FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/modifications after each decennial census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Government/ Union Territory administration. It inter-alia provides data/ information on some of the basic demographic and socio-economic characteristics and on availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA)of each village and town (wardwise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories, including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third Part (C) of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (wardwise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil/ town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referrent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time during 1981 Census in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this statement, details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Caste and Scheduled Tribe population and another on adult literacy classes/centres were added in Statement IV and V respectively. 3

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age have been treated as illiterates at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Block level presentation of data in the Village Directory and PCA instead of the traditional Tehsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D. Block level will help the planners in formulation of micro-level developmental plans, as the C.D. Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census alongwith the corresponding codes of 1981.

This publication is a joint venture of the State Government/UT administration and the Census Organisation. The data have been collected and completed under the direction of Shri K. Sampath Kumar, Director of Census Operations, Tamil Nadu, on behalf of the State Government which has borne the cost of printing. The task of planning, designing and co-ordination of the publication was initiated by Dr. K.P. Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M. Dua, Joint Director, for the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of census/non-census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K. Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri A.K. Singh, Deputy Director who was assisted by Shri N.S. Soam, Assistant Director and his staff. Technical guidance in the preparation of the maps was initially provided by Dr. B.K.Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map). 3

I am thankful to all those who have contributed to this project.

A.R. NANDA
Registrar General, India

PREFACE

The District Census Handbook is the most useful publication for the public, social workers, researchers, academicians, administrators, local bodies and the government officials for various official and non-official purposes. It gives data for the village/panchayat at the lowest level to the district level including panchayat union/taluk covering demographic, social, economic and cultural aspects. There had been an endeavour to make it as comprehensive as possible, to provide data on various aspects since its inception and by 1961, it reached the dimensions of a compendium for the district. The Registrar General, India, in his foreword has kindly traced out the improvements brought out from time to time since 1961 to the latest 1991 Census while the history of the District Census Handbook in this State is narrated in the Introductory Chapter to this volume.

The District Census Handbook is a joint venture of the Census Organisation and the Government of Tamil Nadu. The scope of District Census Handbook has been widely increased and restructured in 1981 to meet the Minimum Needs and Revised Minimum Needs Programmes of the Planning Commission. Broadly keeping up the 1981 main structure, the formats of the Primary Census Abstract have been restructured slightly for the benefit of data users. The nine-fold industrial classification of main workers as done at the 1961 and 1971 Censuses has been revived instead of the four-fold classification of the 1981 Census. Population in the age-group 0-6 by sex has been given in order to enable computation of realistic literacy rate as all children below 7 years are treated as illiterates. One of the most important innovations of the 1991 Census is the presentation of data at the Community Development Block/Panchayat Union level to help planners in the formulation of micro-level developmental plans at the lowest administrative unit level. In this State, for development planning, the lowest administrative unit is the 'Panchayat Union'. This time, for the benefit of data users of Village Directory and PCA data from the magnetic tapes/floppies or from the published records, the computer code as well as the manual code as of 1991 Census and the corresponding location code of 1981 Census are given.

The District Census Handbooks are now being published in two parts - Part-A - Village and Town Directory and Part-B - Village and Townwise Primary Census Abstract. The two parts are being published in one volume as Part A & B.

Part-A deals with a brief description of the district - its major characteristics in relation to the economic resources like forestry, agriculture, industries, social, cultural, religious and historical aspects apart from certain basic amenities like drinking water, education, medical, post and telegraphs, market day(s), communications, etc; and if any of these facilities are not available to any village, distance range of the nearest place 3 from where available; power supply, approach to the village, nearest town to the village, health and family planning centres, primary health sub-centres and community health workers in the village. Information on approach to village is also provided to identify inaccessible villages in the district. These exhaustive data on infrastructure in relation to amenities available to the villages and land-use pattern are meant to meet the requirements of 'Micro-level' local area development planning at the lowest administrative unit viz., C.D. Block/Panchayat Union level. This is the reason why this time data are being published at C.D. Block/Panchayat Union level instead of the traditional taluk level.

In the Town Directory, information on class of town, area of the town, number of households, population and growth rate of the population of the town at each of the Censuses from 1901 to 1991, sex-ratio at the 1971, 1981 and 1991 Censuses, physical aspects of rainfall and minimum and maximum temperatures recorded, distance from State and District Headquarters, nearest city, communication facilities like railway station, bus-route, inland navigation, Municipal finance, civic and other amenities like protected water supply, electric connections by type, fire fighting service, road length by type, system of sewerage, number of latrines by type, total population and Scheduled Caste and Scheduled Tribe population, medical, educational facilities by type, recreational and cultural facilities like stadia, cinema, drama, community hall, public libraries and reading rooms, adult literacy classes/ centres, working women's hostels, three important commodities manufactured, exported and imported; a special table on civic

and other amenities available in all notified slums in Class-I and Class-II towns have been included with a view to ascertain the availability of basic amenities and to meet the Minimum Needs and Revised Minimum Needs Programme.

Part-B deals with the Primary Census Abstract for all the villages in the rural areas and wardwise for urban areas. This time the PCA data like Village and Town Directory data are arranged by C.D. Block/Panchayat Unionwise giving area of the village (in hectares), area of town (in Sq.Km.), number of occupied residential houses, households, population by sex, Scheduled Caste and Scheduled Tribe population, literates, main workers and their distribution into nine industrial categories (as against the four industrial categories published in 1981), marginal workers, non-workers and the population in the age group 0-6 by sex

Further, if a village is covering more than one Panchayat, break up figures for each segment of the village forming different Panchayat also are given.

It is hoped that with the modifications now brought out in the Village Directory, Town Directory and PCA and Publication of data at C.D. Block/Panchayat Unionwise would go a long way in helping the planners to chalk out more effective developmental programmes at micro-level for local area developmental plans as the C.D. Block/Panchayat Union is the lowest administrative unit for developmental planning.

In the process of collection of data of this volume, various State and Central Government Departments have extended their kind co-operation particularly with regard to infra-structural amenities for Part-A - Village and Town Directory, history and general features of the district. etc. I convey my grateful thanks to all of them. The PCA data presented in Part-B of this volume were collected during the Census Operations in February- March, 1991, the reference date being sunrise of 1st March, 1991.

I remain grateful to the Director of Census Operations, Shri K. Sampath Kumar, who closely guided us in every aspect of this work. He had been a source of strength and inspiration for us. We owe a deep sense of gratitude to him for his kindness in dealing with our practical difficulties, his patient advice and formula of solutions for even small problems, which we brought to his attention.

I wish to record my deep sense of gratitude to (late) Shri M. Thangaraju, Joint Director of Census Operations and Shri Ch. Purnachandra Rao, Deputy Director of Census Operations for overall direction and guidance to bring out this publication. I use this opportunity to mention my special thanks to Sri. Gummodi Bapuji, Assistant Director of Census Operations for scrutinising the draft report and presenting the data with meticulous care and accuracy. I am also thankful to Shri S.P. Grover, Joint Director of Census Operations and Shri Phool Singh, Deputy Director of Census Operations who have also provided overall guidance and supervision during their tenure in this regard.

Apart from that, Shri Gummodi Bapuji in-charge of DCH Section took a meticulous care to arrange this volume in a systematic manner with the help of his colleagues S/Shri A.V. Raman, K.Sambamoorthy, Investigators, P.G. Sankaran and M. Thangavelu, Statistical Assistants and other section officials. The preparation of maps included in this volume were done under the supervision of Shri Jogesh Das, Senior, Geographer

In the compilation and processing of Village Directory and Town Directory data, I was ably assisted by Smt. R. Rani Bai and Smt. A.M. Mangayarkarasi, Investigators and their assistants respectively while Shri. A.V. Raman, Shri.K. Jagannivasan, Investigators are chiefly responsible for preparing the analytical notes, inset tables, draft write-ups and arrangements of the matter in order.

The PCA data for the district were processed at the Regional Tabulation Office, Tirunelveli under the supervision of Shri. V. Jabamani, Regional Deputy Director of Census Operations, assisted by Shri S.Suveekaran and Smt. A. Roshan, Statistical Assistants who were deputed from this Directorate to the Regional Tabulation Office, Tirunelveli.

Finalisation of PCA data (Panchayat Unionwise) and providing computer codes for villages were attended to by Shri R. Lakshminarayanan and Smt. M.V. Rajalakshmi, Investigators and staff of the Census Section. The district and taluk maps in this publication give the administrative units upto village level, the location of towns and cities, communication facilities, etc. This time in the taluk map, the boundary of each of the C.D. Block units, namely, 'Panchayat Unions' have been shown separately to synchronise with the presentation of data, Panchayat Unionwise.

I convey my grateful thanks to Shri A.R. Nanda, IAS., Registrar General and Census Commissioner, India for the valuable guidance and advice I received from him throughout. I am thankful to Shri N. Rama Rao, Deputy Registrar General (C & T) who has been a source of strength and constant help and guidance on all technical matters like a "Ready-Reckoner". I also thank Dr. K.P. Ittaman, Former Deputy Registrar General (S.S.) and Shri M.M. Dua, Joint Director, for planning, designing and co-ordinating the formats. I thank Shri M.K. Jain, Deputy Registrar General (S.S.) and Shri A.K. Singh, Deputy Director, Shri N.S. Soam, Assistant Director and his staff for scrutinising and approving the first volume so that it could fit in, in the all India pattern from uniformity point of view in the presentation of data and other items. My thanks are also due to Dr. B.K. Roy, Former Deputy Registrar General (Map) and Mrs. Minati Ghosh, the present Deputy Registrar General (Map) for providing technical guidance in the preparation of maps.

I have pleasure in acknowledging the able assistance rendered by the following officials of my office in the preparation of this volume.

