FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government /Union Territory administration . It inter-alia provides data information on some of the basic demographic and socio-economic characteristics and on availbility of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and sociocultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward - wise)of the district. The DCHs published after the 1961 Census contained a descriptive accont of the district administrative statistics, census tables and Village and Town Directories including PCA.After the 1971 Census, two parts of the District Census Handbooks (Part - A : Comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territoryes. Thc third part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not to be published in many States/ UTs due to considerably delay in compilation of relevant material. In 1981,some new features along with the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were publiched in two parts for each district after the 1981 census. While Part - A : Comprised Village and Town Directories, the PCA of villages and towns (ward - wise) inculding Scheduled Castes and Scheduled Tribes PCA upto tehsil /town level were provided in PArt - B : To illustrate, all the amenities except electricity, were brought together in the referrent village, the distance in board ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs programme. Similarly, information of the approach to the village was also provided for the first time during 1981 census in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directores also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV - A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums.. In this statement details on civic and other amenities were reported for the slums of Class I and Classs II towns. Apart from this, one column on the Schedule Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine - fold industrial classification of main workers has been given as aganist four-fold industrial classification presented in the 1981 Census. In addition to this, sex-wise population in the 0-6 age group has also been inculded in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterates at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Block-level presentation of data in the village directory and PCA instead of the traditional Tehsil / Taluk /PS level presentation. It is expected that the presentation of village and Town directory and PCA data at C.D. Block level will help the planners information of micro - level developmental plans, as the C.D. block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use village Directory PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along with the corresponding codes of 1981.

This publication is a joint venture of State Government / UT administration and the Census Organi ation.The data have been collected and compiled under the direction of Shri. K. Sampath Kumar, Director of Census Operations.

Tamil nadu, on behalf of the State Government which has borne the cost of priniting. The task of planning, designing and co-ordination of the publication was initiated by Dr. K.P. Ittaman, former Deputy Registrar General (S.S) and Shri. M.M. Dua, Joint Director, for the sake of uniformity in presentation of information/ data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly secutinised in the Social Studies Division under the guidence of Shri. M.K. Jain, the present Deputy Registrar General, (S.S). This task was carried out by Shri. A.K. Singh, Deputy Director who was assisted by Shri. N.S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr. B.K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi

A.R. NANDA

Registrar General, India

PREFACE

The District Census Handbook is the most useful publication for the public, social workers, researchers, academicians, administrators, local bodies and the government officials for various official and non-official purposes. It gives data for the village/panchayat at the lowest level to the district level including panchayat union/taluk covering demographic, social, economic and cultural aspects. There had been an endeavour to make it as comprehensive as possible, to provide data on various aspects since its inception and by 1961, it reached the dimensions of a compendium for the district. The Registrar General, India, in his foreword has kindly traced out the improvements brought out from time to time since 1961 to the latest 1991 Census while the history of the District Census Handbook in this State is narrated in the Introductory Chapter to this volume.

The District Census Handbook is a joint venture of the Census Organisation and the Government of Tamil Nadu. The scope of District Census Handbook has been widely increased and restructured in 1981 to meet the Minimum Needs and Revised Minimum Needs Programmes of the Planning Commission. Broadly keeping up the 1981 main structure, the formats of the Primary Census Abstract have been restructured slightly for the benefit of data users. The nine-fold industrial classification of main workers as done at the 1961 and 1971 Censuses has been revived instead of the four-fold classification of the 1981 Census. Population in the age-group 0-6 by sex has been given in order to enable computation of realistic literacy rate as all children below 7 years are treated as illiterates. One of the most important innovations of the 1991 Census is the presentation of data at the Community Development Block/Panchayat Union level to help planners in the formulation of micro-level developmental plans at the lowest administrative unit level. In this State, for development planning, the lowest administrative unit is the 'Panchayat Union'. This time, for the benefit of data users of Village Directory and PCA data from the magnetic tapes/floppies or from the published records, the computer code as well as the manual code as of 1991 Census and the corresponding location code of 1981 Census are given.

The District Census Handbooks are now being published in two parts - Part-A - Village and Town Directory and Part-B - Village and Townwise Primary Census Abstract. The two parts are being published in one volume as Part A & B.

Part-A deals with a brief description of the district - its major characteristics in relation to the economic resources like forestry, agriculture, industries, social, cultural, religious and historical aspects apart from certain basic amenities like drinking water, education, medical, post and telegraphs, market day(s), communications, etc; and if any of these facilities are not available to any village, distance range of the nearest place 3 from where available; power supply, approach to the village, nearest town to the village, health and family planning centres, primary health sub-centres and community health workers in the village. Information on approach to village is also provided to identify inaccessible villages in the district. These exhaustive data on infrastructure in relation to amenities available to the villages and land-use pattern are meant to meet the requirements of 'Micro-level' local area development planning at the lowest administrative unit viz., C.D. Block/Panchayat Union level. This is the reason why this time data are being published at C.D. Block/Panchayat Union level instead of the traditional taluk level.

In the Town Directory, information on class of town, area of the town, number of households, population and growth rate of the population of the town at each of the Censuses from 1901 to 1991, sex-ratio at the 1971, 1981 and 1991 Censuses, physical aspects of rainfall and minimum and maximum temperatures recorded, distance from State and District Headquarters, nearest city, communication facilities like railway station, bus-route, inland navigation, Municipal finance, civic and other amenities like protected water supply, electric connections by type, fire fighting service, road length by type, system of sewerage, number of latrines by type, total population and Scheduled Caste and Scheduled Tribe population, medical, educational facilities by type, recreational and cultural facilities like stadia, cinema, drama, community hall, public libraries and reading rooms, adult literacy classes/ centres, working women's hostels, three important commodities manufactured, exported and imported; a special table on civic

and other amenities available in all notified slums in Class-I and Class-II towns have been included with a view to ascertain the availability of basic amenities and to meet the Minimum Needs and Revised Minimum Needs Programme.

Part-B deals with the Primary Census Abstract for all the villages in the rural areas and wardwise for urban areas. This time the PCA data like Village and Town Directory data are arranged by C.D. Block/Panchayat Unionwise giving area of the village (in hectares), area of town (in Sq.Km.), number of occupied residential houses, households, population by sex, Scheduled Caste and Scheduled Tribe population, literates, main workers and their distribution into nine industrial categories (as against the four industrial categories published in 1981), marginal workers, non-workers and the population in the age group 0-6 by sex

Further, if a village is covering more than one Panchayat, break up figures for each segment of the village forming different Panchayat also are given.

It is hoped that with the modifications now brought out in the Village Directory, Town Directory and PCA and Publication of data at C.D. Block/Panchayat Unionwise would go a long way in helping the planners to chalk out more effective developmental programmes at micro-level for local area developmental plans as the C.D. Block/Panchayat Union is the lowest administrative unit for developmental planning.

In the process of collection of data of this volume, various State and Central Government Departments have extended their kind co-operation particularly with regard to infra-structural amenities for Part-A - Village and Town Directory, history and general features of the district. etc. I convey my grateful thanks to all of them. The PCA data presented in Part-B of this volume were collected during the Census Operations in February- March, 1991, the reference date being sunrise of 1st March, 1991.

I remain grateful to the Director of Census Operations, Shri K. Sampath Kumar, who closely guided us in every aspect of this work. He had been a source of strength and inspiration for us. We owe a deep sense of gratitude to him for his kindness in dealing with our practical difficulties, his patient advice and formula of solutions for even small problems, which we brought to his attention.

I wish to record my deep sense of gratitude to (late) Shri M. Thangaraju, Joint Director of Census Operations and Shri Ch. Purnachandra Rao, Deputy Director of Census Operations for overall direction and guidance to bring out this publication. I use this opportunity to mention my special thanks to Sri. Gummodi Bapuji, Assistant Director of Census Operations for scrutinising the draft report and presenting the data with meticulous care and accuracy. I am also thankful to Shri S.P. Grover, Joint Director of Census Operations and Shri Phool Singh, Deputy Director of Census Operations who have also provided overall guidance and supervision during their tenure in this regard.

Apart from that, Shri Gummodi Bapuji in-charge of DCH Section took a meticulous care to arrange this volume in a systematic manner with the help of his colleagues S/Shri A.V. Raman, K.Sambamoorthy, Investigators, P.G. Sankaran and M. Thangavelu, Statistical Assistants and other section officials. The preparation of maps included in this volume were done under the supervision of Shri Jogesh Das, Senior, Geographer

In the compilation and processing of Village Directory and Town Directory data, it was ably assisted by Smt. R. Rani bai and Smt. A.M. Mangayarkarasi. Investigators and their assistants respectively while Shri. N. Sukumar Nandagopal. Investigator is chiefly responsible for preparing the analytical notes. inset tables. draft write ups and arrangements of the matter in order.

The PCA data for the district were processed at the Regional Tabulation Office. Madurai. Under the supervision of Sri. K. Govindarajan, Regional Deputy Director of Census Operations assisted by S/ Shri. k. Jaganivasan. Investigator. R. Sundararaman. S. Bala Subramanian and S. Philomina. Statistical Assistants. who were deputed from this Directorate to the Regional Tabulation Office. Madurai.

Finalisation of PCA data (Panchayat Unionwise) and providing computer codes for villages were attended to by Shri R. Lakshminarayanan and Smt. M.V. Rajalakshmi, Investigators and staff of the Census Section. The district and taluk maps in this publication give the administrative units upto village level, the location of towns and cities, communication facilities, etc. This time in the taluk map, the boundary of each of the C.D. Block units, namely, 'Panchayat Unions' have been shown separately to synchronise with the presentation of data, Panchayat Unionwise.

