District Primary Census Abstract for SC/ST : C.D. Block/Townwise		...	910 - 981

FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government/Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/ facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (wardwise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories, including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features along with the restructuring of the formats of Villages and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (wardwise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided

for the first time during 1981 Census in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement (IV-A) on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this statement, details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0–6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterates at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Block-level presentation of data in the Village Directory and PCA instead of the traditional Tehsil/Taluk/PS level presen-tation. It is expected that the presentation of village Directory and PCA data at C.D. Block level will help the planners in formulation of micro-level developmental plans, as the C.D. Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along with the corresponding codes of 1981.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled under the direction of

Shri. K. Sampath Kumar, Director of Census Operations, Tamil Nadu, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of the publication was initiated by Dr. K.P. Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M. Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the sailent features emerging from a micro-level analysis of census/non-census data, a model District Census Handbook from each state and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K. Jain, the present Deputy Registrar General (S.S.). This task was carried out by A.K. Singh, Deputy Director who was assisted by Shri. N.S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr.B.K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi
June 11, 1992.

A.R. NANDA
Registrar General, India

PREFACE

The District Census Handbook is the most useful publication for the public, social workers, researchers, academicians, administrators, local bodies and the government officials for various official and non-official purposes. It gives data for the village / panchayat at the lowest level to the district level including panchayat union / taluk covering demographic, social, economic and cultural aspects. There had been an endeavour to make it as comprehensive as possible, to provide data on various aspects since its inception. The Registrar General, India, in his foreword has kindly traced out the improvements brought out from time to time since 1961 to the latest 1991 Census, while the history of the District Census Handbook in this State is narrated in the Introductory Chapter to this volume.

The District Census Handbook is a joint venture of the Census Organisation and the Government of Tamil Nadu. The scope of District Census Handbook has been widely increased and restructured in 1981 to meet the Minimum Needs and Revised Minimum Needs Programmes of the Planning Commission. Broadly keeping up the 1981 main structure, the formats of the Primary Census Abstract have been restructured slightly for the benefit of data users. The nine-fold industrial classification of main workers as done at the 1961 and 1971 Censuses has been revived instead of the four-fold classification of the 1981 Census. Population in the age-group 0-6 by sex has been given in order to enable computation of realistic literacy rate as all children below 7 years are treated as illiterates. One of the most important innovations of the 1991 Census is the presentation of data at the community Development Block / Panchayat Union level to help planners in the formulation of micro-level developmental plans at the lowest level of administrative unit. In this State, for development planning, the lowest administrative unit is the 'Panchayat Union'. This time, for the benefit of data users the Village Directory and PCA data on the magnetic tapes / floppies or from the published records, the computer code as well as the manual code as of 1991 Census and the corresponding location code of 1981 Census are given.

The District Census Handbooks are now being published in two parts - Part - A - Village and Town Directory and Part - B - Village and Townwise Primary Census Abstract. The two parts are being published in one volume as part A & B for smaller districts.

Part - A deals with a brief description of the district - its major characteristics in relation to the economic resources like forestry, agriculture, industries, social, cultural, religious and historical aspects apart from certain basic amenities like drinking water, education, medical, post and telegraphs, market day(s), communications, etc., and if any of these facilities are not available to any village, distance range of the nearest place from where available; power supply, approach to the village, nearest town to the village, health and family planning centres, primary health sub-centres and community health workers in the village. Information on approach to village is also provided to identify inaccessible villages in the district. These exhaustive data

on infra-structure in relation to amenities available to the villages and land-use pattern are meant to meet the requirements of 'Micro - level' local area development planning at the lowest administrative unit viz., C.D.Block/Panchayat Union level. This is the reason why this time data are being published at C.D. Block / Panchayat Union level instead of the traditional taluk level.

In the Town Directory, information on class of town, area of the town, number of households, population and growth rate of the population of the town at each of the censuses from 1901 to 1991, sex-ratio at the 1971, 1981 and 1991 Censuses, physical aspects of rainfall and minimum and maximum temperatures recorded, distance from State and District Headquarters, nearest city, communication facilities like railway station, bus-route, inland navigation, Municipal finance, civic and other amenities like protected water supply, electric connections by type, fire fighting service, road length by type, system of sewerage, number of latrines by type, total population and SC & ST population, medical, educational facilities by type, recreational and cultural facilities like stadia, cinema, drama, community hall, public libraries and reading rooms, adult literacy classes / centres, working women's hostels, three important commodities manufactured, exported and imported; a special table on civic and other amenities available in all notified slums in Class - I and Class - II towns have been included with a view to ascertain the availability of basic amenities and to meet the Minimum Needs and Revised Minimum Needs Programme.