ANALYTICAL NOTE

Census Concepts

Rural and Urban areas

It is customary to classify a place as rural or urban in every census and present data separately for rural and urban areas. Urban areas which are specifically defined for census purposes are determined on the basis of certain demographic and economic criteria. The rest are treated as rural areas. At the 1991 Census, the same criteria adopted for determining the urban areas at the 1981 Census have been continued. The urban areas of 1991 Census are:

a) All places with a Municipality, Corporation or Cantonment Board or Notified Town area:

b) All other areas which satisfied the following criteria:

(i) A minimum population of 5,000;

(ii) At least 75 per cent of male main workers engaged in non-agricultural and allied activities: and

(iii) A population density of at least 400 per sq.km. (or one thousand per square mile)

The above definition adopted for both the 1981 and 1991 Censuses varies slightly from those of 1961 and 1971 Censuses. As of the 1961 and 1971 Censuses, the males engaged in the activities of fishing, logging etc., were treated as engaged in non-agricultural pursuits and hence have been taken into account with those engaged in non-agricultural pursuits for applying the test of the 75 per cent non-agricultural workers criterion. But in 1981 Census as well as in 1991 Census, they have been treated on par with agricultural activities for the purpose of the test for this criterion. Prior to 1981 Census, certain places with less than 5,000 population were treated as urban areas on the basis of certain consideration like density, social and historical importance etc., at the discretion of the Director of Census Operations in consultation with the State Government. On the other hand, the tests on demographic and economic criteria were strictly applied at the 1981 and 1991 Censuses and no area was classified as urban area on other considerations.

Urban Agglomeration

This concept was adopted for the first time in 1971 Census and continued in 1981 and 1991 Censuses also.

An urban agglomeration is a continuous urban spread constituting a city or town and its adjoining urban outgrowths (OG) or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns. In certain cases, large housing colonies, university campuses, port areas, military camps, etc., would have come up around a city or town but falling outside the statutory limits of the city or town. They may be lying inside the boundaries of a village or villages which are contiguous to the city/town. These villages could not be treated as urban as they do not satisfy the urban criteria. But at the same time the colonies etc., mentioned above deserve to be treated as an integrated urban area. Therefore, all such towns together with their urban outgrowth will have to be treated as one urban unit and called urban agglomeration. All the constituent units of urban agglomerations are also independent urban units or towns.

Census House

A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant and may be used for residential or non-residential purposes or both.

Household

A household is a group of persons, who commonly live together and would take their meals from a common kitchen, unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, ashrams etc. These are called Institutional Households.

Scheduled Castes / Scheduled Tribes

For the enumeration of Scheduled Castes and Scheduled Tribes in census, the names of Scheduled Castes and Scheduled Tribes as recognised in Tamil Nadu based on the Scheduled Castes and Scheduled Tribes Orders (Amendment) Act of 1976 (Central Act 108 of 1976) was followed. The enumerators were instructed to record a person as belonging to Scheduled Caste or Scheduled Tribe provided the name given by the person was found in the list supplied to them.

Literates

In the 1981 Census, a literate was defined as a person who can both read and write with understanding in any language. A person who could merely read but cannot write was not a literate. It was not necessary that for a person to be considered as a literate must have received any formal education or have passed any minimum educational standard. In the 1991 Census, all the children of the age of 6 years or less are treated as illiterates whereas in the 1981 Census all children of the age of four years or less were treated as illiterates.

Definition of work

Work may be defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work or farm or in family enterprise.

Main and Marginal workers

The dichotomy of workers and non-workers of 1961 and 1971 Censuses had been dropped and the trichotomy of main workers, marginal workers and non-workers were introduced in the 1981 Census and has been continued in the 1991 Census also. A worker was identified with reference to a reference period preceding the census. The reference period prescribed was one year preceding the date of enumeration. Certain types of work such as agriculture, household industries like gur making etc., were carried on, either throughout the year or only during certain seasons or part of the year, depending on the local circumstances. In such cases what we were concerned with was the broad time spent during the agricultural season preceding the enumeration. Workers can be full-time workers or seasonal workers or marginal workers. If a person had done any work during the reference period and if he had worked for the major part of the year, i.e. if he had worked for 183 days or more, he was considered to be a full-time worker (Main worker). If a person had done any work during the reference period and if he had not worked for the major part of the year, i.e., if he had worked for less than 183 days, he was considered to be a marginal worker. Persons who had not participated in any economic activity even for a day during the last one year preceding the day of enumeration were considered as non-workers

All the main workers and the marginal workers have been classified under one of the four main categories in the 1981 Census. While in 1991 Census, they have been classified under one of the nine industrial categories as was done in 1971 Census. They are: 1) Cultivators (C), II) Agricultural Labourers (AL), III) Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and allied activities, IV) Mining and Quarrying, V) (a) Manufacturing, Processing, Servicing and Repairs in Household Industry, V) (b) Manufacturing, Processing, Servicing and Repairs in other than Household Industry, VI) Construction, VII) Trade and Commerce, VIII) Transport, Storage and Communication and IX) Other Services.

The definitions of these nine industrial categories of workers are given below:

I. Cultivators (C)

For the purpose of census, a person is considered as cultivator if he/she is engaged in cultivation of land, owned or taken on lease from Government or from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation.

II. Agricultural Labourer (AL)

A person who works on another person's land for wages in money, kind or share should be regarded as agricultural labourer. He/she has no risk in the cultivation, but he/she merely works in another person's land for wages. An agricultural labourer

has no right of lease or contract on land on which he/she works.

III. Livestock, forestry, fishing, hunting and plantations, orchards and allied activities

Persons who were reported as engaged in livestock, forestry, fishing, hunting and plantations, orchards and allied activities are treated as workers under this category.

IV. Mining and Quarrying

Persons who were reported as workers in mining and quarrying are classified under this category.

V. a) Manufacturing, processing, servicing and repairs in household industry

Household industry is defined as an industry conducted by the head of the household himself/ herself and/or by the members of the household at home or within the village in case of rural areas and within the precincts of the house only in case of urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The household industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act. Merely selling of food items or other edibles should not be regarded as household industry.

b) Manufacturing, processing, servicing and repairs in other than household industry

Persons reported as workers in manufacturing, processing, servicing and repairs other than those mentioned in V-(a) are treated as workers in this category.

VI. Construction

Persons working as plumbers, mason, electricians, painters and others engaged in construction work are treated as workers under this category.

VII. Trade and Commerce

Persons engaged in work such as wholesale or retail business or trade are treated as workers in this category.

VIII. Transport, storage and communications

Persons who were reported as drivers, conductors, technicians, fitters, welders and other communication workers are treated as workers under this category.

IX. Other Services

Persons engaged in services other than those mentioned in I to VIII categories are treated under this category. Workers who could not be classified in any of the above I to VIII categories are treated as those engaged in other services.

Non-workers

All persons who have not been treated as workers i.e., persons who have not worked any time at all during the reference period of one year preceding the date of enumeration have been considered as non-workers. Thus, non-workers cover all persons who are engaged in his/her household duties and who do no other work or have not done any work at all during the last one year, full time students and children attending school, all dependants such as infants or children not attending school or a person permanently disabled from work because of illness or old age, persons retired from service or rentiers, beggars, vagrants, convicts in jails or inmates of a penal, mental or charitable institution and all other non-workers not falling under any of the above categories.

History of the District Ceusus Hand Book

After the census of 1951, the Government of India offered to hand over to the State Government the Census tables and other data prepared during the Census and suggested that they might be published along with any other useful information relating to each district as separate volumes. The State Government accepted the proposal and the first publication of the Dirstrict Census Handbook was brought out at the cost of the State Government.

The District Census Handbook of 1951 was found to be very useful and it was therefore decided not only to continue the series for the 1961 Census but also to improve on its content so that each District Census Handbook contained certain basic economic data for the smallest administrative unit in the district and be an useful reference book for scholars and other data users.

After the 1971 Census also, the publication of the series of District Census Handbook was continued. The publication of 1971 District Census Handbook was in three parts, viz., Part-A, Part-B and Part-C. Part-A relating to Village and Town Directory, Part-B relating to Village and Townwise Primary Census Abstract and Part-C comprising District Census tables and certain administrative statistical tables.

The tradition of bringing out the District Census Handbook was continued by the State Government during the 1981 Census also. In this series, some individual features besides restructuring the formats of the Village Directory had been adopted bearing in mind the requirements of data for the socio-economic programmes of the Government. The comparability of data with the 1981 Census data had also been kept in view.

The present 1991 District Census Handbook will be published in two parts, viz., Part-A - Village and Town Directory and Part-B - Village and Townwise Primary Census Abstract.

Scope of Village and Town Directory Statements and Primary Census Abstract

The District Census Handbooks are the only publications which incorporate the data down to the level of a village and level of ward or division of a town which are constantly referred to by the data users.

The Village Directory statements give the list of villages by C.D. Block and for each village, the area, number of households and population, availability of amenities and land use. The information on amenities available in the village includes educational, medical, drinking water, post and telegraph, market, rail/road or other communication facilities and power supply. Land use is shown as area under forests, irrigation, unirrigated land, culturable waste and area not available for cultivation.

Appendix-I gives C.D. Blockwise abstract of educational, medical and other amenities available viz., the number of villages having various levels and types of educational institutions such as middle schools, adult literacy centres, etc., various types of medical institutions such as dispensaries, primary health centres, maternity and child welfare centres, family planning centres, community health workers etc., and the number of such institutions, various types of sources of drinking water such as tap, well, tank, tube-well, river, fountain, canal, etc., post and telegraph offices, bus stops, railway station, power supply, etc., and also the number of village not having such amenities.

Appendix-II gives for each non-municipal town (Census Towns) the area under forest, irrigated and unirrigated land, culturable waste (including gauchar and groves) and area not available for cultivation.

Appendix-III is only the list of villages where no amenities relating to education, medical, drinking water, post and telegraph, communication, power supply and market/hat and public health facilities etc., are available.

Appendix-IV gives the list of villages according to the proportion of SC/ST to the total population by ranges. Part-A of the Appendix lists out villages according to the proportion of SC population. The information is presented by the ranges in per cent, viz., 0-5, 6-10, 11-15, 16-20, 21-30 and 31 and above, and Part-B provides similar data for ST population ranges in per cent, viz., 0-5, 6-15, 16-25, 26-35, 36-50 and 51 and above.

The Town Directory gives important and very useful information like civic and other amenities available in all the towns in the district, statutorily notified as well as non-municipal or census towns. The details relating to each of the towns have been presented in seven statements, viz., Statements I to VI and IV-A.

