FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/ modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Govt./Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third part, Part C of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (ward-wise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this Statement details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Block-level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D.Block level will help the planners in formulation of micro-level developmental plans, as the C.D.Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along with the corresponding codes of 1981.

This publication is a joint venture of the State Govt./UT administration and the Census Organisation. The data have been collected and compiled under the direction of Ms. Sobha Nambisan, Director of Census Operations, Karnataka on behalf of the State Govt. administration which has borne the cost of printing. The task of planning, designing and coordination of the publication was initiated by Dr.K.P.Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M.Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K.Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri A.K.Singh, Deputy Director who was assisted by S/Shri V.K.Jain and Hariram, Investigators and staff. Technical guidance in the preparation of the maps was initially provided by Dr.B.K.Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi
June 11, 1992.

A.R.Nanda
Registrar General, India

PREFACE

In the foreword to the 1991 series of the District Census Handbooks, Sri A.R.Nanda, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain the salient data on the population for every village and town as revealed by the 1991 Census. They also contain a wealth of information regarding these villages and towns which, although not part of the population census, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information has also considerable importance in the context of planned development.

The District Census Handbook is therefore divided into two parts: Part A containing information regarding each village and town (Village Directory and Town Directory) which is not census data and part B which contains the data on the population collected during the 1991 Census - the Primary Census Abstract. The data published in Part B was collected in February 1991 at the time of the population census. This data was then manually tabulated in the Regional Tabulation Offices set up for the purpose. Subsequently, as a part of the countrywide project taken up in collaboration with the National Informatics Centre, the Primary Census Abstract data was computerised. The data for Part B of the District Census Handbook was therefore available on tape for the entire country by November 1992. Since the Primary Census Abstract data was available first on the computer, it was decided to publish the District Census Handbooks in two separate volumes, with Part B appearing in print first.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in early 1990 and continued till the middle of 1992. For operational convenience, the Village Directory format was divided into two portions, one relating to the area and land use particulars and the other relating to the amenities available in each village. The relevant formats were mailed to the Deputy Commissioners of Districts and Chief Secretaries of Zilla Parishads for obtaining the villagewise particulars. Similarly the Town Directory formats were mailed to the Deputy Commissioners and Commissioners of Corporations. The villagewise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1981 District Census Handbooks. The villagewise information, thus finalised was also computerised during 1992-93 at the National Informatics Centre, Bangalore as in the case of Primary Census Abstract.

The National Informatics Centre, Bangalore has undertaken to supply the camera ready copies for the District Census Handbooks and this may enable us to bring out the District Census Handbooks fairly early.

In the preparation of the District Census Handbooks the role of the Census Directorate is that of data collector. For accomplishing this task we have had the ready co-operation of the staff of different departments of the State Government. The cost of printing of the District Census Handbooks is borne by the Government of Karnataka.

I take this opportunity to offer my grateful thanks to all the officers and officials who have been actively involved in the compilation of this volume.

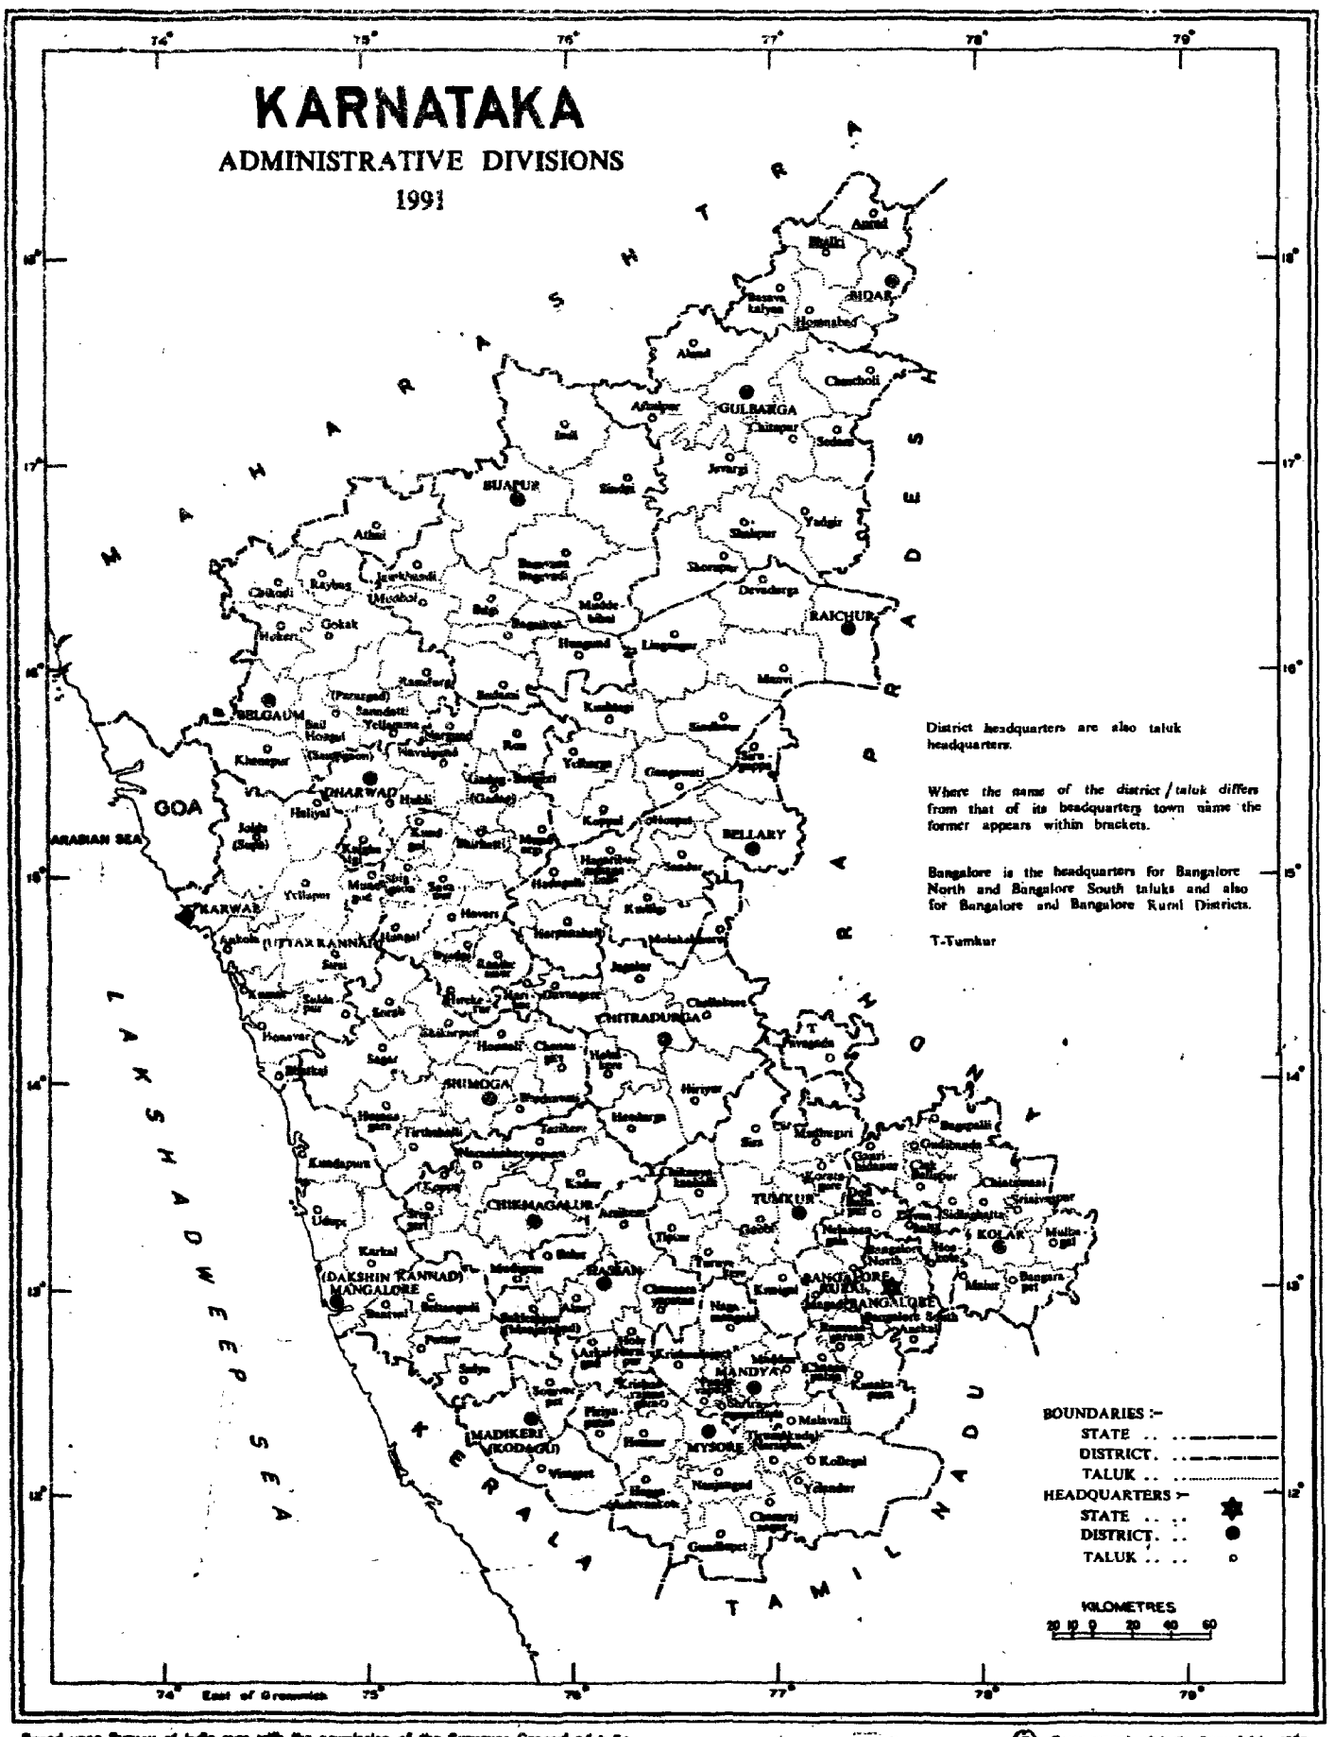

I am thankful to Shri A.Venkateshan, the State Informatics Officer, National Informatics Centre, Bangalore for all the assistance he and his staff members have rendered for computerisation of the data and for preparation of the camera ready copy of the manuscripts of all the Districts.

I am deeply grateful to Shri A.R.Nanda, I.A.S., the Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Shri M.K.Jain, the present Deputy Registrar General (SS) as well as to Mrs. Minati Ghosh, Deputy Registrar General (Map).

Lastly, I am thankful to the Government of Karnataka for having readily agreed to bear the cost of printing these District Census Handbook volumes and to the Director of Printing, Stationery and Publications for the keen interest he has evinced in bringing out these publications.

