FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the1951 Census and is continuing since then with some innovations/modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government/Union Territory Administration. It inter-alia provides data/information on some of the basic demographic and socio-economic characteristics and on availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising village and Town Directories and Part-B comprising Village and Town PCA) were released in all the states and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevent material. In 1981 some new features alongwith the restructuring of the formats of village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of Villages and towns (wardwise) including Scheduled Castes and Schedule Tribes PCA upto tehsil/town level provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referrent village, the distance in broad ranges from the nearest place having such amenity was given.

Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in1981 in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directory also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on Slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums.In this statement details on civic and other amenities were reported for the slums of Class-I and Class-II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has

been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age group has also been included in PCA for the first time with a view to enabiling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developemental programmes.

One of the most important innovations in the 1991 Census is the Community Developement Block-level presentation of data in the village directory and PCA instead of the traditional Tehsil/Taluk/PS level presentation. It is expected that the presentation of village and PCA data at C.D.Block level will help the planners in formulation of micro-level developmental plans, as the C.D. Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along-with the corresponding codes of 1981.

This publication is a joint venture of State Government/UT administration and the Census Organisation. The data have been collected and complied under the direction of Shri. K. Sampath Kumar, Director of Census Operations, Tamilnadu, on behalf of the State Government administration which has borne the cost of printing. The task of planning, designing and co-ordination of the publication was initiated by Dr. K. P. Ittaman, former Deputy Registrar General (Social Studies) and Shri M. M. Dua, Joint Director, for the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was throughly scrutinised in the Social Studies Division under the guidence of Shri M. K. Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri. A. K. Singh, Deputy Director who was assisted by Shri. N. S. Soam, Assistant Director and his Staff. Technical guidence in the preparation of the maps was initially provided by Dr. B. K. Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi,
June 11, 1992.

A. R. NANDA
REGISTRAR GENERAL, INDIA

PREFACE

The District Census Hand Book is the most useful publication for the public, social workers, researchers, academicians, administrators, local bodies and the government officials for various official and non-official purposes. It gives data for the Village/Panchayat at the lowest level to the district level including Panchayat Union/taluk covering demographic, social economic and cultural aspects. There had been an endeavour to make it as comprehensive as possible, to provide data on various aspects since its inception and by 1961, it reached the dimensions of a compendium for the district. The Registrar General, India, in his foreword has kindly traced out the improvements brought out from time to time since 1961 to the latest 1991 Census while the history of the District Census Hand Book in this State is narrated in the Introductory Chapter to this volume.

The District Census Hand Book is a joint venture of the Census Organisation and the State Government of Tamil Nadu. The scope of District Census Hand Book has been widely increased and restructured in 1981 to meet the Minimum Needs and Revised Minimum Needs Programmes of the Planning Commission. Broadly keeping up the 1981 main structure, the formats of the Primary Census Abstract have been restructured slighly for the benefit of data users. The nine-fold industrial classification of main-workers as done at the 1961 and 1971 Censuses has been revived instead of the four-fold classification of the 1981 Census. Population in the age group 0-6 by sex has been given in order to enable computation of realistic literacy rate as all children below 7 years are treated as illiterates. One of the most important innovations of the 1991 Census is the presentation of data at the Community Developement Block/Panchayat Union level to help Planners in the formulation of micro-level developmental plans at the lowest administrative unit level. In this State, for development planning the lowest administrative unit is the 'Panchayat Union'. This time, for the benefit of data users of village Directory and PCA data from the magnetic tapes/floppies or from the published records, the computer code as well as the Manual code as of 1991 Census and the corresponding location code of 1981 Census are given.

The District Census Hand Books is now being published in two parts - Part:A-Village & Town Directory and Part-B : Village and Townwise Primary Census Abstract. The two parts are published.

Part-A deals with a brief description of the district - its major characteristics in relation to the economic resources like forestry, agriculture, industries, social, cultural, religious and historical aspects apart from certain basic amenities such as drinking water, education medical, post and telegraphs, market day(s), communications, and if any of these facilities are not available to any village, distance range of nearest place from where available; power supply, approach to the village, nearest town to the village etc., Health and Family Planning Centres, Primary Health Sub-centres and community Health Workers in the village. Information on approach to village is also provided to identify inaccessible villages in the district. These exhaustive data on infra-structre in relation to amenities available to the villages and land-use pattern are meant to meet the requirements of 'Micro-level' local area developement planning at the lowest administrative unit viz., C.D.Block/Panchayat Union level. This is the reason why this time data are being published C.D. Block/Panchayat Union wise instead of the traditional taluk

level.

In the Town Directory, information on class of Town, area of the Town, number of households, population and growth rate of the town at each of the Censuses from 1901-1991, sex-ratio at the 1971, 1981 and 1991 Censuses, physical aspects of rainfall and minimum and maximum temperatures recorded, distance from State and district Headquarters, nearest City, communication facilities like Railway station, Bus-route, inland navigation, statement on Municipal finance, civic and other amenities such as protected water supply, electric connection by type, fire-fighting services, road length by tape, system of sewerage, number of latrines by type, total population and SC & ST popolation, Medical, Educational facilities by type, recreational and cultural facilities like Stadia, Cinema, Drama, Community Hall, Public Libraries and reading rooms, adult literacy classes/centres, Working Women's Hostels, three Important commodities manufactured, exported and imported; a special table on civic and other amenities available in notified slums in Class-I and Class-II towns have been included with a view to ascertain the availability of basic amenities and to meet the Minimum Needs and Revised Minimum Needs Programme.

Part-B: deals with the primary Census Abstract for all the villages in the rural areas and ward-wise for urban areas. This time the PCA data like Village and Town Directory data are arranged C.D. Block/Panchayat Union-wise giving area of the village (in hectares), area of town (in Sq. Kms.) number of occupied residential houses, households, population by sex, Scheduled Caste and Scheduled Tribe population, literates, Main Workers in the nine industrial categories (as against the 4 industrial categories published in 1981), marginal workers, non- workers, and 0-6 population by sex.

Further, if a village is covering more than one Panchayat, break up figures for each Panchayat also are given.

It is hoped that with the modifications now brought out in the Village Directory, Town Directory and PCA data/at the level of C.D. Block/Panchayat Union-wise would go a long way in helping the planners to chalk out more effective developmental programmes at micro-level for local area developmental plans.

In the process of collection of data of this Volume, various State and Central Government Departments have extended their kind co-operation particularly with regard to infra-structural amenities for Part-A - Village and Town Directory, History and general features of the district, etc., I convey my greatful thanks to all of them. The PCA data presented in Part-B of this volume were collected during the Census Operations in February- March, 1991 the reference date being sunrise of the 1st March 1991.

I remain greatful to the Director of Census operations, Shri K. Sampath Kumar, who closely guided us in every aspect of this work, He had been a source of strength and inspiration for us. We owe a deep sense of gratitude to him for this kindness in dealing with our practical difficulties, his patient advice and formula of solutions for even small problems which we brought to his attention.

I wish to record my deep sense of gratitute to Late Shri. M. Thangaraju, JDCO, Shri Ch. Puranachandra Rao, DDCO for overall direction and guidance to bring out this Publication. I use this opportunity to mention my special thanks to Shri. N. Manjini, ADCO for scrutinising

draft report and presenting the data with meticulous care and accuracy. I am also thankful to Shri. S. P. Grover, JDCO, and Shri Phool Singh, DDCO, who are also provided overall guidance and supervision during their tenure in this regard.

In the compilation and processing of Village Directory and Town Directory data, he was ably assisted by Smt. R. Rani bai and Smt. A. M. Mangayarkarasi, Investigators and their assistants, respectively, while Sri. P.G. Sankaran, Statistical Assistant is chiefly responsible for preparing the analytical notes, inset tables, draft write up and arrangement of the matter in order.

The PCA data for the district were processed at the Regional Tabulation Office, Tiruchirappalli under the supervision of Shri P.Ramaswamy, Regional Deputy Director Census Operations assisted by S/Shri M. Ravibharathi, G.R. Mukundan Smt P. Susheela and R.Vaijayanthi Statisitical Assistants, who were deputed from this Directorate to the Regional Tabulation Office, Tiruchirappalli.

Finalisation of PCA data Panchayat Union-wise and providing computer codes for Villages were attended to by Shri. R Lakshminarayanan and Smt. M. V. Rajalakshmi, Investigators and staff of the Census Section. The district and taluk maps in this publication give the administrative units upto village level, the location of Towns and Cities, Communication facilities, etc. This time in the taluk map, boundary of each of the C.D. BLock units, namely, 'Panchayat Unions' have been shown separately to synchronise with the presentation of data presented Panchayat Unionwise.

I convey my greatful thanks to Shri A. R. Nanda, I.A.S., Registrar General and Census Commissioner, India for the valuable guidance and advice I received from him throughout. I am thankful to Sri N. Rama Rao, Deputy Registrar General (C&T) who has been a source of strength and constant help and guidance on all technical matters like a 'Ready Reckoner'. I also thank Dr. K. P. Ittaman, former Deputy Registrar General (S.S) and Sri M. M. Dua, Joint Director, for planning designing and co-ordinating the formats. I thank Shri M. K. Jain, Deputy Registrar General (S. S.) and Shri. A. K. Singh, Deputy Director, Sri N. S. Soam, Assistant Director and his staff for scutinising and approving the first volume so that it could fitin in the all India pattern from uniformity point of view in the presentation of data and other items. My thanks are also due to Dr. B. K. Roy, former Deputy Registrar General (Map) and Mrs. Minati Ghosh, Deputy Registrar General (Map) for providing technical guidance in the preparation of maps.

The data entry of the Village Directory and Primary Census Abstract in the computer had been done at the National Informatics Centre (NIC) at Madras, in the shortest possible time. My sincere thanks in this regard are to Shri M. Mohan, Technical Director and Shri A. N. Sridhar, Scientific Officer of the NIC, Madras.