In all the statements, except IV-A, the towns are arranged in the alphabetical order for the district. The Town Directory does not cover strictly military areas. It may, however, cover cantonment areas but not strictly military areas or military establishments within the cantonment which are required to be left out. However, basic statistics of the cantonment as a whole have been provided. In the Town Directory, codes have been given for the data on amenities and civic administration for want of space. The relevant explanations for the codes adopted have been given in the beginning of the Town Directory statements.

The concept of "urban agglomeration" was introduced for the first time in 1971 replacing the concept of "town group" of 1961. The concept of Urban Agglomeration has been continued in 1981 and 1991 Censuses also. An Urban Agglomeration may be explained as follows: "It must form a continuous urban spread constituting a town and its adjoining urban outgrowths or two or more physically contiguous towns together with continuous well recognised urban outgrowths, if any, of such towns"

An Urban Agglomeration includes two or more independent census towns. The names of the Towns/Urban Agglomeration have been arranged in the alphabetical order. The particulars of the individual town which constitutes one of the units of agglomeration have not been furnished separately because the particulars have already been furnished, where they occur together under the name of agglomeration. The following remarks have been given against such town within brackets:

"(See the name of the main town of the agglomeration)"

By adoption of this method, the reader can get an idea of the particulars of the urban agglomeration in total and also separately.

Statement I - Status and Growth History

Statement - I provides some basic data based on the Primary Census Abstract for the towns and urban agglomerations of 1991 Census. For analysing the town directory data at the State level and All India levels, some new columns, have been introduced in the 1981 Census. The new items are:- class of town, area, number of households, population and growth rate at each census since 1901, density and sex ratio at the 1971, 1981 and 1991 Censuses are also provided in this statement. In 1991 Census, a new item, the name of C.D. Block is also provided in the statement.

Classes of the towns are presented according to 1991 Census population of the towns as follows:

Population	Class
1,00,000 and above	I
50,000 to 99,999	II
20,000 to 49,999	III
10,000 to 19,999	IV
5,000 to 9,999	V
Below 5,000	VI

Location Code Number for Towns

To distinguish the town from the village, the location code numbers for Towns have been given in Roman Numerals and these numbers have been assigned in a continuous order for the district as a whole. In 1991 census, name of C.D.Block has been included with a view to locate the town in the appropriate C.D. Block.

S‘¯ement II. Physical aspects and Location of Towns, 1989

Under physical aspects, annual rainfall and temperature particulars are furnished. These particulars were obtained from the Commissioner of Statistics, TamilNadu, Chennai. If the information is not available for any particular town, the nearest town for which it is available is given. For col (9), nearest city with population of one lakh and more is furnished according to 1991 census. For the other columns, figures obtained from the Municipal Commissioners and Panchayat Union Commissioners are given. The zero within brackets in columns, 10 and 11 denotes that the referent town itself is enjoying road transport facilities. In column 12, name of the navigable river/canal and its distance is indicated as follows : "Cauvery (R)-5". In this case, 5 is the distance in kms., of the navigable river Cauvery from the referent town. In brackets 'R' for river and 'C' for canal have been given.

Statement III : Municipal Finance, 1988-89

The civic administration status of the town, the receipt through tax, properties and powers, Government grants, loans, advances and other sources and the expenditure on general administration, public safety, public health, public works, public institutions and other public services are given in this statement. The soucres of the receipts and expenditure are furnished in terms of rupees in hundreds.

Statement IV : Civic and Other Amenities, 1989

The Civic and other amenities existing in the towns as in 1989 are given. The data were obtained from the Municipal Commissioners and Panchayat Union Commissioners of the Concerned towns.

Column - 3 : Civic administrative status

It is also a new column introduced in this statement in 1981 to facilitate analysis during the 1981 census.

Column - 4: Population : It is also a new column introduced in this statement to measure the amenities in respect of population, based on 1981 census population data.

Column - 5 : Scheduled Caste and Scheduled Tribe population : This coloumn is also introduced in 1981 to know the size of the population of the weaker sections of the community in the towns based on 1991 census.

In this statement, information on road lengh, system of sewerage, number of latrines, method of disposal of night soil, protected water supply (source of supply, system of storage with capacity) and fire fighting service are also collected from the Municipal Commissioners and Panchayat Union Commissioners and furnished.

Electrification

Under this columns (15-19) electrification particulars were obtained from the Tamil Nadu Electricity Board through the Municipal Commissioners and Panchayat Union Commissioners have been furnished below :

i) Domestic connections

This refers to the number of services given to houses for domestic purpose like fans, lighting, etc.,

ii) Industrial connections

This refers to the number of services effected to L.T. (Low Tension) Industries such as workshop, flour mills,, grinding machines, cotton ginning and engineering industries etc.,

iii) Road lighting points

This refers to the number of points of street lights which are maintained by the board and for which consumption charges are paid to the board by respective local bodies. For some panchayats, the number of services effected along has been furnished under street lights and not the points.

iv) Other Connections

This refers to the number of services effected for agricultual purposes, huts, public water supply systems, cottage industries etc.

v) Commercial Connections

This refers to the service given to shops, business houses, public institutions like offices, schools and commercial establishments.

Statement IV - A: Civic and other amenities, in notified slums, 1989

This is a new statement on civic and other amenities in the notified or recognised slums of class I and II towns introduced during 1981 census. Generally in cities or towns having slums, the local authority such as Municipality or Municipal Corporation or even the Development Authority have notified the recognised slums. Such notifications are linked up with the availability of funds from the State Government for slum clearance.

Name of the slum and the details of the area. population,length of the paved roads, system of sewerage,number of different types of latrines and method of disposal of night soil etc. are given in this statement.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1989

In this statement,medical, educational, recreational and cultural facilities of the towns as in 1989 are furnished. Ths data for educational, and medical facilities were obtained from the Municipal Commissioners and Panchayat Union Commissioners for the concerned towns, and from the Director of Secondary Education and Director of Public Health respectively. Under medical facilities, the number of Hospitals/Dispensaries/T.B. clinics etc., and number of beds in medical institutions are furnished.

Under educational facilities, the number of Arts / Science/Commerce colleges, Medical colleges, Engineering Colleges,and Polytechnics obtained from the State Education Departments are furnished.

Column 10 : Recognised shorthand, typewriting and other vocational training institutions.

Particulars were obtained from the District Industries Officers and from the Directorate of Employment and Traning . The term, recognised refers to institutes recognised by some statutory authority like Education Department, Commerce Department, Labour Department etc., of the Government or by semi-Government or autonomous bodies, public sector project etc.,

Column 16: Numbe of working women's hostel with number of seats

This is a new column introduced during the 1981 census. Considering the increase in the employment of women in urban areas, the housing need of working women has been considered as an important subject for study.

The Data presented under column 18 refer only to the permanent cinema theatres and do not include the touring cinemas.

Statement VI : Trade, Commerce, Industry and Banking in 1989

In this statement, Trade, Commerce, Industry and Banking facilities in the town as in 1989 are furnished. Banking particulars were obtained from the Reserve Bank of India. The informations on number of agricultural and non-agricultural credit societies were collected from the Registrar of Cooperative Societies through the Municipal Commissioners and Panchayat Union Commissioners of the concerned towns.

Scope of Primary Census Abstract

The Primary Census Abstract as it is called presents basic data for each village or segment of a village (in cases where such village segments form different panchayats) in the "Village Primary Census Abstract" and for each ward/division of a town in the "Urban Primary Census Abstract". The format of the Primary Census Abstract for the villages and towns in 1991 has been slightly modified as compared to the 1981 Primary Census Abstract.

The Primary Census Abstract gives the details on area, number of occupied residential

houses, number of households, total population, population in the age-group 0-6,number of SC/ST population, literates, total mainworkers, distribution of main workers by 9 industrial categories, marginal workers and non-workers in respect of each unit with male, female breakup. In 1981, the main workers were classified into four categories where as in the 1991 census they are classified into 9 industrial categories as in 1961 and 1971 censuses. For the first time in this Census, the population in the age group 0-6 with sex breakup is presented in PCA in order to arrive at the realistic literacy rate, as all the children below 7 years are treated as illiterates in this census. The urban/village Primary Census Abstract gives this information for each village and each Urban ward. Till 1981 Census, the Primary Census Abstract was presented for each taluk and for each town in a district. But, in the 1991 census, the Primary Cenus Abstract for each CD Block is presented for the first time in the Indian Census. Besides these, separate Primary Census Abstract for Scheduled Castes and Scheduled Tribes which contain similar details as those in the PCA for general population are presented for State/District/Taluk/Commuinty Development Block/UA/City/Town.

With a view to ensure comparability to enable data users to derive the figures for either for a revenue village or Panchayat according to their requirments, the data are presented for segments of villages also, wherever portions of one village happen to be in two or more Panchayats. The segment wise data have to be used separately or added with the data of concerned segment so as to derive panchayat data. For example if portion of a revenue village bearing L.C.No 9 forms two parts of panchayats, the figures are given separately for each portion of the village against L.C.No 9 a/b and 9 b/b. The total figures for the entire revenue village can be arrived at by adding the figures given against both the segments viz. 9 a/b and 9 b/b. given in the village Primary Census Abstract. If, instead, the panchayat figures are required, the data for the concerned village segment or segments relating to the panchayats concerned are to be added up to arrive at the total figures for the respective panchayats. An appendix is presented in the case of the Urban Primary Census Abstract and it gives 1991 population, Scheduled Caste and Scheduled Tribes population for each enumerator block of the town. This may be useful for administrative and election purposes in the urban areas. Such data are also required by urban planners and reserachers for conducting other special studies in selected blocks.