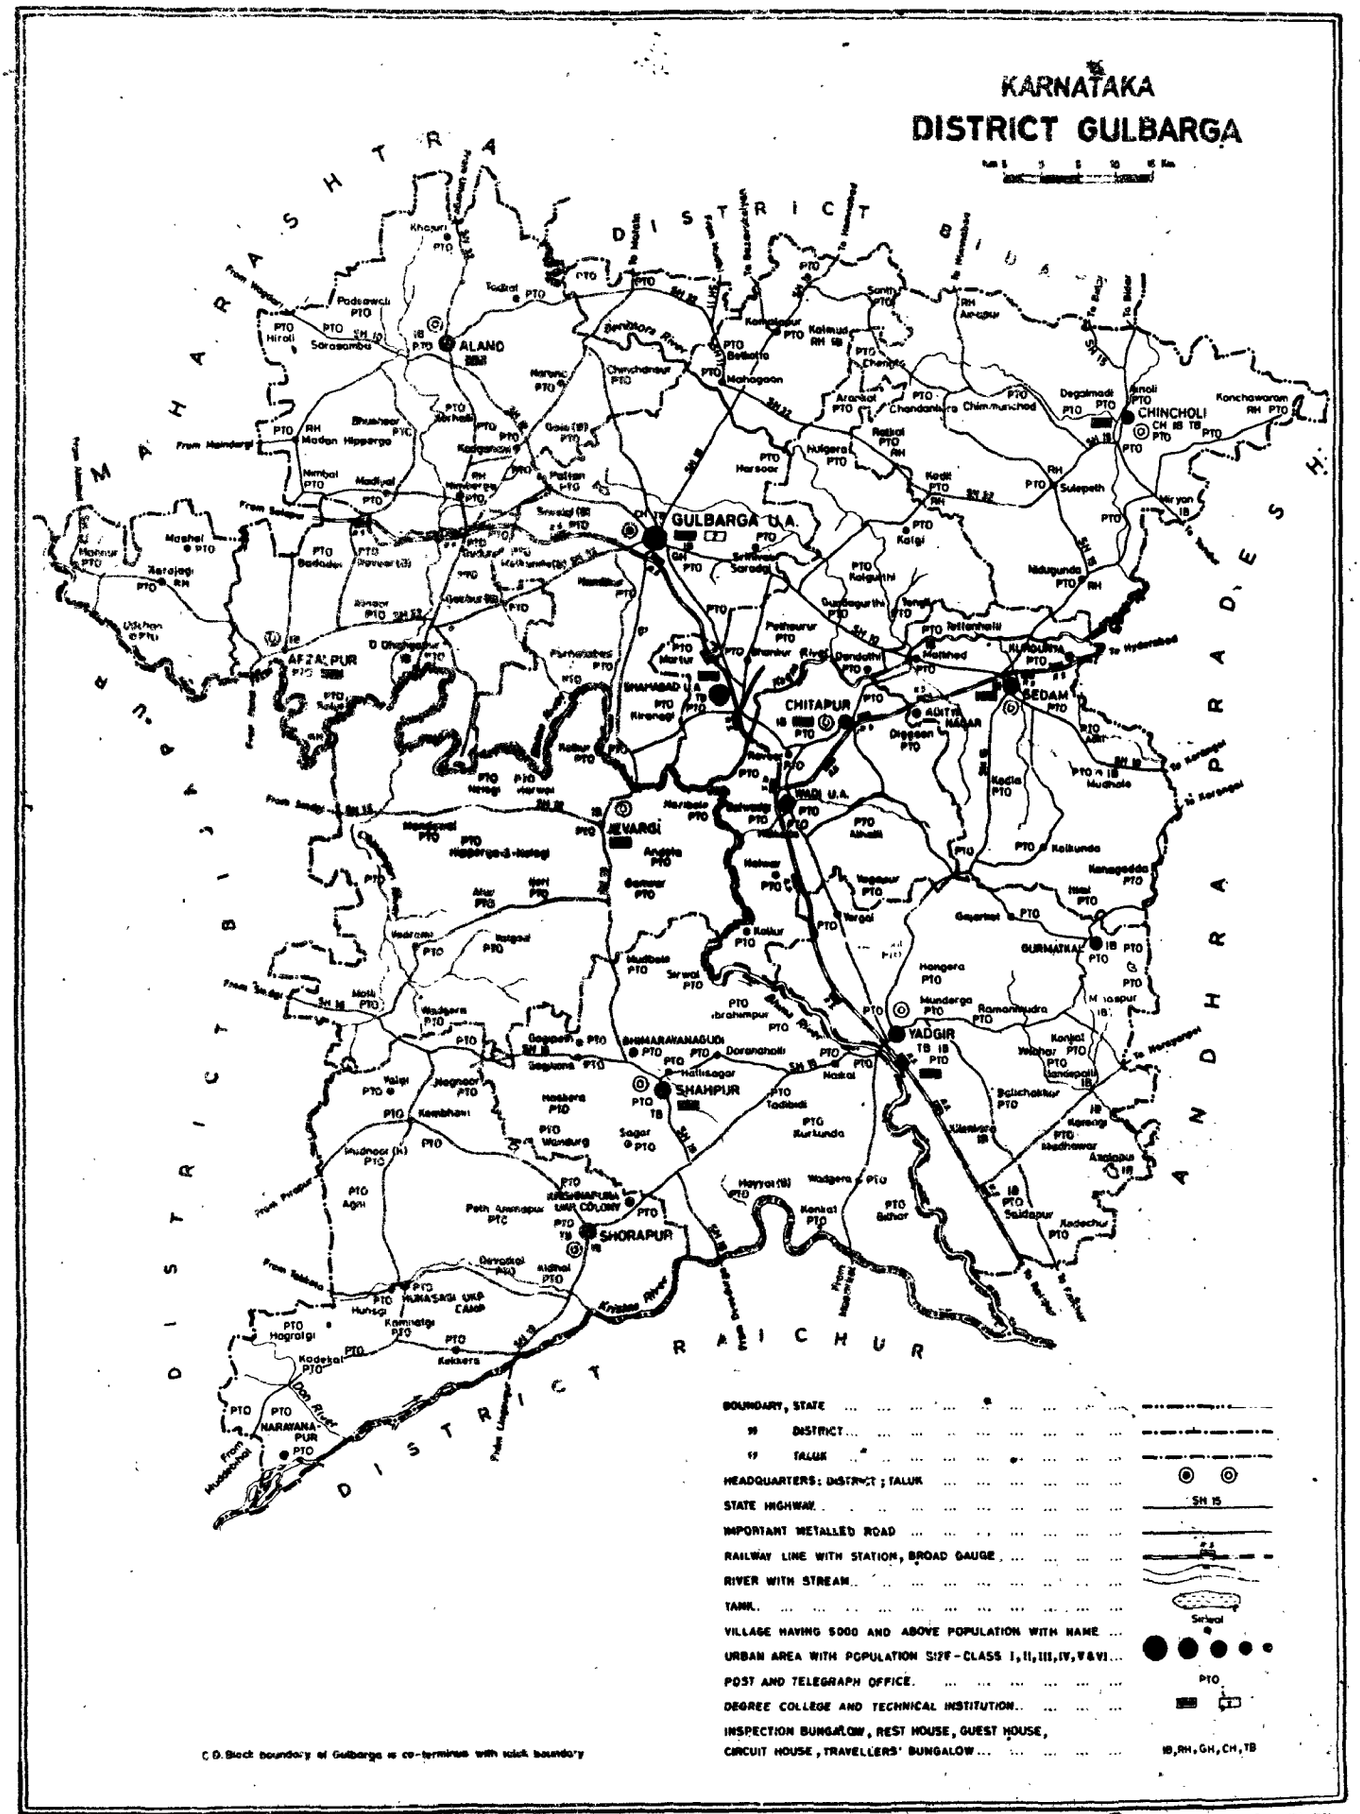

Bangalore,
Date: 16-11-1992

Sobha Nambisan
Director of Census Operations,
Karnataka.

ANALYTICAL NOTE

Brief History of the District Census Handbook :-

The District Census Handbook series was, for the first time, included in the census publication programme at the 1951 census in order to satisfy the growing demand for micro-level data by the administrators, the planners and the other census data users. The District Census Handbooks sought to replace 'Part IV - Taluk Tables' and 'Part V - Village Tables' of the earlier censuses and to present the basic demographic and economic data in the form of 'Primary Census Abstract' in respect of each and every village and town within the jurisdiction of the district concerned. In addition, these volumes were to contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

At the 1961 census, the scope of the District Census Handbook was greatly enlarged by incorporating in it - (i) a descriptive account of the district, (ii) a set of non-census tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban (census enumeration block level) Primary Census Abstract containing the ninefold industrial classification of workers. In a somewhat general way, information on the availability of certain basic amenities in villages and towns, such as the sources of drinking water and educational institutions, was also presented in these volumes. These general guidelines were, by and large, followed in Karnataka too. However, the scope of the District Census Handbooks of 3 out of the then existing 19 districts, namely Bangalore, Dharwar and Mysore, was confined to the publication of the village-wise and urban (census enumeration block wise) Primary Census Abstract only.

The 1971 census witnessed an overall improvement in the matter of compilation as well as presentation of the data. A country-wide uniformity in approach and a comprehensive coverage are the hall marks of this series of publications. In 1971, the District Census Handbook was split up into three portions - (i) Part A - consisting of land use data on villages and also the data on the nature and extent of amenities and services available in the villages and towns of the district - presented in the form of Village Directory and Town Directory respectively, (ii) Part B - consisting of the Primary Census Abstract (including the nine-fold industrial classification of workers) for the district, the taluks, the towns, the villages and the census enumeration blocks in case of towns; and (iii) Part C - consisting of an analytical note based on an analysis of the census data as well as the non-census data included in the volume, a set of tables depicting the administrative statistics in minute detail, a set of statistical tables based on the census data in respect of the district and the constituent taluks and towns thereof besides a set of tables generated on the basis of the villagewise census data in association with the villagewise data on the availability of amenities. The main objective was to present a comprehensive and intelligible portrait of the district and an overview of the developmental programmes implemented in the district during the preceding decade. Publication of the District Census Handbooks was planned in such a way as to minimise the delay inherent in the compilation of a voluminous mass of data gathered from different sources. Accordingly, 'Part A', comprising the Village Directory and the Town Directory for the finalisation of which there was no apparent need to wait till the completion of the tabulation of the data gathered at the census, was to be published first and 'Part B', consisting of the Village/Urban Primary Census Abstract was to be released next. A lower priority was assigned to 'Part C' for the obvious reason that besides administrative statistics it was to include a set of socio - demographic and economic tables generated on the basis of the data gathered at the census and an analytical note prepared thereof. In Karnataka, however, 'Part A' and 'Part B' portions of the District Census Handbooks were combined together and published in a single volume for each district except Bangalore. In the case of Bangalore District, since it was felt that the size of such a combined volume would be unweildy, Part A and Part B were published separately. As regards 'Part C', compilation of data took more time than anticipated and, in addition, there was an inordinate delay in executing the printing job at the State

Directorate of Printing. As a result, only a portion of Part C (depicting some of the census tables) relating to Bangalore District was published somewhat belatedly and the proposal to publish the remaining portion of Part C for Bangalore District as well as the entire portion of Part C for the other districts was finally abandoned.

Instead of witnessing an expansion as in the past two censuses the scope of the 1981 series of the District Census Handbooks was curtailed to a considerable extent in that it was confined to the publication of Village Directory, Town Directory and the Village/Urban Primary Census Abstract. Thus, at the initial stage itself there was no proposal to compile and publish the administrative statistics and the various socio-demographic and economic tables based on the census data, that is, the portion which constituted 'Part C' of the 1971 series. But for this change, the approach in 1981 regarding uniformity and comprehensiveness were very much the same as in 1971. In order to avoid delay in publication, as in the past, the District Census Handbook was proposed to be published in two parts, namely, 'Part A' consisting of the Village Directory and Town Directory and 'Part B' consisting of the Village/Urban Primary Census Abstract besides the Special Primary Census Abstracts at taluk/town level in respect of the Scheduled Castes and Scheduled Tribes population of the district.

At the 1981 census, the contents of the Village Directory and the Town Directory were slightly enlarged and the formats were restructured. In the Village Directory all the amenities except power supply were brought together under a broad heading with the provision that 'in case an amenity is not available in the referent village, the distance to the nearest place where that particular amenity is available may be indicated in broad ranges'. A new item 'approach to the village' was included. In the remarks column, a provision was made to report the number of copies of newspapers in circulation in the village as also the number of motor cars, the number of motor cycles and the number of tractors available in the village. Further, in order to examine whether there is any correlation between the availability of amenities and the population size of a village, an additional column was provided in the Village Directory to indicate the population and number of households. The contents of Part A were further enlarged by including two appendices, namely, a list of villages not having any amenities and a distribution of villages according to the proportions of Scheduled Castes and Scheduled Tribes in the total population of the village. The Town Directory formats were also modified by the addition of a few items such as class of town, population, Scheduled Castes and Scheduled Tribes population, decadal growth rate of population, working women's hostel, adult literacy classes/centres, storage system regarding drinking water supply etc., and also by providing for recording the information about the nearest place (and distance) having educational, medical and fire-fighting facilities in case such a facility is not available in the referent town. As compared to 1971, while one statement indicating religion-wise population of the town was dropped, another statement to provide information about the amenities available in notified slums in Class I and Class II towns was added. As regards the Primary Census Abstract of towns, the urban block-wise presentation of data was given up and details were presented only upto the level of Wards/Divisions. However, information on the number of persons belonging to Scheduled Castes and Scheduled Tribes was furnished for each census enumeration block within the town in the form of an appendix and an annexure thereto provided the description of the boundaries of each census enumeration block. Further, instead of the nine-fold classification of workers adopted at the 1971 census, on this occasion the classification was restricted to 4 categories. In Karnataka, in 1981 also, both Part A and Part B portions of the District Census Handbooks were published together in a single volume for each district. However, because of certain technical compulsions, all the information relating to Scheduled Castes and Scheduled Tribes was excluded from the main formats and was presented separately at the end in the form of a Supplement (separate booklets were brought out in the case of Bidar and Mandya Districts).

2. Scope of the 1991 District Census Handbooks:

As in 1981, in 1991 too, the District Census Handbooks are proposed to be brought out in two portions, namely Part A consisting of the Village Directory and the Town Directory and Part B

consisting of the Village/Urban ward-wise Primary Census Abstract in addition to the District Primary Census Abstract and the Special Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes. Though, the scope of the 1991 series of the District Census Handbooks has, by and large, remained the same as in 1981, a few significant changes have been made in the Village Directory format as well as the Primary Census Abstract format. In Karnataka, unlike at the previous censuses, on this occasion, the 'Part A' and 'Part B' portions of the District Census Handbooks of each district are being brought out in separate volumes.

The manner of presentation of data has also undergone a significant change in that the Village Directory and the Primary Census Abstract data are presented according to the location of villages and towns within the jurisdiction of a Community Development Block rather than their location within a taluk*. In other words, the traditional practice of taluk-level presentation of data has now been givenup in preference to the Community Development Block level presentation of data which is considered as more meaningful in the present day context. Since C.D.Block is the lowest administrative unit for developmental planning, the choice of the C.D. Block as the unit for data presentation is expected to help the planners in formulating micro-level developmental plans. Another innovation at the 1991 census is the arrangements made for the dissemination of the data in collaboration with the National Informatics Centre through its country-wide computer network. In the published volumes of the District Census Handbooks, therefore, the computer codes assigned to the villages in the 1991 census and the corresponding codes in 1981 are presented so as to facilitate the data users who may prefer to use the data either from magnetic tapes or floppies.

(i) Village Directory :

The Village Directory format adopted for the 1991 series has 18 columns. When examined with reference to the 1981 format it will be noticed that two columns have now been left out - while one of these columns refers to the 'staple food' the other refers to the 'remarks' under which, information about the places of religious, historical or archaeological interest in the village as also information about the number of copies of newspapers in circulation, the number of motor cars, motor-bicycles and tractors available in villages was published in 1981. As compared to 1981, there is no change in the scope and coverage of the information presented in the 18 columns of which 8 are devoted for amenities and 6 are meant for indicating the area of the village and the land use pattern. The remaining four columns are meant for indicating the location code and name of the village, total population and the number of households enumerated in the village and the name of the nearest town as also the distance to that town. The aspects covered under the amenities are: educational, medical, sources of drinking water supply, postal and telegraph, weekly market, communication, nature of approach road and power supply. Further, if a village did not have any educational facility at all, instead of merely reporting the fact and stopping at that, an indication of the distance (in ranges) that the villagers have to traverse to reach a place with educational facilities (at the basic level) is reported. The same procedure of reporting is adopted regarding medical facilities, drinking water supply, postal and communication as well as weekly market facilities. The distance ranges adopted for reporting are the same as in 1981, namely -5 km, 5 - 10 km and 10+km. In an explanatory note, which precedes the presentation of the Village Directory Statements, details about the abbreviations used under various columns are furnished.

In Karnataka, the "Taluk Panchayat Samiti" corresponds to the Community Development Block, and for the sake of maintaining uniformity with the all-India pattern, the term C.D.Block has been used throughout in the District Census Handbooks. The jurisdiction of a Taluk Panchayat Samiti is coterminus with that of the corresponding Taluk but excludes the statutory towns.

