# FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations / modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government/ Union Territory administration. It inter-alia provides data/ information on some of the basic demographic and socio-economic characteristics and on availability of certain important civic amenities/ facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (Wardwise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census,two parts of the District Census Handbooks (Part-A comprising Village and town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States / Union Territory's due to considerable delay in compilation of relevant material. In 1981 some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (wardwise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil / town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the village Directory and if an amenity was not available in the referrent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time during 1981 Census in the village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also,

keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this statement details on civic and other amenities were reported for the slums, of class I and class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/ centres were added in Statement IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterates at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Blocklevel presentation of data in the villaga Directory and PCA instead of the traditional Tehsil/Taluk/PS level presentation. It is expected that the presentation of village directory and PCA data at C.D. Block level will help the planners in formulation of micro-level developmental plans, as the C.D. Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census alongwith the corresponding codes of 1981.

This publication is a joint venture of the State Government/ Union Territory administration and the Census Organisation. The data have been collected and compiled under the direction of Shri K. Sampath Kumar, Director of Census Operations, Tamil Nadu on behalf of the State Government which has borne the cost of printing. The task of planning, designing and coordination of the publication was initiated by Dr. K.P. Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M. Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of

analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K. Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri A.K. Singh, Deputy Director who was assisted by Shri N.S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr. B.K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

# PREFACE

The District Census Hand Book is the most useful publication for the public, social workers, researchers, academicians, administrators, local bodies and the government officials for various official and non-official purposes. It gives data for the village/panchayat at the lowest level to the district level including panchayat union/taluk covering demographic, social, economic and cultural aspects. There had been an endeavour to make it as comprehensive as possible, to provide data on various aspects since its inception. The Registrar General, India, in his foreword has kindly traced out the improvements brought out from time to time since 1961 to the latest 1991 Census while the history of the District Census Handbook in this State is narrated in the Introductory chapter to this volume.

The District Census Handbook is a joint venture of the Census Organisation and the State Government of Tamil Nadu. The scope of District Census Handbook has been widely increased and restructured in 1981 to meet the Minimum Needs and Revised Minimum Needs Programmes of the Planning Commission. Broadly keeping up the 1981 main structure, the formats of the Primary Census Abstract have been restructured slightly for the benefit of data users. The nine-fold industrial classification of main-workers as done at the 1961 and 1971 Censuses has been revived instead of the four-fold classification of the 1981 Census. Population in the age-group 0-6 by sex has been given in order to enable computation of realistic literacy rate as all children below 7 years are treated as illiterates. One of the most important innovations of the 1991 Census is the presentation of data at the Community Development Block/ Panchayat Union level to help planners for the level of formulation of micro-level developmental plans at the lowest administrative unit. In this State for development planning the lowest administrative unit is the 'Panchayat Union'. This time, for the benefit of data users the village Directory and PCA data on the magnetic tapes/floppies from the published records, the Computer Code as well as the Manual Code of 1991 Census and the corresponding location code of 1981 Census are given.

The District Census Handbooks are now being published in two parts - Part-A - Village & Town Directory and Pard-B - Village and Townwise Primary Census Abstract. The two parts are being published in one volume as part A & B for smaller districts.

Part-A deals with a brief description of the district - its major characteristics in relation to the economic resources like forestry, agriculture, industries, social, cultural, religious and historical aspects apart from certain basic amenities like drinking water, education, medical, post and telegraphs, market day(s), communitions, etc., and if any of these

facilities are not available to any village, distance range of the nearest place from where it is available; power supply, approach to the village, nearest town to the village, health and family planning centres, primary health sub-centres and community health workers in the village are presented. Information on approach to village is also provided to identify inaccessible villages in the district. The exhaustive data on infra-structure in relation to amenities available to the villages and land-use pattern are meant to meet the requirements of ' Micro-level' local area development planning at the lowest administrative unit viz., C.D. Block/Panchayat Union. This is the reason why this time data are being published C.D. Block /Panchayat Union level - at level instead of the traditional taluk level.