MODE OF PRESENTATION

At the beginning, the District Primary Census Abstract containing data for District and C.D. Block (for Total, Rural, Urban areas) as also towns under each C.D. Block and at the end, all the towns/ U.As; in the district are presented. In 1991 Censue, the C.D. Blocks is the main unit of presentation of data instead of taluk which was the main unit till 1981 Census. The District PCA is followed by alphebetical list of villages for each C.D. Block in the district. This is followed by Village/Urban PCA. In the Village/Urban PCA, data for the first C.D. Block for total, rural and urban areas seperately followed by date for villages and Census towns falling under each CD Block are presented. Thereafter, similar data for second, thrid and subsequenet C.D. Block, in the district are presented. At the end of the last C.D.Block, the Urban PCA containing data at ward level for all the towns and cities besides the data for UAs are presented. In an appendix to the Urban PCA the total population and the population of Scheduled Castes/ Scheduled Tribes for each Enumerators Block of every town in the district are given. After the appendix to Urban PCA, the Talukwise PCA containing data for the District and each taluk in the district with Total, Rural and Urban breakup is presented, as such data are also sought after. This is followed by two annexures. Annexe-I contains Details of Community Development Blocks failing under each taluk and Annexe - II contains names of the villages / segment of villages constituting each town in the district.

Maps.

Apart from the District Map, given as frontispiece, maps for each taluks showing the villages, Location Code numbers and their boundaries are presented. The boundaries of the C.D. Blocks falling in the taluks are also shown. As compard with the maps presented in 1971 and 1981 District Census Handbook, some improvements have been effected in the maps presented in this volume. All towns are shown with shading screens and also spheres according to the population size of towns in the district and taluk maps.

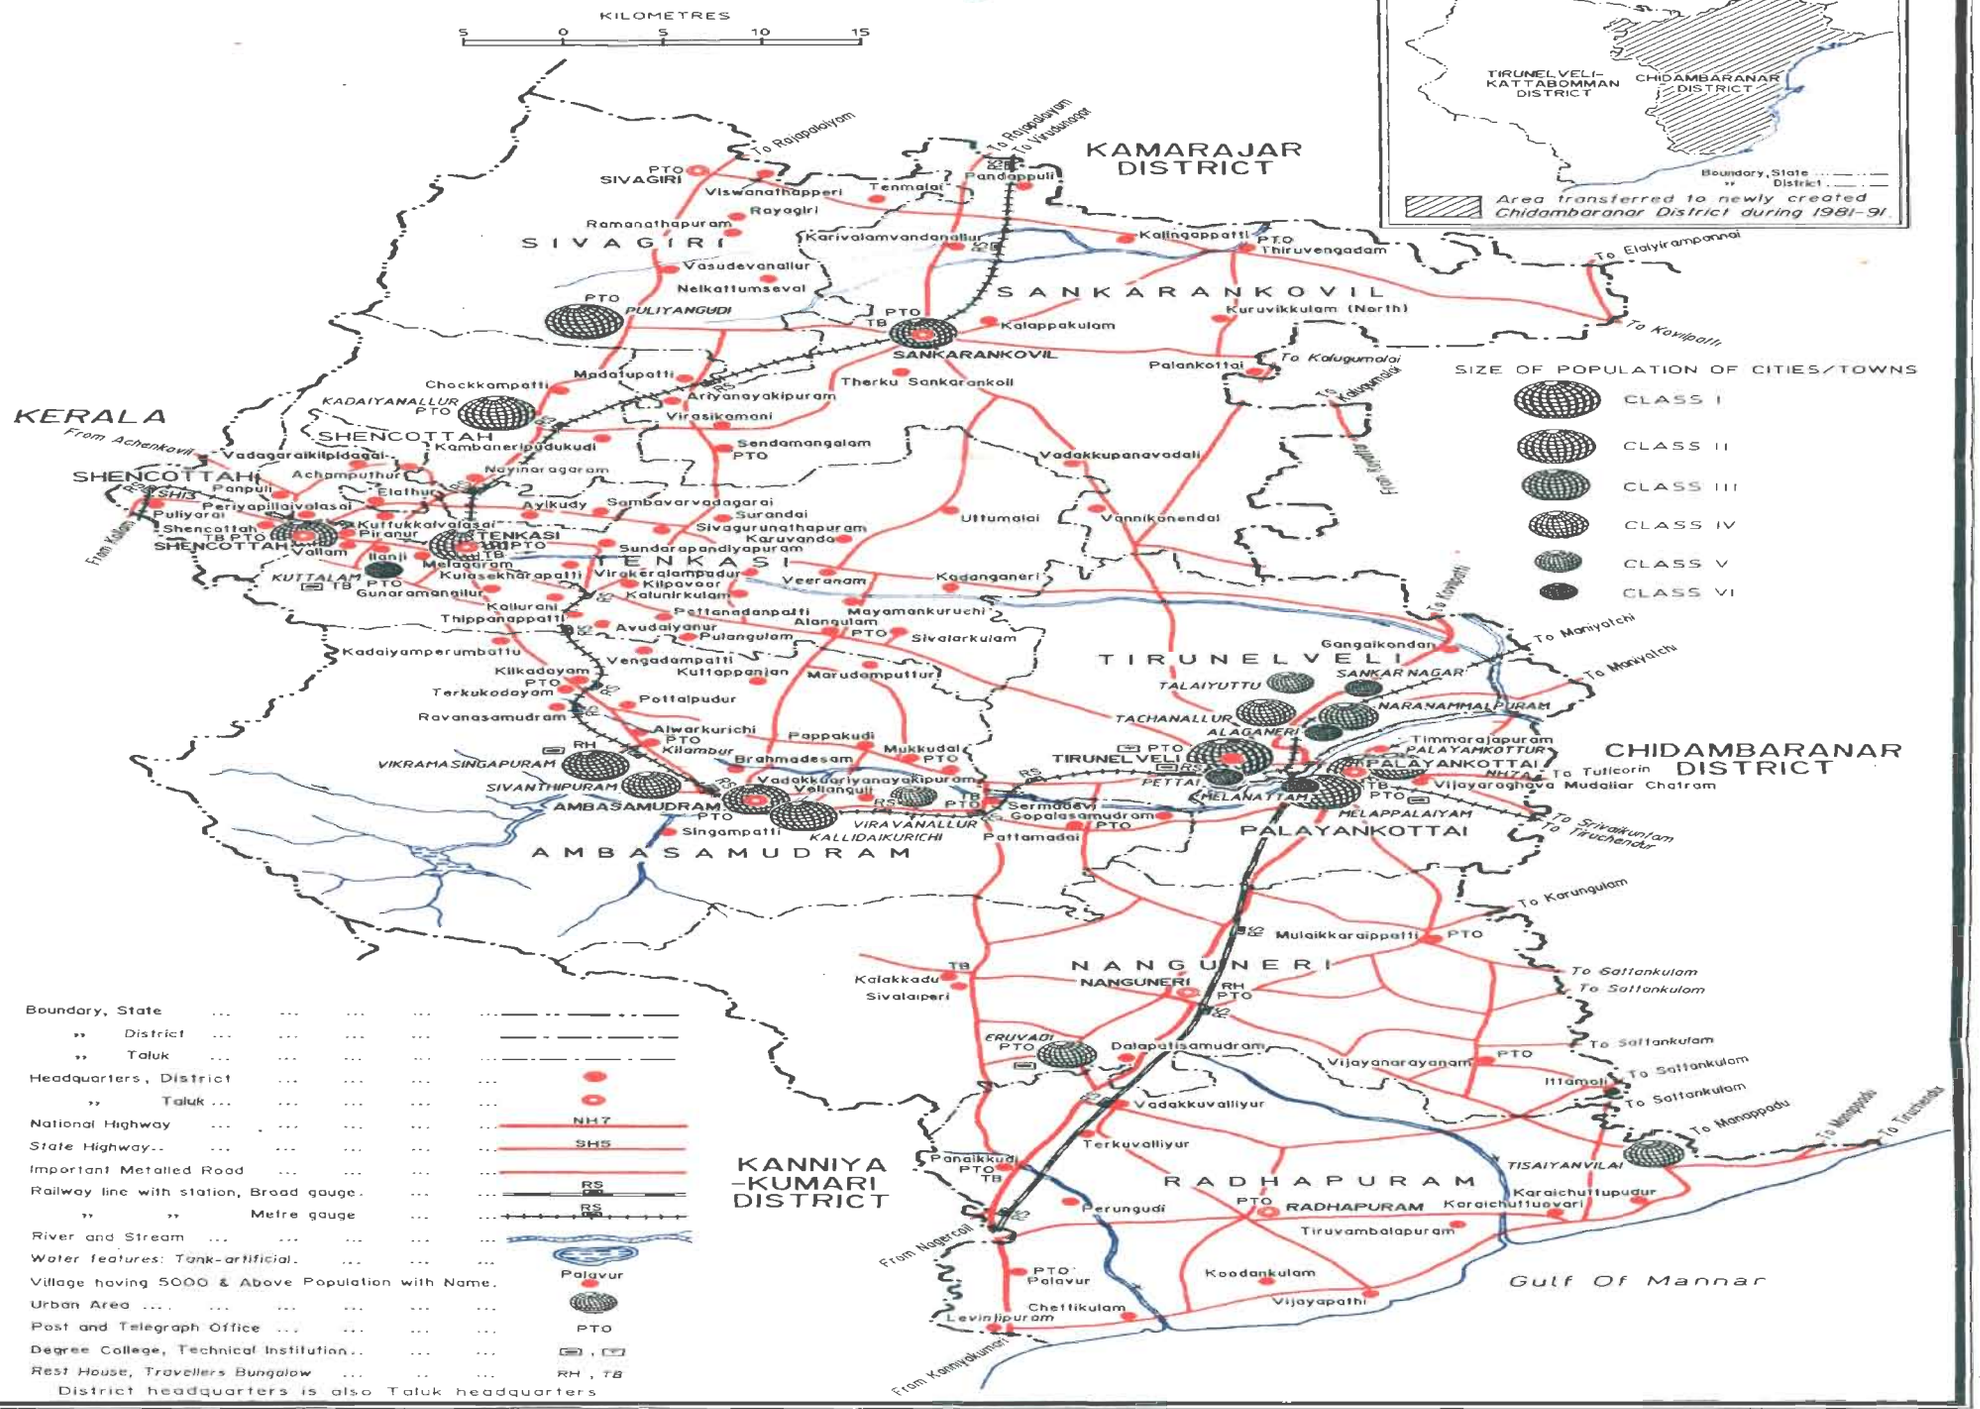

Area Figures

In the District Primary Census Abstract, the area figures are given in square kilometers for total, rural and urban areas. In the village Primary Census Abstract, the area figures for each revenue village are given in hectares upto two decimals. The area figures for each town is given in Sq. Km in the Urban Primary Census Abstract. In the District Primary Census Abstract the area figures of the district total represent the "Geographical Area" figures supplied by the Surveyor General of India. Figures for urban areas and villages are those supplied by the local bodies and revenue authorities respectively. The total of the urban area of the district has been arrived at by adding the urban area figures of each town within the district. Area figures for the rural areas of district are derived by subtracting the urban area figures from the total area of the district. The area figures of each C.D. Block represent the area figures that are published in the concerned departmental publication of the State Government. The area figures of the C.D. Blocks will not added up to the district area figures because, the C.D. Block area figures represent the "Land Use" area, while those of the district represent "Geographical Area". supplied by the surveyor General of India. The total of the village areas given in the village/Urban Primary Census Abstract may not tally with the rural area of the C.D. Block given, as the C.D. Block area figures include hills, forests, rivers etc., whereas the village area may not include the same. One Sq.km is equal to 100 hectares.

