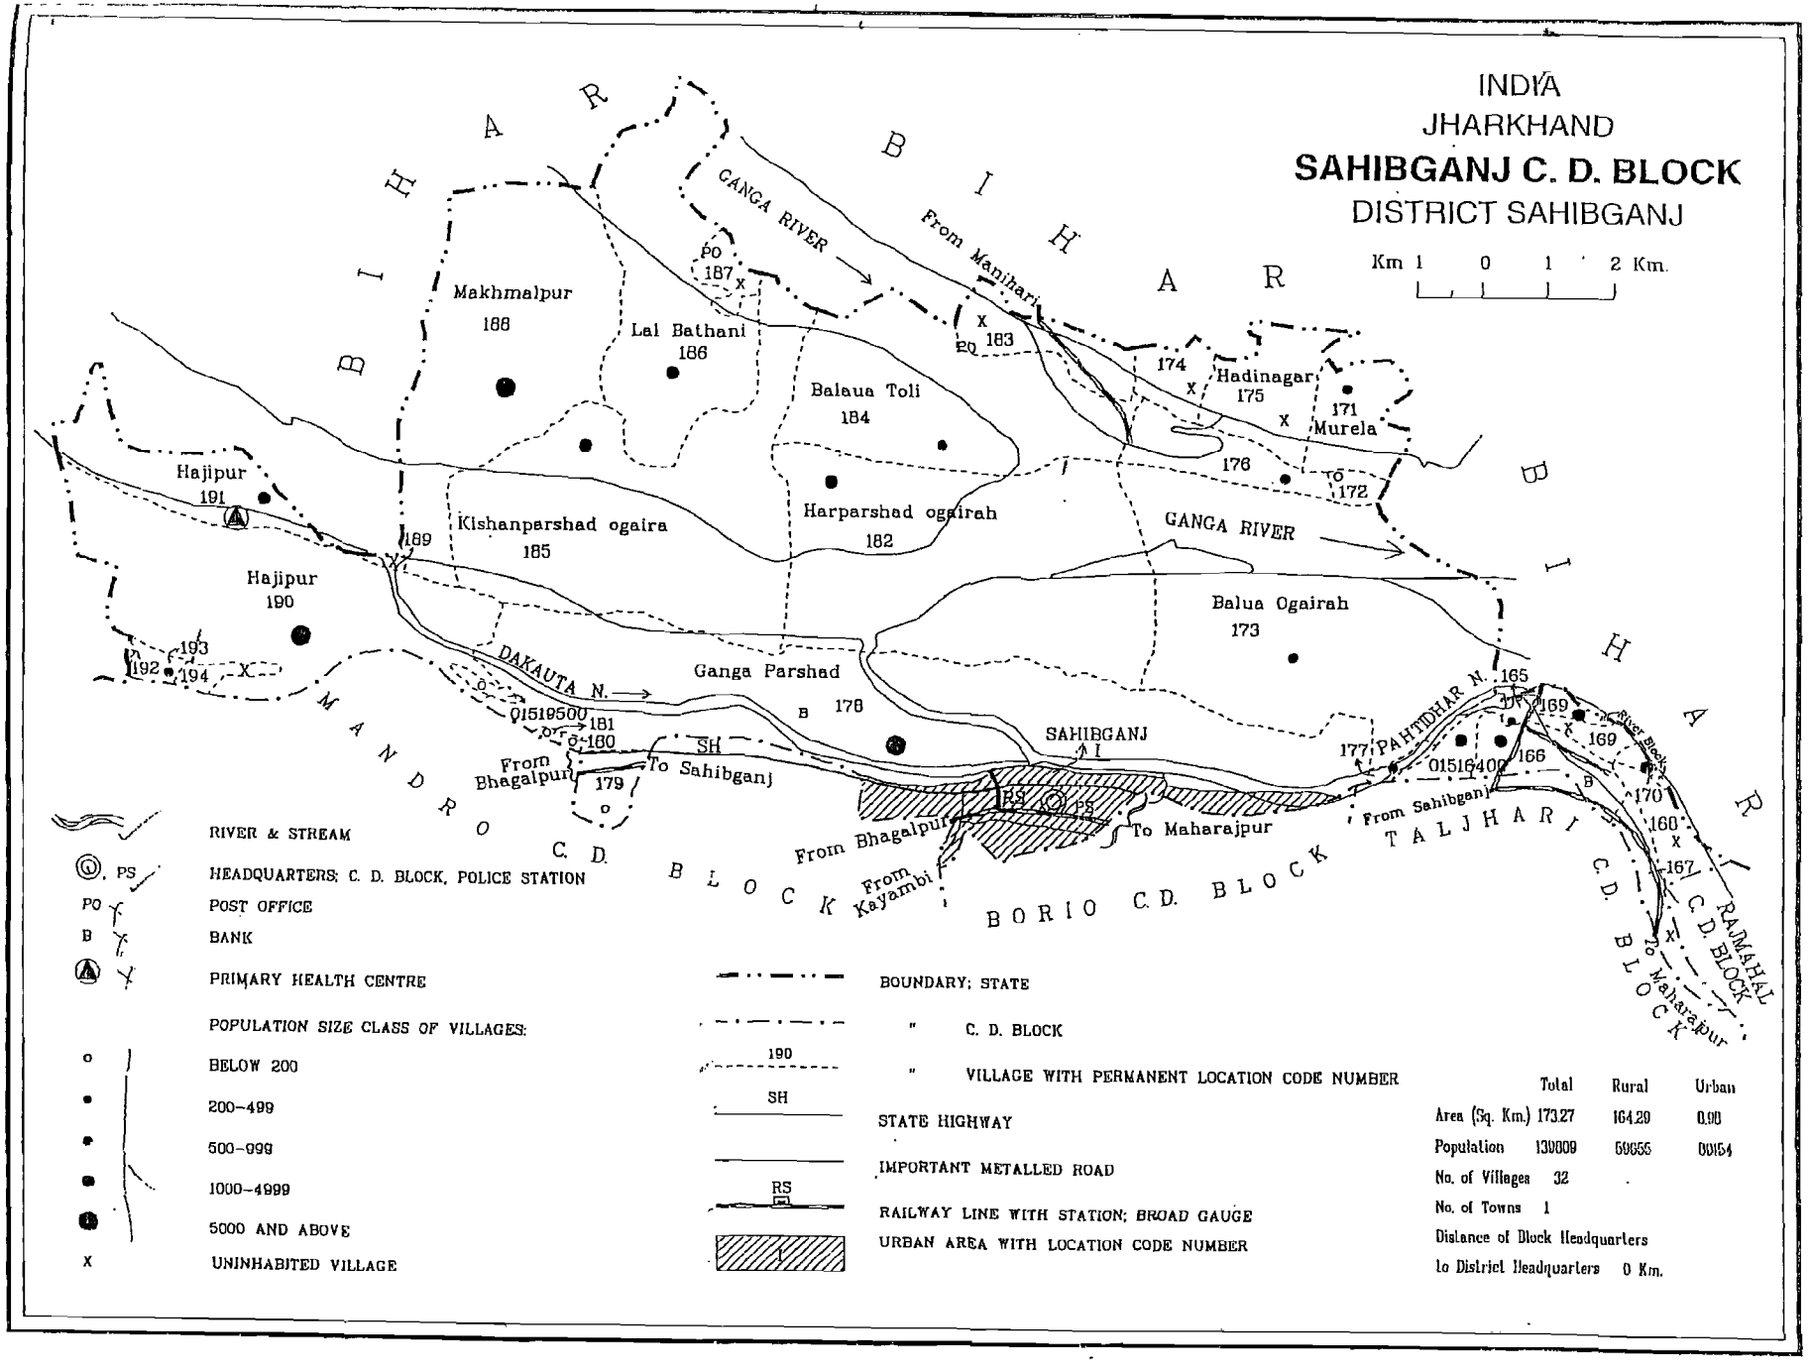

List of Villages merged in towns and outgrowths in 2001 Census

There is no such village in the district of Sahibganj.

LIST OF VILLAGES MERGED IN TOWNS AND OUTGROWTHS AT 2001 CENSUS

Serial number	Name of Towns	Name of villages merged in towns	Name of villages identified for outgrowth	Location Code Number 1991 Census	Location Code Number 2001 Census (in case of partly OG)
1	2	3	4	5	6

There is no such village in the district of Sahibganj.