The main agency which has furnished the villagewise information on amenities is the Zilla Parishad which in turn has collected the relevant particulars through its field formations, namely the Chief Executive Officers (i.e., the Block Development Officers) of the various *Taluk Panchayat Samitis*. These details were examined for consistency as well as with reference to the particulars reported in 1981 and cases of deterioration or of abnormal developments were referred back for reverification and rectification. For instance, as compared to 1981, for several villages, Wells and Tanks did not find a mention as a source of drinking water supply. When referred back, the concerned Chief Executive Officers clarified that in most of these cases, the drinking water wells of yester years have either dried up or fallen into disuse on account of the increasing number of borewells drilled in such villages and also because of the implementation of the National Rural Water Supply Scheme, the Mini-Water Supply Scheme and Accelerated Water Supply Scheme etc. So also regarding the availability of pucca approach road facility several instances of deterioration were noticed. Such cases too were referred back so that the factual data may be verified again and reported for publication. Information about the number of educational institutions, nature of government run medical institutions and postal, phonocom and telegraph facilities as furnished by these officers have been cross-checked with the data obtained from the concerned Departments as well to ensure a higher level of reliability.

In case of uninhabited villages, i.e., villages which returned 'nil' population at the 1991 census count, except the name and the total area no other information is furnished. Instead of putting a dash under each column to indicate this fact, the word 'uninhabited' is printed along the line.

In order to facilitate easy reference, an alphabetical list of villages is given at the begining in respect of each C.D.Block. This list indicates the code numbers assigned to the villages for purposes of census enumeration as well as the computer codes assigned (at the stage of computerisation) as also the corresponding codes according to the 1981 census. At the end of the Village Directory the following appendices are given:- C.D. Block-wise abstract of amenities; list of villages not having any amenities except Drinking Water, land utilisation data in respect of non-municipal towns and distribution of villages according to the proportion of Scheduled Castes population and Scheduled Tribes population.

(ii) Town Directory :

As in 1981, in 1991 too, there are seven statements which furnish information on the following aspects - growth history; physical aspects and locational particulars; municipal finance; civic and other amenities; civic amenities available in the notified slums of Class I and Class II towns; medical, educational, recreational and cultural facilities; and trade, commerce, industry and banking. The scope of the various column headings adopted in 1981 has remained unchanged in 1991. However, in Statement-I, slight modifications have been made to accomodate the 1991 census data - an additional column is provided for indicating the 1991 population and the growth rate registered by the town during the decade 1981-91. In Statement-I an additional column has been provided for indicating the name of the C.D.Block within the jurisdiction of which the referent town is located. It may be incidentally mentioned that, in Karnataka, the civic bodies functioning in the Statutory Towns do not fall within the administrative jurisdiction of the C.D.Blocks (i.e., Taluk Panchayat Samitis).

In the Town Directory statements, the towns are arranged in an alphabetical order of their names and the aggregate particulars about urban agglomerations if any in the district have also been furnished in the same order. Where an urban agglomeration includes two or more independent towns, the names of these constituent towns are shown in the correct sequence as per the alphabetical arrangement of their names. But, the details which ought to have been furnished in the subsequent columns have been skipped with a view to avoiding repetition. Instead, immediately after the name of the town, a cross reference is given by printing the message "see ..... urban agglomeration". The name of the core town of the urban agglomeration too appears at its correct sequence with the legend printed thereafter and immediately below that, i.e., in the next line the same name with the suffix urban agglomeration appears again without bearing any

serial number. Against this name the cumulative totals for the urban agglomeration as a statistical unit are presented wherever such a procedure is relevant and meaningful. This line is then followed by those relating to the constituent towns of the urban agglomeration starting with the name of the core town and followed by the others arranged in an alphabetical order of their names. This procedure, it may be recalled, is the same as that adopted in 1971 as well as in 1981 and this enables one to have a fairly good assessment of the data relating to the smaller civic administrative units that form part of the larger unit and also of the aggregate data relating to the larger unit itself. In case there are 'outgrowths' which are not 'urban areas' in their own right, the particulars relating to such areas are merged with the data relating to the concerned core town. Such towns which have 'outgrowths' are marked out by an asterisk mark and for all purposes, the term 'town' would cover the core town as well as its outgrowths. In an appendix the names of the revenue villages or areas which have been identified as outgrowths and the population thereof are indicated separately. In the case of villages certain parts of which are regarded as outgrowths while the other parts are considered as 'rural', the data relating to the outgrowths (i.e., the urban component) is included in the Town Directory statements and the data pertaining to the rest of the portion retained in the rural frame appears in the Village Directory. In Statements II, III and VI where it is not relevant to combine the data for the urban agglomeration as a whole, the legend 'see the constituent towns' is printed against the name of the urban agglomeration instead of allowing the entire line to remain blank.

The particulars furnished in Statement I which deals with the growth history are entirely based on the current as well as the previous censuses. As such, this has been compiled in the Census Directorate without seeking information from the concerned civic bodies. The details presented in the remaining statements have been furnished mainly by the concerned civic authorities such as the Municipal Commissioners, Chief Officers of towns, Secretaries of Mandal Panchayats, Administrative Officers etc. Except for the information regarding municipal finance, most of the information on other apsects had to be gathered by the civic authorities from several offices and institutions located in the town through correspondence and or by deputing officials for the purpose. The particulars so furnished were scrutinised in the first stage and cases of abnormal variations as compared to the situation in 1980 and also inconsistencies were referred back to the reporting agency for reverification and rectification so as to ensure that the details now given in the Town Directory represent the factual position.

The scope of the information presented under various columns and the abbreviations used are explained in a note which precedes the presentation of the Town Directory statements.

(iii) Primary Census Abstract :

The Primary Census Abstract is presented village-wise in the case of 'rural' areas and town-wise (upto ward or division level) in the case of urban areas. The outgrowths of a town are treated at par with a ward or division of the core town irrespective of the number of census enumeration blocks into which it is constituted. Within the district, the Community Development Blocks are arranged in the alphabetical order of their names in English and covered one after the other in that order. For each C.D.Block, the total figures with the rural-urban break-up is given first and this is followed by the village-wise data and then by the ward-wise data for the towns if any, within the jurisdiction of the C.D.Block. In the case of a village of which only a portion has been incorporated in a town or has been recognised as an outgrowth of a town, the details relating to only that portion which is not so incorporated or so recognised but has been retained in the rural frame is presented under various columns. The names of villages (and their respective areas) which are fully included in urban areas or have been recognised as outgrowths of towns for purposes of the 1991 Census (but are retained in the jurisdictional lists of the Survey and Settlement authorities) if any within the boundaries of the C.D.Block are indicated in the flyleaf which precedes the PCA statement for the C.D.Block

After presenting the PCA data for all the villages and towns covered by the C.D.Blocks in the district.

the PCA data relating to all the urban areas of the district (i.e., statutory as well as non-statutory towns) are furnished. For this purpose, the towns/urban agglomerations are arranged in an ascending order of their location code numbers. And, for each town the ward or division-wise details are presented here.

In Karnataka, as already mentioned, the jurisdiction of a C.D.Block is coterminus with that of the Taluk of the same name, but excludes the areas incorporated in statutory towns and cities. By and large, a C.D.Block corresponds to the rural areas of the taluk. However, if there are any non-municipal census towns and areas which have been identified as outgrowths of statutory towns within the jurisdiction of the taluk, then such towns and outgrowths are also regarded as lying within the jurisdiction of the concerned C.D.Block. The PCA particulars relating to such units are presented under the concerned C.D.Blocks against the urban category and are repeated again at the end under the caption 'District Urban'.

In the case of an urban agglomeration, the aggregate figures obtained by the addition of the data relating to the constituent towns and outgrowths thereof if any are presented against its name. Thereafter, the data for the constituent towns starting from the core town including the location code, are presented in a continuous sequence. In case a town has outgrowths (which are not towns in their own right) in the first line the aggregates relating to the core town as well as its outgrowths are given and this is then followed by the details relating to the core town and the outgrowths separately. Each outgrowth is treated at par with a municipal ward or division while presenting the ward-wise PCA for towns.

3. Brief note on Census concepts :

Census taking is a massive operation carried out in a short span of time with the active participation of a very large number of census enumerators. The reference moment for the 1991 census count is the sunrise of March 1, 1991. However, the enumeration of the population was spread over a period of 20 days from 9-2-1991 to 28-2-1991 followed by a revisional round from 1-3-1991 to 5-3-1991 for updating the population count with reference to the sunrise on March 1, 1991. The questionnaires canvassed by the enumerators, namely the Household Schedule and the Individual Slip are brief in their wordings and the concepts used for purposes of the 1991 Census Operations and the manner in which the schedules are to be filled in have been explained in a booklet entitled Instructions to Enumerators for filling up the Household Schedule and the Individual Slip. Some of the important concepts and the relevant explanations are indicated in the following paragraphs.

(i) **Urban areas** :- The definition adopted in 1961 and adhered to in 1971 as well as in 1981 (though with a slight modification regarding the classification of fishing and forestry) has been retained for the 1991 census also. According to this definition the urban areas include :

i) all places with a Municipality, Corporation, Cantonment Board or Notified Town Area Committees, etc.

ii) all other places which satisfy the following criteria :

a) a minimum population of 5,000

b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits and

c) a density of population of at least 400 per square kilometre (1000 per square mile)

d) all places which, though not satisfying the above criteria, had pronounced urban characteristics.

(ii) **Urban Agglomeration**: This concept, which replaced the concept of 'town-group' in 1971, has been retained for the 1991 census. It has been observed that very often railway colonies, university campuses, port areas, military camps and large residential colonies etc., come up quite adjacent to, but situated outside the statutory limits of cities and towns. Such areas may not by themselves qualify to be treated as towns. But if they form a continuous spread with the town they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit called "urban

agglomeration". An urban agglomeration may consist of :

a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

b) One town with similar outgrowths or two or more adjoining towns with their outgrowths as in (a) ; or

c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Geographical contiguity with the statutory limits of the core town is the main factor in determining whether or not a nearby satellite town or an outgrowth is to be included in the urban agglomeration. This is purely a statistical concept and for carrying out the actual census, the administrative jurisdictions of the city or the towns concerned as well as of the outgrowths have been kept quite intact. The data are presented for the urban agglomeration as a whole and also severally for each of the constituent units.

(iii) **Rural areas - i.e., villages** : Areas which are not classified as 'urban' according to the definition given above constitute the rural areas. The basic unit for rural areas is the revenue village which has definite surveyed boundaries. In the case of unsurveyed villages, the boundaries as determined by the local usage have been adopted. The revenue village may consist of a single nucleated settlement or comprise of several settlements or clusters of houses located at several places within the territorial limits of the village or the village may not be having any human settlements at all (i.e., it may be totally uninhabited). The census village and the revenue village are identical in the matter of jurisdiction. However, there are a few exceptions to this general rule:

1) When the main settlement of the village with or without the surrounding open lands is constituted into an urban area, the remaining tracts of the revenue village are together treated as a separate unit for purposes of census i.e., the truncated portion itself is considered as an independent revenue village.

2) When outlying portions of certain revenue villages are incorporated into the limits of urban areas by a Government Notification such areas, whether populated or not, are excluded from the revenue village concerned and the village boundaries are redefined for census purposes.

3) Revenue villages which are completely incorporated in the limits of urban areas or else, are submerged completely under reservoir projects but are still retained in the jurisdictional lists of the Survey and Settlement authorities pending a resurvey and such other procedures, are taken note of as revenue villages but are omitted for census purposes i.e., these are not treated as census villages. Similarly, entire revenue villages, which have been identified as outgrowths of urban areas for purposes of 1991 census are treated not as census villages but as urban areas. The names of such villages, if any, in a Taluk/C.D.Block are indicated in a fly leaf.

4) If there are forest areas that do not form part of any of the revenue villages then such areas are identified clearly and the smallest administrative unit into which such forest areas are divided (eg.Forest Beat) is reckoned as the census village. A Forest Range may consist of several such census villages. (In Karnataka this phenomenon is noticeable only in Kollegal Taluk of Mysore District).

(iv) **Census Enumeration Block** : The smallest unit adopted for census taking is the Census Enumeration Block. Generally, the towns and cities are divided into wards or divisions and, wherever such units exist, their distinctive identities have been maintained. The geographical area comprised in each such ward or division or, the town in its entirety, is constituted into several blocks in such a way that every bit of land specifically stands included in one or the other enumeration block and also that there is no over-lapping of areas. In the urban areas, the Census Enumeration Blocks are constituted in such a way that each such Block contains about 120 households covering a population of about 600 persons. However, in view of the condition that

each block should have clear-cut boundaries easily recognisable on the field, blocks which are either larger or smaller than the norm have also been constituted. In the case of non-municipal towns, if the town boundaries are not specifically notified, the jurisdiction of the entire revenue village concerned is regarded as the jurisdiction of the town as well. In the case of towns which are under the administration of Mandal Panchayats, the Panchayat jurisdiction need not necessarily be identical with the jurisdiction of the non-municipal census town.

In the case of villages, depending upon the population data based on the Houselisting Operations carried out during 1990, each village has been constituted into one or more number of Census Enumeration Blocks. The work-load norm for the rural areas is 150 households covering an approximate population of 750 persons. However, numerous Census Enumeration Blocks with below-norm population have been constituted and a single enumerator has quite often been entrusted with the enumeration work in 2 or more contiguous blocks so as to ensure that the aggregate population is quite close to the norm. Further, in each village care has been taken to ensure that no bit of land belonging to that village is left out of consideration while constituting the Blocks. Each hamlet or island, if any, found within the jurisdiction of the village - irrespective of its population size - has been constituted into a separate Block in order to maintain its geographical identity. Further, even the villages known to be uninhabited at the time of houselisting operations have been constituted into separate blocks. In other words, a complete coverage of the territorial jurisdiction of each and every village has been ensured.