I convey my grateful thanks to Shri A.R. Nanda, IAS., Registrar General and Census Commissioner, India for the valuable guidance and advice I received from him throughout. I am thankful to Shri N. Rama Rao, Deputy Registrar General (C & T) who has been a source of strength and constant help and guidance on all technical matters like a "Ready-Reckoner". I also thank Dr. K.P. Ittaman, Former Deputy Registrar General (S.S.) and Shri M.M. Dua, Joint Director, for planning, designing and co-ordinating the formats. I thank Shri M.K. Jain, Deputy Registrar General (S.S.) and Shri A.K. Singh, Deputy Director, Shri N.S. Soam, Assistant Director and his staff for scrutinising and approving the first volume so that it could fit in, in the all India pattern from uniformity point of view in the presentation of data and other items. My thanks are also due to Dr. B.K. Roy, Former Deputy Registrar General (Map) and Mrs. Minati Ghosh, the present Deputy Registrar General (Map) for providing technical guidance in the preparation of maps.

I have pleasure in acknowledging the able assistance rendered by the following officials of my office in the preparation of this volume.

ANALYTICAL NOTE

Census Concepts

Rural and Urban areas

It is customary to classify a place as rural or urban in every census and present data separately for rural and urban areas. Urban areas which are specifically defined for census purposes are determined on the basis of certain demographic and economic criteria. The rest are treated as rural areas. At the 1991 Census, the same criteria adopted for determining the urban areas at the 1981 Census have been continued. The urban areas of 1991 Census are:

a) All places with a Municipality, Corporation or Cantonment Board or Notified Town area:

b) All other areas which satisfied the following criteria:

(i) A minimum population of 5,000;

(ii) At least 75 per cent of male main workers engaged in non-agricultural and allied activities: and

(iii) A population density of at least 400 per sq.km. (or one thousand per square mile)

The above definition adopted for both the 1981 and 1991 Censuses varies slightly from those of 1961 and 1971 Censuses. As of the 1961 and 1971 Censuses, the males engaged in the activities of fishing, logging etc., were treated as engaged in non-agricultural pursuits and hence have been taken into account with those engaged in non-agricultural pursuits for applying the test of the 75 per cent non-agricultural workers criterion. But in 1981 Census as well as in 1991 Census, they have been treated on par with agricultural activities for the purpose of the test for this criterion. Prior to 1981 Census, certain places with less than 5,000 population were treated as urban areas on the basis of certain consideration like density, social and historical importance etc., at the discretion of the Director of Census Operations in consultation with the State Government. On the other hand, the tests on demographic and economic criteria were strictly applied at the 1981 and 1991 Censuses and no area was classified as urban area on other considerations.

Urban Agglomeration

This concept was adopted for the first time in 1971 Census and continued in 1981 and 1991 Censuses also.

An urban agglomeration is a continuous urban spread constituting a city or town and its adjoining urban outgrowths (OG) or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In certain cases, large housing colonies, university campuses, port areas, military camps, etc., would have come up around a city or town but falling outside the statutory limits of the city or town. They may be lying inside the boundaries of a village or villages which are contiguous to the city/town. These villages could not be treated as urban as they do not satisfy the urban criteria. But at the same time the colonies etc., mentioned above deserve to be treated as an integrated urban area. Therefore, all such towns together with their urban outgrowth will have to be treated as one urban unit and called urban agglomeration. All the constituent units of urban agglomerations are also independent urban units or towns.

Census House

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant and may be used for residential or non-residential purposes or both.

Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called Institutional Households.

Scheduled Castes / Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) was followed. The enumerators were instructed to record a person as belonging to Scheduled Caste or Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In the 1981 Census, a literate was defined as a person who can both read and write with understanding in any language. A person who could merely read but cannot write was not a literate. It was not necessary that for a person to be considered as a literate must have received any formal education or have passed any minimum educational standard. In the 1991 Census, all the children of the age of 6 years or less are treated as illiterates whereas in the 1981 Census all children of the age of four years or less were treated as illiterates.

Definition of work

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work or farm or in family enterprise.

Main and Marginal workers

The dichotomy of workers and non-workers of 1961 and 1971 Censuses had been dropped and the trichotomy of main workers, marginal workers and non-workers were introduced in the 1981 Census and has been continued in the 1991 Census also. A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like gur making etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on the local circumstances. In such cases what we were concerned with was the broad time spent during the agricultural season preceding the enumeration. Workers can be full-time workers or seasonal workers or marginal workers. If a person had done any work during the reference period and if he had worked for the major part of the year, i.e. if he had worked for 183 days or more, he was considered to be a full-time worker (Main worker). If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for less than 183 days, he was considered to be a marginal worker. Persons who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration were considered as non-workers

All the main workers and the marginal workers have been classified under one of the four main categories in the 1981 Census. While in 1991 Census, they have been classified under one of the nine industrial categories as was done in 1971 Census. They are: 1) Cultivators (C), II) Agricultural Labourers (AL), III) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, IV) Mining and Quarrying, V) (a) Manufacturing, Processing, Servicing and Repairs in Household Industry, V) (b) Manufacturing, Processing, Servicing and Repairs in other than Household Industry, VI) Construction, VII) Trade and Commerce, VIII) Transport, Storage and Communication and IX) Other Services.

The definitions of these nine industrial categories of workers are given below:

I. Cultivators (C)

For the purpose of census, a person is considered as cultivator if he/she is engaged in cultivation of land, owned or taken on lease from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

II. Agricultural Labourer (AL)

A person who works on another person's land for wages in money, kind or share should be regarded as agricultural labourer. He/she has no risk in the cultivation, but he/she merely works in another person's land for wages. An agricultural labourer

has no right of lease or contract on land on which he/she works.

III. Livestock, forestry, fishing, hunting and plantations, orchards and allied activities

Persons who were reported as engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities are treated as workers under this category.

IV. Mining and Quarrying

Persons who were reported as workers in mining and quarrying are classified under this category.

V. a) Manufacturing, processing, servicing and repairs in household industry

Household industry is defined as an industry conducted by the head of the household himself/ herself and/or by the members of the household at home or within the village in case of rural areas and within the precincts of the house only in case of urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The household industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act. Merely selling of food items or other edibles should not be regarded as household industry.

b) Manufacturing, processing, servicing and repairs in other than household industry

Persons reported as workers in manufacturing, processing, servicing and repairs other than those mentioned in V-(a) are treated as workers in this category.

VI. Construction

Persons working as plumbers, mason, electricians, painters and others engaged in construction work are treated as workers under this category.

VII. Trade and Commerce

Persons engaged in work such as wholesale or retail business or trade are treated as workers in this category.

VIII. Transport, storage and communications

Persons who were reported as drivers, conductors, technicians, fitters, welders and other communication workers are treated as workers under this category

IX. Other Services

Persons engaged in services other than those mentioned in I to VIII categories are treated under this category. Workers who could not be classified in any of the above I to VIII categories are treated as those engaged in other services.

Non-workers

All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration have been considered as non-workers. Thus, non-workers cover all persons who are engaged in his/her household duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependants such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all other non-workers not falling under any of the above categories.

History of the District Ceusus Hand Book

After the census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district as separate volumes. The State Government accepted the proposal and the first publication of the Dirstrict Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census also, the publication of the series of District Census Handbook was continued. The publication of 1971 District Census Handbook was in three parts, viz., Part-A, Part-B and Part-C. Part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census tables and certain administrative statistical tables.

The tradition of bringing out the District Census Handbook was continued by the State Government during the 1981 Census also. In this series, some individual features besides restructuring the formats of the Village Directory had been adopted bearing in mind the requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1981 Census data had also been kept in view.

The present 1991 District Census Handbook will be published in two parts, viz., Part-A - Village and Town Directory and Part-B - Village and Townwise Primary Census Abstract.

Scope of Village and Town Directory Statements and Primary Census Abstract

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of ward or division of a town which are constantly referred to by the data users.

The Village Directory statements give the list of villages by C.D. Block and for each village, the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix-I gives C.D. Blockwise abstract of educational, medical and other amenities available viz., the number of villages having various levels and types of educational institutions such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, maternity and child welfare centres, family planning centres, community health workers etc., and the number of such institutions, various types of sources of drinking water such as tap, well, tank, tube-well, river, fountain, canal, etc., post and telegraph offices, bus stops, railway station, power supply, etc., and also the number of villages not having such amenities.

Appendix-II gives for each non-municipal town (Census Towns) the area under forest, irrigated and unirrigated land, culturable waste (including gauchar and groves) and area not available for cultivation.

Appendix-III is only the list of villages where no amenities relating to education, medical, drinking water, post and telegraph, communication, power supply and market/hat and public health facilities etc., are available.

Appendix-IV gives the list of villages according to the proportion of SC/ST to the total population by ranges. Part-A of the Appendix lists out villages according to the proportion of SC population. The information is presented by the ranges in per cent, viz., 0-5, 6-10, 11-15, 16-20, 21-30 and 31 and above, and Part-B provides similar data for ST population ranges in per cent, viz., 0-5, 6-15, 16-25, 26-35, 36-50 and 51 and above.

The Town Directory gives important and very useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal or census towns. The details relating to each of the towns have been presented in seven statements, viz., Statements I to VI and IV-A.

In all the statements, except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments within the cantonment which are required to be left out. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

The concept of "urban agglomeration" was introduced for the first time in 1971 replacing the concept of "town group" of 1961. The concept of Urban Agglomeration has been continued in 1981 and 1991 Censuses also. An Urban Agglomeration may be explained as follows: "It must form a continuous urban spread constituting a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns"

An Urban Agglomeration includes two or more independent census towns. The names of the Towns/Urban Agglomeration have been arranged in the alphabetical order. The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have already been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town within brackets:

"(See the name of the main town of the agglomeration)"

By adoption of this method, the reader can get an idea of the particulars of the urban agglomeration in total and also separately.

