VILLAGE & TOWN DIRECTORY

VILLAGE AND TOWNWISE PRIMARY CENSUS ABSTRACT

लोकाभिमुख
PEOPLE ORIENTED

Manoranjan Saran
of the Indian Administrative Service
Director of Census Operations, Orissa

The maps included in this publication are based upon Survey of India map with the permission of the Surveyor General of India.

The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line

The interstate boundaries between Arunachal Pradesh, Assam and Meghalaya shown in this publication are as interpreted from the North-Eastern Areas (Reorganisation) Act, 1971 but have yet to be verified.

The State boundaries between Uttaranchal & Uttar Pradesh, Bihar & Jharkhand and Chhatishgarh & madhya Pradesh have not been verified by government concerned.

Lalitagiri

The ancient seat of Buddhist learning in the form of an university "Puspagiri", which finds mention in the travelogue of Huien T'sang of seventh century A.D. is excavated at Lalitagiri. Here lies the ruins of past glory and heritage of ancient Buddhist culture of the state, which flourished and later transmitted to far-flung places in Far-East and South-East Asian countries from here. The search for the magnificent Stupa as mentioned in the travelogue on the top of a hill at "Puspagiri Mahavihar" which emitted brilliant light because of its sacredness is still on.

The Chaitya hall, number of votive stupas and a renovated stone stupa at the apex of a small rugged sand stone hill are clear testimony of the presence of ancient monastery here. This monastery was a huge brick construction.

The Mahayan sculpture consisting of colossal Buddha figures, huge Bodhisattva statues, Tara, Jambhala etc. were excavated here and are presently displayed in the nearby museum. Most of the sculptures excavated here contain short inscription on them. The influence of Gandhara and Mathura school of art are clearly seen on the standing Buddha figure with knee length draperies over the shoulder. Lalitagiri sculptures contain the vivid influence of Gupta art-tradition. This place can be approached from Chandikhol which is 17 kms. away and 55 kms. from Cuttack.

Annexures :

Annexure I - Number of Villages under each Gram Panchayat (CD Blockwise) 809

Annexure II - Fertility and Mortality, 1991 Census 816

Annexure III - Various measures of Fertility and Mean age at Marriage,1991 Census 816

Annexure IV - Percentage distribution of migrants by place of birth/ place of last residence, 2001 Census 818

Annexure V - Brief account of main religions in the district as per 2001 Census 819

Annexure VI - Marital Status of population as per 2001 Census 820

Annexure VII - Age, Sex and Education in the State and District, 2001 Census 821

Annexure VIII - Distribution of different mother tongues returned in 2001 Census 824

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centers, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible village in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

The 1991 census DCHB, by and large, followed the pattern of presentation of 1981 census, except the format of PCA was restructured. Nine-fold industrial classification presented in the 1981 census. In addition, sex-wise population on 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being lowest administrative unit.

The present series of 2001 census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college),

medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums". The information is given in case of all statutory towns irrespective the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Manoranjan Saran, Director of Census Operations, Orissa. Thereafter, effort have been made to ensure comparability of the information with that of 1991 census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General (C & T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K.Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

D.K.Sikri
Registrar General &
Census Commissioner, India

Preface

The District Census Handbook (DCHB) brought out by the Census Organisation after each Census is one of the most valuable and important publications providing grass root level data in order to cater to the needs and aspiration of the people at large. The publication is compiled and prepared for each district of the state by the Census organization on behalf of the State Government. It not only contains the numeric figures relating to the people in villages and towns but also gives a clear picture on the quality of their life. These publications are widely used by the State Government functionaries at the district level as well as other levels for planning, development and administrative purposes in addition to a large cross-section of data users, academicians, scholars, researchers and other non-governmental agencies who derive maximum utility of these publications. The Registrar General & Census Commissioner, India in his foreword has highlighted the improvements in the publication brought out from time to time since its inception.

As per 2001 Census publication programme, it has been proposed to publish the District Census Handbook in two parts i.e. Part A – Village and Town Directory and Part B – Village and Town Primary Census Abstract. Part A of the publication contains information on basic amenities available to the villagers and land use data supported by a number of tables and its analysis on non-census data for villages and towns. Part B of the publication on the other hand contains details census data for villages and towns in the form of Primary Census Abstract. The contents and coverage of the publication have been designed in a uniform manner by the Registrar General & Census Commissioner, India. By and large, the manner of presentation of DCHBs of the 2001 Census is similar to the 1991 Census. However, the publications have been made more informative and exhaustive keeping at par with the changes in socio-economic scenario of the nation and the requirement of the data users. It is hoped that the publication would be helpful to the planners, administrators in formulating micro level developmental planning.

The collection and compilation of such a huge data was indeed a formidable task requiring crusader's zeal on the part of different functionaries. Information on amenities and land use data for Village Directory has been collected from the Tahsildars while the Chief Executive Officers of the Municipal Corporations and Executive Officers of the Municipalities and Notified Area Councils have provided the information for towns. Data collected as such have been cross-checked with the help of the official data collected from various Departments/Organisations like Reserve Bank of India, Department of Post, Government of India, Directorate of Health Services and Directorate of Indian System of Medicine & Homeopathy, Directorate of Higher Education etc; Government of Orissa. Though all types of efforts have been taken for removal of discrepancies in the figures, yet the possibility of some error still creeping into them cannot be altogether be ruled out.

Till 1991 Census, The Director of Census Operations had the responsibility for providing data whereas its publication was the responsibility of the State Government. However, this time the publication is being brought out by the Govt. of India. The publication will also be made available for the first time in electronic format to the numerous data users.

I express my deep gratitude to Shri J.K. Banthia, IAS, Registrar General & Census Commissioner, India, Shri R.G. Mitra, Deputy Registrar General (C & T) and Dr. I.C.Agrawal, Sr. Research Officer of Social Studies Division and other officers of the Registrar General's office for their valuable guidance in preparing this volume.

I am grateful to the departments of the Govt. of Orissa, Heads of Departments, Collectors and other district officers, Tahasildars, Block Develoment Officers, Chief Executive Officers and Executive Officers of the towns who have extended their cooperation and help for collecting such voluminous and useful data. I am also grateful to the authorities of Reserve Bank of India and Postal Department for providing requisite data.

I would be failing in my duty, unless I acknowledge the important role played by my colleagues, who have been associated with the project one way or the other, for their sincere efforts to bring out this publication.

Manoranjan Saran
Director of Census Operations,

District Highlights - 2001 Census

1. Jajapur is the 24th district in terms of size and 7th in terms of population.

2. Jajpur is the 29th urbanized district in the state having about 4.49 per cent of its population live in urban areas while about 14.99 per cent of states population live in urban areas.

3. In terms of population per Sq. Km. Jajapur is 4th densely populated district in the state.

4. Jajapur has 18th rank in terms of sex ratio in the state.

5. There are only 203 uninhabited villages in the district of which 12 villages are having a population of more than 5000 each.

6. Brahmabarada in Dharmasala Police Station is the most populated village (8,515) in the district.

7. The economy of the district is mainly dependent upon cultivation. Out of each 100 workers in the district 56% are engaged in agricultural sector.

8. Dharmasala police station is having the highest number of villages (444) in the district whereas Jajapur Road police station is having the lowest number of villages (44) in the district.

(XXVII-XXVIII)

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The Census of India has all along endeavoured to maintain its tradition of feeding the people with reliable statistical information through its various publications. The District Census Handbook is one of such publications which in real sense, is the mirror of Census reflecting the demographic features and infrastructural development of the villages and towns in the district and thereby facilitating the formulation of realistic plan in order to cater to the needs and aspirations of the people at large. The genesis of this publication being after the conduct of the 8th decennial Census in 1951 and the first in the post independence era, its contents and coverage have undergone tremendous changes over the period keeping at par with the changes in socio-economic scenario of the nation and the requirement of the planners, scholars, data users, administrators and others. The publication is a veritable mines of information providing a clear picture of population in both quantitative and qualitative terms up to the grass-root levels, i.e. about the villagers and town dwellers.

This document was brought out for the first time as an auxiliary to 1951 Census as a joint venture between the Government of India and the State Government. The initial arrangement of supply of data by the Census Organisation of the Government of India and converting them into published documents by the State Government was continuing till 1991 Census. In 2001 Census, the publication of this document has been carried out by the Census Organisation. Apart from giving the rural statistical information, it readily gives a complete list of villages contained within a police station and district in an exhaustive manner and becomes very resourceful for the users. In order to make the data component more illustrative, maps of the district, tahasils, C.D. Blocks and police stations are also inserted in the publication.

As per the 1951 publication programme, the DCH was published in one volume and did not contain information given in the Village and Town Directory. Apart from this the brief introduction of the district, general features, density map, prescribed tables for general population, economic tables, social and cultural tables and village statistics were provided. The Primary Census Abstract was given under the heading "Village Statistics". However, the information on village-wise list of displaced persons and information on Small Scale Industries were presented in the 1951 DCH volume.

The District Census Handbook – 1961 was also in one single volume just like 1951 publication. However, it contained some modifications i.e. this volume was divided into three parts – i) the first part contained the introduction of the district, ii) second part contained the census tables and iii) the official statistics were given in the 3rd part. The village-wise Primary Census Abstract (PCA) under the heading of "Village Directory" was included in the second part. Additional information on village-wise list of industries and tables on fairs and festivals were presented in 1961 DCH.

The District Census Handbooks of 1971 Census were published in three volumes: i) Part-A containing the data on amenities; ii) Part-B incorporating the Primary Census Abstract (PCA) and iii) Part-C giving administrative statistics and Census tables. The first two volumes of the DCH, i.e. Part A and Part B for the 1971 Census could be published within the time schedule and catered to the needs of the data users. However, difficulties were experienced in collecting administrative statistics from various offices for the preparation of the 3rd volume of the DCH i.e. Part C and its printing. This volume could be published ultimately after much delay. The idea of bringing out the publication of the 3rd volume of the District Census Handbook containing information on administrative statistics, etc. was dispensed with effect from the subsequent censuses.

The District Census Handbook for 1981 Census was published in two parts i.e. Part A – included

Village and Town Directory and Part B - presented the Primary Census Abstract (PCA) including Scheduled Castes and Scheduled Tribes Primary Census Abstract up to police station/town levels. By and large, the contents of the Village and Town Directory of 1981 Census were almost, similar to those adopted during 1971 Census, baring a few changes necessitated by the requirements of the planners and data users.

The District Census Handbook of 1991 Census was of the same pattern of 1981 Census. Part-A of the DCH contained statistics of Village and Town Directory and Part-B included data on Village and Town-wise Primary Census Abstract including Scheduled Castes/Scheduled Tribes Primary Census Abstract. However, the DCH publication of 1991 Census exhibited the following novel ideas so far as the presentation of data of these publications were concerned.

i) Village Directory data and Primary Census Abstract were presented C.D Block wise having separate identity of constituent police stations within a block. The villages coming under different police stations but within the same C.D. Block were shown separately so as to facilitate comparison with that of previous publications.

ii) Both manual and computerized location codes of various villages were shown separately for 1981 and 1991 Censuses in alphabetical order for the convenience of the data users.

iii) In case of both the Village and Town Directories, the objectives of the various columns and the connotation of various observations used therein were explained in the relevant sections.

iv) Nine-fold industrial classification of main workers were presented instead of four-fold industrial classification presented in the 1981 Census publications.

v) The sex-wise population under the age group 0-6 was included in Primary Census Abstract for the first time in order to enable the data users to compute more realistic literacy rate as all children below 7 years were treated as illiterate.

vi) Tahsil and Police Station maps in the publication showing the village and town boundaries also depicted the C.D. Block boundary for the convenience of the readers and data users etc.

The Census of India-2001 follows the same pattern of 1991 Census in publishing the DCHB for each district. The DCHB Publications contain 2 parts, i.e.; Part 'A' containing statistics on village and town directory and Part 'B' containing data on village and town-wise Primary Census Abstract including Scheduled Castes/Scheduled Tribes Primary Census Abstract. Like 1991 Census, the village level information for both parts of District Census Handbook volumes have been presented C.D. Block-wise.

The Census of India-2001 has introduced the eight digited permanent location code (PLC) for each and every village, which has run continuously for the entire State starting from the 1st village of the 1st police station of the 1st district of the State to the last village of last police station of the last district. The last two digits of the PLC are kept as 00 and reserved for future treatment, if any. In order to facilitate the comparability of data by the data users, the Permanent Location Codes of villages during Census of India-2001 and their corresponding location codes during 1991 Census have been shown alongwith village names under the C.D. Block-wise alphabetical list of villages.

(ii) Brief history of the district

Jajapur district is located in the eastern region of the state. It was a sub-division of the erstwhile Cuttack district and was formed as a separate district vide notification No.DRC-44/93-14218 dated 27.03.93 of Government of Orissa. Jajapur is the headquarters town of the district and abounds in many relics of the past. It is a place of pilgrimage and is popularly known as "Birajakshetra". Goddess Biraja is the presiding deity of the town as well as of the district.

Jajapur was the ancient capital of Orissa under the Bhaumakar kings and was famous for centuries

as Jajanagar and finds its place in the travelogue of the Chinese traveler Huen Tsang as a flourishing city of trade and commerce in the 7th century A.D. This place has its unique importance in India as Navigaya kshetra where pinda is offered for the salvation of the ancestors. Otherwise known as Baitarani tirtha, Jajapur is highly acclaimed in many scriptures of our country. The shrines of "Sweta-Varah" (the white bear incarnate of Lord Bishnu) and "Sapta Matruka" (the seven mothers) along with numerous shrines have made Jajapur a tirtha par excellence.

The Dasasvamedha ghat, the flight of steps leading to the Baitarani river where ten horse sacrifices were made, is a great sanctified spot for the Hinduism.

The name Jajapur is either a derivative of the name Jajnapur or Jajatapura as Jajati keshari the first Somavamsi king of Orissa, is said to have performed here a great Jajna (Dasaswamedha Jajna) and brought 10,000 north Indian Brahmins from Kanauj (in Uttar Pradesh) for this purpose who settled down holding royal grants called sasanas. The king also built a palace and held his court here. A Sanskrit verse is current at Navigaya in Jajapur at the time of offering oblation (Pinda), mentioning that the Somavamsi king celebrated Aswamedha sacrifice at Jajapur with the help of ten thousand Brahmins brought from Kanauj. The famous Chinese traveler Huen Tsang speaks of Jajnagar (Jajapur) as a great center of religious and cultural activity.

Modern Jajapur in the ancient period was known as Viraja Kshetra as it appears from the records of Bhaumakaras. This was also known as Parbati Kshetra or Baitarani Tirtha and was claimed to be an important tirtha in India. Viraja Devi and the place of Viraja Keshtra were mentioned in the Sanskrit Mahabharat to have been situated on the bank of the river Baitarani. Viraja Kshetra was the only sacred place in Kalinga, the importance of which has been extolled in the Mahabharata. In the puranic literatures also, Viraja Kshetra which is treated as synonymous to Baitarani tirtha, emerges as the chief socio-religious center in India. Its name finds place in the Kapila Samhita, Brahmananda Purana, Vayu Purana, Brahma purana, Tantra Chintamani and various old religious Sanskrit texts including Astadash Pitha Mahatmya written by Adi Sankaracharya and in the Chaitanya Charitamruta.

Leaving aside mythology and legend, it appears that a great ceremony was performed near the Baitarani river for revival of Brahminical faith as Buddhism had firm hold in the country. Puri Brahmins were brought from Kanauj to protect and to revive the Brahminical faith in northern India,and the image of Viraja Devi might have been installed in 4th and 5th centuries. Iconographic features of Goddess Viraja support such a conclusion. She is a form of two-handed Durga engaged in fighting with the demon. With her right hand she holds a sula (dagger), which pierces the body of the buffalo, and with her left hand she holds the tail of the buffalo. Lion, the usual mount of Goddess Durga, is not present.

(iii) Administrative set up

The district is formed with only one sub-division of the same name. For the sake of smooth revenue administration and maintenance of law and order, the district is further divided into six tahsils and ten police stations. For further developmental activities in the rural areas, the district is divided into ten community development blocks. There are only two towns namely Jajapur Municipality and Jajapur Road Notified Area Council and 1778 revenue villages of which 1575 are inhabited and 203 uninhabited in the district.

Jajapur district extends over an area of 2899 sq. km as per the 2001 Census and there is no change in the jurisdiction of either the district or the boundaries as the district was newly formed after the 1991 census. The area of the district forms 1.86 per cent of the total area of the state as per the 2001 census. The district ranks 24th among the districts of Orissa as far as area is concerned and 404th among the districts in India.

