Annexure VIII:		Distribution of different mother tongues returned in 1991 Census	314

Foreword

The District Census Handbook (DCHB) published by Census Organization since 1951 census, is one of the important publication in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district along with the status of availability of civic amenities, infrastructure facilities, etc.

The scope of the DCHB was initially confined to a few Census Table and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/ town levels. New features along with restructuring of the formats of villages and town dire rectory were added into it. In village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adults literacy centers, primary health sub-centers and community health workers in the villages were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to given the details on number of inaccessible villages in each district. In Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and ClassII towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/ taluk/PS level presentation. It was excepted that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance (s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely Primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Center and Primary Health Center), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 censuses. The basic amenities available in village and towns are analyzed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexure. The analytic notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/ place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analyzed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Sudhir Kumar Rakesh , Director of Census Operations Jharkhand. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state government in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Sri R.G.Mitra, Deputy Registrar General (C&T) and Dr.I.C.Agarwal, Senior Research Officer of Social Studies Division. Dr.R.P.Singh,Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computersation of village and directory data and the programme for the generation of Village Directory and Town Direcotry statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K. Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible

D.K.Sikri

Registrar General &
Census Commissioner , India

New Delhi

Preface

The history of District Census Handbooks (DCHB) goes back to the 1951 Census and since then these are brought out after every Census because of their wide ranging utility. Census after Census much innovations/modifications have taken place in the District Census Handbooks in terms of coverage and contents of population data.It, inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective districts. The DCHBs are of immense utility to the planners, administrators, academicians and researchers. It will serve the purpose of the ever increasing demand for the micro-level data.

The District Census Handbook (DCHB) in 2001 Census is made more informative and exhaustive in terms of coverage and content. The content of Village Directory is broadened by including information such as bank, recreational and cultural facilities, newspapers and magazines available in villages. For the first time information on the most important commodity manufactured in village is provided. In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town. During 1981 and 1991 Censuses this information was, however, restricted to class I and class II towns only. The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. A significant addition is analytical notes presented as annexure on important aspects concerning Census data on (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census. The eight digit permanent location code numbers (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to few copies for office use keeping in view the demand of data users.

The District Census Handbooks are brought out in two parts, viz. (i) part A containing the village and town directories and (ii) part B – village and townwise Primary Census Abstracts pertaining to general population. It also contains the District Primary Census Abstracts for Scheduled Castes and the Scheduled Tribes population.

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees.

The analytical note is prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract. It takes note of the social, economic and demographic changes which have taken place in the districts during the decade. District and C.D. Block Maps containing useful information on many items have also been included in this volume.

The work of this project has been initially supervised by Shri Sudhir Kumar Rakesh, IAS, ex-Director of Census Operations , Bihar and Jharkhand. I am deeply indebted to him.

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data. I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the Deputy Commissioners, the Sub-Divisional Officers, the District Census Officers and the Block Development Officers.

In this office S/Shri Phool Singh, Joint Director , A.K. Saxena, Deputy Director and K.K. Verma, Assistant Director supervised the project at different stages. In this voluminous job valuable assistance was rendered by S/Shri D.P. Choudhary, ADCO(T) , S.K. Das Sudhakar, ex-ADCO(T) and Ramesh Prasad, Statistical Investigator Grade-I who were responsible for supervision from beginning to end. Shri Mauleswar Singh, ex-Assistant Director was associated to monitor the scrutiny work of Village Directory and Town Directory data. Sri K.K. Verma, ex-Assistant Director prepared the first draft under the guidance of Sri S.K. Sinha , ex-Deputy Director. The write-ups on fertility and mortality patterns and migration based on 1991 Census data were contributed by S/Shri D.P. Choudhary, ADCO(T) , S. K. Das Sudhakar, ex-ADCO (T) and U.C. Lal , ADCO (T). S/Shri D.P. Choudhary, ADCO (T) and S.K. Das Sudhakar, Ex-ADCO (T) prepared the analytical notes on inset tables based on the data of Village Directory, Town Directory and Primary Census Abstracts under the guidance of Shri K.K. Verma, ex-Assistant Director. District and C.D. Block Maps were prepared in Map Section under the supervision of Sri M. Guria, Research Officer (Map). S/Shri Asharful Hoda, UDC and Surendra Mohan Prasad, LDC typed the manuscript and Dr. Satyendra Kumar Gupta, Statistical Investigator Grade-I and Shri Sant Ram, Statistical Investigator Grade-II helped in getting the volumes ready. I am thankful to all of them.

I am personally indebted to Sri J.K. Banthia, ex-Registrar General and Census Commissioner, India under whose guidance, the project for 2001 Census was finalised. I am sincerly thankful to Sri D.K.Sikri , Additional Secretary (RGI) for his guidance in completing this project on time. I am also indebted to Shri R.G. Mitra, ex-Deputy Registrar General (C & T), Dr. I.C. Agrawal, Assistant Registrar General (Social Studies) and Dr. R.P. Singh, ex-Deputy Registrar General (Map) and Sri S.L.Jain , Deputy Director for help and encouragement at different stages on time.

S.C.Tripathi

District Highlights – 2001 Census

1. Lohardaga is the smallest district in terms of size (1491 sq. km.) and population (364,405) in the state of Jharkhand.
2. Lohardaga is one of the least urbanized district in the state having about 12.67% of its population in urban areas where as 22.24% of the state's population live in urban area.
3. In terms of population per sq.km. Lohardaga is the 14th densely populated district with 244 against the state's 338 persons per sq.km.
4. Lohardaga ranks 4th in terms of sex-ratio (976) against the state's 941.
5. There is only one uninhabited village (out of 353 total villages) in the district of Lohardaga.
6. Senha (under Senha C.D. Block) is the most populated village (6,017) and Chulhapani (under Kuru C.D. Block) is the least populated village (32) in the district.
7. The economy of the district mainly depends on cultivation or related work. More than 80% of the total workers are engaged in primary sector.
8. C.D. Block Kisko has the highest number of villages (91) in the district and C.D. Block Lohardaga has the lowest number of villages (42).
9. Pakhar (under Kisko C.D. Block) has the largest area (3325 hectares) and Keradih and Barwatoli (under Kisko C.D. Block) have the smallest area (21 hectares each) among the villages in the district.
10. Improved drinking water facility figures are impressive - it is available for 83.24 per cent of the villages.
11. Lohardaga has attained fame as the Bauxite-producing place.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

The District Census Handbook, brought out by the Census Organization, is one of the most valuable district level publications.It provides, inter-alia, information on the basic demographic and socio-economic characteristics and availability of important civic amenities/facilities in each village and town of the respective districts.This publication has proved to be of immense utility to the planners, administrators, academicians and researchers.

The District Census Handbook, earlier a joint venture of the State Government and the Census Organization, is one of the richest data sources, particularly in the context of planning and development at the grass root level. It is rather the only source that gives village and town level information concerning several demographic and socio-economic characteristics and also on availability of important civic amenities.This publication was brought out in the 1951 Census for the first time. In fact, it is the replacement of 'Village Statements' which used to be prepared in the Censuses of Pre-Independence period, and since 1951 it has been published after each decennial census with some innovations/ improvements.

Initially the scope of the DCHB was confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town of the district. The DCHB published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA (Primary Census Abstract). At the 1971 Census, the DCHB was brought out in two parts, viz., Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA in respect of all the States and Union Territories. The Third Part of the DCHB, comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to delay in compilation of the requisite material. As far as the state of Bihar is concerned, this Third Part or Part-C could be published in respect of a few districts only. For the remaining districts, this volume was kept in the office library in mimeographed form.

At the 1981 Census, new features along with restructuring of the format of Village and Town Directory were introduced in the DCHB. These were published in two parts for each district. While Part-A comprised Village and Town Directories, the PCA of Villages and Towns (ward wise), including Scheduled Castes and Scheduled Tribes PCA up to CD Block/Town level, was provided in Part-B. To illustrate, all the amenities, except electricity, were brought together in the Village Directory and if an amenity was not available in the concerned village, the distance (in broad ranges) from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the 'Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to formulate programmes for providing civic amenities in the slums. In this statement details on civic and other amenities were presented for the notified slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHB for the 1991 Census was, by and large, the same as

followed during 1981 Census.However. the format of PCA was restructured slightly in the 1991 Census for the benefit of data users and nine-fold industrial classification of main workers was given as against four--fold industrial classification presented in the 198: Census. In addition to this, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age had been treated as illiterate at the time of the 1991 Census.It was expected that the above mentioned modifications would help the planners in chalking out more effective developmental programmes.

At the country level, one of the most important innovations in the 1991 Census was the C.D.Block level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluka/PS level presentation across the country. For the state of Bihar, however, the Community Development Block level presentation of data in the Village Directory and PCA had been adopted since 1971 Census itself. During 1951 and 1961 Censuses the presentation of data was made at the Anchal level in the State of Bihar. In fact, Anchal and Community Development Block used to be more or less co-terminus till 1991 census. However, the situation has changed after 1991 Census and now Anchal and Community Development Block no longer remain co-terminus in all the cases. It was expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro level developmental plans, as the C.D. Block is now increasingly being used as the key administrative unit for developmental planning. In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both computerized and manual codes for each village were provided for the 1991 Census along with the corresponding codes of 1981.

The District Census Handbook of Census of India, 2001 is more informative and exhaustive in terms of coverage and content. The coverage in Village Directory has been further broadened by including a number of other facilities like banking, recreational and cultural facilities, availability of newspapers & magazines, income and expenditure of Gram Panchayats and most important commodity (ies) manufactured in the Village etc. Apart from these, more details on distance(s) at which basic educational facilities (viz., Primary and Middle Schools and College) and medical facilities (viz. Allopathic Hospital, Maternity and Child Welfare Centre and Primary Health Centre) etc. are available, if not already available in the village, are being provided for the first time in DCHB.

The type and extent of basic amenities available in the villages & towns have been analyzed in depth with the help of a number of cross classified inset tables & statements. Brief analytical notes/accounts on important aspects concerning respective districts viz. (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions,(v) marital status of population, (vi) age, sex and education & (vii) distribution of different mother tongues, all based on 1991 Census, are being given at the end of the text as separate annexures.

For the District Census Hand Book of the Census of India, 2001, emphasis has been given on the quality of village and town level amenity data.With a view to find out erratic or aberrant trends of inexplicable fluctuations in amenity data, efforts have been made to verify the V.D. & T.D. data with the help of similar information brought out by the State and Central Governments as also by Government/Semi-Government institutions.

The processing of data and maps to be incorporated in the District Census Hand Book this time has been done both manually and digitally (with the help of computer technology). Another innovation of Census of India 2001 is that the hard copy of the maps of the Districts and C.D. Blocks have been converted into the digital database. During 1991 census the village wise information/amenities were shown manually in the maps of District Census Hand Book. But during 2001 Census the depiction of the information/amenities in the maps has been done by utilizing Computer Assisted Cartography.The editing, annotation, incorporation of amenities and other concerned work related with district and C.D.Block maps have been done simultaneously, as far

aspossible, except the incorporation of population size of the villages which became ready when the Urban/ Village Primary Census Abstract was made available through Computer Scanner.

(ii) Brief history of the district

Lohardaga district, which was a part of Ranchi district till 1981 Census, acquired the status of an independent district on 16th May, 1983. It has a rich heritage and close linkage with the district of Ranchi. It consists of 5 Community Development Blocks, viz., Kisko, Kuru, Lohardaga, Bhandra and Senha. The district is bounded on the north by Palamu district, on the south and west by Gumla district and on the east by Ranchi district.

The Kol rising in 1831-32 resulted in the creation of the non-regulation South-West Frontier Agency with its headquarters at Lohardaga. It comprised almost the entire area of the present Chotanagpur division.

Earlier the name of the old Ranchi district was Lohardaga. The name of the district was changed in 1899 from Lohardaga to Ranchi.

In ancient times the tract which corresponds to the district of Lohardaga and the neighbouring parganas was in the undisturbed possession of the Munda and Oraon tribes and was known to the Aryans as Jharkhand or the 'forest territory'.The entire tract was presumably beyond the pale of direct Hindu influence during ancient India. However, Jarasandh, the mighty emperor of Rajgriha in the Mahabharat period might have exercised some kind of loose supervision over the area. Similarly, Mahapadmanand Ugrasen of Magadh, who subdued the entire country up to Orissa, might have gained some control over Jharkhand as well. Possibly, the area was included in the Magadh Empire during the reign of Ashoka (273-232 B.C.)

With the decline of Mauryan power, king Kharavela of Kalinga led an army through Jharkhand and ransacked Rajgriha and Pataliputra. Later, Samundra Gupta (335-380 A.D.) must have passed through the area on his expedition to the Deccan. The Chinese traveller Hiuen Tsang is believed to have journeyed through the Chotanagpur Plateau in course of his travels to Nalanda and Bodh Gaya.

The Chotanagpur Raj is believed to have been set up in fifth century A.D. after the fall of the imperial Guptas. Pharimukut was elected the first king. It is said that he was found by the side of a tank under the protection of a Nag (snake). Hence the dynasty founded by him was named the Nag Dynasty.

The entire Chotanagpur plateau was referred to as Jharkhand by the Muhammedan historians. Throughout the Turko-Afghan period (upto 1526), the area remained virtually free from external influence. It is only with the accession of Akbar to the throne of Delhi in 1556 that Muslim influence penetrated Jharkhand, then known to the Mughals as Kokrah. In 1585, Akbar sent a force under the command of Shahabaz Khan to reduce the Raja of Chotanagpur to the position of a tributary Kokrah was included in the Subah of Bihar as mentioned in Ain-e-Akbari.