(v) **Location Code Number** : Every State in the Country, every District in the State, every Taluk or Town in the District, every C.D. Block (or its equivalent) in the District, every village in the taluk and every ward or division in the city or town and every enumeration block in the village or town is assigned a number in a particular order for carrying out the census enumeration. When these numbers are written side by side in the same order, starting from the State and separated by an oblique mark, the identity of any particular census enumeration block can be known quite easily. The numbers assigned are in Arabic numerals, except in the case of towns in which case Roman numerals have been adopted. For assigning the location code numbers the States in the Country, the Districts in the State, the Towns in the District and the Taluks/C.D.Blocks in the District are arranged in the alphabetical order of their names. The villages in a taluk are organised into revenue circles or hoblis for administrative purposes and each such unit will have a headquarter town or village. The identity of such units is maintained while assigning the location code numbers. Starting from the circle of which the Taluk Headquarters happens to be the Circle headquarters as well, the villages in its jurisdiction are serially numbered by proceeding in a clockwise direction or in a serpentine manner starting from the north-west corner. After exhausting all the villages in that circle, the villages of the adjacent circle are assigned numbers in the same manner. The numbering of villages run continuously for the Taluk through the different Circles or Hoblis.

The entire set of the 1991 census data relating to the village directory and the village/urban ward-wise PCA has been computerised. For this purpose a separate code structure has been developed. The computer codes assigned to the villages in each Taluk or C.D.Block are indicated in the alphabetical list of villages along with the corresponding location code numbers assigned for enumeration purposes. So also particulars about the codes assigned to towns are indicated in the alphabetical list of towns which precedes the presentation of the PCA statements in respect of the urban areas of the district.

(vi) **Building** : A building is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-*cum*-residence, workshop-*cum*-residence, office-*cum*-residence, etc.

(vii) **Census House** : A 'census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

(viii) **Household** : A 'household' is a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of households having unrelated members are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashramas* etc. These are called 'Institutional Households'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'. If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person would be treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen. There may be a household which does not have a house to live in and may temporarily dwell on the roadside pavement, in hume pipes, temples, *mantaps*, platforms etc., or move about from place to place resting underneath shade-bearing trees, pavements and verandahs of public or private buildings. Such households, referred to as 'Houseless Households' for census purposes, were enumerated on the night of February 28, 1991.

ix) **Criteria for enumeration of a person in a particular household :**

1) All those who normally stay and are present in that household during the entire period of enumeration i.e., from February 9 to February 28, 1991 (both days inclusive);

2) All those who are known to be normally residing and had actually stayed during a part of the enumeration period (February 9 - 28, 1991) but are not present at the time of the enumerator's visit ;

3) Also those who are known to be normally residing and are not present at the time of the enumerator's visit but are expected to return before February 28, 1991 and

4) Visitors who are present in the household censused and are away from the place(s) of their usual residence during the entire enumeration period. For the purpose of enumeration such visitors will be treated as normal residents of the household in which they are actually found during the enumeration period provided they have not been enumerated elsewhere.

(x) **Literate** : A person who can both read and write with understanding in any language is 'literate'. A person who can merely read but cannot write, is not 'literate'. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 6 years or less are treated as illiterate.

(xi) **Workers and Non-workers** : For census purposes 'work' is defined as 'participation in any economically productive activity'. Such participation may be physical or mental in nature and would involve not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise. The reference period for determining whether a person is a worker or a non-worker is the year i.e., the 365 days, preceding the date of enumeration. The criterion is liberal and, even a person who has participated in the production of goods and services for a very brief period is entitled to be categorised as a worker. Depending upon the nature of his or her activity during the reference period, every person enumerated at the census is classified as either a worker or a non-worker.

Among 'workers' however there are two categories:

Main Workers : Those who have worked for a major part of the year i.e., for 183 days or more (6 months or more) during the reference period even though this may be in broken spells and in different occupations.

Marginal Workers : Those who have not worked for a major part of the year under reference i.e., those who have worked for less than six months (i.e., for less than 183 days) during the entire reference period.

In view of the past experience that women are often classified as non-workers because of non-reporting of their work or as those who have not worked for a major part of the year, special efforts have been made at the 1991 census for eliciting accurate information by asking probing questions.

In respect of main workers as also marginal workers, further details on the sector of economy in which they worked, the actual nature of work done by them, their employment status (i.e., employer, employee, unpaid family worker or own account single worker) have been gathered at the census.

Important terms such as cultivators, agricultural labourers and household industry are explained below.

a) **Cultivators:** For purposes of census, a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation as well. A person who has given out his or her land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct the cultivation of land, will not be treated as 'cultivator'. Similarly, a person working in another person's land for wages in cash or kind or a combination of both will not be treated as ' cultivator'.

Cultivation involves ploughing, sowing and harvesting. For certain reasons, the growing of certain crops is not considered as cultivation and a person engaged in growing of such crops is not regarded as a cultivator. A person can be classified as cultivator or not, *only on the basis of the crops grown*. The growing of the following crops is considered as cultivation.

1. Cereal and Millet crops : Paddy, wheat, jowar, bajra, maize, ragi, barley, etc.
2. Pulses : Arhar, gram, kesari, moong, masur, urd, etc.
3. Fibre crops : Raw cotton, jute, mesta, sunhemp and kindred crops.
4. Oil Seeds : Sesamum, ground-nut, rape seed, mustard, linseed, sunflower, castor, etc.
5. Cash crop : Sugarcane

The growing of the following crops *is not considered* as cultivation :

1. Plantation crops : Tea, coffee, rubber, tobacco, pepper, cardamom, etc.
2. Edible nuts (other than groundnut) : Walnut, almond, cashewnut, etc.
3. Fruits : Bananas, apples, grapes, mangoes, oranges etc.
4. Coconut
5. Ganja, cinchona, opium and medicinal plants.
6. Betel nuts (areca)
7. Flowers
8. Roots and tubers, chillies and spices
9. Vegetables
10. Other crops not specifically included under cultivation.

b) **Agricultural Labourer** : A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation. The agricultural labourer has no right of lease or contract on the land on which he or she works.

c) **Household Industry** : Household Industry is defined as an industry conducted by the head of the household himself or herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in the case of urban areas. The larger proportion of workers in a household industry would consist of members of the household including the head. The industry

should not be run on the scale of a registered factory which would qualify to be registered under the Indian Factories Act. Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. The goods produced should not be exclusively for consumption by the household itself but should be wholly or partly for sale.

d) **Other Workers** : All workers, i.e., those who have been engaged in some economic activity during the reference period of last one year, who are not Cultivators or Agricultural Labourers or workers in Household Industry were categorised as 'Other Workers' (OW) at the time of census enumeration and further details about the nature of industry, trade or service in which they were engaged were gathered by the enumerators. On the basis of this descriptive information, at the tabulation stage, each such worker has been further categorised as belonging to one or the other of the following Industrial Categories based on Revised National Industrial Classification - 1987.

III Workers in livestock, forestry, fishing, hunting, plantations, orchards and allied activities;

IV Workers in mining and quarrying activities;

V(b) Workers in manufacturing, processing, servicing and repairs which are carried on as other than household industry;

VI Workers in construction;

VII Workers in trade and commerce;

VIII Workers in transport, storage and communications, and

IX Workers in other services.

(xii) **Non-workers** : All those who have not at all participated in any economic activity during the reference period of one year preceding the date of enumeration are classified as non-workers.

Depending upon the manner in which such non-workers engaged themselves for most of the time during the reference period of one year they are classified into one or the other of the following six categories at the time of census enumeration itself. However, the Primary Census Abstract presented in this volume does not furnish details according to the categories of non-workers but indicates the total number of non-workers by sex.

a) **Household duties** : This covers all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year.

b) **Students** : This will cover all full-time students including children attending school.

c) **Dependents** : This category includes all dependents such as infants, children not attending school and permanently disabled from work because of illness or old age.. Dependents will include even able bodied persons who cannot be categorised in any other category of non-workers but are dependent on others.

d) **Retired Persons or Rentiers** : A person who has retired from service and is doing no other work i.e., not employed again in some full time work or not engaged in some other work such as cultivation, business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he or she does not have to work, will come under this category.

e) **Beggars** : This will cover beggars, vagrants or cases such as persons without indication or source of income and those with unspecified sources of subsistence who are not engaged in any economically productive work.

f) **Inmates of Institutions** : This will cover convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions. But an undertrial prisoner enumerated in a jail would be recorded for the work he or she was doing before he or she was apprehended. Similarly, a person temporarily in a hospital or similar institutions would be recorded for the kind of work he or she was doing before he or she was admitted into the hospital or institution. But, for a long-term undertrial prisoner or convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work would not be taken into consideration. A person will be considered as 'Long-term' inmate if he or she is in such an institution for 6 months or more.

4. Brief History of the District

Gulbarga district encompasses a vast geographical area and, as may be expected, contains a few places of historical importance as well as a few which find a mention in the Hindu mythology. For instance, the rivers Krishna and the Bhima which traverse through the district are held to be of divine origin and are regarded as sacred in view of the legends associated with them. The village Narayanapur located on the banks of the Krishna is associated with the legend concerning *Chaya* and *Surya* (Sun God). Sage Agastya and, so also, Lord Rama are believed to have visited the village Narona. These legendary accounts about its antiquity apart, the district contains several places which are known to have been inhabited by the pre-historic man. Relics of such civilizations in the form of cromlechs, kistavaens and cairns have been discovered at several places on the banks of the Bhima river in Jevargi taluk, at Rajan Kollur in Shorapur taluk, at Vibhutihalli in Shahpur taluk and also at Hagaratagi and a few other places of the district.

Historical accounts reveal that sovereignty of the district was under the Satavahanas during the early Christian era. After the extermination of this dynasty in about 200 A.D., their empire disintegrated and numerous principalities came to be established. The area around Gulbarga was held by the Vakatakas for about three centuries and their influence extended over a wide area including some portions of the present Bellary district as well. They were overthrown by the Chalukyas of Badami who rose into prominence during the middle of the sixth century and gradually built up a vast kingdom. After the demise of Vikramaditya II (733 to 744 A.D.), Kirtivarman II ascended the throne. In view of his weaknesses, several feudatory rulers became bold and restive. Dantidurga, a feudatory made the final assault and by ascending the throne in 753 A.D., he ushered in the era of the Rashtrakutas which lasted for a little more than two centuries. The period of Rashtrakutas ascendancy in the Deccan constitutes a most brilliant chapter in the history of South India. Gulbarga district can be truely proud of its association with this dynasty, for the capital of the Rashtrakutas was for a long period located at Malkhed, a village in Sedam taluk - then known as Manyakheta. King Amogha Varsha I, more popularly known as Nripatunga (814-878 A.D.) is believed to have developed Malkhed into a beautiful and sprawling city. This king is renowned for his literary achievements. *Kavirajamarga*, a work of prosody in Kannada and, *Prashnottara Ratnamala* in Sanskrit deserve special mention.

In 973 A.D., Taila II, a feudatory belonging to the Chalukyan dynasty declared independence and thus brought an end to the Rashtrakuta rule. He established himself at Manyakheta itself. But, a little latter he moved the capital of his kingdom to Kalyan, i.e., the present Basavakalyan town of Bidar district. The area comprising of Gulbarga district remained under the control of the Chalukyas of Kalyan for nearly two hundred years with a brief interruption of about a decade and a half when the Kalachuris occupied the throne. They were finally overthrown by the Sevunas (also known as the Yadavas of Devagiri) who were quite successful in forcing the Hoysalas to confine their kingdom to the area lying south of the Tungabhadra. In course of time the Sevunas became masters of the entire western Deccan including Gulbarga and had their capital at Devagiri (the modern Daulatabad).

The commencement of the 14th century witnessed decisive and repeated invasions of the South by the rulers of the Delhi. Ala-ud-din Khilji who had seized the throne of Delhi sent his general Malik Kafur to the South to subdue the kingdoms and establish his own supremacy. The Yadavas fought valiantly but in vain and were completely subjugated in 1327 A.D. by Muhammed-bin-Tughlaq. Towards the close of the rule of this monarch there were several insurrections in the empire. The officers of the province of Daulatabad failed to collect the revenues due to the empire. In 1347 when punishment seemed imminent, the rebels contrived to escape to Gulbarga under the leadership of Hasan Gangu, who styled himself as Zafar Khan. Gathering a large army, Zafar Khan went back to Daulatabad and forced Nasir-ud-din, who had earlier been proclaimed king

**Source : Gezetteer of India - Mysore State, Gulbarga District, Bangalore, 1966.*

by the rebels, to abdicate the throne and established himself as the ruler. He assumed the title Sikander-i-Sani Ala-ud-din Hasan Bahman Shah-al-Wali and established the rule by Bahmani dynasty which lasted for about a century and a half. Bahman Shah soon moved over to Gulbarga which became the capital henceforth and adorned the city with numerous stately buildings. Gulbarga retained the status of a capital till about 1424 A.D. and was evidently in a flourishing state. Thereafter, the capital was shifted to Bidar during the reign of Ahmed Shah (1420-1436 A.D.). Thereafter, Gulbarga lost its importance and gradually reverted to its earlier status of a provincial town. In course of time the Bahmani kingdom yielded place to the Adil Shahi of Bijapur and four other Sultanates of the Deccan. The Mughals then invaded the South including Bijapur. During this period the Bedar chiefs who had established themselves in certain parts of Gulbarga district, became semi-independent and Shorapur (Surapura) emerged as their strongest centre. Though they were subdued by the Mughals, the latter had to grant some *sanads* as also certain concessions to the Bedar chiefs such as the right to collect ten per cent of the revenue. Later on, with the establishment of the Nizam's rule at Hyderabad, in about 1724 A.D., the area around Gulbarga came under his suzerainty. However, in these parts, the Marathas were also quite active and had by their frequent military campaigns already compelled the subjects to pay them the *chouth* as their legitimate tributary payments. After the establishment of the British suzerainty, Gulbarga district remained as a part of the Nizam's Dominions. The Bedar Raja Venkatappa Naik of Surapura who fought a valiant but vain battle against the British is even to this day remembered as a great hero who sacrificed his life in the freedom struggle. Subsequently this area too became part of the Nizam's Dominions and the position changed in 1948 when, as a result of police action, the Hyderabad State became a part and parcel of the Union of India. In November 1956, as a consequence of the Reorganisation of States, a major portion of the Gulbarga district was integrated with the erstwhile Mysore State which is now known as Karnataka.