I have pleasure in acknowledging the able assistance rendered by the following officials of my office in the preparation of this volume.

Madras

Number of villages	Total		16,780	1,080
	Inhabited		15,822	990
	Uninhabited		958	90
Number of Towns			469	30

ANALYTICAL NOTE

Census Concepts

Rural and Urban areas

It is customary to classify a place as rural or urban in every Census and present data separately for rural and urban areas. Urban areas which are specifically defined for Census purposes are determined on the basis of certain demographic and economic criteria. The rest are treated as rural areas. At the 1991 Census, the same criteria adopted for determining the urban areas at the 1981 Census have been continued. The urban areas of 1991 Census are:

(a) All places with a Municipality, Corporation or Cantonment board or Notified town area, Committee, etc.

(b) All other areas which satisfied the following criteria:

i) A minimum population of 5,000

(ii) At least 75 percent of male main workers engaged in non-agricultural and allied activities:

(iii) A population density of at least 400 per sq.km.(or one thousand per square mile)

The above definition adopted for both 1981 and 1991 Census varies slightly from those of 1961 and 1971 Censuses. In the 1961 and 1971 Censuses, the male population engaged in the activities of fishing, logging etc., were treated as engaged in non- agricultural pursuits and hence have been taken into account with those engaged in non-agricultural pursuits for applying the test of the 75 percent non-agricultural workers criterion. But in the 1981 Census as well as in the 1991 Census, they have been treated on par with agricultural activities for applying the test for this criterion. Prior to the 1981 Census, certain places with less than 5,000 population were treated as urban areas on the basis of certain consideration like density, social and historical importance etc., at the discretion of the Director of Census Operations in consultation with the State Government. On the other hand, the tests on demographic and economic criteria were strictly applied at the 1981 and 1991 Censuses and no area was classified as urban area on other considerations.

Urban Agglomeration

This concept was adopted for the first time in the 1971 Census and continued in the 1981 and 1991 censuses also.

An Urban Agglomeration is a continuous urban spread constituting a city or town and its adjoining urban outgrowths (OG) or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In certain cases, large housing colonies, university campuses, port areas, Military camps, etc., etc., would have come up around a city or town but falling out side the statutory limits of the city or town. They may be lying inside the boundaries of a village or villages which are contiguous to the city/town. These villages could not be treated as urban as they do not satisfy the urban criteria. But at the same time the colonies etc., mentioned above deserve to be treated as an integrated urban area. Therefore, all such towns together with their urban outgrowth will have to be treated as one urban unit and called Urban Agglomeration. As no outgrowth (OG) as defined above, has been recognised in Tamil Nade, all the constituent units of urban agglomerations are also independent urban units or towns in the state.

Census House

A Census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for residential or non-residential purposes or both.

Household

A household is a group of persons, who commonly live together and would take their meals from com-

mon kitchen, unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of households with unrelated members are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called Institutional Households.

Scheduled Castes/Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled castes and Scheduled Tribes orders (Amendment)Act of 1976 (Central Act,108 of 1976) was followed. The enumerators were instructed to record a person as belonging to Scheduled Caste and Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

A literate is defined as "a person who can both read and write with understanding in any language". A person who could merely read but cannot write, is not a literate. It is not necessary that a person, to be considered as a literate, must have received any formal education or have passed any minimum educational standard. In the 1991 Census, all children of the age of 6 years or less are treated as illiterate whereas in the 1981 Census all children of the age of 4 years or less were treated as illiterate.

Definition of work

Work may be defined as partcipation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise.

Main workers and Marginal workers

The dichotomy of worker and non-worker of 1961 and 1971 Censuses had been dropped and the trichotomy of main worker, marginal worker and non-worker was introduced in the 1981 census and this has been continued in the 1991 census also.A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries, like gur making etc. were carried on; either throughout the year or only during certain seasons or part of the year, depending on the local circumstances. In such cases what we were concerned with was the broad time spent during the agricultural season preceding the enumeration. Workers can be full-time workers or marginal workers.If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for 183 days or more he was considered to be a full-time worker (Main Worker). If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for less than 183 days, he was considered to be a marginal worker. Persons who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration were considered as non-workers.

All the main workers had been classified under one of the four main categories in the 1981 census, while in 1991 census, they have been classified under one of the nine industrial categories as was done in 1971 census. They are I.Cultivators(C),II. Agricultural Labourers (AL) III. Live Stock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, IV. Mining and Quarrying, V(a). Manufacturing, Processing, Servicing and Repairs in Household Industry, V(b). Manufacturing,Processing, Servicing and Repairs in other than Household Industry, VI. Construction, VII. Trade and Commerce, VIII. Transport, Storage and Communication, IX. Other Services.

The definitions of these nine industrial categories of workers are as given below:

I. Cultivators (C)

For the purpose of census, a person is considered as Cultivator if he/she is engaged in cultivation of land, owned or taken on lease from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

II. Agricultural Labourer (AL)

A person who works on another person's land for wages in money, kind or share should be regarded as agricultural labourer. He/she has no risk in the cultivation, but he/she merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which he/she works.

III. Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities

Persons who were reported as workers in Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities are treated as workers under this category.

IV. Mining and Quarrying

Persons who were reported as workers in Mining and Quarrying are treated as workers under this category.

V(a).Manufacturing, Processing, Servicing and Repairs in Household industry

Household industry is defined as an Industry conducted by the head of the household himself/herself and/or by the members of the household at home or within the village in case of rural areas and within the precincts of the house only in the case of Urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The household industry should not be run on the scale of a registered factory which would qualify to be registered under the Indian Factories Act. Mere selling of food items or other edibles, should not be regarded as household industry.

V(b). Manufacturing, Processing, Servicing and Repairs in other than Household Industry

Persons reported as workers in household industry other than those mentioned in V(a) were treated as workers in this category.

VI. Constructions

Persons working as plumbers, masons, electricians, painters and others engaged in construction work were treated under this category.

VII. Trade and Commerce

Persons engaged in work such as wholesale or retail business or trade were treated in this category.

VIII. Transport, Storage and Communication

Persons who were reported as drivers, conductors, technicians, fitter, welder and other communication workers were treated under this category.

IX. Other services

Persons engaged in services other than those mentioned in I to VIII categories fall under this category. Workers who could not be classified in any of the above I to VIII categories are treated as those engaged in other services.

Non-workers

All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the data of enumeration have been considered as non-workers. Thus, non-workers cover all persons who were engaged in unpaid household duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants etc., convicts in jails or inmates of a penal, mental or charitable institution and all other non-workers not falling under any of the above categories.

HISTORY OF THE DISTRICT CENSUS HANDBOOK

After the census of 1951, the Government of India offered to handover to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district as separate volume. The State Government accepted the proposal and the first publication of the District Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve on its content so that each district Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census also, the publication of the series of District Census Handbook was continued. The publication of the 1971 District Census Handbook was in three parts, viz., Part-A, Part-B, and Part-C. Part-A relating to Village and Town Directory. Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census Tables and certain administrative statistical tables.

The tradition of bringing out the Census Handbook was continued by the State Government during the 1981 Census also. In this series some individual feature besides restructuring of the formats of the village Directory had been adopted bearing in mind the requirements of data for the socioeconomic programmes of the Government. The comparability of data with the 1971 census data had also been kept in view.

The present 1991 District Census Handbook will be published in two parts viz., Part-A- Village and Town Directory and Part-B- Village and Townwise Primary Census Abstract.

SCOPE OF VILLAGE AND TOWN DIRECTORY STATEMENTS AND PRIMARY CENSUS ABSTRACT

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of a town which are constantly referred to by the data users.

The Village Directory statement gives the list of villages by C.D.Block and for each village the area, No. of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation

Appendix - I gives C.D.Blockwise abstract of educational medical and other amenities available viz., the number of villages having various levels and types of educational institutions such as middle schools, adult literacy centers, etc., various types of medical institutions such as dispensaries, primary health centres,maternity and child welfare centres, family planning centres, community health workers etc. and the number of such institutions, various types of drinking water sources, such as tap, well, tank, tube-well, river, fountain, canal, etc. post and telegraph offices, bus-stops, railway-station,power supply etc. and also the number of villages not having such amenities.

Appendix - II gives for each non-municipal town (Census Towns) the area under forest, irrigated and unirrigated land, culturable waste (including gauchar and groves) and area not available for cultivation.

Appendix - III is only the list of villages where no amenities relating to education, medical, drinking water, post and telegraph, communication, power supply and market/hat and public health facilities etc. are available.

Appendix - IV gives the list of villages according to the proportion of SC/ST to the total population by ranges. Part-A of the Appendix gives the villages according to the proportion of SC population. The information is presented by the ranges viz. 0-5, 6-10, 11-15, 16-20, 21-30 and 31 + percent and above, and Part-B according to the proportion of ST population ranges viz. 0-5, 6- 15, 16-25, 26-35, 36-50 and 51 + percent and above.

The Town Directory gives important and very useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal or census-towns. The details relating to each of the towns have been presented in seven statements viz. Statements I to VI and IV-A.

In all the statements except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments within the cantonment which are required to be left out.However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory Statements.

The concept of 'urban agglomeration' was introduced for the first time in 1971 replacing the concept of 'town group'of 1961. The concept of Urban Agglomeration has been continued at the 1981 and 1991 censuses also. An Urban Agglomeration may be explained as follows: "It must form a continuous urban spread constituting a town and its adjoining urban outgrowth or two or more physically contiguous towns together with continuous well recognised urban outgrowth, if any, of such towns".

An Urban Agglomeration includes two or more independent census towns. The names of the Towns/Urban Agglomeration have been arranged in the alphabetical order. The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have already been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town within brackets:

"(See the name of the main town of the agglomeration)"

By adoption of this method, the reader can get an idea of the particulars of the urban agglomeration in total and also separately.