After the death of Akbar in 1605, the area presumably regained its independence. This necessitated an expedition in 1616 by Ibrahim Khan Fateh Jang, Governor of Bihar and brother of Queen Noorjahan. Ibrahim Khan defeated and captured Durjan Sal, the 46th Raja of Chotanagpur. He was later released by the Emperor and allowed to resume his previous position as an independent chief. After that the relations between the Moghal Emperors and the Kokra chiefs continued to be somewhat friendly and peaceful. A stipulated revenue of Rs. 6000 was regularly paid.

In 1632 Chotanagpur was given as Jagir to the Governor at Patna for annual payment of Rs. 1,36,000. During the reign of Muhammad Shah (1719-1748). Sar Balland Shah, the Governor of Bihar, marched against the Raja of Chotanagpur and forced his submission. Another expedition was led by Fakhruddoula, Governor of Bihar, in 1731. He came to terms with the Raja of Ramgarh who owed allegiance to the Raja of Chotanagpur. The district seems to have enjoyed almost an unbroken peace from 1624 when Durjan Sal was released till the appearance of the British in 1772.

The Diwani of Bengal, Bihar and Orissa was granted by Emperor Shah Alam II to the East India Company in 1765. This Diwani included Chotanagpur as a part of Bihar. The internecine quarrels and depredations of the Raja of Gidhaur, the Raja of

Ramgarh and the rival claim between Gopal Rai and Chitrajit Rai for the Kingdom of Palamu led the British to take an active interest in the area. In December 1771 Captain Camac attacked Palamu and put Chitrajit Rai as the Raja. The history of the district for sometime thereafter is interlinked with the history of Palamu, Hazaribag and Singhbhum.

During the operations of Captain Camac against the Raja of Palamu, Dhupnath Shahi, Raja of Chotanagpur rendered useful service to British. He acknowledges the authority of the company and offered to pay annual tribute of Rs. 12000 instead of Rs. 6000 fixed under the Muslim rule. However, arrears in payment resulted in an expedition against him in 1773 as a result of which an agreement was reached stipulating enhanced payment of Rs. 15,000 per year. The Raja was allowed to retain his hold on the internal administration.

Captain Camac was succeeded in 1770 by Chapman, the first civilian administrator of Chotanagpur. The so-called 'conquered provinces' were formed into a district under the name of Ramgarh Hill Tract in 1780 which lasted till 1863. The old district of Ranchi including Lohardaga was not directly included in this unit but was added under the designation of Tributory Mahal of Chotanagpur.

Disputes between the Raja and his brothers led to further disturbances in 1807-1808. A force was sent under Major Raughsedge. The Diwan of the Raja who was primarily responsible for the trouble, was apprehended and jailed. The Raja paid up arrears of revenue and settled his disputes with his brothers. Six police thanas were also set up in 1809, marking the beginning of end of the feudal authority of the Raja. This also marked induction of non-tribal revenue collecting agents who later oppressed the aboriginal tenants.

This discontent among the tribal population evidenced in the earlier insurrections, found an outlet in the Kol insurrections of 1831-32. The immediate cause for it was the humiliation caused to Mundas by the Sikh and Muslim thikedars (intermediaries in revenue collection). The Mundas got together in Laukha village near Tamar and plundered and destroyed many villages held in farm by Sikh and Muslim thikedars. They were overpowered by the forces led by Captain Wilkinson in 1832.

This district has attracted many Christian missions which have contributed much to the growth of education in the district of Lohardaga. The first conversions of the tribal population to Christianity took place in 1850.

The 7th and 8th native Companies of the Ramgarh Battalion stationed at Hazaribag rose in revolt on the 30th July. When news of this reached Col. Dalton (who was then the Commissioner of Ranchi), he sent Lt. Graham with two companies of the Ramgarh Light Infantry, thirty horsemen and two guns to disarm the regiment at Hazaribag. This force left Ranchi on 1st August. Meanwhile, the insurgents at Hazaribag started marching to Ranchi by the road via Badan. Getting news of this, the infantry with Lt. Graham also rose against British authority and commenced their return journey to Ranchi. Lt. Graham proceeded to Hazaribag with the cavalry which remained loyal to him and reached there on the 2nd August.

The insurgent troops at Doranda burnt the offices and courts of the old district and some bunglows and set free the prisoners from the jail. They expected the insurgents from Hazaribag to join them but when the latter did not reach Doranda they set out to join Babu Kuer Singh in Shahabad in the third week of September. They were attacked and defeated on the 2nd October, 1857 at Chatra under a British force commanded by Major English. With the arrival of Col. Dalton at Ranchi along with a contingent of force, the courts were reopened and peace and order restored.

The infiltration of the British in the political horizon of Chotanagpur also synchronized with a great socio-economic revolution. Agrarian discontent against the imposition of Begari(forced labour) and illegal enhancement of rent by the intermediaries resulted in the Sardari agitation, so called due to the instigation and leadership provided by the Sardars. By 1887 the movement had grown and many Munda and Oraon cultivators refused to pay rent to the land owners. The Sardari agitation (or Larai as it was called) was at its height in 1895 when a socio-religious leader named Birsa Munda appeared on its scene. The importance of his role in the social history of the

district is borne out by the appellation of Birsa Bhagwan given to him.

The movement led by Birsa Munda was half agrarian and half religious, it had a direct connection with agrarian unrest and also appeared to have been influenced by Christian ideas. Birsa Munda was apostate to Christianity. His teaching was partly spiritual, partly revolutionary. He proclaimed that the land belonged to the people who had reclaimed it from forests, and therefore, no rent should be paid to it. He asserted that he was the Massiaha and claimed divine powers of healing.

Birsa's crusade brought about an armed rising of the deluded peasantry which was quickly suppressed. Birsa died in jail in 1900.

A religious movement among the Oraons was initiated by Jatra Oraon of Bishunpur police station in 1914. The Tana Bhagat movement as it was called also had its genesis in agrarian issues and particularly the economic disparity between Christian converts and the traditional or Sansari Oraons. The non-co-operation movement launched by Jatra Oraon and his associates soon spreaded in the districts.

The district played an important role in the national freedom movement. The non-co-operation movement in the areas of Lohardaga followed the same pattern as else where in India. The movement caught the imagination of the people particularly the Tana Bhagats and a large number of them attended the Gaya Session of the congress in 1922 which was presided over by Deshbandhu Chittranjan Das. These Tana Bhagats returned home deeply impressed with the message of freedom movement. They also attended the meetings organized by the non-co-operation workers.

On 5th October, 1926 a Khadi exhibition was opened at Ranchi in presence of Sri Rajendra Prasad in the local Arya Samaj Hall. The Tana Bhagats also attended it. This was a part of constructive programme launched by Mahatma Gandhi.The Simon Commission was also boycotted by the people.

The Salt Satyagrah which was launched at the behest of Mahatma Gandhi, received great response in the district. In the wake of the quit India Revolution of 1942, the arrest of national leaders led to strikes, processions, demonstrations.The district took an active part in the subsequent events which led to country's freedom in 1947.

(iii) Administrative set up

The district of Lohardaga lies in the South Chotanagpur Division. The district administration is headed by the Deputy Commissioner. He belongs to I.A.S. cadre. He is assisted by officers belonging to State cadre. Police Administration is looked after by the Supdt. of Police. Lohardaga is a small district having only one sub-division viz., Lohardaga. There are altogether 5 C.D. Blocks viz, Kuru, Kisko, Lohardaga, Senha and Bhandra and one town viz., Lohardaga (M). There are 353 villages in the district.

Judicial Administration : The Judges and Munsif magistrates are posted at district and sub-division who administer and deliver justice of different kinds.The district judiciary is part of Indian judicial system as envisaged in Indian Constitution and independent of district administration.

(iv)Physical Features

The district of Lohardaga comprises of two broad natural divisions:-

i) Lohardaga Hills (North West)

ii) The lower Chotanagpur plateau (South east)

The sub-micro region is located in the north-western part of the district of Lohardaga. It is bounded by Palamu district in the north and the west and Gumla Plateau in the south and the east. However, the state of Chhattisgarh also forms the boundary in the west to this region. It comprises Kisko, Senha and Kuru C.D. Blocks of the district. This region also includes some other C.D. Blocks of other districts which are Dumri, Chainpur, Gumla and Ghaghra. The region is a hilly tract covered with mainly sal forests. The height of the region varies from 947 metres in the west to 1031 metres in this region. There are variations in the slope directions in different sections of the regions.

The south eastern part of the district falls in the lower Chotanagpur plateau.

River System

The North Koel river flows from the south to

north dividing the region into two parts. The south Koel originates from this tract and drains toward the south. There are many other small tributaries which flow in the region. Ravines are found along the tributaries.

The Shankh river which flows in the north of the town of Lohardaga is an important river in the neighbourhood of Lohardaga.

Climatic conditions

The climate of Lohardaga is quite healthy as compared to other districts of the state. The winter season starts in the first week of November and lasts till February. December and January are very cold when the temperature drops to minimum. A strong cold wind blows throughout January and the climate during this period of the year is extremely bracing. April and May are the summer months. The maximum temperature during these two months reaches about 36 degree celesius. In spite of high day temperature the nights are cool and so the heat is not so oppressive.

The monsoon sets in usually in the third week of June and the climate during this period is very favourable. During July and August the rainfall is heaviest. The average annual rainfall is 891.00 mm in the district. The district gets some winter rains also during the months of December and January.

Flora and Fauna

In the past, large areas of the district were covered under forest. The district of Lohardaga had about 39920.24 hectares of forest in 2001. Dry peninsulars' is the type of forest found with patches of mixed forest. Sal trees are agregarious. The principal companions of Sal are Asari, Garmhar, Kend and Simal. The Mahua is common in the Lohardaga hills. Tigers and Leopards are occasionally found in the forest but Bears are common there. Sambhar, Chital (spotted deer), Nilgai and Hares are more common.

Mines and minerals

Laterite is found in the Lohardaga hills. It is derived from the ancient lava of which the region was believed to be composed. The lava has been converted into Laterite and Bauxite due to weatherings.

Bauxite is the main mineral found in the district of Lohardaga. There are huge deposits (probably the largest in Asia) of Bauxite ores at Bagru, Pakhar, Maruapat and Maidnapat hills of the district.

Land use pattern

With the gradual deforestation of the district more and more land is being brought under cultivation. The cultivable land of the district is divided into the two classes, viz., Don and Tanr. The Don lands are the terraced low lands on which mainly rice is grown and the Tanr are the uplands which produce coarse form of rice, millets, pulses and oil seeds.

Almost entire part of the district is covered by upland grey-yellow, grey-heavy soil. Some portions of this part have steep slopes and highly dissected regions covered by hills and forest. Rice is the main crop of the district. It covers the major portion of the gross area sown. Wheat on the other hand, covers a very small proportion of the total gross area sown. Among the non-food crops grown, oil-seeds are the most important.

Irrigational facilities

The cultivators of the district depended on good rainfall for their crop of rice in the pre independence days. The irrigation received some attention at the hands of the erstwhile Zamindars. The British Govt. as such paid little attention to the irrigation needs of the district. The hill streams remain almost dry except in the rainy season and do not offer as much scope for irrigation as the perennial rivers. Artificial irrigation facility in the district is not adequate. The wells, springs and Ahars are the traditional sources of irrigation.

In the post independence days several schemes have been executed by the government. The district, however, still requires more facilities of irrigation through major, medium and minor irrigation schemes in order to ensure a regular source of water supply and assured irrigation to the paddy crop as also other crops.

Industrialisation

Lohardaga is considered as the industrially most under developed district. There also used to be a Lac factory at Lohardaga. Manufacturing of metal utensils was of very high order in the past. Lohardaga has the privilege of having operating centers of two important aluminium companies engaged in Bauxite

mining.

Live Stock

The cattle of the district are small and under sized which is largely due to lack of good pasturage and good fodder. In the remote parts there is still ample pasturage in the jungles, but owing to the tension of cultivation the areas are rapidly decreasing. Besides cattle, the cultivators keep large number of goats for their purposes.

There has been a concerted effort on behalf of the state govt. to improve the breed of the cattle by way of distribution of stud bulls on Mariana and Tharparkar varieties. In order, to upgrade the cattle quickly and also at a low cost, artificial insemination centers with sub-centres have been opened in the district.

There are a number of Veterinary hospitals and dispensaries spread over the entire district. Treatment, prevention and suppression of diseases of the live stock are the main functions of the Veterinary institutions.

The population of poultry has been steadily increasing. Poultry farms have been opened at a number of places in the district. Concerted efforts are being made to improve the breed of the poultry in the district. Poultry is an indigenous cottage industry of the aboriginals of the district who invariably keep poultry.

Communication

The district of Lohardaga is well served by a network of roads. The roads are maintained by the P.W.D., the Rural Engineering Organisation, the Zila Parishad and the Municipality. The length of the road from Ranchi to Lohardaga is 75 Kms.

Lohardaga is also connected with Ranchi by rail running from Ranchi to Lohardaga over a distance of about 67 kms. The district headquarters town of Lohardaga is directly connected with towns and cities like Jashpur, Raiganh, Mumbai, Jamshedpur, Ranchi, Daltonganj, Gaya and Patna.