Location and size

The district of Jajapur extends from 85°40' East longitude to 86° 44' East longitude and from 20° 43' north latitude to 21° 10' north latitude. Bhadrak and Kendujhar bound it on the north, on the east by the district Kendrapara, on the south by the district Cuttack and on the west by the district Dhenkanal.

The district is situated on the estuary of the rivers Brahmani and Baitarani.

(iv) Physical features

This region lays between two important eastward flowing rivers of the state namely the Baitarani in the north and the Brahmani in the south. The region is a flat plain with a gradual inclination towards southeast. The southern half of the region is well irrigated by the network of these rivers. The region is devoid of forest of any kind. Coconut, bamboo, palmigra and other trees are commonly found in this region. Canal irrigation facilities are also available.

The region is developed in terms of agriculture Paddy, Wheat, Oil seeds and sugarcane are common agricultural products of this region.

Two urban centers of the district namely Jajapur Road NAC and Jajapur municipality serve the region as the nodal centers of education, commerce and administrative functions. The transport and communication facilities are fairly developed. The main railway line from Cuttack to Howrah passes through the region from South-west to north-east. National Highway No.5 passes through the district and state Highway No.20 connects National Highway No.5 and joins Jajapur Road with other parts of the country. Number of metalloid roads form a good network of communication in the district.

As far as area and population of the district are concerned, Jajapur district forms 1.86 per cent of the total area of the state and 4.4 per cent of the total population of the state as per the 2001 Census.

Drainage

Two important rivers of the state, namely, the Brahmani and the Baitarani pass through the district and form the Baitarani-Brahmani plain. The Baitarani flows in the north and the Brahmani in the south and the region is a flat plain with a gradual downward inclination.

Geology

The geology of the district is entirely of alluvium barring a small patch of unclassified gneisses including singhbhum granite, chamo quite groups (Archean) and laterites (Pleistocene). The district has mostly soils of Aqualits, Aquepts, Aquepts Aquents, ochrepts orthants varieties.

Topography

The topography of the district consists of a deltaic plain formed by the Brahmani and the Baitarani rivers and many of their distributaries some times reuniting and some times bifurcating as they pass across. During the hot weather, the upper channels of these rivers dry up and maintain thin streams, with little pools of stagnant waters for most part of their course. During the rainy season they used to overflow the banks with enormous water causing havoc to countryside and the crops.

Climate and rain fall

The climate of the district is characterized by a hot summer, high humidity nearly all the year round and invariably a good seasonal rainfall. But due to wanton destruction of forests, utter uncertainty prevailed upon the seasonal rainfall since some years causing colossal loss to the kharif crops, which is completely dependent upon rain.

Normally the cold season starts from December and continues till the end of February followed by the hot season from March to May. The period from June to September constitutes the south-west monsoon season. The period from March to May records steady rise in temperature and May is usually the hottest month with the mean daily maximum temperature of slightly more than 38°C. After the 1999 super cyclone, the temperature during May and June has gone up to more than 45°C. December is the coldest month of the year with the mean daily maximum temperature of 30.6°C and the mean daily minimum temperature of 12.5°C during 1999.

The average rainfall in the district is 231 mm during 1999. The rainfall generally decreases from southeast to northwest. The rainfall during south-east monsoon months namely June to September constitutes about 75 per cent of the annual rainfall of the district

Relative humidity is generally high throughout the year. Winds are generally light and occasionally tending

to be moderate. Most of the depressions and storms originating in the Bay of Bengal during the monsoon season and moving towards westerly directions cause heavy rainfall.

Crops

The major crops of the district are paddy, wheat, maize, Mung, Biri, Arhar, Groundnut, sesamum, caster, mustard, sugarcane and potato. The important fruit crops are coconut, mango, and banana. Among fibre crops, jute and mista are grown in the district.

Condiments & spices

Chili, coriander, garlic, ginger, Onion, turmeric constitute the main condiments and the spices grown in this district. Chili is the most important.

Vegetables

The main vegetables cultivated in the district are potato, sweet potato, brinjal, lady's finger, pumpkin, spine gourd, kunduru, cauliflower, cabbage, etc. The farmers of the district mostly adopt different fruits like papaya, banana, pineapple, guava, mango and jackfruit.

Rotation of crops

Keeping in view of the suitability of land, irrigation resources, restoration of soil fertility, and socio-economic status of the farming community, suitable cropping patterns are advocated for better utilization of land, labour, water and capital. In irrigated condition, three to four cropping pattern and in un-irrigated lands two or rarely three crops cropping pattern have been adopted. The farmers have been advised to grow short and medium duration high yielding varieties of paddy, oil seed, pulses under irrigated conditions and paddy-pulses (Pair) and paddy-mustard in non-irrigated conditions. In improved method of cultivation with short duration high yielding varieties like early paddy-pulses-wheat, early paddy- ground nut pulses, jute-paddy-ground nut, jute-paddy pulses cropping patterns are in vogue in the district.

Flora

The district comes under the cultivated plains and the flora or the plant varieties in the district is very rich and numerous. A large variety of economically important plants are cultivated in the district. The usual rice field weds are Ammannia species, Lindernia parviflora, Dopatrium junceum, utricularia coerulea, vtricularia retculata, sphenoclea zeylanica, Hygrophila species, Memosa pudica, etc.

The species generally found in waste lands away from villages are jatropha Gassypipholia (Gaba), Annona squamosa (Ata) Argemone mekicana (Odasmari), Aegle marmelos (Bel), parkin sonia aculeate, Memosa pudica (Lajkuli), Datura metal (Dhutura), etc.

The common orchard trees are mango, jack fruit (panas) and guava, less common are cashew, Dillenia Indica (Aau), Drangi, lemon etc. Cocos nucifera (Coconut) are extensively planted in the district.

Among the hedge plants, the most common are Nerium odorum (Kaniar), Duranta repens, Lawsonia inermis (Mehendi), etc. In the backyards Moringa pterygosperma (Sajna) trees, Musa paradisiacal (Gren plantain), Musa sapientum (Banana) are quite common. The bamboos, Bambusa tulda and Bambusa nutans are widely planted along the fences.

Fauna

As the district is devoid of any forests, wild animals are no longer seen in the district except probably a few jackals, (Canis aureus) foxes, (Vulpes bengat ensis) cats, monkeys (Macca Mulatta).

Among the reptiles Godhi or monitor lizard (varanus majutor), though rare, are found in the bushes in the villages. The chameleon (Chameleon zeylanices) is a very common reptile found in wooded areas almost everywhere.

Different varieties of snakes are found in the district Among the poisonous snakes, mention may be made of cobra, naga gokhara which are quite common. The other poisonous ones are banded krait (Rana) and common krait (Chiti). The non-poisonous snakes like Dhamana (Ptyas mucosus) and Dhanda (Natrics piscator) are usually seen in the district.

Among the important birds, seasonal ducks are found in the district. Among the domestic animals, cows, oxen, goats etc. are found in good numbers in the district.

Irrigation

Floods in the Baitarani and the Brahmani and their distributaries frequently visit the vast deltaic plain of Jajapur district.

Though agriculture in this district mainly depends on rain, irrigation facilities are provided through major/ medium irrigation, minor irrigation and lift irrigation projects both for Kharif and Rabi crops. During 1998-99 kharif crops of 36,550 hectares and rabi crops of 25,110 hectares were irrigated by major/medium irrigation projects in this district. Similarly, kharif crops of 5,320 hectares and rabi crops of 1,365 hectares were irrigated by minor irrigation projects. But lift irrigation projects provided irrigation facilities to 25,710 hectares of Kharif crops and 15,430 hectares of rabi crops during this period.

Irrigation facilities at the C.D. Blocks level reveals that lift irrigation facilities for kharif and rabi crops are available in all the 10 C.D. Blocks of the district and major/medium irrigation facilities are available in five out of 10 C.D. Blocks in the district.

Foresty

Forest coverage in Jajapur district are mainly confined to a part of Sukinda, Danagadi, Korei, Dharmasala and Badachana C.D.Block and rest of the C.D.Blocks are devoid of forest, comprising alluvial plains.The forest area in the district is 725.27 sq. km. with the following classifications.

1. Reserve forest - 6.35 sq. km.
2. Demarcated protected forest - 299.32 sq.km
3. Un-demarcated protected forest - Nil
4. Un-classified forest - 0.01 sq.km.
5. Other forest - 419.27 sq.km.

(Source - District Statistical Handbook, Jajapur.)

Minerals & Mines

One of the mineral rich district of the state of Orissa is Jajapur with the distriction of harbouring the single largest deposit of chrome ore of the country. Besides chrome ore, occurences of the other minerls like iron ore, nickle ore, pyrosenite and quartzite are also found in the district with considerable potential for their exploitation. In addition to the mining sector, the district has also quite a few mineral based industries for value addition of minerals. Recent upsuing in steel sector has also given a boost to the growth of iron and steel plants in the district in a matching manner.

Area under different land utilisation in 1998-99

The land utilisation pattern at the district level shows that maximum of 154,851 hectares of land are put under net area sown followed by 40,444 hectares of land put to non-agricultural uses. Land utilisation pattern at the C.D. Block level manifests that the highest land area of 23,972 hectares is claimed by net area shown under Barchana C.D. Block in the district This category of land claims maximum hectares of land in all the C.D. Blocks of the district.

The major or the staple crop of the district is paddy and occupies sufficient proportion of the total cultivated area of the district. The season-wise area under paddy cultivation in the state reveals that 126,708 hectares of land were exploited for paddy cultivation during the winter season. This forms 80.42 per cent of the total land put under paddy cultivation in different seasons during 1998-99 followed by 21,821 hectares of land put under paddy in autumn season and only 9,028 hectares of land or 5.73 per cent only in summer season.

Season-wise area under paddy cultivation in different C.D. Blocks manifests the same pattern except in Rasulpur where maximum area under paddy cultivation is recorded in autumn season. In Korei C.D. Block 96.24 per cent hectares of land are recorded under paddy cultivation in winter season followed by 94-86 per cent in Danagadi and 94.46 per cent in Dasarathpur C.D. Block.

Season-wise estimated area; yield rate and production of paddy in the district and different Blocks, 1999.

(Area in hectares, yield rate in quit/Hect. Dry paddy with huge and production quintals)

District/CD Block	Autumn			Winter			Summer			Total

Source- Directorate of Economics & Statistics, Orissa

Though Orissa is rich in natural and mineral resources, the district has only 11 working mining units of which nine are chromite and one each of iron and quartzite ores covering 4888 hectares of land. These mining units have provided employment to 4972 persons and have exported 1175,000 metric ton ores and the approximate value was 23529 lakhs of rupees during 1998-99.

This apart, there are 142 small scale industries 2083 cottage industries located in the district. The small scale industries generated employment opportunity for 648 persons in the district during 1998-99. Similarly, the number of cottage industries in the district have generated employment for 3545 persons with a capital investment of Rs.236.08 lakhs during this period.

Ferro-chrome plant Jajapur Road:

The ferro chrome plant set up at Jajapur Road with a licensed capacity of 10,000 mt of low carbon ferro-chrome (L.C.F.C) was commissioned in 1969. Ferro-chrome is an alloy of iron and chrome and is used in manufacture of stainless steels and special steels. Since its establishment, the plant has exported ferro-chrome valued Rs.157. million to countries like U.S.A., Japan, Italy, Korea, Australia, Rumania and Philippines. The plant provides employment to 687 persons directly. The present annual net turn over of the plant is Rs.300 million approximately.

Animal husbandry

Animal husbandry forms an integral part of rural economy. As per the 15th quinqunnial census held in 1995, there were 325,759 cows of which 7,253 were cross breed and 318,506 were indigenous in the rural areas of the district. Similarly there were 11,901 buffaloes of which 4,219 were males and 7,682 were females. Besides, there were 44,031 sheeps, 201,897 goats and 6,539 pigs in the district. Among the fowls, there were 362,307 deshi and 25,843 improved varieties in the district.

There are 19 veterinary hospitals and dispensaries, 119 live stock aid centers and 50 artificial insemination centers functioning in the district to cater to the health needs of the livestock animals in the district.

Live stock and Animal Husbandry, quinquennial Livestock Census, 1995

Category	Jajapur District

Fishery

Pisciculture is one of the important economic activities of the people of Jajapur district. Among different varieties of fish, namely, fresh water, brackish water, marine etc. produced in the state only fresh water fish is produced in the district because the district is located far away from the sea. During 1998-99, 6332 metric tones of fresh water fish were produced in Barchana CD Block. In all other CD Blocks of the district, this production varied between 607 metric tones to 699 metric tones.

The provisional population of the district is 1,62,4341 as per the 2001 census and forms 4.42 per cent of the total population of the state and ranks seventh among the districts of the state and as per the present jurisdiction, the population of the district was 13,86,177 in the 1991 Census and the district records 17.18 growth rate during 1991-2001 as against 15.94 percent of the state. Though the district ranks 24 among the district as for as area is concerned the density of population is 560 and ranks four in the state and the first and the third position go to Jagatsinghpur and Cuttack districts respectively and the second position is claimed by Khordha District.

The per cent of literates to total population constitutes 72.19 in the district as against 82.69 percent among males and 61.45 per cent among females. And the proportion of literate persons, males and females in the district is moderately higher than that of the state as per the 2001 census population.

Transport and Communication

Transport and communication facilities play an important role in the development of any region. The nature of road facilities in the district refers to the availability of national highways, state highways, major district roads, and other district roads etc. Among this network of roads, the National Highways are considered as main lifeline of the nation which connect the state capital along with the places of national importance and the National High way 5 passes through Jajapur district.

The state highways are the arterial roads of a state which connect the national highways or highways of neighbouring states, district headquarters and important urban areas of the state. The state highway No.11 (Panikoili-Kendujhar road) starts from the N.H. No.5 at Panikoili and passes through the industrial town of Jajapur Road and reaches the border of Kendujhar district.

Major district roads usually connect important places of trade and connected with railways, state highways and National Highways.

There are in all 74 kms of National highways, 39 kms of state highways, 115 kms of major district roads and 270 km of other district roads available in the district.This apart, 2656 kms of Gram panchayat roads, 96 kms of classfied village roads and 889 kms of village roads are existing in the district during 1998-99.

Adequate transport and communication facilities help the development of regions. In this connection, it is seen that motor vehicle registered in Jajapur district as on 31.3.1999 numbered 15,563 motor cycles, scooters and mopeds as against 314 three wheelers and auto rickshaws, 270 jeeps, 434 private cars, 245 taxies, 434 contract carriages, 3,445 trucks and lorries, 890 tractors and tailors and 863 miscellaneous vehicles.

Communications

As on 31.3.1999, the post offices in the district numbered 302 of which 241 were branch post offices, 60 sub-post offices and only one head post office. The head post office is located at Jajapur Municipality. Among 60 sub-post offices, four each are located in

Jajapur (M) and Jajapur Road (M). All the branch post offices are in the rural areas.

Telephone connections

Telephone is one of the important modern communication facilities. In this connection, it may be mentioned here that there are electronic telephone exchanges with 9690 exchange capacity providing 7859 telephone connections as on 31.3.1999.

Railway

As regards railway communication, there are 88 kms of railway routes in district of which 33 kms are single line broad gauge and 55 kms of double line broad gauge routes.

Water ways

The government of Orissa has provided 15 powerboats and are placed at the disposal of sub-collectors. These powerboats are kept at vulnerable points for the purpose of flood relief and resource operation. These are not used in ferry ghats for daily passenger services.

There are quite a good number of ferries in the district. They mainly transport a few persons and light vehicles only from one bank to the other of a river.

SC/ST welfare schemes in the district

Scheduled tribes and scheduled castes are the most vulnerable section of the society. In order to uplift them a number of pragmatic socio-economic welfare programmes have been launched at the grass root level by the state Govt. as well as by non-government organization to fulfill the needs and aspiration of the people of the section. Such welfare programmes include, ITDA (Integrated Tribal Development Agency), MADA (Modified Area Development Approach), DTDP (Dispersed Tribal Development Programme), Micro projects and clusters. All these welfare programmes were implemented in scheduled tribe infested areas where they constitute more than 50 per cent of the total population of the area concerned.

ITDA

This integrated tribal development agency functions as the nodal agency for plan formulation, programme implementation and operationalisation of the tribal sub-plans (TSP) concepts in community development areas where the tribal population constitute more than 50 per cent of the total population of the area. The major objective of the agency is to implement income generating programmes, construction of school buildings, installation of drinking water wells, installation of cross drainage systems, roads, electrification, legal protection of scheduled tribes from exploitation etc. There is such agency functioning in Jajapur district. However, these projects are implemented in 12 districts of the state.