It is hoped that the pattern of presentation of basic census particulars for each district as explained above and adopted in this volume would be found convenient by data users.

TAMIL NADU

TIRUNELVELI-KATTABOMMAN DISTRICT

Based upon Survey of India map with the permission of the Surveyor General of India.
The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line

TIRUNELVELI KATTABOMMAN DISTRICT - AN OUT LINE

History Of District

The name "Tirunelveli" takes its derivation from the three Tamil words i.e.,"Thiru - Nel - Veli" i.e "Sacred Paddy Hedge". The name is derived after the story in which Vedasharma, a devotee of Lord Shiva to receive his blessings. Daily offerings of paddy was made by Vedasharma. Once famine occurred and no paddy could be secured by him. After a long search he was able to get a handful of grain which he deposited at the bank of the river before going for his ritual bath. While taking bath, terrible storm broke out and rain started. Vedasharma rushed to the spot where he kept his paddy and to his astonishment, a relief, he found that a hedge had been formed around the grain which protected it from the rain water. The paddy was shining in the sun light while it was raining around. With this miracle, "Tirunelveli" acquired its name.

Tirunelveli District was bifurcated into Tirunelveli-Kattabomman and Chidambaranar districts on 20-10-1986 as per the G.O. Ms. No. 1314 dated 27-9-1986. The new district carved out from the erstwhile Tirunelveli District was named as "Tirunelveli Kattabomman" in the memory of the Poligar Kattabomman of Panchalam Kurichi who first raised the banner of revolt against the British Rule.

The river Tambraparani which flows over the land makes the delta very fertile. The main cultivated crops of this district is paddy. In some of the areas, sugarcane and plantain are being raised. Though the main occupation of the people is cultivation, in recent years, industries are also coming up. M/s. India Cements of Talayuthu, Co-operative Spinning Mills at Pettai near Tirunelveli and other Spinning Mills in Ambasamudram and Vikramasingapuram, the Sun Paper Mill at Cheranmahadevi, Tharani Sugars at Vasudevanallur are few large scale industries in the district.

Further, the Skylark Naval Project, Liquid Propulsion Scheme Centre at Konalkinar are also located in this district. The Atomic Power Plant at Koodankulam is in progress.

There exist many interesting places in this district such as Courtallam, famous for its waterfalls and as a health resort. The large ancient temple of Tirunelveli, Sankarankovil etc., with its beautiful sculptures also exist besides the historical place of Palayankottai.

This is the only district having all types of lands described by Tamil poets in ancient Tamil Literature. In the two stanzas mentioned below, the scholars have divided the land surface in five varieties.

1. Kurinji	- Hills	-	Some parts of Tenkasi and Ambasamudram Taluks
2. Palai	- Desert	-	Some parts of Radhapuram Taluk
3. Mullai	- Forest	-	Shencottai Taluk
4. Marutham	- Field	-	Tirunelveli and Ambasamudram Taluk
5. Neithal	- Seashore	-	Radhapuram Taluk.

The history of this district is bound up with that of Pandyas just like Madurai and Ramanathapuram areas. Even earlier, a pre-historic race is said to have occupied in this land.

No authentic data about the areas of this district is available upto 500 A.D. except that some notes of foreign writers indicates the life of the people in those times. From the writings of Magasthenes, the Greek Ambassador and other foreign travellers it is seen that Pandian Kingdom was in a prosperous condition during that period. The Pandiya King Nedunchezhian who ruled around 210 A.D. was a famous ruler. The Pandyan rule continued till the end of the 15th century with short spells under Chola and Mohammedan regimes. In 1063 A.D. the Tirunelveli territory was conquered by Rajendra Chola who held it under his power for a short period and after

the Chola rule the area passed on to the Mohammedans who kept it under their authority till 1365 A.D. The Pandya Ruler Deva was helped by the Vijay Nagar Kings by 1520 A.D. The Pandyan dynasty was ousted by the Nayaks of Vijaya Nagar. The Nayaks ruled Tirunelveli areas from Madurai as their capital during the 16th - 17th and early part of the 18th centuries. The irrigation system found in the district owes its allegiance to the admirable Nayak rulers. Nagama Nayak and his son Viswanatha Nayak were important rulers. Rani Mangammal ruled over this area from 1689 to 1704 AD as representative of Vijaya Nagar Kings. The last ruler of the Nayaks died in 1731 AD and after that the area fell into the hands of the Mohammedans whose power lasted till 1805 A.D. During the Nayaks rule, Poligars or feudal chiefs were well established and had firm foundation of their power.

With the fall of Nayaks, the territory passed on to the hands of Carnatic Nawabs in 1736 A.D., Mohamed Ali and Chanda Sahib were the claimants to the throne of Carnatic in which were included the territories of Madurai and Tirunelveli. The British supported Mohamed Ali while the French allied with Chanda Sahib giving rise to a series of conflicts in this part of the country. The British having been pre-occupied with Tippu Sultan of Mysore, the Poligars in the South rose in rebellion against the Nawab of Carnatic and caused lot of disturbance.

The Poligars at that time numbered thirty two in Tirunelveli area. Each had a strong fort and a body of armed retainers. They were chiefs under the Vijayanagar rulers. After the fall of Vijayanagar empire, members of the Royal family quarrelled with each other. Though the authority of the Nawabs was acknowledged, they evaded payment of tribute and rebelled. Kattabomma Nayakan of Panchalamkurichchi was the foremost among the rebel Poligars. He stood up against foreign domination. The Poligars of Nagalapuram, Gollarpatti, Elayirampannai, Kadalgudi, Kulathur and Puli Devar of Avudayapuram joined hands with Katta Bommanayakan. The English had the support of the poligars of Ettayapuram, Uthumalai, Chokkampatti, Thalavan kottai, Maniyachi and Melmandi. Major Bannerman attacked the Fort at Panchalamkurichchi in 1799, against the stiff resistance of Katta Bomman. Katta Bomman escaped but was later caught by Tondaiman, Raja of Pudukottai and handed over to the British who hanged him at Kayatar. The wealth of the rebel Poligars was distributed among the Poligars who supported the British. Two brothers of the Poligar of Panchalamkurichchi who were kept in jail started a second revolt and fought with the British along with Marudhu brothers of Sivaganga at Kalayarkoil in 1801. The revolt failed and they were caught and hanged.

During the latter half of the 18th century, the East India Company was frequently at war with the Poligars on behalf of the Carnatic Nawab in Tirunelveli and Madurai. With the fall of Tippu in 1799, British concentrated their force in the South and suppressed the Poligars. By that time the Nawab of Carnatic became powerless and left the management of the territory to the British. The Nawab was pensioned off and the management of the revenues of Tirunelveli was made over to the British in 1801 under a treaty. Thus the British rule started which lasted till 1947. Before the establishment of Britishrule, the Portuguese and Dutch had occupied Tuticorin and other port areas. After the British Rule began in 1801, "Swaraj" movement was started and a number of prominent persons of this district fought against the British and clamoured for Independence of the country.

The district lies in the southern part of the Indian sub-continent. For Revenue Administration the district is divided into 3 Revenue Divisions as indicated below :-

Sl. No	Revenue Division	Taluks comprised in the Revenue Division
1	Tirunelveli	1Tirunelveli 2 Palayankottai 3. Sankarankovil
2	Cheranmahadevi	1. Ambasamudram 2. Nanguneri 3. Radhapuram
3.	Tenkasi	1. Tenkasi 2. Shencottaih 3. Sivagiri

This district is divided into 11 assembly constituencies and 4 Parliamentary constituencies. A part of Chidambarnar District is included in Tirunelveli parliamentary constituency and a part of Tirunelveli Kattabomman District is included in the Sivakasi parliamentary constituency.

The district comprises 8 Municipalities, 9 Taluks, 19 C.D. Blocks, 24 Census towns and 553 Villages.

This district is having a Geographical area of 6810 Sq.kms. There are 573, 747 occupied residential houses. The population of the district as per 1991 Census is 2,501, 832 comprising 1,229, 902 males and 1,271,930 females. Out of this population 1,708,656 (68.30 percent) live in rural areas and 793,176 (31.70 per cent) live in urban areas. Out of 553 villages, 37 are un-inhabited villages. The density of population as per 1991 Census is 367.

Jurisdictional changes during 1981-1991

Kovilpatti, Vilathikulam, Ottapidaram, Tuticorin, Srivaikuntam, Tiruchchendur and Sattankulam taluks of Tirunelveli District were transferred to newly formed Chidambaranar District. 41 Villages and one town were transferred from Nanguneri taluk to newly formed Radhapuram taluk as per G.O. Ms.No.1571, Dt : 13.7.81. 51 villages and four towns were transferred from Tirunelveli taluk to newly formed Palayankottai taluk as per G.O. Ms.No.3248, Dt : 23.12.81. Sivagiri sub-taluk was upgraded into full fledged taluk as per G.O Ms.No 3248, Dt: 23.12.81

Physical Features

The district is bounded on the North by Kamarajar District ; on the West Tiruvananthapuram District of Kerala; on the East by Chidambaranar District, and on the South by Kanniyakumari District and Gulf of Mannar. The West hills of the Western Ghats with an elevation of 1,000 to 2,000 Mts. form the dominant boundary on the west.The river Tambraparani has its origin in the Western ghats and traversing through this district enters the sea at Punnakayal in Chidambaranar District. The lands on both sides of the river are very fertile and best suited for paddy cultivation. In the north and north-east, the soil of the land is black which is most suitable for raising cotton, cholam and cumbu.