Trade and Commerce

Lohardaga is considered to be the chief center of trade in the district. The importance of market has considerably increased with the opening and extension of railway at this place. Apart from the railways, a considerable amount of trade still goes by road. Apart from the permanent markets, trade is carried on by means of Hats held at various centers at which the merchants purchase food grains, oil seeds, lac, hide, etc. from the cultivators and sell to them in return salt, kerosene oil, etc.

The Lohardaga town is well known for vegetable market located here. Large quantities of vegetables are supplied to places far and near through rail and road transport. On the important market days, particularly the one held on each Friday and Monday at Lohardaga, vegetables are transported to Ranchi, Rourkela and the steel city of Jamshedpur. Lohardaga is itself famous for trade in rice. Besides this, there is a good trade also in Ghee (refined/purified butter), Khandsari, Arhar, pulse and lac.

Electricity and power

The district receives most of its power supply from the Jharkhand State Electricity Board through the Thermal Power Station located at Patratu. The town of Lohardaga was electrified in the year 1956.

Social and cultural and administrative development

The newly created Jharkhand state came into force on the 15th of November, 2000 with its headquarters at Ranchi. The creation of the separate state has brought administrative changes in the district. It has also made impact on the Social, Cultural and economic life of the people.

Fairs and festivals are, however, held regularly in the district by different communities in complete harmony.

(v) Census concepts

Building

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of

construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Room

A room should have four walls with a doorway with a roof over head and should be wide and long enough for a person to sleep in, i.e., it should have a length of not less than 2 metres and a breadth of at least 11/2 metres and 2 metres in height. A room, however, which is used in common for sleeping, sitting, dining, storing and cooking, etc., should be regarded as a room. An unenclosed verandah, kitchen, store, garage, cattle-shed and latrine and rooms in which a household industry such as a handloom is located, which are not normally used for living or sleeping are excluded from the definition of a living room for the purpose of this question.

One is likely to come across conical shaped hut or tent in which human beings reside. In such improvised accommodation, there will be no four walls to a room and therefore, the above definition would not strictly apply to such types of accommodation. In such cases, the tent or conical hut etc., have been construed to be a room.In certain parts of the country, particularly in rural areas, the pattern of housing may present some problems. For example, a household may be in occupation of several huts put to different uses such as main residence, sitting room, store and even for sleeping at night. By strict application of the definition each one will be reckoned as a census house, but this does not reflect the real situation. While huts used as store or cattle shed pose no problems, those used as sleeping rooms beyond the main residence, should be counted as rooms rather than separate census houses.If a garage is used by a servant and he lives in it as a separate household, it should be reckoned as a room available to the servant's household. If the servant is considered as a member of the household then the garage room should be reckoned as an additional room of the household.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them.

If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes if becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these

were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

' All places with a municipality, corporation, cantonment board or notified town area committee, etc.

A place satisfying the following three criteria simultaneously:

i)A minimum population of 5,000;

ii)at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City

Towns with population of 1,00,000 and above are called cities.

UrbanAgglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.--For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:—(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and—(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglo-meration should not be less than 20,000 (as per the 1991 Census).— With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations

would be constituted:— i) a city or town with one or more contiguous outgrowths;— ii) two or more adjoining towns with their outgrowths; and— iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.—It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.-

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State of Jharkhand are given below :

Scheduled Castes :

1. Bantar
2. Bauri
3. Bhogta
4. Bhuiya
5. Chamar, Mochi
6. Chaupal
7. Dabgar
8. Dhobi

9. Dom, Dhanger
10. Dusadh, Dhari, Dharhi
11. Ghasi
12. Halalkhor
13. Hari, Mehtar, Bhangi
14. Kanjar
15. Kurariyar
16. Lalbegi
17. Musahar
18. Nat
19. Pan, Sawasi
20. Pasi
21. Rajwar
22. Turi

Scheduled Tribes :

1. Asur
2. Baiga
3. Banjara
4. Bathudi
5. Bedia
6. Binjhia
7. Birhor
8. Birjia
9. Chero
10. Chik Baraik
11. Gond
12. Gorait
13. Ho
14. Karmali
15. Kharia
16. Kharwar
17. Khond
18. Kisan
19. Kora
20. Korwa
21. Lohra
22. Mahli
23. Mal Pahariya
24. Munda
25. Oraon
26. Parhaiya
27. Santhal
28. Sauria Paharia
29. Savar
30. Bhumij

Language and Mother tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have

received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker

Person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker' .

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation.— A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator.-Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing -or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not

be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods.— It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions,trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate

Percentage of workers (main + marginal) to total population.

Population density

Population density is the number of persons inhabited per square kilometre of the area.

Age

Age is measured in terms of the completed number of years.

Sex-ratio

Number of females per 1000 males in a population.

(vi) Non-Census Concepts

Improved drinking water

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.It may be mentioned that such uniform definition may not be valid across all states.

System of sewerage

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil

There are three prevalent systems of disposal of human wastes, viz. (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the faecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the streets sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where

human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below :

Crude birth rate(CBR)

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid –year Population}} \times 1{,}000$$

Crude death rate(CDR)

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR)

Number of live births in a year to female population in any specified age group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR)

Number of live births in a year to married female population in any specified age group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR)

Number of live births per 1000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR)

Number of live births per 1000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years.}} \times 1{,}000$$

Total fertility rate (TFR)

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15\text{-}19}^{45\text{-}49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR)

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR)

Number of deaths in a particular age group and sex per 1,000 population of the same age group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR)

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as :

Neo-natal mortality rate (NMR)

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Early neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Late neo-natal mortality rate

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR)

$$= \frac{\text{Number of deaths of 29 days to less than one year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR)

Number of still births plus deaths within 1st week of delivery per 1,000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR)

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR)

Number of deaths of women in the age group 15-49 while pregnant or within 42 days of termination

of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1000 population)

Number of currently married females in the age group15-44 years per 1000 persons of all ages.

Child woman ratio (0-4)

Number of children in the age group 0-4 years per 1000 women in the age group 15-49 years.

Child woman ratio (5-9)

Number of children in the age group 5-9 years per 1000 women in the age group 15-49 years.

Migration

Migration is the third component of population change, the other two being mortality and fertility.

A person is considered as a migrant by place of birth if the place in which he/she is enumerated during the census is other than the place of his/her birth.

Similarly a person is considered as a migrant by place of last residence if the place in which he/she is enumerated during the census is other than his/her place of immediate last residence outside the village or town and not simply in another house or locality in the same village or town.

Certain aspects concerning temporary movement/ migration of people has been explained below as these are important components concerning migration :

(i) Migration of persons in search of job is high in the country. In many cases such migrants are only seasonal in nature. People migrate to other places for work in a particular season and come back again to their usual place of residence after three or four months. All such workers are treated as migrants. Similarly, if a person moved to any other place for attending short term vocational or educational course that lasted for only few months of a year, she/he too were considered as a migrant.

(ii) Where a person had merely gone out to another place or had been shifting from one place to another purely on tour, pilgrimage, visit to hospital for treatment or for temporary business purposes, such persons are not deemed to have had another residence different from the place where she/he or her/his family normally resides. She/he is not considered as migrant.

(iii) A woman temporarily moves into a hospital or to her parents or other relative's house for delivery and if the hospital or the parents/ relatives houses is in a place different from usual place of residence, the place where the hospital or parents/relative's house is the place of last residence of the child but not of the mother.

A new response category 'Moved after birth' was added in Census of India 2001 in the question on 'reasons for migration' to bring out additional migration patterns. Natural calamities or distress migration as a reason for migration for last residence migrants included in 1991 Census, is covered under category of 'Others'. The reason for migration has been determined as applicable at the time of migration and not in reference to any point of time after that. For example, if a person had moved from the place of her/his last residence for the purpose of education and subsequently at some point of time got employment there only, the reason for migration would be 'education' and not 'work/employment'.

Internal and International migration

The migrational movements are of three types (i) Migration within the state itself with its components (a) Migration within the district of enumeration (intra district migration) (b) Migration from one district of state to another district of state (inter district migration), (ii) Migration from one state to another State of the country (inter-state migration), (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.The present name of the country, state or

district and not the name by which they were known at the time of her/his birth or last residence were recorded.

Rural-Urban components of migration

Rural or Urban status in respect of migrants have been determined as applicable at the time of migration and not with reference to any point of time after that. The flow of migrants consists of four streams viz. rural to rural, rural to urban, urban to rural and urban to urban.

Civic status of urban units

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/Town

Size-class of UA/Town is based on the population size of the UA/City/Town UAs./Towns with 1,00,000 and above population are classified as Class I UAs./ towns. These Class I UAs/Towns are now further sub classified in to seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are M7(5,000,000 and above); M6 (2,000,000 to 4,999,999); M5 (1,000,000-1,999,999) M4 (500,000-999,999); M3(300,000-499,999), M2 (200,000-299,999) & M1 (100,000-199,999) towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5000 and 9999 are Class V towns and towns with less than 5000 population are Class VI towns.

Slum area

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are deterimental to safety ,health or morals.

Mega city

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

Note on religion

The population of the Lohardaga district during 1991 was 288,886. Hindus constitute 73.9 percent (213,352 persons) of the population in the district followed by Muslims 14.4 percent (41,442 persons) and Christians constitute 3.0 percent (8,743 persons). Other religions constitute 8.8 percent (25,295 persons). All other three major religious communities have almost negligible percentages.

Note on mother tongue

Spoken language, which is medium of conversation, is an important attribute of population. The Census Of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During 1991 census, as in the previous censuses, the mother tongue as returned by each individual was collected.

The population of the Lohardaga district during 1991 was 288,886. As per distribution of different mother tongues (languages mentioned under 8th Schedule of Constitution of India) as returned during the 1991 Census for Lohardaga district, Hindi, the main mother tongue of the district was returned by 59.4 percent (171,716 persons) of the population. The corresponding percentage for the Urdu, the second most prominent language spoken in Lohardaga district, was 10.8 percent (31,104 persons). Speakers of other Scheduled languages were very thin in number than the two described above.

Note on important SCs and STs in the district of Lohardaga during 1991 Census :

The population of the Scheduled Caste in the Lohardaga district during 1991 was 10,919. Numerically five important SCs were namely (i) Chamar/Mochi (ii) Turi (iii) Dhobi (iv) Dusadh/Dhari/ Dharhi and (v) Bhuiya . The population of Chamar/ Mochi was 4,141 which constituted 37.9 percent of the Scheduled Castes population. The population of Turi was 1,643 which constituted 15.0 percent of the Scheduled Castes population. Dhobi had 1,423 population which constituted 13.0 percent of the Scheduled Caste population. Dusadh/Dhari/Dharhi had 919 population while Bhuiya had 773 population. Dusadh/Dhari/Dharhi constituted 8.4 percent while Bhuiya only 7.1 of the Scheduled Castes population.

The population of the Scheduled Tribes in the district of Lohardaga during 1991 Census was 162,964. Numerically five important STs were namely (i) Oraon (ii) Lohara/Lohra (iii) Kharwar (iv) Munda and (v) Mahli Oraon had 127,130 population which constituted 78.0 percent of the Scheduled Tribes population. Lohara/Lohra had 7,799 population which constituted 4.8 percent of the Scheduled Tribes population. Kharwar had 7,141 population which constituted 4.4 percent of the Scheduled Tribes population. Munda has 5,905 population while Mahli had 5,376 population. Munda constituted 3.6 percent while Mahli constituted 3.3 percent of the Scheduled Tribes population.

vii) 2001 Census Findings–Population and its Distribution According to the 2001 Census, the total population of Lohardaga district is 364,521 comprising 184,507 Males and 180,014 Females and constituting 1.4 percent of the State population spread over 2.0 percent of the area of the State in the 5 C.D.Blocks of the district. Lohardaga is the most populous where as Bhandra is the least populated C.D. Blocks in the district. Tables 1 to 52 based on PCA,V.D & Household data give insight into the colour and texture of the population in the district.

(a) Brief analysis of PCA data based on inset tables 1 to 36 :

TABLE 1: DECADAL CHANGE IN POPULATION OF C.D.BLOCK BY RESIDENCE, 1991-2001

Serial		Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001							
number	C.D. Block	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kisko	48,598	48,598	0	57,779	57,779	0	18.9	18.9	0.0	0.0	0.0
2	Kuru	66,458	66,458	0	83,922	83,922	0	26.3	26.3	0.0	0.0	0.0
3	Lohardaga	78,094	46,333	31,761	103,362	57,166	46,196	32.4	23.4	45.4	40.7	44.7
4	Senha	52,461	52,461	0	63,918	63,918	0	21.8	21.8	0.0	0.0	0.0
5	Bhandra	43,275	43,275	0	55,540	55,540	0	28.3	28.3	0.0	0.0	0.0
	District Total:	**288,886**	**257,125**	**31,761**	**364,521**	**318,325**	**46,196**	**26.2**	**23.8**	**45.4**	**11.0**	**12.7**

Table-1 shows that rise in the population of this district during 1991-2001 decade has been of the order of 26.2 percent. The rural population in the district has increased by 23.8 percent while the urban population growth over the decade has been as much as 45.4 percent. Rural-urban migration is an important factor which always leads to rapid expansion of the urban unit. Among the C.D. Blocks, Lohardaga has shown the highest increase in population over the decade with 32.4 percent. It may be due to the fact that Lohardaga town, the district headquarters, is located in this C.D. Block. The next highest increase in population is observed in Bhandra C.D. Block with 28.3 percent followed by Kuru C.D. Block with 26.3 percent. Percentage decadal variation has been observed the least in the case of Kisko C.D. Block with 18.9 percent.

