of the Indian Administrative Service
Director of Census Operations, Jharkhand

Foreword

The District Census Handbook (DCHB) is brought out for each district since the first Census after Independence and is one of the most widely used publications compiled and prepared by the Census Organisation on behalf of the State Governments and the Union territory Administrations This publication provides Primary Census Abstract (PCA) data up to village level for the rural areas and provides similar details ward-wise for each city or town, and also provides the present status on availability of important civic amenities/infra-structural facilities in villages and towns of the district concerned This publication has proved to be of immense utility, as it is considered as an essential and basic document for the purpose of delimitation of constituencies, formulation of local level and regional plan and also as an aid to district administration

The publication of District Census Handbook(DCHB) was first introduced during the 1951 Census which contained a few important Census tables and PCA for each village and town of the district Thereafter, at each successive Censuses, the scope and coverage of this publication was enlarged The DCHB published at the 1961 Census provided a comprehensive descriptive account of the district, administrative statistics, Census tables and a village and town directory including PCA The 1971 Census-DCHB series was planned in three parts Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district Census tables and certain analytical tables based on PCA and amenity data in respect of villages However, in some States, Part-C was confined to district Census tables and in a few cases altogether given up due to delay in compilation and printing At the 1981 Census, new features along with the restructuring of the formats of village and town directory were introduced in the DCHB These were published in two parts for each district While Part-A comprised village and town directories, the PCA of village and town (ward-wise) including the Scheduled Castes and the Scheduled Tribes PCA up to c d block/town level were provided in Part-B In restructuring the format of Village Directory, all the amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given Information on some new items such as Adult Literacy Centres, Primary Health sub-Centres and Community Health Workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme Similarly information on approach to the village was also provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district In the Town Directory, another statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns Apart from this, one column on the Scheduled Castes and the Scheduled Tribes population and another on Adult Literacy classes/centres were added in the Statements IV and V respectively

The manner of presentation of the DCHBs of the 1991 Census was by and large the same as followed in the 1981 Census The format of PCA was, however restructured slightly in the 1991 Census Nine-fold industrial classification of main workers was given as against four-fold industrial classification presented in the 1981 Census In addition, the sex-wise population in the 0-6 age group was also included in the PCA for the first time with a view to enable data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census Another important addition in the DCHB of the 1991 Census was the Community Development Block level presentation of village directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, as the CD block is the lowest administrative unit for developmental planning Further, in order to facilitate the administrators, planners and researchers intending to use village directory and PCA data, either from the magnetic tapes/floppies or from

the published records, both the computer and manual codes for each village were provided for the 1991 Census along with the corresponding codes of the 1981 Census

The present series of the DCHB in 2001 Census have been made more informative and exhaustive in terms of coverage and content The content of village directory has been broadened by including more types of facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages Information on most important commodity manufactured in village and also income and expenditure of Gram Panchayat, wherever possible are provided Specific details on distances, in case a basic amenity is not available in the referent village is also given These include distances in respect of availability of primary and middle school and college (in respect of the educational facility), Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre (in respect of the medical facility), drinking water, Post Office and phone, communication, bank, credit societies and recreational facilities In town directory, information on all types of slums, whether notified/recognised by the respective town authority or not and in respect of all statutory towns irrespective of their class as against only Class I and Class II towns of the 1981 and 1991 Censuses are provided With reference to the village concerned, the nearest city with 5 lakh and above population has also been given in addition to 1 lakh and above population The varied basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements A significant addition in the publication is inclusion of analytical notes as annexures on important aspects concerning Census data on (i) fertility, mortality and migration, (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongue, all based on 1991 Census The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users

This publication is a collaborative task of the State Government and the Census Organisation The village and town level amenity data have been collected, compiled and computerised in prescribed record structure under the direction of Shri Sudhir Kumar Rakesh, Director of Census Operations, Bihar, Patna on behalf of the State Administration At the same time, much effort has been made to ensure comparability with the corresponding 1991 Census data and also similar information brought out by the respective State Governments in annual reports and statistical handbooks for various years after 1991 The task of planning, designing and coordination of this publication was carried out by Shri R G Mitra, Deputy Registrar General (C&T) and Dr I C Agrawal, Senior Research Officer of Social Studies Division Dr R P Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl Director(EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables The draft District Census Handbook manuscripts received from the Census Directorates have been scrutinised in the Social

Preface

The history of the publication of District Census Handbooks goes back to the 1951 Census and since these are printed in every Census because of their wide ranging utility Census after Census muchinnovations/modifications have taken place in the District Census Handbooks in terms of coverage and contents of population data This is the most valuable district level publication brought out by the Census Organisation on behalf of the State Government It, inter-alia, provides data/information on some of the basic demographic and socio-economic characteristics and availability of certain important civic amenities/facilities in each village and town of the respective districts This publication has, thus, proved to be of immense utility to the planners, administrators, academicians and researchers It is hoped that this publication will serve the purpose of the ever increasing demand for the micro-level data in this era of planned development

The present volume of the District Census Handbook (DCHB) in 2001 Census has been made more informative and exhaustive in terms of coverage and content The content of Village Directory has been broadened by including additional facilities such as bank, recreational and cultural facilities, newspapers and magazines available in villages For the first time in this volume information on the most important commodity manufactured in village is provided In Town Directory, information on all types of slums, whether notified/recognized by respective town authorities or not is provided for each statutory town During 1981 and 1991 Censuses this information was, however, restricted to class I and class II towns only The various basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements A significant addition in the publication is inclusion of analytical notes presented as annexures on important aspects concerning Census data on (i) fertility, mortality and migration (ii) various measures of fertility and mean age at marriage, (iii) percentage distribution of migrants by place of birth/ place of residence, (iv) main religions, (v) marital status of population, (vi) age, sex and education, and (vii) distribution of different mother tongues, all based on 1991 Census The eight digit permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs

It is worthwhile to mention that the District Census Handbooks of the Census of India, 2001 are being made available for the first time in electronic format in addition to printed volumes keeping in view the demand of data users

The District Census Handbooks are brought out in two parts, viz (i) part A containing the village and town directories and (ii) part B – village and townwise primary Census Abstracts pertaining to general population It also contains the District Primary Census Abstracts for Scheduled Castes and the Scheduled Tribes Population

The village and town level amenity data have been collected through the Block Development Officers and the Vice Chairmen/Executive Officers of the Municipalities and Notified Area Committees who functioned as Charge Superintendents under the District/Sub-divisional level Officers

The analytical note has been prepared on the basis of the inset tables generated from the computerized data of Village Directory, Town Directory and Village/Urban Primary Census Abstract It takes note of the social, economic and demographic changes which have taken place in the districts during the decade District and C D Block Maps containing useful information on many items have also been included in this volume

This publication is a joint venture of the State Government and the Census organisation

I am grateful to the State Government agencies for their co-operation in collection of such a huge mass of data I would like to make a special mention of the warm and whole hearted co-operation which was throughout extended by the District Magistrates, the Sub-divisional Officers, the District Census Officers and the Block Development Officers

In my office S/Shri Phool Singh Joint Director, A K Saxena Deputy Director and K K Verma, Assistant Director supervised the project at different stages In this voluminous job valuable assistance was rendered by S/Shri D P Choudhary, S K Das Sudhakar, Statistical Investigators Grade-I and Ramesh Prasad, Statistical Investigator Grade-II who were responsible for supervision from beginning to end Shri Mauleswar Singh, Assistant Director has also been associated to monitor the scrutiny work of Village Directory and Town Directory data Sri K K Verma, Assistant Director prepared the first draft under the guidance of Sri S K Sinha, Deputy Director The write-ups on fertility and mortality patterns and migration based on 1991 Census data are contributed by S/Shri D P Choudhary, S K Das Sudhakar and U C Lal, Statistical Investigators Gr I S/Shri D P Choudhary and S K Das Sudhakar prepared the analytical notes on inset tables based on the data of Village Directory, Town Directory and Primary Census Abstracts under the guidance of Shri K K Verma, Assistant Director District and C D Block Maps were prepared in Map Section under the supervision of Sri M Guria Research officer (Map) S/Shri Asharful Hoda and Surendra Mohan Prasad Lower Division Clerks typed the manuscript and S/Shri M C Sharma, STA (Ptg) and N K Jain, Printing Inspector of ORGI helped in getting the volume printed I am thankful to all of them

I am personally indebted to Sri J K Banthia, Registrar General and Census Commissioner, India under whose guidance it has been rare privilege to strive for results I am equally indebted to Shri R G Mitra, Deputy Registrar General (C & T), Dr I C Agrawal, Senior Research Officer of Social Studies Division and Dr R P Singh, Deputy Registrar General (Map) for spontaneous help and encouragement at different stages of the work of this project I am also thankful to Sri S L Jain, Dy Director and Sri R K Mehta, Assistant Director of Social Studies Division who scrutinized the manuscript

GUMLA

Analytical Note 2001

Brief history of the District-

The district of Gumla was carved out of old Ranchi district by the Govt of Bihar Notification No 7/T-1-204/83 dk0 156 ft0iq0 dated 16 5 1983 It acquired 9077 square Kilometres area from its parent district of Ranchi It is one of the 6 districts of South Chotanagpur division while other five districts are Palamu Lohardaga Ranchi, Purbi Singhbhum and Paschmi Singhbhum