Hills

The prominent hills are part of the western ghats and form the boundary between Kerala and this district on the Western side of Tamil Nadu. The western ghats run to a length of about 160 km, in the district starting from the north-western part in Sankarankovil taluk and ending at about 15Km. from Kanniyakumari. Valuable trees are found in the western ghats. The western ghats lie on the western part of Sankarankovil, Tenkasi and Ambasamudram taluks. Nearer the border of Tenkasi and Ambasamudram taluks, the ghats wider forming, undulating hills, broad valleys and extensive plateaus. The height of the hills diminishes considerably near Shencottaih and permits communication by road and rail to places in Kerala through the Shencottah pass. Besides this, a portion of the ranges lies on the southern part of Ambasamudram taluk and in the western and southern portion of Nanguneri taluk, it diminishes in height at Aramboly permitting road communication with Kanniyakumari. On the hills of western ghats there are valuable trees which are being exploited for commercial purposes. The conspicuous among the hills are Kalfakadai Mottai (5,721 ft.) above Sivagiri, Kottaimalai (6,335 ft) over Puliangudi and Kuliratti (5,876 ft.) near Kadayanallur and Krishnapuram. Tambraparani river rises in the Agasthiya Malai (Pothigai Hills) of the western ghats and descends to the plains at Papanasam, in Ambasamudram taluk. Agasthiya Malai is at a height of 6,132 ft. and it is considered to be the seat of Saint Agasthiyar.

The important peaks in this region are as follows ;

Agastiar Peak	-	1,967 Meters
Indalai Pothigai	-	1,826 Meters
Naga Pothigai	-	1,659 Meters

Rivers

Tambraparani originates in Agasthya Malai of the Western Ghats. It flows through Ambasamudram and

Tirunelveli and joins the sea at Punnakayal in Srivaikuntam Taluk of Chidambaranar District. The river never dries up as it gets sufficient rainwater from both South-West and North-East monsoons. The river drains a considerable extent of mountain, before entering the plains. The river forms the waterfalls at Banathirtham which looks magnificient. Tambraparani joins with Pambar at the foot of the hills. At Papanasam, it has another fall known as Kalyanathirtham fall. A dam was constructed across the river at Papanasam for regulating the supply of water for generation of electric power and for irrigation.

The river Tambraparani has its origin in this district and its chief tributaries are Pambayar, Peyyar, Ultar Pambar, Koriyar and Servaiyar.Pambar rises in Naga Pothigai near Pothigai Malai and joins in Tambraparani after running for about 10 Kms in a north-east direction. Pambar and Servaiyar were well fed tributaries of Tambraparani. In the pins, Manimuthar is the first tributory to join Tambraparani. It joins about 3 Kms. west of Kallidaikurichchi above the Kannadian Anaicut. Manimuthar gets the water from Varattar and Kusanmathi river. A dam has been constructed in Manimuthar for irrigation purposes. The river Kariyar flows on the southern part of Ambasamudaram taluk and joins the Kanadian channel branching off from Tamabraparani. Chittar, Jambunadhi, Gatanadhi and Pachaiyar are the other important rivers of this district.

Chittar rising from the Courtallam hills flows through Tenkasi and Tirunlevli and joins Tambraparani at Sivalaperi in Tirunelveli taluk after running a distance of 60km.

Jambunadhi rises in Kuliratti hills on the borders of Tenkasi and Ambasamudram taluks. It joins in the Ramananadhi and came to be known as Varahanadhi. Small anaicuts are constructed on these rivers.Gadanadhi originates in Sivasailam hills in Ambasamudram taluk, joins Varahanadhi at Pappankulam and finally joins Tambraparani at Tiruppudaimarudhur.

The Pachaiyar which rises in the eastern slopes of Vellimalai of the Western ghats joins with the Palaiyam Channel and flows in Nanguneri taluk. Besides this Pachaiyar, Karumanyar, Kilamanimuthar, Nambiyar and Hanumanadhi are also flowing in Nanguneri taluk. The Nambiyar rises in Mahendragiri slopes of the Western Ghats and falls into the sea. Tamarayar, Kombayar and Kodamadiyar are the tributaries.

The small rivers Vadamalayar, Kotamalayar, Nikshepanadhi and the Palayar exists in Sankarankovil taluk. The rivers join with Vaippar and flows through Kovilpatti taluk of Chidambaranar District.

Forest

The extent of forest area in Tirunelveli Kattabomman District is 124,321 hectares including the Kalakad-Mundanthurai, Tiger reserve area. This accounts for 18% of the total geographical area of the district. The forest areas are mostly in the ghat region in the west of the district. The ghat regions are under the influence of the south-west monsoon and have thick forests. The forests are of light deciduous growth in the lower slopes and dense masses of short trees form an elevation of 1,000' to 3,000' Above 3,000' evergreen forest with very tall trees are found. Teakwood, blackwood, rosewood etc., are the most important among them. The important forest products of Tirunelveli division are honey, wax, mango, cashew, palmyrah, cane, pepper, tamarind, bamboo etc.,

Flora and Fauna

The variety of flora and fauna on the Western ghat regions of this district are found fairly rich. But the varieties of Kerala and the eastern coast are found missing. The forests are thick as the ghat regions get good rains by the south-west monsoon. In the lower parts, the forests are of light deciduous type. The dense masses of short trees with bare grass hills are found above 1,000 feet elevation. In the higher elevation; the trees grows very tall. The valuable timber trees of fine quality are found at the base of these hills. Teakwood, blackwood, rosewood, etc., are also important.

One can notice the changes of flora while going towards the east coast. In the dry tracts vegetations of

shrub nature and stunted growth are to be seen. Udai trees (Acacia Plant forms) are commonly seen along with palmyrah trees in the coastal parts. In the southern part of Nanguneri (plenty of palmyrah trees grow) Tamarind, Puvarasu and Neem are the other important avenue trees. A large number of orchards and herbal trees can be seen in Courtalam area.

Shencottah region contains valuable timber trees and fruit gardens. In the irrigated areas, fruit rearing trees,such as mango, plantain and coconut are seen.

Like flora, fauna is also rich in this district. The thick woods on the hills of the western ghat are the abode of wild animals. Tigers are common in these forests. Bisons can be seen in Ambasamudram, Tenkasi and in some parts of Sankarankovil taluks. Besides this, bears are found in the thickly wooden forests in the extreme west. In Courtallam region, there are large number of Ibex and Sambhurs are also common. The black duck are known as the Indian Antelope are found in forests of Vallanad and Gangaikondan. In the jungles and forests some other wild animals such as Jackals, Langurs etc., are also found.

Crows , Green parrots, Grey Pelicans and other birds of ordinary variety are common here. The imperial green birds and great horn bulls are the two special types seen in the forest of the western ghats. The same species migrating from Sri Lanka can be seen from the plains. Of late Koodangulam in Nanguneri taluk is becoming a bird sanctuary attracting rare species of foreign birds. In the hilly tracts and black soil regions, poisonous snakes are found. Fishes and sea wood forests etc., are of interest to lovers of nature.

Climate and Rainfall

The maximum temperature does not exceed 107 degree F. or 42 degree Celcius (April 89) and the minimum temperature seldom falls below 23 degree C (November '89). The months of April and May are the hottest months. Lowest temperature is recorded in the month of December and January. From the beginning of February the temperature starts rising and continues to rise in the month of March, April and May.towards the middle of June, the South-West monsoon sets in . Monsoon winds blow west to east with moistures and rain sweep the hilly areas and at the foot of the ghats. These winds bring rain to the eastern side of the range, and the ghat regions experience heavy rainfall. The climate in these places is cool and attractive. The peak season in Courtallam is from June to August. By July - August winds with greater velocity and carrying sand start blowing and cause damage in the red sand soil tracts. With the onset of the north-east monsoon by October-November, the temperature takes a downward trend and this region experiences a fair climate accompanied by showers.

The normal rain fall of the district is 814.8 mm. The rain fall varies from year to year depending upon the monsoon. The rainfall in the hilly tracts on the west and south-west is above 1,000mm. This covers the taluks of Shencottah, Ambasamudram, Nanguneri and a few parts of Tenkasi.

The district gets rain by both south-west and north -east monsoons. The annual rainfall during the years 1987 to 1990 are 714.6 cm, 574.6 cm, 547.6cm and 622.6 cm respectively.

The highest rainfall is 2,716 cm during September 1987, 1,824.4mm In December 1987, 1,506 mm during April, 1988, 1,385.3 in November 1988, 1,558 mm in November 1989, 2,833mm. in October, 1990 and 2 124.9mm in November 1990. This indicates the vagories of the rainfall in the district.

The lowest rainfall is recorded as 141.8mm, in June 1987, 1mm in January, 1988 and no rainfall in Feburary, 1989 and 67.8 in July, 1990. It may be seen that except in the north-east monsoon period in all other season, the rainfall is comparatively less than the normal rainfall.

Land and Land Use

The fertile soils are found lying scattered in this district. The red soil variety which is less fertile is found in most of the regions. The black soil of the north-

ern part of the district are much suited for growing of cotton. The coastal areas of Radhapuram taluk covers sandy soil.

The following table shows the land used for various purposes during 1990-91.

	(in hectares)
1. Geographical area	681,637
2. Forests	124,321
3. Barren and uncultivable land	25,404
4. Non-Agricultural use	95,465
5. Cultivable waste	39,513
6. Permanent pastures and other grazing lands	12,636
7. Land under miscellaneous tree crops and groves not included in the wet area sown	10,688
8. Current fallows	112,141
9. Other fallow lands	101,220
10. Net area sown	160,249

The net area sown is 23% which shows a downward trend from 1981,-due to the fact that most of the cultivable area in Chidambaranar District after bifurcation, and also the forest areas. The area under forest is 17.89% of the total area of the district. The area under cultivable waste is 5.8% which can be reclaimed for cultivation.