Statement I: Status and Growth History

This statement provides some basic data based on the primary Census Abstract for the towns and urban agglomerations of 1991 census. For analysing the town directory data at the State level and All India levels some new columns have been introduced in the 1981 census. The new items are :-Class of town, area, number of households, population and growth rate at each census since 1901, density and sex ratio at the 1971, 1981 and 1991 censuses are also provided in this statement. At the 1991 census, a new item - the name of C.D.Block is also provided in the statement.

Class of the towns are presented according to the 1991 census population of the town as follows:

Population	Class
100,000 and above	I
50,000 to 99,999	II
20,000 to 49,999	III
10,000 to 19,999	IV
5,000 to 9,999	V
Below 5,000	VI

Location Code Number for Towns

To distinguish the town from the village, the Location Code Numbers for Towns have been given in Roman Numerals and these numbers have been assigned in a continuous order for the district as a whole. In the present 1991 census, name of C.D.Block has been included with a view to locate the town in the appropriate C.D.Block.

Statement II: Physical aspects and Location of Towns, 1989

Under physical aspects, annual rainfall and temperature particulars are furnished. These particulars were obtained from the Commissioner of Statistics, Tamil Nadu, Madras. If the information is not available for any particular town, the nearest town for which it is available is given. For Col.(9),nearest city with population of one lakh and more is furnished according to 1991 census. For the other columns, figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The zero within brackets in columns, 10 and 11 denotes that the referent town itself is enjoying road transport facilities. In column 12, name of the navigable river/canal and its distance is indicated as follows: "Cauvery(R)-5".In this case, 5 is the distance in Kms., of the navigable river Cauvery from the referent town. In brackets 'R' for river and 'C' for canal have been given.

Statement III: Municipal Finance, 1988-89

The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works,public institutions and other public services are given in this statement. The sources of the receipts and expenditure are furnished in terms of rupees in hundreds

Statement IV: Civic and other amenities, 1989

The civic and other amenities existing in the towns as in the town 1989 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the Concerned towns.

Column - 3: Civic administrative status

It is a new column introduced in this statement to facilitate analysis during the 1981 census.

Column - 4: Population

It is also a new column introduced in this statement to measure the amenities in respect of population, based on 1991 census population data.

5: Scheduled Caste and Scheduled Tribe population

It is introduced to know the size of the population of the weaker sections of the community in the towns based on 1991 census population data.

In this statement, road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply(source of supply, system of storage with capacity) and fire fighting service information are also collected from the Municipal Commissioners and Panchayat Union Commissioners.

Electrification

In this column electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners. The details are furnished below:

i) Domestic connections

This refers to the number of services given to house for domestic purposes like fans, lighting,etc.

ii) Industrial connections

This refers to the number of services effected to L.T. (Low Tension) Industries such as workshop, flour mills, oil mills, grinding machines, cotton ginning and engineering industries etc.

iii) Commercial connections

This refers to the service given to shops, business houses, public institutions like offices, schools and commercial establishments.

iv) Road lighting points

This refers to the number of points of street lights which are maintained by the board and for which consumption charges are paid to the board by respective local bodies. For some panchayats, the number of services effected along has been furnished under street lights and not the points.

v) Other connections

This refers to the number of services effected for agricultural purposes, huts, public water supply systems, cottage industries etc.

Statement IV-A: Civic and other amenities, notified slums, 1989

This is a new statement on civic and other amenities in the notified or recognised slums of Class I and II towns introduced during 1981 census. Generally in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the Development Authority notified the recognised slums. Such notifications are linked up with the availability of funds from the Statement Government for slum clearance.

Name of the slum and the details of the area, population, length of the paved roads, system of sewerage, number of different types of latrines and method of disposal of night soil etc. are given in this statement.

Statement V: Medical, Educational, Recreational and Cultural facilities, 1989

In this statement, medical, educational, recreational and cultural facilities of the towns as in 1989 are furnished. The data for educational and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively. In medical facilities columns, the number of Hospitals/Dispensaries/T.B.clinics etc,and number of beds in medical institutions etc. are furnished.

In educational facilities columns, the number of Arts/Science/Commerce collages, Medical collages, Engineering collages and Polytechnics were obtained from the State Education Departments are furnished.

Column 10: Recognised shorthand, typewriting and other vocational training institutions

Particulars were obtained from the District Industries Officers and Directorate of Employment and Training Officers. The term, refers to Institute recognised by some statutory authority like Education Department, Commerce Department, Labour Department etc. of the Government or by semi-Government or autonomous bodies, public sector project etc.

Column 16: Number of working women's hostel with number of seats

This is a new column introduced during the 1981 census. Consequent on the increase in the employment of women in urban areas the housing need of working women has been considered as an important subject for study.

Cinema in column 18 refer only to the permanent cinema theaters and do not include the touring cinema.

Column 19: Community Halls have been added in this column as they are fast becoming a common feature of the urban land scope.

Statement VI: Trade, Commerce, Industry and Banking in 1989

In this statement, Trade, Commerce, Industry and Banking facilities in the town as in 1989 are furnished. Banking particulars were obtained from the Reserve Bank of India. The information on number of agricultural and non-agricultural credit societies was collected from the Registrar of Co-operative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

SCOPE OF PRIMARY CENSUS ABSTRACT

The Primary Census Abstract as it is called, presents basic data for each village or segment of a village

(in cases where such village segments form different panchayats) in the "Villagewise Primary Census Abstract" and for each ward/division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1991 has been sligtly modified as compared to the 1981 Primary Census Abstract.

The Primary Census Abstract gives the details on area, number of occupied residential houses, number of households, total population, population in the age-group 0-6, SC/ST population, literates,total main workers, distribution of main workers by 9 industrial categories, marginal workers and non-workers in respect of each unit with male, female breakup.In 1981, the main workers were classified into four categories whereas in the 1991 census they are classified into 9 industrial categories as in 1961 and 1971 censuses. For the first time in this Census, the population in the age group 0-6 with sex breakup presented in PCA in order to arrive at effective literacy rate, after excluding such persons as all the persons below seven years are treated as illiterates in this census. The urban/village Primary Census Abstract gives this information for each village and each urban ward. Till 1981 Census, the Primary Census Abstract was presented for each taluk and for each town in a district. But, in the 1991 census, the Primary Census Abstract for each CD Block is presented for the first time in the Indian Census. Besides these, seperate Primary Census Abstract for Scheduled Castes and Scheduled Tribes which contain similar details as those in the PCA for general population are presented for District/Community Development Block/UA/City/Town.

With a view to enable data users to derive the figures for Panchayat the data are presented for segments of villages also, wherever such segments constitute different Panchayat, the segment wise data have to be used separately or added with the data of some other segment so as to derive panchayat data. For example a revenue village bearing L.C.No 9 constitute two different panchayats, the figures are given separately for each portion of the village constituting these panchayats against L.C.No 9 a/b and 9 b/b. The total figures for the entire revenue village can be arrived at by adding the figures given against both the segments viz. 9 a/b and 9 b/b. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned are to be addedup to arrive at the total figures for the respective panchayats.An appendix presented in the case of the Urban Primary Census Abstract gives 1991 population, Scheduled Caste and Scheduled Tribes population for each enumerator block of the town. This may be useful for administrative purposes and such data are also required by urban planners and researchers for conducting special studies in selected blocks.

Mode of presentation

At the beginning, the District Primary Census Abstract containing data for District and C.D.Blocks (for Total, Rural Urban areas) as also towns under each C.D.Block and at the end all the towns/U.As in the district are Presented. In 1991 Census, the C.D.Blocks is the main unit of presentation of data instead of taluk which was the main unit till 1981 Census.The District PCA is followed by alphabetical list of villages for each C.D.Block in the district. This is followed by Village/Urban PCA. In the Village/Urban PCA, data for the first C.D.Block for total, rural and urban areas seperately, followed by data for villages and census towns falling under each C.D.Block are presented. Thereafter, similar data for second,third and subsequent C.D.Blocks in the district are presented. At the end of the last C.D.Block , the Urban PCA containing data at ward level for all the towns and cities besides the data for UAs are presented. In an appendix to the Urban blockwise PCA, the population and Scheduled Castes/Scheduled Tribes figures for each Enumerators Block of every town/city in the district are given. After the appendix to Urban PCA, the Talukwise PCA containing data for the District and each taluk in the district with Total, Rural and Urban breakup is presented, as such data are also sought after. This is followed by two annexures. Appendix-I contains Details of Community Development Blocks falling under each taluk and Appendix-II contains names of the villages/segment of villages constituting each town in the district.

Maps

Apart from the District Map given as frontispiece, maps for each taluks showing the villages their 1991 Location Code numbers and their boundaries are presented. The boundaries of the C.D.Blocks falling in the taluks are also shown. As compared with the maps presented in 1971 and 1981 District Census Handbook, some improvements have been effected in the maps presented in this volume. All towns are shown in the dis-

trict and taluk maps with shading screens and also spheres according to the population size of towns.

Area figures

In the District Primary Census Abstract, the area figures are given in square kilometers for total, rural and urban areas. In the villagewise Primary Census Abstract the area figures for each revenue villages are given in hectares upto two decimals. The area figures for each town is given in Sq.Km in the Urban Primary Census Abstract. In the District Primary Census Abstract the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor General of India. Figures for urban areas and villages are those supplied by the local bodies and revenue authorities.The total of the urban (area)of a district has been arrived at by adding the urban area figures of each town within the district. Area figures for the rural areas of district are derived by subtracting the urban area figures from the total area of the district. The area figures of each C.D.Block represent the area figures that are published in the concerned departmental publication of the State Government. The area figures of the C.D.Blocks will not add up to the district area figures because, C.D.Block area figures represent the "Land use" area, while those of the district represent" Geographical Area", supplied by Surveyor General of India. The total of the village areas given in the Village/Urban Primary Census Abstract may not tally with the rural area of the C.D.Block given, as the C.D.Block area figures include hills, forests, rivers etc. whereas the village area may not include the same. One sq.km consist of 100 hectares.