In the Town Directory, information on class of town, area of the town, number of households, population and growth rate of population of the town at each Census from 1901 to 1991, sex-ratio at the 1971, 1981 and 1991 Censuses, physical aspects of rainfall and minimum and maximum temperatures recorded, distance from State District headquarters, nearest city, communication facilities like railway station, bus-route, inland navigation, Municipal finance, civic and other amenities like protected water supply, electric connections by type, fire fighting service, road length by type, system of sewerage, number of latrines by type, total population and SC & ST population, medical, educational facilities by type, recreational and cultural facilities like stadia, cinema, drama, community hall, public libraries and reading rooms, adult literacy classes/centres, working women's hostels, three important commodities manufactured, exported and imported; a special table on civic and other amenities available in notified slums in Class-I and Class-II towns have been included with a view to ascertain the availability of basic amenities and to meet the Minimum Needs and Revised Minimum Needs Programme.

Part-B: deals with the Primary Census Abstract for all the villages in rural areas and ward wise for urban areas. This time the PCA data like Village and Town Directory data are arranged in C.D. Block/Panchayat Uionwise giving area of the village (in hectares), area of town (in Sq.Km.), number of occupied residential houses, households, population by sex scheduled caste and scheduled tribe population, literates, main workers and their ditribution into nine industrial categories (as against the four industrial categories published in 1981), marginal workers, non-workers, and population in the age group 0-6 by sex.

Further, if a village is covering more than one Panchayat, break up figures for each segment of the village forming different Panchayat also are given.

It is hoped that with the modifications now brought out in the Village Directory, Town Directory and PCA data at the level of C.D. Block/

Panchayat Unionwise would go a long way in helping the planners to chalk out more effective developmental programmes at micro-level for local area developmental plans.

In the process of collection of data of this volume, various State and Central Government Departments have extended their kind co-operation particularly with regard to infra-structural amenities for Part-A - Village and Town Directory, history and general features of the district, etc., I convey my grateful thanks to all of them. The PCA data presented in Part-B of this volume were collected during the Census operations in February-March, 1991 the reference date during.

I remain grateful to the Director of Census Operations, Shri K. Sampath Kumar, who closely guided us in every aspect of this work. He had been a source of strength and inspiration for us. We owe a deep sense of gratitude to him for his kindness in dealing with our practical difficulties, his patient advice and formula of solutions for even small problems, which we brought to his attention.

I wish to record my deep sense of gratitude to (late) Shri M. Thangaraju, Joint Director of Census Operations and Shri Ch. Purnachandra Rao, Deputy Director of Census Operations for overall direction and guidance to bring out this publication. I use this opportunity to mention my special thanks to Shri G. Babuji Assistant Director of Census Operations for scrutinising the draft report and presenting the data with meticulous care and accuracy. I am also thankful to Shri S.P. Grover, Joint Director of Census operations and Shri Phool Singh, Deputy Director of Census Operations who have also provided overall guidance and supervision during their tenure in this regard.

Apart from that Shri Gummodi Bapuji in-charge of DCH Section took a meticulous care to arrange this volume in a systematic manner with the help of his colleagues S/Shri A.V. Raman, K. Sambamoorthy, Investigator's P.G. Sankaran and Sri M. Thangavelu, Statistical Assistants and other section officials. The preparation of maps included in this volume were done under the supervision of Shri Jogesh Das, Senior Geographer.

In the compilation and processing of Village Directory and Town Directory data, was ably assisted by Smt. R. Rani bai and Smt. A.M. Mangayarkarasi, Investigators and their assistants respectively while Sri K. Madhavan, Statistical Assistant, is chiefly responsible for preparing the analytical notes, inset tables, draft writeups and arrangement of the matter in order.

The PCA data for the district were processed at the Regional Tabulation Office, South Arcot, under the supervision of Sri Shanmugam.

Regional Deputy Director of Census Operations, assisted by Shri. K. Sambamoorthy and Smt. A.M. Mangayarkarasi, Investigators, S/Sri (Late) S. Jayabalan, K. Madhavan, N. Thirunavukarasu, Smt. G. Vasantha and Smt. N..E. Ramani, Statistical Assistants Sri. S.R. Ravi, D.E.O., who were deputed from this Directorate to the Regional Tabulation Office, South Arcot.

Finalisation of PCA data ( Panchayat Unionwise) and providing computer codes for villages were attended Sri. R. Lakshminarayanan and Smt. M.V. Rajalakshmi, Investigators and staff of the Census Section. The district and taluk maps in this publication give the administrative units upto village level, the location of towns and Cities, communication facilities, etc. This time in the taluk map, the boundary of each of the C.D.Block units, namely, 'Panchayat Unions' have been shown separately to synchronise with the presentation of data Panchayat Unionwise.