Gumla district Contains 2 sub-divisions (Gumla Sadar and Simdega). 18 Community Development Blocks as well as 2 towns (Gumla and Simdega) Gumla is the principal town of the district It is headquarters of both the district and Gumla Sadar sub-division whereas Simdega town is headquarters of the Simdega sub-division Lion's share of C D Blocks (11) is with Gumla sadar Sub-division, viz , Bishunpur, Ghaghra, Chainpur, Dumri, Raidih, Gumla, Sisai, Verno, Kamdara, Basia and Palkot while remaining C D Blocks (7) namely Simdega, Kolebira, Bano, Jaldega, Thethaitanger, Kurdeg and Bolba from the Simdega sub-division

It is predominarily a tribal district It is bounded on the north by the districts of Palamu & Lohardaga, on the east by the districts of Ranchi and Paschime Singhbhum, on the South by the State of Orissa and on the west by the State of Madhya Pradesh The name of the district owes to it's principal town Gumla while in turn owes its name to Gau (Cow) and mela i e , cows hat

Early History

As the district was created out of old Ranchi district by Government of Bihar Notification dated 16 5 1983, naturally, its recorded history is contained within the parent Ranchi district prior to Notification

Owing to Kol rising in 1881-82 the South-West non-regulation frontier was created after which Lohardaga district came into existence which owned present Gumla district- in 1899 the name of the district was changed from Lohardaga to Ranchi

In ancient times the area of the district along with neighboring west tract was under the undisputed possession of Mundas and Oraons To Aryans the area was known as Jharkhand or forest territory It was beyond the pale of Hindu influence, possibly, the area came under Magadhan empire during the reign of Ashoka, the great (273-232 B C)

With the decline of Mauryan power, king Kharavela of Kalinga led an army through Jharkhand and ransacked Rajgriha and Patalıputra Later, Samudra Gupta (335-380 AD) must have passed through the area on his expedition to the Deccan The Chinese traveller Itsing is believed to have journeyed through the Chotanagpur Plateau in course of his travels to Nalanda and Bodh Gaya

The Chotanagpur Raj is believed to have been set up in fifth century A D after the fall of the imperial Guptas Phanimukut was elected the first king It is said that he was found by the side of a tank under the protection of a Nag (snake) Hence the dynasty founded by him was named the Nag Dynasty

Muslim Period.

It was only Akbar who could extend the Muslim influence in the area As per Ain-i-Akbari Chotanagpur was reduced to the position of tributary by the force of Akbar by Shahbaz Khan and was included to the Subeh of Bihar

After the death of Akbar in 1605 the area presumably got independence In 1616 Fateh Jang captured Durjan Sal, the 46th King of Chotanagpur In 1632, Chotanagpur was given as Jagir to the Governor at Patna against annual payment of Rs 1,36,000 But this arrangement could not last long In the time of Muhammad Shah (1719-1748) Sar Buland Khan, the Governor of Bihar defeated the Raja of Chotanagpur It is believed that district enjoyed almost peace from 1624 when Durjan Sal was released till the appearance of the British in 1772

British Period.

Emperior Shah Alam-II granted the Diwani of Bengal, Bihar and Orissa to the East India Company in 1765 Chotanaagpur was included within Bihar Prompted by internecin quarrels captain camac in December,1771 attacked Palamu Captain Camac was succeeded by Chapman, the first Civilian administrator of Chotanagpur

Agrarian discontent against the begari coupled with enhancement of rent by the thikedars or intermediaries caused Sardari agitation The agitation was led by Sardars By 1887 the movement got momentum and many Munda and Oraon cultivators refused to pay rent to the landlords With the appearance of Birsa Munda, believed to be manifestation and incarnation of God, the agitation was at its height in 1895 He declared that the land belonged to the people who reclaimed it from forests and thus there was no need to pay rent Birsa Munda had far-reaching influence on cultivators and people of Gumla as well

A local leader Jatra Oraon of Bishunpur police station led a religious movement known as Tana Bhagat movement in 1914 The non-co-operation movement led by Jatra soon spread over Palamu and Hazaribagh districts

Advises also Played an active role in freedom-movement A large number of Tana Bhagats attended the Gaya session of the congress Presided over by Deshbandhu Chitranjan Das in December 1922 It was their combined efforts with rest of countrymen, which blossomed after independence in 1947

Natural Division.

The Gumla District is full of hills and hillocks In the south of Palamu district there are a number of high flat hills, called pato and are capped by great masses of laterite soil The pat area extends over the blocks of Bishunpur, Chainpur and Ghaghra with an attitude ranging from 2,500 feet to 3,000 feet above the mean sea level In the pat region the highest areas are Netarhat pat (3,356 ft), Lamiti pat (3,777 ft) and Galgat pat (3,823 ft) The crest of the Netarhat pat is an undulating tableland about 6 kms long and 4 kms broad Owing to height of pat region it has cooler climate On the Palamu border lies the Bulbul hill with an elevation of 3,351 feet In the south of Bulbul lies Sarupahar having 3,615 feet height Rest of the area lies in the plateau area Thus, we can divide the Gumla district within two natural divisions pat and plateau Summit of some of the hills lie within Palamu district, viz Birpokhar, Oria, Bardag and Hutar which extends over Gumla as well

River System.

In the district of Gumla South Koel and Sankh rivers flows South Koel originates in the hilly region of Ranchi district lying in the western side where Swarnrekha river originates It flows towards southwestern direction Many small rivers coming from pat region meet south Koel It's main tributary coming through east is rivulet Karo Near Ganagapur south Koel meets Sankh

Climatic conditions

The climate of Gumla is cold and healthy Only during the months of April and May temperature rises But in spite of high temperature of the day, the nights are cool

Since the temperature is dry the heat is not oppressive The cold weather begins in the first week of November, During December and January temperature drops to its minimum and thus months of December and January are very cold Pat region is comparatively cold than plateau region

Flora and Fauna.

Considerable parts of the district are covered by trees The district is replete with Sal which is of Dry Penisular' type The soil of the district is either laterite or upland grey-yellow The chief products of the district are course varities of rice, millets, pulses and oil seeds Most of the area are forested or hilly unfit for agricultural produce Villagers enjoy mainly traditional form of irrigational facilities, cultivation is the main pursuit of the people

The trees of Asan, Gamhar, Kond, Simal, Mahua, Mango, Neem etc , are generally found Mahua and Sal are keenly associated with the Adivasi life and are common throughout the Gumla District

In the district bears, Sambhar, Chital, Kotra, Nilgai, Horse etc , are found Patridges, quail, peafowl are also seen in the district Snakes of both poisonous as well as non-poisonous varieties are found in the district

Industrilisation.

In the matter of industrilisation Gumla district is very backward to its parent district Ranchi Lower rate of industrilisation is reflected by very lower rate of urbanisation, lessthan ½ percent urbanisation

Livestock.

Owing to lack of pasturagae and fodders the cattle of Gumla district are under-sieged But in the jungle area there is sufficient foddar-availability Besides cattle, the villagers keep large number of goats They also keep pigs and sheep Number of poultry farms increased in the district Really, poultry is as indigenous cottage industry

Communications

Following roads serves the purpose of the people of Gumla district

i) Ranchi- Gumla- Simdega- Rourkela

ii) Gumla- Chainpur

iii) Gumla- Sisai and

iv) Ranchi- Neetaihat

Railway, waterway and Airway are copiously absent in the district

Mines and minerals.

Land use

District is replete with laterite It is believed that laterite is derived from the ancient lava, of which district is said to be composed of Weathering has converted the lave into laterite and bauxite Laterite is full of aluminium Iron-Oxide and Mangnese dioxide It is a great demerit of laterite soil that they are full of gravel and pebbles It is of deep red colour due to iron-oxide contents.

Land use pattern.

Due to gradual deforestation of the district more and more land are coming under the pale of cultivation As the soil is laterite it is very less fertile even then efforts are being done by the state govt to improve the growth of requisite quality of land

Trade and Commerce.

The Chief centers of trade in the district are Gumla and Simdega Apart from permanent markets hats are the trading centers. Hats supply nearly every item of use for villagers Marchants purchase foodgrains, oil seeds, lac, hide, etc from the cultivators and in return supply to them Kerosens oil, mustard oil, soaps, clothes etc

Electricity and Power.

Both the towns of the district are electrified Electric is supplied in the district by Bihar State Electricity Board through Patratu, Thermal power Station Electric supply is not proper and regular

Social and cultural Events and Natural and Administrative.