Micro projects

These projects are being implemented to raise the socio-economic conditions of the 13 specified primitive tribal groups in the state. There is no such project in the district.

MADA

Areas having minimum population of 10,000 with 50 per cent scheduled tribe inhabitants and beyond the jurisdiction of ITDA area are identified as MADA pockets. There are 46 Modified Area Development Agency pockets in the state. This scheme implements individual as well as community development programmes through special central assistance (SCA). There are in all four MADA pockets in Jajapur District. Which are detailed below.

Name of district	Name of MADA pockets	No of Villages covered in each pocket	Total population of each pocket as per 1991 Census	Total ST population for each MADA as per 1991 Census	Percent of ST population to total population
1	2	3	4	5	6
Jajapur	Sukinda-I	33	23,543	13,552	57.56
	Sukinda – II	12	14,375	14,375	51 05
	Sukinda – III	24	19,161	9,931	51.83
	Dangadi	23	24,189	13,268	54.85

Clusters

Clusters are contiguous areas having minimum of 5,000 population of which 50 per cent or more are scheduled tribes. Under this programme, community

oriented schemes and individual beneficiary schemes are implemented through special central assistance. There is no cluster programme in the district.

DTDP

The dispersed tribal development programme (DTDP) is being implemented by the Orissa SC/ST development financial co-operative Corporation LTD for the benefit of tribal families living outside the special areas like ITDA, MADA, clusters and Micro projects. This programme is being implemented to alleviate the economic condition of the scheduled tribe families in the state. But this programme is not in operation in Jajapur district.

These welfare schemes are mostly meant to augment the socio-economic condition of the scheduled tribes and scheduled centers in the state and are being implemented in districts/areas where the scheduled tribe population constitute 50 per cent or more of the total population of the areas concerned. Such programmes if implemented properly will help to improve the socio-economic condition of the scheduled population to a great extent.

Electricity and Power

As regards to consumption of electricity by different category of consumers/divisions during 1998-99 in the district, it is seen that the total consumption of electricity in the district is 872.198 million units. The domestic consumption in the rural area comes to 152.233 million units as against 30.489 million units in the urban areas of the district. The domestic consumption of electricity during 1998-99 was 37.135 million units more as compared to 1997-98.

Large industries with 132 K.V. Supply claim 101.270 million units during 1998-99 distantly followed by mini steel plants with 14.064 million units. There are no heavy industries in the district but power intensive industries and the large industries with 132 K.V. supply consume 436.535 million units and 18.780 units respectively. In the rural areas of the district 92 per cent of the villages had already been electricified in the district till the end of 1998-99.

Panchayati Raj system

The three tier Panchayati Raj system was introduced in the state with the enforcement of the Orissa Panchayat Samiti and Zilla Parishad Act, 1959, w.e.f. 26th January, 1961 which was further strengthened with the implementation of Orissa Zilla Parishad Act, 1991 w.e.f. 1st November, 1993. The major objective of the Panchayati Raj System is to entrust the people with the management of local affairs and develop their capacity for self-governance. In the three tier system of Panchayati Raj, the Panchayat Samiti functions as the inter-mediary between Zilla Parishad at district level and the Gram Panchayat at village level and each of them functions within its own jurisdiction for the development of rural areas of the districts for a normal tenure of five years.

Zilla Parishad, the apex body in the district is constituted of the following members. Each Panchayt Samiti in the district elects two members to the Zilla Parishad. Elected Members of Legislative Assembly and Members of Parliament from the district become the members of the Zilla Parishad. The Chairmen of all Panchayat Samities of the district, Chairmen of the Municipalities/ NACs and Cooperative banks of the district, the district officers of Health, Education, Public Health, Agriculture, Forest, Works and Cooperative development become the ex-officio members of Zilla Parishad. There is reservation of seats for SC and ST members on the basis of proportion of their population while 1/3rd of the seat is reserved for women members including SC and ST woman. The members of the Zilla Parishad elect one amongst them as President and another as Vice President. The Collector of the district acts as the Chief Executive Officer. The Zilla Parishad, besides formulating policies for the key areas of rural development in the district, monitors and evaluates the various developmental programmes of the

government which are implemented by the Pnchayat Samities in their respective areas of the district.

The Panchayat Samities, which act as the intermediary between Zilla Parishad and Gram Panchayats were established throughout the state in accordance with the provisions of the Orissa Panchayat Samiti Act, 1959 and its jurisdiction is coterminous with the area of the Community Development Block. The Block Development Officer is the executive head of the Samiti. Other Block level officers are the official members. The Sarpanch of all Gram Panchayats within the C.D. Block become non-official members of the Panchyat Samiti The elected members of the Panchayat Samiti elect one amongst them as the chairman and another as vice chairman, of whom one must be a woman. Panchayat Samities are not only responsible for the planning, execution and supervision of all types of governmental development programmes in their areas but also look after the spread of primary education, management of trust and endowments etc. and all other developmental matters in their respective localities.

The Gram Panchayat at the primary level is constituted of a group of villages which are divided into wards. The voters of each ward directly elect Ward members. The Sarpanch of the Panchayat is elected by the voters of all the wards under the Gram Panchayat and one Naib Sarpanch is elected form amongst the ward members to look after the work of the Panchayat.

This primary unit of democratic de-centralisation is the main agency to mobilize the rural man-power. Functions of the Gram Panchayat include sanitation, supply of drinking water, maintenance of ferry ghats and wells, construction and maintenance of Panchayat roads, cattle pounds, providing streetlight and implementing different agricultural schemes in the villages under its jurisdiction.

The names of the Panchayat Samities, number of Gram Panchayats and number of villages under each Panchayat Samiti in the district are given below:

Sl. No.	Name of the Panchayat Samiti	No. of Gram Panchayts under Panchayat Samiti	No. of villages under the Panchayat Samiti
1	Sukinda	20	125
2	Danagadi	20	115
3	Korai	20	231

	Total	**242**	**1778**

(v) Places of religious, historical, archeological and tourist importance in villages and towns of the district

Vyasasarobar:

Vyasasarobar is a famous pilgrim center because of its proximity to Jajapur Road. Vyasasarobar is named after the sage Vyasadeva, the composer of the Mahabharat. The Sarobar or tank covers an area of 60.7030 hectares. In the month of Magha (January-February) thousands of devotees visit the place to take a holy dip. The temple of Lord Jagannath, the Ashram of Vyasadeva and the Gupta Ganga on the bank of the tank are the interesting spots.

Jajapur Town:

Jajapur town situated in the right bank of the Baitarani is an important historical place of the district. It finds its place in the history of India as Navigaya Kshetra where people use to offer 'Pinda' for the salvation of their ancestors. It is one of the sacred places of pilgrimage in Orissa. Goddess "Viraja" (Durga) is the presiding deity of the district. It is connected with Bhubaneswar, Cuttack and Calcutta by an all weather road. It is 81 km from Cuttack, 111 km from Bhubaneswar and nearest rail head is Jajapur road town.

Udaygiri :

Udaygiri, a garland or crescent moon like indispenseble component hillocks of great Assiah range

of hills just beside the left bank of the river Birupa in the district of Jajapur is no doubt a world famous Buddhist site and splendid monastic establishment not only in India but also in the world a kin to that of Halanda, Vikramshale and Bodhgaya. The unique Buddhist site Udaygiri, comprising intermittent chain of blue capped hill ranges such as Chandia, Khandamarei, Majhipara is found replete with an unprecedented hidden treasure land of important and formidable Buddhist sites/ monastic estublishments, structural edifices and rare Buddhist monuments.

Ratnagiri :

Bordered in between the Brahmani-Birupa-Keluo river valley near the vast-stratched liquid horizon and the extensive but already silted up and shifted sea shore of the Bay of Bengal. Ratnagiri, an isolated and extraordinary Buddhist hillock is located in the Binjharpur P.S. of Jajapur district. Ratnagiri, an in-exhaustible emporium of Buddhism and exceedingly rare buddhist sculpures and monuments was explored by Mr.Manmohan Chakravarty, the then S.D.O. of Jajapur in the year 1906.

(vi) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence, office-cum-residence, etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passage way and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servants quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then

the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separate structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open

compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Rural-Urban area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) A density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites: (a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and (b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted : i) a city or town with one or more contiguous outgrowths; ii) two or more adjoining towns with their outgrowths; and iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of

both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless households.

Scheduled Caste and Scheduled Tribe :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes List for Orissa :

1. Adi Andhra
2. Amant, Amat
3. Audhelia
4. Badaik
5. Bagheti, Baghuti
6. Bajikar
7. Bari
8. Bariki
9. Basar, Burud
10. Bauri
11. Bauti
12. Bavuri
13. Bedia, Bejia
14. Beldar
15. Bhata
16. Bhoi
17. Chachati
18. Chakali

19. Chamar, Mochi, Muchi, Satnami
20. Chandala
21. Chandhai Maru
22. Cherua, Chhelia
23. Dandasi
24. Dewar
25. Dhanwar
26. Dhoba, Dhobi
27. Dom, Dombo, Duria Dom
28. Dosadha
29. Ganda
30. Ghantarghada, Ghantra
31. Ghasi, Ghasia
32. Ghogia
33. Ghusuria
34. Godagali
35. Godari
36. Godra
37. Gokha
38. Gorait, Korait
39. Haddi, Hadi, Hari
40. Irika
41. Jaggali
42. Kandra, Kandara
43. Karua
44. Katia
45. Kela
46. Khadala
47. Kodalo, Khodalo
48. Kori
49. Kummari
50. Kurunga
51. Laban
52. Laheri
53. Madari
54. Madiga
55. Mahuria
56. Mala, Jhala, Malo, Zala
57. Mang
58. Mangan
59. Mehra, Mahar
60. Mehtar, Bhangi
61. Mewar
62. Mundapotta
63. Musahar
64. Nagarchi
65. Namasudra
66. Paidi
67. Painda
68. Pamidi
69. Pan, Pano
70. Panchama
71. Panika
72. Panka
73. Pantanti
74. Pap
75. Pasi
76. Patial, Patikar, Patratanti, Patua
77. Rajna
78. Relli
79. Sabakhia
80. Samasi
81. Sanei
82. Sapari
83. Sauntia, Santia
84. Sidhria
85. Sinduria
86. Siyal
87. Tamadia
88. Tamudia
89 Tanla

90. Tiar, Tior
91. Turi
92. Ujia
93. Valamiki, Valmiki

Scheduled Tribes list for Orissa :

1. Bagata
2. Baiga
3. Banjara, Banjari
4. Bathudi
5. Bhottada, Dhotada
6. Bhuiya, Bhuyan
7. Bhumia
8. Bhumij
9. Bhunjia
10. Binjhal
11. Binjhia, Binjhoa
12. Birhor
13. Bondo Poraja
14. Chenchu
15. Dal
16. Desua Bhumij
17. Dharua
18. Didayi
19. Gadaba
20. Gandia
21. Ghara
22. Gond, Gondo

49. Mirdhas
50. Munda, Munda Lohara, Munda Mahalis
51. Mundari
52. Omanatya
53. Oraon
54. Parenga
55. Paroja
56. Pentia
57. Rajuar
58. Santal
59. Saora, Savar, Saura, Sahara
60. Shabar, Lodha
61. Sounti
62. Tharua

Languge and Mother tongue:

As per cent census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker' .

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non-worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc.,

and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years.

Sex ratio :

Number of females per 1000 males in a population.

(vii) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz. :

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum^{45\text{-}49} ASFR_{15\text{-}19}}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum^{45\text{-}49} ASMFR_{15\text{-}19}}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1,000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1,00,000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/ Towns. These Class I UAs/Towns are now further sub-classified into seven sub-classes, namely, M1 to M7 depending on the population size of UA/City/ Town. These are :

M7 (5,000,000 and above);
M6 (2,000,000 to 4,999,999);
M5 (1,000,000-1,999,999);
M4 (500,000-999,999);
M3 (300,000-499,999);
M2 (200,000-299,999); and
M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(viii) 2001Census finding - Population, its Distribution :

(a) Distribution of Population in Rural- Urban areas

The distribution of population in Rural-Urban areas in the district shows that majority of population live in rural areas. The total population of the district is 1,624,341 with 1,551,361 rural and 72,980 urban population. The share of urban population in the district is 4.49 per cent compared to state urban population share of 14.99 percent. There are total 1778 villages out of which 203 villages are uninhabited. The village area covers 95.51 percent of total population in the district.

(b) Size class and status of towns, population growth, density, sex ratio, work participation rate and literacy.

There are only two statutory towns located in the district. These two towns are Byasanagar (UA) with 40,741 and Jajapur (M) with 32,239 population. Both the towns are categorised under class III towns, which is in the range of 20,000 to 49,999 population.

While comparing the growth of population in these towns with 1991 Census it is seen that Byasanagar (UA) has highest growth rate with 55.98 in comparison to Jajapur (M) with 18.04 percent. The density of population in the towns of district is 1427 while the density of urban population in the state is 1975. The urban sex ratio of the district is 905 whereas the rural sex ratio is 975 and district total sex ratio is 972.

The district literacy rate is 71.44 per cent for total, 81.89 per cent for males and 60.76 per cent for females, which is higher than the state average in the respective category. In the urban areas the literacy percentage is higher than those of rural areas due to better educational facilities available in the town areas. In the urban areas, Jajapur (M) has the higher literacy rate of 83.2 per cent followed by Byasanagar (UA) 80.5 per cent. In the rural areas, Dasarathpur C.D. block tops the list with 75.4 per cent literacy and Sukinda C.D. block is at the bottom with 58.5 percent literacy.

The work participation rate in the district is 27.5 per cent in comparison to the state average of 38.79 percent. Sukinda police station has the highest work participation rate 32 per cent and Binjharpur police stations has the lowest work participation rate 24.1 per cent. The work participation rate is 27.5 per cent in both rural, urban and also in total district.

(IX) ANALYSIS OF PRIMARY CENSUS ABSTRACT DATA

The inset tables in the District Census Handbooks based on primary census abstract data have been quite useful for the data users, planners and administrators etc. This is a novel feature of census which aims at providing a brief analysis of primary census abstract data and help the data user to get an insight into the gamut of census in a nutshell. Each inset table reflects a separate feature on various demographic features of the district and its parts.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Tahsil/P.S.	Population						Percentage decadal variation 1991-2001			Percentage urban	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Sukinda	115,674	115,674	0	142,812	142,812	0	23 5	23.5	0	0	0
2	Dubuni	47,007	47,007	0	57,561	57,561	0	22 5	22 5	0	0	0
3	Jajapur Road	59,757	33,638	26,119	76,737	35,996	40,741	28.4	7	56	43.7	53.1
4	Korai	116,643	116,643	0	138,504	138,504	0	18.7	18.7	0	0	0
5	Jajapur	211,017	183,705	27,312	247,016	214,777	32,239	17.1	16.9	18	12.9	13 1

10	Dharmasala	270,165	270,165	0	316,544	316,544	0	17 2	17.2	0	0	0
District Total		**1,386,177**	**1,332,746**	**53431**	**1,624,341**	**1,551,361**	**72,980**	**17.2**	**16.4**	**36.6**	**3.9**	**4.5**

Table 1 presents the decadal change in population of police stations by residence during the year 1991 & 2001. The population of the district as recorded in 2001 Census stands at 1,624,341 as against 1,386,177 in 1991 indicating a net addition of 238,164 persons during the decade. The decadal growth rate of the district works out to 17.02 per cent as compared to the state average of 16.25 per cent. Within the district, the highest growth rate (28.4%) is seen in Jajapur Road police station and lowest growth rate (12.5%) in Binjharpur police station. The majority of population in the district lives in rural areas and only 4.5 per cent in urban areas as per 2001 Census, which is slightly higher than 3.9 per cent of urban population in 1991 Census. Between the two towns, the growth rate of urban population is higher (56%) in Jajapur Road police station and lower (18.01%) in Jajapur police station. It is also evident from the table that out of the total 10 police stations in the district, the highest population, i.e, 316,544 is found in Dharmasala police station.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial Number	District / C.D Block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200

Table –2 gives CD block wise distribution of inhabited villages by number and percentage as per the specified population size ranges varying between less than 200 to 10000 and above. The maximum number of villages i.e.427 (27.1per cent) is covered under the population size range 500-999 followed by 404(25.7 per cent) villages under population size range 200-499. Villages coming under these population size ranges constitute more than 52.8 per cent of the total 1575 inhabited villages in the district. So far as the villages having 5000 population or more are concerned, there are only 12 villages in the district. No village in the district has more than 10000 population.