I convey my grateful thanks to Shri A.R. Nanda, I.A.S., Registrar General and Census Commissioner, India for the valuable guidance and advice I received from him throughout. I am thankful to Sri N. Rama Rao, Deputy Registrar General (C&T) who has been a source of strength and constant help and guidance on all technical matters like a 'Ready Reckoner'. I also thank Dr. K.P. Ittaman, former Deputy Registrar, General (Social Studies) and Sri. M.M. Dua, Joint Director, for planning, designing and co-ordinating the formats. I thank Sri M.K. Jain, Deputy Registrar General (S.S.) and Sri A.K. Singh, Deputy Director, Sri N.S. Soam, Assistant Director and his staff for scrutinising and approving the first volume (Periyar) so that it could fit in, in the all India pattern from uniformity point of view in the presentation of data and other items. My thanks are also due to Dr. B.K. Roy, Former Deputy Registrar General (Map) and Mrs. Minati Ghosh, Deputy Registrar General (Map) for providing technical guidance in the preparation of maps.

The data entry of the Village Directory and Primary Census Abstract in the computer had been done at the National Informatics Centre(NIC) at Madras, in the shortest possible time. My sincere thanks in this regard are to Shri M. Mohan, Technical Director and Shri A.N. Sridhar, Scientific Officer of the NIC, Madras.

I have great pleasure in acknowledging the able assistance rendered by the following officials of my office in the preparation of this volume.

# ANALYTICAL NOTE

## Census concepts

### Rural and Urban areas

It is customary to classify a place as rural or urban in every Census and present data separately for rural and urban areas. Urban areas which are specifically defined for Census purposes are determined on the basis of certain demographic and economic criteria. The rest are treated as rural areas. At the 1991 Census, the same criteria adopted for determining the urban areas at the 1981 Census have been continued. The urban areas of 1991 census are:

(a) All places with a Municipality, Corporation or Cantonment board or Notified townarea, committee, etc.
(b) All other areas which satisfied the following criteria:
  (i) A minimum population of 5,000
  (ii) At least 75 per cent of male main workers engaged in non-agricultural and allied activities:
  (iii) A population density of at least 400 per sq. km. (or one thousand per squaremile)

The above definition adopted for both 1981 and 1991 Censuses varies slightly from those of 1961 and 1971 Censuses. In the 1961 and 1971 Censuses, the male population engaged in the activities of fishing, logging etc., were treated as engaged in non-agricultural pursuites and hence have been taken into account with those engaged in non-agricultural pursuits for applying the test of the 75 per cent non-agricultural workers criteria. But in the 1981 Census as well as in the 1991 Census, they have been treated on par with agricultural activities for applying the test for this criterion. Prior to the 1981 Census, certain places with less than 5,000 population were treated as urban areas on the basis of certain considerationlike density, social and historical importance etc., at the discretion of the Director of Census Operations in consultation with the State Government. On the other hand, the tests on demographic and economic criteria were strictly applied at the 1981 and 1991 Censuses and no area was classified as urban area on other considerations.

### Urban Agglomeration

This concept was adopted for the first time in the 1971 Census and continued in the 1981 nd 1991 censuses also.

An Urban Agglomeration is a continuous urban spread constituting a city or town and its adjoining urban outgrowths (OG) or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In certain cases, large housing colonies, University campuses, port areas, Military camps,etc., etc., would have come up around a city or town but falling out side the statutory limits of the city or town. They may be lying inside the boundaries of a village or villages which are contiguous to the city/town. These villages could not be treated as urban as they do not satisfy the urban criteria. But at the same time the colonies etc., mentioned above deserve to be treated as an integrated urban area. Therefore, all such owns together with their urban outgrowth will have to be treated as one urban unit and called urban Agglomeration. As no outgrowth (OG) as defined above, has been recognised in Tamil Nadu, all the constituent units of urban agglomerations are also independent urban units or towns in the State.

### Census House

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as aseparate unit. It may be occupied or vacant. It may be used for residential or non-residential purposes or both.

### Household

A household is a group of persons, who commonly live together and would take their meals from common kitchen, unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of households with unrelated members are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called institutional Households.