Statement I - Status and Growth History

Statement - I provides some basic data based on the Primary Census Abstract for the towns and urban agglomerations of 1991 Census. For analysing the town directory data at the State level and All India levels, some new columns, have been introduced in the 1981 Census. The new items are:- class of town, area, number of households, population and growth rate at each census since 1901, density and sex ratio at the 1971, 1981 and 1991 Censuses are also provided in this statement. In 1991 Census, a new item, the name of C.D. Block is also provided in the statement.

Classes of the towns are presented according to 1991 Census population of the towns as follows:

Population	Class
1,00,000 and above	I
50,000 to 99,999	II
20,000 to 49,999	III
10,000 to 19,999	IV
5,000 to 9,999	V
Below 5,000	VI

Location Code Number for Towns

To distinguish the town from the village, the location code numbers for Towns have been given in Roman Numerals and these numbers have been assigned in a continuous order for the district as a whole. In 1991 census, name of C.D.Block has been included with a view to locate the town in the appropriate C.D. Block.

Statement II. Physical aspects and Location of Towns, 1989

Under physical aspects, annual rainfall and temperature particulars are furnished. These particulars were obtained from the Commissioner of Statistics, TamilNadu, Chennai. If the information is not available for any particular town, the nearest town for which it is available is given. For col (9), nearest city with population of one lakh and more is furnished according to 1991 census. For the other columns, figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The zero within brackets in columns, 10 and 11 denotes that the referent town itself is enjoying road transport facilities. In column 12, name of the navigable river/canal and its distance is indicated as follows : "Cauvery (R)-5". In this case, 5 is the distance in kms., of the navigable river Cauvery from the referent town. In brackets 'R' for river and 'C' for canal have been given.

Statement III : Municipal Finance, 1988-89

The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The soucres of the receipts and expenditure are furnished in terms of rupees in hundreds.

Statement IV : Civic and Other Amenities, 1989

The Civic and other amenities existing in the towns as in 1989 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the Concerned towns.

Column - 3 : Civic administrative status

It is also a new column introduced in this statement in 1981 to facilitate analysis during the 1981 census.

Column - 4: Population : It is also a new column introduced in this statement to measure the amenities in respect of population, based on 1981 census population data.

Column - 5 : Scheduled Caste and Scheduled Tribe population : This coloumn is also introduced in 1981 to know the size of the population of the weaker sections of the community in the towns based on 1991 census.

In this statement, information on road lengh, system of sewerage, number of latrines, method of disposal of night soil, protected water supply (source of supply, system of storage with capacity) and fire fighting service are also collected from the Municipal Commissioners and Panchayat Union Commissioners and furnished.

Electrification

Under this columns (15-19) electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners have been furnished below :

i) Domestic connections

This refers to the number of services given to houses for domestic purpose like fans, lighting, etc.,

ii) Industrial connections

This refers to the number of services effected to L.T. (Low Tension) Industries such as workshop, flour mills,, grinding machines, cotton ginning and engineering industries etc.,

iii) Road lighting points

This refers to the number of points of street lights which are maintained by the board and for which consumption charges are paid to the board by respective local bodies. For some panchayats, the number of services effected along has been furnished under street lights and not the points.

iv) Other Connections

This refers to the number of services effected for agricultual purposes, huts, public water supply systems, cottage industries etc.

v) Commercial Connections

This refers to the service given to shops, business houses, public institutions like offices, schools and commercial establishments.

Statement IV - A: Civic and other amenities, in notified slums, 1989

This is a new statement on civic and other amenities in the notified or recognised slums of class I and II towns introduced during 1981 census. Generally in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the Development Authority have notified the recognised slums. Such notifications are linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area. population,length of the paved roads, system of sewerage,number of different types of latrines and method of disposal of night soil etc. are given in this statement

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1989

In this statement,medical, educational, recreational and cultural facilities of the towns as in 1989 are furnished. Ths data for educational, and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively. Under medical facilities, the number of Hospitals/Dispensaries/T.B. clinics etc., and number of beds in medical institutions are furnished.

Under educational facilities, the number of Arts / Science/Commerce colleges, Medical colleges, Engineering Colleges,and Polytechnics obtained from the State Education Departments are furnished.

Column 10 : Recognised shorthand, typewriting and other vocational training institutions.

Particulars were obtained from the District Industries Officers and from the Directorate of Employment and Traning . The term, recognised refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department etc., of the Government or by semi-Government or autonomous bodies, public sector project etc.,

Column 16: Number of working women's hostel with number of seats

This is a new column introduced during the 1981 census. Considering the increase in the employment of women in urban areas, the housing need of working women has been considered as an important subject for study.

The Data presented under column 18 refer only to the permanent cinema theatres and do not include the touring cinemas.

Statement VI : Trade, Commerce, Industry and Banking in 1989

In this statement, Trade, Commerce, Industry and Banking facilities in the town as in 1989 are furnished. Banking particulars were obtained from the Reserve Bank of India. The informations on number of agricultural and non-agricultural credit societies were collected from the Registrar of Cooperative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract

The Primary Census Abstract as it is called presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Village Primary Census Abstract" and for each ward/division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1991 has been slightly modified as compared to the 1981 Primary Census Abstract.

The Primary Census Abstract gives the details on area, number of occupied residential

houses, number of households, total population, population in the age-group 0-6,number of SC/ST population, literates, total mainworkers, distribution of main workers by 9 industrial categories, marginal workers and non-workers in respect of each unit with male, female breakup. In 1981, the main workers were classified into four categories where as in the 1991 census they are classified into 9 industrial categories as in 1961 and 1971 censuses. For the first time in this Census, the population in the age group 0-6 with sex breakup is presented in PCA in order to arrive at the realistic literacy rate, as all the children below 7 years are treated as illiterates in this census. The urban/village Primary Census Abstract gives this information for each village and each Urban ward. Till 1981 Census, the Primary Census Abstract was presented for each taluk and for each town in a district. But, in the 1991 census, the Primary Cenus Abstract for each CD Block is presented for the first time in the Indian Census. Besides these, separate Primary Census Abstract for Scheduled Castes and Scheduled Tribes which contain similar details as those in the PCA for general population are presented for State/District/Taluk/Commuinty Development Block/UA/City/Town.

With a view to ensure comparability to enable data users to derive the figures for either for a revenue village or Panchayat according to their requirments, the data are presented for segments of villages also, wherever portions of one village happen to be in two or more Panchayats. The segment wise data have to be used separately or added with the data of concerned segment so as to derive panchayat data. For example if portion of a revenue village bearing L.C.No 9 forms two parts of panchayats, the figures are given separately for each portion of the village against L.C.No 9 a/b and 9 b/b. The total figures for the entire revenue village can be arrived at by adding the figures given against both the segments viz. 9 a/b and 9 b/b. given in the village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned are to be added up to arrive at the total figures for the respective panchayats. An appendix is presented in the case of the Urban Primary Census Abstract and it gives 1991 population, Scheduled Caste and Scheduled Tribes population for each enumerator block of the town. This may be useful for administrative and election purposes in the urban areas. Such data are also required by urban planners and reserachers for conducting other special studies in selected blocks.

MODE OF PRESENTATION

At the beginning, the District Primary Census Abstract containing data for District and C.D. Block (for Total, Rural, Urban areas) as also towns under each C.D. Block and at the end, all the towns/ U.As; in the district are presented. In 1991 Censue, the C.D. Blocks is the main unit of presentation of data instead of taluk which was the main unit till 1981 Census. The District PCA is followed by alphebetical list of villages for each C.D. Block in the district. This is followed by Village/Urban PCA. In the Village/Urban PCA, data for the first C.D. Block for total, rural and urban areas seperately followed by date for villages and Census towns falling under each CD Block are presented. Thereafter, similar data for second, thrid and subsequenet C.D. Block, in the district are presented. At the end of the last C.D.Block, the Urban PCA containing data at ward level for all the towns and cities besides the data for UAs are presented. In an appendix to the Urban PCA the total population and the population of Scheduled Castes/ Scheduled Tribes for each Enumerators Block of every town/city in the district are given. After the appendix to Urban PCA, the Talukwise PCA containing data for the District and each taluk in the district with Total, Rural and Urban breakup is presented, as such data are also sought after. This is followed by two annexures. Annexe-I contains Details of Community Development Blocks failing under each taluk and Annexe - II contains names of the villages / segment of villages constituting each town in the district.

Maps.

Apart from the District Map, given as frontispiece, maps for each taluks showing the villages, Location Code numbers and their boundaries are presented. The boundaries of the C.D. Blocks falling in the taluks are also shown. As compard with the maps presented in 1971 and 1981 District Census Handbook, some improvements have been effected in the maps presented in this volume. All towns are shown with shading screens and also spheres according to the population size of towns in the district and taluk maps.

Area Figures

In the District Primary Census Abstract, the area figures are given in square kilometers for total, rural and urban areas. In the village Primary Census Abstract, the area figures for each revenue village are given in hectares upto two decimals. The area figures for each town is given in Sq. Km in the Urban Primary Census Abstract. In the District Primary Census Abstract the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor General of India. Figures for urban areas and villages are those supplied by the local bodies and revenue authorities respectively. The total of the urban area of the district has been arrived at by adding the urban area figures of each town within the district. Area figures for the rural areas of district are derived by subtracting the urban area figures from the total area of the district. The area figures of each C.D. Block represent the area figures that are published in the concerned departmental publication of the State Government. The area figures of the C.D. Blocks will not added up to the district area figures because, the C.D. Block area figures represent the "Land Use" area, while those of the district represent "Geographical Area". supplied by the surveyor General of India. The total of the village areas given in the village/Urban Primary Census Abstract may not tally with the rural area of the C.D. Block given, as the C.D. Block area figures include hills, forests, rivers etc., whereas the village area may not include the same. One Sq.km is equal to 100 hectares.