The increase in rural population during 1991-2001 has been highest in Bhandra C.D. Block with 28.3 percent followed by Kuru C.D. Block with 26.3 percent.

TABLE 2 : NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District/C.D.Block	Total number of inhabited Village	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females

It may be observed in the Table-2 that the maximum number of villages in the district lie in the population range of 500-999 accounting for 28.4 percent of the total inhabited villages closely followed by villages in the population range of 1000-1999 accounting for 26.7 percent of the total inhabited villages. The percentages of population in the above two population ranges are 22.4 percent and 42.7 percent of the total rural population of the district respectively. There are only 2 villages in the population range of 5000-9999 accounting for 0.6 percent of the total inhabited villages and in these villages the percentage of population is 3.7 percent of the total rural population.There are 87 villages in the population range of 200-499 accounting for 24.7 percent of the total inhabited villages and in these villages the percentage of population is 9.1 percent of the total rural population. There are 46 villages in the population range of less than 200 accounting for 13.1 percent of the total inhabited villages and in these villages the percntage of population is only 1.8 percent.There is no village in the highest population range of 10,000 and above.

TABLE 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Above table is not applicale in respect of Lohardaga district as there has been no change between 1991 Census and 2001 Census

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	1	0.3	214	0.1
11-20	5	1.4	524	0.2
21-50	24	6.8	5,903	1.9
51-100	47	13.4	21,410	6.7
101-200	66	18.8	34,668	10.9
201-300	86	24.4	78,597	24.7
301-500	81	23.0	101,559	31.9
501 +	42	11.9	75,450	23.7
Not known	0	0.0	0	0.0
District Total:	**352**	**100.0**	**318,325**	**100.0**
Population Density (Rural) of the district:			**215.7**	

The data presented in Table -4 highlight the fact that maximum proportion of villages in Lohardaga district lies in the density range (per square kilometer) of 201-300 with 24.4 percent of the total inhabited villages followed by villages in the density range of 301-500 which account for 23.0 percent. It would further be seen that only one village falls in the density range of 0-10 which accounts for 0.3 percent of the total inhabited villages.

Maximum number of villages fall in the density range of 201-300 covering 24.7 percent of the population followed by villages in the density range of 301-500 which account for 31.9 percent of the population.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,032	1,034	955	1,058	1,072	870
1911	1,021	1,024	913	1,050	1,053	1,009
1921	1,002	1,010	809	1,026	1,034	928
1931	989	998	792	1,017	1,019	986
1941	978	990	792	1,005	1,007	965
1951	961	976	803	992	996	939
1961	960	987	772	1,027	1,037	920
1971	945	982	769	1,027	1,035	946
1981	940	977	804	1,011	1,015	981
1991	922	950	826	971	972	961
2001	941	962	870	976	982	932

Note: Sex ratio has been defined here as the number of females per 1000 males.

Table-5 shows that sex ratio for the urban areas of Lohardaga district is comparatively high as compared to the urban areas of the state during 1991 and 2001 Censuses. Similarly, the sex ratio for the rural areas of Lohardaga district is found to be comparatively high as compared to the rural areas of the state during 1991 and 2001 Censuses. It is found that in case of sex ratio in the total population in the district it is higher than the sex ratio of the State of Jharkhand both in 1991 and 2001 Censuses.

TABLE 6 : SEX RATIO BY C.D. BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kisko	975	975	
2	Kuru	991	991	
3	Lohardaga	964	990	932
4	Senha	969	969	
5	Bhandra	984	984	
	District Total:	**976**	**982**	**932**

In Lohardaga district as a whole there are 976 females for every thousand males. Within the district, the Sex ratio varies from 991 in Kuru C.D. Block to 964 in Lohardaga C.D. Block. The sex ratio of Bhandra C.D. Block is 984 while the sex ratio of Kisko C.D. Block is 975. The sex ratio of Senha C.D. Block is 969. The sex ratio figures for rural and urban areas of Lohardaga district are 982 and 932 respectively.

The sex ratios of Kuru, Lohardaga and Bhandra C.D. Blocks are higher than the district rural average of 982 while Kisko (975) and Senha (969) C.D. Blocks have sex ratios below the district rural average. The urban sex ratio of the district is 932 which is lower than the total and rural averages of the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C.D.Block	Sex ratio
1	2	3
1	Kisko	975
2	Kuru	991
3	Lohardaga	990
4	Senha	969
5	Bhandra	984
	District (Rural) Total:	**982**

As for rural areas in Lohardaga district there are 982 females for every thousand males. Within the district, the sex ratio varies from 991 in Kuru C.D. Block to 969 in Senha C.D. Block. The sex ratios of Kisko, Lohardaga and Bhandra C.D. Blocks are 975, 990 and 984 respectively. The sex ratios of Kuru, Lohardaga and Bhandra C.D.Blocks are higher than the district rural average of 982 while Kisko (975) and Senha (969) C.D. Blocks have sex ratios below

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	1	0.3	80	0.0
700-749	2	0.6	1,994	0.6
750-799	4	1.1	2,767	0.9
800-849	14	4.0	6,330	2.0
850-899	29	8.2	20,180	6.3
900-949	51	14.5	49,689	15.6
950-999	98	27.8	107,018	33.6
1000-1099	120	34.1	117,509	36.9
1100+	33	9.4	12,758	4.0
District Total:	**352**	**100.0**	**318,325**	**100.0**
Sex ratio (Rural) for District:		**982**		

It is observed in the Table-8 that the maximum proportion of villages in Lohardaga district lies in the favourable sex ratio range of 1000-1099 and these villages account for 34.1 per cent of the total inhabited villages. It further reveals that these villages which fall in this sex ratio range account for 36.9 percent of the district rural population. 98 villages (27.8%) fall in the favourable sex ratio range of 950-999 and these villages account for 33.6 percent of the rural population of the district. 51 villages (14.5%) are in the sex ratio range of 900-949 and these villages account for 15.6 percent of the rural population.33 villages (9.4%) fall in the very favourable sex ratio range of 1100+ and these villages account for only 4.0 percent of the rural population. 29 villages (8.2%) are in the sex ratio range of 850-899 and these villages account for 6.3 percent of the rural population. 14 villages (4.0%) fall in the sex ratio range of 800-849 and these villages account for only 2.0 percent of the rural population. Only 4 villages(1.1%) fall in the adverse sex ratio range of 750-799 and this small proportion of villages accounts for 0.9 percent of the rural population. Only 2 villages (0.6%) are in the very unfavourable range of sex ratio 700-749 which account for 0.6 per cent of the rural population. One village is in the lowest rage of sex ratio (less than 700) which accounts for 0.0 percent of the rural population.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Urban status of town	Sex ratio
1	2	3	4
1	Lohardaga	M	932
Sex ratio (Urban) for the district:			**932**

There is no urban agglomeration in Lohardaga district. There is only one urban unit i.e. Lohardaga (M). The sex ratio of this statutory town is 932 according to 2001 Census.

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Lohardaga (M)	46,196	1,817	10,979	3.9	23.8
	District(Urban) Total	**46,196**	**1,817**	**10,979**	**3.9**	**23.8**

Table-18 above shows that there is no urban agglomeration in Lohardaga district. There is only one statutory town in the district i.e. Lohardaga (M). The percentage of Scheduled Castes population to total population is 3.9 percent in Lohardaga (M). Whereas percentage of Scheduled Tribes population is 23.8 percent.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Kisko	1,003	973
2	Kuru	978	1,017
3	Lohardaga	921	985
4	Senha	1,033	985
5	Bhandra	1,014	984
	District (Rural) Total	**990**	**989**

Table-19 shows that the sex ratio of Scheduled Castes varies from 1,033 in Senha C.D. Block to 921 in Lohardaga C.D. Block. The sex ratio in Bhandra C.D. Block is 1,014 while the sex ratio in Kisko C.D. Block is 1,003. In Kuru C.D. Block sex ratio is 978. The sex ratio figures of Bhandra, Senha and Kisko C.D. Blocks are higher than the district rural average.

The sex ratio of Scheduled Tribes varies from 1,017 in Kuru C.D. Block to 973 in Kisko C.D. Block. Sex ratio figures of Scheduled tribes in Lohardaga, Senha, Bhandra and Kisko C.D. Blocks are below the district rural average. The sex ratio figure of Scheduled Tribes relating to Kuru C.D. Block is higher than the district rural average.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS/TOWNS, 2001

Serial number	Name of Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Lohardaga (M)	952	1,058
	Sex ratio (Urban) for the district:	**952**	**1,058**

There is no urban agglomeration in Lohardaga district. There is only one statutory town in the district i.e. Lohardaga (M). The sex ratio of Scheduled castes in Lohardaga (M) is 952 while the sex ratio of Scheduled Tribes is 1,058.

Table-21 and 22 show that among the C.D. Blocks in the district Lohardaga C.D. Block has the highest proportion of literate population (67.2%) followed by Kuru C.D. Block (53.0%). The literacy rates for Senha, Bhandra and Kisko C.D. Blocks are 47.5, 46.8 and 42.2 percent respectively. Male literates out number female literates in all the C.D. Blocks of Lohardaga district. The highest proportion of male literates is in Lohardaga C.D. Block with 78.3 percent closely followed by Kuru, Senha, Bhandra and Kisko C.D. Blocks with 67.3, 62.8, 62.2 and 56.5 percent respectively. Lohardaga C.D. Block has the highest female literacy rate with 55.8 percent while Kisko C.D.Block has the lowest literacy rate among the females with 27.7 per cent. Male and female literacy rates for Lohardaga C.D. Block are higher than the corresponding figures of Lohardaga district. Male literacy rate for Kuru C.D. Block is equal to the district average.

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	2	0.6	159	0.0
1-10	6	1.7	1,318	0.4
11-20	25	7.1	9,501	3.0
21-30	32	9.1	12,975	4.1
31-40	74	21.0	47,596	15.0
41-50	98	27.8	96,459	30.3
51-60	79	22.4	99,419	31.2
61-70	32	9.1	45,079	14.2
71-80	4	1.1	5,819	1.8
81-90	0	0.0	0	0.0
91-99	0	0.0	0	0.0
100	0	0.0	0	0.0
District Total:	**352**	**100.0**	**318,325**	**100.0**
Literacy rate for District:		**53.6**		

Table-23 shows that in 27.8 percent of the inhabited villages, literacy rate ranges between 41 and 50 percent. In these 98 villages 30.3 percent of the district rural population live. This is the largest group of villages in the district. This is closely followed by 79 villages with 31.2 percent of the district rural population accounting for 22.4 percent of these inhabited villages where literacy rate ranges between 51 and 60 percent. 21.0 percent of the inhabited villages i.e. 74 villages are as such where literacy rate ranges between 31 and 40 percent. These villages account for 15.0 percent of the district rural population. 9.1 percent of the inhabited villages i.e. 32 villages are as such where literacy rate ranges between 61 and 70 percent and these villages account for 14.2 percent of the district rural population. Another 9.1 percent of the inhabited villages i.e., 32 villages are as such where literacy rate ranges beetween 21 and 30 percent. These villages account for 4.1 percent of the district rural population. There are only 4 villages accounting for 1.1 percent of the inhabited villages where literacy rate ranges between 71 and 80 percent and these villages account for only 1.8 percent of the district rural population.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial Number	Name and urban status UA/Town	Number of literates and illiterates									Gap in male-female literacy rate
		Number of literates			Number of illiterates			Percentage of literates			
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. Table-31 and 32 show that the work participation rate (WPR) in the Lohardaga district is 27.7 percent as main workers and 14.4 per cent as marginal workers. Proportion of non workers in the district is 57.9 percent.

Among the main workers work participation rate for males in the district is 37.6 percent while that of females is only 17.5 percent as per 2001 Census. The proportion of main workers is the highest (30.1%) in Kuru C.D. Block and the lowest (23.0%) in Lohardaga C.D. Block. Out of 5 C.D. Blocks, WPRs of four C.D. Blocks are above the district average. The proportion of marginal workers is the highest (17.4%) in Kisko C.D. Block and the lowest (11.3%) in Lohardaga C.D.Block. The proportion of total workers is the highest (47.1%) in Kuru C.D. Block and the lowest (34.3%) in Lohardaga C.D. Block.

The proportion of non workers among males in the district is 52.6 percent while that of females is 63.4 percent as per 2001 Census.The proportion of non workers is the highest (65.7%) in Lohardaga C.D. Block and the lowest (52.9%) in Kuru C.D. Block.

TABLE 33: NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of Town	Persons / Males / Females	Total Population	Main worker		Marginal worker		Total workers (Main and marginal Workers)		Non workers	
				Number	Percentage	Number	Percentage	Number	Percentage	Number	Percentage

There is no urban agglomeration in Lohardaga district.The only urban unit in the district is Lohardaga (M). The work participation rate for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal wokers.Table-33 shows that for Lohardaga (M) the work participation rate (WPR) is 21.0 percent of the total population of the town as main workers and 3.8 percent as marginal workers.The proportion of non workers in the town is 75.3 percent. The proportion of male and female main workers is 35.2 percent and 5.7 percent respectively.The proportion of marginal workers among males is 4.9 percent and that of for females is 2.6 percent.The proportion of male and female non workers is 59.9 percent and 91.7 percent respectively.

Note : Percent of category of workers to total worker is given in brackets.