Part - B deals with the Primary Census Abstract for all the villages in the rural areas and wardwise for urban areas. This time the PCA data like Village and Town Directory data are arranged C.D.Block / Panchayat Unionwise giving area of the village (in hectares), area of town (in Sq.Km), number of occupied residential houses, households, population by sex, Scheduled Caste and Scheduled Tribe population, literates, main workers and their distribution into nine industrial categories (as against the four industrial categories published in 1981), marginal workers, non-workers, and the population in the age group 0 - 6 by sex.

Further, if a village is covering more than one Panchayat, break up figures for each segment of the village forming different Panchayat also are given.

It is hoped that with the modifications now brought out in the Village Directory, Town Directory and PCA and Publication of data at C.D. Block / Panchayat Unionwise would go a long way in helping the planners to chalk out more effective developmental programmes at micro-level for local area developmental plans as the C.D. Block / Panchayat Union is the lowest administrative unit for developmental planning.

In the process of collection of data of this volume, various State and Central Government Departments have extended their kind co-operation particularly with regard to infra-structural amenities for Part - A - Village and Town Directory, history and general features of the

district, etc., I convey my grateful thanks to all of them. The PCA data presented in Part-B of this volume were collected during the Census Operations in February - March, 1991, the reference date being sunrise of 1st March, 1991.

I remain grateful to the Director of Census Operations, Shri. K. Sampath Kumar, who closely guided us in every aspect of this work. He had been a source of strength and inspiration for us. We owe a deep sense of gratitude to him for his kindness in dealing with our practical difficulties, his patient advice and formula of solutions for even small problems, which we brought to his attention.

I wish to record my deep sense of gratitude to (late) Shri. M. Thangaraju, Joint Director of Census Operations and Shri. Ch. Purnachandra Rao, Deputy Director of Census Operations for overall direction and guidance to bring out this publication. I use this opportunity to mention my special thanks to Sri. N. Manjini, Assistant Director of Census Operations for scrutinising the draft report and presenting the data with meticulous care and accuracy. I am also thankful to Shri. S.P. Grover, Joint Director of Census Operations and Shri. Phool Singh, Deputy Director of Census Operations who have also provided overall guidance and supervision during their tenure in this regard.

In the compilation and processing of Village Directory and Town Directory data, was ably assisted by Smt. R. Rani Bai and Smt. A.M. Mangayarkarasi, Investigators and their assistants, respectively while Sri. R. Lakshminarayanan, Investigator is chiefly responsible for preparing the analytical notes, inset tables, draft write ups and arrangements of the matter in order.

The PCA data for the district were processed at the Regional Tabulation Office, Chengalpat MGR District, under the supervision of (Late) Shri. N. Sanjeevi, Regional Deputy Director of Census Operations, assisted by S/Shri. A.V. Raman, Investigator, S. Kalidas, K. Vakkuvaliyan, S. Nellaiyappan, (Late). K. Surendra Babu and (Late) S. Somasundaram, Statistical Assistants who were deputed from this Directorate to the Regional Tabulation Office, Chengalpat MGR District.

Finalisation of PCA data (Panchayat Unionwise) and providing computer codes for villages were attended to by Shri. R. Lakshminarayanan and Smt. M.V. Rajalakshmi, Investigators and staff of the Census Section. The district and taluk maps in this publication give the administrative units upto village level, the location of towns and cities, communication facilities, etc. This time in the taluk map, the boundary of each of the C.D. Block units, namely, 'Panchayat Unions' have been shown separately to synchronise with the presentation of data Panchayat Unionwise.

I convey my grateful thanks to Shri. A.R. Nanda, IAS., Registrar General and Census Commissioner, India for the valuable guidance and advice I received from him throughout. I am thankful to Shri. N. Rama Rao, Deputy Registrar General (C & T) who has been a source of strength and constant help and guidance on all technical matters like a "Ready-Reckoner". I also thank Dr. K.P. Ittaman, Ex-Deputy Registrar General (S.S) and Shri M.M. Dua, Joint Director, for planning, designing and co-ordinating the formats. I thank Shri. M.K. Jain, Deputy Registrar General (S.S) and Shri. A.K. Singh, Deputy Director, Shri N.S. Soam, Assistant Director and his staff for scrutinising and approving the first volume so that it could fit in, in the all India pattern from uniformity point of view in the presentation of data and other items. My thanks are also due to Dr. B.K. Roy, Ex-Deputy Registrar General (Map) and Mrs Minati Ghosh, Deputy Registrar General (Map) for providing technical guidance in the preparation of maps.

I have pleasure in acknowledging the able assistance rendered by the following officials of my office in the preparation of this volume.