It is hoped that the pattern of presentation of basic census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

Part - B

Brief analysis of the Primary Census Abstract data based on Inset Tables.

A brief analysis relating to certain vital population characteristics is made utilising the Census data that are available in the Primary Census Abstract. A number of tables have been designed for this purpose. The tables are generated at the District and community Development Block level for the rural areas and with regard to urban areas, townwise particulars are presented.

KAMARAJAR DISTRICT - AN OUTLINE

1. Brief histroy of the district

Kamarajar district was formed in 1985 by trifurcation of Ramanathapuram district and named after the great national leader and freedom fighter Shri. K. Kamaraj. As the entire Kamarajar district was formed on the part of the erstwhile Ramanathapuram district it also enjoys the historical status and glory of the Ramanathapuram district.

Pandyas were the early rulers of the erstwhile Ramanathapuram district comprising the present districts of Madurai, Ramanathapuram and Tirunelveli. Its history is closely linked with the Pandyan kingdom till the end of the 15th centary. Pallavas followed by cholas ruled this area for a brief period. Among Chola rulers a mention may be made of Rajendra chola who brought the entire region under his authority in 1603 A.D. Ramanathapuram territory was also under Muslim rulers as part of the Muslim empire till 1365 A.D. With the help of the Vijayanagar King, this territory was brought again under the rule of Pandyas by Parakrama pandyadiva about 1520 A.D., the Nayaks of Vijaya Nagar took over this territory under their control from Pandya Dynasty. For about two centuries Nayak kings ruled Ramanathapuram territory from Madurai.

During the Nayaks rule, the Marava Chieftains-Sethupathis who were Lords under the Pandyan Kings reigned over this part (17th Century) having their principal seat in Ramanathapuram. At the beginning of the 18th Century (1710 A.D.), family dispute over the issue of successor resulted in the division of Ramanathapuram.

In 1730 A.D. with the help of the king of Thanjavur, one of the chieftains deposed the Sethupathi and became the Raja of Sivaganga. The Nayak rulers of Madurai became weak by that time. With the downfall of the among them were the Sethupathy of Ramanathapuram and the Raja of Sivaganga. The histroy of Ramanathapuram is thus closely linked with the history of these two palayakarars in the later years. After that Ramanathapuram fell into the hands of Chanda Sahib of Carnatic in 1731. In 1741 A.D. the area came under the control of Mahrattas and then under the Nijam in 1744 A.D. Nawab rule was not acknowledged by these chieftains. By about the middle of 18th century they declared the adopted son of Queen Meenakshi, the last Nayak ruler, as the king of Pandya Mandalam against the Nawabs (1752 A.D.). At this time the throne of Carnatic had two rival claimants-chanda Sahib and Mohamed ali and this district was part of the Carnatic. The Europeans, French and British supported Chanda Sahib and Mohammed Ali respectively which resulted in a series of conflicts in the southern parts of continent. The two chieftains supported Chanda Sahib in this conflict with Mohamed Ali. In the year 1773, general smith subdued them and brought them under the authority of the British. The Sethupathy of Ramanathapuram lost his personal freedom. In 1792 when Muthuramaliga Sethupathy, who was paying a sum of Rupees 2,20,000 as the tribute to the British to prove his loyalty showed a disposition to rebel against the company. The British deposed him and took control of the administration of Ramanathapuram in 1795. It was converted into a Zamindari in 1803 and Mangaleswari Nachiyar was made a Zamindar. During these periods, the ruler of Sivaganga, Muthu Vadugunather, also revolted against the British. In his efforts he was ably assisted by the Marudu Brothers, Periya Marudhu and Chinna Marudhu. Muthu Vadugunather lost his life in the revolt.

After his death, the queen passed on the sovereignty to Marudu Brothers who ruled Sivaganga peacefully and devotedly on payment of regular revenue to the East India Company. In 1801 the Marudhu Brothers of Sivaganga revolted against the British in collaboration with Kattabomman of Panchalakuruchi. In 1801 A.D. Colonel Agnew captured the Marudu Brothers in Kalayarkoil on 1st October 1801 and hanged them. The Company nominated Gowri Vallabah Periya Udaya Thevar as Zaminder of Sivaganga.

The British who supported the Nawabs earlier, changed their strategy and finally annexed this country. The Nawab became powerless and handed over the administration of Ramanathapuram even as early as 1781. With the fall of Tippu Sultan, the British took full control and the Nawab of Carnatic was pensioned. In 1792, a British collector was appointed to administer the territory. Ramanathapuram and Sivaganga continued to be zamins till the system of Zamindari was abolished in 1948 after India attained Independence.

Ramanathapuram district was carved out in 1910 by the British out of portions from Madurai and Tirunelveli districts. The district comprised eighteen taluks as per 1981 census.

During the year 1984 a major change in the administrative set up of Ramanathapuram district was effected by the trifurcation viz., Kamarajan by transferring Srivilliputtur, Virudhu Nagar, Tirunelveli, Aruppukottai, Sattur and Rajapalaiyam taluks; Pasumpon Thevar Tirumagan by transferring Tiruppur, Karaikudi, Devakkottai, sivaganga, Manamadurai and Ilayankudi taluks and Ramanathapuram with the remaining taluks of Tiruvadanai, Paramakudi,

Kamudi, Mudukulathur, Ramanathapuram and Rameswaram taluks.

2. Jurisdictional changes

Kamarajar district was formed on 15.07.84 by the trifurcation of Ramanathapuram district into Pasumpon Muthuramalinga Thevar, Kamarajar and Ramanathapuram. (G.O. Ms.No. 347 dated 08.03.1985). Except this, no other jurisdicational change has occured in the district till 1st March 1991.

The district is divided into two revenue divisions comprising three taluks each for the purpose of revenue administration.

Aruppukottai revenue division comprising Virudunagar, Aruppukottai and Tiruchuli taluks and Sivakasi revenue division comprising Sattur, Srivilliputhur and Rajapalaiyam taluks.

The district is divided into six assembly constituencies of which no constituency is reserved for Scheduled Caste or Scheduled Tribe. There is only one Parliamentary Constituency.

The district comprises six Municipalities, 11 Panchayat Unions, 2 Town Panchayats, 10 Village Panchayats and 609 Villages of which 512 are inhabited and 97 are uninhabited. There are 18 Urban Units towns in the district.

3. Physical aspects of the district

Kamarajar district is a land bounded district with no coastal border. This district has an area of 4222 Km. spread between 9'.55 and 00' of the northern latitude and 77' - 55.00' of the eastern longitude. It is bounded on the South by Madurai, on the south east by Pasumpon Muthuramalinga thevar on the east by Ramanathapuram, on the North by Tirunelveli district and on the west by Kerala State.

The district has two natural regions viz., the eastern slopes of the western ghats in the Srivilliputtur taluk and the plains of the Sattur and Aruppukottai taluks. The eastern slopes of the western ghats in the Srivilliputhur taluk is the most important hill in the district. The average height of the hill is 1500 metres though a few of its peacks rise to 1700 metres above sea level.

The plains of Sattur and Aruppukottai taluks mostly have black cotton soil or regar locally knownas 'Karisal'.

4. Forestry, Flora and Fauna

The district is perhaps one of the very few places having a contrasting geographical pattern. An avide belt along the sivakasi-Sattur areas where civiltivation of crops is almost impossible and the serene Srivilliputhur-Watrap tract, rich in Vegetation, provide a contrasting look to the district. the western ghats range is a heaven for flora and fauna and the district is solely dependent on the hilly tract for harvesting water to feed the major rivers.

Many rare and endemic varieties of flora and fauna are found along the mountain tract, where a wild life sanctuary devoted to the preservation and development of a rare variety of squirrel is located near Srivilliputhur. The portion of the western ghats which runs throught the district is of considerable biological interest since it has a variety of birds, mammals, reptiles, butterflies and a rich variety of orchids and ferns.

The flora of the wildlife sanctuary has a unique biological importance. Many of the plants are rare while a few are endemic. The forests of the Alagarkoil valley and Saduragiri are known for their rare medicinal plants. So far the medicinal value of 275 plants found in the sanctuary has been reported to the outisde world. But the biological value of hundreds of plants remains to be studied.

Most interesting among the fauna found in the district is the rare species of grizzled giant squirrel found in the wild life sanctuary. the squirrel which resembles a rabbit is easily identifiable by its abnormal structure and the long tail that hangs out from the branches of trees. Like the normal squirrel, this variety also has arboreal habits and has developed a close affinity with western ghat vegetation. The giant squirrel is today a vanishing tribe and efforts are being made by the forest officials to increase it gradually.

Apart from the squirrel, the forest department has identified over 100 species of birds. The mammals found in the sanctuary include lion tailed monkey, Nilgiri langur and Nilgiri tahr. Apart from these animals, wild animals like elephants, panther and fox are also found in the western ghats ranges.

Forestry

The forest resources of the district are meagre as compared to the state as whole. Only 6.3. percent of the total geographical area is under forests in the district. Most of the forests in the district are tropical dry deciduous and trophical dry thorn evergreen.

The chief forest products are cashew, fuel, eucalyptus, sandal, casuarina and Odai trees.

According to the National Forestry resolution of 1952, the optimum area under forests is to be one third of the total geographical area. Considering the area devoted to intensive cultivation and the topography of the region the standard recommended regarding forest is unattainable. Area over which forests could be extended are those presently classified as not available for cultivation, cultivable waste and long fallows. Some cultivable areas however are unsuitable for forests. Long fallows if, they are cultivated once in three years would not be available for affestation. A good part of cultivable waste could be reclaimed.

With the social forestry programme in government lands, the forest department has enlarged its activities and interest even out side the reserve forest. Under this programme plantations were raised over 745 hectares during 1990-91.

Special steps are taken to conserve the forest areas and to ensure among other things, adequate pasture for live stock, supply of fire wood for domestic consumption and raw materials for industries. the total annual revenue from forests for the year 1990-91 works out to Rs. 57-52 lakhs.