### Scheduled Castes / Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act,108 of 1976) was followed. The enumerators were instructed to record a person as belonging to Scheduled Caste and Scheduled Tribe provided the name given by the person was found in the list supplied to them.

### Literates

A literate is defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, is not a literate. It is not necessary

that a person, to be considered as a literate, must have received any formal education or have passed any minimum educational standard. In the 1991 Census, all children of the age of Six years or less are treated as illiterates whereasin the 1981 Census all children of the age of Four years or less were treated as illiterates.

### Definition of work

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise.

### Main workers and Marginal workers

The dichotomy of worker and non-worker of 1961 and 1971 censuses had been dropped and the trichotomy of main worker, marginal worker and non-worker was introduced in the 1981 Census and this has been continued in the 1991 Census also. A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries, like gur making etc. were carried on, either throughout the year or only during certain seasons or part of the year, depending on the local circumstances. In such cases what we were concerned with was the broad time spent during the agricultural season preceding the enumeration.Workers can be full-time workers or marginal workers. If a person had done any work during the reference period and if he had worked for the major part of the year, i.e., if he had worked for 183 days or more, he was considered to be a full-time worker (Main Worker). If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for less than 183 days, he was considered to be a marginal worker. Persons who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration were considered as non-workers.

All the main workers had been classified under one of the four main categories in the 1981 Census, while in 1991 Census, they have been classified under one of the nine industrial categories as was done in 1971 Census. They are (I.) Cultivators (C), (II.) Agricultural Labourers (AL) (III.) Live Stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, (IV.) Mining and Quarrying, (V(a).) Manufacturing, Processing, Servicing and Repairs in Household Industry, (V(b).) Manufacturing, Processing, Servicing and Repairs in other than Household Industry, (VI.) Constructions, (VII.) Trade and Commerce, (VIII.) Transport, Storage and Communications, (IX.) Other Services. The definitions of these nine industrial categories of workers are as given below :

### I. Cultivators (C)

For the purpose of census, a person is considered as Cultivator if he/she is engaged in cultivation of land, owned or taken on lease from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction or cultivation.

### II. Agricultural Labourer (AL)

A person who works on another person's land for wages in money, kind or share should be regarded as agricultural labourer. He/she has no risk in the cultivation, but he/she merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

### III. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

Persons who were reported as workers in Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities are treated as workers under this category.

### IV. Mining and Quarrying

Persons who were reported as workers in Mining and Quarrying are treated as workers under this category.

### V(a). Manufacturing,Processing, Servicing and Repairs in Household industry

Household industry is defined as an Industry conducted by the head of the household himself / herself and/or by the members of the Household at home or within the village in case of rural areas and within the precincts of the house only in the case of
Urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The household industry should not be run on the scale of a registered factory which would qualify to be registered under the Indian Factories Act. Mere selling of food items or other edibles, should not be regarded as household industry.

**V(b). Manufacturing, Processing, Servicing and Repairs in other than Household Industry**

Persons reported as workers in household industry other than those mentioned in V(a) were treated as workers in this category.

## VI. Constructions

Persons working as plumbers, masons, electricians, painters and others engaged in construction work were treated as workers under this category.

## VII. Trade and Commerce

Persons engaged in work such as wholesale or retail business or trade were treated as workers in this category.

## VIII. Transport, Storage and Communications

Persons who were reported as drivers, conductors, technicians, fitters, welders and other communications workers were treated as workers under this category.

## IX. Other services

Persons engaged in services other than those mentioned in I to VIII categories fall under in any of the above I to VIII categories are treated as those engaged in other services.

## Non-workers

All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the data of enumeration have been considered as non-workers. Thus, non-workers cover all persons who are engaged in unpaid household duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants etc., convicts in jails or inmates of a penal, mental or charitable institution and all other non-workers not falling under any of the above categories.

## History of the District Census Handbook

After the Census of 1951, the Government of India offered to handover to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district as separate volume. The State Government accepted the proposal and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census also, the publication of the series of District Census Handbook was continued. The publication of the 1971 District Census Handbook was in three parts, viz., Part-A, Part-B and Part-C. Part-A relating to Village and Town Directory. Part-B relating to Village and Townwise Primary census Abstract and Part-C comprising District Census Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook was continued by the State Government during the 1981 Census also. In this series some individual feature besides restructuring of the formats of the Village Directory had been adopted bearing in mind the requirements of data for the socio economic programmes of the Government. The comparability of data with the 1971 Census data had also been kept in view.