It is hoped that the pattern of presentation of basic census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

Part-A

Brief analysis of the village and town directory data based on inset tables.

A brief analysis relating to certain population characteristics is made utilising the information collected in the village and town directory. A number of tables have been generated for this purpose. The tables are generated at the District/C.D.Block level for the rural areas and in regard to urban areas, townwise particulars are presented.

TIRUCHIRAPPALLI DISTRICT - AN OUT LINE

Introduction

Tiruchirappalli District is a place of historical importance. The Rock Fort raising abruptly from the plains to a height of 83 meters in the centre of the city on the Southern Bank of the river Cauvery is a famous land mark of Tiruchirappalli. The District has a rich and varied cultural heritage. It is also known for its exquisite handicrafts,castings and South Indian Musical instruments. Its economy is mainly agrarian. Its agriculture is sustained by a network of irrigation sources and improved methods of cultivation.

Brief History of the District

Tiruchirappalli played a predominant role in the later history of South India. Cholas were the early rulers of this region right from the period of Sangam Age. Among the early Chola Rulers, Karikala Chola (50-95 A.D.) was the most powerful and sometime after him the Pandyas followed by the Pallavas held sway over this region for short periods. Chola rule was once again revived by Vijayalaya. This was the beginning of great Chola Empire and with the succession of powerful rulers Tiruchirappalli remained under Chola Supremacy.

During the year 1251, Pandyas under Jayasundara Pandya rose to power and Tiruchirappalli was brought under Pandya Rule by putting an end to Chola Supremacy. Pandya rule lasted over this region for a little over half a century followed by Muslim domination till 1334-35.

In the middle of the fourteenth century, the Muslims were defeated by the Vijayanagar ruler and Tiruchirappalli was brought under Nayak rule. Vijayaranga Chokkanatha Nayak was the last, among Nayak rulers and after his death in 1731 without heir, a power struggle followed for the thrown of the Nayak Kingdoms between Meenakshi, the widow of the late king and Bangaru Thirumalai, the father of his adopted son and later between Meenakshi and Chanda Saheb, the confidential adviser of the Nawab of Arcot. Ultimately Chanda Saheb, proclaimed himself as the ruler.

In 1741, the Marathas invaded Tiruchirappalli and took Chanda Saheb as captive. Chanda Saheb succeeded in securing freedom in 1748 and soon got involved in the famous war for the Nawabs place in the Carnatic against Anwaruddin the Nawab of Arcot and his son Mohammed Ali. What followed was actually a struggle between the European powers for colonial expansion in South India with Tiruchirappalli as the pivot which ultimately led to the triumph of the English.

In the year 1750 A.D. Hyder Ali came to power. The history followed was a power struggle between Hyder Ali and later Tippu Sultan with the British. After the death of Tippu Sultan the English took the Civil and Military Administration of the Carnatic in 1801. Thus Tiruchirappalli came into the hands of the English and the District was formed in 1801 under Mr. Wallace the first English Collector.

Formation of Tiruchirappalli District and subsequent Jurisdictional changes

The evolution of Tiruchirappalli District in its present form may be appreciated from the following chronological events.

Until the Puckle scheme for revision of taluk and village establishments was introduced, Tiruchirappalli consisted of nine taluks which under the new scheme were regrouped into five. Transfer of Karur Taluk from Coimbatore District during 1910 and formation of Lalgudi Taluk from parts of Musiri and Tiruchirappalli taluks raised the number of taluks in the district to seven. Subsequently three new taluks (viz.,) Kulathur, Alangudi and Tirumayam were added by the merger of Pudukkottai with Tiruchirappalli during 1948. The number of taluks in the District was raised to ten and it remained unchanged till 1961.

Between 1961 and 1971, three new taluks Ariyalur, Turaiyur and Manapparai were formed from parts of Udayarpalaiyam, Musiri and Kulittalai Taluks respectively raising the number of taluks in the district to thirteen.

During the decade 1971 - 1981, a major change in the administrative set up was effected by the formation of Pudukkottai district, in January 1974 by transferring Kulattur, Alangudi and Tirumayam taluks from Tiruchirappalli district.

There are now ten taluks in the district. List of Revenue division and taluks in the district is given below:-

Name of the Revenue Division	Name of taluk
Tiruchirappalli	1. Tiruchirappalli 2. Manapparai
Musiri	1.Musiri 2.Lalgudi 3.Turaiyur
Ariyalur	1. Ariyalur 2. Perambalur 3. Udayarpalayam
Karur	1. Karur 2. Kulittalai

The district is divided into 18 Assembly constituencies of which three are reserved for Scheduled Castes. There are three Parliamentary constituencies of which one is reserved for Scheduled Castes.

The district comprises six municipalities, 32 panchayat unions, 46 town panchayats, 889 village panchayats, 1080 villages of which 990 are inhabited villages and 90 uninhabited villages. There are 30 towns in the district.

Physical Features

As per 1991 Census Tiruchirappalli district with a population of 4,138,048 ranks 4th among the districts in the State. The density of population in the district is 373 per sq.km as against 429 in the State.

Tiruchirappalli is centrally located in Tamil Nadu and is 320 km away in southern direction from Madras.The district has an area of 1109 sq.km. spread between 10 and 11.30 degree Northern latitude and 77.45 degree of the Eastern longtitude. It is bounded by Salem and South Arcot districts on the North, Thanjavur and Pudukkottai in the East, Pasumpon Muthuramalinga Thevar, Madurai and Dindigul Anna on the South and Coimbatore and Periyar on the West.

It is and inland district without any coastal line. The District has no well marked natural divisions. The Panchamalai hills situated on the north of Perambalur and Turaiyur taluks and is the most important hill in the district. The average height of the hill is 610 metres though a few of its peaks rise to about 1036 metres above the sea.

The greater part of the district consists mainly of an undulating plain bisected by the value of Cauvery. The monotony of the plains is relieved here and there by broken and isolated masses of crystalline rocks, the prominent of which are the Thopposamimalai (1028 metres) and the Vellimalai (838 metres) in the South of Kulittalai taluk, Rangamalai rock (945 metres) in the extreme South of Karur taluk, the Golden Rock and the great Fort.

The Cauvery and the Coleroon are the major rivers and there are other small rivers which contribute to the irrigation potential of the district. With the presence of innumerable stream and rivulets in the region, the drainage has not been a problem for the district. The district witnesses a high mean temperature and low degree of humidity.

Important River/Canal

The important rivers in the district are the Cauvery and its distributaries. Entering the district at its Western extremity, the Cauvery flows towards east. The head of Cauvery delta is at the upper Anaicut, 16 Kms west

of Tiruchirappalli where the river bifurcates into large branches. The Northern branch known as Coleroon is mainly a flood carrier, while the Southern branch retains the name Cauvery. The other notable rivers are Amaravathy, Naganji, Kodavanar Iyer, Karuvattur, Mamundiyar, Nandiyar and Noyyil in the district. Important canals are Pullambadi canal, Pudukkottai canal, Kattalai vaikkal, Uyyakondan, Iyyan vaikkal and Porunitai vaikkal.

Soil

The predominant soil in the district is red sandy with scattered pockets of black soil. The best quality of soil is found in Perambalur taluk while the soil found in Karur is the poorest. The soil in the district is best suited for raising dry crops. In the absence of fertile soil, the prominent role Tiruchirappalli is playing in the agricultural sector in the state is mostly due to its irrigation facilities. Soil testing laboratory is available in the district headquarters.

Flora and Fauna

The flora and fauna of the district are fairly rich and varied. The fruit trees widely spread are Tamrind, Mango and Coconut. In the hilly tracks Jack and Oranges are grown. The Varieties of timber found in the hilly region are Teak, Vanni, Malai Vembu, Manja Kadambu and Bamboos. In Udayarpalayam taluk Cashew trees grow well.

As regards fauna big animals like elephants, bisons, tigers are not found any where. In Panchamalai hills wild pigs, bears are seen. All the game birds of the south are found in the district, even though not in plenty.

Climate and Rainfall

The district has a high mean temperature and a low degree of humidity. Even though the region is not facing extreme climate, the summer months are quite hot and the differences between maximum and minimum temperature are moderate.

The atmosphere is dry with little moisture during the early months of the year. The winter season being cool is pleasant and enjoyable. By March, the Mercury acquiries, an uptrend which is gradual and persistent. This trend of the barometer indicates the ushering of summer with its hot days. This period of hot sun prevails till June when South West monsoon sets and which brings scanty rains.Monsoon period last till August. The heaviest rainfall occurs during October to December when the North East monsoon sets in.

A statement showing the season wise rainfall in m.m. in Tiruchirappalli district during the period 1989-1990 is given below:-

Season	Period	Normal rainfall	Actual rainfall
South-West Monsoon	June to September 1989	266.5	322.1
North-East monsoon	October to December 1989	397.8	270.7
Winter	January to February 1990	34.2	69.5
Summer period	March to May 1990	125.1	93.7
Tiruchirappalli district		823.6	756.0

Land and Land Use pattern

The Land use break-up for the district as per 1989-90 is shown below:-

Land use	District		State	
	Area in hectares	Percentage to total area	Area in hectares	Percentage to total area
Total Geographical area as per village Papers	1,111,720	100.00	13,020,848	100.00
Forest	79,534	7.15	2,166,473	16.64
Barren and uncultivable land	33,687	3.03	514,111	3.95
Land put to Non-Agricultural use	1,60,197	14.41	1,832,645	4.07
Cultivable waste	34,825	3.13	290,813	2.23
Permanent pastures and other grazing lands	17,025	1.53	125,672	0.96
Land under tree crops and groves	14,558	1.31	173,187	1.33
Current fallows	203,981	18.35	1,407,060	10.81
Other fallow lands	34,415	3.10	848,500	6.52
Net area sown	533,498	47.99	5,662,387	43.49

Minerals and Mining

The district has a fairly rich mineral deposits. The Upper region contains only a moderate number of valuable minerals of which, the magnetic iron beds in Musiri are the most important. Celesite, Silliminite, Cordierite, Magnesite Stealite, Kankar and Phosphatic nudules occur at various places in the district, but which the exception of building stone none of these are of particular importance nor are they commercially exploited. A good deal of building stone is quarried in Tiruchirappalli and Kulittalai taluks.