Note : N.A. stands for information not available

TOWN DIRECTORY

Blank

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part-B : Primary Census Abstract

Blank

Brief Note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic *information on Area, Total Households, Total population,* Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES

ANNEXURE - II

ESTIMATE OF CHILD MORTALITY, 1981 AND 1991

State/District	Year	Persons			
		q (1)	q (2)	q (3)	q (5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Sahibganj	1991	81	111	124	129
	1981	99	117	131	152

The concepts and definitions of various parameters of Mortality and Fertility have already been dealt with in the Analytical section of this volume.

In the above table q (1), q (2), q (3) and q (5) denote estimates of child mortality for the different ages 1, 2, 3 and 5 respectively for the children of Sahibganj district and un-divided Bihar state. Since Jharkhand state was not in existence at the time of 1991 Census, the data of Sahibganj district has been compared with the corresponding data of undivided Bihar which included the present state of Jharkhand.

It is quite evident from the data presented in the table that the child mortality rates of Sahibganj district is much higher than the state average for all the four ages of the children both during 1991 and 1981 Censuses. It is, however, encouraging to note that the child mortality rates for all the four ages of the children have shown improvement in 1991 census in Sahibganj district as well as in the state. The gap in q (1), q (2), q (3) and q (5) between Sahibganj district and the state as a whole at the time of 1991 Census was of the order of 6, 27, 38 and 40 points respectively, the lowest gap is found in the case of child mortality among the age of 1 year.

Kishanganj	38.0	5.6	6.9	172.0	221.0	67.7	4.7	17.6

Various fertility measures have been defined in the earlier section of this volume. In the above table the data in respect of various fertility measures have been presented for the state as well as for the districts.

The above annexure reveals that all the fertility measures like CBR, TFR, TMFR, GFR, GMFR and child-women ratio were lower for Sahibganj district as compared to the state average, although the difference was quite nominal except in the case of GFR and GMFR which were observed to be 113.0 and 135.0 for Sahibganj district as against 163.0 and 186.0 for the state as a whole. The CBR for Sahibganj district was recorded as 26.1, which was comparatively lower than the state average at the time of 1991 Census. The average number of children born to a women was found to be slightly lower in Sahibganj district (3.5) than the state average of 4.1. So far mean age at marriage is concerned, it can be seen from the table that the district average was slightly lower than the state figure (15.0 years for Sahibganj and 16.5 years for the state as a whole). The different fertility measures in various districts of the state were, by and large, found to be not much in variation.

ANNEXURE - IV (A)

PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

	Born elsewhere in the district of enumeration			Born in other district of Bihar			Born in Bihar		
State/District	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10
Bihar	14,443,048	953,232	13,489,816	5,627,763	1,071,791	4,555,972	20,070,811	2,025,023	18,045,788
	(67.8)	(40.7)	(71.1)	(26.4)	(45.7)	(24.0)	(94.2)	(86.4)	(95.2)
Sahibganj	212,157	13,786	198,371	43,819	7,690	36,129	255,976	21,476	234,500
	(74.4)	(55.3)	(76.3)	(15.4)	(30.9)	(13.9)	(89.8)	(86.2)	(90.2)

	Born in other states			Born in other countries			Total migrants		
State/District	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,049,969	286,949	763,020	186,240	31,033	155,207	21,307,020	2,343,005	18,964,015
	(4.93)	(12.25)	(4.02)	(0.87)	(1.32)	(0.82)	(100.00)	(100.00)	(100.00)
Sahibganj	27,250	2,790	24,460	1,780	650	1,130	285,006	24,916	260,090
	(9.6)	(11.2)	(9.4)	(0.6)	(2.6)	(0.4)	(100.0)	(100.0)	(100.0)

The growth of population for any area (be it any village, town, district or state) is influenced by the migratory movements of the people (in-migration as well as out-migration). However, for want of data on out-migration from the district or the state to other districts or other states of the country and to other countries (since such data on out-migration is not collected in census) it might not be possible to assess the net impact of migration on growth of population, although such impact may not be much in most of the cases.

The above tables show distribution of migrants by place of birth based on data recorded during 1991 and Censuses. It can be seen from the tables that total migrants in the district of Sahibganj were 285,006 in 1991 and 216436 in 2001 of Bihar whereas in the state as a whole the migrants were found to be 21,307,020 in 1991 and 216436 in 2001 in the State of Jharkhand . Female migrants outnumbered the male migrants both in the case of the district as well as in the state during both the Censuses. While the male migrants constituted only 8.7 and 14.5 percents the female migrants were as high as 91.3 and 85.5 percents in Sahibganj district during 1991 and 2001 Censuses respectively. The corresponding proportion for the state as a-whole worked out to 11.0 and 21.3 percent for males and 89.0 and 78.7 percents for females respectively in 1991 and 2001. The higher proportion of migrants among females is presumably on account of marriage of females taking place outside their place of birth in majority of the cases.