Irrigation and Agriculture

The major Reservoirs and Ayacut in this district are as follows :

Sl.No.	Name of the Reservoir	Full Reservoir level	
		(in feet)	Ayacut
1.	Papanasam	143	32,429
2.	Manimuthar	118	9,252
3.	Gadana Nadhi	85	3,656
4.	Ramananadhi	84	1,066
5.	Karuppanadhi	72.2	3,823
6.	Guntar	36	454

Paddy is the main crop in this district. Cumbu, Cholam, Kuthiraivali, are also being raised in the dry pockets of Sivagiri and Sankarankoil taluks. Cotton is cultivated in Sankarankoil. Sugarcane is being raised in Sivagiri taluk. Banana and vegetables are grown in the river belt areas of Ambasamudram, Tenkasi and Tirunelveli taluks. For irrigation water is released from Manimuthar main canal and Papanasam reservoir. There is a farmer's training centre at Palayamkottai run with the aid of Danish International Development Agency. There is one Agricultural School at Killikulam and two parasite breeding centres for coconut at Tenkasi and Udankudi.

Animal Husbandry

The cattle wealth in this district during 1991 are as follows

1.	Cows	-	347,797
2.	Buffaloes	-	193,322
3.	Sheep	-	519,801
4.	Goats	-	173,834
5.	Poultry	-	203,285
6.	Others (Horse, dog, pig)	-	13,115

The following are the Veterinary institutions in the district in 1991

1.	Veterinary Hospital	-	4
2.	Veterinary Dispensaries	-	36
3.	Key village Centre	-	5
4.	Sub Centres	-	50
5.	Insemination Centre	-	1
6.	Mobile Veterinary Dispensary (unit)	-	1
7.	Poultry Development unit	-	2
8.	Regional Artifical Insemination Centre	-	1
9.	Intensive Cattle Development Project	-	1
10.	Rinderpest eradication scheme	-	2
11.	Total Sub Centres	-	75
12.	Rinderpest Vigilance unit	-	1
13.	Rinderpest district squards	-	1

Cattle Breeding and Fodder Development

Previously, Intensive Cattle Development project and key village schemes were engaged in cattle development in limited areas of selected district of the State. Now, the department is undertaking the implementation of World Bank assisted Livestock Development

Programme from the year 1991-92 in the entire State. Due to this, the intensive Cattle Development Projects and key village centres have been recognised into 20 cattle Breeding and Fodder Development units in the State, so that they can exclusively attend to cattle Breeding and Fodder Development work in all the districts.
Thus the department has provided facilities exclusively for cattle/ buffaloes development and Fodder development in all the district

Fisheries

The Regional Assistant Director of Fisheries Department with headquarters at Manimuthar is looking after the Inland Fisheries activities of this district. There are five Reserviors in this district viz., Manimuthar, Gadana, Ramananadhi, Karuppanadhi and Guntar. Fish seeds are stocked in these Reserviors and exploitation is done by the department staff. The three tanks viz., Sreemoolapari, Moolikulam I and II are selected for Rural Fisheries Demonstration Centres to enligthen the public about fish culture.

To fulfil the needs of fish seeds in Tamil Nadu two Fish Seed Farms, are established one at Manimuthar and the other at Gadana. Manimuthur fish seed farm is one of the best farms in the State and it is a major production centre of Fish Seeds. Annually 300 lakhs of fish seeds are produced in this fish farm.

Development Programme

Construction of a National Fish Seeds Farm at a cost of Rs.124 lakhs is in progress at Manimuthar under Western-Ghat For the welfare of Inland Fishermen. 11 Inland Fishermen Co-operation Societies are functioning in this district.

Minerals

The district is covered by gentle topography except in the Western parts where the Western ghats are located, which are known as the Papanasam and Singampatti ranges. Tambraparani, Chittar, and Gandarva Nadhi are the major rivers flowing towards the east and south-eastern areas.

The district comprises two major groups of rocks viz., the Khondalities and the Charnockites with pyrescene granulties and the associated migmatitic rocks. Lime Stones occur within the genesis and are found around Tirunelveli and Ambasamudram. Pink coloured granites, pegmatites and quartz reins are also found to occur within the above mentioned rocks. Tertiary formations consisting of calcareous sand stones and lime stones are also exposed all along the coastal area overlying the Charnockites and genissic rocks particularly around Kudankulam Rocks of basketic composition probably connected with the Deccan trap activity, occur as thin veins and dykes within the genissic rocks around Kudankulam. Quarternary formations consisting of "Theri" sands dunes and beach washings containing heavy minerals also occur along the entire coast.

Limestone is the main mineral of this district and the requirements of M/s.India Cements at Talayuthu with a capacity of 3,000 tonnes per day are met from the crystaline limestone deposit located around Tirunelveli. Large reserves of limestones of the crystaline, sedimentary, corraline and tafaceous types amounting to 59 million tonnes are found in Naguneri , Ambasamudram, Sankarankovil and Tenkasi taluks. The mineral is being utilised mainly for cement manufacturing.

Heavy mineral place sands consisting of limenite and associated minerals occur in Nangunceri taluk of the district. Garnet sands occur widely in Radhapuram taluk Navaladi area where a reserve of 23,000 tonnes has been estimated.

A deposit of graphite containing about 1,350 tonnes occurs near Kurinjankulam, Sankarankovil, but it is not of economic significance. Some minor occurrences have also been recorded near Panagudi, Therkku Kallikulam and Vijayanarayanam in the Nangunceri taluk.

The occurrence of cat's eye chrysoberry used as a gemstone has also been located by the Geology Department of the State at Mudavankulam and Kanakkankulam in Radhapuram taluk.

Industries

Though the main occupation of the people in the district is agriculture, industries are also coming up.

The details of large scale industries as on 90-91 are as follows :

Textile Mills	-	13
Leather Industry	-	2
Cement Factory	-	1
Sugar Factory	-	1

The industries prevalent in this district may be classified under (1) Household Industry (2) Small Scale Industry and (3) Medium and large scale

Beedi rolling, making of safety matches, mat-weaving and processing and manufacturing of palm fibres and articles from palm trees and weaving of handloom textiles are the main household industries and are concentrated in Tenkasi, Ambasamudram and Tirunelveli towns. Safety matches are manufactured mainly in Sankarankovil and Sivagiri taluks. Handloom weaving, beedi rolling and net weaving are prominent in Ambasamudram taluk where plenty of Palmyrah trees grown are famous for the manufacture of articles from palm leaves.

There are about 3,812 Small Scale Industries registered at the end of 1981. 185 Industrial units using power and 7 Industrial units without power have been registered under the Factory Act till 1990-91.

Cement, cotton yarn and textiles are the main items produced by the large scale Industries.

M/s. India Cements Ltd., has two cement plants at Sankar Nagar and Talayuthu. There are 13 Textile mills in this district producing yarn. The first spinning mill under co-operative sector was established in this district during the year 1958 at Pettai near Tirunelveli. Most of the other textile mills are situated in Ambasamudram, Tirunelveli and Nanguneri taluks.

Paper, paperpulp, news print quality paper, craft paper etc., are manufactured by M/s. Sun Paper Mills Ltd., at Ariyanyagipuram. Fire Bricks are manufactured by M/s. Dalmia Ceramic Industries at Tirunelveli. There are 978 rice mills for hulling of paddy. In addition to this, some other industries are manufacturing automobile parts and infrastructural parts for textile industries.

The Government is now encouraging the unemployed youths and others to start industries by providing financial assistance and technical guidance. I.O.B is the leading bank and is acting as the District Co-ordinator between the Banks and the Governmental agencies for the preparation of credit plan for the district, monitoring the smooth implementation of all Government sponsored programmes like Jawahar Velai Vaippu Thittam (JVVT), Intensive Rural Development Programme (IRDP), Massive Agricultural Production Project (MAPP), Tamil Nadu Housing for Adi Dravida Development Corporation (THADCO), etc.,

The annual credit plan for the year 1990-91 is Rs.68.43 crores to be financed by commercial banks. There are 225 bank branches operating in this district including 119 public sector bank branches.

Trade and Commerce

Cattle are exported to Kerala from the western region of the district. The people of this district are also engaged in manufacturing of handicrafts. The fine mats of Pathamadai, toys of Ambasamudram and palm leaf products of the coastal parts are famous which attract the foreigners. Fire works like crackers and safety matches are also manufactured in large scale. The palm leaf products, some varieties of mats, palm jaggery, fish and lungies are exported to foreign countries. The India Cements produces cement on a large scale. More than a dozen chamber of commerce and association of merchant organisations are functioning here which co-ordinate the activities of the merchants and manufacturers. The Atomic power plant at Koodankulam is in progress.

Transport and Communication

The district has adequate communication facilities by road and rail. The length of the National Highways road is 85 Km. and the State Highways is 136km.

The entire district linked by rail route is fed by the following routes.

1. Tirunelveli - Nagercoil - Kanniyakumari
2. Chennai - Tuticorin - Tirunelveli

3. Tirunelveli - Shencottai

4. Virudunagar - Quilon

5. Tirunelveli - Tiruchchendur.

Except Tirunelveli-Nagercoil rail route the other routes are Meter-guage lines. During May, 1985 the Tirunelveli-Tuticorin Broad-gauage line was opened for goods traffic.

The road transport is mainly operated by the State owned Kattabomman Transport Corporation, Nesamani Transport Corporation. Pandiyan Roadways Corporation, Tiruvalluvar Transport Corporaiton and Rani Mangmmal Transport Corporation. Other State Transports are also plying in interstate routes. According to the Regional Transport Authorities 178 routes are operated by Private Operators. For the Town Services 256 rutes are operated by Government owned Corporation and 72 routes are operated by private operaters. 66 routes are operated by private persons in moffussil services.

There is only one postal sub-division at Tirunelveli. The Post and Telegraph facilities available in this district are as follows:

1. Post office with Telegraph facilities	-	49
2. Higher Selection Grade Head Post Offices	-	2
3. Higher Selection Grade Sub-Office	-	1
4. Lower Selection Grade Sub-Office	-	11
5. Time Scale Sub-Office	-	60
6. Extra Departmental Sub-Office	-	9
7. Extra Departmental Branch Office :		
i) Stationery Office	-	162
ii) Mobile Office	-	...