Following are the major minerals obtained in the district:-

Name of the Minerals	Production (in M.T.)	Value (in Rupees)
Limestone	1,618,327	50,325,564
Quartz	8,480	1,474,516
Fold spor	5,690	170,761
Fire clay	46,440	1,393,700
Gypsum	4,680	156,641
Plastic clay	1,850	155,400
Phosphate Nudules	10	600
Silliminite	10	8,571
Sand and Gravel	75,999	531,993

The most important mineral based industries in the district are cement and refractories which are produced by Dalmia cements and its sister concern Dalmia Ceramics at Kallakudi and Palanganatham in Lalgudi. Other Cement producing units in the district are located at Ariyalur and Puliyur.

Electricity

There is no electricity generating station in the district. The electric energy is obtained from the common grid of the Tamil Nadu Electricity Board.

The consumption of electricity for different purposes in the district during the year 1989-90 is as follows:-

Purpose	Consumption in Thousand KW	
	L.T. Consumption	H.T. Consumption
Domestic (Light & Power)	134,303,340	-
Commercial (Light & Power)	43,119,522	1,597,257
Public Lighting	12,056,913	-
Industrial upto 650 Volts	16,333,179	-
Industrial above 650 Volts	38,058,380	298,919,730
Public water works and sewerage pumping	8,159,859	8,139,112
Agricultural (Inc.Pump)	45,355,210	1,644,000
Miscellaneous (Inc.Water supply)	44,786,054	80,900,000

In the industrial sector, textiles, cement industries, BHEL and Defence Production units, iron and steel and chemical industries are the important bulk consumers of electricity.

The lift irrigation system operating in the district consists in tapping the under ground water by means of pumpsets either operated by oil engines or by electric motors, with the extension of the electricity network, the oil engines are being replaced by electric motors. As on 31st March, 1990, as many as 108,025 pumpsets in the district were energised.

As on 31.3.1990, 1033 villages and hamlets have been provided with electricity. The rural electrification include not only street lighting and energising of pumpsets but also provides power to various small scale and cottage industries in the rural sector.

Forest

The forest resources of the district are meagre as compared to the State as a whole. While 16.64 percent of the total geographical area of the state is under forests, the district has only 7.15 percent. The district forests are not only small in area but also poor in quality. Most of the forests in the district are tropical dry deciduous and tropical dry thorn evergreen.

The Chief forest products are firewood, casurina, bamboo,eucalyptus hybrid and to a lesser extent sandal wood and timber such as teak, rose wood, pillamarudu etc.

According to the National Forestry Resolution of 1952, the optimum area under forests is to be one third of the total geographical area. Considering the area devoted to intensive cultivation and the topography of the region the area recommended is unattainable. Area over which forests could be extended are those presently classified comes under area as not available for cultivation, cultivable waste and long fallows. Some uncultivable areas however unsuitable for forests. Long fallows, if they are cultivated once in three years would not be available for afforestation. A good part of cultivable waste could be reclaimed.

Special steps are taken to conserve the forest areas and to ensure among other things, adequete pastures for live-stock, supply of firewood for domestic consumption and raw materials for industries.

With the social forestry programme in the Government lands, the Forest Department has enlarged its activities even outside the reserve forest.

Agriculture

The economy of the district is mainly based on agriculture. Farm output provide not only the food requirements of the district but also sizable portion of it exported to other parts of Tamil Nadu provides sustenance to seventy per cent of the labour force in the district and forms the basis for a vast market of consumer goods and agro-based industries.

Tiruchirappalli lacks employment oriented large scale industries except BHEL and a few cement factories in the industrial sector. Agriculture, naturally plays an important role in the development of economy. Expansion of consumer good industries, such as sugar, butter, vegetable oil, etc. for which there is good scope in the district, are based on the farm produce as raw materials and hence the expansion of agriculture both in terms of quality and quantity of produce has become of great importance.

Productivity in agriculture is influenced by a number of factors. Chief among them being soil, climate, irrigation, marketing, credit facilities and agricultural practices and technique.

The soils of the district are generally of medium fertility. The alluvial type of soils supplied with lime, po ash and magnesium which is conducive to raising of crops throughout the year are found on either side of rive Cauvery in Musiri, Lalgudi, Tiruchirappalli and Kulittalai taluks.

The problems under land holdings have two aspects, the existing size of the individual production units and the actual pattern of the distribution of plots under each unit denoted commonly by the terms sub-division and fragmentation. Sub-division has a direct effect on the size of holdings and has been the cause of uneconomic units in agriculture. Both sub-division and fragmentation have hindered the application of efficient methods of cultivation.

There are 6.38 lakh operational holdings in the district in 1989- 90 of which 2.50 lakh holdings are below 0.5 hectares, 1.53 lakh holdings are between 0.5 to 1.0 hectares and 1.28 lakh holdings are between 1.0 and 2.0 hectares. Thus more than three fourth of the cultivable area are in small parcels and this situation is not conducive for introduction of modern methods of cultivation.

The prominent role now Tiruchirappalli is playing in the agricultural sector in the State is now mostly due to its irrigation facilities. 47.99 percent of the net area sown in the district is under irrigation. The source of irrigation in the district are the rivers supplemented by a large number of rain fed tanks and numerous wells.

Most important of the river channels are the Cauvery system. Other rivers which are tapped for irrigation are Amaravathy, Noyyil, Ayyan, Naidiar, Marudaiar, Vellar, Chinnar etc. The irrigation facilities are often found inadequate to raise crops throughout the year. Because of inadequate storage and the seasonal variations in the river flow, there are severe shortages during the critical months. The release pattern from the reservoir is such that, there is no carryover storage from one year to the next to meet the requirements for seed beds and land preparation for the first paddy crop planting in June, for maturing the second paddy crop after the end of North-East monsoon as well as for irrigating dry crops during the summer months. The long interval between the closure of Mettur during January and its opening in June is not properly utilised for agricultural production in spite of this period having plenty of sunshine and considered to be very conducive to crop growth. It is during this period, particularly that the need for supplementing of ground water is greatest.

Wells providing an unfailing supply of water remained an important source of irrigation in the district. There are 168,971 wells in 1989-90 including, tube-wells in the district used exclusively for irrigation. These wells irrigated an area of about 73,080 hectares. During the same year, 80,323 electrical and 27,702 diesel pumpsets were in use for pumping water from these wells.

The other sources of irrigation in the district are tanks, springs,ponds etc.

The principal cereal crops of this district are paddy, Cholam, Ragi and Cumbu. Paddy is the important food crop cultivated over an extent of 1.08 lakh hectares of which 0.99 lakh hectares are irrigated. The cropping pattern adopted in the district is 2.0 lakh hectares under Kuruvai, 16.80 lakh hectares under Samba anc Thaladi and 2.20 lakh hectares under Navarai. In the area irrigated by canals where water is available for 8 months in a year Kuruvai paddy is raised followed by the thaladi. But where water is available for only 5 months, only one long duration cropo-samba is raised. In Musiri and Thottiam blocks a long duration paddy is raised followed by short duration paddy. Navarai is raised utilising the spring water from the river Cauvery. In other areas a long duration paddy crop has been raised during samba season and cholam, cumbu or groundnut crop during the summer months is the common pattern of cultivation.

In the taluks of Manapparai, Lalgudi, Musiri, Kulattur and Kulittalai millets are raised in more or less equal proportion along with paddy. Samai, Varagu are some of the millets cultivated in the district.

Among pulses, the major crops raised are redgram, blackgram, green gram, Horse gram, etc. Pulses are predominently cultivated as rainfed crops.

Oil seeds are grown throughout the district as a summer crop. Among oil seeds, groundnut, gingelly and castor occupy important places. Groundnut cultivation is undertaken under irrigated as well as rainfed areas

Sugar cane is the major commercial crop cultivated over an extent of 0.175 lakh hectares, purely as an irrigated crop.

Banana, Citras, Mangoes and grapes are popular fruits cultivated in this district.

Wheat, Barely and important commercial crops like coffee, tea, cardomom, ginger, pepper and rubber etc., are not cultivated in the district.

Details of area under important crops in the district during 1989-90 are as follows:

Crops	Area under crops (in hectares)	Area irrigated
Paddy	108,365	99,246
Cholam	133,780	2,698
Cumbu	54,493	2,408
Ragi	1,636	551
Varagu	18,996	3
Pulses	43,157	2,012
Sugarcane	17,509	17,509
Gingelly	18,260	1,204
Groundnut	63,524	12,023
Cotton	16,487	—

The intensive Agricultural Programme popularly known as the package programme was introduced in 1969 in 29 blocks (Panchayat Unions) in the district. The objective of this programme is in stepping up of food production, especially paddy and to help the farmer to generate more income by increasing the production through an integrated programme of supply of inputs. Under this programme acreage under oil seeds, pulses, sugarcane and cotton have also registered an appreciable increase in the district.

The district has three State Seed Farms. The main object of the farm is production and distribution of quality seeds of paddy, millets, pulses, oil seeds and vegetables. These farms serve as Model Farms to the

nearby farming community on farm maintenance and scientific method of cultivation.