5. Hills

A portion of the western ghats, one of the oldest mountain ranges of the world runs through the district. The eastern slopes of the western ghats start from the northern most point along the boundry between Kamarajar and Madurai districts and proceed south wards like an unbroken line with an average elevation of 1500 metres. The highest peak of this mountain range is Pemalai Mottai with a height of 1700 metres above means sea level. Tea and Coffee estates have sprung up on the slopes of the ghats.

6. Soils

The predominant soil in the district is black loamy or regar. Sattur, Srivilliputhur and Aruppukottai taluks are mainly covered by this type of soil which is best suited for the cultivation of cotton and also for chillies and millets.

7. Minerals and Mining

There is not much to mention about the mineral resources of the district. Lime stone of different grades, clay and Zypsum are the minerals of economic value found in the district.

8. Rivers

There are no perennial rivers in the district. The Arjuna river, the main water source for the district is fed by three hill streams originating in the western ghats. The combined course of the streams with the river runs to a stretch of 3.2. Km where it is met by the Chittar. The confluence later enters Viragasamudram and the big tank at Watrap where a dam has been constructed in two section, popularly referred to as a Pilavakkal dam. This dam is located near watrap in Srivilliputtur taluk.

The other rivers in the district the Vaipar, the Gundar are minor streams. The Vaipur flows across Sattur taluk. the Gundar in the eastern slopes of the Varushanadu and Andipatty ranges above Watrap flows through Aruppukottai and empties into the gulf of Manner.

The Mudangiar, The Uppodai and the Kanal odai are drainage channels in Srivillputtur, Sattur and Aruppukottai taluks respectively.

9. Electricity and Power

There is no electricity generating station in the district.

The consumption of electricity for different purposes in the district during 1990-91 is as follows :-

Category	L.T. Consumption (In '000 KWA)	U.T. Consumption
Domestic	63679	-
Commercial	20029	-
Public Lighting	4942	-
Industrial	58271	201537
Water Works	4786	-
Agriculture	75827	-

The lift irrigation system operating in the district consists in tapping the underground water by means of pumpsets either operated by oil engines or by electric motors. As on 31st March 1991, 31,345 pumsets in the district have been energised.

As on 31.3.91, 600 villages and 1184 hamlets have been provided with electricity. The rural electrification scheme not only includes street lighting and energising of Pumpsets,but also provides power to various small and cottage industries in the rural sector.

10. Land and land use pattern

The break up of land use for the district as on 1989-90 is shown below :

Land and Land use pattern 1989-90

	Area (in hectares)	Percentage to total area
Total Geographical area as per village papers	422506	100
Forest	26552	6.3
Barren and uncultivable land	4445	1.1
Land put to non-agricultural use	65949	15.6
Cultivable waste	7030	1.7
Permanent pastures and other grazing lands	907	0.2
Land under tree crops and groves	1815	0.4
Current fallows	32323	7.6
Other fallow lands	77149	18.2
Net area sown	206336	48.9
Area sown more than once	5682	1.3
Total cropped area	212018	50.2

Nearly 49% of the geographical area of the district comes under cultivation followed by land under fallows which accounts for 18%. Area under non-agricultural use such as urban land and settlements cover little more than 15% of the total area while forests occupy as little as six percent.

12. Agriculture

The economy of the district mainly depends on agriculture as farm output provides sustenance to 52% of the labour force. Productivity of agriculture is influenced by a number of factors. Chief among them being Soil, Climate, irrigation, marketing, credit facilities and agricultural practice and techniques.

The soil of the district are of poor fertility. The alluvial type of soil which is conducive for raising of crops is absent. The soil mainly found in the district is block loamy or regar which is best suited for the cultivation of cotton and also for chillies and millets.

13. Irrigation

The irrigation facilities in the district are inadequate to raise crops throughout the year as there are no major rivers providing perennial water supply for cultivation. The main source of irrigation in the district is tanks and wells which are rainfed. The rain fall during the South-west monsoon is not much. The rains from north-east monsoon is major one but rainfall occurs is utilised to the best advantage through a large number of tanks and wells in the district.

Wells which provided an unfailing supply of water remained an important source of irrigation in the district. There are 42,137 wells including tubewells in the district used extensively for irrigation during 1989-90. These wells irrigated an area of about 37,310 hectares. During the same year 17152 electrical and 2964 diesel pumpsets were in use for pumping water form these wells.

The next chief source of irrigation in the district is tanks. 974 tanks in the district irrigated an area of about 30277 hectares.

The Pilavakkal dam has been serving as a major source of irrigation. The dam has two sections, the Periyar dam with a capacity of 192 million cubic feet and the Kovilar dam with a capacity of 133 million cubic feet. The total annual storage of the dam is 650 million cubic feet. The two

annual storage of the dam is 650 million cubic feet. The two reservoirs, Periyar and Kovilar benefit about 7500 acres by feeding about 40 tanks.

There are a number of irrigation schemes like Anaikuttan, Kullar Sandai, Vembakkottai and Golwarpettai in various stages of construction.

Details of irrigation projects in the district as on 1990-91 are shown in the table.

IRRIGATION PROJECTS

(Area in Hectares)

Sl. No.	Project	Name of the Project	Cross Command area
1.	Major Project	— Nil	Nil
2.	Medium Irrigation Projects	1. Pilavakkal Reservoir Project	3579
		2. Anaikuttam Reservoir Project	1740
		3. Sullur Sandai Reservoir Project	1170
		4. Vembakottai Reservior Project	3278
		5. Golvarpatti Reservoir Project	N.A.

Nearly 49 percent of the district, namely 2.06 lakh hectares is under cultivation. Of the total cropped area 0.90 lakh hectares or 45.24 percent is under food crops. The principal cereal crops of the district are Paddy, Cumbu, Cholam, Ragi, Varagu, etc.

Paddy is the important food crop cultivated over an extent of 0.36 lakh hectares. Paddy is grown on wet lands irrigated by rivers, tanks and wells. Cumbu is grown about 7.29 percent of the total area sown. Large areas in the taluks of Sattur and Aruppukottai come under Cumbu. Ragi is grown during May-June and November-January and about 1.80 percent of the total area sown come under this crop. Cholam is grown as a rainfed crop and occupies about 4.46 percent of total area sown in 1990-91.

Cotton is the major commercial crop cultivated over an area of 0.49 lakh hectares. Cotton is the staple crop suitable for black cotton soil of Sattur, Srivilliputhur and Aruppukottai taluks. Kamarajar district is one of the chief cotton producting areas in the state, besides Coimbatore and Tirunelveli.

Another commercial crop of importance in the district is chillies. 'Sattur Chillies' is famous in the market.

Oil seeds are grown in the district as a rain fed crop. Among oil seeds, Groundnut and Gingelly occupy important places.

Details of area under principal crops in the district during 1990-91 are as follows :

Name of the Crop	Area under crops (in hectares)	Production (In Tonnes)
Paddy	36782	111250
Cholam	8948	10210
Cumbu	14623	16900
Ragi	3602	7670
Total Cereals	69108	151190
Green gram	7629	2900
Red gram	9285	1970
Total Pulses	21607	10690
Total food grains	90715	161880
Groundnut	11336	11590
Gingelly	7245	890
Total oil seeds	18962	13120
Sugarcane	3009	338540
Chillies	1490	4260
Cotton	49675	76610

The district has a state seed farm at Devadanam. The main object of the farm is production and distribution of quality seeds of Paddy, Millets, Pulses, Oil seeds and Vegetables. These farms serve as model farms in nearby farming community on farm maintenance and scientific method of cultivation.

The agricultural extension set up has been reorganised in the state following the training and visit system with financial assistance from the world bank. This sytem introduced in the district since its formation aims to build a professional agriculture extension service capable of assisting the raising of farmers production and income and providing appropriate support for agricultural development.

14. Animal Husbandry

The district being depend on agricultural and pastoral tract animal Husbandry acquires speical importance.

According to the live stock census of 1990-91 the district had a cattle population of 90307 of which 50656 were males and 39651 were females. There are 65.634 buffaloes in the district of which 13623 were males and 52011 were females. The total number of sheeps and goats were 192586 and 172747 respectively.

The following veterinary institutions in the district are engaged in rendering veterinary services to the livestock.

Veterinary hospitals	-	1
Veterinary dispensaries	-	21

The key village scheme is the major government programme to improve the quality of cattle. Under this scheme one intensive cattle development project with 39 artificial insemination centres are functioning in the district.

Poultry development has been a Primary Phenominal in the district. Total number of poultry in the district as on 31-03-1989 was 443366. To encourage poultry development a poultry extension centre is functioning in Palayampatti at Aruppukottai.

As a consequence of Animal Husbandary departments schemes like the supply of pedigree bulls, key village schemes, the setting up of artificial insemination centres etc the live stock population in the district have improved very much.

15. Fisheries

Kamarajar being an inland district without coastal line, fishing has been carried out in inland waters. There are four fishing centers in the district at Srivilliputtur, Aruppukkottai and Sattur. Fast growing indigenous and exotic varieties of inland fish fingerlings are stocked regularly and distributed to these fishing centres.

Fish farms have been established at Periyar and Kovilar dams for the production and supply of quality fingerling. About 110 lakh fingerlings were produced and stocked in these fish farms during 1990-91. the volume of fish catch in these reservoirs during the same period was 154.766 tonnes.

Fish ponds have been developed at the Pilavakkal dam under the drought area development programme. The work of providing over head tanks, better lighting facilities and fish ponds was completed in 1990-91 at a cost of 3.25 lakhs of rupees. In 1991-92 two more breeding ponds and hatcheries were provided costing three lakhs of rupees. Under Rural landless Employment Guarantee Programme it is proposed to take up nearly 100 percolation ponds in this district.