After 1981 Census Ranchi district was split up into 3 districts viz Ranchi with Ranchi Sadar and Khunti Subdivision, Lohardaga containing only one subdivision i e, old Lohardaga and Gumal consisting of Gumla and Simdega subdivisions The Adivasis of Gumla district are associated with Jharkhand movement Loaders of the movement are mostly outcomes of the proselytising efforts of Christian missionary

The newly created Jharkhand state came into force on the 15th of November, 2000 with its headquarters at Ranchi The creation of the separate state has brought administrative change in the district It has also made impact on the social, cultural and economic life of the people

Brief Description of places of Religious, Historical and Archaeological importance in villages and places of Tourist interest in the Towns of the District

1) **Basia** It is situated about 24 kms north of Kolebira It has a dispensary, an inspection bungalow a post office, a high school, a public library and a health center It is the headquarters of the basic community Development Block

2)Bishunpur It is headquarters of the same named C D Block and lies about 51 kms west of Lohardaga on the Ranchi- Netarhat road Bishunpur was one of the first Multi –purpose Tribal Development projects in the state

3) Banki The village lies within Simdega sub-division The village has remains of an old building of a king and is known as Rajbasa

4) Betma Lying within Simdega sub-division the village contains the ruins of 200 years old stone and brick built a placewhich is an example of exquisite -craftsmanship

5) Deogaon The village is under Gumla sub-division and possesses several engraved stone-pieces as well as images of Shiva, excavated from mounds

6) Nagar The village contains the ruins of more than 250 years old fortress known as Navratangarh, Ruins of several fortresses, maths, temples and tanks are around the Garh

7)Nawagarh The village has an old temple with images of Lord Krishna, Lord Shiva and goddess Lakshmi which has inscriptions and engravings

8) Palkot The village lying in Gumla sub-division contains more than 350 years old Sati-Math created to commemorate the Maharani of Chotanagpur who committed sati after her husband's death

9) Nagpheni Situated at 18 kms east of Gumla the village lies in Sisai development block It is legendary that Maharaj Mutuk Nath Sah Deo was saved by a Nag or cobra To reflect indebtedness he founded the Nagbansi dynasty

At the top of the hillock in the village there is a ruined temple The Rath Yatra celebrated in the month of Ashadh (June-July) is an important event of the village

District Highlights – 2001 Census

1 Gumla ranks 10th in terms of population (13 46,767) and 2nd in terms of area (9,077 sq km) in the state of Jharkhand

2 In terms of population per sq km Gumla is the 18th densely populated district in the state with 148 persons per sq km as against the state's 338

3 Gumla ranks 2nd in terms of sex-ratio (993) against the state's 941

4 There are 5 uninhabited villages (out of 1,398 total villages) in the district of Gumla

5 Sisai (under Sisai C D Block) is the most populated village (7,907) and Nimtoli (under Gumla C D Block) is the least populated village (31) in the district

6 The economy of the district mainly depends on cultivation or related work More than 85% of the total workers are engaged in Primary sector

7 C D Block Ghaghra has the highest number of villages (120) in the district and C D Block Bolba has the lowest number of villages (26)

8 Taisar (under Kurdeg C D Block) has the largest area (6,582 hectare) and Patrapali (under Jaldega C D Block) has the smallest area (23 hectare) among the villages in the district

9 Improved drinking water facility figures are impressive - it is available for 88 6 percent of the villages

Note _____ number of villages are fully covered as out growths (OGS) and therefore not included under the item "Number of villages"

Definition of Census Town -

All palaces which satisfy or are expected to satisfy the following criteria are treated as Census Towns -

i) A minimum population of 5,000

ii) At least 75 percent of the male working population engaged non-agricultural pursuits, and

iii) A density of population of at least 400 per square kilometre (1,000 per square mile)

proportion of other workers is 9 7 percent of the total workers of the district Proportion of other workers varies between 21 9 percent in Gumla C D Block to 4 0 percent in Bolba C D Block

TABLE-35

From the above table, the relative important of the main spheres of economic activity may be gauged from the pattern of distribution of main workers, according the broad four fold classification namely, cultivators agricultural laborers, household industry workers and other economic activities

The economic activity in the rural areas of the district is primarily dependent on agricultural which is supported by the fact that the cultivators (71 9%) and agriculture laborers (16 8%) together constitutes 88 7 percent of the total workers of the district The agricultural sector has observed more than three fourth of the total main workers The proportion of cultivators varies between 80 3 percent for Dumri C D Block to 66 0 percent for Thethaitangar C D Block Proportion of agricultural laborers varies between 26 6 percent forVerno C D Block to 8 9 percent for Jaldega C D Block The proportion of Household industry workers is only 3 6 percent of the total workers of the district Proportion of household industry workers varies between 5 4 percent for Kokebira C.D Block The proportion of other workers is 7 6 percent of the total workers of the district Proportion of other workers varies between 11 3 percent for Gumla C D Block to 4 0 percent for Bolba C D Block

TABLE-36

There is no urban agglomeration in Gumla district There are only two statutory town in the district i e Gumla (M) and Simdega (NA) From the above table, the relative importance f the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely cultivators, agricultural laborers house hold industry workers and other economic activities The total cultivators constitute 7 8 percent and agricultural labhourers constitutes 6 9 percent of the total workers of urban areas The proportions of male and female cultivators are 7 1 and 10 8 percent respectively The proportion of male and female agricultural laborers are 5 0 and 14 8 percent respectively Household industry workers constitute 4.3 percent of the total workers of urban areas the proportion of household industry workers among male is 3 7 percent and that of females is 6 7 percent Other workers constitute 81 0 percent of the total workers of urban areas The proportion of male and female other workers are 84 1 and 67 8 percent respectively The cultivators' agricultural, Household industry figures of Simdega (NA) urban towns are higher than the district average and other workers in Gumla (M) towns are higher than the district average

TABLE-37

The above tables give the distribution of villages according to the availability of different amenities in the district

EDUCATION AMENITY

There are as many as 1030 villages accounting for 73 9 percent of the total number of inhabited villages (1393) in the district where education facility is available Kolebira, Kurdeg, Bolba, Sisa, Gumla, Thethaitangar, Verno. Bishunopur, and Palkot C D Blocks in C D Block Ridih with 95 1 percent closely follow the highest proportion of villages with education facility with 94 3,88 3,88 9,84 6,81 6,77 8,77 0,75 4 and 75 0

males 90 8 and f females 80 3 percent Smidge (NA) is lowest percent literacy male 82 7% and females 73 0 in total district average of scheduled tribes population

TABLE-31&32

The work participation rate for total workers is defined as the percentage of total workers to total population In similar way, it is defined for main and marginal workers, table 31and 32 shows that the work participation rate (WPR) in the Gumla district is 33 8 percent as main workers and 16 5 percent as marginal workers proportion of non-workers in the district is 49 7 percent

Among the main workers male work participation rate in the district is 44 2 percent while that of females is only 23 4 percent as per 2001 census The proportion of main workers is highest (39 9%) in Jaldega C D Block and the lowest 28 2% in Bishunpur C D Block out of 18the C D Blocks WPR of eight C D Blocks are above the district average the proportion of marginal workers is the highest (23 2%) in Simdega C D Block and the (8 6%) in Raidih C D Block the proportion of total workers is t he highest (60 7%) Simdega C D Bock and the lowest (4437%) in Basia C D Block

TABLE-33

There is no urban agglomeration in Gumla district The only urban unit in the district is Gumla (M) and Simdega (NA) The work participation rate for total workers is defined as the percentage of total workers to total population In a similar way, it is defined for main and marginal workers For Gumla (M) and Simdega (NA) the work participation rate (WPR) recorded is 21 8 percent and 22 7 percent of the total 22.2% population of the town as main workers and 2 4% Gumla (M) 4 3% Simdega (NA) total marginal workers 3.3 percent The proportion of non-workers in the towns is Gumla (M) 75 7% and Simdega (NA) 73 0 percent The proportions of male and female main workers are Gumla (M) 35 9 Simdega (NA) 36 5 and female 6 7% Simdega (NA) female 8 0% Total urban areas males 36 1% and females 7 3% the proportion of marginal work among males is Gumla (M) 2 8% and females 2 1 percent Simdega (NA) males 4 7% and females 3 9 percent The proportion of male and females non workers are Gumla (M) male 61.3% female 91 2% Simdega (NA) males 58 8% females 88 2% r respectively There is totoal population of the Simdega (NA) town as main workers, marginal workers and total workers highest percent in Simdega (NA) and non workers is highest percentage I n Gumla (M)

TABLE-34

From the above table, the relative importance of the main spheres of economic activity may be gauged from the pattern of distribution of main workers according to the broad four fold classification namely, cultivators, agricultural laborers household industry workers and other workers The economic activity in the rural and urban areas in the district is primarily dependent on agricultural which is supported by the fact the cultivators (70 1%)and agricultural laborers (16 6%) together constitutes 86 7 percent of the total workers of the district The agriculture sector has observed more than three fourth of the total main workers The proportion of cultivator's varies between 80 3 percent for Dumri C D Block to 63 5 percent for Simdega C D Block Proportion of agricultural labourers varies between 22 0 percent in Thethaitengr C D Block to 8 9 percent in Jaldega C D Block The proportion of Household industry workers is only 3 7 percent of the total workers of the district A proportion household industry worker varies between 5 4 percent in Kolebira C D Block to 2 2 percent in Verno C D Block The

account for 11 0 percent of the district rural population 9 1 percent of the inhabited i e 63 villages are such where literacy range between 11-20 percent and these villages account for 7 7 percent of the district rural population 5 8 percent of the inhabited villages i e 40 villages are such where literacy rate range between 61-70 percent and these villages account for 2 8 percent of the district rural population There are only 22 villages accounting for 3 2 percent of the inhabited villages where literacy rate range between 100 and above percent and these villages account for only 0 1 percent of the district rural population