The agricultural extension set up has been reorganised in the State following the training and visit system with financial assistance from the World Bank. This system introduced in the district since 1.7.1982 aims to build a professional agricultural extension service capable of assisting in raising farmers production and income and of providing appropriate support for agricultural development.

An efficient marketing system, which ensures reasonable prices for the agricultural produce and avoids physical destruction of stocks through elemination of long distance transport and storage is an incentive for the farmers.

The Madras Agricultural Produce Act of 1959 provided for better regulations of buying and selling all agricultural produce and for the establishment and administration of markets. A crop notified under the Act is served by a market committee consisting as its members, growers and traders. It is the duty of this committee to enforce the provision of the Act, like buying and selling, enforcement of correct weights and measures, regulation of commissions and brokerage etc.

Market committees are functioning in the district at Kiranur, Lalgudi, Manapparai, Turaiyur and Additional Market Committees at Tiruchirappalli, Thottiam, Tattayyangarpettai, Kulittalai and Irumbudhipettai. The commodities notified are paddy, groundnut, gingelly, cotton, chillies etc.

Animal Husbandry

Tiruchirappalli district being an agricultural and pastoral tract, animal husbandry acquires special importance.

According to the livestock Census of 1989, district has a cattle population of 853,989. The figure for sheep and goats were 723,028 and 737,036 respectively.

The activities of the department in the district are controlled by four Assistant Directors of Animal Husbandry with Headquarters at Tiruchirappalli, Musiri, Ariyalur and Karur. The following Veterinary institutions in the district are engaged in rendering veterinary facilities to the livestock.

1	Veterinary Hospitals :	4
2	Veterinary Dispensaries :	64
3	Clinical Centres :	1
4	Animal Disease Intelligence Unit :	1
5	Mobile Veterinary Units :	4
6	Veterinary Sub-Centres :	178

There are 19 Bull stations in the State. The animal Husbandry department of the State has Rinderpest Vigilance units, Rinderpest check-posts and Rinderpest District squads, whereas this district has only one Rinderpest District squad unit.

Previously Intensive Cattle Development Project and Key Village Schemes were engaged in Cattle Development in limited areas of selected districts of the State. Now the department is undertaking implementation of World Bank assisted Live Stock Development Programme since the year 1991-92 in the entire State. Due to this, the Intensive Cattle Development Project and Key Village Centres have been reorganised into 20 Cattle Breading and Fodder Development Units in the State, so that they can exclusively attend to Cattle Breading and Fodder Development work in all the districts.

Fisheries

Tiruchirappalli being an Inland district without any Coast-line, fishing has been conducted in inland waters. Fish Farm has been established in this district for the production and supply of quality fingerlings.

A Fish Farmers Development Agency is functioning in the district since 1978 for the promotion of Fisheries. Apart from the production and supply of fingerlings, training is imparted in modern method of fishing. Fish has been marketed in the district to a tune of 43.5 tonnes by the Tamil Nadu Fishing Development Corporation during the year 1990-91.

Fish being a perishable commodity, marketing of fish depends very much upon the availability of cold storage facilities. An ice- plant-cum-cold storage unit has been set up at Tiruchirappalli to provide ice and chilling facilities for the fish catches in and around the city.

Each fishing centre has a fishermen co-operative society. These societies obtain long, medium and short term loans from the Government and distribute the same to its members for the purchase of fishing materials. These societies also take lease of fishing rights of inland water and distribute the lease to its members. Important welfare measure undertaken by the Government for the upliftment of fishermen is to build free houses and also laying of roads to fishing villages.

Industries

The most important factor influencing the growth of Urbanisation and general economic development in the region is industrialisation. Industrialisation induces parallel growth in other non-agricultural sectors of the economy, creates and auguments the opportunities for employment and income, attracts migrants especially from the rural areas and boost up the pcpulation of the centres and areas where industries are growing.

Till recently, the district was one of the backward area in the matter of industrial development. The conspicuous absence of economically exploitable mineral resources in the district has been one of the reasons for the absence of large scale industries. The establishment of heavy boiler plant, small arms project, cement and sugar industries and a few textile mills in addition to the establishment of a number of industries in the medium and small scale sectors accelerated the rate of industrialisation in the district.

The most important major industry in the district is Bharath Heavy Electricals Limited located at Tiruverambur. It is a Government of India undertaking set up in technical collaboration with Messrs. Techno Export of Chekoslavakia. The plant engaged in the manufacture of heavy boilers required for thermal station and was started in 1965 at a cost of Rs.24.5 Crores.

The Seamless steel tube plant of the Bharath Heavy Electricals Limited is an Check up Unit of the High Pressure Boiler plant in Technical Collaboration with West Germany. This Plant is designed to manufacture 40,000 tonnes of boiler seamless steel tubes per year.

The ordinance factory is another important Public Sector unit in the district. This factory set up with the installed capacity production of 5,000 number of small arms has achieved the production target for the year 1981.

Cement factories have been established in a big way in the district due to fairly rich deposits of limestone and gypsum. The important cement factories in the district are: The Dalmia Cement Corporation at Puliyur, The Tamil Nadu Cement Corporation Limited and Dharani Cement at Ariyalur.

Sugar cane being grown as a major commercial crop, sugar industry occupies an important place in the rura economy o the district. There are 4 sugar mils in the district viz., Cauvery sugars at Pettavaithalai. Kothari sugars at Kottur. Decan sugars at Pugalur and Perambalur sugars at Iraiyur.

The other important industries in the district are

1 Golden Rock Railway Workshop
2 Tamil Nadu News Print Limited
3. Tamil Nadu Asbestos Limited at Meyyanur
4 Tirchy Steel Rolling Mills, Tiruchirappalli
5 Tirchy Distilleries and Chemicals
6 Cauvery Engineering Works

7 SIMCO Meter factory
8 VKN Industries at Thuvakudi
9 Sathar Vessel at Viralimalai
10 Co-operative spinning Mills, Malaikovil, Karur
11 Jupiter Flour Mills, Chenthanerpuram, Tiruchirappalli

There are 5,631 registered Small Scale Industrial Units in the district as on 31.12.1990 engaged in the wide range of products and Major group-wise break-up of figures of these units are as follows:

Major Group		No. of Units
Manufacture of Grain Mill Products	:	99
Manufacture and Refining of sugar (Vacum pan sugar factories)	:	4
Manufacture of other edible oils and fats eg. Mustard Oil, groundnut oil, til oil etc, (Non edible oils shown under division 315)	:	6
Manufacture of Food Products not else where classified	:	4
Soft drinks and carborated water Industries	:	4
Manufacture of Chewing Tobacco, Zarda and Snuff	:	3
Cotton, Spinning,Weaving, Shrinking,Sanforizing,Mercerising and furnishing of cotton textiles in Mills	:	11
Printing, dying and bleaching of cotton textiles	:	4
Weaving and finishing of cotton textiles in powerlooms	:	3
Knitting Mills	:	12
Manufacture of Coir and Coir Products	:	6
Manufacture of Veneer, Plywood and their products	:	6
Printing and publishing of newspaper	:	4
Printing of banknotes, currency notes, postage stamps, security presses	:	3
Printing, publishing and allied activities not else where classified like envelope printing, picture post card printing embossing	:	19
Tanning currying finishing and embossing of leather.	:	12
Tyre and Tube Industries	:	4
Manufacture of Plastic products not else where classified (except house furnishings)	:	4
Manufacture of basic industrial organic and inorganic chemicals and gases such as acids, alkatics and their salts, gases like acetyline, Oxygen, Nitrogen etc	:	6
Manufacture of fertilisers and pesticides Manufacture of perfumes, cosmetics, lotions, hair dressing, tooth pastes, soap in any form, synthetic detergents, shampoos, shaving products, cleansers, washing and scouring products and other toilet preparations	:	5
Manufacture of non edible oils	:	3
Manufacture of structural clay products	:	8
Manufacture of Cement, Lime and plaster	:	6

Major Group		No. of Units
Manufacture of structural stone goods, stone dressing and stone ware.	:	11
Manufacture of Asbestos, Cement and other Cement products	:	4
Manufacture of Miscellaneous non-metallic mineral products, abrasives, Graphic products, mineral wool, silica products and other non-metalic mineral products not elsewhere classified	:	7
Iron and Steel Industries	:	8
Foundaries for casting and forging Iron and Steel	:	13
Aluminium Manufacturing	:	4
Manufacture of Structural metal products	:	17
Manufacture of metal utensil, cutlery and kitchenware	:	14
Manufacture of Prime movers, boilers and Stream generating plants such as diesel engines and parts.	:	117
Industrial Machinery for food and Textiles industries	:	3
Manufacture of Railway wagons and coaches and parts	:	3
Manufacture of Motor vehicles and parts	:	12
Manufacture of Bicycles, Cycle rickshaws and parts	:	3
Portrait and commercial photographic studios	:	34
Manufacture of other industries	:	5138

Industrial Estates and departmental workshops have been set up by the State Government with the primary objective of rendering service to industries and serve as part of the infrastructure. The workshops, most of which are located in the Industrial Estate are of different types such as General purpose engineering workshop, tool rooms, Forge shops etc. Industrial Estates at Ariyamangalam and Tiruverambur accommodating a variety of Industrial units and the tool room shop at Tiruchairappalli and the General purpose engineering workshop at Ariyamangalam deserve special mention.

Tiruchirappalli holds a place of pride in cottage industries. There are variety of cottage and village industries throughout the rural areas of the district.

Mat weaving and leather tanning are the oldest industries in the district. Some of the common cottage industries found in the district are blacksmithy, carpentary, bee keeping, hand pounding of rice, oil extraction and baskets making.