16. Industries

The most important factor influencing the growth of urbanisation and general economic development in a region is industrialisation. Industrialisation induces parallel growth in other non-agricultural sectors of the economy, Creates and augment the opportunities for employment and boosts up the population of the centres and areas where industries are growing.

The district, till recently was one of the backward on the matter of industrial development. The Conspicious absence of economically exploitable mineral resources in the district has been one of the reasons for the absense of large scale industries. The establishment of textile mills, cement industries in addition to the establishment of a number of industries in the medium and small scale sectors and also the encouragement given by the state government in the form of incentives and setting up of industrial centres accelerated the rate of industrialisation in the district.

Cotton being grown as a major commercial crop and cotton industry occupies an important place in the economy of the district. Textile mills functioning in the district produce a variety of cotton yarns.

Rajapalaiyam is the chief centre for spinning mills and ginning factories. Surgical cotton and bandage/clothes are also manufactured in this town. It is no gain saying that if anyone is tempted to call it as Monsester of South Tamil Nadu since a good number of spinning mills are located in this town. As the location of this town is eastern side of the western ghat the climate conditions prevalent here throughout the year is best suited for cotton industries.

With fairly rich deposits of Limestone and gypsum, Cement industries have been established in the district. The Tamil Nadu cement-a private sector undertaking at Alangulam and the Madras Cement-a private sector undertaking at Thulukkapatti are the two cement factories functioning in the district.

The Tamil Nadu cements was set up with the annual production capacity of 4.00 lakh tonnes of portland cement and the Madras cements with 4.15 lakh tonnes. These factories have almost achieved the production target during 1990-91.

Tamil Nadu Asbestos is another public sector unit in the district engaged in the manufacture of asbestos cement sheets.

Match industry is a premier industry in the district. Sivakasi and Sattur are important Centres for the manufacture of matches. More than 100 units in the district manufacture matches providing employment to about 24 thousand persons.

Crakers and tureworks industry is a flourshing industruy in the district. The availability of cheap lobour, abundance of salt petre and ready market in the state encouraged setting up of these industries in the district. This industry has been established in and around Sivakasi. Roughly 15,940 persons are employed. Some of the factories manufacture explosives for blasting also. A huge quantity of the crackers manufactured are also exported to foreign countries.

Sivakasi and Sattur are well known for the match industry and this area has the highest number of match factories in the whole of the country. About 70 percent of the total production of matches and fireworks in India are manufactured at Sivakasi and Sattur.

Printing industry is one of the oldest industries in the district started mainly to supply labels to match and fireworks industries. This industry soon developed well and automatic litho and offset printing presses were started. Multi colour and well designed calendars, pictures of god, famous personalities, greeting cards, text books etc., are some of the important items printed here. This industry provide employment to about 4600 persons.

Sundaram Fastners limited and Sundaram Abex limited, both private sector enterprises of the famous T.V.S. group are located at Arasakulam in Aruppukottai taluk and Kanzamanickampatti respectively. The former manufactures high density bolts and nuts and the latter fabricated materials and automobile brakes commands a very good market both in the internal as well as external level.

There are 7165 registered small scale industrial units in the district as on 31.12.1990 engaged in the manufacture of a wide range of products. Major groupwise breakup figures of these units are as follows.

SMALL SCALE INDUSTRY

Sl. No.	NIC Code	Industry Group	No. of Factories	No. of Workers Employed
1	20 & 21	Food Products	449	1519
2	22	Beverages, Tobacco and Tobacco Products	31	116
3	23	Cotton Textiles	319	3424
4	24	Wool, Silk, Synthetic Fibre	157	1375
5	25	Jute, Hemp, Mest Textiles	4	28
6	26	Hoisery & Garments (Textile Products)	110	640
7	27	Wood Products	147	453
8	28	Paper and Paper Products Printing & Printing Products	891	8629
9	29	Leather Products	6	25
10	30	Rubber and Plastic Products	306	2178
11	31	Chemical and Chemical Products	3449	39846
12	32	Non-Metellic Mineral Products	134	905
13	33	Basic Metal Products	38	716
14	34	Metal Products	302	963
15	35	Machinery & Parts except electrical	138	232
16	36	Electrical Machinery and apparatus	39	149
17	37	Transports & Equipments	43	162
18	38	Miscellaneous Manufacturing Industrues	552	1466
		Total	7165	61826

There are a variety of cottage and village industries dispersed throughout the rural areas in the district. Some of the common cottage industries found in the district are making of boxes and other articles from palmyra leaves, metal articles from copper, brass and aluminium for domestic use etc.

Gem cutting a new activity has been introduced in the district exclusively for women and it is picking up and it may become an alternative to the match industry in due course.

17. Trade and Commerce

Virudunagar, Rajapalaiyam, and Sattur are important centres of trade in the district. Virudunagar being the district headquarter is an important town lies in the Benaras-Cape comerin National Highway and is well served by road and rail network. The various taluk headquarters and other towns are also well connected by good roads. Virudunagar, Rajapalaiyam, Sattur, Watrap, Aruppukkottai, Kamudi are prominent centres for wholesale and retail trade.

Cotton, groundnut, Chillies and match and fireworks are the chief goods of trade. Apart from agricultural products and other primary goods like food grain, cotton, spices, etc., manufactured goods like matches, crackers, cement articles, textiles are marketed within as well as outside the district. This district being one of the major manufacturing centres of matches and fireworks in India a huge quantity of these items are marketed not only to different parts of the country but also exported to foreign countries. Market committies are functioning in the district for the purchase and sale of Cotton, groundnut, Jaggery, Chillies etc.

Two warehouses one at Virudunagar and another at Rajapalaiyam are functioning in which food grains, spices, pulses, cotton, chillies, jaggery are stored and traded.

18. Transport and Communication

The district is served by the metre gauge section of the Southern Railway. The important Railway Junction in the district is Virudunagar. The main line form Madras-Egmore to Rameswaram runs through the district linking Karaikkudi and Manamadurai. Madurai is connected by ametre gauge line from Manamadurai Junction. Virudunagar an important commercial centre of the district is connected to Manamadurai by a metre gauge line via Aruppukkottai. Sattur, Sivakasi, Rajapalaiyam and Srivilliputtur linked with Madurai via Virudunagar.

The district has a fairly good road system. The district is connected by Banaras-Cape Comerin National High Way (N.H. 7). Madurai-Tenkasi State Highway connects Rajapalaiyam and Srivilliputhur.

Due to the limitations and locational characteristics of the railway lines, in the district buses play an important role in the transport system. About 954 route buses run by the Pandiyan Roadways Corporation interconnect all important places in and around the district. Supplementing the route buses 19 Auto-rickshaws and 54 Taxis are in operation in the district. There were 217 goods carriages in the district as on 1990-91 for moving cargo to various places. The district is connected by a network of post and telegraph offices two out of 264 post offices in the district are head post offices, 40 are sub-post offices and 222 are extra departmental sub office/ branch offices. There are also 74 combined telegraph offices to provide telegraph facilities in the district.

19. Rainfall and Climate

The district has a high mean temperature and a low degree of humidity. Eventhough the region is not subjected to extremes of climate, the summer months are quite hot and the difference between the maximum and minimum temperatures are only moderate. The maximum temperatures is rarely above 38C and the minimum seldom below 20C. The atomosphere is dry with little moisture during the beginning months of the year. This season being cool is pleasant and enjoyable. By march the mercury acquires an uptrend which is gradual and persistant. This trend of the barameter indicate the ushering in of summer with its hot days. This period of hot sun prevails till June when South west monsoon sets in which brings scanty rain. This monsoon period lasts till August. The heaviest rainfall occurs during October to December, when the north east monsoon sets. In 1990-91 nearly 64% of rainfall about 533 mm occured during north east monsoon period.

A statement showing the monthwise rainfall in millimetres in Kamarajar district during the period 1990-91 is given below:

Month and Year	Normal rainfall	Actual rainfall
June 1990	19.3	9.9
July	23.5	4.1
August	51.5	33.2
September	67.9	117.4
During South West Monsoon	162.2	164.6
October	194.0	287.3
November	168.4	189.0
December	69.7	57.1
During North East Monsoon	432.1	533.4
January 1991	30.3	48.9
February	22.3	1.6
During Winter	52.6	50.4
March	30.5	7.2
April	74.1	44.8
May	59.7	38.2
During hot weather period	164.3	90.2

20. Education

According to 1991 Census the percentage of Literate population of the district is 62.91. The percentage of male literate is 75.67 and that of female is 50.17

The following statement shows the total number of schools and colleges registered in the district during 1990-91

Category	No.	Number of Students
1. Primary Schools	1030	205837
2. Middle Schools	171	186866
3. High Schools	60	33190
4. Higher Secondary	77	74856
5. Colleges for Arts and Science	8	7890
6. Teacher Training Institutions	4	222
7. Engineering Colleges	2	925
8. Polytechnics	8	2872

21. Health

The district has fully equipped with Government and Private Hospitals. As on 1990, there are 7 Government Hospitals with about 666 bed strength. List of Government Hospitals in the district in 1990-91 and details regarding the patients treated are shown in the following statement.

	Name	Number of beds	Number of Doctors	Number of Para Medical Staff	Others	Number of Patients Indoor	Outdoor
	1	2	3	4	5	6	7
1.	Govt. Hospital Srivilliputtur	86	11	28	41	33835	208260
2.	Govt. Hospital Rajapalaiyam	124	15	49	8	30462	112467
3.	Govt. Hospital Sattur	46	8	18	27	140	34920
4.	Govt. Hospital Virudunagar	186	27	127	35	46312	313646
5.	Govt. Hospital Aruppukottai	108	17	43	49	5643	335426
6.	Govt. Hospital Sivakasi	72	7	9	24	16473	113676
7.	Govt. Hospital Watrap	44	2	13	10	17885	96455

There are 37 Primary Health Centres and 284 Sub-Centres attached to Primary Health Centres are also located in various blocks of the district.