It can further be seen from the table that most of the migratory movement had taken place within the district of enumeration in Sahibganj district particularly in case of females (76.3% for females as against 55.3% for males in 1991 and 65.9 and 47.0 percent respectively in 2001). The proportion of male migrants born in other districts of the state was quite high, being 30.9 percent as against 13.9 percent for females in 1991 which remained 12.2 and 16.0 percent in 2001. The state average figures were also on the same line in both types of migration, although with variation in percentages during both the Censuses.

The reorganisation of district and separation of Jharkhand from Bihar also might have same impact on migration which could seen in tables pertaining to 1991 and 2001.

ANNEXURE - IV (B)

RURAL AND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Sahibganj		
		Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8
TOTAL INTERNAL MIGRANTS	Total	20,070,811	17,002,880	3,067,931	255,976	239,150	16,826
(1) within the state		(100.0)	(84.7)	(15.3)	(100.0)	(93.4)	(6.6)
	Rural	19,010,120	16,570,646	2,439,474	246,390	232,350	14,040
		(94.7)	(82.6)	(12.2)	(96.3)	(90.8)	(5.5)
	Urban	990,737	375,267	615,470	6,376	3,920	2,456
		(4.9)	(1.9)	(3.1)	(2.5)	(1.5)	(1.0)
(2) In other states of India	**Total**	1,049,969	575,484	474,485	27,250	24,030	3,220
		(100.0)	(54.8)	(45.2)	(100.0)	(88.2)	(11.8)
	Rural	800,601	512,444	288,157	24,100	22,130	1,970
		(76.2)	(48.8)	(27.4)	(88.4)	(81.2)	(7.2)
	Urban	243,448	60,040	183,408	2,940	1,720	1,220
		(23.2)	(5.7)	(17.5)	(10.8)	(6.3)	(4.5)

It can be seen from the above annexure that of the total intra-state migrants in Sahibganj district, 90.8 percent cases were from rural to rural while 5.5 percent migration took place from rural to urban. The corresponding figures of the state average works out to 82.6 and 12.2 percent for the state as a whole. The migratory movement from urban to urban areas in the district constituted 1.0 percent as against 1.5 percent from urban to rural. The state data, on the other hand, showed that of the total intra-state migrants 3.1 percent were from rural to urban while only 1.9 percent from urban to urban areas.

The table further reveals that in case of migrants from other states to Sahibganj district (i.e., those who were born outside Bihar state and enumerated in the district of Sahibganj), 81.2 percent were from rural to rural while 4.5 percent from urban areas of other states to urban area of Sahibganj district. The corresponding figures of the state average being 48.8 percent and 17.5 percent respectively. So far movement of migrants from rural areas of other states to urban areas of Sahibganj district is concerned, it can be noted from the table that 7.2 percent of such migratory movement took place. The proportion of migrants from urban areas of other states to rural areas of Sahibganj district was found to be 6.3 percent. The rural to urban migration and urban to rural migration from other states to the state of Bihar had been observed to be 27.4 percent and 5.7 percent respectively.

ANNEXURE - IV (C)

INTERSTATE MIGRANTS, 1991 CENSUS

Bihar			Sahibganj

ANNEXURE - IV (C) (CONCLD.)
INTERSTATE MIGRANTS, 1991 CENSUS

Bihar			Sahibganj		
Place of Birth	Migrants	Percentage to total Migrants	Place of Birth	Migrants	Percentage to total Migrants
1	2	3	1	2	3
Total for nine states	980,400	93.4	Punjab	40	0.1
Other states	69,569	6.6	Rajasthan	140	0.5
Total	1,049,969	100.0	Uttar Pradesh	1,140	4.2
			West Bengal	24,380	89.5
			Total for thirteen states	26,990	99.0
			Other states	260	1.0
			Total	27,250	100.0