Table-34 shows distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers.The economic activity in the rural and urban areas in the district is primarily dependent on agriculture which is supported by the fact that the cultivators (57.9%) and agricultural labourers (22.8%) together constitute 80.7 per cent of the total workers of the district. The agriculture sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 71.1 percent for Bhandra C.D.Block to 40.2 percent for Lohardaga C.D. Block. Proportion of agricultural labourers varies between 27.0 per cent in Kuru C.D. Block to 18.4 per cent in Senha C.D. Block. The proportion of Household Industry workers is only 3.1 percent of the total workers of the district. Proportion of household industry workers varies between 5.9 percent in Kisko C.D. Block to 1.9 percent in Senha C.D. Block. The proportion of other workers is 16.2 per cent of the total workers of the district. Proportion of other workers varies between

Note : Percent of category of workers to total worker is given in brackets.

Table-35 shows distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers in the rural areas of the district. Primarily dependent on agriculture the table shows that the cultivators (62.2%) and agricultural

labourers (24.4%) together constitute 86.6 per cent of the total workers of the district. The agriculture sector has absorbed more than three fourth of the total main workers. The proportion of cultivators varies between 71.1 percent for Bhadra C.D. Block to 55.9 percent for Kisko C.D. Block. Proportion of agricultural labourers varies between 31.1 percent for Lohardaga C.D. Block to 18.4 percent for Senha C.D. Block. The proportion of Household Industry workers is only 3.0 percent of the total workers of the district. Proportion of household industry workers varies between 5.9 percent for Kisko C.D. Block to 1.8 percent for Lohardaga C.D. Block. The proportion of other workers is 10.5 percent of the total workers of the district. Proportion of other workers varies between 12.9 percent for Kisko C.D. Block to 7.1 percent for Bhandra C.D. Block.

				(8.3)	**(8.1)**	**(6.1)**	**(7.5)**	**(78.2)**

Note : Percent of category of workers to total worker is given in brackets.

There is no urban agglomeration in Lohardaga district. There is only one statutory town in the district i.e. Lohardaga (M). Table-36 shows distribution of main workers according to the broad four fold classification namely, cultivators, agricultural labourers, household industry workers and other workers. The cultivators constitute 5.2 percent and agricultural labourares constitute 2.7 percent of the total workers of Lohardaga (M). The proportion of male and female cultivators is 4.6 and 8.1 percent respectively. The proportion of male and female agricultural labourers is 2.0 and 6.1 percent respectively. Household industry workers constitute 4.5 percent of the total workers of Lohardaga (M). The proportion of household industry workers among males is 4.0 percent and that of females is 7.5 percent. Other workers constitute 87.6 percent of the total workers of Lohardaga (M). The proportion of male and female other workers is 89.4 and 78.2 percent respectively.

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table-37 gives the distribution of villages according to the availability of different amenities in the district.

Educational amenity - There are as many as 263 villages accounting for 74.7 percent of the total number of inhabited villages (352) in the district where educational facility is available. The highest proportion of villages with educational facility is in C.D.Block Lohardaga with 88.1 percent closely followed by Bhandra C.D. Block with 87.5 percent. The smallest proportion of villages with (58.9 percent) educational facility is observed in C.D. Block Kisko.

Medical amenity - The availability of medical amenity in the villages is quite low and only 19.6 percent villages have got it. Among the C.D. Blocks, Lohardaga has the largest proportion of villages with medical facility, the percentage being 33.3 percent. It is followed by Bhandra and Kuru C.D. Blocks with 23.2 and 21.1 percent respectively. Kisko C.D.Block, on the other hand has the minimum proportion of villages (13.3%) where medical amenity is available.

Improved drinking water - There are as many as 293 villages accounting for 83.2 percent of the total inhabited villages in the district where improved drinking water facility is available. Among the C.D. Blocks, Bhandra has 98.2 percent proportion of villages where improved drinking water facility is available. Senha C.D. Block, on the other hand, has the minimum proportion of villages (68.2%) where improved drinking water facility is available.

Post Office - Postal facilities are available only in 61 villages out of 352 inhabited villages (17.3%) in the district. Lohardaga C.D. Block has the maximum number of villages having postal facility (26.2%) followed by Kuru C.D. Block with 23.7 percent.Kisko C.D. Block has the minimum number of villages having postal facility (10.0%).

Telephone - The availability of telephone facility in the villages is quite low and only 8.5 percent villages have got it. Among the C.D. Blocks, Lohardaga has the maximum number of villages having telephone facility (16.7%) followed by Kuru, Bhandra, Senha and Kisko C.D. Blocks with 13.2, 8.9, 6.8 and 2.2 percent respectively.

Transport communication - Transport communication facilities are available only in 11 villages out of 352 inhabited villages (3.1%) in the district. Majority of Villages still do not have this facility. Bhandra C.D. Block has the highest proportion of villages (5.4%) which are connected by bus or rail or navigable river/canal services, etc., followed by Kisko, Kuru and Lohardaga C.D. Blocks with 4.4, 3.9 and 2.4 percent respectively. The villages of Senha C.D. Block still do not have any transport communication facility.

Bank - Banking facility is available only in 13 villages out of 352 inhabited villages (3.7%) in the district. Among C.D. Blocks, Bhandra has the maximum proportion of villages having banking facility (5.4%) followed by Senha C.D. Block with 4.5 percent. Lohardaga has the minimum number of villages having banking facility (2.4%).

Agricultural Credit Societies - Agricultural Credit Societies are available only in 16 villages out of 352 inhabited villages (4.5%) in the district. Lohardaga C.D. Block has the maximum proportion of villages having agricultural credit facilities (7.1%) while Kisko C.D. Block has the minimum number of villages with 3.3 percent.

Approach by Pucca road - This facility is available in 99 villages out of 352 inhabited villages (28.1%) in the district. Among C.D. Blocks, Bhandra has the maximum proportion of villages (with 42.9 percent) having pucca approach road followed by Kuru C.D. Block (39.5%) while Kisko C.D. Block has the least number of villages (13.3 percent) having this facility.

Power Supply - Electrified villages in the district constitute as low as 12.8 percent of the total number of inhabited villages. Among the C.D. Blocks, Lohardaga has the maximum proportion of electrified villages with 23.8 percent while Kisko has the minimum number of villages with only 2.2 percent.

TABLE 38: NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. Block	Total population of inhabited village	Type of amenity available

Note : Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

\# Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

It would be seen from Table 38 that educational facility is available to 90.7 per cent of the rural population of the district. The proportion varies between the maximum of 95.7 percent in Lohardaga C.D. Block and the minimum of 84.0 percent in Kisko C.D. Block. It may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 74.7 percent vide table 37) than the proportion of population which is as high as 90.7 percent. This may be attributed to the fact that villages which possess educational facility usually contain larger population as compared to those villages which do not have this facility at all.

In the case of medical facility also it can be seen that the proportion of rural population served by the amenity is of the order of 34.8 percent which is more than the proportion of villages served by medical facility in the district.

In the case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 90.5 percent which is more than the proportion of villages served by this facility in the district.

More or less a similar trend can be observed in respect of other amenities(except improved drinking water for Bhandra C.D. block) both in the district as also in its various C.D. Blocks.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2-4)
1	2	3	4	5
1. Education :-				
(a) Primary School	43	53	2	98
(b) Middle School	103	158	23	284
(c) Degree College	5	39	307	351
2. Medical:-				
(a) Hospital	46	99	196	341
(b) PHC	51	118	172	341
3. Post Office	116	149	28	293
4. Telephone	37	99	186	322
5. Bus Service	20	93	232	345
6. Banks				
(a) Commercial Bank	41	124	176	341
(b) Cooperative Bank	10	84	255	349
7. Agricultural Credit Societies	37	151	148	336

As regards educational facility it would be seen from the Table-39 that there are 98 villages in the district (27.8%) which do not have any primary school but the facility is available at places situated within 5 kms. for 43 villages within 5-10 kms for 53 villages and within 10+ kms for only 2 villages. There are as many as 284 villages in the district (80.7%) which do not have middle schools but the facility is available at places situated within 5 kms. for 103 villages within 5-10 kms for 158 villages and within 10+ kms. for 23 villages. It is interesting to observe that cent percent inhabited villages(except 1 village) of the district are deprived of college but the facility is available at places situated within 5 kms for 5 villages, within 5-10 kms. for 39 villages and within 10+ kms. for 307 villages.

There are 341 villages in the district (96.9%) which are without the facility of hospital and as many as 196 villages enjoy this facility at a distance range of 10 + kms. The number of villages enjoying this facility at a distance range of 5-10 kms is 99 where as the same is available at a distance of less than 5 kms for 46 villages. There are 341 villages in the district (95.2%) which do not have primary health centre.

Similar trend can be observed in respect of other amenities in the district.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometre)	Number of inhabited village in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport communi-cation $	Banks	Agri-cultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	3	3	1	1	1	0	0	1	2
	(100.0)	(100.0)	(33.3)	(33.3)	(33.3)	(0.0)	(0.0)	(33.3)	(66.7)

$ Transport communication includes bus service, rail facility and navigable waterways.

It would appear from Table-40 that maximum number of inhabited villages (63.4%) lie in the distance range of 16-50 kms. from the nearest statutory town.This is followed by villages in the distance range of 5-15 kms. from the nearest statutory towns with 35.5 per cent. Only 1 village is found to be in the distance range of more than 51 kms.

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 100.0 per cent for those situated within 5 kms from the nearest town and decreases to 77.6 percent in the distance range of 5-15 kms. Thereafter it again decreases to 73.1 per cent in the distance range of 16-50 kms. from the nearest town. In the case of other amenities also more or less the trend is same.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

It can be seen from the Table 41 that the maximum number of villages, i.e., 133 (37.8%) in the district fall in the population range of 1-499 followed by 100 villages (28.4%) having a population range of 500-999. The lowest number of villages is observed in the population range of 5,000-9,999 being only 2 (0.6%).

The proportion of villages having different amenities varies in direct relation to their population range. Generally, the maximum percentage of villages having different amenities have a population range of 2,000-4,999 and 5,000-9,999 which further corroborates the fact that more facilities are generally available in larger villages than in smaller ones.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Kisko	90	48,142	19.0	25.0
2	Kuru	76	26,768	41.9	12.1
3	Lohardaga	42	16,349	81.7	9.0
4	Senha	88	36,409	27.8	16.0
5	Bhandra	56	19,889	44.1	14.6
	District Total:	**352**	**147,557**	**35.7**	**14.7**

Note : Cultivable area = irrigated area + unirrigated area

Table-42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C.D. Blocks.

It would be seen from the table that 35.7 percent of the total area of the district is utilised for cultivation (cultivable area) and of this only 14.7 percent area is found to be irrigated. Among the C.D. Blocks, the highest percentage of cultivable area is found in Lohardaga C.D. Block with 81.7 percent followed by Bhandra and Kuru C.D. Blocks with 44.1 and 41.9 percent respectively. The lowest cultivable area is found in Kisko C.D. Block which is 19.0 percent.

The highest proportion of irrigated area (25.0%) to total cultivable area is found in Kisko C.D. Block followed by Senha and Bhandra C.D. Blocks with 16.0 and 14.6 percent respectively. The least proportion of irrigated area is found in Lohardaga C.D. Block with 9.0 per cent which indicates that the villages in this

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class,name &urban status of the town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Lohardagga (M)	65.1	4.6	60.5	96.5	32.7	13.3	3.9	0.3	46.3
	District Total	**65.1**	**4.6**	**60.5**	**96.5**	**32.7**	**13.3**	**3.9**	**0.3**	**46.3**

Table-43 gives the details of finances in the statutory town in terms of per capita receipt and expenditure. There is only one statutory town in the district i.e., Lohardaga (M).It would be apparent from the Table-43 that the total per capita expenditure incurred on public works and public institutions is lower than the per capita expenditure incurred on general administration. Per capita total receipt is lower than the per capita total expenditure in Lohardaga (M).

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Lohardaga (M)	1.5	2.8	1.5	0.2	0.6
	District Total	**1.5**	**2.8**	**1.5**	**0.2**	**0.6**

Table-44 gives the details of different categories of educational institutions per ten thousand population in the town of the district. It would be seen from the table that institutions like Secondary/Matriculation level School and College are situated in Lohardaga (M) accounting for an average of 1.5 and 0.6 institution per ten thousand population respectively. Primary School, Middle School and Senior Secondary school account for an average of 1.5, 2.8 and 0.2 respectively per ten thousand population.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Lohardagga(M)	49
	District Total	**49**

Table-45 furnishes information regarding availability of beds in medical institutions in Lohardaga town.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Lohardaga (M)	46,196	4,762	10.3
	District Total	**46,196**	**4,762**	**10.3**

Lohardaga (M) is the only statutory town in the district. Table-46 reveals that 4,762 persons live in slums which account for 10.3 percent of total urban population of the district.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Lohardaga (M)	Carpet Soap	Bauxite Carpet Vegetable

Table-47 presents the most important commodities manufactured in the town and exported from Lohardaga (M). It would be seen from the above table that two items viz., Carpet and Soap are manufactured in the town and three items viz., Bauxite, Carpet and Vegetable are exported from Lohardaga town.

(c) Brief analysis of the data on houses and household amenities (Houselisting Operations, Census of India 2001) based on inset tables 48 to 52 :

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table-48 shows that there are as many as 64,908 households accounting for 94.5 percent of the total households of the district dwelling in owned houses. The proportion of households dwelling in two rooms is the highest (33.6 %) where as it is the lowest (0.8%)for households having no exclusive room. The median number of rooms is 2 for the total households in the tenure status of owned category.