Name of the Block	No. of Primary Health Centres	Sub-Centres
Virudunagar	3	32
Aruppukkottai.	3	21
Kariapatti	2	21
Tirunelveli	3	25
Karaikkudi	4	29
Sivakasi	4	40
Sattur	3	19
Vembakottai	3	22
Srivilliputtur	3	19
Watrap	4	26
Rajapalaiyam	5	30

In addition to these, voluntary organisations and private agencies are maintaining two and 39 hospitals respectively. There are four Employees State Insurance Hospitals. Activities of the Family Welfare Clinics attached to these Hospitals and Primary Health Centres during 1990-91 are shown below :-

	No. of operations performed
Vasectomy	119
Tubectomy	5346
Laproscopic	5240
I.V.D. Insertions	11160
Oral Pills issued	69253
Conventional contraceptives issued	681161
Medical termination of Pregnancy	1196

22. Major Social and Cultural Events

Important social and cultural events occurred in the district during the decade 1981-90 have been briefly mentioned in the subjoined paragraphs.

1984 :- In March heavy rains lashed region of the district. Big tank at Watrap breached and the water entered the village rendering many homeless. Announcement of trifurcation of Ramanathapuram district into Ramanathapuram Kamarajar and Pasumpon was made in August. General election to the State Assembly and the Loksabha were held in December.

1985 :- Formation of the district in March and renovation of great temple car of Shri Andal in August are important events of the year.

1988:- Opening of Baghavan Ramana Maharishi Ashramam in January and inauguration of the Collectorate and other Government office buildings by the Governor of TamilNadu in July deserves mention.

1989 :- General Elections to State Assembly and to Loksabha were held on 21st January and 24th November.

1990:- Virudhunagar, Aruppukkottai and Tirunelveli Taluks of the district faced heavy rains in January.

23. Places of Tourist importance

The district has a number of famous temples known for sculptural beauty and excellent architecture.

Srivilliputtur

An ancient temple town of the district is also a pilgrim centre. It is situated on the road leading to Tenkasi and is an important station on the Madras-Quilon railway line. Srivilliputhur is one of the 108 sacred Vaishnava temples of TamilNadu this place is favour for its ancient temple of Vadabadrasi Koil and the Nachiar koil. Vaishnavsite saint Periyalwar, Nachiyar and Andal were born and lived at Srivilliputtur.

Vadabadrasi koil tower is about 192 feet high and is an important landmark said to have been built in the 8th century. This temple dedicated to Lord Vishnu is in two floors. In the ground floor is Narasimha. The steps lead to Vadabadrasayanar, Lord in a lying posture. The temple has many beautiful wooden sculptures. The walls of the inner prakasram contains paintings of the shrine of the 108 vaishnavite temples. The sanctum sanctorum enshrines Andal, Rajamannar and Garudalwar. The chief festival is celebrated during the Tamil month of Adi.

The temple car with a height of 75 feet is massive and decorated with carvings. This car is the largest in Tamil Nadu, next only to the temple car at Thiruvarur. Srivilliputtur car festival celebrated in the month of Adi every year and attracts thousands of devotees.

Srinivasaperumal kovil popularly known as ;Then Thirupathi' is situated in Thiruvannamalai about 8 Kms in the north west direction of Srivilliputtur. This temple dedicated to Lord Vishnu attracts large crowd during Puratasi Saturdays.

Thiruchchuli is known for the Bhomminathasamy temple dedicated to Lord Siva. This temple noted for its architectural excellence is one of the fourteen saivite shrines sung by saint Thirugnana Sambandar. Thiruchchuli is also the birth place of Thiru Ramana Maharishi.

Panguni Uthiram is the most important festival celebrated in this temple. This festival celebrated in the month of Panguni lasts for 21 days attracts large crowd.

Mariamman temples at Virudunagar and Irukkankudi are famous temples in the district. Fridays in Adi month are considered important to worship Amman and special poojas are performed on last friday of Adi month.

The Pilavakkal dam located near Watrap in Srivilliputtur taluk is a beautiful and calm picnic spot where tourists can relax a day. The dam derives its name from its location-a split rock. It has natural look like a natural port, where the water is stored in a sort of a cleavage between two mountain structures.

The district administrations has been attempting to lure tourists to Pilavakkal by providing facilities like boating etc.,

These temples and monuments are not only places of historical and religious importance but alsocentres of tourist interest.

TABLE-1(A)

POPULATION AND NUMBER OF VILLAGES, 1991

Sl. No.	Name of C.D. Block	Population			No. of Villages	
		Persons	Males	Females	Total	Inhabited
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1.	Srivilliputtur	86,365	43,217	43,148	36	32
2.	Watrap	108,261	54,745	53,516	27	22
3.	Virudunagar	98,657	49,013	49,644	55	54
4.	Sivakasi	94,375	47,689	46,686	27	26
5.	Tiruchuli	74,335	36,843	37,492	100	75
6.	Narikudi	69,428	34,502	34,926	92	74
7.	Kariapatti	79,262	39,829	39,433	108	79
8.	Aruppukkottai	74,764	37,039	37,725	39	33
9.	Sattur	79,844	39,479	40,365	47	43
10.	Vembakottai	86,141	42,770	43,371	35	35
11.	Rajapalaiyam	127,901	63,989	63,912	43	39
	District Total	**979,333**	**489,115**	**490,218**	**609**	**512**

Table-1 (A) provides C.D.Block-wise rural population by sex and total number of villages in Kamarajar district. It is seen from the table that among 11 C.D. Blocks in the district, Rajapalaiyam C.D.Block has the highest population (127,901) where as Narikudi C.D. Block has the lowest population (69,428). Out of 512 inhabited villages in the district, Kariapatti C.D.Block has the higest number of inhabited villages 79 while Watrap C.D. Block has the lowest number of inhabited villages (22).

TABLE-1(B)

POPULATION AND NUMBER OF TOWNS, 1991

Sl. No.	Name and Civic Administration Status of Towns	Population		
		Persons	Males	Females
(1)	(2)	(3)	(4)	(5)
1.	Alangulam (VP)	6,126	3,160	2,966
2.	Anaiyur (VP)	17,659	8,915	8,744
3.	Aruppukkottai (M)	78,976	39,861	39,115
4.	Chattapatti (VP)	4,363	2,161	2,202
5.	Chettiarpatti (TP)	11,497	5,807	5,690
6.	Dhalavoipuram (VP)	5,485	2,770	2,715
7.	Elayirampannai (VP)	5,937	2,937	3,000
8.	Kooraikundu (VP)	11,238	5,616	5,622
9.	Pallapatti (VP)	18,991	9,490	9,501
10.	Rajapalaiyam (M)	114,202	57,943	56,259
11.	Rosalpatti (VP)	15,957	8,536	7,421
12.	Sattur (M)	29,226	14,642	14,584
13.	Sithurajapuram (VP)	9,358	4,702	4,656
14.	Sivakasi (M)	65,953	33,123	32,470
15.	Srivilliputtur (M)	68,644	34,667	33,977
16.	Tiruttangal (TP)	36,582	18,386	18,196
17.	Virudunagar (M)	70,971	35,734	35,237
18.	Viswanatham (VP)	14,899	7,347	7,552
	All Towns	**585,704**	**295,797**	**289,907**

Table-1 (B) provides town-wise population by sex in Kamarajar district. Out of 18 towns in the district, Rajapalaiyam (M) has the highest urban Population (114,202) followed by Aruppukkottai (M) (78,976)and Virudhunagar (M) (70,971) , while Chatrapatti (VP) has the lowest urban population (4,363).

TABLE-2

NEW TOWNS/TOWNS DECLASSIFIED, MERGED IN 1991 CENSUS

Sl. No.		Name of Town	Population
(1)		(2)	(3)
1	(a)	Added	5,937
	1.	Elayirampannai (VP)	11,238
	2.	Kooraikundu (VP)	
	(b)	Declassified	
		- NIL	NIL
	(c)	Wholly merged with other	
		- NIL -	NIL

Table-2 indicates the formation of new towns and declassification of old towns in 1991 Census. It is seen from the table that only 2 towns viz., Elayirampannai (VP) and Kooraikundu (VP) have come up during 1991 Census with population of 5,937 and 11,238 respectively. No town has been declassified or merged wholly with other towns in Kamarajar district during 1991 Census.

TABLE -3

Decadal change in distribution of population

Sl. No.	Taluk	Population						Percentage decadal variation (1981-91)			Percentage of Urban Population	
		1981			1991							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1981	1991

4.	Sivakasi	26 (100.00)		1 (3.85)	9 (34.61)	8 (30.77)	7 (36.92)	1 (3.85)
5.	Tiruchuli	75 (100.00)	10 (13.33)	17 (22.67)	39 (52.00)	8 (10.67)	1 (1.33)	-
6.	Narikudi	74 (100.00)	8 (10.81)	16 (21.62)	45 (60.81)	4 (5.41)	1 (1.35)	-
7.	Kariapatti	79 (100.00)	11 (13.92)	26 (32.91)	32 (40.51)	8 (10.13)	2 (2.53)	-
8.	Aruppukkottai	33 (100.00)	-	-	17 (51.52)	14 (42.42)	1 (3.03)	1 (3.03)
9.	Sattur	43 (100.00)	3 (6.98)	5 (11.63)	19 (44.19)	15 (34.88)	1 (2.32)	-
10.	Vembakottai	35 (100.00)	-	2 (5.71)	15 (42.86)	14 (40.00)	4 (11.43)	-
11.	Rajapalaiyam	39 (100.00)	5 (12.82)	1 (2.57)	10 (25.64)	14 (35.90)	8 (20.51)	1 (2.56)
	Total	**512 (100.00)**	**43 (8.40)**	**74 (14.45)**	**228 (44.53)**	**125 (24.41)**	**35 (6.84)**	**7 (1.37)**

Table-4 furnishes the information on C.D. Blockwise distribution of villages by population ranges in Kamarajar district. It is seen from the table that a maximum of 228 villages (44.32%) are in the population range of 500-1999 followed by 125 villages (24.41%) in the population range of 2000-4999. There are 43 villages (8.40%) which have a population of less than 200 and only 7 villages (1.37%) in the population range of above 10,000.