ANALYTICAL NOTE

Census concepts

Rural and Urban areas

It is customary to classify a place as rural or urban in every Census and present data separately for rural and urban areas. Urban areas which are specifically defined for Census purposes are determined on the basis of certain demographic and economic criteria. The rest are treated as rural areas. At the 1991 Census, the same criteria adopted for determining the urban areas at the 1981 Census have been continued. The urban areas of 1991 census are:

(a) All places with a Municipality, Corporation or Cantonment board or Notified town area, committee, etc.
(b) All other areas which satisfied the following criteria:
  (i) A minimum population of 5,000
  (ii) At least 75 per cent of male main workers engaged in non-agricultural and allied activities:
  (iii) A population density of at least 400 per sq. km. (or one thousand per square mile).

The above definition adopted for both 1981 and 1991 Censuses varies slightly from those of 1961 and 1971 Censuses. In the 1961 and 1971 Censuses, the male population engaged in the activities of fishing, logging etc., were treated as engaged in non-agricultural pursuits and hence have been taken into account with those engaged in non-agricultural pursuits for applying the test of the 75 per cent non-agricultural workers criteria. But in the 1981 Census as well as in the 1991 Census, they have been treated on par with agricultural activities for applying the test for this criteria. Prior to the 1981 Census, certain places with less than 5,000 population were treated as urban areas on the basis of certain consideration like density, social and historical importance etc., at the discretion of the Director of Census Operations in consultation with the State Government. On the other hand, the tests on demographic and economic criteria were strictly applied at the 1981 and 1991 Censuses and no area was classified as urban area on other considerations.

Urban Agglomeration

This concept was adopted for the first time in the 1971 Census and continued in the 1981 and 1991 censuses also.

An Urban Agglomeration is a continuous urban spread constituting a city or town and its adjoining urban outgrowths (OG) or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In certain cases, large housing colonies University campuses, port areas, Military camps, etc., etc., would have come up around a city or town but falling out side the statutory limits of the city or town. They may be lying inside the boundaries of a village or villages which are contiguous to the city/town. These villages could not be treated as urban as they do not satisfy the urban criteria. But at the same time the colonies etc., mentioned above deserve to be treated as an integrated urban area. Therefore, all such towns together with their urban outgrowth will have to be treated as one urban unit and called urban Agglomeration. As no outgrowth (OG) as defined above, has been recognised in Tamil Nadu, all the constituent units of urban agglomerations are also independent urban units or towns in the State.

Census House

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for residential or non residential purposes or both.

Household

A household is a group of persons, who commonly live together and would take their meals from common kitchen, unless the exigencies of work prevented any of them from doing so. There may be a house hold of persons related by blood or a household of unrelated persons or having a mix of both. Examples of households with unrelated members are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called Institutional Households.

Scheduled Castes/Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes orders (Amendment) Act of 1976 (Central Act, 108 of 1976) was followed. The enumerators were instructed to record a person as belonging to Scheduled Caste and Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

A literate is defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, is not a literate. It is not necessary that a person, to be considered as a literate, must have received any formal education or have passed any minimum educational standard. In the 1991 Census, all children of the age of 6 years or less are treated as illiterate whereas in the 1981 Census all children of the age of 4 years or less were treated as illiterate.

Definition of work

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise.

Main workers and Marginal workers

The dichotomy of worker and non-worker of 1961 and 1971 censuses had been dropped and the trichotomy of main worker, marginal worker and non-worker was introduced in the 1981 census and this has been continued in the 1991 census also. A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries, like gur making etc. were carried on, either throughout the year or only during certain seasons or part of the year, depending on the local circumstances. In such cases what we were concerned with was the broad time spent during the agricultural season preceding the enumeration. Workers can be full-time workers or marginal workers. If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for 183 days or more, he was considered to be a full-time worker (Main Worker). If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for less than 183 days, he was considered to be a marginal worker. Persons who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration were considered as non-workers.

All the main workers had been classified under one of the four main categories in the 1981 census, while in 1991 census, they have been classified under one of the nine industrial categories as was done in 1971 census. They are I. Cultivators (C), II. Agricultural Labourers (AL) III. Live Stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, IV. Mining and Quarrying, V(a). Manufacturing, Processing, Servicing and Repairs in Household Industry, V(b). Manufacturing, Processing, Servicing and Repairs in other than Household Industry, VI. Constructions, VII. Trade and Commerce, VIII. Transport, Storage and Communications, IX. Other Services.

The definitions of these nine industrial categories of workers are as given below:

I. Cultivators (C)
For the purpose of census, a person is considered as Cultivator if he/she is engaged in cultivation of land, owned or taken on lease from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

II. Agricultural Labourers (AL)
A person who works on another person's land for wages in money, kind or share should be regarded as agricultural labourer. He/She has no risk in the cultivation, but he/she merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

III. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities
Persons who were reported as workers in Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities are treated as workers under this category.

IV. Mining and Quarrying
Persons who were reported as workers in Mining and Quarrying are treated as workers under this category.