The data presented in the above table deals with the magnitude of inter-state migration to the state of Bihar and also migrants coming from other states to Sahibganj district. It will appear that the district received only 2.6 percent of the total migrants coming from other states to Bihar (27,250 out of 1,049,969 migrants). The state of West Bengal was the major contributor as regards in-migration to the state as well as to the district of Sahibganj. However, the difference in proportion between the two was significantly high as the migrants from West Bengal to Sahibganj district was as high as 89.5 percent as against 39.9 percent from West Bengal to the state of Bihar as a whole. The other states whose contributions were quite significant to the state of Bihar were Uttar Pradesh, Rajasthan, Punjab, Orissa, Madhya Pradesh, Assam, Haryana and Andhra Pradesh. These nine states taken together comprised 980,400 of the total migrants to the state of Bihar constituting as much as 93.4 percent. The contribution of states other than the above 9 states constituted only 6.6 percent. In Sahibganj district, apart from West Bengal, the other major contributory states were Uttar Pradesh, Haryana and Goa with 4.2, 1.2 & 1.0 percent respectively. The contribution of states like Rajasthan, Punjab, Maharashtra, Madhya Pradesh, Himanchal Pradesh, Gujarat, Assam, , Arunachal Pradesh and Andhra Pradesh were quite low, being less than 1 percent each. The total in-migration from these 9 states works out to 870 persons constituting 3.2 percent of the total in-migrants to the district of Sahibganj. The contribution of states other than the 13 states mentioned above was meager 1.0 percent.

The data presented in Annexure-V (A) show religion wise distribution of population according to 1991 census. It may be observed that Hindus were by far the numerically most important religious community in the state of Bihar as it accounted for as much as 82.4 percent of the state's population. The Muslims came next with 14.8 percent. Christians were the third most important religious community though it constituted only 1.0 percent of the state's population. Sikhs, Jains and Buddhists were very small in proportion as each of these constituted less than even 1.0 percent of the population of the state. Persons categorized under "Other Religions & Persuasions" comprised 1.7 percent of the state population.

In Sahibganj district the proportion of Hindus to the total population of the district was 68.6 percent comparatively lower than the state average. Muslims were, however, in good proportion as they constituted 28.02 percent of the district's population. The proportion of population of other religious communities except christians was almost negligible in the district of Sahibganj as Hindus and Muslims taken together comprised as much as 96.8 percent while christians were 2.7 percent of the total population of the district. Te sex-wise population also follows almost the same trend.

The above Annexure furnishes religion wise distribution of population for the district of Sahibganj and its C.D. Blocks according to 1991 Census.

As already observed in Annexure V (A), though the proportion of Hindus in the district of Sahibganj remained highest as compared to other religious communities during both the Censuses still it was seen that Muslims also formed a big chunk of population in the district. Among the C.D. blocks, while in Sahibganj, Borio, Taljhari, Pathna, Barhait, Litipara, Amrapara, Hiranpur, Maheshpur and Pakuria the proportion of Hindu population were above 70 percent of their respective total population, the highest being in Amrapara block with 94.5% in 1991.The scenario changed alot due to separation of Jharkhand from Bihar in 2000 and reorganisation of districts in 2001,the number of C.D.Blocks reduced to 9 from 13 in 1991 .Excluding Sahibganj the proportion of Hindu slided and ranged between 67.5 % in Taljhari to only 38.0 % in Udhwa C.D.Block. In 2001 the Muslim population in C.D.Block Udhwa remain 59.1 % Barharwa 50.2 % and Raj Mahal 41.1 % remained relatively higher as compared to other C.D.Block of the district as was the case in 1991 with Pakaur,Raj Mahal Barharwa C.D.Block. In Sahibganj C.D. block also Muslims constituted a good chunk of population as 27.2 percent of the total population were Muslims in 1991 and 23.3 % in 2001 . The existence of other major religious communities in various C.D. Blocks of the district except christians remained insignificant during both the Censuses, as their proportion to total population remained almost negligible. In Pathna, Taljhari and Barhait C.D. Blocks Christian were also in good number though they constituted less than 10 percent of their respective total population in 1991 where as 2001 proportion of Christiam increase further in Borio(10.8 %) and Barhit (11.4 %)Mandro (15.8 %),Taljhari (15.9 %) and Pathana (18.9 %)

Annexure VI (A) furnishes information regarding distribution of population by marital status for the state of Bihar in absolute number as per 1991and 2001 Censuses while Annexure (B) shows percentage distribution of population by marital status for the state. Similarly the Annexures V1 (C) and V1 (D) give corresponding figures and percentages for the district of Sahibganj for both 1991 and 2001.