TABLE-27

The table above shows that the literacy rate among the scheduled castes in the urban areas of the district is for below i e 61 7 percent in case of total population 72 1 percent in case of males and 50 3 percent in case of female as compared to ----- percent in case of total population --------percent in case of males and -----percent in case of females in the state of Bihar and 51 7 percent in case of males and 40 0 percent in case of females in the Gumla distinct

The highest proportion of male and female literates is in Gumla (M) urban towns with 77 9 and 58 0 percent closely flowed by Simdega (NA) urban town with male 64 6 percent and female 40 1 percent respectively literacy rate among the schedudled tribes population is because of very largest percent male and females literate tribes population in Gumla district It is found that the gap between males and females literacy rate is highest i e 26 8 percent in Ghaghra C D Block where as it is lowest i e 16 2 percent in Kurddgs C D Block

TABLE-28

The table –28 shows that among the scheduled tribes the percentage of literate is highest i e 60 1 percent in Chainpur C D.Block where as it is lowest i e 36 6 percent in Bishunpur and Verno C D Block in the district It is observed that the literacy rate among the scheduled tribes for the district is 49 5 percent only While Kamdara, Basia, Chainpur, Dumri, Raidih, Simdega, Kurdeg, Thethaitngar, Kolebira and Bano C D Blocks have higher than literacy rate among the total disrict average with 55 1,52 8,60 1,58 9,56 5,54 8,55 2,54 6,56 3 and 50 6 percent As regards percentage of male literacy rate among the scheduled tribes it is highest i e 69 4 percent in Chaihnpur C D Block where as it is lowest i e 49 7 percent in Verno C D Block In case of female literacy rate among the scheduled tribes it is highest i e 50 9 percent in Chainpur C D Block such higher percentage

TABLE-29

The table above shows that in case of literacy among the scheduled tribes in the villages of the disrict the highest number of villages i e 23 0 percent fall in theliterarcy range of 41-50 percent Where as the lowest number of villages i.e 1 7 percent falls in the literacy range i e 81-90 percent It is observed that of the total villages in the district 3 7 percent villages are such which fall in the literacy range of 11-20 percent in case of literacy among the scheduled tribes in the villages of the district

TABLE-30

The table above shows that the literacy rate among the scheduled tribes in the urban areas of the district 81 2 percent There are all together 18683 persons including 9762 males and 8921 females and they all are literates These figures are the literacy among the scheduled tribes in the urban areas of the highest percent in Gumla (M)

villages i e 119 villages are such where literacy rate range between 21 and 30 percent These villages account for 5 8 percent of the district rural population There are 59 villages accounting for 4 2 percent of the inhabited villages where literacy rate range between 71 and 80 percent and these villages account for only 4 2 percent of the district rural population

There are only 39 villages accounting for 2 8 percent of the inhabited villages where literacy rate range between 11 and 20 percent and these villages accounting for only 1 5 percent of the district rural population

TABLE-24

There is no urban agglomeration in Gumla district There are only two statutory towns in the district i e Gumla (M) and Simdega (M) The literacy rate for Gumla (M) 86 8 and Simdega (NA) 79 7 percent Male literacy greatly our number female literates as the male literacy rate for Gumla (M) 92% and Simdega (NA) 85 6 percent total district 89 1 percent, while the female literacy rate is only 77 6 percent These are female literacy rate in Gumla (M) urban town 81 2 percent of the highest literacy female number, Male literacy rate for Gumla (M) urban town is higher than corresponding figures of Gumla district

TABLE-25

The above shows that literacy rate among the scheduled castes is highest i e 52 3 percent in the Verno C D Block where as it is lowest i e 29 3 percent in the Jaldega C D Block in the district It is observed that the literacy ratre among the scheduled castes for the district is 30 8 percent only As regards percentage of male literacy rate among the scheduled castes it is highest i.e 63 5 percent in Verno C D Block where as it is lowest i e 42 9 percent in the Kurdeg C D Block In case of female literacy rate among the scheduled castes, also it is highest i e 40 5 percent in Verno C D Block and the lowest i e 15 4 percent in Jaldega C D Block It is found that the gap between male and female literacy rate is highest i e 33 7 percent in Kandara C D Block where as it is lowest i e 23 0 percent in Verno C D Bolck

Male literacy rate among the scheduled castes There are highest i e 56 6 57 8,63 5,63 0,59 9,61 9,54.0,53 0,51.8,54 2, and 54 1 percent in Ghaghra, Sisa, Verno, Kamdara, Basia, Chainpur, Dimri, Raidih, Palkot, Kolebira and Bano C D Blocks are higher than the total district average In case of female literacy rate among the scheduled castes, other C D Blocks are highest percent in Bishunpur, Ghaghara, and Sisa, and Verno Kamdara, Basia, Gumla, Chainpur, Raidih, Simdega and Kolebira C D Blocks with 24 0,24 2,29 0,40 5,29 4,30 423 6,36 1,23 5,23 5 and 26 0 percent in the total district average

TABLE-26

The table above shows that in case of literacy among the scheduled castes in the villages of the district the highest number of villages i e 19 3 percent fall in the literacy range of 21-30 and 31 40 percent where as the lowest number of villages i e 0 3 percent fall in the literacy range 91-99 percent It is observed that of the total villages in the district 2 6 percent villages are such which fall in the literacy range of 1-10 percent in case of literacy among the scheduled castes in the villages of the district 131 villages and with 21 7 percent of the district rural population 18 9 percent of inhabited villages where literacy rate range between 41 and 50 percent 10 4 percent of the inhabited villages i e 72 villages are such where literacy rate range between 51 and 60 percent These villages

Ghagnia, Verno Basia, Gumla, Chainpur, Dumri, Simdega, Kurdeg C D Blocks are lower than the district average

The sex ratio of scheduled tribes varies from 1031 in Kamdara C D Block to 963 in Dumri C D Block Sex ratio figures of scheduled tribes in Bishunpur, Ghaghra, Sisai, Verno, Gumla, and Dumri C D Blocks are below the district average The sex ratio figures of scheduled tribes relating to Kamdara, Basia, Chainpur, Raidih, Palkot, Simdega, Kurdeg, Bolba, Thetaitengar, Kolebira, Jaldega and BanoC D Blocks are higher than the district average It is worthwhile to mention that scheduled castes population in the district is negligible

TABLE-20

There is no urban agglomeration in Gumla district There are only two statutory towns in the district i e Gumla (M) and Simdega (NA) The sex ratio of scheduled castes in Gumla (M) is 918 and Simdega (NA) 935 While the sex ratio of scheduled tribes is 1032, which is very adverse The sex ratio figures of scheduled tribes in Simdega (NA) 1044 and Gumla (M) 1017 The highest sex ratio of scheduled tribes population is in Simdega (NA) urban town with 1044 pf the total district average

TABLE-21 &22

Table 21 and 22 show that among the C D Blocks in the district Chianpur C D Block has the highest proportion of literate population (58 7%) followed by Dumri C D Block (56 77%) The literacy rates for Kolebira, Kamdara, Raidih, Basia, Thethaitangar, Kurdeg, Simdega, Gumla, Bano, Jaldega, Sisai, Balba, Palkot, Verno,Ghaghara and Bishunpur C D Blocks are 55 2,55 1,54.3,53 7,52 8,52 6,52 0,48 9,48.3,47 4,47 4,47 3,45 6,42 2,41 4 and 38 6 percent respectively Male literates out number females literates in the entire C D Blocks of Gumla district Kamdara, Dumri, Ridih, Kolebira, Basia, Simdega, Thethaitangr, Kurdeg, Gumla, Bano, Sisai, Jaldega, Palkot, Balba, and Verno in Chainpur C D Block with 68 8 percent closely follow the highest proportion of male literates Ghaghara and Bishunpur C D Blocks with 68 8,68 3,97 65,66 6,66 0,65 8,62 6,62 2,61 8,61 3,61 1,59 4,59 3,58 4,55 9,55 1,51 9 percent respectively Chainpur C D Block has the highest female Literacy rate with 4837 percent while Bishunpur C D Block has the lowest literacy rate among the female with 25 0 percent Male literacy rate for Chainpur, Kamdara, Dumriacy, Kolebira, Basia, Simdega, Thethaitangar, Simdega, Kurdegt, Ridih, C D Blocks are higher than the corresponding figures of Gumla district only Bihsunpur Ghaghra, Saiaim Verno, Gumla, Palkot Balba, Jaldega and Bano C D Blocks have the lowest female literacy rage than the district average

TABLE-23

The above table shows that in 26 6 percent of the inhabited villages, literacy rate range below 41 and 50 percent In these 370 villages 26 6 percent of the district rural population lives This is the largest group of villages in the district 360 villages closely follow this and with 30 7 percent of the district rural population 25 8 percent of the inhabited villages where literacy rate range between 51 and 60 percent 18 3 percent of the inhabited villages i e 255 villages are such where literacy rate range between 31 and 40 percent of the district rural population 12 1 percent of the inhabited villages i e 169 villages are such where literacy rate range between 61 and 70 percent and these villages account for 14 2 percent of the district ruial population 8 5 percent of the inhabited

The percentage of scheduled tribes population in Jaldega, Thethitangar, Balba, Dumri, Chainpur Kamdara, Ghaghra, and Bishunpur C D Blocks are higher than the district rural average (70 2%)