TABLE – 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

	Name of Town
	1
(a) New	
(i) Statutory town	Nil
(ii) Census town	Nil
(b) Denotified	Nil
(c) Declassified	Nil
(d) Wholly merged with other town(s)	Nil

In 1991 there were two Statutory Towns in the district, namely, Jajapur (M) and Byasanagar (M). In 2001 Census, there is no change in the number of towns in the district. Earlier in the 1991 Census the percentage of urban population was 3.39 per cent, which increased marginally to 4.50 per cent in 2001 Census.

TABLE4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	8	0 50	43	0 0
11-20	5	0 30	85	0 0
21-50	19	1 20	7,806	0 5
51-100	25	1.60	3,602	0 2
101-200	97	6.20	35,419	2 3
201-300	131	8 30	96,708	6 2
301-500	317	20 10	263.728	17.0
501 +	973	61.80	1,143.970	73.7
Not known	0	0 00	0	0 0
District Total	**1,575**	**100.00**	**1,551,361**	**100.0**

Population Density (Rural) of the district 566.10

The grouping of villages on the basis of density of population (per square kilometer) is displayed in Table-4. The population density (rural) is linked on the area figures of inhabited villages only of the district is 566.10 and maximum population i.e. 73.7 percent of population live in the density range of 501+. Taking the number of villages also, the highest percentage i.e. 61.80 per cent of villages are covered under the density range of 501+ followed by 20.1 0 per cent villages under the density range of 301-500 and 8.30 per cent of villages are under the density range 201-300. A negligible percentage of villages i.e. 0.50 per cent are under the density range 0-10 and 0.30 per cent are under the density range 11-20.

TABLE 5: SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,037	1,039	967	1,068	1,068	1,072
1911	1,056	1,058	947	1,101	1,101	1,069
1921	1,086	1,089	963	1,159	1,161	1,090
1931	1,067	1,071	924	1,112	1,113	1,024
1941	1,053	1,058	914	1,084	1,086	954
1951	1,022	1,029	881	1,056	1,059	886
1961	1,001	1,015	807	1,027	1,034	810
1971	988	1,002	845	1,006	1,014	794
1981	981	999	859	995	1,003	799
1991	971	988	866	977	982	879
2001	972	987	895	972	975	905

Note : Sex ratio has been defined here as the number of females per 1000 males

Table – 5 gives a comparative picture of sex ratio reported over the censuses from 1901 to 2001 for both the state and the district. The sex ratio of the district is 972 in 2001 and it is same as the state average of 972. The sex ratio of the district is found to be consistently higher than the state from 1901 till 1991 but in 2001 the district sex ratio equals the state sex ratio. The decline of sex ratio in the state and district from 1901 to 2001 is 65 and 96 respectively. As regards the rural areas of the state and the district, the sex ratio has declined by 52 and 93 respectively during the last 100 years. However, in urban areas, there is a fluctuating trend of increase and decrease between the censuses in the state and in the district. The over all sex ratio for both the state and the district have shown a fluctuating trend during the census periods since 1901.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil/P.S.	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Sukinda	946	946	-
2	Duburi	956	956	-
3	Jajapur Road	916	954	884
4	Korai	969	969	-
5	Jajapur	959	963	933
6	Mangalpur	1,005	1,005	-
7	Binjharpur	1,018	1,018	-
8	Balichandrapur	981	981	-
9	Badachana	947	947	-
10	Dharmasala	962	962	-
District Total		**972**	**975**	**905**

Table 6 shows sex ratio by police stations as per 2001 census. In the district, there are 972 females per 1000 males. However there is a great variation between rural and urban sex ratio in the district, which is 975 in rural areas and 905 in urban areas. In rural areas, Binjharpur police station has recorded the highest sex ratio of 1018 and Sukinda police station has the lowest sex ratio of 946. Between the two towns, Jajapur has got the higher sex ratio of 933 whereas Jajapur Road has the lower sex ratio of 884 in the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Sukinda	944
2	Danagadi	955
3	Korai	969
4	Jajapur	953
5	Rasulpur	961
6	Dharmasala	964
7	Badachana	962
8	Bari	1,019
9	Binjharpur	1,018
10	Dasarathpur	1,001
	District (Rural) Total:	**975**

Table 7 depicting the C.D. Block wise sex ratio gives a little different figure as compared to police station level sex ratio. Bari C.D. Block has the highest sex ratio of 1019 followed by Binjharpur(1018)and Dasarathpur(1001) C D. Blocks .Other seven CD Blocks have lower sex ratio than the district level (rural) sex ratio of 975 .

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	16	1.0	2,724	0 2
700-749	7	0.4	1,884	0.1
750-799	17	1.1	3,423	0.2
800-849	62	3.9	27,266	1 8
850-899	147	9 3	111,111	7 2
900-949	352	22 3	406,373	26.2
950-999	415	26 3	466,346	30 1
1000-1099	431	27 4	458,920	29.6
1100+	128	8 1	73,314	4.7
District Total:	**1,575**	**100.0**	**1,551,361**	**100.0**
Sex ratio (Rural) for District:		**975**		

Table 8 is giving the distribution of rural population as per sex ratio by ranges. . It. shows that the largest number i.e.431 (27.4%) villages in the district have sex ratio in the range of 1000-1099. 415 (26.3%) number of villages in the district fall in the sex ratio range of 950-999. Even in the range of 1100 + sex ratio, there are 128(8.1 %) villages. It is therefore seen that sex ratio is 34.3 percent in favour of females and 65.7 percent in favour of males in the district.

As per table 9, the sex ratio (905) of urban area i.e in towns/UAs is quite lower than the sex ratio in rural areas (975). Between the two towns, Jajapur(M) has the higher sex ratio of 933 and Byasanagar UA has the lower sex ratio of 884.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U A ^ / Town+*	Urban status of town	Sex ratio
1	2	3	4
1	Byasanagar UA	UA	884
	(i) Byasanagar (M)	M	887
	(ii)Educational Area(OG)	OG	849
2	Jajapur (M)	M	933
Sex ratio (Urban) for the district:			**905**

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR TAHSILS 2001

		Urban	**8,662**	**4,511**	**4,151**	**920**

Table 10, displays the sex ratio of population in the age group 0-6 for police stations in the district. The sex ratio in 0-6 age group is found to vary between 892 and 961 among the police stations. The highest sex ratio of 961 is found in Jajapur Road police station followed by Dharmasala(960)and Binjharpur(944). The sex ratio in rural areas (937) is higher than the sex ratio in urban areas (920) of the district. The district sex ratio in 0-6 age group is lower in total, in rural areas and in urban areas than that of the state sex ratio in the same age group.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C D block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	2	3	4	5	6
1	Sukinda	20,264	10,453	9,811	939
2	Danagadi	15,342	7,920	7,422	937
3	Korai	19,041	9,815	9,226	940
4	Jajapur	20,068	10,425	9,643	925

850-899	157	10 0	31,253	14 9
900-949	171	10.9	33,602	16 0
950-999	123	7 8	26,488	12.6
1000-1099	268	17.0	37,402	17 8
1100+	344	21 8	31,047	14.8
District (Rural) Total	**1,575**	**100.0**	**209,709**	**100.0**

Sex ratio (Rural) for District 937

Table 12 gives distribution of sex ratio of rural population in the age group 0-6 by ranges. The highest number of villages i.e. 344 (21.8 per cent) villages having 14.8 per cent of population is covered under the ranges 1100+ sex ratio. But the irony of fact is that 61.2 per cent of villages have a sex ratio of less than 1000 in the age group 0-6 which comprises 67.4 percent of population. There are 840 villages, where 0-6 age group sex ratio is less than 950 and 262 villages where it is less than 750, which visualizes the shortage of girl child in comparison to boy.

TABLE 13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS / TOWNS,2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Byasanagar UA	UA	4,941	2,550	2,391	938
	(i) Byasanagar (M)	M	4,475	2,309	2,166	938
	(ii)Educational Area (OG)	OG	466	241	225	934
2	Jajapur (M)	M	3,721	1,961	1,760	898
District(Urban) Total			**8,662**	**4,511**	**4,151**	**920**

Table 13 reveals that in the towns of the district, the position of sex ratio among 0-6 age group population is much adverse than the rural areas. The district urban sex ratio is 920 as compared to district rural sex ratio 937. Between the two towns, the lower sex ratio (898) is reported in Jajapur(M) and the higher sex ratio (938) is reported in Byasanagar(UA).

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN POLICE STATION,2001

Table 14 presents data on number and percentage of scheduled castes and scheduled tribes population in different police stations of the district as per 2001 Census. The percentage of scheduled castes and scheduled tribes population in the district constitutes 23.3 per cent and 7.8 per cent as against 16.5 per cent and 22.1 per cent respectively in the state However, the rural-urban distribution of scheduled castes and scheduled tribes population in the district shows that 23.3 per cent and 16.1 per cent of total population are scheduled castes and 7.8 and 6.5 per cent are scheduled tribes respectively. The table further reveals that, there is the highest concentration of scheduled caste population (32.2%) in Mangalpur police station and lowest concentration (11.9%) in Sukinda police station. In so far as the scheduled tribes population is concerned, the highest concentration (40%) is recorded in Duburi police station and the lowest concentration (0.2 %) is recorded in Binjharpur police station.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7

10	Dasarathpur	181,707	59,426	504	32.7	0.3
	District (Rural) Total:	**1,551,361**	**361,782**	**121,222**	**23.3**	**7.8**

Table 15 gives picture regarding distribution of scheduled castes and scheduled tribes population in different CD Blocks of the district as per 2001 Census. The highest concentration of scheduled castes population is recorded in Dasarathpur CD Block (32.7%) followed by Binjharpur CD Block (32%). In contrast, Sukinda CD Block lies at the bottom with only 11.2 per cent of scheduled caste population. As regards the percentage of scheduled tribes population, Sukinda CD Block tops the list with 35.7 per cent and Binjharpur C.D. Block is at the bottom with 0.1 percent of tribal population.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	206	13 1	0	0 0
Less than 5	121	7 7	3,083	0 9
5-10	187	11 9	18,074	5.0
11-20	337	21.4	66,215	18.3
21-30	271	17.2	79,571	22.0
31-40	198	12.6	84,731	23.4
41-50	105	6 7	49,067	13.6
51-75	101	6 4	47,343	13.1
76 and above	49	3.1	13,698	3 8
District Total	**1,575**	**100.0**	**361,782**	**100.0**

Table 16 shows proportion of scheduled castes population to total population of the villages. The percentage of scheduled caste population to total population of the villages is divided into nine ranges starting from 'Nil to 76 and above'. The table reveals that out of 1,575 inhabited villages of the district, 206 (13.1%) villages have no scheduled caste population and 49 (3.1%) villages have more than 75 per cent scheduled caste population. However, majority of villages in the district numbering 608 (38.6%) have scheduled caste population ranging between 11 to 30 per cent and they constitute 40.3 per cent of scheduled caste population of the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	906	57.5	0	0.0
Less than 5	277	17 6	4,656	3.8
5-10	80	5.1	5,770	4.8
11-20	74	4.7	13,181	10.9
21-30	47	3.0	11,572	9.5
31-40	43	2.7	16,243	13.4
41-50	29	1.8	10,682	8.8
51-75	55	3 5	31,591	26 1
76 and above	64	4 1	27,527	22 7
District Total	**1,575**	**100.0**	**121,222**	**100.0**

Like the previous table, this table distributes the villages of the district into different percentage ranges of scheduled tribes population. Out of 1,575 inhabited villages of the district, 906 (57.5%) villages have no scheduled tribes population. It is found that, the maximum percentage (26.1%) of total scheduled tribes population of the district live in 55 villages and the concentration of scheduled tribes population in these villages is in the range of 51-75 per cent of the total population of the villages.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Byasanagar UA	40,741	6,002	4,171	14 7	10.2
	(i) Byasanagar (M)	37,612	5,052	3,879	13.4	10 3
	(ii)Educational Area (OG)	3,129	950	292	30.4	9 3
2	Jajapur (M)	32,239	5,729	596	17 8	1 8
District (Urban) Total		**72,980**	**11,731**	**4,767**	**16.1**	**6.5**

Table-18 presents data on number and percentage of scheduled castes and scheduled tribes population in different towns of the district as per 2001 Census. The percentage of scheduled castes population and scheduled tribes population in the urban areas of the district constitute 16.1 per cent and 6.5 per cent respectively. Between the two towns of the district, Jajapur (M) has the higher concentration (17.8%) of scheduled castes population in the district and Byasanagar (UA) has the lower concentration (14.7%) of scheduled castes population. Likewise, Byasanagar (UA) has the higher concentration (10.2%) of scheduled tribes population and Jajapur(M) has the lower concentration (1.8%) of scheduled tribes population in the district.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Sukinda	938	963
2	Danagadi	956	971
3	Korai	963	948
4	Jajapur	931	918
5	Rasulpur	950	939
6	Dharmasala	961	963
7	Badachana	956	973
8	Bari	960	845
9	Binjharpur	968	814
10	Dasarathpur	960	1,040
	District (Rural) Total	**956**	**963**

Table-19 shows sex ratio among scheduled castes and scheduled tribes population in different CD Blocks of the district as per 2001 Census. For the rural areas of the district as a whole, the sex ratio of scheduled castes and scheduled tribes population are 958 and 963 respectively. In case of scheduled castes population, Binjharpur C.D. Block exhibits the highest sex ratio of 956 followed by Korai (963), Dharmasala (961) and Bari and Dasarathpur (960each). Other five C.D Blocks have recorded sex ratio equal to or lower than the sex ratio of the scheduled castes population recorded for the district. As regards, the sex ratio of the scheduled tribes population, three C.D. Blocks have recorded higher sex ratio and other seven C.D Blocks. have recorded sex ratio either equal to or lower than the sex ratio of the scheduled tribes population of the district. Among the CD Blocks, Dasarathpur has recorded the highest sex ratio of 1040 and Binjharpur has the lowest sex ratio of 814.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A. / Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	2	3	4
1	Byasanagar UA	965	969
	(i) Byasanagar (M)	967	978
	(ii Eduxcational Area (OG)	959	860
2	Jajapur (M)	923	790
Sex ratio (Urban) for the district		**944**	**945**

Like the previous table, Table-20 indicates sex ratio among scheduled castes and scheduled tribes population in the towns of the district. The urban areas of the district have recorded sex ratio of 944 and 945 among scheduled castes and scheduled tribes population respectively. Between the two towns, the higher scheduled castes sex ratio of 965 is found in Byasanagar (UA) and lower scheduled castes sex ratio of 923 is found in Jajapur (M).The higher scheduled tribe sex ratio of 969 is found in Byasanagar (UA) and lower scheduled tribe sex ratio of 790 is found in Jajapur (M).

TABLE 21 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY POLICE STATIONS, 2001

Table-21 presents Police Station level data giving the number of literates and illiterates along with the percentage of literates as per 2001 Census. The literacy of the district is 71.4 per cent of the total population and it is 81.9 per cent and 60.8 per cent in case of males and females respectively. For the total rural population of the district the literacy comes to 71 per cent and for the total urban population of the district it is at a higher level of 81.7 per cent. In all the police stations along with the district, the literacy rates in case of males are higher than the corresponding rates for the females. Mangalpur Police

Station records the highest literacy of 76.3 per cent followed by Jajapur Road (75.6%), Jajapur (74.8%) and Binjharpur (73.3%). Other three police stations have recorded higher literacy and the remaining three have recorded lower literacy in comparison to the literacy of the district.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Sl. No.	Name of C.D.Block	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate

Literacy rate for District: 71.4

Table-23 distributes the total number of villages in the district as per different ranges of literacy rates of the villages. The table reveals that the maximum number of villages in the district i.e. 612 constituting 46.3 per cent of the total population in the rural areas of the district have literacy rates in between 71-80 per cent. It further reveals that 331 number of villages have literacy rates in between 61-70 percent and 295 villages have literacy rates in between 81-90 per cent. There are ten villages in the district, which has achieved 100 per cent literacy and six villages have zero literacy. Likewise seventeen villages in the district have recorded low literacy rates of 20 per cent or less.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Sl No	Name and urban status of UA/Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Table-31 presents data on number and percentage of main workers, marginal workers and non-workers by sex in different police stations of the district as per 2001 Census. For the district as a whole, main workers constitute 21.4 per cent, marginal workers, 6.1 per cent and non-workers 72.5 per cent of the total population. In case of males of the district, main workers are 39.5 per cent; marginal workers are 8.1.percent and non-workers are 52.4 percent and that of females it is 2.8 per cent, 4.1 per cent and 93.2 per cent respectively. Total workers i.e. a combination of main workers and marginal workers of the district is 27.5 per cent of the total population and it lies below the corresponding figures of 38.79 percent for the state. Sukinda Police Station tops the list in percentage of total workers (32%) followed by Duburi (30.9%), Badachana (30.4%) and Korai (29.3%). Binjharpur police station lies at the bottom with 24.1 pe rcent of total workers.