The administrative history of the district too is quite interesting. During the rule of the Nizam's there was practically no real administration in the modern sense of the term. Land was given in the form of grants to nobles and others and as security for the payment of debts to people who had advanced money or to leaders of mercenary bands. The lands given to the nobles were known as *Paigah* and that given to others were called *Jagirs*. Land taken over by the Nizam from the Government for failure to pay his privy purse was known as Sarf-e-Khas and the land that remained under the Government control was called *Diwani* land. Each had a separate administrative machinery of its own.

The areas directly under the Government were divided into districts and each district was in turn divided into taluks. Zillabandi, the formation of districts, was first attempted in 1863 and this constituted one of the most remarkable reforms brought about by Salar Jung, the then Prime Minister of Hyderabad. The first district to be then formed in this area was the Shorapur district. This had only 5 taluks originally. Within a decade on account of annexations the number of taluks increased to nine and the district comprised of Shorapur, Gulbarga, Andola, Dehgaon, Chincholi, Seram (also spelt as Sedam), Kodangal, Gurmatkal and Mahagaon (Narona). Gulbarga district as such was formed in 1873 with six taluks of the above mentioned nine. The Shorapur district was again broken up in 1883 when Andola taluk came to be transferred to Gulbarga district. Thus in 1901 Gulbarga district had seven taluks besides as many as 509 *Jagir* villages. In 1905 there were several changes such as the transfer of Yadgir taluk from Raichur district to Gulbarga district. Gurmatkal and Mahagaon were divided among Seram, Kodangal, Gulbarga and Yadgir taluks and 73 villages from Mahaboobnagar district were included in Kodangal and Yadgir taluks. Thus, after these changes Gulbarga district consisted of 8 taluks and the 5 *Paigahs* of Aland, Firozabad, Afzalpur, Kalgi and Chittapur and the Jagirs of Tandur and Kosgi. This position remained more or less unaltered till, in September 1949, the Jagirs were abolished and the Sarf-e-Khas lands too were taken away from the Nizam after payment of compensation. In Gulbarga district four more taluks were created out of the adjoining enclave Jagir areas. Thus, prior to the time of Reorganisation of States in 1956 the District comprised 12 taluks namely, Gulbarga, Chincholi, Seram, Kodangal, Shorapur, Shahpur, Jevargi (Andola), Yadgir, Aland, Chitapur, Afzalpur and Tandur. Of these, in 1956, the taluks of Kodangal and Tandur were transferred

to Andhra Pradesh and the rest to Karnataka. Thereafter there has not been any change either in the external boundaries of the district or in the boundaries of the taluks. The ten taluks of the district are grouped into three revenue sub-divisions with the respective headquarters at Gulbarga, Sedam and Yadgir. After the formation of the new Mysore State in 1956, Gulbarga became the headquarters of the Revenue Division having jurisdiction over the districts of Gulbarga, Bidar and Raichur. In 1966 for administrative convenience Bellary district was also transferred to Gulbarga division.

5. Location and Physical Aspects

Gulbarga district is located in the north-eastern sector of Karnataka and covers a vast expanse of table-land that lies between the longitudinal parallels of 76 degrees and 04 minutes East and 77 degrees and 42 minutes East and latitudinal parallels of 16 degrees and 12 minutes North and 17 degrees and 46 minutes North. On the north-west, for a short stretch, the district shares its borders with Solapur and Osmanabad districts of Maharashtra and on the east it is bounded by the districts of Medak and Mahaboobnagar of Andhra Pradesh. On the other three sides, Gulbarga district is surrounded by territories belonging to Karnataka State itself : Bidar district in the north, Raichur district on the south and Bijapur district on the west. It is only in the south that the district has a natural boundary in the form of the mighty Krishna river which runs its east by north-eastern course. On the western sector, for a short distance the Bhima divides the lands belonging to the districts of Gulbarga and Bijapur and forms the natural boundary between the two districts.

The district is situated in the region which is generally known as the Deccan Plateau. As per the physio-agronomic classification of the areas within the State, Gulbarga belongs to the northern Maidan region. The district consists of Deccan traps and sedimentary rock formations. The characteristic rock types found here are hard and compact black rocks called basalts. The general elevation ranges between 330 metres and 650 metres except in some eastern parts where it is above 660 metres. By and large the district presents a flat landscape and the slope of the country is from north to south and south to east. The landscape is somewhat undulating in parts of Aland and Yadgir taluks and a mention may also be made of the following hill ranges. The longest range of hills is the one that enters the district in the north on the west side and continues in the south-eastern direction for about one hundred kilometres. In Shahpur taluk there is a small range, called the Muhammadapur Hills. It is at the foot of this hill range that the Shahpur town has come up. The third range takes its name from Shorapur - another taluk headquarters and historically important town of the district. This range about 13 kilometres long, enjoyed strategic importance in the past. Yet another range of hills in Yadgir taluk takes off from the west to east for a length of about 32 kilometres and, on entering the Sedam taluk, tapers off.

The Krishna and the Bhima are the main rivers of the district. Of these, the Bhima itself is a tributary of the Krishna and flows into it at the south-eastern tip of the district. According to Krishna *Mahatmya* section in the *Skanda Purana,* Lord Vishnu created the Krishna river from out of his own body and invested it with marvellous powers. The river is venerated by Hindus who by tradition regard that to have a dip in the waters of the Krishna is a highly meritorious deed. The length of this river in the district is about 150 kilometres. At a place known as Jaldurg Falls, about 3 kilometres downstream near Narayanapur in Shorapur taluk, the river cascades down a fall of about 65 metres. It is near this spot that a dam is being constructed under the Upper Krishna Project.

The Bhima is also a holy river which finds a mention in *Mastya Purana,* the *Brahma Purana* and the *Vamana Purana* besides in the great epic Mahabharata. It is spoken of as a mahanadi. Near its source in the western ghats there is the shrine of *Jyotirlinga* of Bhimashankar, which is one of the twelve renowned Jyotirlingas in the country. Within Karnataka itself a famous pilgrim centre is located on the banks of this sacred river. The Dattatreya temple is situated at Devar Ghangapur where the river Amerja joins the Bhima. The river which flows south-eastwards across the district for a length of about 225 kilometres has a total drainage of 70614 square kilometres.

Most of the areas on either banks of the river Bhima consist of black cotton soil with patches of *murram,* and sandy soil at the ridge points, the

Amerja, the Bori and the Kagna rivers as well as several streams join the Bhima in its course through the district.

The Amerja which rises near Alur in Maharashtra flows south to join the Bhima just upstream of the pilgrim centre Devar Ghangapur. This river enters Gulbarga district near Nirgundi village of Aland taluk and flowing directly south through the taluks of Aland and Afzalpur, covering a distance of about 90 kilometres joins the Bhima. The Bori river formed by the confluence of two big streams in Solapur district has the major portion of its course in Maharashtra territory. It enters the Gulbarga district near Jodki Khurd village of Afzalpur taluk and traverses south for about 25 kilometres in a zig-zag manner before joining the Bhima. The Kagna rises near Kohir in Andhra Pradesh and enters the district near Habal village in Sedam taluk. It has a serpentine course and flows east and south-east till it joins the Bhima near Hungunta village in Chitapur taluk. Bennithora, Mullamari and Kamalavati streams are the main tributaries of this river which passes through the taluks of Sedam and Chitapur and covers a distance of about 64 kilometres. It is on the banks of this river, close to the place where Bennithora flows into it that Malkhed, the one-time capital of the Rashtrakutas is located. Bennithora rises on the ridges near Mallegaon in Maharashtra and enters Gulbarga district near Hipperga in Aland taluk. This rivulet flows for about 100 kilometres through the tracts belonging to the taluks of Aland, Gulbarga and Chitapur. Mullamari rises near Matala in Homnabad taluk of Bidar district and, after flowing in a south-eastern direction for about 50 kilometres, enters Gulbarga district near Kinni village and continues to flow in the same direction for another 65 kilometres whereafter at a place near the Chincholi town it turns directly south and flows into the Kagna river near Jattur after traversing another 25 kilometres. The lands along this stream also mainly consist of black cotton soil.

The sustained efforts to harness the waters of the Bhima and its tributaries for purposes of irrigation, culminated during the last decade with the taking up of the Bennithora Project, the Chandravalli Project, the Soudhaghar Project, the Halthkeri Project and the Amerja Project for implementation. With the commissioning of these as well as the Upper Krishna Project in the near future, the agricultural scenario of Gulbarga district is likely to undergo a welcome change and witness an era of prosperity.

The main geological formations met with in Gulbarga district are : (i) Pleistocene and Recent (consisting of soil and laterite, alluvium and recent conglomerates); (ii) Tertiary (composed of Deccan traps and inter trappeans and intra-trappeans; (iii) Puranas (composed of upper Bhima shales and sandstones); and (iv) Archean (comprising peninsular gneiss with associated younger granites) and Dharwar schists. Overlying the Deccan traps and the Bhimas, there are thick spreads of black soil some of which are as deep as 10 metres at places like Akandhalli, Yetnal, Kachapur and Wadi. In the area occupied by granites the soil varies from loamy to sandy. Pebbles of chert, limestone, shale and granite are frequently found embedded in these soils. Coarse gravely soils with spreads of quartz and feldspar are also found at a few places.

Gulbarga district is situated in the dry-climate belt and is devoid of lofty ranges of hills. Consequently the flora and fauna of the district are not quite impressive. The lands classified as forests constitute a meagre four per cent of the gross area of the district. As the deciduous forests have for long been over-exploited, most parts of the forests of old have now become barren. The forest-flora is scattered in small bits except in Chincholi taluk where dense growth of trees of appreciable girth could even now be met with. In the absence of thick evergreen forests wild life is almost non-existent. The tiger species is almost extinct and other beasts of prey such as panthers are seen very occasionally. Bears are found in and near about the forest areas of Chincholi taluks and at times these constitute real menace to the agriculturists. Wolves, Wild dogs, Hyeanas, Spotted deer, Black duck, the Indian fox and the Jackal are the other animals met with in various parts of the Gulbarga district.

Gulbarga district enjoys a dry but healthy climate. Though the summer heat is somewhat excessive as compared to several other districts of the State, it cannot be categorised as extremely hot. The temperatures begin to rise steadily with the commencement of the summer season from about the middle of February. Simultaneously, humidity

decreases day by day. This season lasts till about the first week of June. Usually, May happens to be the hottest month of the year and on several days the maximum temperature would shoot up to 45 degree celsius. Towards the end of April and also during the month of May there would be occasional showers accompanied by thunder-storms. The wet or rainy season sets in during June and lasts till the end of September. Thereafter, the months of November and December mark the period of the post monsoons. During these two months quite often, the north-east monsoon becomes active and there would be occasional showers. After October, the temperature begins to fall and the drop in the night temperature would be more rapid. The period from December to mid-February is regarded as the winter season and the intensity of cold increases towards the end of December, which happens to be the coldest month of the year. Within the district, the eastern parts consisting of certain portions of Chincholi taluk and also of Sedam and Yadgir taluks enjoy a somewhat pleasant climate. This phenomenon may be attributed to their slightly higher elevation and the relative abundance of tree-growth.

The district lies in a region in which the rainfall is moderate to low besides being quite capricious. As a result, drought and scarcity conditions haunt the people of the district quite frequently. The average annual rainfall is 715 mm and there would on an average be 47 rainy days spread over a six-month period. The amount of rainfall increases slightly as one moves from south-west to the north-east. Sporadic pre-monsoon showers accompanied by thunder-storms occur during April and May. The south-west monsoon which accounts for about 80 per cent of the annual precipitation usually sets in by about the middle of June and its influence lasts till the end of September. Usually September is the month with heaviest rainfall. The annual statistics reveal that the amount of rainfall as well as its distribution are quite often unpredictable and undependable and that both these are subject to a large amount of variation from year to year. This quite often results in drought and scarcity conditions and when this occurs in successive years people would be put to untold hardship as even drinking water and fodder become non-available except in a few villages located on the banks of the rivers. The latest in this series of successive failure of rains occured during the years 1972 and 1973 when a large number of people from the affected villages had to abandon their homes and hearths temporarily and move to distant places in search of work.

6. Administrative Divisions and Jurisdictional Changes

Karnataka State is organised into four divisions for purposes of Revenue and General Administration. These Divisions are named after their respective headquarters which are located at Bangalore, Belgaum, Gulbarga and Mysore. The jurisdiction of Gulbarga Division extends over the districts of Gulbarga, Bidar, Raichur and Bellary. Gulbarga city happens to be the headquarters of not only Gulbarga Division but also of Gulbarga District and of Gulbarga taluk as well. This district is, in turn, divided into 10 taluks which are grouped into three revenue sub-divisions. In accordance with the general pattern, the taluks and the sub-divisions are named after the corresponding towns/villages in which their headquarters are located. The jurisdiction of Gulbarga Sub-division extends over the taluks of Gulbarga, Aland, Afzalpur and Jevargi while that of Sedam Sub-division extends over the taluks of Sedam, Chincholi and Chitapur and the Yadgir Sub-division covers the remaining taluks of Yadgir, Shahpur and Shorapur. The district has not witnessed any jurisdictional changes - either with regard to its outer boundaries or with regard to the boundaries of the taluks comprised in it - during the decade 1981-91. According to the 1991 census, the district contains 1378 villages and 19 towns within its jurisdiction. A talukwise distribution of these villages and towns is indicated in the statement given below. Particulars about the changes in the number of villages, if any, which have occurred during the decade have also been furnished in the statement.