V(a). Manufacturing, Processing, Servicing and Repairs in Household industry
Household industry is defined as an Industry conducted by the head of the household himself/herself and/or by the members of the Household at home or within the village in case of rural areas and within the precincts of the house only in the case of Urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The household industry should not be run on the scale of a registered factory which would qualify to be registered under the Indian Factories Act. Mere selling of food items or other edibles, should not be regarded as household industry.

V(b). Manufacturing, Processing, Servicing and Repairs in other than Household Industry
Persons reported as workers in household industry other than those mentioned in V(a) were treated as workers in this category.

VI. Constructions
Persons working as plumbers, masons, electricians, painters and others engaged in construction work were treated under this category.

VII. Trade and Commerce
Persons engaged in work such as wholesale or retail business or trade were treated in this category.

VIII. Transport, Storage and communications
Persons who were reported as drivers, conductors, technicians, fitter, welder and other communication workers were treated under this category.

IX. Other services

Persons engaged in services other than those mentioned in I to VIII catergories fall under this category. Workers who could not be classifield in any of the above I to VIII categories are treated as those engaged in other services.

Non-workers

All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the data of enumeration have been considered as non-workers. Thus, non-workers cover all persons who are engaged in unpaid household duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants etc., convicts in jails or inmates of a penal, mental or charitable institution and all other non-workers not falling under any of the above categories.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

After the census of 1951, the Government of India offered to handover to the State Government the Census tables and other date prepared during the Census and suggested that they might be published along with any other useful information relating to each district as separate volume. The State Government accepted the proposal and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve on its content so that each district Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census also, the publication of the series of District Census Handbook was continued. The publication of the 1971 District Census Handbook was in three parts, viz., Part-A, Part-B and Part-C. Part-A relating to Village and Town Directory. Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook was continued by the State Government during the 1981 Census also. In this series some individual feature besides restructuring of the formats of the Village Directory had been adopted bearing in mind the requirements of data for the socioeconomic programmes of the Government. The comparability of data with the 1971 census data had also been kept in view.

The present 1991 District Census Handbook will be published in two parts viz., Part-A – Village and Town Directory and Part-B – Village and Townwise Primary Census Abstract.

SCOPE OF PRIMARY CENSUS ABSTRACT

The Primary Census Abstract as it is called, presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Villagewise Primary Census Abstract" and for each ward/division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1991 has been slightly modified as compared to the 1981 Primary Census Abstract.

The Primary Census Abstract gives the details on area, number of occupied residential houses, number of households, total population, population in the age-group 0-6, SC/ST population, literates, total main workers, distribution of main workers by 9 industrial categories, marginal workers and non-workers in respect of each unit with male, female breakup. In 1981, the main workers were classified into four categories whereas in the 1991 Census they are classified into 9 industrial categories as in 1961 and 1971 censuses. For the first time in this Census, the population in the age group 0-6 with sex breakup presented in PCA in order to arrive at effective literacy rate, after excluding such persons as all the persons below seven years are treated as illiterates in this census. The urban/village Primary Census Abstract gives this information for each village and each urban ward. Till 1981 Census, the Primary Census Abstract was presented for each taluk and for each town in a district. But, in the 1991 census, the Primary census Abstract for each CD Block is presented for the first time in the Indian Census. Besides these, separate Primary Census Abstract for Scheduled Castes and Scheduled Tribes which contain similar details as those in the PCA for general population are presented for District/ Community Development Block/UA/City/Town.

With a View to enable data users to derive the figures for Panchayat the data are presented for segments of village also, wherever such segments constitute different Panchayat, the segment wise data have to be used separately or added with the data of some other segment so as to derive panchayat data. For example a revenue village bearing L.C. No 9 constitute two different pachayats, the figures are given separately for each portion of the village constituting these panchayats against L.C. No 9 a/b and 9 b/b. The total figures for the entire revenue village can be arrived at by adding the figures given against both the segments viz. 9 a/b and 9 b/b. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned are to be addedup to arrive at the total

figures for the respective panchayats. An appendix presented in the case of the Urban Primary Census Abstract gives 1991 population, Scheduled Castes and Scheduled Tribes population for each enumerator block of the town. This may be useful for administrative purposes and such data are also required by urban planners and researchers for conducting special studies in selected blocks.