TABLE-16

From the table above, it is apparent that there are 361 villages accounting for 25 9 percent of the inhabited villages in the district where the population of scheduled castes range between less than 5 percent of total population Villages closely follow this where the population of the scheduled castes ranges between 5 and 10 percent of total population These 158 villages account for 11 3 percent of the total inhabited villages There are 104 villages, which account for 7 5 percent of the inhabited villages where the percentage of scheduled caste population to total population is between 11 and 20 There are 41 villages, which constitute 2 9 percent of the inhabited villages where the percentage of scheduled caste population to total population is between 21-30 percent 16 villages are such which constitutes 1 1 percent of the inhabited villages where the percentage of scheduled castes population to total population is between 31and 40 There is no scheduled caste population in 50 3 percent of the inhabited villages in the district

TABLE-17

As regards the population of the scheduled tribes it can be seen from the table above that there are 726 villages in the district where member of scheduled tribes exist 52 1 percent where the population of scheduled tribes range between 76 and above percent of total population Villages closely follow this where the population of scheduled tribes ranges between 51-75 percent of the total population These 422 villages, which account for 30 3 percent of the total inhabited villages There are 112 villages, which account for 8 0 percent of the inhabited villages where the percentage of scheduled tribes population is between 41 and 50 There are 69 villages, which constitute 5 0 percent of the inhabited villages where the percentage of scheduled tribes population to total population is 31and 40 villages are such which constitute 2 2 percent of the inhabited villages where the percentage of scheduled tribes population is between 21 and 30 There is scheduled tribes population in 0 1 percent of the inhabited villages in the district

TABLE-18

Table-18 above shows that there is no urban agglomeration in Gumla district There are only two statutory towns in the district i e Gumla (M) and Simdega (NA) The percentage of scheduled caste population to total population is 4 3 in urban towns The highest percentage of scheduled caste population is in Gumla urban town with 4 4 percent and Simdega (NA) is lowest percent in total urban towns The percentage of scheduled tribes population to total population is 36 5% in urban towns There are Simdega (NA) is 43 5 –percent and Gumla (M) 30 6 percent total scheduled tribes population in urban areas

TABLE-19

Shows that their sex ratio of scheduled castes varies from 1073 in Bano Block to 917 in Verno C D Block The sex ratio in Kamdara C D Block is 1052 While the sex ratio in Balba Sisai, Kamdara, Raidih Palkot Thethaitangar, Kolebira, Jaldega and Bano C D Blocks are higher than the district average The sex ratio figures of, Bishunpur

TABLE-13

There is no urban agglomeration in Gumla district. It is apparent from the above table that there are only two statutory towns in Gumla district i.e.Gumla (M) and Simdega (N.A). The sex ratio in the age group 0-6 of Gumla (M) is 984 and Simdega (N.A) 947. The sex ratio in the age group 0-6 of Gumla (M) is highest population 984 other urban areas.

TABLE-14

The above that shows that the percentage of scheduled castes in Gumla district is 5 0 percent of the total population in the district within the district highest percentage of scheduled castes population is in Kolebira C D Block 13 0 percent closely followed Simdega, Bano, Palkot, Bolba Thethaitangor, Kurdeg, Basia, Laldega ,Gumla, Kamdara, Dumri, Raidih, Ghaghara, Chainpur, Bishunpur,Verno,Sisai 8 9,8 0,7 7,7 3,6 5,6 4,4 7,3 9,3 9,3 7,3 2,2 92 2,2 1,1 7,1 5,and 1 2 percent respectively The percentage of scheduled castes population in Gumla districtfor the urban areas is 4.3 percent which is lower areas (5 0%) The percentage of scheduled tribes population is highest in Bishunpur C D Block 89 3 percent closely followed by Jaldega, Chainpur, Thethaitangar, Dumri, Ghaghra, Balba, Kamdera, Kurdeg, Verno, Raidihk, Kolebira, Basia, Bano, Sisia, Simdega, Palkot and Gumla C D Blocks - with 83 0,81 9,81 8,80 3,74 0,73 6,70 3,70 0,67 8,63 6.55 0 percent respectively The percentage of scheduled tribes population in Gumla district for the urban areas is 36.5 percent is lower than the rural areas (70 2%)

TABLE-15

The above table indicates that the percentage of the scheduled castes in Gumla district is of the order of 5 0 percent of the total population The highest percentage of scheduled caste population in Kolebira C D Block with 13 0 percent of the total population closely followed bySimdega, Bano, Palkot, Bolba, Thethaitangor, Kurdeg, Basia, jaldega, Gumla, Kamdora, Dumri, Raidih, Ghaghra, Chainpur, Bishunpur, Verno and Sisai C D Blocks with 10 7,8 07 7,7 3,6 5,6 4,4 7,3 9,3 7,3 7,3 2,2 9,2 2,2 1,1 7,1 5,1 2 percent respectively The percentage of scheduled caste population in Simdega, Bano, Palkot, Bolba, Thethaitangor, Kurdeg C D Blocks are higher than the district rural average (50 0%) There percentage of scheduled tribes population in Gumla district is of the order 70 2 percent of the total population the highest percentage of scheduled tribes population is in Bishunpur C D Block with 89 3 percent of the total population closely followed by Jaldega, Chainpur, Thethaitngar, Dumri, Ghaghra, Bolba, Kamdara, Kurdeg, Simdega, Verno, Raidih, Kolebira, Bano, Basia, Gumla, Sisai, Palkot, C D Blockswith83 0, 81 9,81 8,80 3,74 0,73 6,70 3,70 0,69 2,67 8,63 6,63 2,63 0,63 0,62 7.62 4,59 4percent respectively

of the rural population of the district 201 villages (14 4%) fall in the favorable sex ratio range of 1100+ and these villages account for only 6 2 percent of the rural population 87 villages (6 2%) are in the sex ratio range of 850-899 and these villages account for only 5 1 percent of the population Only 23 villages (1 7%) fall in the very favorable sex ratio range of 800-849 and this small proportion of villages accounts for 0 9 percent of the population only 13 villages (0 9%) are in the lowest range of sex ratio 750-799 which account for 0 5 percent of the population

TABLE-9

There is no urban agglomeration in Gumla distict There are only two urban unit i e Gumla (M) and Simdega (N A) The sex ratio of these statutory towns is Gumla (M) 929 and Simdega (N A) 937 according to 2001 Census The sex ratio of these statutory total towns is 933 Simdega (N A) urban unit is 937 highest the total sex ratio of the district average

TABLE-10

It is observed from the above table that the sex ratio in the age group 0-6 in the district varies from 1003 in Bano C D Block to 938 in Basia C D Block The sex ratio in the age group 0-6 of Kurdag C D Blocks is 1002 while the sex ratio of Bishunpur and Ghagha C D Blocks are 1004 The sex ratio figures in the age group 0-6 of Bishunpur, Ghaghara, Verno, Gumla, Dumri, Kurdeg, Bolba and Bano C D Blocks are higher than the district total and rural average while Sisai, Kamdara, Basia, Chainpur, Palkot, Simdega, Thethaitangar, Kolebira, and Jaldega have sex ratio below the district total ands rural average The urban sex ratio of Gumla district is higher than the total and rural sex ratio of the district

TABLE-11

It is observed in table 11 that the sex ratio in the age group and 0-6 among the rural population in the C D Blocks of the district varies from 1004 in Bishunpur and Ghaghra C D Blocks to 938 in Basia C D Block The sex ratio of Bano C D Block is 1003 while the sex ratio Kurdega C D Block is 1002 The sex ratio figures of Bishunpur Ghaghara Verno, Gumla, Dumri, Simdega, Kurdeg Bolba and Bano C D Blocks are higher than the district average While Sisai, Kamdara Basia, Chainpur, Raidih, Palkkot, Thethaitangar, Kolebira and Jaldega C D Blocks have sex ratio below the district rural average

TABLE-12

It is observed in the above table that 26 1 percent of inhabited villages in Gumla district lies in the sex ratio range of 110+ in the age group 0-6 26 villages (19 0%) fall in the sex ratio range of1000-1099 in the age group 0-6 154 villages (11 1%)are in the sex ratio range of 950-999 180 villages (12 9%) are in the sex ratio range of 900-949 131 villages are in the sex ratio range of 950-899 61 villages (4 4%) are in the sex ratio range of 800-849 these villages having favorable sex ratio constitutes 36 percent of the rural population of the district There are 100 villages (7 2 %) in the district, which lie in the unfavorable sex ratio range of 800-849 these villages account for 6 2 percent of the rural population of the district There are 99 villages in the district having very unfavorable sex ratio range of less than 700, which account for 2 8 percent of the rural population of district

percent higher than the district average The smallest proportion of villages with education facilities is observed in C D Block Ghaghra with 64 2 percent

MEDICAL AMENITY

The availability of medical amenity in the villages is quite lower only 26 2 percent villages has it? Among C D Block Basia has the largest proportion of villages with medical facility the percentage being 72 2 percent Ridih, Kurdeg, Thethaitangar, Kamdara, Jaldega, Kolobira C D Blocks with 47 5.46 7,39 9,39 7,29 1 and 28 3 percent higher than the district average follow it, Dumri C D Block on the other hand has the minimum proportion of villages (3 5%) where medical amenity is available