For purposes of Development Planning and implementation of various programmes thereof, Zilla Parishads have been constituted in the State. The jurisdiction of the Zilla Parishad is coterminus with that of the corresponding district and covers the entire rural and semi-urban areas but excludes statutory towns. Accordingly, a Zilla Parishad has been constituted for Gulbarga district and its jurisdiction extends over 10 Taluk Panchayats. The jurisdiction of each Taluk Panchayat is coterminus

with that of the taluk of the same name but excludes the areas incorporated in the statutory towns or cities, if any, located within the taluk concerned. Thus, all villages and places classified as non-municipal towns and also places recognised as outgrowths of towns at the 1991 census come under the jurisdiction of the Taluk Panchayats. For instance, Gulbarga Taluk Panchayat covers all the villages of Gulbarga taluk including the four villages of Brahmapur, Biddapur, Rajapur and Badepur which have now been identified as outgrowths of Gulbarga city, but excludes the areas incorporated in Gulbarga city. The jurisdictions of Afzalpur Taluk Panchayat and Afzalpur taluk are identical, for the simple reason that this taluk does not have any statutory towns within its limits. Likewise since Jevargi taluk also does not have any statutory towns as per 1991 census classification, the jurisdiction of Jevargi Taluk Panchayat is identical with that of Jevargi taluk. Taluk Panchayat is analogous to the unit more popularly known throughout the country as the 'Community Development Block' which happens to be the smallest unit recognised for development planning. In order to conform to the All India pattern in the presentation of the 1991 census data, instead of the term 'Taluk Panchayat', the term 'C.D.Block' has been made use of at appropriate contexts in this volume also.

Statement showing the number of villages in each taluk of the district as per the 1991 census as also 1981 census and reasons for variations, if any, and the number of towns as per 1991 census.

Sl.No.	Taluk	Total No. of Villages according to the list finalised for		No. of Towns as per 1991 census list	Reasons for variation in the No. of Villages between 1981 and 1991 census
		1991 Census	1981 Census		
1	2	3	4	5	6
1	Afzalpur	90	91	-	Hosurwadi, a hamlet of Manur village, was incorrectly reported by the revenue authorities as an independent revenue village at the 1981 census. This error has now been rectified by treating Hosurwadi as part of Mannur village.
2	Aland	129	129	1	-
3	Chincholi	145	145	1	-
4	Chitapur	121	121	5	-
5	Gulbarga	143	147	1	Four revenue villages, namely, Badepur, Rajapur, Brahmpur and Biddapur of 1981 census are now treated as urban being the outgrowths of Gulbarga city. Hence these are omitted from the list of villages finalised for 1991 census.
6	Jevargi	158	158	-	-
7	Sedam	110	111	3	The entire area of the revenue village Kurukunta - a village at the 1981 census - has been classified as a non-municipal census town for purposes of the 1991 census. Consequently the number of villages has decreased from 111 in 1981 to 110 in 1991.
8	Shahpur	154	157	2	In 1981 three revenue villages viz., Shakapur, Kanchanakavi and Amalapur were listed separately. But now these villages are omitted from the 1991 list of villages as these are fully incorporated in the limits of newly constituted Bhimarayanagudi Notified Area - a statutory town at the 1991 census.
9	Shorapur	185	185	4	-
10	Yadgir	143	142	2	The village Narayanapur of the 1981 census was bifurcated in 1985 (vide G.O.No.RD 20 LRD 81 dated 10.10.1985) into two villages, namely Narayanapur and Borabandi. As a result, Borabandi has been included as an independent village in the list of villages finalised for the 1991 census.
Total		1378	1386	19	-

Particulars about villages which are fully or partly included in the urban areas i.e., towns of the district are given in the following statement.

Note :

* The remaining portion of this village (i.e. the difference of 52.09 Hectares noticed here) is included in the urban limits of Shahabad ACC Notified area Committee.

$ The remaining portion (i.e. 690.50 Hectares) of this village is included in the urban limits of Wadi ACC Notified area committee.

@ The remaining portion of these villages are treated as urban being the outgrowths of Gulbarga City.

7. Brief Analysis of Data

A. Village Directory

Villagewise information regarding the availability of certain basic amenities within the village as also that on the manner of utilisation of the land in the concerned village are furnished in the Village Directory. The items covered include the minimum needs such as the source of drinking water supply and the educational, medical, public transport and communication as well as the weekly market facility. If any one or more of these basic amenities were to be 'not available' within the village, then instead of merely stating that fact, the distance (in ranges) to the nearest place having that particular facility in which the village is lacking, is indicated. The other items covered in the Village Directory are the nature of approach road to the village, electrification and the proximity of the village to an urban area. Since the availability or otherwise of a facility depends to a considerable extent on the population size of a village, information on population and the number of households as per 1991 Census is also furnished in the Village Directory. Under the land use pattern, besides indicating the total area of the village, the Village Directory gives a breakup of this area by the broad categories of Landuse such as forests, cultivated lands with irrigation facility (by sources of irrigation), cultivated lands without irrigation facility, culturable waste and the barren and uncultivable lands including the lands put to non-agricultural use.

In essence, the Village Directory provides micro-level data which will help the planners in formulation of micro-level developmental plans, as the C.D.Block is the lowest administrative unit for developmental planning. Regarding the basic facilities, the villagewise data are consolidated for each C.D.Block (i.e., Taluk Panchayat) and the district thereof and are presented in Appendix-I to the Village Directory. This would in a general way enable the reader to have a broad idea regarding the level of development achieved by the district as a whole and also by the different administrative units constituting the district (viz., the C.D.Blocks). With the same end in view, six tables, which have been generated on the computer, on the basis of the villagewise information contained in the Village Directory format, are presented in Tables 1 to 6. Of these tables, while Tables 1, 2 and 6 provide data for each C.D.Block and are indicative of the levels of development, Table 3 deals with villages not having the facilities and classifies these villages by distance ranges with reference to the nearest place having such a facility, Tables 4 and 5 deal in a general way about the correlation between the proximity of a town and the availability of a facility on the one hand and the population size of the village and availability of a facility on the other hand.

B. Town Directory

Certain salient details pertaining to each town within the district are presented in the Town Directory Statements. The various aspects covered in these simple statements include the growth history of the town; its location with reference to centres of administration and transport; income and expenditure of the local body looking after the civic administration of the town; nature and extent of basic amenities existing in the town such as roads, drainage and sewerage, toilet facilities, drinking water supply, fire fighting services and electrification; nature and extent of the availability of medical, educational and recreational facilities in the town and a broad indication about the trading, commercial and manufacturing activities within the town. In the case of towns with a population of 50,000 and upwards, particulars about the civic amenities existing in the notified slums, if any, in the town have also been provided.

Unlike villages, the number of towns within a district are quite small. A mere inspection of the data presented in the Town Directory Statements would provide the reader with a broad idea about the conditions prevailing in the towns of the district as also an insight into the inter-town differences. Population of a town is one of the most important factors which is closely related to the extent of availability of various amenities in the town. Tables 7 to 10 based on the data presented in the Town Directory Statements indicate the percapita income and expenditure of the civic body governing the town, the average number of beds available in hospitals (per thousand population), the average number of educational institutions (per 10,000 population) and the names of the most important commodities manufactured in the towns, exported from the towns and imported to the towns. These tables are self-explanatory and do not need further elucidation.

TABLE-1 - DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES

Name of C.D.Block	No. of inhabited villages	No. (with percentage) of villages having one or more of the following amenities							
		Education	Medical	Drinking water	Post and Telegraph	Market/ Hat	Communi-cations	Approach by Pucca Road	Power Supply
1	2	3	4	5	6	7	8	9	10
AFZALPUR	87	87 (100.00)	11 (12.64)	87 (100.00)	45 (51.72)	10 (11.49)	86 (98.85)	86 (98.85)	87 (100.00)

SECTION I - VILLAGE DIRECTORY

VILLAGE DIRECTORY

Explanatory Note

Village Directory, as the title signifies provides certain basic particulars about each and every village in the district. The Village Directory is supplemented by four appendices. There are, in all, 18 columns in the Village Directory format and of these, the first two relate to the location code and name of the village while the next two provide information about the geographical area and population as per 1991 census. Of the remaining, 6 columns deal with the availability or otherwise of the basic amenities such as educational, medical, drinking water, postal, communication and marketing facilities, in the referent village. Separate columns have been provided to indicate the nature of the approach road to the village, whether the village has been electrified and the proximity of the village to an urban area. The manner in which the land constituting the village is being utilised is indicated under five columns with suitable headings. The column headings and the scope of the data presented under each column are explained below.

Column 1 : Location Code Number

The concept of location code number has already been explained in the Analytical Note. The location code number thus assigned to the village is entered in this column. This number, in so far as it relates to the village within the C.D.Block, runs serially starting from 1 for every C.D.Block and the data are presented for villages arranged in an ascending order of their location code numbers.

Column 2 : Name of Village

The name of the village corresponding to the location code number given in column 1 is given in this column. By and large the spellings adopted at the previous i.e., 1981 Census, have been retained. However, changes in village names duly effected by the concerned authorities with the sanction of the Government have been taken into consideration while finalising the spellings of village names for 1991 census purposes.

A little more explanation appears to be necessary about the places which appear in the list of towns as well as in the list of villages. This phenomenon occurs particularly in the case of Taluk and District Headquarter towns which, as revenue entities are geographically large villages. The main village site area including the peripheral developed areas would have for long been incorporated into the urban limits without any change whatsoever in Survey and Settlement Records. In the original survey records and also the Resurvey, the entire village inclusive of all the lands that are incorporated into the urban limits continues to be shown as a regular revenue village. In other words, the portion constituted into a town is not taken out from the parent village and formed into a separate and independent unit in the jurisdictional lists (exception Dakshin Kannad district). Every civic body, be it a municipal corporation or a town municipality or a notified area or a sanitary board, defines its own jurisdiction confining itself mostly to the built up area and the fringe areas for enforcing municipal rules and regulations. With the administrative and legal sanction of the Government, which issues a notification in this behalf, the civic body secures statutory rights for administering the local area so defined with effect from a specified date. The incorporated areas may at times cut across village boundaries and may comprise portions belonging to the revenue jurisdiction of two or more villages. In some instances entire revenue lands of a village or of several villages lose their independent identity and are omitted in the list of villages of the taluk (C.D.Block). But it is only in the case of villages of which only certain portions are included in the town, especially those that contribute their names to the towns concerned, that this apparent duplication of names occurs. In such cases, the jurisdiction of the town is very clear and it covers only a portion of the village which is constituted into an independent entity as 'urban' for census enumeration purposes. The remaining area too is constituted as an independent unit under the 'rural' category i.e., as a village. In order to distinguish this unique situation, the name of the village bears the suffix Rural within brackets in the lists of villages finalised for census purposes (perhaps the term non-municipal would be more appropriate). Division of the village into

urban and rural components and the suffixing of the names is a special procedure adopted for census purposes only. That is to say, if one were to ask the Officers of the Survey, Settlement and Land Records whether in their lists there are villages such as say Bellary (Rural), Belgaum (Rural), Bijapur (Rural), Chamarajnagar (Rural), Magadi (Rural), Mandya (Rural), Mysore (Rural), Raichur (Rural) etc., the answer would be a definite 'no' and then they would say that there are villages of the same name but without the suffix Rural. Similarly, in the village maps and other records pertaining to the above named places, the lands that are incorporated into urban areas are also shown as part and parcel of the concerned village.

Column 3 : Total area of the village (in hectares)

The total geographical area of the village as per revenue records is furnished in hectares upto two decimal places. In Karnataka, the basic records are still maintained in acres and guntas or acres and cents, that is, in the units of measurement which were adopted at the time of the first cadastral survey. After the introduction of the decimal system however the equivalents of these figures are also indicated in addition to the already existing entries in registers such as Akarband and Records of Rights. The area of each survey number or part thereof is converted into hectares, ares and square metre. Thus, if these converted figures for each such small unit are added together for the village, the resultant total area would normally be either less or more than the corresponding figures that one would derive by the addition of figures in acres-guntas/acres and cents and conversion of that total into hectares and ares. For purposes of presentation in this statement the village level area and land use figures which were furnished in acres-guntas or acres-cents by the Revenue Officers have been converted into hectares and ares and these figures may not therefore be identical with the total area as may be found entered in hectares and ares in the records of some of the villages. The marginal differences would be due to the factors explained above. Further, in the case of villages of which certain portions are incorporated into an urban area the extent thus categorised as urban has been deducted from the total geographical area of the revenue village and for this reason the particulars presented here would not be in full correspondence with the total area of that revenue administrative unit as mentioned in the village records. If area figures are not available for any village, the abbreviation 'N.A.' is entered in this column and a note at the bottom of the page explains the reason thereof.

Column 4 : Total Population and Number of Households

The total population of the village (inclusive of the hamlets if any) according to 1991 census and the number of households therein are indicated one below the other, in this column. In the case of villages with no inhabitants i.e., 'nil' population, the word un-inhabited is written across the line.

Columns 5 to 10 : Amenities available (if not available within the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges, viz., -5 km, 5-10 km and 10+ km of the nearest place where the facility is available is given)

As the main heading for these columns suggests, if the basic amenity covered under any of these columns were to be not available within the village limits (i.e., its entire geographical area) then, instead of simply stating that fact, an attempt is made here to indicate the range of the minimum distance (in km) that one has to cover to reach a place having that specific facility. The abbreviations made use of in these columns are explained below column by column.

Column 5 : Education

All types of educational institutions functioning in the village - irrespective of the levels of education offered, the medium of education and the status of the managing body - are considered under this column. The abbreviations used to denote institutions with different levels of education are :

i) **P** : Primary or Elementary School : Schools providing education from I standard and upwards upto and inclusive of IV standard are classified as Primary Schools. This would also include junior basic schools if any.

For purposes of reporting, schools which provide education not merely from I to IV but also for higher standards, called composite schools for easy reference, are split up into different levels of education and counted as independent units under each such level.

ii) M : Middle or Junior Secondary School : Schools providing education from V standard and upwards upto and inclusive of VII standard are classified as middle schools. In Karnataka, as a matter of fact, the term middle school is no longer in vogue. Primary education itself consists of seven years of schooling and the first four years duration of this course is called Lower Primary and the next 3 year period is termed as Higher Primary. As mentioned above for accounting purposes, a Higher Primary School with I-VII standard is treated as two units i.e., one Primary School and one Middle School.

iii) H : Matriculation or Secondary School : Schools providing education from VIII standard and upwards upto and inclusive of X standard are classified as High Schools. A composite school with I-X standard is treated as three separate units and counted separately under the categories of Primary Schools, Middle Schools and High Schools.

iv) PUC : Higher Secondary/Intermediate/ Pre-University/Junior College : Schools and colleges that provide education for the XI and XII standards or, as is more common in Karnataka, for the I and II year of the Pre-University Course, fall under this category. There are Higher Secondary Schools with VIII standard and upwards covering the XII standard and, on the other hand, there are also degree colleges which provide education for PUC I year and PUC II year. These composite units are, as explained earlier, split up into different levels for reporting purposes.

v) C : College : This would cover all educational institutions that provide post PUC level education leading to University degree in any subject or combination of subjects and also post-graduate levels of education.

vi) I : Industrial School : Industrial Schools if any in the village are indicated by the abbreviation 'I'.

vii) Tr : Training School : All types of Institutions that provide vocational and professional training are covered by this abbreviation.

viii) AC : Adult Literacy Class/Centre : This abbreviation is recorded in this column only if adult literacy classes were being conducted regularly in the village during the reference year.

ix) O : Others : All other types of educational institutions such as Sanskrit Pathasala, Urdu Madarasa, Makhtab etc., are included in this residuary category.