Mode of presentation

At the beginning, the District Primary Census Abstract containing data for District and C.D. Blocks (for Total, Rural, Urban areas) as also towns under each C.D. Blocks and at the end all the towns/U.As in the district are presented. In 1991 Census, the C.D. Blocks is the main unit of presentation of data instead of taluk which was the main unit till 1981 Census. The District PCA is followed by alphabetical list of villages for each C.D. Block in the district. This is followed by Village/Urban PCA. In the Village/Urban PCA, data for the first C.D. Block for total, rural and urban areas separately, followed by data for villages and census towns falling under each C.D. Block are presented. Thereafter, similar data for second, third and subsequent C.D. Blocks in the district are presented. At the end of the last C.D. Block, the Urban PCA containing data at ward level for all the towns and cities besides the data for UAs are presented. In an appendix to the Urban blockwise PCA, the population and Scheduled Castes/Scheduled Tribes figures for each Enumerators Block of every town/city in the district are given. After the appendix to Urban PCA, the Talukwise PCA containing data for the District and each taluk in the district with Total, Rural and Urban breakup is presented, as such data are also sought after. This is followed by two annexures. Appendix-I contains Details of Community Development Blocks falling under each taluk and Appendix-II contains names of the villages/segment of villages constituting each town in the district.

Maps

Apart from the District Map given as frontispiece, maps for each taluks showing the villages their 1991 Location Code numbers and their boundaries are presented. The boundaries of the C.D. Blocks falling in the taluks are also shown. As compared with the maps presented in 1971 and 1981 District Census Handbook, some improvements have been effected in the maps presented in this volume. All towns are shown in the district and taluk maps with shading screens and also spheres according to the population size of towns.

Area figures

In the District Primary Census Abstract, the area figures are given in square kilometers for total rural and urban areas. In the villagewise Primary Census Abstract the area figures for each revenue village are given in hectares upto two decimals. The area figures for each town is given in Sq.Km in the Urban Primary Census Abstract. In the District Primary Census Abstract the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor General of India. Figures for urban areas and villages are those supplied by the local bodies and revenue authorities. The total of the urban (area) of a district has been arrived at by adding the urban area figures of each town within the district. Area figures for the rural areas of district are derived by subtracting the urban area figures from the total area of the district. The area figures of each C.D. Block represent the area figures that are published in the concerned departmental publication of the State Government. The area figures of the C.D. Blocks will not add up to the district area figures because, the C.D. Block area figures represent the "Land use" area, while those of the district represent "Geographical Area", supplied by the Surveyor General of India. The total of the village areas given in the Village/Urban Primary Census Abstract may not tally with the rural area of the C.D. Block given, as the C.D. Block area figures include hills, forests, rivers etc. whereas the village area may not include the same. One sq.km consist of 100 hectares.

It is hoped that the pattern of presentation of basic census particulars for each district as explained above and adopted in this volume would be found convenient by data users

Part - B

Brief analysis of the Primary Census Abstract data based on Inset Tables :

A brief analysis relating to certain vital population characteristics is made utilising the census data that are available in the Primary Census Abstract. A number of tables have been designed for this purpose. The tables are generated at the District Taluk /Community Development Block level for the rural areas and with regard to urban areas, townwise particulars are presented.

Table-1 (A)

Population and number of villages, 1991

Sl. No.	Name of C.D. Block	Population of Villages			No. of Villages	
		Persons	Males	Females	Total	Inhabited
1	Gummidipundi	138,438	70,348	68,090	82	79

25	Acharapakkam	100,087	50,555	49,532	95	95
26	Chithamur	107,265	53,818	53,447	64	64
27	Lathur	67,350	34,090	33,260	58	57
	District	**2565583**	**1298354**	**1267229**	**1,783**	**1,690**

Table - 1(A) which is given above furnishes the total rural population with sex breakup and the total number of villages and the number of inhabited villages in each CD Block in the district.

It may be seen from the table that there are 1783 revenue villages of which 1690 are inhabited, spread over in 27 CD Blocks. The average number of villages per CD Block works out to 66. Of the 27 CD Blocks, 14 CD Blocks have more number of villages than the District average of 66 villages per CD Block. While Tirukkalukundram CD Block accounts for the largest number of villages (119), Villivakkam CD Block has the least number of villages (16). In terms of population, Minjur CD Block is the most populous one while Pulal CD block accounts for the lowest population in the district.

	All towns	**20,88,010**	**10,76,339**	**10,11,671**

The above table 1(B) represents the population with sex break-up of each town in the district.

It may be noted from the table that there are 78 towns in the district. Ambattur (M) accounts for the highest population of 2,15,424 while the lowest population of 1,945 is recorded by Mudichur (VP). Of the 78 towns in the district, seven towns have more than one lakh of population.