IMPROVED DRINKING WATER

There are as many as 1234 villages accounting for 88 6 percent of the total inhabited villages in the district where improved drinking water facility is available Among the C D Blocks Bolba has 100 0 percent proportion of villages where improved drinking wate4r facility is available These figures are higher than total district average i e Sisa, Basia, Jaldega, Bishunpur, Ghaghra, C D Blocks with 98 9,96 6,95 7,97 8,94 6,90 6,89 9,94 1 and 89 2 percent respectively Chainpur C D Block, on the other hand has the minimum proportion of villages (69 9%) where improved drinking water facility is available

POST OFFICE

Postal facilities also available only in 260 villages out of 1393 inhabited villages (18 7%) in the district Kurdeg C D Block has the maximum number of villages having Postal facility (46 7%) followed by Bolba, Thethaitangr, Simdega, Kamdara, Ridih, Palkot and Bishunpur C D Block with 30 8,24 6,20 7,23 3,19 7,19 3, and 19 1 percent higher than the district average Chainpur C D Block has the minimum number of villages having postal facility (12 0%)

TELEPHONE

The availability of telephone facility in the villages is quite low and only3 4 percent villages have it Among the C D Blocks Simdega has the minimum number of villages having telephone facility (23 9%) followed by Gumla, Palkot and Kolebira C D Blocks with 11 1,5 5 and 3 8 percent While the villages of Bishunpur, Verno, Bolba, Thethailangar and Bano C D Bolcks still do not have telephone facility

TRANSPORT COMMUNICATION

Transport communication facility is available only in 226 villages out of 1393 inhabited villages (16 2%) in the district Majority of villages have this facility Kurdeg C D Block has the highest proportion of villages (37 8%) which are connected by bus or rail or navigable river/ canal services etc followed by Gumla, Basia, Thethaitangar, Jaldega, Kolebira Bano, Simdega,Dumri, C D Blocks with 34 3,27 3,23 0,17 7,18 9,17 2,18 5,17 5 percent higher than the total district average The villages of other C D Blocks have the lowest any transport communication facility i e Sisa, Chainpur, Palkot and Bishunpur

BANK

Banking facility is available only in 72 villages out of 1393 inhabited villages (5 2%) in the district Among C D Blocks Basic has the maximum number of villages having banking facility (10 2%) followed by Kolebira, Jaldega, Chainpur, Bishunpur, Kurdeg, Thethaitangr and Ridih C D Blocks with 9 4,8 9,8 4,7 4 and 6 6 percent respectively Verno has the minimum number of villages having banking facility (1 4%)

AGRICULTURAL CREDIT SOCIETIES

Agricultural credit societies are available only in 65 villages out of 1393 inhabited villages (4 7%) in the district Bolba C D Block has the maximum number of villages having agricultural credit facilities (15 4%) while Ghaghra C D Block has the minimum number of villages with 0 8 percent

APPROACH BY PUCCA ROAD

This facility is available in 287 villages out of 1393 inhabited villages (20 6%) in the district Among C D Blocks Bolba with 42 3 percent villages having pucca approach road followed by Kurdeg, Kolebira, Gumla, Thethaitangar, Jaldega, Verno and Sisa C D Block 40 0, 34 0, 31 5,27 9,25 3,21 7 and 20 7 percent higher than total district average, while Ghaghra C D Block has the least number of villages having this facility with only 8 3 percent

POWER SUPPLY

Electrified villages in the district constitute as low as 6 6 percent of the total number of inhabited village Among the C D Blocks Kolebira has the maximum number of electrified villages with 24 5 percent followed Gumla, Thethaitangar, Basia, Bishunpur, Gyhaghra, Kamdara and Palkot C D Blocks with 19 4,13 3,12 5, 10 3, 10 0, 8 2 and 6 8 percent while the villages of Chainpur, Dumri, Kurdeg, Bolba, jaldega and Bano C D Blocks still do not have power supply facility

TABLE-38

It would be seen from table no 38 that educational facility is available to 87 9 percent of the rural population of the district The proportion varies between the maximum of 99 0 percent in Ridih C D Block and the minimum of 68 5 percent in Chainpur C D Block it may be of interest to note that proportion of villages in the district enjoying educational facility is less (being 73 9 percent vide table 37) than the proportion of population which is as high as 99 0 percent This may be attributed to the fact that villages that possess educational facility usually contain larger population as compared to those villages which have do not have this facility at all In the case of medical facility, also it can be seen that the proportion of rural population served by the amenity is of the order of 42.2 percent, which is more than the proportion of villages served by medical facility in the district In the case of improved drinking water facility also it may be observed that proportion of rural population served by the amenity is of the order of 92 percent, which is more than the proportion of villages served by this facility in the district

Similar trend can be observed in respect of other amenities also both in the district as also in its varies C D Blocks

TABLE-39

As regards educational facility it would be seen that there are 378 villages in the district (27 4%) which do not have any primary school but the facility is available at places situated within 5 kms for 270 villages and only 97 villages within the range of 5-10 kms there are as many 1103 villages in the district (79 9%) which do not have middle school but the facility is available at places situated with in 5 kms for 518 villages 460 villages range in 5-10 kms and 125 villages within the range of 10+ kms it is interesting to observed that cent percent inhabited villages of the district are deprived inhabited villages of the district are deprived of college but the facility is available at places

situated within 5 kms for 88 villages 216 villages within the range of 5-10 kms and 1076 villages within the range of 10+kms

There are 1343 villages in the district (96 4%) which are without the facility of hospital and as many as 772 villages enjoy this facility ate a distance range of 10+ kms The number of villages enjoying this facility at a distance range of 5-10kms is 388 where as the lowest is available at a distance of less than 5kms for 183 villages There are 1354 villages in the district (97 2%), which do not have primary health canter

Similar trend can be observed in respect of other amenities in the district

TABLE-40

It would be appear from the above table that maximum number of inhabited villages (54 3%) lie in the distance rage of 16-50 kms from the nearest statutory town This is followed by villages in the distance range of 51+ kms from the nearest statutory towns with 28 1 percent The villages are found to be in the distance range of 5-15 kms 16 8 percent None of the villages is found to be in the distance range of unspecified kms

Interestingly, it can be observed from the table that the proportion of villages having educational facility is 50 0 percent for those situated within 5 kms from the nearest town and increased to 72 0 percent in the distance range of 5-15kms There after it again increases to 75 0 percent in the distance range of 16-50 kms From the nearest town and it again very lowest percent decreases to 73 4 percent in the distances range of 51+ kms from the nearest town In the case of other amenities (except approach by pucca road) also more are less the trend is same

TABLE-41

It can be seen from the table no 41 that the maximum number of villages i e 504(36 2%) in the district fall in the population range of 500-999 followed by 476 villages (34 2%) having a population range of 1-499 303 villages (21 8%) having a population range of 1000-1999 99 villages in (7 1%) having a population range of 200-4999 the lowest number of villages is observed in the population range of 5000-9999 being only 11 (0 8%) in the case of other amenities also more or less the trend is same The proportion of villages having different amenities varies in direct relation to their population range Generally the maximum percentage of villages having different amenities have a population range of 2000-4999 and 5000-9999 which further corroborates the fact that more for are generally available in larger villages than in smaller ones

TABLE-42

Table 42 gives the percentage of cultivable area as also the proportion of irrigated area to total cultivable area in the district and its various C D Blocks

It would be seen from the table that 48 5 percent of the total cultivable area in the district and its various C D Blocks

It would be seen from the total that 48 5 percent of the total area of the district is utilized for cultivators (cultivable area) and of this only 11 3 percent, area is found to be irrigated Among the C D Blocks the highest percentage of cultivator's area is found in Verno C D Block with 72 5 percent closely followed by Gumla Sisia, Ghaghra, Basia, Bano, and Kurdeg Thethaitengar, Simdega and Dumri C D Blocks with 71 5,67 7,62 6,63 6,57 4,53 8,53 4,53 1 and 53 2 percent higher than the total district average respectively the lowest cultivable are is found in Bishunpur C D Blck, which is

14 9 percent The highest proportion of irrigated area (43 7%) to total cultivable area is founding Kurdeg C D Block followed by Gumla Ridih and Verno C D Block with 37 1, 24 5 and 11 9 percent respectively The least proportion of irrigated area is found in kolebira C D Block with 2 1 percent, which indicates that the villages in this block that indicates that the villages in this book are deprived of required irrigated facilities

TABLE-43

The above table gives the details of finances in the statutory town in terms of per capita receipt and expenditure There are only two statutory towns in the district i e Gumla (M) Simdega (NA) On going into the details of receipt under different heads in can be seen that the receipt under different heads in can be seen that the receipt from all other sources is the only head for per capita receipt in case of Gumla (M) the per expenditure incurred on public works is highest than the per capita expenditure on general administration in Gumla (M) and lowest in Simdega (NA) per capita total per capita total receipt is higher than the per capita total expenditure in Gumla (M) and Simdega (NA) nil

TABLE-44

The above table gives the details of different categories of educational institutions per ten thousands population in the town of the district It would be seen from the above table that institutions like secondary / material level school and college are situated in Gumla (M) and Simdega (NA) According for an average of 1 3 and Simdega (NA) 1 5 is highest percent the total district average and same percent in total urban towns 0 3 institution per ten thousand populations respectively Primary school and middle school account for an average of Gumla (M) 2 3 and Simdega (NA) 1 5 each per ten thousands and population In Gumla (M) 0 5 and Simdega (NA) 0 6 percent there is senior secondary school