There are 3,166 Scheduled castes households accounting for 4.6 percent of the total households dwelling in owned houses and the median number of rooms is 2. There are 38,184 Scheduled Tribes households accounting for only 55.6 percent of the total households dwelling in owned houses and the median number of rooms is 2.

There are 2,858 households accounting for 4.2 percent of the total households of the district dwelling in rented houses. The proportion of households dwelling in two room is the highest (43.8 %) where as it is the lowest (1.4 %) for those having no exclusive room. There are 162 Scheduled Castes households accounting for 5.7 percent of the total households dwelling in rented houses and the median number of rooms is 2. There are 985 Scheduled Tribes households accounting for 34.5 percent of the total households dwelling in rented houses and the median number of rooms is 2.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Serial number	District/ C.D.Block	Total			Rural			Urban

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Note : 1. Permanent : Permanent houses refers to those houses whose wall & roofs are made of pucca materials i.e. where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets bricks, lime and stone and RBC/RCC concrete are used for roof.

2. Semi permanent : Semi-permanent houses refer to those houses made of other types of materials.

3. Temporary : Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

It would be seen from Table-49 that of the total rural households maximum proportion of households i.e. 94.9 percent live in semi-permanent houses followed by 4.9 percent living in permanent houses and 0.2 percent living in temporary houses.

In the case of urban households in the district, however, the maximum proportion of household i.e. for 59.9 percent live in permhanent houses followed by 39.6 percent in semi-permanent houses and 0.5 per cent in temporary houses.

Among the C.D. Blocks in the district, Bhandra has the maximum proportion of rural households living in semi-permanent houses (96.7%) followed by Senha (96.3%) and Kisko (96.0%). Kuru C.D. Block has the minimum proportion of households living in semi-permanent houses with 92.3 percent. In case of permanent houses, Kuru C.D. Block has the maximum proportion of households living in permanent houses (7.6%) followed by Lohardaga C.D. Block (5.6%). Bhandra C.D. Block has minimum proportion of households living in permanent houses with 2.5 percent. In case of temporary houses, Bhandra C.D. Block has the maximum proportion of households (0.8%) followed by Lohardaga C.D. Block (0.2%).

Data source : Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

*Based on the improved drinking water source, drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/ tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets below the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Table-50 shows that of the total rural households 12,839 households i.e. 21.0 percent have improved drinking water facility. The highest proportion of households with improved drinking water facility can be observed in Senha C.D. Block with 26.9 percent where as it is lowest in Bhandra C.D.Block with 10.5 percent.

As regards electricity it is found that only 4.6 percent of the rural households in the district have electricity. The highest proportion of households with electricity is in Kuru C.D. Block with 6.1 percent where as it is lowest in Bhandra C.D..Block with 2.9 percent.

Only 3.2 percent of the total rural households in the district have bathroom facility. The highest proportion of households having bathroom facility is in Kuru C.D. Block with 4.3 percent where as it is lowest in Bhandra C.D.Block with 2.5 percent.

Only 5.5 percent of the rural households in the district have toilet facility. The highest proportion of households having toilet facility is in Kuru C.D. Block with 7.7 percent where as it is lowest in Lohardaga C.D.Block with 3.8 percent.

Only 16.2 percent of the rural households in the district have drainage facility. The highest proportion of households having drainage facility is in Kuru C.D. Block with 19.9 percent where as it is lowest in Senha C.D.Block with 10.4 percent.

Percentage in brackets

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

Table-51 above shows that 81.9 percent of the rural households in the district use firewood as fuel for cooking. The highest proportion of households using firewood as fuel for cooking is in Kisko C.D. Block (96.3%) where as it is lowest in Bhandra C.D. Block with 65.3 percent.

11.0 percent of the rural households in the district use crop residue as fuel for cooking. Among the C.D. Blocks, highest proportion of households using crop residue as fuel for cooking is 25.7 percent in Bhandra C.D. Block where as it is lowest (1.4%) in Kisko C.D. Block.

1.4 percent of the rural households in the district use Cowdung cake as fuel for cooking. Among the C.D. Blocks the proportion of households using Cowdung cake as fuel for cooking is highest (3.5%) in Lohardaga C.D. Block where as it is lowest (only 4 households) in Kisko C.D.Block.

In the case of coal / lignite (charcoal) there are only 917 households accounting for 1.3 percent of the total households in the district using it for cooking.

In the case of cooking gas (L.P.G.) there are only 3488 households accounting for 5.1 percent of the total households in the district using it for cooking. As regards Kerosene there are only 307 households accounting for 0.4 percent of the total households in the district using it for cooking.Similar trend can be observed in respect of other types of fuel.

Data source: Census of India 2001, H-series: Tables on Houses, Household amenities and Assets.

It would be seen from Table-52 that there are 14,947 households accounting for 21.8 percent of the total households in the district availing banking services. In this regard the highest proportion of households can be observed in Lohardaga C.D. Block (33.4 %) where as the same is lowest in Kisko C.D. Block (13.5 %).

There are 20,958 households accounting for 30.5 percent of the total households in the district possessing radio / transistor. In this regard the highest proportion of households is in Lohardaga C.D. Block (36.3 %) where as it is lowest in Kisko C.D. Block (23.3 %).

6,176 households accounting for 9.0 percent of the total households in the district possess televisions. In this regard the highest proportion of households is in Lohardaga C.D. Block (21.0%) where as it is lowest in Bhandra C.D. Block (4.2%).

As regards telephone there are only 1,314 households accounting for only 1.9 percent of the total households in the district availing telephone services.In this regard the highest proportion of households is in Lohardaga C.D. Block (5.1%) where as it is lowest in Bhandra C.D. Block (0.4%).

43,929 households accounting for 64.0 percent of the total households in the district possess bicycles. In this regard the highest proportion of households is in Kuru C.D. Block (69.4%) where as it is lowest in Kisko C.D. Block (52.9%).

Similar trend can be observed in respect of other specified assets.

(viii) Major social and cultural events, natural and administrative developments and significant activities during the decade

The district of Lohardaga , which till the 1981 Census was a part of Ranchi district as one of its sub-divisions, was elevated to the status of a district on 16th May, 1983 by the Government of Bihar.

Fairs and festival are held regularly in the district by different communities in complete harmony. The Hats and Melas are part and parcel of the life of the common people in the district of Lohardaga.

(ix) Brief description of places of religious, historical and archaeological importance in villages and places of tourist interest in the towns of the district

Korambe

The village is situated about 13 kms. from block headquarter at Senha. It is noted for its temple having an idol said to be over 500 years old. Special prayers are offered on the occasion of Kartik Purnima (October-November). A Munda fair is also held on the occasion of Baisakhi Purnima (April-May). The Rath-yatra festival in the month of Asadh (June-July) is also celebrated with great enthusiasm.

Chitri

A small village which is situated at the distance of about 10 kms. south of Lohardaga. It is noted for its one-day fair held every year at the bank of the river Koel on the occasion of Tila Sankranti.

Chulhapani

The village is situated about 32 kms. west of the block headquarter at Kuru. It is noted as the place of origin of the river Damodar.

Citilgarh

The village in Kuru block, is situated on the bank of the South Koel river about 48 kms. west of Ranchi city, in the midst of a dense forest. It is largely visited on the occasion of Holi by hunters in search of game. There is perennial fountain useful for irrigational purposes.

Kakargarh

The village in Kuru block, is situated about 48 kms. west of Ranchi city. It is noted as the former headquarter of one Lal Nohuani Nath Sahdeo who participated in the revolt of 1857.

(x) Major characteristics of the district, contribution of the district in the form of any historical figure associated with the district

The district of Lohardaga is rich in mines and minerals. Bauxite is the main mineral found in the district.There are huge deposits (probably the largest in Asia) of Bauxite ores in the hills of the district.

Name of Kartik Oraon is well known in the district of Lohardaga.His political insight elevated him to the post of a Minister in the Central Cabinet.

(xi)Scope of Village Directory and Town Directory - column headingwise explanation and coverage of data

The District Census Handbooks are the only publications which furnish information down to the village level in case of rural areas and by the level of towns/wards (circles) in case of urban areas. This facilitates research scholars and academicians to analyse data upto the lowest administrative unit. It is of vital importance for the planners also since it offers micro-level data and thus enable them to identify the areas undeveloped in terms of infrastructure and channelise efforts and inputs accordingly so that optimum utilization of the resources could be made.

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content. The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages. Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided. Specific details on distances, in case a basic amenity is not available in the referent village is also given. These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities. In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided. With reference to the town concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population. The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements.

Village and Town Directories included in the District Census Handbook give the list of villages and towns, their areas, population and amenities.

The details of each column of village directory are explained as below :

Column-1

Serial number of the village is indicated in this column.

Column-2

Gives the name of the village and permanent location code number (PLCN) assigned to each village in serpentine manner from north-west to south direction and is essential for identification of village. The concept of permanent location code number has been introduced first time in 2001 Census by assigning eight digit number starting from the first village of the first tehsil of first district of the state to the last village of last tehsil of the last district. In the state of Jharkhand first PLCN 00000100 has been assigned to village 'KHOKHA' in Kharaundhi C.D. Block of Garhwa district and the last PLCN 03261500 has been assigned to the last village 'KUMRASHOL' of the state in Baharagora C.D. Block of Purbi Singhbhum district which happens to be last as per procedure adopted for assigning location code number. The district census handbook of 1991 Census as well as updated district and C.D. Block maps and services of local revenue officers/officials have been used to assign the PLCN to the villages. The last two zeros will be used if new villages are created out of existing villages in subsequent census. Before 2001 census, village location code number used to change from one census to other due to change in jurisdictions or creation of villages or merger of villages in urban areas. The district handbook of 1991 Census has been used as basis for filling up the name of the village including the forest and uninhabited villages. But to ensure the accuracy, the list of villages and their names were got authenticated from the respective B.D.O's of each C.D.Block.

Column-3

Shows the area (in hectares) of the village as indicated by the State Revenue Department.

Columns - 4 & 5

Gives the population and number of households in each village which facilitate the correlation between the amenities available to the population and number of households in village.

Columns 6 to 9

Deal with the amenities like education, medical, drinking water, post, telegraph and telephone etc. The information relating to these amenities were filled by the Patwari of concerned village in village directory booklet which were subsequently cross checked with district census handbook of 1991 as well as with the information collected from the various departments to ensure the accuracy of information provided. In such cases where no facility is available within a village, a dash (–) has been shown in the column and

next to it in brackets, the distance from the village in broad ranges viz. upto 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available has been given. This will help not only for local area planning but in regulating the provisions of goods and services as well, so as to minimize the regional imbalance in the process of development. The abbreviations used to indicate these amenities have been explained separately in the subsequent section.

Column-10

Shows the number of banks - Commercial banks and Co-operative banks. In addition to this, the list of banks procured from the lead bank of the district has also been added in this book.

Column-11

Relates to number of credit societies, such as agricultural credit societies, non-agricultural credit societies and other cooperative societies.

Column-12

Shows the number of recreational and cultural facilities viz. Cinema/video hall, sports club, stadium/ auditorium facility available in the villages.

Column-13

Indicates the type of communications amenities such as by bus, railway or navigable waterway available to the village.

Column-14

Refers to the state of roads etc. leading to the village. This is useful in determining as to whether the village is approachable both in fair and foul weather by paved road, mud road, foot path and navigable water ways.

Column-15

Gives the information of the nearest town and its distance in Kms. from the village in brackets from the referent village. In case, the nearest town is located in another state, the name of the state has also been furnished.

Column-16

Relates to the availability of power supply to the village with purposes such as domestic, agricultural use, other purposes or for purposes which are denoted by the abbreviations.

Column-17

Gives the information as to whether newspapers/ magazines are received in the village.

Column-18

Gives the information of most important commodities manufactured in the village.

Columns-19 to 23

Give the details about land utilization. The land use pattern given in the village directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture, has recommended the maintenance of records of land use pattern under five categories. These are as follows :

i) Forests
ii) Irrigated
iii) Unirrigated
iv) Culturable waste (including Gauchar and Groves)
v) Area not available for cultivation

Forest area shown in column-19 includes all lands classed under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether wooded or maintained as potential forest land. The crops raised in the forests and grazing lands or areas open for grazing within the forest is also included under the forest area.

Column 20 and 21

Show area irrigated by different sources of irrigation and un-irrigated area. These two columns cover all agricultural land which equals to net cropped area sown with crops and orchards including current and other fallow lands. In case of irrigated land, the source of irrigation has also been indicated.

Column 22

Culturable waste : This includes all lands available for cultivation whether not taken up for

cultivation or taken up for cultivation once but not cultivated during the five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. Lands under thatching grasses, bamboo bushes and other groves for fuel etc., which are not included under orchards or forests come under this column. All grazing lands, whether they are permanent pastures and meadows or not, village common and grazing lands within forest area are also included in this column.

Column-23

Area not available for cultivation : This includes land not available for cultivation such as barren, unculturable land and land put to non-agricultural use. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water etc. Barren and unculturable lands cover all lands like mountains and deserts which cannot be put under cultivation, except at a very high cost.

Column-2 & 1

Indicate the name of the village in Hindi and serial number of village respectively.

Town Directory :

The Town Directory is presented for each town in the district covering different aspects of urban life. Seven statements (I to VII) have been included for presentation of this data. The data contained in these statements are the area, population of 2001 and past censuses, growth rates, density, sex ratio, physical aspects of town, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, industry and banking facilities. It covers all the towns in the district statutorily notified as well as non-municipal towns. All the towns in the district are arranged in alphabetical order.