TABLE32 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN C. D. BLOCKS, 2001

Table –32 presents data on number and percentage of main workers, marginal workers and non-workers by sex for the rural areas of the district i.e. in C.D. Blocks. Total workers in the rural areas of the district constitute 27.5 per cent of its total population, out of which 21.2 per cent are main workers and 6.3 per cent are marginal workers. The sex wise break-up of the district level data reveals that, out of the total workers in the rural areas of the district, males constitute 47.6 per cent and females constitute 6.9 per cent of. Workers. A look at the work participation rate in different C.D. Blocks reveals that, Sukinda C.D. Block has recorded the highest percentage of total workers (31.5%) of which main workers and marginal workers constitute 23.2 per cent and 8.4 percent respectively. On the other hand, Bari C.D. Block is at the bottom with 23.9 per cent of total workers, of which 18.9 percent and 5.0 per cent are the main workers and marginal workers respectively.

TABLE 33 : NUMBER AND PERCENTAGE OF MAIN WORKERS, MARGINAL WORKERS, AND NON-WORKERS BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Table-33 presents data on number and percentage of main workers, marginal workers and non-workers by sex in the urban areas of the district as per 2001 Census. The total workers in the urban areas of the district constitute 27.5 per cent, out of which 24.9 per cent are main workers and 2.6 percent are marginal workers. The sex wise break-up of the district level data reveal that, 47.0 per cent and 6.0 per cent of the total workers in the urban areas of the district are male workers and female workers respectively. It is note-worthy to mention that the percentage of marginal workers in the urban areas of the district is substantially less than the percentage of marginal workers in the rural areas of the district. It is only 2.6 per cent of the total urban population, out of which males and females contribute 4.0 percent and 1.1 per cent respectively. In so far as the work participation rate in two individual towns is concerned, Byasanagar(UA) stands first with 29.0 per cent of total workers and Jajapur (M) comes next with 25.2 per cent of total workers.

Note: Percent of Worker to total worker are given in brackets

Table-34 distributes total workers of different police stations and the district by sex into four categories of economic activities. The table reveals that, out of the total workers in the district, 25.8 percent are cultivators, 30.2 percent are agricultural labourers, 3.1 percent are household industry workers and 40.8 percent are other workers. The sex wise break-up of the district level data shows that, male participation rate is comparatively higher than the female participation rate in case of Cultivation and other works and vice-versa in case of agricultural labourers and household industry workers. The Police Station wise distribution of total workers indicates that in almost all police stations, maximum number of workers are engaged in 'Other'activities other than agriculture and household industry.

Note· Percent of Worker to total worker are given in brackets

Like the previous table, table-35 distributes workers of the district, C.D. Block wise by sex into four categories of economic activities. The table shows that 27.5 percent of the total population in the rural areas of the district are workers (main+marginal) and as per the category-wise break-up, 26.8 percent, 31.4 percent, 3.2 percent and 38.7 percent of the total workers are cultivators, agricultural labourers, household industry workers and other workers respectively. The sex wise break-up of the district (rural) level data shows that the percentage of females engaged as agricultural labourers (44.4%) and household industry workers (6.9%) are comparatively higher than that of males. It is found that workers in majority of CD Blocks are either engaged in 'Other' activities other than agriculture and household industry or work as agricultural labourer.

TABLE 36 : DISTRIBUTION OF WORKERS BY SEX IN FOUR CATEGORIES OF ECONOMIC ACTIVITY OF URBAN AGGLOMERATIONS / TOWNS , 2001

Table-36 presents data on distribution of workers by sex into four categories of economic activities in the urban areas of the district as per 2001 Census. The table indicates that 27.5 per cent of the total population in the urban areas of the district are workers (main+marginal) and out of the total workers majority (86.3%) are engaged in 'Other' activities other than agriculture and household industry while the engagement of urban workers as cultivators (4.6%), agricultural labourers (6.7 %) and household industry workers (2.4%) is quite negligible. The same trend is found not only in case of male- female break-up of the district (urban) data but also in case of individual towns.

Note . - Percentages are given in brackets

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well or well situated within or outside the premises it is considered as having access to 'Improved drinking water source' in Orissa However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes post office, telegraph office and post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways.

Table-37 depicts the distribution of villages according to the availability of different amenities in different C.D. Blocks of the district. Out of the total 1575 inhabited villages of the district, educational facility is available in 1184 (75 2%) villages, medical facility in 258(16.4%) villages, improved drinking water facility in 1537 (97.6%) villages, post office in 323 (20.5%) villages, telephone in 570(36.2%) villages, communication facility like bus service, rail facility and navigable waterways in 374 (23.7%) villages, banks in 60 (3.8%) villages and agricultural credit societies in 111 (7%) villages. As many as 969 (61.5%) villages are approached by pucca road and 1457 (92.5%) villages are having power supply facility. The district level data clearly indicate that although spectacular progress has been made on education, improved drinking water facility and power supply in the district, yet the areas like medical, post office, banks and agricultural credit societies require further development.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well or well situated within or outside the premises it is considered as having access to 'Improved drinking water source in Orissa However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways

Table-38 presents data on number and per cent of rural population served by different amenities in different C.D. Blocks of the district. It may be seen from the table that out of the total 1,551,361 rural inhabitants, 91.2 per cent persons are served with educational facility, 32.6 per cent by Medical facility, 99.1 per cent by improved drinking water facility, 40.9 per cent by post and telegraph facility, 57.2 per cent by telephone facility, 36.8 per cent by transport and communication facility, 10 per cent by Banks facility, 14.2 per cent from agricultural co-operative societies, 64.3 per cent can approach their villages by pucca road and 95.9 per cent by power supply facility. The rural areas of the district as a whole is quite advanced in providing education, improved drinking water and power supply facility, whereas lagging behind with respect to medical, banking facility and agricultural credit societies.

TABLE39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENTIES,ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE,2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	372	9	11	392
(b) Middle School	762	40	27	829
(c) Degree College	535	563	435	1,533

5. Bus Service	655	406	167	1,228
6. Banks				
(a) Commercial Bank	429	503	584	1,516
(b) Cooperative Bank	352	498	717	1,567
7. Agricultural Credit Societies	680	327	457	1,464

Table-39 shows the distribution of villages not having certain amenities and arranged by distance ranges from the places where such facilities are available. It is seen from the table that out of the total 1,575 inhabited villages of the district, 392 villages do not have Primary School, 829 villages have no Middle School and 1,533 villages do not have any Degree College. There is no hospital in 1,573 villages of the district, while Primary Health Centre is not available in 1,520 villages. Like wise, non-availability of Post Office in 1,253 villages, Telephone in 1,004 villages, Bus Service in 1,228 villages, Commercial Bank in 1,516 villages, Co-Operative Bank in 1,567 villages and Agricultural Credit Societies in 1,464 villages are recorded in the district. It is evident from the table that maximum villages having no Primary School, Middle School, Post Office and Bus Service are getting the said facilities at a distance of less than 5 kilometers whereas maximum numbers of villagers are required to cover a distance of 5-10 kilometers or even more than 10 kilometers in order to avail the facilities of Public health centre, Hospital, Banks and Agricultural Credit Societies.

TABLE40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
less than 5	28	21	4	5	16	8	2	1	22
	(100.0)	(75 0)	(14.3)	(17 9)	(57 1)	(28 6)	(7.1)	(3 6)	(78 6)
5 -15	461	340	68	89	194	94	11	34	356
	(100.0)	(73.8)	(14 8)	(19.3)	(42.1)	(20 4)	(2 4)	(7.4)	(77.2)
16 - 50	984	747	174	209	329	246	40	73	535
	(100 0)	(75.9)	(17.7)	(21 2)	(33.4)	(25.0)	(4 1)	(7.4)	(54.4)
51+	100	74	12	20	31	26	7	3	54
	(100.0)	(74.0)	(12.0)	(20.0)	(31.0)	(26.0)	(7.0)	(3.0)	(54.0)
Unspecified	2	2	0	0	0	0	0	0	2

	(100.0)	**(75.2)**	**(16.4)**	**(20.5)**	**(36.2)**	**(23.7)**	**(3.8)**	**(7.0)**	**(61.5)**

Post office includes Post office, Telegraph office and Post and telegraph office

$ Transport communication includes bus service, rail facility and navigable waterways.

Table-40 presents data on distribution of villages according to the distance from the nearest statutory town and availability of different amenities. From the table, it is seen that majority of villages in the district numbering 984 come under the distance range of 16-50 kilometers from the nearest statutory town while 28 villages are at less than 5 kilometers from the towns, 461 villages under the distance range 5-15 kilometers and 100 villages are at above 51 kilometers from the towns. It is clear from the table that the villages, which are far away from the statutory towns, have fewer amenities in comparison to the villages nearer to the towns.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Population range	Number of inhabited villages in each range	Type of amenity available									
		Education	Medical	Improved drinking water*	Post Office #	Telephone	Transport communi-cations $	Banks	Agricultural Credit Societies	Approach by Pucca road	Power supply
1	2	3	4	5	6	7	8	9	10	11	12

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well or well situated within or outside the premises it is considered as having access to 'Improved drinking water source' in Orissa. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table-41 depicts data on distribution of villages according to population range and amenities available. It is observed from the table that 596 villages come under less than 500 population, 427 villages come under the range 500-999, 365 villages come under 1000-1999, 175 villages come under 2000-4999, 12 villages come under the range 5,000-9,999 and no village has the population above 10,000. It is evident from the table that the villages, which are coming under higher population ranges, enjoy more facilities in comparison to the villages coming under lower population ranges.

TABLE 42 : DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Sukinda	104	36,404	40.1	11.3
2	Danagadi	104	45,981	29 2	2.5
3	Korai	217	32,986	75.5	6 0
4	Jajapur	179	19,712	75.7	32.1
5	Rasulpur	158	15,726	72 8	3.8
6	Dharmasala	239	28,029	58.1	19.0
7	Badachana	221	35,022	59.1	25 4
8	Bari	96	17,152	79.3	3.6
9	Binjharpur	107	19,103	77.2	18 8
10	Dasarathpur	150	23,906	77 8	28.0
	District Total	**1,575**	**274,021**	**59.6**	**15.6**

Table-42 shows land use pattern of different C.D. Blocks in the district. It indicates that the percentage of cultivable area to the total area of the district is 59.6 per cent and the rest 40.4 per cent cover forest, culturable waste and the areas not available for cultivation. The table further reveals that the percentage of irrigated area to total cultivable area of the district is 15.6 per cent. Taking the percentage of cultivable area to total area in different CD Blocks into account, Bari is at the top with 79.3 per cent and Danagadi is at the bottom with 29.2 per cent of cultivable area. Taking the percentage of irrigated area to total cultivable area into account, Jajapur is at the top with 32.1 per cent of irrigated area and Danagadi is at the bottom with 2.5 percent of irrigated area.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS,1998-99

Serial number	Class, name & urban status of the Town	Per capita receipt				Per capita expenditure				
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	III Byasanagar (M)	379	359	20	359	24	48	119	8	138
2	III Jajapur (M)	209	164	45	164	48	44	32	24	11
	District Total	**301**	**269**	**32**	**269**	**35**	**47**	**79**	**15**	**79**

Table 43 gives the detail account of per capita receipt and expenditure in statutory towns. In all of the towns the per capita receipt is higher than the per capita expenditure. The share of revenue from taxes is higher than the receipt from all other sources in the per capita receipt and the higher percentage of expenditure goes to public works and others in the per capita expenditure.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Byasanagar (M)	5 6	4 4	2	0.5	0 5
2	Jajapur (M)	8.1	3.1	1.9	0.6	0 6
District Total		**6.7**	**3.8**	**1.9**	**0.5**	**0.5**

Table-44 presents data on number of Schools and Colleges per 10,000 populations in the towns of the district. The table reveals that for every 10,000 urban population in the district, there are about seven Primary Schools, about four Middle Schools, about two Secondary Schools and about one each of Senior Secondary School and College.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Byasanagar(M)	7
2	Jajapur(M)	20
	District Total	**13**

Number of beds in Medical Institutions per 10,000 population in different towns of the district is presented in table 45. It shows that 13 beds are available in medical institutions per 10,000 urban population of the district.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Jajapur (M)	32,239	8,055	25
	District Total	**32,239**	**8,055**	**25**

Table-46 presents data on proportion of slum population in the towns of the district. It is revealed from the table that there is one town in the district i.e. Jajapur (M) wherein slums are available. The slum population of the town constitutes 25 per cent of its total population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Byasanagar (M)	Flour	Ferrochrome
		Ferrochrome	Washing Soap
		Washing Soap	Cloth
2	Jajapur (M)	Brass&Bellmetal	Blackgram
		Pottery	Greengram
		Broom&Basket	Coriander Seed

Table-47 depicts the most important commodities manufactured in different towns of the district and exported from the towns. The main items of manufacture to be mentioned in the district are Ferrochrome, WashingSoap, Flour, Brass, Bellmetal, Pottery, Broom and Basket. The items exported mainly include Ferrochrome,Washing Soap, Cloth, Blackgram, Greengram and Coriander Seed.

(xi) Brief analysis of the data on houses and household amenities

Analysis is based on houselist data, Census 2001. In India, much emphasis has been laid on the mechanism of decentralized planning emerging from the grass root level which has given rise to the necessity of building adequate data base for formulation of future plans at the micro level.

With the commencement of five year plans lack of data or quality and quantity of housing stock has compelled the census organization to conduct uniform houselisting all over the country not only on housing but also on the quality of living of household.

Like the previous census, the Census of India, 2001 was conducted in two phases namely, (i) Houselisting operation and (ii) Population enumeration. The houselisting operations in Orissa was conducted in April-May, 2000, much ahead of the population enumeration.

The basic objective of this elementary exercise was to prepare a frame indispensable for smooth and systematic conduct of the population enumeration during March, 2001. The housing census, thus in some way was a prelude to the actual population count of the census. In addition, information collected through houselisting provide comprehensive data base for assessing the conditions of the human settlements, housing deficit and for future housing requirements for formulation of housing policies.

This operation also provides a massive data on amenities available to the household essentially required by various departments of the union and state governments and many other non-government organizations for development and planning of different projects of housing sector.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7	8	9	10	11

Data source: Census of India 2001, H- series: "Tables on Houses, Household amenities and Assets."

Table 48 presents distribution of households by different tenure status namely owned, rented and others among total, scheduled caste and scheduled tribe households along with number of rooms occupied by each household in total, rural and urban areas of this district. The total number of households in the district is 341,752 of which 90,649 are scheduled caste households and 26,303 are scheduled tribe households.

As shown in the table 95.60 per cent households in total areas of the district live in their own houses as against 96.77 per cent in rural areas and 67.31 per cent in urban areas. Number of households living in rented houses constitute 2.61 per cent in total areas of the district as against 1.49 per cent in rural and 29.61 percent in urban areas.

Tenure status among scheduled caste and scheduled tribe households in total, rural and urban areas of the district manifests the same pattern as seen among the total households except in urban areas. In urban areas of the district, 89.66 per cent of scheduled caste households and 78.02 per cent scheduled tribe households live in their own houses as against 8.07 per cent households among the scheduled caste and 17.98 per cent among scheduled tribe households live in rented houses in the district.

A striking feature of the distribution of households among scheduled castes and scheduled tribes as far as tenure status of households is concerned is found in urban areas of the district. Here, 2.27 per cent of scheduled caste households and 3.99 per cent of scheduled tribe households live neither in their own houses nor in rented houses. These households live either in houses constructed on encroached land in unregularised slums or the structure that does not belong to the household. Tenure status of such households is categorized as others.

Column 2 of this table shows the facilities of the households of dwelling rooms. A specific category of dwelling room namely " No Exclusive room" shared by more than one household in the situations where there is only one room in a census house, which is used as a shop or office and the household also resides in it. Total no. of households having such "No exclusive room" is 5,921 in total, out of which scheduled caste figure is 2,212 and scheduled tribe figures is 583.

Data source: Census of India 2001, H- series. "Tables on Houses, Household amenities and Assets "

Note:

Permanent -1 Permanent houses refers to those houses whose wall & roofs are made of pucca materials i e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC are used for roof

Semi permanent -2 Semi-permanent houses refer to those houses made of other types of materials

Temporary -3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i e where grass, leavs, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc are used for roofs

Table 49 provides per cent distribution of households living in permanent, semi permanent and temporary houses in total, rural and urban areas of the district and at the police station level in Jajapur district. The definition of permanent, semi permanent and temporary houses is given at the bottom of the table for appreciation of the data users.