TABLE - 5

DISTRIBUTION OF VILLAGES BY DENSITY

Range of density (per Sq.Kms)	Total No. of Villages in each density range	Percentage of Villages in each density range
(1)	(2)	(3)
- 10	4	0.78
11 20	3	0.59
21-50	19	3.71
51-100	59	11.52
101-200	155	30.27
201-300	130	25.39
301-500	78	15.24
501 +	64	12.50
Total	**512**	**100.00**

Table-5 shows the distribution of villages and their percentages according to the density ranges. At the maximum 155 villages are in the density range of 101-200 constituting 30.27% followed by 130 villages in the density range of 201-300 constituting 25.39%. There are 85 villages in the density range of below 100 persons (16.60%) and 64 villages in the density range of above 500 persons (12.50%) per sq.km.

TABLE - 6 (A)

Sex Ratio Among Rural Population By C.D. Block, 1991

Sl. No.	Name of C.D. Block	No. of females per 1,000 males
(1)	(2)	(3)
1.	Srivilliputtur	998
2.	Watrap	978
3.	Virudunagar	1,013
4.	Sivakasi	979
5.	Tiruchuli	1,018
6.	Narikudi	1,012
7.	Kariapatti	990
8.	Aruppukkottai	1,019
9.	Sattur	1,022
10.	Vembakottai	1,014
11.	Rajapalaiyam	999
	DISTRICT	**1,002**

Table-6(A) shows C.D.Blockwise sex ratio for rural population in Kamarajar district. It is seen from the table that out of 11 C.D. Blocks in the district, 6 C.D. Blocks have the sex ratio above 1000. Sattur C.D. Block has the highest sex ratio of 1,022 females per 1000 males followed by Aruppukkottai (1,019). Tiruchuli (1,018), Vembakottai (1,014) Virudunagar (1,013) and Narikudi (1,012) Watrap C.D. Block has the lowest sex ratio of 978 females per 1000 males. It is also noted that the district sex ratio also exceeds 1000.

TABLE - 6 (B)

Sex Ratio for Towns, 1991

Sl. No.	Name and Civic Administration Status of Town	No. of females for 1,000 males
(1)	(2)	(3)
1.	Alangulam (VP)	939
2.	Anaiyur (VP)	981
3.	Aruppukkottai (M)	981
4.	Chatrapatti (VP)	1,019
5.	Chettiarpatti (TP)	980
6.	Dhalavoipuram (VP)	980
7.	Elayirampannai (VP)	1,021
8.	Kooraikundu (VP)	1,001
9.	Pallapatti (VP)	1,001
10.	Rajapalaiyam (M)	971
11.	Rosalpatti (VP)	869
12.	Sattur (M)	996
13.	Sithurajapuram (VP)	990
14.	Sivakasi (M)	980
15.	Srivilliputtur (M)	980
16.	Tiruttangal (TP)	990
17.	Virudunagar (M)	996
18.	Viswanatham (VP)	1,028
	All Towns	**980**

Table-6 B shows town wise sex ratio in Kamarajar district out of the 18 towns in this district. 5 towns have registered a sex ratio of over 1000. It is seen from the table the Viswanathan (VP) as the highest sex ratio (1,028 females per thousand males) while Rosalpatti (VP) has the lowest sex ratio of 869. The sex ratio of the district as a whole is 980 females Per 1000 Males.

TABLE -7

Proportion of Scheduled Caste Population to Total Population in the Villages

Percentage range of Scheduled Caste Population to total Population	No. of Villages in each range	Percentage of Villages in each range
(1)	(2)	(3)
	44	8.59
0 - 5	48	9.38
6 - 10	51	9.96
11 - 15	59	11.52
16 - 20	50	9.77
21 - 30	95	18.55
31and above	165	32.23
Total	**512**	**100.00**

Table - 7 provides distribution of village and their percentages according to the percentage ranges of SC population. Out of 512 village in Kamarajar district, 165 Villages (32.23%) have SC population above 31% followed by 95 villages (18.55%) in the range of '21-30 percent' SC population. There are 44 villages (8.59%) in the district with no SC Population.

TABLE-8

Proportion of Scheduled Tribe Population to Total Population in the Villages

Percentage range of Scheduled Tribe Population to total Population	No. of Villages in each range	Percentage of Villages in each range
(1)	(2)	(3)
Nil	469	91.60
0 - 5	40	7.81
6 - 15	2	0.39
16 - 25	-	-
26 - 35	-	-
36 50	-	-
51 and above	1	0.20
Total	**512**	**100.00**

Table - 8 shows distribution of villages and their percentages according to the percentage ranges of ST population. Out of 512 villages in 40 Villages (7.81%) have ST population less than 5% and only one village (0.20%) has ST population above 51%. As a whole 43 villages (8.40%) in the district have ST Population and the remaining 469 villages (91.60) have no ST population.

TABLE -9

Percentage of Scheduled Caste/Scheduled Tribe Population, in Towns - 1991

Sl. No.	Name of Town	Total Population	Total SC Population	Total ST Population	Percentage of SC Population to total Population	Percentage of ST Population to total Population

Table - 11(A) furnishes C.D. Blockwise percentage of Main Workers. Marginal workers and Non-Workers in Kamarajar district. The percentage of Main workers, marginal workers and Non-Workers of the district are 52.21%, 2.55% and 45.24% respectively. It is seen from the table that Main workers are found highest (57.34%) in Sattur C.D.Block and lowest (48.89%) in Narikudi C.D. Block. Marginal Workers are found highest (5.99%) in Narikudi C.D. Block and lowest (1.19%) in Watrap C.D. Block. As a whole, total workers are found highest (59.36%) in Sattur C.D. Block and lowest (52.34%) in Rajapalaiyam C.D. Block. The Non-workers are found highest in Rajapalaiyam C.D. Block with 47.66% and lowest in Sattur C.D. Block with 40.74% respectively.

Table-12 furnishes C.D.Blockwise distribution of inhabited villages according to availability of different amenities in Kamarajar district Among 512 inhabited villages in the district, all villages have drinking water and power supply facilities, 465 villages (90.82%) have education facility. 405 villages (79.10%) have communication amenity, 367 villages (71.68%) have pucca approach road, 207 villages (40.43%) have post and telegraph services and 131 villages (25.59%) have medical facility. Compared with other facilities, the availability of market hat facility is very low in Kamarajar district as only 14 villages (2.73%) have such locations. Among 11 C.D.Blocks in the district, Watrap, Aruppukkottai and Vembakottai C.D.Blocks have 4 amenities viz., education, drinking water, communications and power supply in all of its villages. Sivakasi C.D. Block has 3 amenities viz., education, drinking water and power supply in all of its villages. The remaining C.D. Blocks have drinking water and power supply in all of its villages.

Table - 13

Proportion of Rural Population served by different amenities

	District	**979,333**	**962,650 (98.30)**	**498,331 (50.88)**	**979,333 (100.00)**	**689,158 (70.37)**	**76,369 (7.80)**	**874,918 (89.34)**	**860,315 (87.35)**	**979,333 (100.00)**

Table-13 provides C.D.Blockwise information about availability of different amenities in proportion to rural population. In Kamarajar district, the entire rural population avail both drinking water and power supply amenities in cent percent, 98.30% avail education, 89.34% avail Communication, 87.85% avail pucca approach road and 70.37% avail post & telegraph services. Compared with other amenities, the availability of market/hat facility is very low in Kamarajar district as only 7.80% of rural population avail amenity in the village itself. Out of 8 amenities mentioned here, 4 amenities viz., education, drinking water, communications and power supply are available in cent percent to the rural population residing in Watrap, Aruppukkottai and Vembakottai C.D. Block, Sivakasi C.D. Block avail 3 amenities in cent percent, while the remaining Rural Population in the 7 C.D.Blocks avail only 2 amenities viz., Drinking Water and Power Supply in cent percent. while the remaining rural population in the 7 C.D. Blocks avail only 2 amenities viz., drinking water and power supply in cent percent.

TABLE - 14

Distribution of Villages Not Having Certain Amentities, Arranged by Distance Ranges From the Places Where these are Available

Villages not Having the amenity of	Number of Villages where the amenity is not available and available at a distance of			
	-5 Km	5-10 Km	10+Km	Total (Cols. 2 to 4)
(1)	(2)	(3)	(4)	(5)
1. Education	47	-	-	47
2. Medical	263	91	27	381
3. Dirnking Water		-	-	-
4. P & T	268	35	2	305
5. Market/Hat	166	135	197	498
6. Communications	102	3	2	107

Table-14 provides information aoout distribution of villages not having certain amenities and arranged according to the distance ranges from the place where the amenities are available in Kamarajar district. It is seen from the table that the amenity Market/Hat is not available at the maximum 498 villages out, of 512 villages in the district and is available within 5 Km for 166 villages, between 5 and 10 Km for 135 villages and beyond 10 Km for 197 villages. Followed this Medical, Post and Telegraph and Communication amenities are not available to 381, 305 and 107 villages respectively. Education facility is not available at the minimum 47 villages within the village itself, but the facility is available within 5 Km.

Table - 15

Distribution of villages according to the distance from the nearest town and availability of different amenities

Distance range from the nearest town (in Kms.)	No. of inhabited villages in each range	No. (with percentage) of villages having the amenity of