The data collected in these statements have largely been furnished by the municipal bodies. For non-municipal towns, the cantonment executive officers supplied the information.

Statement-I Status and Growth History

The statement runs into 22 columns and is primarily intended to throw up a comparative picture of each town in different censuses from 1901 to 2001. Civic administration status of each town is shown under column 2 and Location Code number in column 3. Column 4 is not applicable in case of Bihar and Jharkhand States. While column 5 shows the name of C.D. block, area of each town in sq. kms. is depicted under column 6 column 7 deals with the number of households including houseless households as per the 2001 Census. Columns 8 to 18 deal with population and growth rate of the towns at different censuses from 1901 to 2001. Column 19 of the statement shows density of towns as per the 2001 Census. Columns 20 to 22 depict the sex ratio from 1981 to 2001 Census.

Statement-II Physical Aspects and Location of Towns

In this statement data on annual rainfall, maximum and minimum temperature are shown under columns 3 to 5. Columns 6 to 8 indicate the name and road distance of the state, district, sub-divisional and tehsil/sub-tehsil headquarters. Column 9 shows the name of nearest city with population of one lakh or more and columns 11 to 13 give information regarding name and road distance of the nearest railway station, bus route, navigable river/canal (if within 10 Kms.). Column 10 shows the name of nearest city with population of five lakhs and more.

Statement-III Municipal Finance

This statement shows the receipt and expenditure of Municipal Finance of individual towns for the year 1998-99 under different heads. There are in all 16 columns in the statement showing receipt and expenditure under different heads.

Statement IV Civic and Other Amenities

The statement displays information under 20 columns. The amenities about which information has been incorporated are road length (with break-up by Kutcha and Pucca), system of sewerage, drainage and other related matters such as water supply, fire fighting services and electrification etc.

Statement-V Medical, Educational, Recreational and Cultural Facilities

This statement displays information under 20 heads and it intends to depict the degree of availability

of medical facilities by type of institutions and number of hospital beds available in each institution. Educational facilities by level/type of courses and recreational and cultural facilities.

Statement-VI Trade, Commerce, Industry and Banking

This statement presents information under 11 columns in respect of each town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the town. Information on number of banks available in the town appears under column 9. Columns 10 and 11 show number of agricultural and non-agricultural credit societies operating in each town respectively.

Statement-VII Civic and other amenities in Slums

Statement VII contains information about civic and other amenities in slums of 1999. This is a statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, municipal corporations, Notified Areas, etc.

Generally, in cities or towns with slums, the local authority, such as municipality or municipal corporation or even the development authority notifies the recognized slums. It is linked up with the availability of funds from the State Government for slum clearance/improvement. It is possible that some of the states or local bodies have not formally notified slums under their jurisdictions. But in such cases, there is likelihood that they are maintaining a list of such areas which are officially treated as slums. The intention is that the information is to be provided in respect of such localities as are officially recognised as slums, whether actually notified or not. Though the magnitude of slum problem is greater in class I and class II towns, it is acknowledged that they are associated with smaller towns also. Hence the information on slums in this statement has been compiled in respect of all towns having statutory bodies. Columns 1, 2 need no explanation. Under column 3 the names of slum(s) has been provided in an alphabetical order in separate lines under the town which they belong. The particulars with regard to status of slum whether notified or not has been collected under column 4 and recorded as 'Yes' or 'No'. Under column 5 the no. of households (approximate) in the slum pertaining to 1999 has been recorded whereas in column 6 the population figures (approximate) based on the year 1999 have been recoded. Column 7 denotes the road length of paved road in km . upto two decimal places. Column 8 to 13 give information about system of sewerage, number of latrines and method of disposal of night soil. Column 14 gives information about the no. of tap points/public hydrants as ascertained from civic authorities as well as through local enquiry. Column 15, 16 & 17 give information about electricity connections. Column 15 gives information about domestic electricity connections, column 16 gives information about road lighting (electric points) whereas column 17 gives information about electric connections other than collected under columns 15 & 16.

Part-A : Village and Town Directory

Section-I : Village Directory

Note explaining the abbreviations used in the Village Directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural, non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited'villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col.19 to 23

The Village Directory format has 23 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number

Self explanatory. All the villages within the C.D. Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of Village

The name and location code number of the village are shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The total area of the village in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In columns 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post & telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (–) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below :

Column 6 : Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of *institutions if exists within the village is shown as per* codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the

number of banks in brackets. If not available the distance of nearest place where the facility exists is given :

(i) Commercial Bank	CM
(ii) Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Societies or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i) Agricultural Credit Society	ACS
(ii) Non- Agricultural Credit Society	NCS
(iii) Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility are recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets :

(i) Cinema/Video Hall	CV
(ii) Sports Club	SP
(iii) Stadium/Auditorium	ST

Column 13: Communications

If the village is served by any mode of public/ Private transport like Bus, Railway station or Navigable water ways these are to be mentioned as follows :

(i) Bus	BS
(ii) Railway Station	RS
(iii) Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i) Paved Road	PR
(ii) Mud road	MR
(iii) Foot path	FP
(iv) Navigable River	NR
(v) Navigable Canal	NC
(vi) Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i) Electricity for domestic use	ED
(ii) Electricity for agricultural use	EAG
(iii) Electricity for other purposes	EO
(iv) Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes :

(i) News Paper	N
(ii) Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Columns 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh (–) is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix I : It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix IA : Indicates number of villages CD Blockwise having one or more primary schools.

Appendix IB : Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix IC : Shows number of villages CD Blockwise with different sources of drinking water facilities.

Appendix II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix IIA : Indicates list of Census Towns which do not have one or more amenities.

Appendix III : It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix IV : CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix V : Summary showing number of villages not having Scheduled Castes population.

Appendix VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix VIIA : The appendix shows the list of villages according to proportion of the Scheduled castes to the total population by ranges

Appendix VIIB : The appendix shows the list of villages according to proportion of the Scheduled Tribes to the total population by ranges.

Appendix VIII : Number of Villages under each Gram Panchayat(C.D. block wise)

Appendix IX : Statement showing number of girls schools in the villages

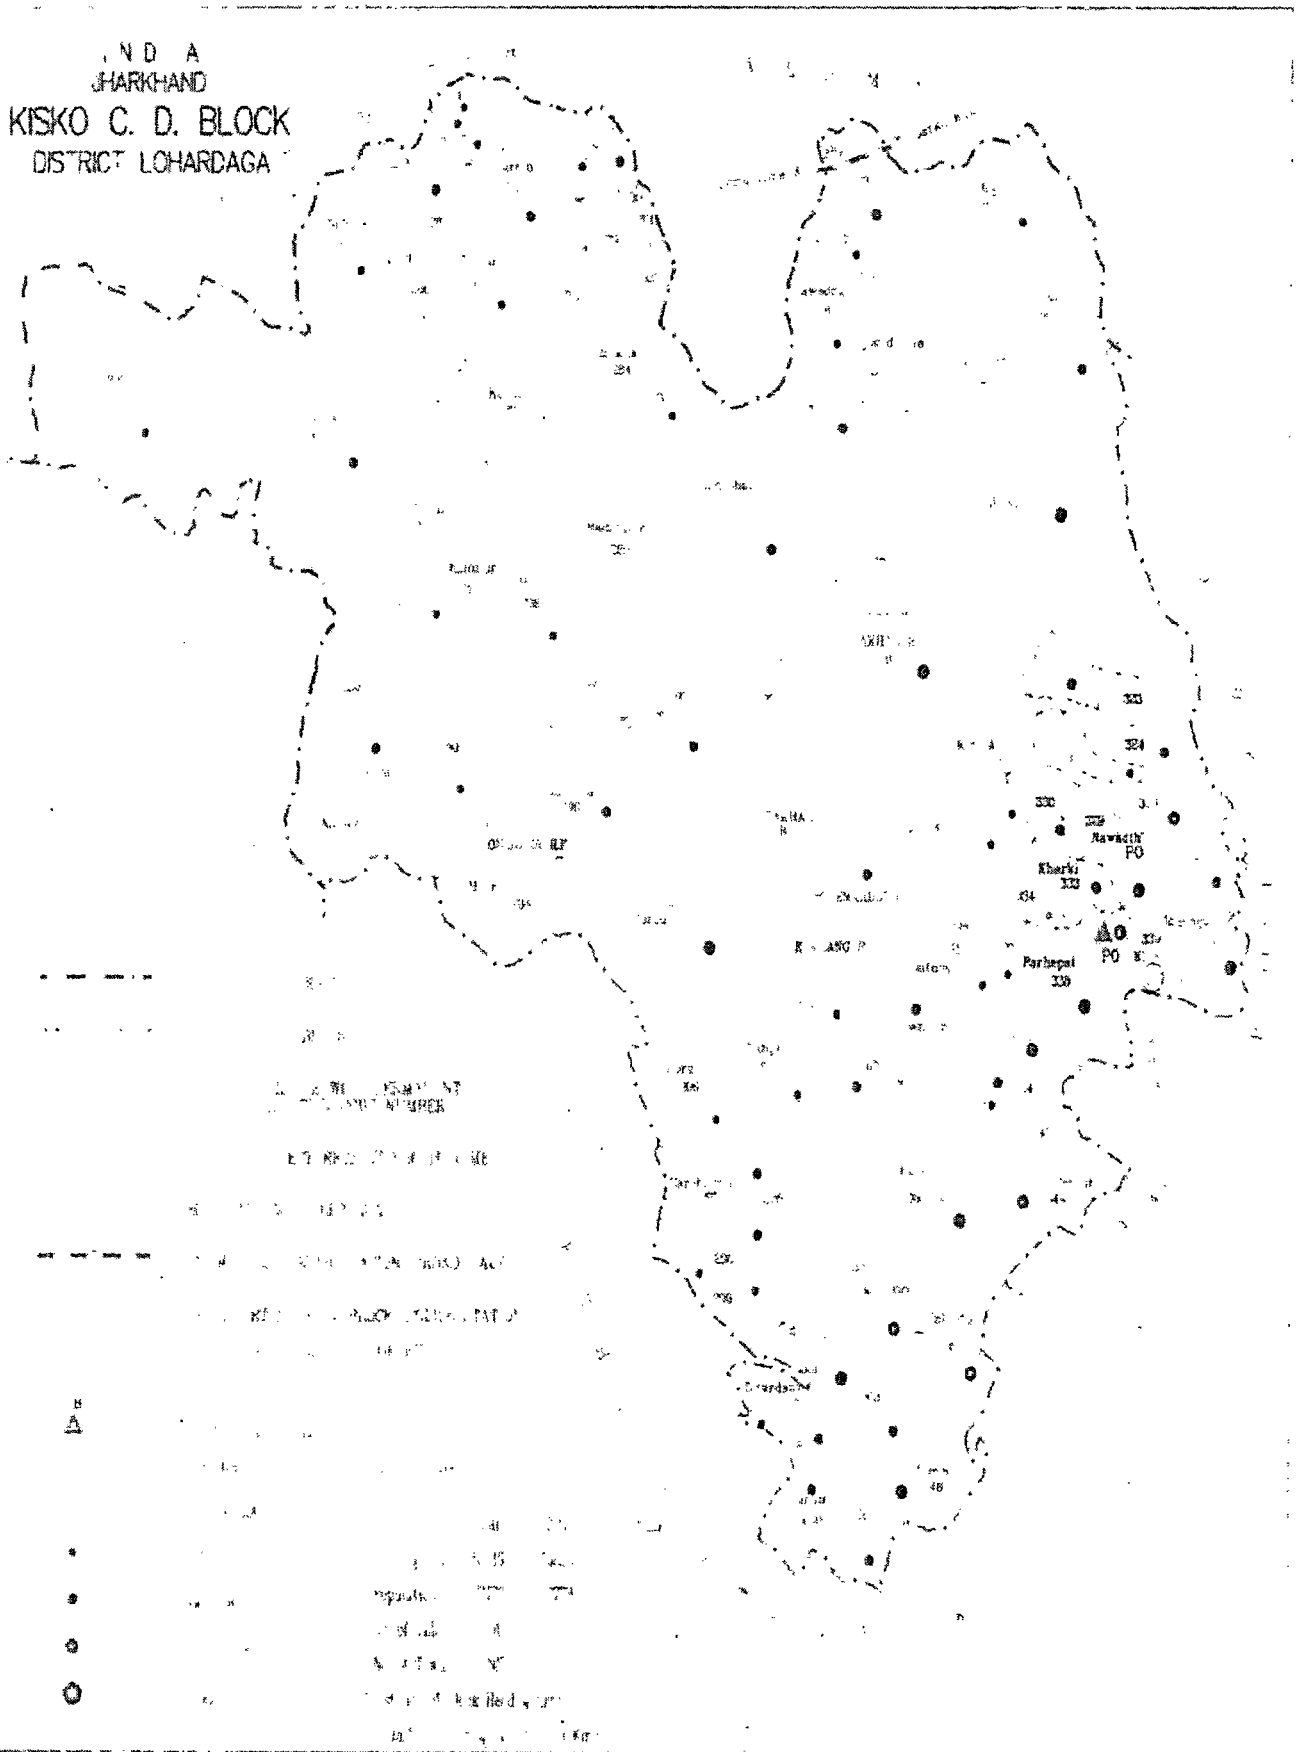

List of Villages merged in towns and outgrowths in 2001 Census

There is no such village in the district of Lohardaga.