It is important to note that in this column whenever the number of institutions of a particular level or class exceeds one, only then the actual number is also reported immediately after the relevant abbreviation within brackets. That is to say, the mere presence of an abbreviation without any numerical attribute signifies the existence of the facility, in at least one institution for which that abbreviation stands. The numerals indicate the number of institutions or units of that level or type. Such a procedure has not been adopted in respect of Adult Literacy Class/Centre in view of inconsistencies noticed in the data furnished.

If a village does not have any educational institution whatsoever then a dash (-) is entered in this column and thereafter, within brackets, the range of the distance (in km) from the referent village to the nearest place having at least a primary school is indicated. The emphasis here is on the most basic need i.e., the minimum level. In other words, if the village has primary school, but not middle school or high school then no further information is furnished in respect of the proximity of a middle school or a high school or a college. Similarly, for a village with primary and middle schools but no high school or a college, no further information is furnished in respect of the proximity of places having high school and college level facilities.

It may again be recalled that the concept of a village covers the entire revenue jurisdiction of that unit and includes all the hamlets and clusters of houses as well as isolated homesteads if any i.e., all human settlements as also all the non-residential buildings located within the limits of the village concerned.

Column 6 : Medical :

The abbreviations used to denote the existence of medical institutions of different types in the village are :

H	: Hospital
MCW	: Maternity and Child Welfare Centre
MH	: Maternity Home
CWC	: Child Welfare Centre
HC	: Health Centre
PHC	: Primary Health Centre/Primary Health Unit
D	: Dispensary
FPC	: Family Planning Centre
TB	: T.B.Clinic
NH	: Nursing Home
RP	: Registered Private Medical Practitioner
SMP	: Subsidised Medical Practitioner
CHW	: Community Health Worker
O	: Others

If the number of institutions of a particular type happens to be more than one, then that number is also indicated immediately after the relevant abbreviation.

If medical facilities of any of the types mentioned above are not available in the village then a dash is entered in this column and thereafter, within brackets, the range of the distance (in km) from the referent village to the nearest place having a medical institution which provides at least the minimum level of medical facilities is indicated.

The status of a Primary Health Unit in Karnataka is much lower than that of a Primary Health Centre. However for purposes of reporting under this column, the abbreviation PHC has been made use of in respect of PHU as well. The abbreviation H which stands for hospitals implies the availability of facilities for the treatment of in-patients also. In several Primary Health Centres also such facilities do exist. Likewise Maternity Homes also entertain in-patients but then these are confined only to maternity cases. This apart, in all other cases except in private nursing homes, arrangements exist for the treatment of out-patients only. In local parlance in certain areas however even a dispensary is referred to as a hospital and the clinic run by a private medical practitioner as a dispensary and a private nursing home as a hospital. This indiscriminate usage at times leads to confusion.

All types of medical institutions, irrespective of the system of medicine practiced therein, are covered under this column without any attempt to provide a further break up by the systems of medicine practiced.

About the Community Health Worker it may incidentally be mentioned that it does not refer to workers in extension programmes like the Malaria Surveillance Worker, the Basic Health Worker, the Auxiliary Nurse Midwife etc., but refers only to the paramedical personnel who have been specially trained for dispensing medicines for minor ailments at the doorsteps of the patients.

Column 7 : Drinking Water

Following are the abbreviations used to indicate the different sources of drinking water that are available in the village. These sources of drinking water supply may be public property or may be owned by private persons and institutions. If there are two or more sources of drinking water in a village then all these sources are mentioned one after the other but separated by commas.

T	: Tap
C	: Canal
W	: Well
L	: Lake
Tk	: Tank
S	: Spring
TW	: Tube Well
N	: Nallah/Stream
HP	: Hand Pump
R	: River
F	: Fountain
O	: Others
NA	: Information not available

A village is regarded as having 'tap water' facility only if the village is provided with proper storage facility and an arrangement for supply of water to the consumers through a network of pipes. Most

of the villages where NRWS schemes have been implemented fall under this category. On the other hand, under the Mini Water Supply Scheme or Accelerated Rural Water Supply Scheme etc., if arrangements have been made in the village to pump water from a primary source such as a borewell, store that water in RCC or masonary tanks erected at one or more centrally located places and to provide such storage tanks with a few taps for public use, the source of water supply in the village has been regarded as 'Tube Well' and not as 'Tap'.

During the last decade, borewells have been drilled under one scheme or the other in most of the villages of Karnataka. As a result, open draw wells which formerly constituted the main source of drinking water in several of these villages have ceased to enjoy such a status. Such wells are reported to have either dried up or the water therein has been rendered unfit for human consumption due to contamination on account of negligence, as well as disuse and stagnation of water. Thus, for numerous villages 'hand pump' has now been reported as the main source of drinking water.

If the village does not have any source of drinking water supply at all then, after a dash in this column, the distance range that one has to traverse to reach the nearest place with drinking water facility is indicated.

Column 8 : Post and Telegraph

In this column, information on the availability of postal, telegraph and telephone facilities in the village is furnished using the following abbreviations.

PO : Post Office
TO : Telegraph Office
PTO : Post and Telegraph Office
Phone : Telephone connection.

Villages with Extra Departmental Post Offices are regarded as having the post office facility. Similarly, villages having phonocom facility (but not having a regular Telegraph Office equipped with Morse Code transmitters) are regarded as having Telegraph facilities.

Telephone connection need not necessarily indicate the availability of a public call office in the village, for even private telephone connections to subscribers have been taken into consideration while filling up this column. If a village has postal as well as telephone facilities then both these amenities are mentioned. Likewise if there is a PTO and telephone connections, then both the abbreviations are entered in this column. On the other hand if the village is not having any of these facilities then a dash is noted and next to it the distance to the nearest place having the minimum facility of a post office is indicated in ranges.

Column 9 : Day or Days of the Market/Hat

The column refers to the weekly, or bi-weekly markets i.e., the weekly shandy, held in villages with a view to cater to the needs of that village and more so to the needs of the inhabitants of several surrounding villages. In local terminology such a weekly market is called *Santhe* and is quite popular in Karnataka. In the case of villages which host such shandies the actual day on which the shandy takes place is mentioned and in all other cases a dash is entered and thereafter the distance to the nearest place with a weekly market is indicated in ranges as specified in the column heading. The place where such weekly market gathers may be located in the limits of an adjoining taluk or district. The important matter for consideration here is the geographical proximity. In some cases where the nearest town or a large sized village with a permanent market would serve the needs of the villagers, the distance ranges refer to such places with permanent markets only. In such cases obviously the nearest place where a weekly market is held would be very far away and will not be a matter of much significance. For instance shandy is not being held in any of the villages of Ramanagaram taluk of Bangalore Rural District.

Column 10 : Communication

For purposes of this column, only the means of public transport namely bus, railway and water transport system if any are considered. If the village is served by any mode of such public transport the fact is indicated using the undermentioned abbreviations :

BS : Bus Stop
RS : Railway Station
NW : Navigable Waterway (including river, canal, back-waters, etc.)

If a bus stop or a railway station is located within the territorial jurisdiction of a village then that village is considered as being served by that facility even if that bus stop or railway station is in a somewhat solitary place and is located at some distance from the village-site. If more than one type of communication facility is available, then all the relevant abbreviations are mentioned in this column. If no such facility is available at all then a dash is entered and thereafter the distance to the nearest place with a communication facility is indicated in ranges.

Column 11 : Approach to village

By approach to village is meant the type of road that leads to the village and this would indicate whether the village is accessible throughout the year or only during the fair season. The abbreviations used in this column are :

PR	: Pucca Road
KR	: Kachcha Road
NR	: Navigable River
NC	: Navigable Canal
NW	: Navigable Waterway (other than river and canal)
FP	: Foot path/Bridle path

If a village has a foot path or bridle path and also both pucca road and kachcha road then, only PR is recorded in this column as it would denote a higher level of facility of the same type. Similarly if the village has a bridle path, a foot path and a Kachcha Road, then only KR is reported in this column. While kachcha road refers only to the unsurfaced mud road, the term pucca road covers tar roads, cement roads, water bound mecadum roads and metalled roads. But, if in addition to either PR or KR the village has a waterway then information on the availability of a water way is also indicated.

Column 12 : Nearest town and distance

The name of the nearest town, that is, any urban area as defined for purposes of the 1991 Census, and the distance thereto from the village are indicated in this column. The town mentioned here need not be located within that very taluk or the district or even the State for that matter. The main point for consideration here is the geographical proximity. The distance however is reckoned not as a 'crow flies' but by some land route or water way. Further, when there is a cross country footpath or a cart-track and a little more circuitous road from the village or its proximity to the town then the distance by road is reported here in preference to the distance by foot path or cart-track. Similarly, when there are natural hurdles like unbridged rivers or streams the distance is furnished by the more circuitous route that the villagers would usually prefer. The information on distance is based on local enquiry by the reporting agency and is very approximate. If the town mentioned in this column belongs to another State then the name of that State is also indicated along with the name of the town and the distance thereto.

Column 13 : Power Supply

If the village is electrified, that is, if power is actually available, whatever may be the form of its use, then the village is regarded as enjoying this amenity of power supply. If the supply is expressly restricted for, say agricultural or any other specific purpose then this point is clearly stated by using a specific abbreviation. On the other hand, if electricity is being supplied for all purposes without any reservations, then information on various purposes is not separately mentioned. The abbreviations used in this column are :

ED	: Electricity for domestic purpose only
EAG	: Electricity for agricultural purposes only
EO	: Electricity for other purposes like industrial
EA	: Electricity for all purposes stated above

Column 14 to 18 : Land Use (i.e. area under different types of land use in hectares upto two places of decimal)

The land use pattern adopted for the Village Directory conforms to the classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture has recommended the maintenance of records on land use under the following five categories :

1. Forests
2. Lands not available for cultivation :
   a) Lands put to non-agricultural uses
   b) Barren and unculturable lands

3. Other uncultivated lands excluding fallow lands :

   a) Permanent pastures and other grazing lands,

   b) Lands under miscellaneous tree-crops and groves not included in the net area sown,

   c) Culturable wastes

4. Fallow lands :

   a) Fallow lands-other than current fallows,

   b) Current fallows

5. Net area sown

Column 14 of the Village Directory corresponds to category 1 i.e. forest, while columns 15 and 16 put together represent the cultivated lands and correspond to the combination of categories 4 and 5 above. Similarly, columns 17 and 18 respectively correspond to categories 3 and 2 of the above classification. The data furnished here are based on the village records and pertain generally to the year 1989. The total of the area figures reported under these columns generally tallies with the total geographical area of the village noted in column 3. However, in the case of villages which are partly included in towns the total area reported in column 3 will be less than the total arrived at by adding the figures reported under these columns (i.e. Columns 14 to 18).

Column 14 : Forest

This includes all lands classified as forests under any legal enactment dealing with forests or administered as forests whether State-owned or private and whether wooded or simply maintained as potential forest land. Lands transferred to forest department for afforestation as also the class C and D lands transferred thus by the revenue department are also classified as forests. Within the forest area itself there may occasionally be cultivated patches or else there may be grazing lands. But such areas too are shown under column 14 only as forests. If within an area classified as forest some specific extents of lands have been expressly assigned for regular cultivation and the records have not been set right pending formalisation of grants and related processes of survey and settlement then such cropped areas are shown under column 15 or 16 as the case may be and the remainder alone is shown as forest under column 14. The processes of regularisation of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore, the information merely based on records is, in some cases at least, likely to be different when compared with that based on actual field inspection.

Column 15 and 16 : Irrigated (by source) and Un-irrigated

These two columns cover all the agricultural lands and when added together would correspond to the net area sown plus the current and other fallows. The latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. All lands that are lying uncultivated as fallows for more than 5 years in succession are regarded as permanent fallows i.e., culturable waste, and are covered under column 17. Area sown more than once during the same year, if any in the village, is counted only once under these columns. In column 15, a sourcewise break up of the irrigated area is furnished using the following abbreviations :

GC	: Government Canal
PC	: Private Canal
W	: Well (without Electricity)
We	: Well (with Electricity)
TW	: Tubewell (without Electricity)
TWe	: Tubewell (with Electricity)
Tk	: Tank
R	: River
L	: Lake
Wf	: Waterfall
O	: Others
T	: Total

The concept of irrigation implies the existence of a source of water supply within a reasonable distance and an arrangement to regulate the supply of water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas that are cultivated under purely rainfed

conditions are treated as unirrigated. Though paddy is generally regarded as a wet crop, if it is raised purely as a rainfed crop, as it very often is the case in heavy to very heavy rainfall regions, such areas are regarded as unirrigated for purposes of this column and shown under column 16. Similarly, about garden crops, the area is considered for column 15 only if there is an element of irrigation. Sometimes it happens that the lands shown as dry and rainfed in the settlement records are in actual fact having irrigation facilities due to recent changes such as sinking of wells, introduction of lift irrigation or canal irrigation or commissioning of a project etc. In such a case the actual situation is taken note of and despite its classification as rainfed in the records, the area concerned is treated as irrigated. Though rare, the opposite situation (where a plot of land originally shown as irrigated has ceased to enjoy that facility and is now yielding purely rainfed crops) is also met with and such a situation arises due to reasons such as breaching of tanks, drying up of irrigation wells and small tanks, defunct canal system and so on. The reporting agency has generally assessed the actual situation prevailing during the reference year i.e., 1989, while furnishing the data on irrigated lands. Regarding canal irrigation too it is the actual irrigated area and not the command area that has been reported here.