The present 1991 District Census Handbook will be published in two parts viz., Part-A - Village and Town Directory and Part-B - Village and Townwise Primary Census Abstract.

### Scope of Village and Town Directory Statements and Primary Census Abstract

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory Statements gives the list of villages by C.D.Block and for each village the area, No of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix - I gives C.D.Blockwise abstract of educational, medical and other amenities available

viz., the number of villages having various levels and types of educational institutions such as middle schools, adult literacy centers, etc., various types of medical institutions such as dispensaries, primary health centres, maternity and child welfare centres, family planning centres, community health workers etc. and the number of such institutions, various types of drinking water sources, such as tap, well, tank, tube well, river, fountain, canal, etc. post and telegraph offices, bus-stops, railway-station, power supply, etc. and also the number of villages not having such amenities.

Appendix - II gives for each non-municipal town (Census Towns) the area under forest, irrigated and unirrigated land, culturable waste (including gauchar and groves) and area not available for cultivation.

Appendix - III is only the list of villages where no amenities relating to education, medical, drinking water, post and telegraph, communication, power supply and market/hat and public health facilities etc. are available.

Appendix - IV gives the list of villages according to the proportion of SC/ST to the total population by ranges. Part-A of the Appendix gives the villages according to the proportion of SC population. The information is presented by the ranges viz. 0 - 5, 6 - 10, 11 - 15, 16 - 20, 21 - 30 and 31 + percent and above, and Part - B according to the proportion of ST population ranges viz. 0 - 5, 6 - 15, 16 - 25, 26 - 35, 36 - 50 and 51 + percent and above.

The Town Directory gives important and very useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal or census towns. The details relating to each of the towns have been presented in seven statements viz. Statements I to VI and IV - A. In all the statements except IV - A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military or military establishments within the cantonment which are required to be left out. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explantaions for the codes adopted have been given in the beginning of the Town Directory Statements.

The concept of urban agglomeration was introduced for the first time in 1971 replacing the concept of town group' of 1961. The concept of Urban Agglomeration has been continued at the 1981 and 1991 censuses also. An Urban Agglomeration may be explained as follows: "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiuguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

Un Urban Agglomeration includes two or more independent census towns. The names of the Towns/Urban Agglomeration have been arranged in the alphabetical order. The particulars of the individual town which constitutes one of the units of
agglomeration have not been furnished separately because the particulars have already been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town within brackets: " (See the name of the main town of the agglomeration) "

By adoption of this method, the reader can get an idea of the particulars of the urban agglomeration in total and also separately.

### Statement I : Status and Growth History

This statement provides some basic data based on the Primary Census Abstract for the towns and urban agglomerations of 1991 Census. For analysing the town directory data at the State level and All India levels some new columns have been introduced in the 1981 census. The new items are:- Class of town, area, number of households, population and growth rate at each census since 1901, density and sex ratio at the 1971, 1981, and 1991 censuses are also provided in this statement. At the 1991 census, a new item - the name of C.D.Block is also provided in the statement.

Class of the towns are presented according to the 1991 census population of the town as follows:

| Population | Class |
|---|---|
| 100,000 and above | I |
| 50,000 to 99,999 | II |
| 20,000 to 49,999 | III |
| 10,000 to 19,999 | IV |
| 5,000 to 9,999 | V |
| Below 5,000 | VI |

### Location Code Number for Towns

To distinguish the town from the village, the Location Code Numbers for Towns have been given in Roman Numerals and these numbers have been assigned in a continuous order for the district as a whole. In the present 1991 Census, name of

C.D.Block has been included with a view to locate the town in the appropriate C.D.Block.

**Statement II: Physical aspects and Location of Towns, 1989**

Under physical aspects, annual rainfall and temperature particulars are furnished. These particulars were obtained from the Commissioner of statistics, Tamil Nadu, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For Col.(9), nearest city with population of one lakh and more is furnished according to 1991 census. For the other columns, figures obtained from the Minicpal Commissioner and Panchayat Union Commissioners are given. The zero within brackets in columns, 10 and 11 denotes that the referrent town itself is enjoying road transport facilities. In column 12, name of the navigable river/canal and its distance is indicated as follows: "Cauvery (R) -5". In this case, 5 is the distance in kms., of the navigable river Cauvery from the referrent town. In brackets `R' for river and `C' for canal have been given.