TABLE-45

The above table furnishes information regarding availability of beds in medical institutions in Gumla (M) and Simdega (NA) towns

The number of beds in medical institutions per ten thousand population for Simdega (NA) higher than total district average works out to be 27 and Gumla (M) is very lowest number in medical institutions per ten thousand population for works out to be 6

TABLE-46

Gumla (M) and Simdega (NA) are the only two statutory towns in the district Table 46 relating to details of slums has been prepared as there is highest percent in Gumla (M)(15 3%) slums area in the town and Simdega (NA) lowest percent in total total district average (3 3%)

TABLE-47

Presents the most important commodities manufactured in the town and exported from Gumla (M) and Simdega (NA) it would be seen from above table that two item viz shoe. and surf are manufactured in Gumla (M) and three items viz, rice, vegetable and pulse are exported from Gumla (M) town

In the case of manufactured in the town and exported from Simdega (NA) It would be seen from the above table that three items viz silk, steel materials and sugar cane are manufactured and exported in the towns three items viz fillip, chiranji and lac

from Simdega (NA) It would be seen from the above table three items viz are manufactured and exported in the Simdega (NA) town increases most important items as, other towns

TABLE-48

Shows that there are as many as 243068 households accounting for 95 1% percent of the total households of the district dwelling in owned houses The proportion of households dwelling in two rooms is the highest (39 4%) where as it is the lowest (0 9%) dwelling in no exclusive room The median number of rooms is 2 for the total households in the towns status of owned category

There are 17247 scheduled caste households accounting for 6 8 percent of the total households dwelling in owned houses and the median number of room is two There are 163120 scheduled tribes households accounting for only 66 4 percent of the total households dwelling in owned houses and the median number of rooms is 2

There are 9269 households accounting for 3 6 percent of the total households of the district dwelling percent of the total households of the district dwelling in rural houses The proportion of households dwelling in the room is the highest (39 4%) where as it the lowest (0 9%) dwelling in no exclusive room There are 599 scheduled caste households accounting for 6.5 percent of the total households dwelling rented houses and the median number of room is two There are 4265 scheduled tribes households accounting households accounting for 46 0 percent of the total households dwelling in rented houses and the median number of room is two

Similar trend can be observed in respect of households dwelling in the status of other

TABLE-49

It would be seen from the above table that of the total rural households maximum proportion of households i e 0 4 percent living in temporary house followed by 7 2 percent living in semi permanent houses

In the case of urban households in the district, however the maximum proportion of households i e for 50 8 percent live in permanent houses followed by 0 3 temporary houses and 48 9 percent in semi permanent houses

Among the C D Block in the district Sisai, judge and Bano has the maximum proportion of rural household living in temporary house (1 0%) followed by Simdega (0 9%) and Gumla (0 5%) other C D Blocks have the minimum proportion of households living in temporary houses with 0 1 percent in case of permanent houses Kolebira C D Blck has the maximum proportion of households living in permanent houses (16 0%) followed by Jaldega, Thethaitanger, Simdega, Basia, Kurdeg, Bano, C D Blocks have higher than the district 12 1,9 5.9 4,9 3,9 0 and 8 5 percent Dumri C D Block has minimum proportion of households living in permanent houses with 3 0 percent in case of semi permanent houses, Dumir C D Block has the maximum proportion of households(96 9%) followed by Raidih ,Ghaghara, Bishunpur,Verno,kamdara,Sisai, Bolba and Chinpur , Gumla C.D Blocks are higher than the district average 96 8,96 0.95 3,95 2,95 1,94 6,94 1,94 0 and 93 5 percent

Kolebira C D Block has the minimum proportion of households having semi permanent houses with 83 9 percent

TABLE-50

Shows that of the total households 243689 households 95 3 percent have improved drinking water facility The highest proportion of households with improved drinking water facility can be observed in Chainpur C D Block with 23 1 percent where It is lowest in Raidih C D Block with 5 8 percent

As regards electricity is found that only 2 8 percent of the rural households in the district have electricity The highest proportion highest proportion of households with electricity is in Kolebira C D Block with 7 1 percent where as it is lowest in Bolba and Dumri C D Block with 0 1 percent and Bano C D Block has do not electricity facility

Only 2 0 percent to the total rural households in the district have bathroom facility The highest proportion of households having bathroom facility is in chainpur C D Block with 3 8 percent where as it is lowest in Bolba C D Block with 0 8 percent

Only 3 6 percent of the rural households district have toilet facility The highest proportion of households having toilet facility is in Sisa C D Block with 6.5 percent where as it is lowest in Simdega C D Block with 1 7 percent

Only 10 3 percent of the rural households in the rainage facility the highest proportion of households having drainage facility is in Gumla C D Block with 18 6 percent where as it is lowest Thethaitangar C D Block with 5 3 percent

TABLE-51

Above shows that 96 3 percent of the total households in the district use firewood as fuel for cooking The highest proportion of households using firewood as fuel for cooking is in Palkot C D Block (99 0%) where as it is lowest in Verno C D Block with 88 9 percent

2 2 percent of the rural households in the district use crop residue as fuel for cooking among the C D Blocks, the highest proportion of households using crop residue as fuel for cooking is (8 0%) percent in Verno C D.Block where as it is lowest (0.3%) in Bolba C D Block 0 3 percent of the rural household in the district use cow dung cake as fuel for cooking Among C D Blocks the proportion of households using cow dung cake as fuel for cooking is highest (1 3%) in Verno C D Block where as it is lowest (0 1%)in Sisai and Bano C D Blocks the proportion of households using cow dung cake as fuel for cooking are nil in Bishunpur, Kamdara, Bnasia, Chainpur, Dumri, Raiidih, Palkot, Kurdeg, Bolba, Thethaitenger, Kolebira and Jaldega C D Blocks

In case of cooking gas (LPG) there are only 4406 households accounting for 1 7 percent of the total households in the district using it for cooking As regards Kerosene there are only 950 households accounting foi 0 4 percent of the total households in the district using it for cooking Similar trend can be observed in respect of other types of fuel

TABLE-52

It would be seen from the table above that there are 56452 households accounting for 22 1 percent of the total households in the district availing banking services In this regards the highest proportion of households can be observed highest, proportion of households can be observed in Gumla C D Block (29 1%) where as the same is lowest in Kamdara C D Block (14 1%) There are 7160 4 households accounting for 28 0 percent of the total households in the district passing radio /transistor In the regard the highest

proportion of households is in Gumla C D Block (34 5%) where as it is lowest in Jaldega C D Block (22 0%)

12042 households accounting for 4 7 percent of the total households in the district passes television in this regards the highest proportion of households is in Gumla C D Block(15 1%) where as it is lowest in Dumri and Balba C D Blocks(1 2%) As regards telephone there are only 3056 households accounting for only 1 2 percent of the total households in the district availing telephone services In this regards the highest proportion of households is in Gumla C D Block (4 3%) where as it is lowest in Kurdeg C D Block (0 1%)

144708 households accounting for 56 6 percent of the total households in the district passes bicycles in this regards the highest proportion of households is in Thethaitangar C D Block (63 8%) where as it is lowest in Bishunpur C D Block (35 3%)

Similar trend can be observed in respect of other specified assets

STATEMENT- 2

Data source Census of India 2001, H-series Tables on Houses, Household amenities and Assets

'Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is comsidered as having access to 'Inproved drinking water source' However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note Percentage is to be given in brackets after the number of households

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage menas closed and open drainage

TABLE 51 : NUMBER AND PERCENT OF HOUSEHOLDS BY TYPE OF FUEL USED FOR COOKING, 2001

ANALYTICAL NOTES ON ANNEXURES II – VIII

Mortality levels

Information on the question on children ever born and children surviving convassd for all ever married women during 1991 census has been compiled by age of the mother Estimates of child mortality thus worked out are presented in Annexure II below

Annexure II

From the estimates of child mortality (Number of deaths by ages 1, 2, 3 and 5) given in Annexure II as q(1), q(2), q(3) and q(5), it is observed that there has been decline in child mortality over decade (in 1991 census as compared to 1981 census) both in the state and the Gumla district except for q(2), contrary to general declining trend in child mortality over the decade between 1981-1991, mortality at age 2 in Gumle district increased from 108 in 1981 to 113 in 1991 An interesting feature which can be noticed from the annexure is that the child mortality at ages 1, 2, 3 and 5 was higher in the district compared to the state average at the time of 1991 census which in 1981, the child mortality at ages 2, 3 and 5 was lower in the district, compared to corresponding state averages This indicates that the pace of decline in child mortality has been faster in the state as a whole but Gumla district could not comp with the other districts of the state in arresting child mortality between 1981-1991 Instead of declining the child mortality at age 2 increased in the district in 1991 as compared to 1981

Annexure III

Some fertility measures for Gumla district and the state of Bihar are furnished in above annexure III

It can be seen from fertility data presented above that fertility measures such as Crude Birth Rate (CBR), Total Fertility Rate (TFR), Total Marital Fertility Rate (TMFR) and General Marital Fertility Rate (GMFR) are higher in Gumla district than the state as a whole in 1991 census On the other hand General Fertility Rate (GFR) is lower in the district compared to state average