Table-2

New Towns/Towns declassified, merged in 1991 Census

	Name of Town	Population
(a) Added		
(i)	Padirivedu	4,402 (1991 Census)
(ii)	Padianallur	18,000 (1991 Census)
(iii)	Vengathur	10,799 (1991 Census)
(iv)	Kodivalasa	6,459 (1991 Census)
(v)	Karambakkam	10,467 (1991 Census)
(vi)	Porur	19,507 (1991 Census)
(vii)	Valasaravakkam	21,953 (1991 Census)
viii)	Ullagaram	16,133 (1991 Census)
(ix)	Sembakkam	13,516 (1991 Census)
(x)	Nandivaram Guduvancheri	19,347 (1991 Census)
(xi)	Ayyampettai	5,713 (1991 Census)
(b) Declassified		
(i)	Pulicat	7,396 (1981 Census)
(c) Wholly merged with other		
	Nil	Nil
(d) Towns split-up into		
(i)	Manali	19,093 (1981 Census)
(ii)	Chinnasekkadu	8,421 (1991 Census)

During 1991 Census, Madavaram (MTS) has been splitted into three towns, namely, Madavaram (T.S), Manali (PTS) and Chinnasekkadu (TP)

Table - 2 furnishes the list of new towns classified in 1991 Census and towns split-up in 1991 Census along with the population of each town based on 1991 Census. It also furnishes the towns in 1981 which were declassified as rural in 1991 along with the population in 1981 Census.

While eleven new towns have been classified as urban for 1991 Census, one town viz., Pulicat has been declassified as rural. During 1991 Census Madhavaram (MTS) has been split-up into three towns viz. Madhavaram (MTS), Manali (PTS) and Chinnasekkadu (TP).

District		**3,616,508**	**2,208,722**	**1,407,786**	**4,653,593**	**2,565.583**	**2,088,010**	**+28.68**	**+16.16**	**+48.32**	**38.93**	**44.87**

The Table - 3 prescribed above, shows the decadal changes in distribution of population. As per the table the district as a whole has recorded growth rate as 28 68%. Among all 13 taluks, Saidapet represents higher growth rate with 52.32% followed by Sriperumbudur with 34.58% It shows over and above district level, while Uttiramerur represents low level growth rate with 9.02%. In urban Saidapet occupied predominent role in 1981 and 1991 with 782,531, 1,232,740 population growth. But Uttukottai taluk represents zero population in 1981 and 1991. If we find rural population, Chengalpattu represents highest in 1981, 1991 with 331,702 and 408.237 while Uttiramerur presents lowest in 1981 and 1991 with 102,313 and 111, 219 rural population respectively.

Table - 4

Percentage distribution of villages by population ranges, 1991

Sl. No.	Name of C.D. Block	No. and percentage of inhabited villages	No. and percentage of villages in each range (Figures in parenthesis indicate percentage of villages in each range)					
			Less than 200	200-499	500-1,999	2,000-4,999	5,000-9,999	10,000 and above

27	Lathur	57 (100.00)	3 (5.26)	11 (19.30)	33 (57.90)	9 (15.79)	1 (1.75)	—
	District	**1690 (100.00)**	**88 (5.21)**	**285 (16.86)**	**930 (55.03)**	**318 (18.82)**	**60 (3.55)**	**9 (0.53)**

Table - 4 gives the percentage distribution of villages by different population ranges. It may be seen from the table that the range 500-1999 accounts for the highest number of villages. There are 930 villages which constitutes 55.03% of all the villages in the district. This is followed by the range 2000-4999 with 318 villages under its fold. The range 200-499 with 285 villages occupies the third place. It constitutes 16.86% of the total villages in the district. There are 9 villages in the district having a population of more than 10,000 each. Of the 27 C.D. Blocks, in 23 C.D.Blocks, the highest number of villages are in the range of 500-1999. The exceptional four C.D. Blocks are Tiruttani, Pallipattu, R.K.Pet and St.Thomas Mount C.D.Blocks. In the first three of the above mentioned CD Blocks, the largest number of Villages are in the range of 2000-4999 while in the case of last one, the range 5000-9999 accounts for the largest number of villages

Table - 5

Distribution of villages by Density

Range of density (per sq. kms)	Total No. of villages in each density range	Percentage of villages in each density range
1	2	3
0-10	4	0.24
11-20	3	0.18
21-50	11	0.65
51-100	61	3.61
101-200	267	15.80
201-300	405	23.96
301-500	533	31.54
+501	403	23.84
Not known	3	0.18
Total	**1690**	**100.00**

The above table - 5 presents the distribution of villages by different ranges of density is furnished.

It may be observed from the table-5 that maximum number of villages have a density in the range of 301-500. It accounts for 31.54% of total villages in the district. There are nearly 25% of the villages in the range 201-300 which is closely followed by the range 501+ with 23.84%. The other range which accounts for a proportion of more than 10% is 101-200.