**Statement III : Municipal Finance, 1988-89**

The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The sources of the receipts and expenditure are furnished in terms of rupees in hundreds.

**Statement IV: Civic and other amenities, 1989**

The civic and other amenities existing in the towns as in the town 1989 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

**Column - 3: Civic administrative status**

It is also a new column introduced in 1981 to facilitate analysis during the 1981 Census

**Column - 4: Population**

It is also a new column introduced in 981 to measure the amenities in respect of population.

**Column- 5: Scheduled Caste and Scheduled Tribe population**

It is introduced to know the size of the population of the weaker sections of the community in the towns based on 1991 census population data. In this statement, information on road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply (source of supply, system of storage with capacity) and fire fighting service are also collected from the Municipal Commissioners and Panchayat Union Commissioners.

**Electrification**

In this column (col - 15, col- 19) electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union commissioners. The details are furnished below:

*i) Domestic connections*

This refers to the number of services given to house for domestic purposes like fans, lighting, etc.

*ii) Industrial connections*

This refers to the number of services effected to L.T. (Low Tension) Industries such as workshop, flour mills, oil mills, grinding machines, cotton ginning and engineering industries etc.

*iii) Commercial connections*

This refers to the service given to shops, business houses, public institutions like offices, schools and commercial establishments.

*iv) Road lighting points*

This refers to the number of points of street lights which are maintained by the board and for which consumption charges are paid to the board by respective local bodies. For some panchayats, the number of services effected alone has been furnished under street lights and not the points.

*v) Other connections*

This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries etc.

**Statement IV-A: Civic and other amenities, notified slums, 1989**

This is a new statement on civic and other amenities in the notified or recognised slums of Class I and II towns introduced during 1981 census. Generally in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the Development Authority notified the recognised slums. Such notifications are

linked up with the availability of funds from the Statement Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil etc. are given in this statement.

**Statement V: Medical, Educational, Recreational and Cultural facilities, 1989**

In this statement, medical, educational, recreational and cultural facilities of the towns as in 1989 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively. In medical facilities columns, the number of Hospitals/Dispensaries T.B. clinics etc, and number of beds in medical institutions etc. are furnished.

Under educational facilities columns, the number of Arts/Science/Commerce collages, Medical colleges, Engineering colleges and Polytechnics were obtained from the State Education Departments are furnished.

**Column 10: Recognised shorthand, typewriting and other vocational training institutions**

Particulars were obtained from the District Industries Officers and Directorate of Employment and Training. The term, recognised refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department etc. of the Government or by Semi-Government or autonomous bodies, public sector project etc.

**Column 16: Number of working women's hostel with number of seats**

This is a new column introduced during the 1981 census. Consequent on the increase in the employment of women in urban areas the housing need of working women has been considered as an important subject for study.

Cinema in column 18 refer only to the permanent cinema theaters and do not include the touring cinema.

Column 19: Community Halls have been added in this column as they are fast becoming a common feature of the urban land scope.

**Statement VI: Trade, Commerce, Industry and Banking in 1989**

In this statement, Trade, Commerce, Industry and Banking facilities in the town as in 1989 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies were collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

## Scope of Primary Census Abstract

The Primary Census Abstract as it is called, presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Villagewise Primary Census Abstract" and for each ward/division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1991 has been slightly modified as compared to the 1981 Primary Census Abstract.

The Primary Census Abstract gives the details on area, number of occupied residential houses, number of households, total population, population in the age-group 0-6, SC/ST population, literates, total main workers, distribution of main workers by nine industrrial categories, marginal workers and non-workers in respect of each unit with male, female breakup. In 1981, the main workers were classified in to four categories whereas in the 1991 Census they are classified into nine industrial categories as in 1961 and 1971 censuses. For the first time in this Census, the population in the age group 0-6 with sex breakup presented in PCA in order to arrive at the effective literacy rate, after excluding such persons as all the persons below seven years are treated as illiterat in this census. The urban/village Primary Census Abstract gives this information for each village and each urban ward. Till 1981 Census, the Primary Census Abstract was presented for each taluk and for each town in a district. But, in the 1991 cenuss, the Primary Census Abstract for each CD Block is presented for the first time in the Indian Census. Besides these, separate Primary Census Abstract for Scheduled Castes and Scheduled Tribes which contain similar details as those in the PCA for general population are presented for District/ CommunityDevelopmentBlock/UA/City/Town.