The Telephone facilities available in this District are as follows. :

1. Telephone Exchange	-	60
2. No.of STD Points	-	217
3. Local Public Telephones	-	348
4. Telex working connections	-	65
5. No.of Telex Exchanges		
6. No. of Village Panchayats covered by Telegraph facilities	-	452

STD call facilities are available from almost all the urban areas to other parts of the country.

Electricity

In this district, the Papanasam Hydro-Electric Project and Servalar Hydro-Electric Project are functioning. The distribution to the entire district is 230KVSS.There are 7 distribution divisions in this circle. All the villages except one village i.e., Pazhian Colony in Sivagiri Reserve Forest is electrified. Abour 53,385 power connections are given to agricultural pumpsets.

Education

In this district 65.58% of the population are literates.

The following educational Institutions are functioning in this district.

Primary School	-	1634
Middle School	-	499
Secondary/Matriculation	-	169
Higher Secondary School	-	80

Colleges

Arts & Science Colleges	-	19
Medical Colleges	-	2
Polytechnic	-	2
Engineering College	-	1

To encourage the studies and to render financial assistance to the poor Backward Classes, Scheduled Caste and Scheduled Tribe students, the Central as well as the State Government are sanctioning scholarships.

The details of number of beneficiaries and the amounts spent during 1990-91 are as follows :

Scheduled Castes / Tribes

	No.of beneficiaries	Total amount of Scholarships
Post-Matric	5,508	6,584,652

Pre-Matric	23,498	532,501

Backward Classes :

Post-Matric	12,794	3,703,211
Pre-Matric	18,805	872,086

The Government is also sanctioning merit scholarships to talented youths irrespective of their parents economic status.

Health

The following are the Medical Institutions in this district

1. District Headquarters Hospital	-	1
2. Taluk Hospital	-	5
3. Primary Health Centre	-	30
4. Sub-Centres	-	378
5. City Family Welfare Centre	-	10
Panchayat Union Dispensaries :		
1. Allopathy Dispensary	-	13
2. Ayurvedic Dispensary	-	1
3. Siddha Dispensary	-	17

Other Facilities

Tirunelveli is having an All India Radio Broad Casting station and Televison Broad Casting station. There are 48 permanent, 10 semi-permanent and 42 touring cinema houses(Halls) to exhibit movies as on 1991. The people of this district are lovers of music next to the people of Thanjavur district. This district has produced a number of eminent artists in various fields. The existing Nellai Sangeetha Sabha is one of the oldest institutions promoting Fine Arts. There are many libraries run by local bodies and private institutions.

Places of Tourist Importance

2,831 temples are listed out by the Hindu Religious and Charitable Endowments departments of which 623 are assessed by the department. More than 50% of the temples exist in the taluks of Tirunelveli, Ambasamudram and Tenkasi. Out of the total 2,831 temples, village deities accounts for 1600 temples, Vinayagar 500 and the rest for Murugan, Siva, Vishnu and others. The following are the famous temples.

1. Shri Nellayappar and Gandhimathy Temple	- Tirunelveli
2. Shri Courtallanathasamy Temple	- Kuttalam
3. Shri Tirumalai Kumarasamy Temple	- Panpozhi
4. Shri Sankara narayanasamy Temple	- Sanakaran Koil
5. Shri Kasiviswanathasamy Temple	-Tenkasi
6. Shri Navaneetha Krishnan Temple	- Veerakeralampudur

Sri Nellayappar and Gandhimathy temple of Tirunelveli stands as one of the biggest and famous temple in the State. The other 5 temples are also famous. The annual income of these temples are more than a lakh. There exist many ancient monuments and places of importance in this district.

Kuttalam water falls provides an important tourist attraction and there is a famous health resort. The water falls from a height of 90 metres from top of the hills. The season commences from the month of June and ends in the month of September every year.

During this period, there will be drizzles and a bath in these falls is considered to be very good for health.

The following are the places important for the tourists.

1. Tirunelveli Gandhimathi Temple	-	Sri Nellayappar and History and Sculptures
2. Mundanthurai	-	Tiger Sanctuary
3. Kalakad	-	Wild Life Sanctuary

"Kodai Vizha" - popularly known as "Kodai" is the main and famous festival celebrated by the people of this district. The festival is intended for the propitiation of village deities. The festival commences from the month of "thai (after fifteenth January) and there is no particular day for the celebration of this festival.

Besides the "Car" festival of Nellayappar Gandhimathi temple of Tirunelveli, " Adi Thabasu" festival of Sanakaran Koil attracts a large number of people.

The forest area having an extensive area of 817 Sq. Km. in Ambasamudram taluk is declared as a tiger Reserve Forest by the Government of India which is known as "Kalakad-Mundanthurai Tiger Reserve". This Tiger Reserve Forest is extremely rich and diverse in nature, ranging from wet ever-green forest, mixed deciduous forest, dry Teak forests to thorn forests. In many places, the forests is so lush green and thick and so that the sun's rays could not reach the ground.

The animals found in this Reserve forests are Tiger, Leopard, Jungle Cat, Civet, Hyena, Jackal, Elephant, Guar Sanbar, Mouse Deer, Nilgris Tahr, the lion-tailed monkeys etc. Important Reptailes are Python, King Cobras, Mointer, Lizard etc. Rare species of birds are also found in this forest. The recent Census reveals that there are about 16 tigers, 65 panthors and 56 elephants in this sanctuary.

A fair is a large market usually organised at regular intervals at the same place and season for a short and limited period. This gives an opportunity for participants to exhibit their products and for purchases to select the most suitable commodity at comparatively favourable rates. Such fairs have been conducted in Tamil Nadu from very ancient times. Most of them are adjuncts to the major annual festivals associated with the prominent temples in the State. The articles of merchandise disposed of at these fairs will be the articles required for religious worship, and consumer goods in which the congregation will be interested. Trading is retail in all these cases and the transactions are not of much significance.

Apart from these, the rural and urban areas in the State have been conducting from ancient times, bi-weekly and weekly fairs. The articles sold will be foodgrains, provisions, fruits and vegetables, textiles, household earthenware, toys, minor articles of jewellery, consumer goods, poultry, eggs fish and cattle. These fairs, are very popular both among the producers who find a ready market for disposing off their articles and among the consumers who can select their favourite brand of articles, at fairly competitive rates.

A cattle fair is held twice a year - April and August. in the "Sivalaperi Village" in Nanguneri Taluk for fifteen days on each occasion. This is attended by people from Madurai, Ramanathapuram, Tirunelveli and Coimbatore Districts as well as from Mysore State. Apart from the local breed, Kangeyam cross breed animals and Hallikar animals will be available at this fair, which is associated with the Car festival of the Sudalai Madan temple at Sivalaperi.. 20,000 animals will be assembled here, and those that are not disposed of here are taken to the minor fairs at Alwarthirunagarai,. Tiruchendur etc.,

Some taluks specialise in certain items. Sankarankovil and Kovilpatti revel in goat fairs, Srivaikuntam and Ambasamudram in poultry fairs and Tirunelveli in cart fairs. Unique among all is the daily cattle fair at Sankarankovil taluk.

Tirunelveli District celebrates about 150 festivals in the following taluks, the estimated attendance during these celebration being about 10,00,000 persons.

1. Sankarankovil Taluk
2. Tirunelveli Taluk
3. Shencottah Taluk
4. Ambasamudram Taluk
5. Nanguneri Taluk

Brief Analysis of the villages and Town directory data based on Inset tables

A brief analysis relating to certain population characteristics is made utilising the information collected in the Village and Town directory. A number of tables have been designed for this purpose. The tables are generated at the District and Panchayat Union level for the rural areas and in regard to urban areas, townwise particulars are presented.

Cultivable area = Irrigated + Unirrigated

This table shows the distribution of Inhabited villages according to Land use. The total area of the 516 villages are 580,755.09 hectares of which the percentage of the cultivable area to the total area works out to 45.15 and the irrigated area to the total cultivable area works out to 47.31 respectively. Shencottah, Melaneelithanallur, and Kuruvikulam C.D. Blocks possess the maximum cultivable area to the total area in the district viz., 93.16%, 86.92% and 83.59% respectively. Kalakadu, Radhapuram, Palayankottai and Cheranmahadevi C.D. Blocks have recorded the lowest percentage of 14.95, 26.88, 29.40 and 29.85 respectively. While Ambasamudram and Kalakadu C.D. Blocks have got the highest percentage of 94.59 and91.66 irrigated area to total cultivable area in the district, Kuruvikulam, Melaneelithanallur and Shencottah C.D. Blocks have recorded the lowest percentage of irrigated area to total cultivable area with 21.83, 23.17 and 28.77 respectively

TOWN DIRECTORY

Note explaining the codes used in the Town Directory Statement

Population			Class
1,00,000	and above		I
50,000	-	99,999	II
20,000	-	49,999	III
10,000	-	19,999	IV
5,000	-	9,999	V
Below	5,000		VI

Civic administration status of the town

M.Corp	--	Municipal Corporation/Corporation
M	--	Municipality
TP	--	Town Panchayat
VP	--	Village Panchayat
TC	--	Town Committee / Town area
CB	--	Cantonment Board / Cantonment
SC	--	Scheduled Castes
ST	--	Scheduled Tribes

Type of Road

PR	--	Pucca Road
KR	--	Katcha Road

System of Sewerage

S	--	Sewer
OSD	--	Open Surface Drains
BSD	--	Box Surface Drains
SD	--	Silk Drains
CD	--	Cesspool method
Pt	--	Pit system

Method of disposal of night soil

HL	--	Head Loads
B	--	Baskets
WB	--	Wheel Barrows
ST	--	Septic tank latrines
S	--	Sewerage

System of storage of water

OHT	--	Overhead tank
SR	--	Service reservoir
IG	--	River infiltration gallery
BWP	--	Borewell pumping system
PT	--	Pressure tank

Source of drinking water

TW	--	Tube well water/Hand pump
T	--	Tap water
W	--	Well water
TK	--	Tank water

Medical facilities

H	--	Hospital
D	--	Dispensary
HC	--	Health Centre
FC	--	Family Planning Centre