It shall be evident from Annexures V1 (B) to VI (D) that the state of undivided Bihar (including the present state of Jharkhand) as well as Sahibganj district have relatively higher proportion of males in the "never married" category during both the Censuses. The proportion of females, however, are found to be higher in the "married" category during 1991 and 2001. This may, perhaps, be attributed to the fact that females, generally, enter into marital knot at comparatively younger ages than males. As against 54.2 and 54.4 percent of "never married" males in 1991 and 56.2 and 57.6 percent in 2001 in Bihar state and Sahibganj district respectively, the corresponding proportion among "never married" females are seen to be 45.2 and 46.2 percent in 1991 and 48.0 and 48.7 percent in 2001 . Females are found to be higher in proportion in the "married" category than males both in the state and the district, the percentage being 49.8 and 47.1 in 1991 and 45.3 and 43.9 in 2001 the corresponding proportion for males are 43.6 and 43.2 in 1991 and 41.8 and 40.6 in 2001 respectively .So far the proportion of "widowed" is concerned, it transpires from the table for 1991 and 2001 that female "widowed" are higher in proportion than male "widowed" both in the state as well as in the district. The proportion of "divorced or separated" are found to be negligible both in case of males and females in the state of Bihar and Sahibganj district during both the Censuses .

While analyzing marital status of the male and female population by age groups, one notices that married females outnumbered married males in the age group 10-14 in the State and Sahibganj district during both the Censuses,suggesting that child marriage among females has less more prevalent than males. It may, however, be interesting to note that proportions of married males and females in the age group 10-14 have been less in Sahibganj district as compared to the state average figure during both the Censuses. It is also discernable from the table relating both the Censuses that child marriage has been more prevalent in the rural areas i.e., villages of the state and the district than their respective urban areas.

It is further noted from the table that the proportions of "married" females in the state as well as in the district are relatively higher upto the ages 34 while reverse is above the age, the proportion of married males are relatively higher.

The Annexures V11 (A) and V11 (B) presented above give the position in absolute number of illiteracy and level, nature and type of education attained by the literates classified by age groups for the state and Sahibganj district respectively, according to 1991. The Annexures V11 (C) and V11 (D) furnish percentage distribution of literates by different level of education, for the state and Sahibganj district respectively.

As we all know literacy is one of the important characteristics of the population. Apart from collecting

data on literacy aspect , the level and type of education attained by the literates are also ascertained. The concept of literacy adopted in census has already been explained in the beginning of this volume.

A proper index for measuring literacy is proportion of literate and educated persons to the total population. The literacy rate for Bihar state (excluding the population in the age group 0-6) at the time of 1991 census remained 38.5 the corresponding figures for Jharkhand state in 2001 is 53.6 %. Male literates outnumbered female literates by big margin as the literacy rate for males, according to 1991 census, was 52.5 percent while for females the literacy rate was only to the extent to 22.9 percent. The corresponding proportion for Jharkhand in 2001 remained 67.3 and 38.9 % respectively.

The overall literacy rate for the district of Sahibganj, according to 1991 and 2001Census remained 27.0 and 37.6 percent respectively , almost 11 percentage points less in 2001 than the state average in 1991 and 16.0 percentages less in 2001. Male literates in the district accounted for 36.9 percent, whereas female literates comprised of only 16.3 percent in 1991 whereas in 2001 the corresponding figures remain higher as 47.9 in 26.6 percent respectively. It can be seen that the literacy rates for males and females in Sahibganj district remained lower than the corresponding figures of the state during both the Censuses.