Note : N.A. stands for information not available

TOWN DIRECTORY

Section-II : Town Directory

Note explaining the abbreviations used in the Town Directory

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M. Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/ Cantonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT

Others columns need no comments.

Statement II : Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In these columns the Rainfall and Maximum and Minimum Temperature of the town are recorded.

Column 6, 7 and 8

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent methods of disposal of night soil are given below with codes :

(i)	Head Loads	HL
(ii)	Basket	B
(iii)	Wheel Barrows	WB
(iv)	Septic Tank	ST
(v)	Pit System	Pt
(vi)	Sewerage	S
(vii)	Others	O

Column 13 and 14 : Water supply

Source and capacity of storage system. The following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilo-litres (in bracket) are presented in column 14.

Column 15* : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D

(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

(i)	Ayurvedic	A
(ii)	Unani	U
(iii)	Homoeopathic	Hom.

Column 6 to 9

The codes used for these columns are as follows :

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories– Arts, Science and Commerce	ASC
(vii)	Law	L

Column 10 Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	S H Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to14

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where

the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8

Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

Part-B : Primary Census Abstract

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible

cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different

	Name of the Primary Census Abstract	Level of presentation
1.	District Primary Census Abstract	District/CD Block/UA/City/Town
2.	Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3.	Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4.	Village Primary Census Abstract	CD Block/Village wise
5.	Urban Primary Census Abstract	Town/Ward level

PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

State/District	Year	Persons			
		q(1)	q(2)	q(3)	q(5)
Bihar	1991	75	84	86	89
	1981	94	112	125	141
Lohardaga	1991	54	93	101	110
	1981	101	108	116	131

From the estimates of child mortality (number of deaths by ages 1,2,3 and 5) given in Annexure II as q(1),q(2),q(3) and q(5) it is observed that there has been decline in child mortality over the decade (in 1991 census as compared to 1981 census) both in the district as well as the state. An interesting feature which can be noticed from the annexure is that the child mortality at the ages 2,3 and 5 was lower in the district during 1981 census as compared to the state average while at the time of 1991 census the child mortality of the district was recorded higher than the state average indicating thereby that the pace of decline in child mortality had been faster in the state as a whole vis-à-vis the district of Lohardaga.

Annexure III shows that the fertility measures (from CBR to GMFR) for 1991 census are higher for Lohardaga district than the state. Also the child woman ratio and number of children ever born per woman in age-group 45-49 are higher in the district of Lohardaga than the state of Bihar. In case of mean age at marriage the district figure is higher than that of State.

ANNEXURE - IV (A)
PERCENTAGE DISTRIBUTION OF MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

State/District	Born elsewhere in the district of enumeration			Born in other district of Bihar			Born in Bihar		
	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10

	(67.8)	(40.7)	(71.1)	(26.4)	(45.7)	(24.0)	(94.2)	(86.4)	(95.2)
Lohardaga	49,372	3,836	45,536	24,215	3,670	20,545	73,587	7,506	66,081
	(65.5)	(40.9)	(67.6)	(32.2)	(46.5)	(30.5)	(97.8)	(95.1)	(98.1)

State/District	Born in other states			Born in other countries			Total migrants		
	P	M	F	P	M	F	P	M	F
1	11	12	13	14	15	16	17	18	19
Bihar	1,049,969	286,949	763,020	186,240	31,033	155,207	21,307,020	2,343,005	18,964,015
	(4.93)	(12.25)	(4.02)	(0.87)	(1.32)	(0.82)	(100.00)	(100.00)	(100.00)
Lohardaga	1,560	370	1,190	120	20	100	75,267	7,896	67,371
	(2.07)	(4.68)	(1.76)	(0.15)	(0.25)	(0.14)	(100.00)	(100.00)	(100.00)

The growth of population for any area (be it any district or state) is influenced by the pattern of migration (in-migration as well as out-migration). However, for want of data on out-migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of migration on growth of population,although such impact may not be much in most of the cases.

It is apparent from Annexure IV(A) that out of 21,307,020 migrants in the State as per place of birth the share of Lohardaga district is 75,267, i.e., 0.4 percent of state total.Female migrants out number the male migrants both for the district and the state. In case of percentage of migrants born in Bihar there is wide gap between male and female population. With respect to percentage figures of born elsewhere in the district of enumeration the district percentage (65.5) is marginally less than the state percentage (67.8).

When we compare the percentage figures of migrants born in other districts of Bihar it is crystal clear that the district percentage (32.2) is higher than the state percentage (26.4).The percentage figures for born in other states is lower for the district than the state and the percentage figures for born in other countries is also lower in the district than the state.

ANNEXURE - IV (B)
RURALAND URBAN COMPOSITION OF INTERNAL MIGRANTS BY PLACE OF BIRTH, 1991 CENSUS

Place of Birth	Total/ Rural/ Urban	Place of enumeration					
		Bihar			Lohardaga		
		Total	Rural	Urban	Total	Rural	Urban

		(4.9)	(1.9)	(3.1)	(4.3)	(2.6)	(1.7)
(2) In other states of India	Total	1,049,969	575,484	474,485	1,560	1,100	460
		(100.0)	(54.8)	(45.2)	(100.0)	(70.5)	(29.5)
	Rural	800,601	512,444	288,157	1,150	880	270
		(76.3)	(48.8)	(27.4)	(73.7)	(56.4)	(17.3)
	Urban	243,448	60,040	183,408	370	180	190
		(23.2)	(5.7)	(17.5)	(23.7)	(11.5)	(12.2)

Annexure-IV(B) shows out of the total intrastate migrants in the state, 82.6 percent were rural to rural, 3.1 percent were from urban to urban, 12.1 percent were from rural to urban and 1.9 percent were from urban to rural. In case of Lohardaga district, of the total intra-state migrants, 85.4 percent were from rural to rural, 1.7 percent were from urban to urban, 9.7 percent were from rural to urban and 2.6 percent were from urban to rural.

In case of migrants from other states, 48.8 percent were from rural to rural, 17.5 percent were from urban to urban, 27.4 percent were from rural to urban and only 5.7 percent were from urban to rural for the state of Bihar. In case of Lohardaga district, on the other hand, of the total migrants, 56.4 percent were from rural to rural, 12.2 percent from urban to urban, 17.3 percent were from rural to urban and 11.5 percent were from urban to rural.

ANNEXURE - IV (C)

INTERSTATE MIGRANTS, 1991 CENSUS

Bihar			Lohardaga		
Place of Birth	Migrants	Percentage to total Migrants	Place of Birth	Migrants	Percentage to total Migrants
1	2	3	1	2	3
Andhra Pradesh	20,240	1.9	Andhra Pradesh	40	2.6
Assam	11,670	1.1	Arunachal Pradesh	100	6.4
Haryana	27,270	2.6	Assam	90	5.8
Madhya Pradesh	56,100	5.3	Goa	100	6.4
Orissa	75,040	7.2	Gujarat	80	5.1
Punjab	20,785	2.0	Haryana	230	14.7
Rajasthan	28,353	2.7	Himachal Pradesh	90	5.8
Uttar Pradesh	322,183	30.7	Madhya Pradesh	90	5.8
West Bengal	418,759	39.9	Maharashtra	0	0.0
Total for nine states	980,400	93.4	Punjab	30	1.9
Other states	69,569	6.6	Rajasthan	0	0.0
Total	1,049,969	100.0	Uttar Pradesh	140	9.0
			West Bengal	430	27.6
			Total for thirteen states	1,420	91.0
			Other states	140	9.0
			Total	1,560	100.0

The number of migrants in the state who were born in other states of India according to 1991 census was 10.5 lakhs, while in the district of Lohardaga the corresponding figure was 1560 (One thousand five hundred sixty) as evident from Annexure IV(C) .

It transpires from the above annexure that in case of Bihar 9 States, namely, Andhra Pradesh, Assam, Haryana, Madhya Pradesh, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal together account for 9.80 lakh (93.4%) of the 10.5 lakh interstate migrants, West Bengal and Uttar Pradesh states are prominent as these states contributing 39.9 and 30.7 percent of migrants respectively. In respect of Lohardaga district, of the total 1560 interstate migrants, West Bengal and Haryana states contribute 27.6 and 14.7 percentages respectively.

Annexure V(A) presents religion wise data of the state of Bihar and Lohardaga district along with their percentage distribution according to the 1991 census. The religion wise data of the C.D.Blocks of Lohardaga district has been furnished in Annexure V(B).

It may be observed that Hindus are by far the numerically most important religious community as it accounts for as much as 82.4 percent of the state's population and 73:8 percent of the population of Lohardaga district. The Muslims come next with 14.8 percent of the state's population. The percentage of Muslims in the district of Lohardaga is comparatively lower than the state average accounting for 14.4 percent of the district's population. The proportion of Christians, Sikhs, Jains and Buddhists population in the state is very low (only 1.1 percent). In Lohardaga district, the proportion of Christians is 3.0 percent. The proportion of other Religions and persuasions in the district is 8.8 percent. The proportion of Jains and Buddhists in the district is nil. The same situation prevails in almost all community development blocks in Lohardaga district.

Annexure VI(A), VI(B), VI(C) and VI(D) furnish relevant statistics on marital status of Lohardaga district and Bihar state according to information collected during 1991 census along with the percentage distribution by various age-groups.

It is quite apparent from annexures that Lohardaga district as well as the state have a relatively higher proportion of 'never married' males and 'married' females. This may be attributed due to the fact that women get married at younger ages than males. As against 54.2 and 55.6 percentages of 'never married' males in Bihar state and Lohardaga district respectively, the corresponding proportion among females is 45.2 and 47.9 only. There is not much difference in situation in Lohardaga district as compared to Bihar state as a whole. The district of Lohardaga has slightly higher proportion of male and female widowed.

While analyzing marital status by broad age-groups one finds that married females outnumber married males in the age-group 10-14 suggesting that child marriage among females is more prevalent than males. However, the interesting feature which can be noticed is that the proportion of married males and females in the age-group 10-14 is comparatively less in Lohardaga district.

It is also significant that the proportion of 'never married' females in the age-group 15-19 and above is much lower than the 'never married' males in Lohardaga district except in the age-groups 65-69 and age not stated where the proportion of 'never married' females is slightly more than the 'never married' males.

The proportion of 'divorced or separated' males and females in Lohardaga district is slightly higher than the proportion of Bihar state.

One of the important characteristics of the population on which information is collected in the census is literacy. Apart from collecting data on number of literates, the level, nature and type of education attained by the literates are also ascertained. The concept of literacy adopted in the census has already been explained in the beginning of this publication.

A proper index to the extent of literacy is provided by the proportion of literate and educated persons to the total population. Annexure-VII(D) shows that the literacy rate for Bihar (excluding the population in the age-group 0-6 years) at the time of 1991 census was 38.5. Male Literates outnumbered female literates as the literacy rate for males, according to 1991 census was 52.5 while for females the literacy rate was only to the extent of 22.9 percent. This is to say for every 15 male literates there were only 6 female literates. The overall literacy rate for Lohardaga district according to 1991 census, was 40.8 percent which is more than the state average. Male literates in the district accounted for 55.0 percent while female literates in the district constitute 26.1 percent of the total population. The literacy rates for males and females in Lohardaga district are higher than the corresponding figures of Bihar state.

Annexure VII(A) and VII(B) furnish information regarding absolute number of illiterates and literates and educated persons in Bihar state and Lohardaga district as also percentage distribution of literate persons by different level of education by different age-groups.

A break-up of literate population by various educational level shows that 20.3 percent males and 27.2 percent females in the state are such who are literate but without attaining any educational level. 21.6 percent males and 26.2 percent females in the state, according to 1991 census, have crossed the primary or junior basic standard, 26.4 and 26.9 percent males and females have passed the middle examination while 31.7 and 19.7 percent males and females in the state are such who are matriculates and above. The contrast between males and females is significant among matriculates and above as the percentage of female literates who have passed the matriculation and above examination are 12 percentage points less than the male literate population who have attained this level of education.

The position of literates by different level of education in Lohardaga district, according to 1991 census, is more or less the same as observed for Bihar state as a whole.

Note : Percentage are given in brackets.

Language is an important attribute of population. The census of India has been the richest source of language data collected and published during the successive decennial censuses over a century. During the successive census data on the mother tongue as returned by each individual were collected. Annexure VIII(A) placed below presents distribution of different mother tongues (Scheduled Languages) as returned during the 1991 census Lohardaga district and the State of Bihar.

It can be seen from the above annexure that speakers of the scheduled languages constitute the major proportion of the population in Lohardaga district as well as the state of Bihar. Hindi, the main Mother tongue of the district, has been returned by 59.4 percent of the population. The corresponding percentage for the state as a whole is 80.9 percent which is much higher than the district's average. Urdu is the second most prominent language spoken in Lohardaga district. Speakers of Urdu language constitute 10.8 percent of the total population of the district which is slightly higher than the state average of 9.9 percent. Speakers of all other scheduled languages taken together comprise meager 0.2 percent of the district's population. Speakers of Bengali, however, account for 2.9 percent of the state's population.

Community Development Block-wise distribution of different mother tongues in the district of Lohardaga can be seen from annexure VIII(B).

It transpires from Annexure-VIII(B) that Hindi is most prominent language spoken in different community development blocks followed by Urdu language. It is observed that in some C.D. Blocks/Towns such as Kisko, Kuru and Lohardaga the speakers of Urdu language comprise 13.7 percent of the total population of the respective C.D. Blocks. The proportion of speakers of all other languages (except Hindi and Urdu) is almost negligible and in some cases nil in all the C.D. Blocks of Lohardaga district.