In the total areas of the district households living in permanent houses constitute 20.14 per cent as against 9.26 per cent households in semi permanent houses and 70.59 per cent in temporary houses. The same pattern of distribution of households in permanent, semi permanent and temporary houses of rural areas holds good like 18.94 per cent in permanent, 9.23 per cent in semi permanent and 71.82 per cent in temporary houses. But, the figure of urban areas shows 49.13 per cent are residing in permanent houses, 9.97 per cent of the households are in semi permanent status and 40.9 per cent are residing in temporary houses.

The present distribution of households living in permanent, semi permanent and temporary houses in total, rural and urban areas at different police stations level manifests a different trend. There are 10 police stations in Jajpur district and in all the police stations more than 60 per cent of the households remain in temporary houses. So also the same pattern of percentage distribution is found in the rural areas of different police stations of the district. However in case of urban areas of both the 3 police stations in the district majority of households 44.11 per cent to 52.49 per cent live in permanent houses.

Data source: Census of India 2001, H- series "Tables on Houses, Household amenities and Assets "

* Based on the improved drinking water source, drinking water supply has been classified as Improved ' or otherwise If the household has access to drinking water supplied from a tap or a hand pump / tube well or well situated within or outside the premises it is considered as having access to Improved drinking water source' In Orissa However, the concept of improved drinking water is state specific and this is to be considered accordingly

Note Percentage is to be given in brackets after the number of households

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

House list table 50 presents the number and per cent distribution of households enjoying improved drinking water facility, electricity, bathroom, toilet and drainage facility in total, rural and urban areas of Jajapur district along with its police stations.

The sources of improved drinking water as mentioned at the bottom of the table include sources like tap, hand pump, tube well and well. Out of the total 341,752 households in the district 312,570 constituting 91.46 per cent enjoy improved drinking water facility in the total areas of the district as against 91.22 per cent in rural areas and 97.33 per cent in urban areas.

Coming to the police station levels it is seen that the highest proportion of households enjoying improved drinking water facility is recorded in Jajapur Road police station (96.16 %) followed by Dharmasala police station (94.43 %), Jajapur police station (94.21 %), Korai police station (93.2%) and Mangalpur police station (91.35 %). In the rest of the police stations the per cent of households enjoying improved drinking water facility varies between 85.33 per cent to 91.14 per cent. The households in two towns namely Jajapur and Jajapur Road in the district enjoys improved drinking water facility to the extent of 97.67 percent and 97.10 per cent respectively.

As regards the availability of electricity in the households, it is recorded that 30.04 per cent of the households have been provided with electricity facility in the total areas of the district as against 28.25 per cent in rural areas and 73.28 per cent in urban areas of the district.

At the police station level, the proportion of households having electricity facility is less in Duburi (23.28%) and Sukinda (22.60%) police station. Maximum proportion of households having electricity facility is recorded in Jajapur Road police station (52.19%), followed by Jajapur (35.19%), Barchana (30.02%), Binjharpur (29.77%) and Dharmasala (28.25%). Among the towns, Jajapur police station has the highest proportion of households having electricity (74.74%) followed by Jajapur Road police station (72.30%).

Bathroom facilities available to the households in total areas of the district are 9.43 percent as against 8.07 per cent in rural and 42.30 per cent in urban areas. Among the towns, the households of urban areas of Jajapur enjoy more bathroom facility 45.30 per cent as against 40.30 per cent in Jajapur Road Town.

As regards toilet facilities, only 50,926 households are enjoying the facility. It is 14.9 per cent in total areas of the district as against 13.1 per cent in rural areas and 58.4 per cent in urban areas of the district.

As regards to drainage facility in the households of the district it is 12.74 per cent in total, 11.62 per cent in rural areas and 39.73 percent in urban areas. At police station level Duburi police station has lowest 6.41 percent drainage facility in the total areas. Jajpur Road has the highest drainage facility (24.4 %) in the total areas of the district. In the urban areas Jajapur town has the highest 44.88 percent drainage facility followed by Jajapur Road (36.27 %).

Table 51 provides number and percent of households using different type of fuels for cooking purposes in total, rural and urban areas of the district and police stations. As shown in the tables there are nine types of fuels used for cooking purposes by 341,752 households in the district. Among these fuels firewood is used in 48.64 per cent of households in total areas of the district as against 48.73 per cent in rural and 46.48 per cent in the urban areas of the district. Similarly, cow dung is used in 23.13 percent household in total areas and 23.90 percent households in rural areas of the district for cooking purpose.

But, in the urban areas of the district firewood is used by highest percentage (46.48 %) followed by liquid petroleum gas (24.06%) and Kerosene (15.11%) media of cooking. This evidently shows the better economic condition of urban households, which have considerable access to modern fuels besides the traditional ones.

In the towns of the district, firewood is predominantly used for cooking in Jajapur town (54.61 %) followed by 41.03 percent in Jajapur Road town. L.P.G. is used by the highest number of households (28.16 %) in Jajapur Road town followed by 17.95 percent in Jajapur town.

Data source: Census of India 2001, H- Series. "Tables on Houses, Household amenities and Assets "

Table 52 presents the number and per cent of households availing banking facility in total, rural and urban areas of Jajapur district and its police stations. This table also provides information on availability of household assets like radio/ transistor, television, telephone, bicycle, scooter, motorcycle, moped, car, jeep etc. in the households.

As regards banking services it may be mentioned here that banks refer to all types of commercial banks such as nationalized banks, private banks, foreign banks and co-operative banks and the service availed means the head of the households or any other member in the household is availing banking service provided by the bank or post office bank as a holder of any type of bank account. Accordingly, 56,978 (16.67%) households out of the total, 341,752 households in Jajapur district avail banking services as against 38.97 per cent in the urban and only 15.75 per cent in the rural areas.

As regards to different household assets bicycle claims the highest proportion among all the assets since 50.81 per cent households in total, 49.95 per cent in rural and 71.72 per cent in urban areas possess bicycle as their household asset. Radio/ transistor (27.59%) claims the second highest position closely followed by television (13.56%) as household assets. Expensive household assets like telephone, scooter, car, jeep, van claim very negligible proportion both in rural and urban areas. In urban areas 16.73 per cent households have telephone connection, 22.66 per cent household possess scooter, motor cycle, moped and only 3.51 per cent own car , jeep, van etc.

Regarding banking facilities availed by households at police station levels, it is found that 25.53 percent of households have banking facility in total areas of Jajapur Road police station followed by 20.66 per cent households in Duburi police station, 18.22 percent in Binjharpur police station and 17.82 percent in Sukinda police station. In total areas of other police station it varies between 13.26 percent to 16.56 percent. However, in the urban areas the proportion of household availing banking services is considerably higher.

Coming to the household assets at the police station level it is seen that maximum proportion of households ranging between 39.14 percent to 65.11 in total and rural areas and 70.23 percent to 73.94 percent in urban areas possess bicycle as their household asset distantly followed by radio/ transistor and television sets. Valuable assets are possessed by negligible proportion of households both in total and rural areas

The household not having household assets as mentioned in col. 6-11 of the table claim considerable proportion in total, rural and urban areas of the district and police stations.

(xii) Scope of the Village Directory :

The publication of District Census Handbook (DCH) is an excellent venture of the Census network. Information pertaining to quality of life and facilities available in village and urban areas after being collected through perfect articulated schedules, are presented in the form of Village Directory and Town Directory respectively for each district from which a planner envisages to transform the backward society to a modern one. Village Directory contains data on each and every village, may be a revenue village or unsurveyed village or notified forest village or forest cluster in the rural areas C.D. Block wise/P.S. wise. The names of village have been arranged in ascending order of the permanent location code of the villages under different Police station within the jurisdiction of the concerned C.D. Block. It is noteworthy to mention that Census of India-2001 has introduced the assignment of permanent eight digited location code number to all villages in the state for facilitating easy comparability of data over the period . In order to facilitate the readers & data users, an alphabetical list of villages under each C.D. Block showing the Police station with its location code number has been provided at the beginning of the village directory. In case of village (s) treated as an out growth(s) in an urban agglomeration or treated as a Census town, the code number(s) and the name(s) of village(s) has been provided minus data thereof separately. In case

of part village forming a portion of an outgrowth, the corresponding data of the rural portion of the village only have been presented in the village directory. However the land utilization data for such census towns have been made available in Appendix – III.

Maps being the instruments of depicting the location of the places, natural features, roads etc. within the respective administrative boundaries, these have been incorporated accordingly in the volume. All the maps so presented in this volume have been authenticated by the concerned revenue authorities so far as the boundary, spellings and locations are concerned. In case of the units adjacent to the coast land of the state, such maps have been cleared by the Survey of India through the Office of the Registrar General of India.

The district map showing the Police Station boundary have been given at the beginning of the village directory. In addition to this maps, C.D. Block maps depicting the boundaries of various police stations under the C.D. Blocks, location of all the villages, symbolical representation of important amenities etc. have been incorporated in this volume prior to the presentation of data for the concerned C.D.Block.

The information on village directory has been provided in the statement containing 24 columns and these are relating to area of the village in hectares, population and number of households, availability of amenities like educational, medical, drinking water, post/telegraph/telephone facility, commercial & co-operative banks, agricultural/ non-agricultural / other credit societies, recreational and cultural facilities, communications and power supply etc. This also provides information on the mode of approach to village, the name of the nearest town and its distance from the village, whether news paper/magazine is received by the villagers, income & expenditure of local bodies and also the information on the most important commodities that are manufactured in the village. In case of non-availability of any of the amenities in the village, distance in broad ranges of the nearest place where the facility is available has been provided in the directory.

Apart from these, the land use data for different villages in conformity with the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India have been presented in the said statement.

The Ministry of Agriculture has recommended the maintenance of records of land use pattern under five categories. These are as follows:

1. Forests
2. Not available for cultivation:
   (a) Lands put to non-agricultural uses
   (b) Barren and unculturable lands
3. Other uncultivated lands excluding fallow lands:
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes
4. Fallow lands:
   (a) Fallow lands other than current fallows
   (b) Current fallows
5. Net area sown

The land-use data in Village Directory are in accordance with the above mentioned classification. Forest is the same as category 1 above. Irrigated (by source) and un-irrigated give break-up of agricultural land which are a combination of categories 4 (a & b) and 5 above. Culturable waste corresponds to category 3 (a+b+c) above. Area not available for cultivation corresponds to category 2 (a+b).

The information on village wise amenities and land-use pattern for the village directory have been collected from the Tahasildars who in turn had utilized the services of village level workers like Revenue Inspector & Amins working under them. In order to ensure the accuracy and quality of data, these data have further been compared with the data collected from various concerned governmental departments. Information on educational institutions has been collected from Inspector of Schools/D.I of schools/ concerned Block Development Officers. Directorate

of Health services of Orissa/respective Chief District Medical Officers/concerned Block Development Officers etc. have supplied information relating to Medical facilities. Information on Posts & telegraphs and telephone facilities has been obtained from the respective authorities of Government of India. Likewise, Reserve Bank of India has supplied information on commercial and co-operative banks. Data on agricultural/non-agricultural/other credit societies have been verified, wherever possible, with the information furnished by the concerned Registrars of Co-operative Societies.

(xiii) Scope of Town Directory :

The town directory abounds in a compendium of information relating to all towns statutorily notified as well as census towns in a district. The towns have been arranged in ascending order of their location code within a district and do not cover strictly the military areas in the district.

The information on amenities and other aspects presented in codes have been explained separately. As regards urban agglomeration, a conventional creation of Census, the names of such agglomerations have been indicated which are similar to the names of the main town of the agglomerations. The particulars of the constituents of the agglomeration have been furnished separately.

The concept of out growths has already been discussed under urban agglomeration. To reiterate, the town directory particulars of outgrowths of the urban units are not available separately, and such particulars of the outgrowths are merged in the core town.

Information on town directory has been collected from concerned Executive Officer of statutorily notified Towns and from Block Development Officer for Census Towns. The details of information on town directory presented in seven statements are briefly explained below.

Statement- I: This statement presents the status and growth history of towns. In col.1 of the statement serial number of the town and in Col.2 name of the town in alphabetical order along with the class and administrative status have been furnished. In col.3 location code of the town and in Col.4, the name of the tahasil and police station in which the town is situated are given. Col.5 gives the names of C.D.Blocks of census towns. Area of the town(in square kilometer), number of households including houseless households, population and growth rate of population, density and sex ratio etc. are presented in subsequent columns.

Statement – II: This statement provides information on physical aspects and location of the town. These information include average rain fall, maximum and minimum temperature for the last ten year beginning from 1990-1999, distance of the town from the state, district, sub-division/tahsil/police station headquarters etc., the nearest city with one lakh and above population, nearest city with population of five lakh and more, railway station, bus facility, navigable river/canal (if within 10 kms of the town) are indicated in different columns.

Statement- III: It depicts the picture of the municipal finance of the town for the year 1998-99. The receipts from different sources are indicated under col.4 to col.10 where as the expenditure under various items have been shown under col.11 to col.17.

Statement IV: The statement depicts the picture of civic and other amenities available in the town. These include total population, scheduled caste and scheduled tribe populat ion of the town as per 2001 census. Apart from this, the total road length in kms, system of sewerage, number of latrines, method of disposal night soil, source of protected water supply, system of storage of drinking water, fire fighting services, electrification with number of connection for different uses are shown in different columns.

Statement –V: This statement presents information on medical, educational and recreational and cultural facilities available in the town in 1999. The medical institutions cover hospitals/dispensaries/T.B.clinic, etc with number of beds. These institutions may have been owned by Govt./Local bodies, private agencies, etc. Similarly, the educational institutions cover both general and technical ones and include arts/science/

commerce colleges (of degree level and above), medical colleges, engineering colleges, polytechnics, reconiged shorthand/type writing/vocanational training institutions, higher secondary/intermediate/senior secondary PUC (pre-university college)/junior college level, secondary/matriculation, Junior secondary and middle schools, primary schools, adult literacy centers, working women's hostels with number of seats, stadium,cinema,auditorium/drama/community halls, public libraries including reading rooms etc. available in the town are furnished under different columns.

Statement- VI: Information on three most important commodities exported, three most important commodities manufacture, number of banks, number of agricultural credit societies and number of non-agricultural credit societies pertaining to the respective towns in the district are reflected in this statement.

Statement – VII: Like the village directory, the town directory format has also been modified to some extent. In the 1991 Census, civic amenities available in notified/recognized slums only in urban areas were collected. Contrary to this provision, information/data relating to availability of civic amenities in each slum irrespective of it being recognized/notified was recorded in the 2001 census with the objective to ascertain the existing civic amenities in slums and to provide necessary information/data required for slum improvement/development. Besides the number of households and population, amenities like paved roads (in kms), system of sewerage, number of latrines (category wise), method of disposal of night soil, number of tap points etc. and electric connection available in the slums are presented in this statement.

PART A : VILLAGE & TOWN DIRECTORY

Section I - Village Directory

Note explaining the abbreviations used in the village directory :

The "Village Directory" is one of the traditional compilations of the census. It gives the list of villages, their location code numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural / non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply, availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3, i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23

The Village Directory format has 25 columns and the details given under each column for the village are as follows:-

Column 1 : Serial Number

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code numbers.

Column 2 : Name and Location Code Number of village

The name and location code number of the village are shown against this column.This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares are given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column-wise details are given below:

Column 6 : Educational

Classes upto class V included in Primary School. This will include Nursery School, Kindergarten School. pre-basic School, pre-primary School, Junior Basic School upto class V.

Classes from VI to VIII are included in the Middle School.