Percentage distribution of literate population by different levels of education, according to 1991 and 2001 Censuses for the state and the district can be glanced from Annexures VII (C) and VII (D) respectively. From these Annexures it can be seen that 20.3 percent males and 27.2 percent females in the state in 1991 and 27.0 and 23.9 percent males and females respectively in 2001 including beloe primary level. were literates but had not attained any specific level such change in male and female literate population (without any educational level such change in male and female literate population without any educational level are due to bifercation of state of Jharkhand from Bihar in 2000, 21.6 percent literate males and 26.2 percent literate females in 1991 in Bihar and 25.2 males and 28.2 females in 2001 in Jharkhand had attained primary level of education (females having an edge over male), 26.4 percent males and 26.9 percent females in Bihar in 1991 and 16.7 % males and 15.2 percent females in 2001 in Jharkhand had passed middle class level examination, while 31.7 percent males and 19.7 percent females in 1991 and 31.1 percent and 22.7 % males and females respectively in 2001 where matriculates and above. The contrast between literate males and females appear to be considerable among matriculates and above, as the percentage gap between male and female literates in the state who were matriculates and above in 1991 and 2001 stand to the extent of 12 and 8.4 percentages points respectively. This differential may presumably be due to dropouts by females after attaining middle class educations.

As regards position of literates by different levels of education in Sahibganj district, it can be seen from Annexure VII (D) that 25.3 percent males and 34.1 percent females in 1991 and 34.5 percent male and 41.0 % female including below primary level in 2001 were such who, though were literates, but had not attained any specific educational level. 27.0 percent males and 27.6 percent females in 1991 and 25.4 and 27.6 % male and female respectively in 2001 had attained primary level education (females had an edge over males in both the Censuses as found in the case of state also). The percentage of literate males and females who had attained middle level education were of the order of 25.2 and 23.9 percent in 1991 and 15.7 and 14.6 % in 2001 respectively, while 22.5 males and 14.3 females in 1991 and 24.4 and 16.8 % males and females respectively in 2001 were matriculates and above.

According to 1991 and Censuses, the positions of literate males and females by different level of education and various age groups in Sahibganj district were more or less the same as observed for the respective state as a whole.

N-Denotes negligible

The Census of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the data on mother tongue (languages specified in Schedule VIII to the constitution) was collected as returned by each individual. Annexure VIII (A) above presents distribution of different mother tongues (Scheduled Languages) as recorded during the 1991 census for Bihar state and Sahibganj district. It can be observed from the Annexure VIII (A) that Hindi was the principal language spoken by the majority of people (80.9%) in the state. In Sahibganj district Hindi and Bengali both were the principal languages spoken by the people, Hindi (27.5%) had a slight edge over Bengali language (26.6%). Urdu was the third important Scheduled language spoken by 8.3 percent people of Sahibganj. Urdu was the second most spoken language in the state while Bengali was numerically the second most important language in Sahibganj district. Urdu, as mother tongue, was observed to be more or less in equal proportion of population both for the district (8.3%) as well as for the state as a whole (9.9%). The proportion of speakers of other scheduled languages appears to be almost negligible in the district of Sahibganj. Bengali was the third important language in the state of Bihar with 2.9 percent of the population speaking this language.

It transpires from the above Annexure VIII (B) that Sahibganj was the only C.D. Block in the district where Hindi was returned as the most important language with 66.4 percent speakers. Other C.D. Blocks had returned Hindi as the most prominent language but with less than 50 percent, the lowest being Pakaur with 7.0 percent followed by Maheshpur (12.4%), Amarapara (13.3%) and Litipara (13.7%). While in Pakaur block the most important language returned was Bengali (73.1%), no other Scheduled language was observed to be in prominence. Bengali happened to be a prominent language in a number of C.D. Blocks in the district apart from Pakaur block. In the C.D. Blocks such as Sahibganj, Hiranpur and in towns of Sahibganj, Borio Bazar, Rajmahal and Pakaur Urdu occupies an important position. In quite a good number of blocks the proportion of population was either nil or almost negligible so far other Scheduled languages were concerned.

Among the towns of the district Hindi appeared to be the most important language (more than 60.0% speakers in Sahibganj and Rajmahal towns), Sahibganj (M) having an edge over Rajmahal (NA) with 66.4 percent as against 61.7 percent. Urdu speakers were also found to be in good number in these two towns though they were numerically much less than Hindi speakers. In Borio Bazar town the majority of people had returned Urdu and Hindi as the most important language, their proportion being almost equal (38.4 percent and 37.4 percent respectively). Bengali was returned as the third prominent language in this town with 23.9 percent speakers. In Pakaur (M) though Hindi was returned as the most important language, the proportion of such speakers (41.0%) was comparatively much lower vis-à-vis Sahibganj and Rajmahal towns. Bengali, with 36.9 percent speakers also occupied an important position in this town. Urdu was the third most important language in Pakaur town with 11.3 percent speakers.