Table - 6 (A)

Sex Ratio for rural population of C.D. Blocks, 1991

Sl No.	Name of C.D. Block	Number of females per 1,000 males
1	2	3
1	Gummidipundi	968
2	Minjur	978
3	Sholavaram	981
4	Ellapuram	984
5	Poondi	987
6	Tiruvallur	988
7	Kadambathur	990
8	Tiruttani	969
9	Tiruvelangadu	989
10	Pallipattu	990
11	R.K.Pet	967
12	Kanchipuram	992
13	Walajabad	1003
14	Poonamallee	990
15	Sriperumbudur	1004
16	Kunnattur	952
17	Pulal	966
18	Villivakkam	962
19	St.Thomas Mount	945
20	Kattankolathur	947
21	Thiruporur	979
22	Tirukkalukunram	963
23	Uttiramerur	975
24	Madurantakam	976
25	Acharapakkam	980
26	Chithamur	993
27	Lathur	976
	District	**976**

The above table-6A furnishes the sex ratio (number of females per 1000 males) among the rural population in each C.D.Block.

It may be noted that the number of females per 1000 males is less than 1000 in all the C.D.Blocks, except in two C.D.Blocks, viz., Sriperumbudur (1004) and Walajabad (1003), C.D.Blocks. The sex ratio among the rural population of the district is 976. In 15 C.D. Blocks the sex ratio is more than the district average of 976 while ten C.D.Blocks have lower sex ratio than the district average. Two C.D.Blocks have the same sex ratio as that of the district.

	All towns	**940**

Table - 6B shows the sex ratio (No. of females per 1000 males) for each town in 1991 Census.

It may be observed from the table that the urban sex ratio is adverse to female in the district as well as in almost all the towns. The urban sex ratio of the district is 940. Only one town viz., cheyur (VP) has a higher sex ratio of 1005 (i.e.) more number of females than the number of males while another town viz., Walajabad (TP) has an ideal sex ratio of 1000 (i.e) equal number of males and females. All other 76 towns have lower sex ratio.

Table - 7

Proportion of Scheduled Castes population to total population in the villages

Percentage range of Scheduled Caste population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
NIL	156	9.23
0 - 5	71	4.20
6 - 10	65	3.85
11 - 15	72	4.26
16 - 20	97	5.74
21 - 30	242	14.32
31 and above	987	58.40
Total	**1690**	**100.00**

In the table - 7 the number of villages in different percentage ranges of scheduled caste population to total population are given.

It may be observed from the table that the largest number of villages 987 have more than 30% of total population as scheduled castes. While 242 villages accounting for 14.32% of total villages in the district have the percentage of scheduled castes to total population in the range of 21-30, 156 villages representing 9.23% of total villages do not have any scheduled castes population. The range of 16-20 of scheduled castes to total population accounts for 97 villages 5.74% while 72 villages have scheduled castes population in the range of 11-15. The range upto 5 of scheduled castes population has 71 villages under its fold. In 65 villages, the scheduled castes population from 6-10 of total population.

Table - 8

Proportion of Scheduled Tribe population to total population in the villages

Percentage range of Scheduled Tribe population to total population	No. of villages in each range	Percentage of villages in in each range
1	2	3
NIL	751	44.94
0 - 5	760	44.97
6 - 15	142	8.40
16 -25	23	1.36
26 - 35	5	0.30
36 - 50	6	0.35
51 +	3	0.18
Total	**1690**	**100.00**

We can find in table-8 the distribution of villages by different ranges of percentage of scheduled tribe population to total population. It may be observed from the table, that the range 0-5 of scheduled tribe population accounts for the largest number of villages. There are 760 villages under this range representing 44.97% of total villages in the district. This is closely followed by the villages (751) having no scheduled tribe population. This accounts for 44.94% of villages. In 23 villages, the proportion of scheduled tribe population range from 15-25% of total population. While only three villages have more than half of their population as scheduled tribes, six villages have scheduled tribe population in the range 36-50%.

	All Towns	**2,088.010**	**312,080**	**12,874**	**14.95**	**0.62**

The above table 9 furnishes the percentage of Scheduled Castes and Scheduled Tribes in each town in the district.

On a perusal of the table it may be observed that Putteri town accounts for the highest proportion of Scheduled Castes population with 71.11 percent of its population belonging to Scheduled Castes, while the lowest ratio is seen in Kanchipuram (M) where 2.63% of its population belong to Scheduled Castes. Further, six towns have more than half of its population as Scheduled Castes. When compared to the district urban average of 14.95 percent, there are 48 towns having proportion of Scheduled Castes higher than the district urban average.

As regard to Scheduled Tribes, the district urban average is 0.62 percent. Padirivedu town possesses the highest proportion of Scheduled Tribes (4.79%) in the district, followed by Melmanambedu with 4.69 percent. While six towns do not have any Scheduled Tribe population, Valasaravakkam town records the lowest proportion of 0.01 percent. While 27 towns have the higher ratio than the district urban average of 0.62%, there are 51 towns, which includes six towns with zero Scheduled Tribe population, having lower ratio than the district urban average.