Cutting and polishing of synthetic gems is a growing industry in the district. The synthetic gems manufactured at Mettupalayam in Coimbatore district are further processed in Tiruchirappalli district Co-operative institutions are functioning for the development of these industries

Thottiam and Uppilarpuram blocks are important centres for the manufactures of Carpets, Druggets and Blankets. Training centres for training the artisans have been established at Kotagudi, Thottiam and Venkatachalapuram at Uppilarpuram block. Industrial Co-operative Societies are also functioning in the district for the development of mat weaving, leather tanning and Coir industry.

The Tamil Nadu Newsprint and papers limited at Pugalur in the District is a joint venture of the Government of Tamil Nadu, Indian financial Institutions and the World Bank. This project will herald new technology in the country.

Handloom Industry

This industry has been a traditional occupation of the district. The industry flourishes mainly in Karur, Turaiyur, Uraiyur and Tattayyagarpettai.

The co-operative movement in the field of Handloom weaving has given fillip to this industry. These societies form the best institutional agencies for providing necessary facilities to enable the member weavers to get continuous employment throughout the year. The Apex Handloom Weavers Co-operative Society popularly known as 'Co-optex' is providing marketing support to its affliated Co-operative societies.

Major items of production by the weavers of the Co-operative societies consist of cotton sarees and Dhotis of 80,100 and 120 counts. Bedsheets woven in Karur area popularly known as "Karur Bedsheeets" are famous for their dexterity and variety. Carpets, druggets and blankets which are special varieties of handloom cloth are woven in Thottiam and Uppiliapuram Blocks.

Transport and Communications

Tiruchirappalli is an important rail junction on the southern Railway. Moreover it serves as the Divisional Headquarters for Southern Railway. It connects Madras, Madurai, Tuticorin, Tirunelveli, Tenkasi, Quilon, Thanjavur, Nagapattinam and Rameswaram on the Metre Gauge and Karur, Dindigul, Coimbatore, Cochin, Kanyakumari, and Banglore in the broad gauge. A network of railways interconnect various centres within the district.

Trichirappalli is an important road junction on the Madras-Dindigul National Highway (N.H. 45). The district has well knit road system connecting various important centres in the region.

Details of the importance highways of the district and the important urban centres, they connect are given below:

Highways	Important towns
N.H. 45 Madras	Tiruchirappalli, Srirangam, Manapparai.
S.H-6 Salem-Tiruchirappalli	Thottiam, Musiri
S.H-8 Coimbatore - Naggapattinam	Kulittalai, Tiruverambur
Tiruchirappalli- Attur	Manachanellur, Turaiyur
Tiruchirappalli - Ariyalur	Lalgudi, Puvalur, Kallakudi.

Due to the Limitation and Locational charactristics of the railway lines in the district, the buses play a predominent role in the transport system.

About 689 route buses run by the Dheeran Chinnamalai Transport Corporation, 2 by Jeeva Transport Corporation and one by Thanthai Periyar Corporation and some private bus operators inter connect all important places in and around the district. Supplementing the route buses, there are 14,894 registered Motor Vehicles in the district. Goods transport by lorries is better organised in the district.

Trichirappalli has an Airport. Indian Airlines connects Tiruchirappalli with Madras, Trivandrum and Coimbatore.

The District is connected by a network of Post and Telegraph office. The details are :

No. of Post Offices	:	1,094
No. of Telegraph Offices	:	9
No. of Telephone Connections	:	16,177
No. of Public Call Offices	:	592

Entertainment

The district has 98 permanent theatres, 78 Touring theatres, 26 Semi permanent theatres besides 2 drama theatres catering to the entertainment aspect of the people.

There are 95 libraries in the district which provides newspapers, magazines, weeklies, novels etc. to the enthuasiastic public of the district.

Places of historical, Archaelogical importance and Tourist interest

Tiruchirappalli a blend of history and tradition is one of the important pilgrim centre in Tamil Nadu. Flow of Cauvery adds to the glory of this land of temples. The district has quite a number of famous temples noted for sculptural beauty and excellent architecture.

Rockfort

Tiruchirappalli, the Headquarters of the district is a famous city in South India and is located on the Southern Bank of the River Cauvery. The Rockfort in the Centre of the city is a prominent land mark and on the top of which is located Shri Thayumanaswamy Temple. A Fine flight of stone steps leads to the temple. The presiding deity is Shri Thayumanaswamy . The main shrine is on the western side of the Temple and Pillaiyar Temple is on the East.

This temple was built by Mahendra Pallava - I between the 10th and 12th centuries. The Temple is a master piece of construction built in stones.

Srirangam

Another well known town of the district is located on the island formed by the river Cauvery and its tributary coleroon. This town is just 10Kms. from Tiruchirappalli and has become famous due to the Vaishnavite Temple dedicated to Lord Ranganathaswamy.

This Temple consists of five long praharams in the form of a rectangle. There are 21 magnificient towers with stone inscriptions and the Ayiramkal mandapam which is a master piece of architecture. The Temple is surrounded by seven walls and within which the town itself is located.

Being an important pilgrim centre in the district, this temple attracts thousands of devotees from all over India during festive occassions where the idol is taken out in procession on the vahanas made of wood and covered with gold and silver plates. Vaikunta Ekadasi is the most important festival celebrated here.

Thiruvanaikkaval

This place near Tiruchirappalli is known for the Jambukeswarar temple dedicated to Lord Siva. It is an ancient temple said to have been in existence from the first century B.C. The Temple has five long praharams.

Jambu is the name of holy tree under which is the Eswar (Siva) in the form of lingam submerged in water Shri Jambukeswarar and his consort Sri Akhilandeswari are the presiding deities of this temple.

Pancha praharam is the most important festival celebrated in this temple during the month of Panguni which attracts thousands of devotees. During this festival, the Lord in female dress and the Devi in male dress are taken out in procession.

Kumaravayalur

Shri Subramanyaswamy Tempe in Kumaravayalur is an ancient and well known shrine built by the Chola Rulers. There are number of stone inscriptions giving the history of the temple.

The three principal sanctums are Shri Subramanyaswamy with his two consorts Sri Valli and Sri Deivanai, Sri

Adinatha (alias Sri Agniswaarar and his consort Sri Poorva Sithi Nayak, the Uthsava idol of Sri Subramanya, Sri Valli and Sri Deivanai are very beautiful and attractive. Panguni Uthiram is the most Important Festival celebrated here when Lord Muruga is taken out in procession in the night mounted on the silver peacock Vahanam.

The Brihadiswara Temple at Gangaigonda Cholapuram is one of the two largest Chola Temples in Tamil Nadu situated in Guruvalappar Kovil in Udayarpalayam Taluk. This stone temple was constructed by Rajendra Chola - I contains many Chola, Pandya and Vijayanagar inscriptions. The temple marks the last phase of the early chola architecture and its zenith.

The Fort Gate way at Tiruchirappalli town is one of the few surviving remains of the old fort. It is a narrow arched gateway massively constructed with bastion and cells on either side. This fort and the gate associated with Carnatic wars in the seige of Tiruchirappalli are called the key of the carnatic.

Karur an important town of the district is located on the bank of River amaravathy. The town is one of the seven sacred sthalams or sivalayams and is well known for the famous Pasupathisamy temple. The group of sculptures representing Pasupathiswara Lingam as high as five feet bathed by the milk oozing from the udder of a cow and Ranganatha are noted for sculptural beauties.

Pugalur situated North west of Karur acquired much importance due to the setting up of an integrated newsprint cum paper project of the Government of Tamil Nadu. The Temple dedicated to Lord subramanya on a smal hill near cauvery is noted for excellent sculpture.

The grand anaicut built across the cauvery by the Karikala chola is an Engineering marvel. It is a beautiful and calm picnic spot which attracts many people. It is 24 Kms from Tiruchirappalli on the Tiruchirappalli Thanjavur Road

Upper Anaicat or Mukkombu is the head of the Sri Rangam Island where the River Kollidam branches off from Cauvery. This is a beautiful picnic spot with lush green trees, meadows and parks.

Samayapuram Sri Mariamman Temple at samayapuram in Lalgudi taluk is one of the most popular shrine in Tamil Nadu. This presiding deity of the temple is known as Sri Mariamman, Sri Seethala Gowri and Sri Mahamayi. She is one of the forms of Kali.

Poojas are performed four times a day. The main annual festival commences on the last Sunday in Panguni. The Car festival is celebrated on the first Tuesday in Chithirai and the floating festival on the following Friday.

Elakurichi is famous for its ancient chruch built by the famous Catholic Missionery Constantive Joseph Beschi popularly known as 'Veeramamunivar'.

Natharsha darga, the famous Muslim Pilgrim house is situated in Tiruchirappalli Town. The annuala Kandoori Festival attracts people of all Faiths.

These temples and Monuments are not only places of Historical and Religious importance but also centres of tourist interest.

Table-1 furnishes C.D. Blockwise distribution of inhabited villages according to availability of different amenities in Tiruchirappalli district. Among 990 inhabited villages in the district all villages have drinking water and power supply, 961 villages (97.07%) have education facility 870 villages (87.88%) have communications, 851 villages (85.96%) have pucca approach road, 807 villages (81.52%) have post and telegraph services, 472 villages (47.68%) have medical facility. Compared with other facilities, the availability of market/hat is very poor as only 100 villages (10.10%) have such locations. Among 32 C.D. Blocks in the district, Tattayyangarpettai and Krishnarayapuram C.D. Blocks have the 5 amenities viz., Education, Drinking Water, Communication, Pucca approach Road, and Power supply in cent percent. Out of 8 amenities, 4 amenities are available in cent percent to 6 C.D. Blocks, 3 amenities are available in cent percent to 14 C.D. Blocks and 2 amenities are available in cent percent to 10 C.D. Blocks. Though the Market/Hat facility is very poor in this district, 8 C.D. Blocks do not possess this facility at all.

	istrict	**3,037,197**	**3,017,350 (99.35)**	**1,757,566 (57.87)**	**3,037,197 (100.00)**	**2,730,608 (89.91)**	**476,371 (15.68)**	**2,778,805 (91.49)**	**2,746,856 (90.44)**	**3,037,197 (100.00)**

Table - 2 provides C.D.Blockwise information about availability of different amenities in proportion to rural p opulation. In Tiruchirappalli district, rural population avail drinking water and power supply amenities in cent ercent, 99.35% avail Education, 91.49% avail Communication service, 90.44% avail Pucca Approach Roa 89.91% avail Post and Telegraph services and 57.87% avail Medical facility while only 15.68% avail Mark t/Hat facility. Rural population of Tattayyangarpettai and Krishnarayapuram C.D.Blocks avail 5 amenities viz., ducation, Drinking water, Communication, Pucca Approach Road and Power supply amenities in cent perc nt. It is seen from the table that the whole rural population in the Perambalur, Alathur, Ariyalur, T.Palur, Lalg li, Pullampadi, Tattayangarpettai and Thiruverambur C.D.Blocks do not have even a single market/hat locat n.