Classes from IX to X are included in Secondary School. Classes XI and XII are included in Senior Secondary School.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	H
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank, etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies

If the village enjoys the services of Credit Societies, i.e., Agricultural Credit Societies, Non-Agricultural Credit Societies or other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the distance of the nearest place where such facility exists is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facility, such as, Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in this column. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable waterways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than river, canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : Newspaper / Magazine

If village receives any Newspaper/Magazine the same is noted in this column using following codes:

(i)	Newspaper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use, i.e., area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Dash '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC

(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

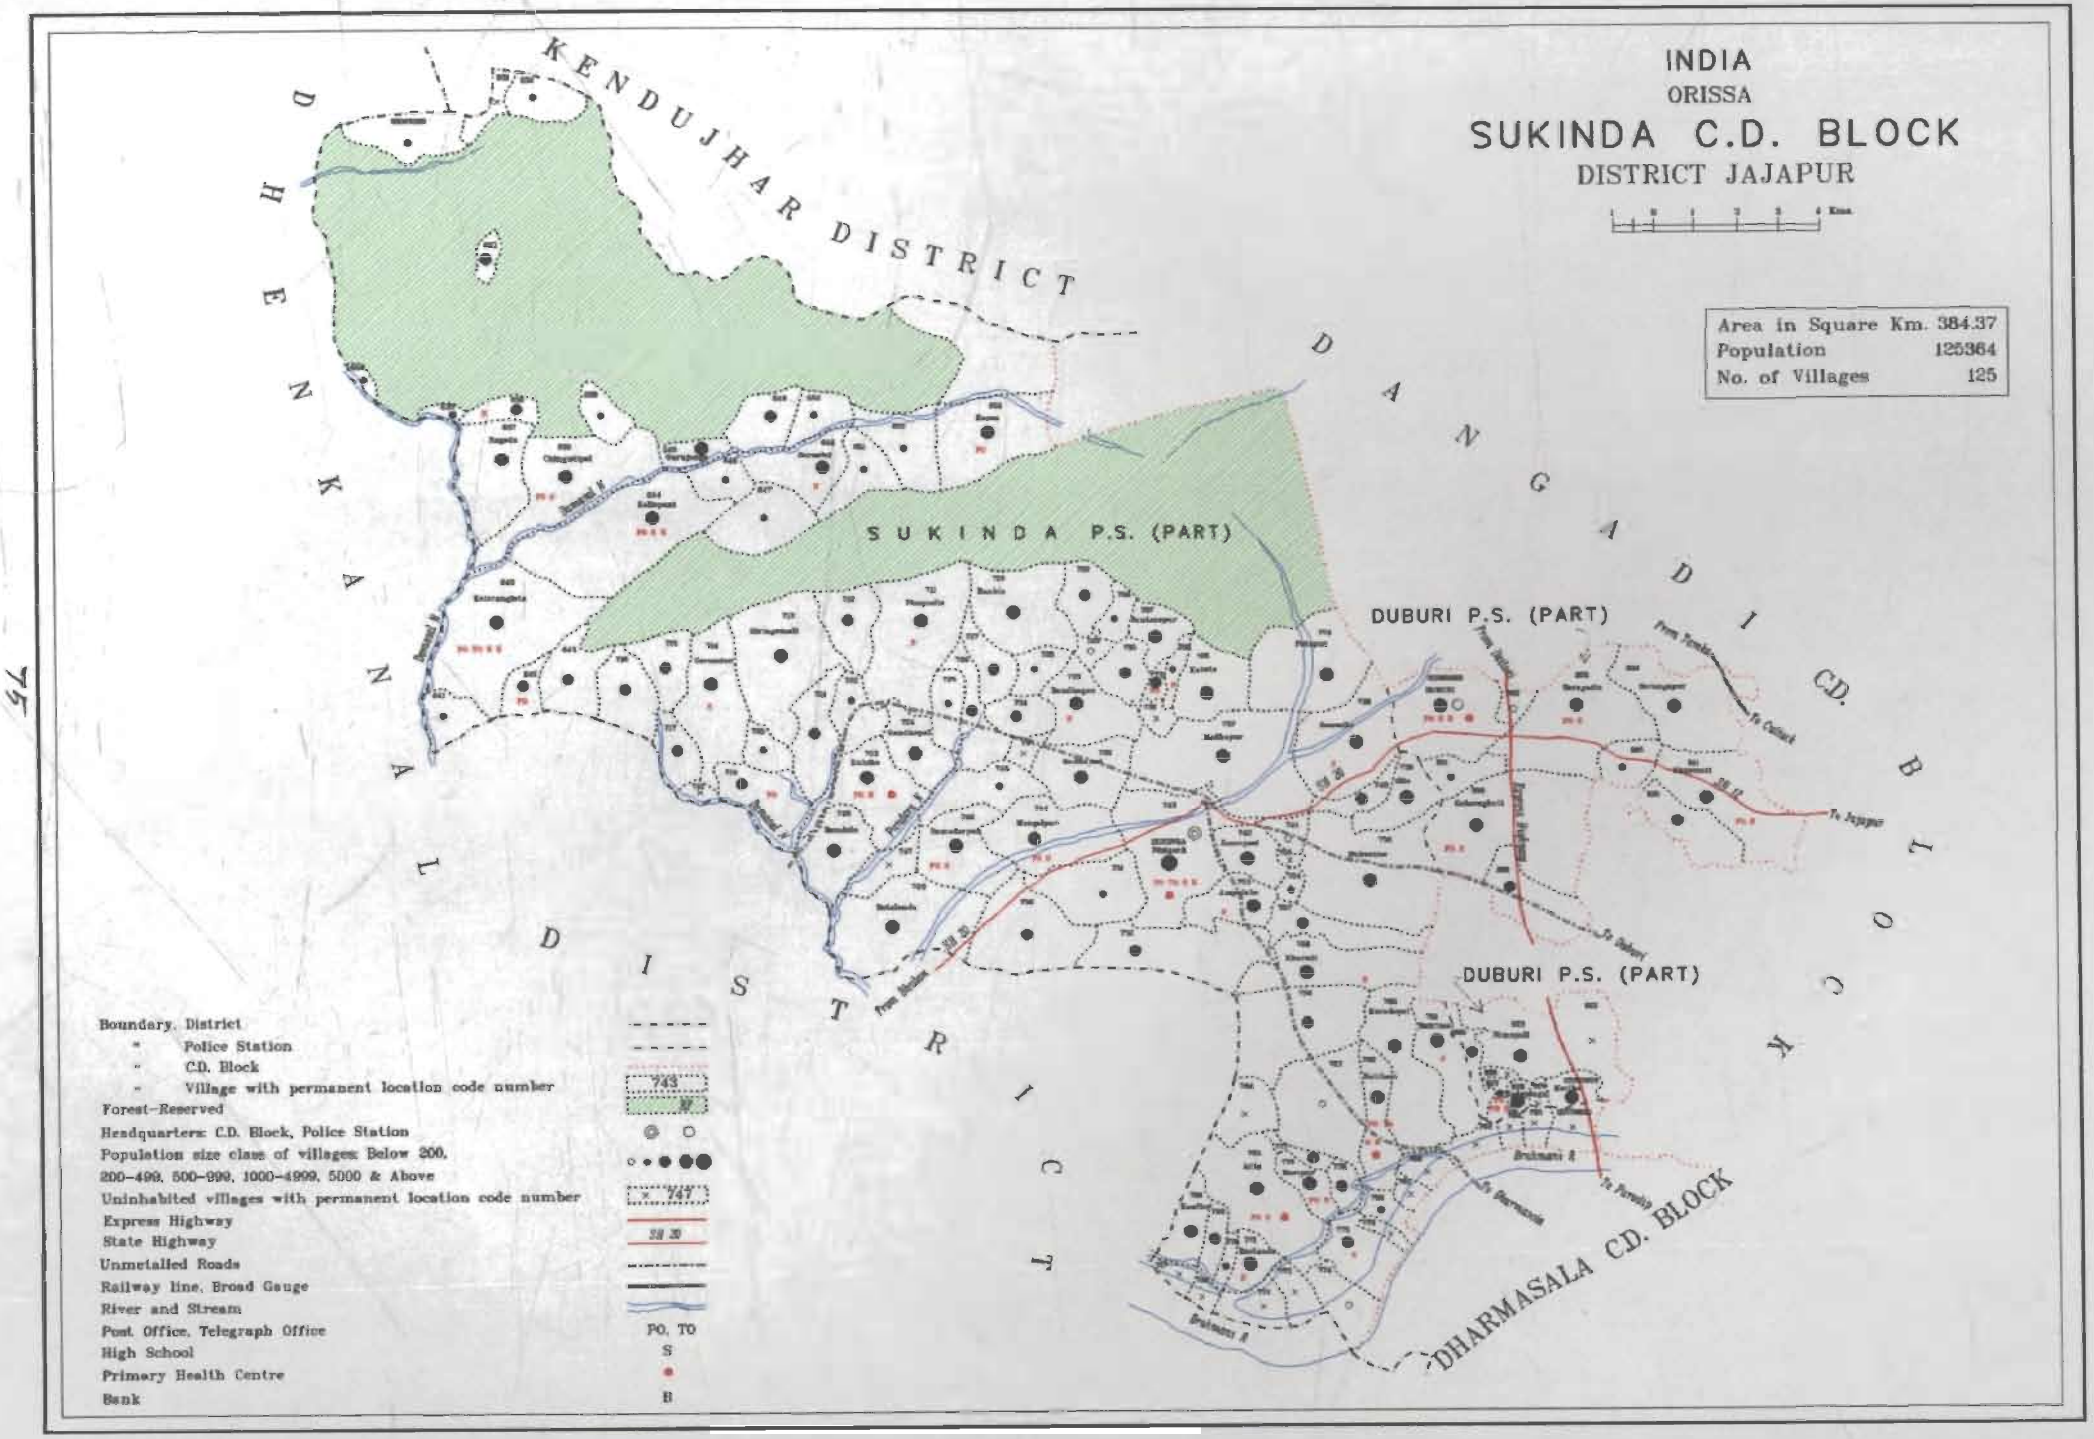

Appendix-I	It gives the abstract of educational, medical and other amenities available in villages, CD Blockwise, of the district.
Appendix-I-A	Indicates number of villages, CD Blockwise, having one or more primary schools.
Appendix-I-B	Indicates number of villages, CD Blockwise, having primary, middle and secondary schools.
Appendix-I-C	Shows number of villages, CD Blockwise, with different sources of drinking water facilities.
Appendix-II	Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.
Appendix-II-A	Indicates list of Census Towns which do not have one or more amenities.
Appendix-III	It gives the land utilization data in respect of Census Towns / non-municipal Towns.
Appendix-IV	CD Blockwise, list of inhabited villages where no amenity other than drinking water facility is available
Appendix-V	Summary showing number of villages having or not having Scheduled Castes population.
Appendix-VI	Summary showing number of villages having or not having Scheduled Tribes population.
Appendix-VIIA and VIIB	The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.
Appendix -VIII	Number of villages under each Gram Panchayat (CD Block-wise)

SECTION II
TOWN DIRECTORY

Section II - Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I) Municipal Corporation	M. Corp.
(II) Municipal Committee	MC
(III) Municipal Council	M Cl
(IV) City Municipal Council	CMC
(V) Town Municipal Council	TMC
(VI) Municipal Board	MB
(VII) Municipality	M
(VIII) Cantonment Board/Cantonment	CB
(IX) Notified Area	NA
(X) Notified Town	NT
(XI) Notified Area Committee/ Notified Area Council	NAC
(XII) Notified Town Area	NTA
(XIII)Industrial Notified Area	INA
(XIV) Industrial Township	ITS
(XV) Township	TS
(XVI) Town Panchayat	TP
(XVII) Nagar Panchayat	NP
(XVIII) Town Committee/ Town Area Committee	TC
(XIX) Small Town Committee	ST
(XX) Estate office	EO
(XXI) Gram Panchayat	GP
(XXII) Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column 1 to 5 : Self explanatory

Column 6 : Road length (in kms.)

Information about kutcha / pucca road is recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage

Generally, sewerage system is implied by the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both public and private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

For source and capacity of storage system, the following codes are used in these columns:

Column 13 :

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14 :

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 13 and the storage capacity against each in kilolitres (in bracket) are presented in column 14.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and charitable institutions or social agencies like the missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or primary health centres, these

are treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institution of any type, the number of such institution (s)e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department, etc., of the government or semi-government or autonomous bodies, public sector undertakings, etc.

The following codes are used :

(i)	Shorthand	SH
(ii)	Typewriting	Type
(iii)	Shorthand & Typewriting	SH Type
(iv)	Others	O

The vocational institutions like - Applied Art/ Painting College, Pharmacy College, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School, etc. are covered under 'Others'.

Column 11 to 14 : Higher Secondary/ Intermediate/Senior Secondary/PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools

Schools up to class V are treated as Primary or Elementary Schools. These include Nursery schools, Kindergarten Schools, Pre-Primary Schools, Junior Basic Schools upto class V and Primary Schools upto class IV.

Schools upto VIII are considered as Middle School or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary Schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like Middle Schools with primary classes or Secondary Schools with Middle classes, these are also included in the number of Primary and Middle Schools, respectively. For example, if in a town, there are two Primary Schools and one Middle School with Primary classes, the number of Primary Schools in the town is given as three and that of Middle School as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel, if available in the referent town, is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library PL

(ii) Reading room RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non-Agricultural Credit Societies

The total number of Agricultural Credit Societies and Non-Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town Area Committee, etc.

PART B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting October, 2002.

Task Force on Quality Assurance

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the

Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices which were specially set up for this purpose. The individual Scheduled Castes and the Scheduled Tribes population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/ Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encoun-tered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Castes/Tribes returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribes at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes, Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts and Cities, Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main workers were presented in to four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of this literacy data.

Level of presentation in District Census Handbooks:

The Primary Census Abstract data in different PCAs are presented at different levels.The level of presentation of Primary Census Abstracts areas under:

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures

The area figures supplied by local revenue authorities of the district in respect of tehsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/ Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

ANNEXURES

ANNEXURE-I

Number of villages under each Gram Panchayat

Gram Panchayat plays a pivotal role in the Panchayati Raj System. It entrust the people with the power to manage the local affairs of villages for the development and better governance of their locality. In the rural areas, Gram Panchayat works for the development of road, sanitation facilities, education, drinking water facilities, minor irrigation and supply of power etc.to the villages. The overall progress of the villages coming under the Gram Panchayat lies with the participation of people in these activities. Keeping this in view, the data on Gram Panchayat and the number of villages coming under each with their population have been presented in the table below.

The analysis of the data of Jajapur district shows that among 10 C.D. Blocks in the district, Badachana C.D. Block has highest number (31 nos.) of Gram Panchayats and in Sukinda, Danagadi and Korai C.D.Blocks the number of Gram Panchayats are at the bottom with 20 nos of Gram Panchayats each.

Table - I

Number of Villages under each Gram Panchayat (C.D.Blockwise)

Name of the C.D Block	C.D. Block Code	Gram Panchayat Name	No of Villages	Area in Sq Km	Number of Households	Total Population	Scheduled Caste Population	Scheduled Tribe Population

ANNEXURE-II

Fertility and Mortality, 1991 Census

The district of Cuttack was split up into four districts namely Jagatsinghpur, Kendrapara, Jajapur and Cuttack after the 1991 Census. The estimates for 1991 Census had been calculated for the undivided district of Cuttack and the same crude birth rate, fertility rate and other tables and statements presented and discussed here in after will be applicable for the newly formed districts of Jagatsinghpur, Kendrapara and Jajapur as the same for each of the districts is not available separately for the 1991 Census.

Table- II provide details of child mortality by q (1), q (2), q (3) and q (5) for persons, males and females. Here q (1), q (2), q (3) and q (5) refer to probability of dying between birth and age one, two, three and five respectively. The table shows a sharp decline of child mortality in age one, age two, age three and age five in 1991 both in persons, males and females in the state and the district in comparison to 1981. In 1981 the child mortality rate was much higher in the state as well as in district. A notable feature that emerges out of the study of the annexure is that the female child mortality in all the ages is lower than the male child both in the district and in the state in 1981 and 1991.

Table- II

Estimates of child mortality indicators by sex at state and district level

State/ District	Year	Person				Male				Female			
		q(1)	q(2)	q(3)	q(5)	q(1)	q(2)	q(3)	q(5)	q(1)	q(2)	q(3)	q(5)

ANNEXURE-III

Various measures of Fertility and Mean Age at Marriage, 1991 Census

Fertility and mortality are natural processes and contribute substantially to the growth of population. The 1991 Census also records information relating to fertility namely age at marriage, number of surviving children number of children ever born alive and children born alive during the last year. The first three questions were asked to all ever-married women and the last question related to currently married women only. The measures of fertility worked out are based on F-series tables of 1991 Census pertaining to Orissa and these measures have been defined under Non Census Concepts.

Data on various measures of fertility and mean age at marriage for erstwhile 13 districts of Orissa and that of the state on the basis of 1991 census results are presented in the Table given below.

As shown in Table- III the fertility rate for the state and the district is 4.27 per 1000 population and the crude birth rate of the state is slightly higher than the rate recorded for the district. Among all the districts of the state Phulabani district records highest fertility rate of five where as Cuttack district claims fifth position with 4.27 per thousand population.