With a view to enable data users to derive the figures for Panchayat the data are presented for segments of villages also. Wherever such segments constitute different Panchayat, the segment wise data have to be used separately or added with the data of some other segment so as to derive

panchayat data. For example a revenue village bearing L.C.No 9 constitute two different panchayats, the figures are given separately for each portion of the village constituting the panchayats against L.C.No 9 a/b and 9 b/b. The total figures for the entire revenue village can be arrived at by adding the figures given against both the segments viz. 9 a/b and 9 b/b. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned are to be addedup to arrive at the total figures for the respective panchayats. An appendix presented in the case of the Urban Primary Census Abstract and it gives 1991 population, Scheduled Castes and Scheduled Tribes population for each enumerator block of the town. This may be useful for administrative purposes and such data are also required by urban planners and researchers for conducting special studies in selected blocks.

## Mode of presentation

At the beginning, the District Primary Census Abstract containing data for District and C.D.Blocks (for Total, Rural Urban areas) as also towns under each C.D.Block and at the end all the towns/U.As in the district are presented. In 1991 Census, the C.D.Blocks is the main unit of presentation of data instead of taluk which was the main unit till 1981 Census. The District PCA is followed by alpheaetical list of villages for each C.D.Block in the district. This is followed by Village/Urban PCA. In the Village/Urban PCA, data for the first C.D.Block for total, rural and urban areas separately, followed by data for villages and census towns falling under each C.D.Block are presented. Thereafter, similar data for second, third and subsequent C.D.Blocks in the district are presented. At the end of the last C.D.Block, the Urban PCA containing data at ward level for all the towns and cities besides the data for UAs are presented. In an appendix to the Urban blockwise PCA. the population and Scheduled Castes, Scheduled Tribes figures for each Enumerator's Block of every town/city in the district are given. After the appendix to Urban PCA, the Talukwise PCA containing data for the District and each taluk in the district with Total, Rural and Urban breakup is presented, as such data are also sought after. This is followed by two annexures. Annexure-I contains Details of Community Development Blocks falling under each taluk and Annexure-II contains names of the villages/segment of villages constituting each town in the district.

## Maps

Apart from the District Map given as frontispiece, maps for each taluks showing the villages their 1991 Location Code numbers and their boundaries are presented. The boundaries of the C.D.Blocks falling in the taluks are also shown. As compared with the maps presented in 1971 and 1981 District Census Handbook, some improvements have been effected in the maps presented in this volume. All towns are shown in the district and taluk maps with shading screens and also spheres according to the population size of towns.

## Area figures

In the District Primary Census Abstract, the area figures are given in square kilometers for total, rural and urban areas. In the villagewise Primary Census Abstract the area figures for each revenue village are given in hectares upto two decimals. The area figues for each town is given in Sq.Km in the Urban Primary Census Abstract. In the District Primary Census Abstract the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor General of India. Figures for urban areas and villages are those supplied by the local bodies and revenue authorities. respectively. The total of the urban (area) of a district has been arrived at by adding the urban area figures of each town within the district. Area figures for the rural areas of the district are derived by subtracting the urban area figures from the total area of the district. The area figures of each C.D.Block represent the area figures that are published in the concerned departmental publication of the State Government. The area figures of the C.D.Blocks will not add up to the district area figures because, the C.D.Block area figures represent the "Land use" area, while those of the district represent "Geographical Area", supplied by the Surveyor General of India. The total of the village areas given in the Village/Urban Primary Census Abstract may not tally with the rural area of the C.D.Block given, as the C.D.Block area figures include hills, forests, rivers etc.whereas the village area may not include the same.

One sq.km consist of 100 heatares.

It is hoped that the pattern of presentation of basic census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

## Part-B
## Brief analysis of the Village and Town Directory Data based on Inset Tables.

A brief analysis relating to certain vital population characteristics is made utilising the information Collected in the Village and Town Directory. A number of tables have been designed for this purpose. The tables are generated at the District/Community Development block level for the rural areas and in regard to urban areas, townwise particulars are presented.