26	Chithamur	47.35	59.79	34.82
27	Lathur	44.59	55.96	32.89
	District	**55.55**	**68.27**	**42.51**

Table 10(A) gives the percentage of literates to total population (excluding children in the age group of 0-6) in the rural areas of each CD Block by sex based on 1991 Census.

The literacy rate in the rural areas of the district is 55.55% among the persons. Among the CD Blocks, St.Thomas Mount CD Block which is in the periphery of Madras city tops with the highest literacy rate of 73.88%. Pulal CD Block ranks second among the CD BLocks with a literacy rate of 69.38%. Lathur CD Block has the lowest literacy rate of 44.59%. When compared with the rate of the district, 11 CD Blocks recorded higher rate than the district average.

Among the males in rural areas of the district, the literacy rate is 68.27%. In the case of males also, St. Thomas Mount CD Block accounts for the highest rate of 83.60% followed by Pulal CD Block with 81.51%. Among males also, Lathur CD Block recorded the lowest literacy rate. Besides those eleven CD Blocks which have recorded higher literacy rate than the District average for persons, Walajabad CD Block has also recorded higher rate for males than the district average for males.

In the case of females in the rural areas, the literacy rate is 42.51% in the district. St.Thomas Mount CD Block tops with the highest female literacy rate of 63.51% as in the case of persons and males. Tiruttani CD Block with female literacy rate of 32.66% ranks the lowest among the CD Blocks. The female literacy rate of CD Blocks when compared with the district average is higher than the district rate in 12 CD Blocks.

	All Towns	**79.41**	**87.45**	**70.83**

The above table 10(B) shows the percentage of literates to total population in each town in the district.

It may be seen from the table that Madipakkam (VP) tops the table with the highest literacy rate of 90.87%, closely followed by Valasaravakkam (TP) with a literacy rate of 89.91%. Besides Tirusulam (VP) which accounts for the lowest literacy rate of 43.82%, Chembarambakkam (VP) is the only other town which has more than half of its population as illiterates. On a comparison of the district urban literacy rate of 79.41 with the rate of each town, it is noticed that in 29 towns the literacy rate is higher than the district average.

In the case of males, as well as females, Madipakkam (TP) tops with the highest percentage of literates among the towns in the district. While male literacy rate is 94.91% in the town, females literacy rate is 86.61%. Similarly, Tirusulam (VP) accounts for the lowest literacy rates for both males as well as females. It may also be observed that in all the towns the literates among males are in majority. But in the case of females, the literates are more than the illiterates in 69 towns while the illiterates are more in the remaining 9 towns.

Table 11(A) represents the percentage distribution of rural population by main workers, marginal workers and non-workers in each CD Block based on 1991 Census.

It may be observed from the table that 43.90 per cent of rural population in the district are workers, consisting of main workers of 41.13 per cent and marginal workers of 2.77 per cent. Among the CD Blocks, more than half of the population are workers in two CD Blocks viz., Acharapakkam (50.59%) and Ellapuram (50.46%). Pulal CD Block with 30.56% accounts for the least ratio of workers of which 55.72 per cent of rural population are main workers and the remaining 0.40 per cent engaged as marginal workers. Among the CD Blocks, Ellapuram recorded the highest ratio of male workers with more than three fifth of its male rural population as workers. Except Pulal CD Blocks, all the CD Blocks in the district have more than half of the rural Male population as workers.

Among the females, 31.38 per cent of female population (26.19% main workers and 5.19% marginal workers) in rural areas are workers in the district. Among the CD Blocks, Acharapakkam CD Block recorded the highest percentage of female workers (44.36%) in rural areas while St.Thomas Mount accounts (10.83%) for the lowest proportion of female workers in rural areas.

Table - 11B furnishes the percentage of main workers, marginal workers and non-workers to total population in each town in the district.

It may be noticed that 30.89 percent of total urban population of the district are workers consisting of 30.49 percent main workers and 0.49 percent of marginal workers. Among the towns in the district, Kodivalasa (VP) recorded the highest percentage of workers, the percentage being 54.73. Further, it is the only town where the work participation rate (Percentage of workers to total population) is more than 50%. The work participation rate lies in the range of 40 to 50 percent in 6 towns. The lowest work participation rate of 22.78 is recorded in Pulal (TP).

Considering the work participation rate among males, Ayyampettai (TP) tops with 62.02% among the towns. The work participation rate among males is more than 50% in 49 towns while it is exactly 50% in one town.

In the case of females, the work participation rate varies from 56.37% in Kodivalasa (VP) to 4.51% in Pulal (TP). Kodivalasa (VP) is the only town in the district where more than half of the female population are workers.

CHEYUR TALUK
CHANGE IN JURISDICTION 1981-91.

Boundary, District ... ...

" Taluk. ... ...

Newly created Taluk bifurcated from Madurantakam Taluk during 1981-91.

Based upon Survey of India map with the permission of the Surveyor General of India.
The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line.