Table-3

DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE.

Sl.No.	Villages not having the amenity of	Number of villages where the amenity is not available and available at distance of (Kms.)			
		-5	6-10	10+	Total (col 3-5)
1	2	3	4	5	6
1	Education	23	2	4	29
2	Medical	309	142	67	518
3	Post & Telegraph	159	16	8	183
4	Market/hat	352	268	270	890
5	Communication	87	15	18	120

Table - 3 provides information about distribution of villages not having certain amenities and arranged according to the distance ranges from the place where the amenities are available in Tiruchirappalli district. It is seen from the table that the amenity Market/Hat is not available at the maximum 890 villages and is available within 5 Km for 352 villages, between 6-10 Km for 268 villages and beyond 10 Km for 270 villages. Followed by the Medical and Post and Telegraph facilities which are not available to 518 and 183 villages respectively withinthe villages itself. Similarly communication and Education facilities are not available to 120 villages and 29 villages respectively.

Table - 4

DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES.

Sl. No.	Distance range from the nearest town (in Kms.)	Number of inhabited villages in each range	No. (with percentage)of villages having the amenity of							
			Educational	Medical	Drinking water	Post and Telegraph	Market/Hat	Communications	Approach by Pucca Road	Power supply
1	2	3	4	5	6	7	8	9	10	11
1	0-5	144	140 (97.22)	49 (34.03)	144 (100.00)	120 (83.33)	5 (3.47)	122 (84.72)	126 (87.50)	144 (100.00)

3	16-50	438	421 (96.12)	202 (46.12)	438 (100.00)	354 (80.82)	56 (12.79)	391 (89.27)	370 (84.47)	438 (100.00)
4	51+	4	3 (75.00)	3 (75.00)	4 (100.00)	4 (100.00)	1 (25.00)	3 (75.00)	4 (100.00)	4 (100.00)
	Total	**990**	**961 (97.07)**	**472 (47.68)**	**990 (100.00)**	**807 (81.52)**	**100 (10.10)**	**870 (87.88)**	**851 (85.96)**	**990 (100.00)**

Table - 4 provides the distribution of villages according to the distance from the nearest town and availability of different amenities. Out of 990 inhabited villages, 144 are in the distance range of 0-5 Kms., and all the villages are having the amenity of drinking water and power supply and rest of the amenities such as education, medical, post & telegraph, market/hat, communications, and approach by pucca road are availed by 97.22%, 34.03%, 83.33%, 3.47%, 84.72%, and 87.50% respectively. Similarly in the distance range of 6-15 kms., the amenities of drinking water and power supply are availed by all 404 villages and rest of the amenities are availed by 98.27%, 53.96%, 81.44%, 9.41%, 87.62%, and 86.88% respectively. Likewise in the distance range of 16-50 kms., the amenities of drinking water and power supply are availed by all 438 villages and the rest of the amenities are availed by 96.12%, 46.12%, 80.82%, 12.79%, 89.27% and 84.47% respectively. There are only four villages in the distance range of above 51 kms., and availing the amenities of drinking water, post & telegraph, approach by pucca road and power supply by cent percent. Rest of the amenities such as education, medical and communications are availed by 75% and only 25% are availing the amenity of market/hat in this range.

Table - 5

DISTRIBUTION OF VILLAGES ACCORDING TO THE POPULATION RANGE AND AMENITIES AVAILABLE.

Sl. No.	Population Range	Number of inhabited Villages in each range	No. (with percentage)of villages having the amenity of							
			Educational	Medical	Drinking water	Post and Telegraph	Market/Hat	Communications	Approach by Pucca Road	Power supply

	5000+	121	121 (100.00)	94 (77.69)	121 (100.00)	118 (97.52)	39 (32.23)	114 (94.21)	115 (95.04)	121 (100.00)
	Total	**990**	**961 (97.07)**	**472 (47.68)**	**990 (100.00)**	**807 (81.52)**	**100 (10.10)**	**870 (87.88)**	**851 (85.96)**	**990 (100.00)**

Table - 5 furnishes distribution of villages according to the population range and amenities available. Drinking water and power supply are available to all the villages in the district. In the population range of less than 499, education, medical, post & telegraph, market/hat, communications and pucca approach road are available to 43.48%, nil, 26.09% 13.04%, 47.83%, and 65.22 respectively. In both ranges of population of 500 - 1999 and 2000-4999, there are 846 villages and the amenities such as education, medical, post & telegraph, market/hat, communications and pucca approach road are available to 830,378, 683,58,745 and 721 villages respectively. In the population range of 5000 and above, there are 121 villages and all the villages avail the amenity of education, drinking water and power supply. The rest of amenities i.e., medical, post & telegraph, market/hat, communication and pucca approach road are available to 94,118,39,114 and 115 villages respectively.

Table - 6

	District	**990**	**1,027,960.75**	**64.49**	**25.29**

Table 6 gives distribution of inhabited villages according to land use. The total area of the 990 inhabited villages in the district is 1,027,960.75 hectares of which the percentage of cultivable area to the total area is 64.49%. The percentage of irrigated area to the total cultivable area work out to 25.29%. Andimadam C.D. Block pocess the maximum percentage of cultivable area to the total area in the district viz. 84.73%. while Thiruverambur C.D. Block recorded the lowest percentage of cultivable area to the total area of the district namely 40.79%. Similarly Thiruverambur C.D. Block has got the highest percentage of irrigated area to the total cultivable area viz. 90.74%. The lowest percentage of irrigated area to the total cultivable area is reported in Andimadam C.D. Block with 3.48%

ANNEXURE - I

Statement showing the C.D. Blocks included in various Taluks.

Sl. No.	Name of Taluk	Name of the C.D. Block	Code No. of C.D. Block
1.	Turaiyur	Turaiur	0010
		Uppiliapuram	0020
		Musiri (Part)	0030
2.	Perambalur	Perambalur	0040
		Veppanthattai	0050
		Veppur	0060
		Alathur	0070
3.	Ariyalur	Ariyalur	0080
		Sendurai	0090
		Thirumanur	0100
		Jayankondan (Part)	0110
4.	Udayarpalayam	Jayankondan (Part)	0110
		Andimadam	0120
		T. Palur	0130
5.	Lalgudi	Lalgudi	0140
		Pullampadi	0150
		Manachanellur	0160
6.	Musiri	Musiri (Part)	0030
		Thottiam	0170
		Tattayyangarpettai	0180
7.	Karur	Karur	0190
		Thanthoni	0200
		K. Paramathy	0210
		Aravakurichi	0220
8.	Kulittalai	Kulittalai	0230
		Krishnarayapuram	0240
		Kadavur	0250
		Thogaimalai	0260
9.	Tiruchirappalli	Manikandam	0270
		Andanallur	0280
		Thiruverambur	0290
10.	Manapparai	Manapparai	0300
		Vaiyampatti	0310
		Marungapuri	0320

Section II
Town Directory

Note explaining the codes used in the Town Directory

Class of towns by population

Population	Class
1,00,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Civic administration status of the town

M.Corp	—	Municipal Corporation/Corporation
M	—	Municipality
TP	—	Town Panchayat
VP	—	Village Panchayat
TC	—	Town Committee/Town Area
CB	—	Cantonment Board/Cantonment
SC	—	Scheduled Castes
ST	—	Scheduled Tribes

Type of Road

PR	—	Pucca Road
KR	—	Katchcha Road

System of Sewerage

S	—	Sewer
OSD	—	Open Surface Drains
BSD	—	Box Surface Drains
SD	—	Silk Drains
CD	—	Cesspool method
Pt	—	Pit System

Method of disposal of night soil

HL	—	Head Loads
B	—	Baskets
WB	—	Wheel Barrows
ST	—	Septic tank latrines
S	—	Sewerage

System of storage of water

OHT	—	Overhead tank
SR	—	Service reservoir
IG	—	River infiltration gallery
BWP	—	Borewell pumping system
PT	—	Pressure tank

Source of drinking water

TW	—	Tube well /Hand pump
T	—	Tap
W	—	Well water

TK	—	Tank water
Medical facilities		
H	—	Hospital
D	—	Dispensary
HC	—	Health Centre
FC	—	Family Planning Centre
TB	—	T.B.Clinic
NH	—	Nursing Home
O	—	Others
A	—	Ayurvedic
U	—	Urani
Hom	—	Homeopathic
Educational facilities		
A	—	Arts only
S	—	Science only
AS	—	Arts and Science only
C	—	Commerce only
AC	—	Arts and Commerce only
ASC	—	Combined for all categories Arts,Science and Commerce
L	—	Law
Recognised shorthand, typewriting and other vocational Institutions		
SH	—	Shorthand
Type	—	Typewritting
Sh.Type	—	Shorthand and Typewriting
O	—	Others
Public Libraries and reading rooms		
PL	—	Public Libraries
RR	—	Reading Rooms