Child women ratio :

The ratio between the child and women is a very useful and simple form of fertility measurement. Child woman ratio is the ratio of children under five years

Table- III

Various measures of fertility and mean age at marriage, 1991 Census

Sl. No.	State/ District	GFR	GMFR	TFR	TMFR	CBR	Number of Children ever born per woman in age group 45-49	Child woman Ratio (0-4) Ages	Mean age at marriage of currently married women

Col 8 CWR (0-4) No of children of age 0-4 years per 100 women aged 15-49 years (District profile, 91)

of age (0-4 year) and women from 45-49 years of age. As per the 1991 Census, the child woman ratio was 46.5 at the state level. At the district level it is seen that seven districts namely Kendujhar, Mayurbhanj, Baleshwar, Phulabani, Koraput, Ganjam and Dhenkanal have recorded higher child women ratio than the state and the rest six districts have recorded lower child women ratio.

Number of children ever born per women in 45-49 age groups, 1991 census

As shown in this table, the number of children ever born per married women in the 45-49 age group was 4.22 at the state level and at the district level, highest number of children ever born to women in this age group was recorded in Baleshwar district followed by Cuttack district Kendujhar, Dhenkanal and Puri. The lowest number of 3.80 children per ever-married women in this age group is noticed in Mayurbhanj district.

Mean age at marriage of currently married women

Mean age or in other words, the average age at marriage of currently married women in the state is 17.96 years as per the 1991 Census.

As far as the average age of currently married women at the districts is concerned, it is observed that six districts namely Sundargarh, Koraput, Phulbani, Kendujhar, Cutttack and Puri have recorded higher average than the state. However, among these districts, Koraput, Phulbani, Sundargarh and Kendujhar are mainly inhabited by scheduled tribe population.

ANNEXURE - IV

Percentage distribution of Migrants by place of birth / place of last residence, 2001 census

Migration is a fact of life. It contributes substantially to the growth of population. Even in those economies where mobility is almost absent the female population migrate after marriage. Internal migration may be between two places. It may be inter district, inter-regional and inter state migration. In the event of internal migration, the population of the country remains unaffected where as only sub-national or regional population is affected.

The internal migration of population has not only demographic but also socio-economic implications and its effect are more serious. Such migration tends to affect age , sex ratio, demographic behaviour such as fertility, mortality, and above all the population structure as a whole.

There are 96,496 migrants in the district of Jajapur of which 20,882 are males and 75,614 are females. The composition of migrants in the district shows that more than three fourth (92.62 percent) have emigrated from different districts of the state. Inmigrants from other states of India constitute 7.17 percent. Immigrants from other countries form 0.21 percent only.

Table - IV

Inmigrants classified by place of birth, 2001

State/	Total			From other districts of the State			From other States/UTs			From other Countries		
District	Person	Male	Females	Person	Male	Females	Person	Male	Females	Person	Male	Females
1	2	3	4	5	6	7	8	9	10	11	12	13
Orissa	3,189,242	1,159,780	2,029,462	2,472,336	868,127	1,604,209	658,984	260,729	398,255	57,922	30,924	26,998
				(77 52)	(74 85)	(79.05)	(20 66)	(22 48)	(19.62)	(1.82)	(2.67)	(1 33)
Jajapur	96,496	20,882	75,614	89,374	17,412	71,962	6,918	3,361	3,557	204	109	95
				(92.62)	(83.38)	(95.17)	(7 17)	(16 10)	(4.70)	(0 21)	(0.52)	(0.13)

Coming to the sex wise distribution of migrants in the district it is seen that the proportion of female migrants in the district is much higher than their male counterparts so far as in migration from different districts of the state is concerned. But the proportion of male inmigrants from other states/ UT to the district is higher than the females.Similarly male immigrants from other countries constitute 0.52 percent as against 0.13 percent of female. Above all, the inmigrants from other districts of the state constitute the majority followed by other states/ UT and other countries. These migrants have come to the district state from their place of birth.

Table- V

Inmigrants classified by place of last residence with duration of residence 0-9 years, 2001Census

State/	Total migrants			From other districts of the State			From other States/UTs			From other Countries		
District	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
Orissa	1,176,547	494,822	681,725	942,929	388,565	554,364	229.687	103,986	125,701	3,931	2,271	1,660
				(80.14)	(78.53)	(81.32)	(19.52)	(21.01)	(18.44)	(0 33)	(0 46)	(0 24)
Jajapur	30,686	9,163	21,523	27,964	7,476	20,488	2,680	1,661	1,019	42	26	16
				(91.13)	(81 59)	(95.19)	(8.73)	(18 13)	(4.73)	(0.14)	(0.28)	(0 07)

Table-V presents data on inmigrants by place of last residence as per 2001 Census.Migration from place of last residence other than the place of birth may be termed as last residence migration. Such migrants number 1,176,547 persons in the state and 30,686 persons in the district.Among 30,686 migrants in to the district of Jajapur, 81.59 percent males and 95.19 percent females have emigrated from other districts of the state with duration residence 0 - 9 years. Inmigration from other states constitutes 18.13 percent males and 4.73 percent females. Inmigrants from other countries form a very negligible proportion of 0.14 percent.

It may be mentioned here that, Kendrapara, Jagatsinghapur, Cuttack and Jajapur district were created from the old Cuttack district in which the number of inmigrants by place of last resedence with duration of residence 0-9 years was 106,998 with 47,246 males and 59,752 females in 1991 Census.

ANNEXURE - V

Brief account of main religion in the district as per 2001 Census

Religion is one the important characteristics of population. It not only influences the socio-cultural life of the people but also binds the whole population belonging to a specific religion in the bonds of unity and brotherhood. The information on religion collected by census is of great interest to the public in general and anthropologists, administrators, sociologists, demographers and planners in particulars.

At the 2001Census, six numerically major religions of the State and the Jajapur District along with their population are shown in table- V.

As noticed in Table- VI, followers of Hindu religion constitute more than 90 percent in the state and Jajapur district. In the district the followers of Hindu religion constitute 95.01 percent. Although Christian population stands second at state level, Muslim population with 4.79 percent, ranks second position in the district. The followers of Christian, Sikh, Jain and Buddhist religions claim a very negligible proportion.

A look at the rural urban distribution of followers of these religions reveals that 95.63 percent followers of Hindu and 93.37 per cent of Muslim are reported from rural areas of the district and concentration of followers of Sikh and Jain religions is found in urban areas of the district.

In the 1991 Census, Cuttack district was not in existence as a separate district and it was a part of undivided Cuttack district. In 1991 Census the total number of followers of all Religions in undivided Cuttack district was 5,522,659 of which the highest number of followers was claimed by Hinds (95.46 %) followed by Muslims (4.13 %), Christians (0.20 %) and Buddhists (0.10 %).

Table-VI

Religions arranged in descending order for the State and District, 2001 Census

State/ District	Religions	No of followers	Percentage to total Population	Percentage

ANNEXURE - VI

Marital status of population as per 2001 Census

Marital status is one of the important demographic characteristics of the population. The composition of population on the basis of marital status is defined in Indian population census is i) Never married ii) married iii) widowed iv) divorced and separated for the state and the district is presented in table VII.

Table- VII reveals that the population under never married category claims more than half (52.62 percent) among total population and among the males (56.77 percent). The female population under this category claim 48.35 percent of the total population in the district.

The proportion of population in the married category is 42.82 percent among persons, 41.36 percent among males and 44.32 percent among females.

The proportion of population in rest of the marital categories varies from 0.09 percent to 6.93 percent. Almost the same pattern of distribution of population in different marital categories holdsgood at the state level.

In the undivided Cuttack district, the percentage of Never Married persons was 52.22 followed by Married persons with 42.93, Widowed with 4.69 and Divorced/ Separated with 0.14 percent in the 1991 Census. On the sexwise distribution of married persons, females share was higher than males.

Table -VII

Sexwise distribution of Population by Marital Status, 2001 Census

State /District	Marital Status	Persons	Males	Females
1	2	3	4	5
ORISSA	Total	36,804,660	18,660,570	18,144,090

ANNEXURE -VII

Age, Sex and Education in the district, 2001 Census

Educational qualification according to age and sex is depicted in various tables of Census.Certain concepts associated with literacy have been defined in the earlier paragraphs under "Census Concepts".

Distribution of literate persons in different Education levels in the State : 2001 Census

Distribution of literate persons in different educational levels at the state level is shown above. The proportion of literate persons in different educational levels does not provide an encouraging picture since more than 50 percent (58.25 percent) among literate persons, males and females have attained only primary and below primary level of education followed by middle standard with 14.50 percent persons 14.87 percent males and 13.93 percent females.

As far as technical education is concerned, it may be mentioned here that the proportion of such persons to total literate persons is abysmally low. It is only 0.74 percent.

Among the higher educational levels graduate and above educational level claims 5.98 percent followed by higher secondary/ intermediate with only 5.15 per cent.

Table - VIII

Distribution of Literate and educated persons in different educational levels in the State, 2001

Name of State	Educational Level	Persons	Males	Females
1	2	3	4	5
ORISSA	Total Population	36,804,660	18,660,570	18,144,090
	Literate	19,837,055	11,992,333	7,844,722
	i) Literate without any formal schooling including educational level unclassified	428,001 (2.16)	279,304 (2 33)	148,697 (1.90)
	ii) Below Primary	5,755,797 (29 02)	3,328,385 (27.75)	2,427.412 (30 94)
	iii) Primary	5,798,954 (29.23)	3,280,957 (27 36)	2,517,997 (32.10)
	iv) Middle	2,875,760 (14 50)	1,783,236 (14.87)	1,092,524 (13.93)
	v) Matric/Secondary	2,616,294 (13.19)	1,665,245 (13.89)	951,049 (12.12)
	vi) Higher secondary/Intermediate Pre-University/Senior secondary	1,021,802 (5 15)	664,408 (5 54)	357,394 (4 56)
	vii) Non-technical diploma or certificate not equal to degree	8,944 (0 05)	7,495 (0.06)	1,449 (0 02)
	viii) Technical diploma or certificate not equal to degree	145,863 (0.74)	116,593 (0 97)	29,270 (0 37)
	ix) Graduate & above	1,185,640 (5.98)	866,710 (7 23)	318,930 (4.07)

Table - IX

Distribution of Literate and educated persons in different educational levels of District, 2001

Name of District	Educational Level	Persons	Males	Females
1	2	3	4	5
Jajapur	Total Population	1,624,341	823,747	800,594
	Literate	1,004,464	582,222	422,242
	i) Literate without any formal schooling	15,016	9,658	5,358
	including educational level unclassified	(1.49)	(1.66)	(1.27)
	ii) Below Primary	258,445	141,827	116,618
		(25.73)	(24 36)	(27.62)
	iii) Primary	289,716	153,847	135,869
		(28.84)	(26.42)	(32 18)
	iv) Middle	162,077	96,359	65,718
		(16.14)	(16.55)	(15.56)
	v) Matric/Secondary	153,278	93,161	60,117
		(15.26)	(16.00)	(14.24)
	vi) Higher secondary/Intermediate	58,895	37,458	21,437
	Pre-University/Senior secondary	(5 86)	(6.43)	(5 08)
	vii) Non-technical diploma or	456	374	82
	certificate not equal to degree	(0 05)	(0.06)	(0 02)
	viii) Technical diploma or certificate	7,037	5,292	1,745
	not equal to degree	0.7	0.91	0.41
	ix) Graduate & above	59,544	44,246	15,298
		(5.93)	(7.60)	(3.62)

As per the 2001 Census the population of Jajapur district is 1,624,341 comprising 823,747 males and 800,594 females. After excluding population in age group 0-6 the literate and educated person in the district number 1,004,464 with 582,222 males and 422,242 females. Percentage of total literate person constitute 71.44 percent of the total population of the district. The distribution of literate is shown in table-IX.

The educational attainment of the population has been classified into different educational levels. Among these educational levels, primary educational level claims 28.84 percent closely followed by below primary level with 25.73 percent and middle with 16.14 percent. Matriculation and secondary level claims 15.26 percent. Among higher educational level, Graduate and above educational levels claims 5.93 percent followed by higher secondary/senior secondary with 5.86 percent. The pattern of distribution of males and females in different educational level also holds well with a slight variation among females in below primary and primary level education.

In the 1991 Census the total literate persons of the undivided Cuttack district was 2,939,623 of the the highest percentage was recorded under Middle education level i.e. 26.41and the lowest percentage was 0.09 in the educational level of Non-technical diploma not equal to degree. the percentage of Graduate and above persons was 4.28 only whereas the primary level claimed 26.05 percent only.

Table - X

Distribution of females in the age group 15-44 years by educational level, 2001

State/District	Total Rural Urban	No. of Women aged 15-44 Years	Percentage of Women aged 15-44 years by educational level					
			Total	Illiterate	Literate but below middle	Middle but below Matric	Matric but below Graduate	Graduate & above
ORISSA	Total	8,589,378	100	46.29	26.39	9 06	14.78	3.48
	Rural	7,224,698	100	50 62	27.07	8.72	11.74	1 85
	Urban	1,364,680	100	23 39	22.76	10.89	30 84	12 12
Jajapur	Total	385,207	100	33.88	28.93	12 54	20 81	3.84
	Rural	367,200	100	34.51	29 2	12 6	20.24	3 45
	Urban	18,007	100	21 19	23 22	11.28	32 45	11 85

Table- X given above provides distribution of women in age group 15-44 in different educational levels in the state and the district. The proportion of females in all the educational levels is considerable higher both in total, rural and urban areas of the district as compared to the state average except with a slight variation in graduate and above in urban areas of the district. The percentage of illiteracy of this category in the district is 33.88.

As per 1991 Census in undivided Cuttack district, the percentage of literate females in the age group 15-44 in the education level of literate but below middle was 25.72 followed by middle but below matric with 17.89, matric but below graduate with 10.81 and graduate and above was only 2.05 percent. The percentage of illiterate of this category was 43.53 for total with 45.73 for rural and 28.18 for urban areas of the district.

Table -XI

Children in the age group 0-14 years with nos. of children attending school, 2001 Census

Name of the State/Dist	Description	Total			Rural			Urban		
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8	9	10	11
ORISSA	Total Population in the age group 0-14 years	12,207,872	6,235,873	5,971,999	10,592,499	5,402,181	5,190,318	1,615,373	833,692	781,681
	No of Children attending School	5,618,880	3,042,840	2,576,040	4,721,148	2,569,809	2,151,339	897,732	473,031	424,701
	Percentage	46.03	48.8	43 14	44.57	47.57	41.45	55 57	56.74	54 33
Jajapur	Total Population in the age group 0-14 years	524,303	269,217	255,086	502.636	258,016	244,620	21,667	11,201	10,466
	No. of Children attending School	265,372	141,408	123,964	253,189	134.991	118,198	12,183	6,417	5,766
	Percentage	50 61	52 53	48 6	50.37	52 32	48 32	56.23	57.29	55 09

Table -XI depicts sex wise distribution of children in the age group of 0-14 years in rural and Urban areas of the State & district and the percentage of children in this age group attending Schools.

As shown in the table there are 524,303 number of children in 0-14 age group in the district of which 265,372 children constituting 50.61 percent are attending school. In the rural and urban areas of the district number of children attending schools form 50.37 percent and 56.23 percent respectively.

Coming to the sexwise distribution of male and female children in the district it is seen that 52.32 percent male and 48.32 percent female children in the rural areas of the district are attending schools as against 57.29 percent male and 55.09 percent female children in the urban areas. Almost the same pattern of distribution of male and female children in rural and urban areas who are attending schools holds good for the State.

ANNEXURE - VIII

Mother tongue, 2001Census

Language is an important attribute of population and has great relevance and significance in multi ethnic and multi lingual social structure like Orissa. The definition of mother tongue is given under "Census concept"

The Census of India is the richest source of language data and has thrown much light on the ethnic and linguistic characteristics of the population. Like the previous census the mother tongue as returned by individual was collected and were classified and grouped under appropriate languages according to their linguistic characteristics.Details of mother tongue returns as recorded in 2001census are given in table XII.

Distribution of Mother tongue in Orissa, 2001Census.

Table -XI provides data at the State level. The major language returned as mother tongue are Oriya (81.22 percent) followed by Kui (2.48 percent), Telugu (1.94 percent),Santali(1.82 percent) and other languages. Oriya language being the language of the state holds the highest percentage followed by languages mainly spoken by the tribal people of the state. The scheduled languages which have been returned as mother tongue and have a prominent places are Telugu (1.94 percent), Urdu (1.66 percent), Bengali (1.33 percent) and Hindi (1.02 percent).

Table - XII

Major Languages returned as Mother Tongue in the State, 2001 Census

Sl No	Mother tongue	No. of persons who returned the language as their mother tongues, 2001					
		TOTAL	Percentage to total population	RURAL	URBAN	Propertion