The child woman ratio is found to be lower in Gumla district compare to the state average Number of children ever born per woman in age-group 45-49 in Gumla district is slightly higher compared to the state The mean age at marriage of females in the district of Gumla is higher compared to the state of Bihar a whole

The growth of population in any area (be it any district or state) is influenced due to effect of migration (in migration as well as out migration) However for want of data on out migration from district or state to other districts or other states of the country and to other countries it might not be possible to correctly assess the net impact of the migration on growth of population although such impact may not be much in most of the cases The percentage distribution of migrants by place of birth according to 1991 census is furnished in Annexure IV(a) below

Annexure IV(a)

Migrants by place of birth are 213 07 lakhs in Bihar state as a whole comprising 23 4 lakh males and 189 6 lakh females These migrants constitute 24 67 percent of the total population in the state according to 1991 census The proportion of male and female migrants is approximately 5 and 46 percent respectively

In Gumla district total migrants by place of birth are 3 lakhs of which male migrants are 31 thousand while female migrants are 2 69 lakhs The migrants in Gumla district comprise Percent of the total population of the district Male and female migrants accounted for and Percents respectively of the total population of Gumla district

From the distribution of total migrants in Bihar by place of birth it can be clearly seen that females predominate in intra district migration, while makes predominate in inter district, interstate and international migration On the other hand, in Gumla district a quite reverse trend is noticed In the district females predominate in intra district, inter district and interstate migration In case of international migration only males outnumber female migrants This probably indicates that migration of females from their place of birth is generally attributed to the prevailing custom of the girls moving away on marriage from their place of birth International migration is little in number both in case of males and females

The flow of migrants generally consist of four streams viz- rural to rural, urban to urban, rural to urban and urban to rural The rural and urban composition of internal migrants by place of birth according to 1991 census is presented in Annexure IV(b) below

Annexure IV(b)

Of the total intra-state migrants in the state 82 56 percent were rural to rural, 3 07 percent were from urban to urban, 12 15 percent were from rural to urban and 1 87 percent from urban to rural In case of Gumla district, of the total intrastate migrants 92 71 percent were from rural to rural, 1 30 percent were from urban to urban, 3 82 percent were from rural to urban and 1 95 percent from urban to rural

The number of migrants in the state who were born in other states of India according to 1991 census was 10 5 lakhs while in the district of Gumla the corresponding figure was 18610 only as shall be evident from annexure IV(c) below

Annexure IV(c)

It transpires from the above annexure that in case of Bihar 9 states, namely, Andhra Pradesh, Assam, Haryana, Madhya Pradesh, Orissa, Punjab, Rajasthan, Uttar Pradesh and West Bengal together account for 9 80 lakh (93 38 percent) of the 10 5 lakh interstate migrants, West Bengal and Uttar Pradesh states are prominent among their contributing 39 88 and 30 69 percent of migrants respectively In respect of Gumla district, of the total 18610 interstate migrants Madhya Pradesh alone has contributed 39 12 percent West Bengal and Uttar Pradesh contributed only 3 92 and 2 04 percentages respectively

Religion

The Indian census has always attempted to give a realistic and interesting picture of the religious persuasions of the people of the state While collecting information on religion at the time of census, the enumerator had clear instructions to record the religions as actually returned by respondents Six religions have been treated as major religions as they are numerically prominent These are Hindus, Muslims, Christians, Sikhs, Buddhists and Jains Those not belonging to any of these religious communities have been classified under the category "other religion and persuasions" while those who did not state any religion have been classified under the category "religion not stated"

Annexure V(a) below presents religionwise data of the state of Bihar and Gumla district alongwith their percentage distribution according to 1991 census The religionwise data of the C D Blocks of Gumla district has also been furnished

Annexure V(a)

Annexure V(b)

It can be observed that Hindus are by far the numerically most important religious communities as it accounts for as much as 82 42 percent of the state population and 42 90 percent of the population of Gumla district The Muslims came next with 14 81 percent of the state population The percentage of Muslims in Gumla district is only 3 01 percent of the population while Christianity is the second most important religion in the district with 32 54 percent of the district population 21 53 percent of Gumla district population follow other religions and persuasions viz – other than 6 major religions as explained above Only 1 67 percent of the state population on the other hand follow "other religions and persuasions" The proportion of Sikhs, Jains and Buddhists in the state as well as in Gumla district is very low or negligible The same situation prevailing in Gumla district also more or less prevail in most of the C D Blocks of the district

Marital Status

Annexure VI(a), VI(b), VI(c) and VI(d) placed below furnish relevant statistics on marital status of Gumla district and Bihar state according to 1991 information collected during 1991 census along with the percentage distribution by various age-groups

Annexure VI(a)

Annexure VI(b)

Annexure VI(c)

Annexure VI(d)

It is quite apparent from annexures above that Gumla district as well as the Bihar state have a relatively higher proportion of "never married" males and "married" females This may be attributed to the fact that women get married at younger ages than males As against 5423 and 54 76 percentages of never married males in Bihar state and Gumla district respectively, the corresponding proportion among females is 45 21 and 48 40 only There is much difference is situation in Gumla district as compared to Bihar state as a whole Gumla district has a comparatively higher proportion of male and female widowed than state average as per 1991 census data

While analyzing marital status by broad age groups are finds that married females outnumber married males in the age group 10-14 both in Gumla district and in the state as a whole, suggesting that child marriage among females is more prevalent than in males However, the interesting feature which can be noticed is that the proportion of married males and females in the age group 10-14 is comparatively far less in Gumla district as compared to the state average

It is also significant that the proportion of "never married" females in the age-group "15-19 and above" is much lower than the "never married" males in Gumla district as well as in the state as a whole The proportion of "Divorced or separated" males and females is significantly low in Gumla district as also in the state, but it is on higher side in the district as compared to state average

Literacy

One of the important characteristics of the population on which information is collected in the census is literacy Apart from collecting data on number of literacy the level, nature and type of education attained by the literates are also ascertained The concept of literacy adopted in the census has already been explained in the beginning of this publication

A proper index to the extent of literacy is provided by the proportion of literate and educated persons to the total population The literacy r ate for Bihar (excluding the population in the age group 0-6 years) at the time of 1991 census was 38 48 Male literates greatly out numbered female literates as the literacy rate for males according to 1991 census was 52 49 while for females the literacy rate was only to the extent of 22 89 percent That is to say for every 15 male literates there were only 6 female literates

The overall literacy rate for the district of Gumla, according to 1991 census, was only percent Male literates in the district accounted for percent while female literates constitute only percent, of the total population The literacy rates for males and females in Gumla district are higher/lower than the corresponding figures of Bihar state

Annexure VII(a) and VII(b) presented below furnish information regarding also but number of illiterates and literates and educated persons in Bihar state and Gumla district an also percentage distribution of literate persons by different level of education by different age groups

Annexure VII(a)

Annexure VII(b)

A breakup of literate population by various educational levels shows that 20 29 percent males and 27 16 percent females in the state are such who are literate but without attaining any educational level 21 63 percent and 21 20 percent males and females in the state, according to 1991 census, have crossed the primary or junior basic standard, 26 38 and 26 90 percent males and females have passed the middle examination while 31 70 and 19 73 males and females in the state are such who are matriculates and above The contrast between males and females is significant among matriculates and above as the percentage of female literates who have passed the matriculation and above examination

are 12 percentage points less than male literate population who have attained this level education

The position of literates by different level of education in Gumla district, according to 1991 census is more or less the same as observed for Bihar state as a whole

Language Spoken

Language in an important attribute of population The census of India has been the richest source of language data collected and published during the successive decennial censuses over a century In the 1991 census, as in the previous censuses the mother tongue as returned by each individual was collected

Annexure VIII(a) placed below presents distribution of different mother tongues (scheduled languages) as returned during the 1991 census for Gumla district as well as for Bihar state

Annexure VIII(a)

It can be seen from the above annexure that speakers of the scheduled languages constitute the major proportion of the population in Gumla district as well as in the state of Bihar Hindi, the main mother tongue of the state, has been returned by 80 86 percent of the state population while in Gumla district only 54 67 percent of the total population have returned Hindi as mother tongue which is far lower than the state average Urdu is the second most prominent language spoken in the state by 9 89 percent of its total population On the other hand, Urdu is spoken by only 1 74 percent of the total population of Gumla district which 8 percentage points less than the state average Speakers of Oriya language constitute 0 32 percent of the total population of the district which is lower than the state average being 0 47 percent Bengali speakers constitute 0 09 percent of the total population of Gumla district which is lower than the state average

being 2 92 percent The speakers of all other scheduled languages taken together comprise meager 0 09 percent of the district population

Community Development Blockwise distribution of different mother tongues in the district of Gumla can be seen from Annexure VIII(b) furnished below

Annexure VIII(b)

It transpires from above that Hindi is the most prominent language spoken in different C D Blocks followed in most cases by speakers of Urdu In C D Blocks speakers of Oriya or Bengali language occupy second place after Hindi An interesting feature which one can notice is that the speakers of Urdu accounts for only 1 74 percent of the total population of the district Gumla Municipality and Simdega Notified Area have 15 24 percent and 12 89 percent speakers respectively which is even higher than the state average as a whole The proportion of speakers of all other languages (except Hindi, Oriya, Bengali and Urdu) is almost negligible in some cases and even nil in certain C D Blocks of Gumla District

....