In column 16 the total extent of unirrigated lands, that is, dry lands cultivated as rainfed fields and the current fallow lands put together is reported. As explained above, lands yielding rainfed paddy crop are considered as unirrigated.

Column 17 : Culturable Waste (including gauchar and groves)

This category includes all lands available for cultivation whether not taken up for cultivation at all or taken up for cultivation once but not cultivated during the past five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. These may be assessed or unassessed and may be in isolated blocks or within cultivated holdings. Lands under thatching grass, bamboo bushes and other groves which are not included under orchards or forests are also included under this category. Further, this includes all grazing lands irrespective of whether these are permanent pastures and meadows or not. In several instances, lands that were at one time reserved for use as grazing fields and pastures and declared as assessed or unassessed wastes have, over a period of time, been brought under cultivation either fully or in parts as a result of gradual encroachments and also because of the policy decisions of the Government regarding land grants. Thus, though the particular plot of land continues to be shown as a pasture in the village records the actual field situation would reveal that most of that land is actually under cultivation. In all such cases, to the extent possible, the actual field situation has been taken into consideration by the reporting agency.

Column 18 : Area not available for cultivation

In this column, the total extent of land which is not available for cultivation in view of its being barren and unculturable as also that which is put to non-agricultural uses is reported. Mountains, deserts, rocky hills, quarries, ravines and the like as well as the lands that cannot be brought under cultivation except at a very high cost are included in the category of barren and uncultivable lands. The category of lands put to non-agricultural uses covers all lands occupied by buildings, roads, railways, parks and play grounds, area under water viz., rivers, streams, canals, reservoirs, tanks, ponds etc., and land put to any other use which is apparently non-agricultural.

There are four appendices to the Village Directory. Appendix-I is based on the Village Directory itself and presents abstract figures for the C.D.Blocks and the district in respect of various amenities for which information is presented in the Village Directory. At the end of the Village Directory of each C.D.Block, against "Total (Sum)", the total number of various types of educational and medical institutions represented by various abbreviations under columns 5 and 6 respectively are given. In Appendix-I, besides incorporating this information, the total number of villages in which these institutions are situated is also given for comparison. Further, in respect of amenities viz., drinking water supply,

post and telegraph, communication and power supply for which the types of amenities available are indicated by abbreviations under columns 7, 8, 10 and 13 respectively for each village but totals are not presented for the C.D.Block as a whole in the Village Directory, the total number of villages in the C.D.Block and, in the district as well, having the above mentioned amenities is also presented under separate captions in Appendix-I.

Appendix-II presents the land utilisation data in respect of non-municipal census towns. The different types of land use for which information is presented here is same as that in the Village Directory. Owing to constraints in the compilation of land use data, information in respect of towns comprising portion/s of one or more villages could not be procured and compiled. Thus information in respect of non-municipal census towns (NMCTs) which comprise of a whole revenue village only is presented in this appendix wherever applicable.

Appendix-III gives the list of villages which are lacking in all amenities covered in the Village Directory except the drinking water.

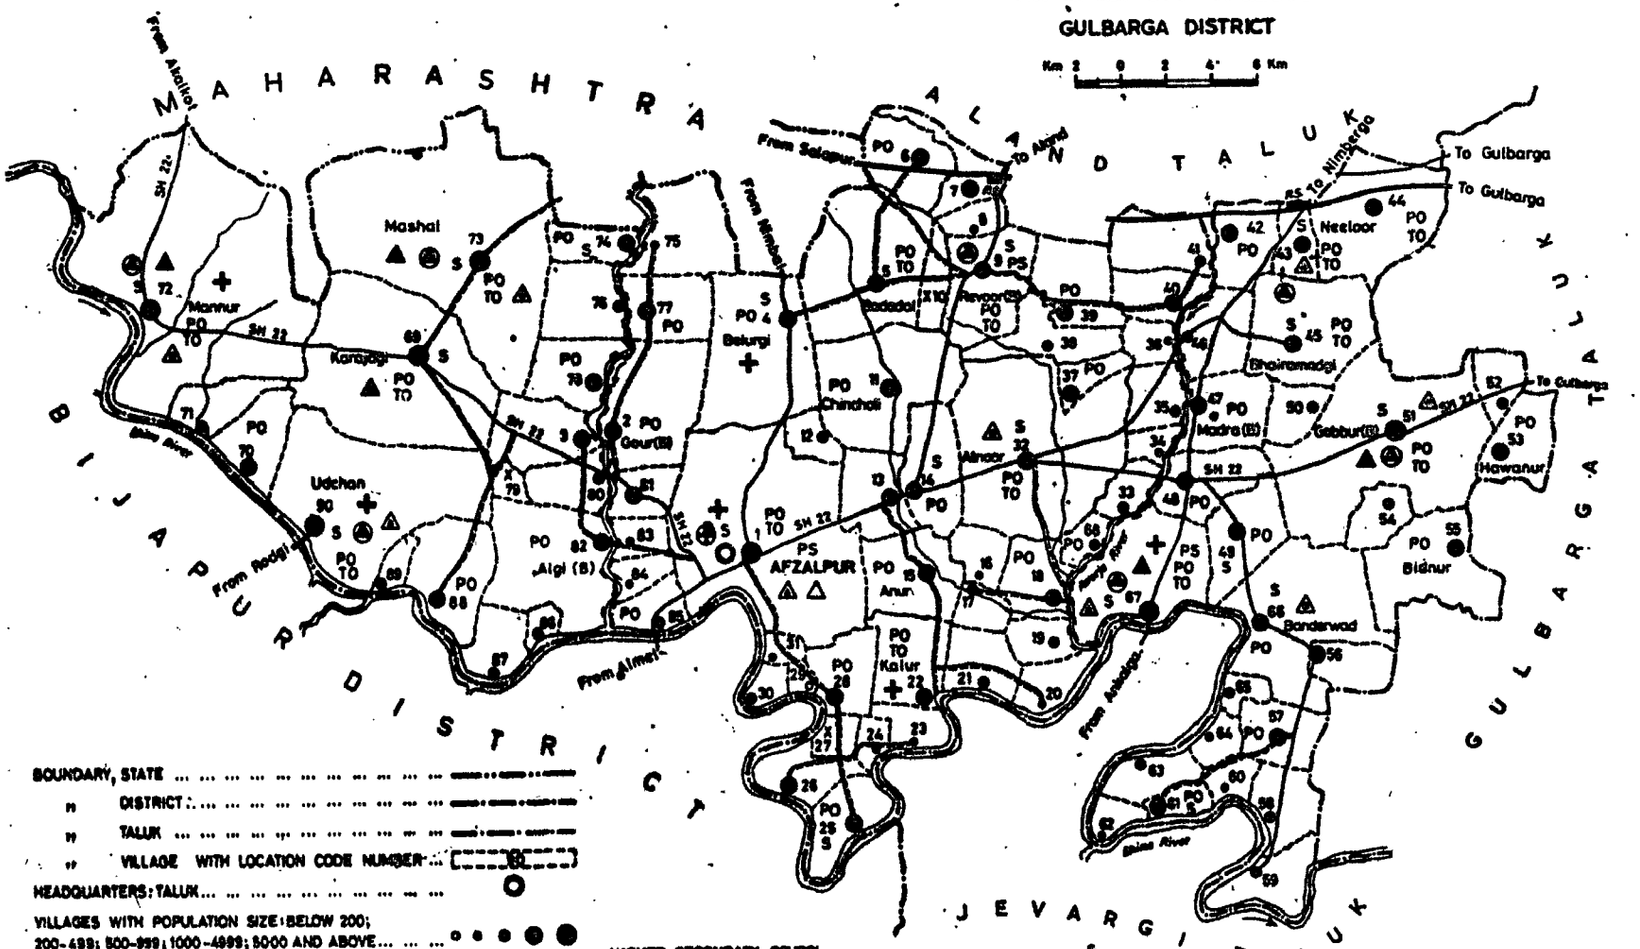

Appendices-IV(A) and IV(B) are compiled from the Primary Census Abstract. The proportion of Scheduled Castes population to the total population of the village, as per 1991 census, has been worked out for each village in a C.D.Block and a list of villages grouped into 6 ranges of percentage points is given in Appendix-IV(A). Appendix-IV(B) is similar to Appendix-IV(A) but deals with the proportion of Scheduled Tribes to the total population of the village concerned. However in view of the vast difference in the relative strengths of these two communities as well as the pattern of distribution, the percentage points included in the 6 ranges adopted for the Scheduled Castes and the Scheduled Tribes are slightly different.

GULBARGA C.D.BLOCK

Note:

The following revenue villages which had been assigned Location Code Numbers have since been classified as outgrowths of Gulbarga City. Hence these villages do not find a mention in the Alphabetical List of Villages as well as in the Village Directory Statement. This explains the gap in the Location Code Numbers in the List of Villages and the Village Directory Statement of Gulbarga C.D. Block.

L.C.No.	Name of the Village
1	Badepur
2	Rajapur
4	Brahmpur
22	Biddapur

Based upon Survey of India map with the permission of the Surveyor General of India.

SECTION II - TOWN DIRECTORY

TOWN DIRECTORY

Explanatory Note

Town Directory comprises of six tabular statements as applicable to all the towns and an additional statement regarding the slums applicable only in respect of towns with a population of 50,000 and above. The six statements are numbered serially from I to VI and the additional statement bears the number IV A in view of the fact that it deals with the same type of information which is covered in Statement IV. These statements contain several columns, each with a brief heading and for presentation of the data, abbreviations have also been made use of in several columns. The title of each statement, the scope of the information furnished under each column therein and the abbreviations used, if any, are indicated below.

STATEMENT I : STATUS AND GROWTH HISTORY

Column 2 : Class, Name and Civic Administration Status of Town

The class to which a town belongs is determined on the basis of its population at the 1991 census count and it is indicated in this column in roman numerals. The classification criterion adopted now is the same as that adopted for analysis and explanation at the earlier censuses. The towns are divided into six classes

Class	Population Size	Class	Population Size
I	100,000 and above	IV	10,000 to 19,999
II	50,000 to 99,999	V	5,000 to 9,999
III	20,000 to 49,999	VI	Below 5,000

For purposes of this classification, the total population of the town inclusive of the population of its outgrowths if any, is taken into consideration. In the case of urban agglomerations which have two or more urban components (each of which may or may not be having outgrowths) each such urban component (inclusive of its outgrowths) is regarded as a separate unit and the population size class is determined accordingly. An asterisk mark placed at the top right position after the name of the town indicates that this town has one or more outgrowths and that the 1991 census population and such other data presented against it includes the details relating to the outgrowths as well.

The middle component of this column heading refers to name of the town which does not need elucidation. Name of the town, as adopted in the official records, is reported here.

The civic administration status of the town as on 1.1.1990 is indicated immediately after the name of the town, within brackets. The abbreviations used for this purpose are as follows

MC	:	Municipal Corporation,
CMC	:	City Municipal Council,
TMC	:	Town Municipal Council,
CB	:	Cantonment Board,
NAC	:	Notified Area Committee,
SB	:	Sanitary Board,
MP	:	Mandal Panchayat,
NMCT	:	Non-municipal Census Town.

With a view to ensuring the fixity of boundaries of various administrative units, that is, to ensure that the frame for census taking once finalised with reference to a cut-off date remains unchanged till the completion of the census count, the State Government had been requested during 1989 itself not to order any jurisdictional changes and not to give effect to any changes in the civic administration status either.

Column 3 : Location Code Number

The location code number assigned to the town for purposes of computerisation of the 1991 census data is entered in this column.

Column 4 : Name of Taluk

In Karnataka, the term taluk is very much in vogue though the designation of the Revenue Administrative Officer has for long been changed from Amildar or Mamlatdar to Tahsildar. The name of the taluk within the jurisdiction of which the town is located is indicated in this column. There are a few instances wherein a particular town straddles portions belonging to two adjacent taluks.

In such a case the town is considered to belong to the Taluk that contains a major portion of the town. In the statement, such cases are differenciated by an index mark and a note at the bottom of the page explains the correct situation.

Column 5 : Name of Community Development Block

The name of the Community Development Block within the jurisdiction of which the referent town is located is indicated in this column. This column does not apply to statutory towns since, in Karnataka, all such towns are outside the jurisdiction of the Community Development Blocks i.e., the (Taluk Panchayat Samitis).

Column 6 : Area (Sq.Km)

The geographical area of the town is furnished here in square kilometres upto two places of decimal. The figures for the urban areas are either those supplied by the civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in the Census Directorate on the basis of the available records pertaining to the delimitation of urban units.

Column 7 : Number of Households (1991)

The total number of households, including those consisting of institutional and houseless population, enumerated in the town at the 1991 census is reproduced here from the Primary Census Abstract. The purpose is to facilitate a better comprehension of the demographic situation, especially with reference to the population data presented in this statement.

Columns 8 to 17 : Population and Growth Rate of the Town at different Censuses from 1901 to 1991

The population figures for the town as returned at the decennial census from 1901 through 1991 are furnished under these columns in order to provide an insight into the history of growth of the town. If in any particular census year the referent town did not enjoy the urban status, that is, if that place was reckoned as a village for that census, its population is not reported under the column concerned and a dash mark is indicated instead. In other words, the population figures are given here for the town only if it happened to be an urban area at that particular census year.

Thus, a glance at these columns reveals whether the referent town having been first classified as 'urban' has maintained that status continuously through the succeeding censuses or whether there have been subsequent declassifications. From column 9 onwards the decadal growth rates for the town are indicated within brackets below the population figures in order to permit an easier grasp of the decadal growth trends and to facilitate a comparative analysis. Population variations are quite often associated with changes in the jurisdiction of the urban area and sudden spurts are sometimes due to incorporation of fast developing fringe areas to the town or amalgamation of adjacent towns within the core town during the inter censal period.

Column 18 : Density (1991)

A town may have one or more outgrowths which are not towns in their own right. In such a case the density is worked out for the town inclusive of the area and population of such outgrowth(s).

Columns 19 to 21 : Sex Ratio 1971 to 1991

Sex ratio is expressed as the number of females for every thousand males and is based on the sexwise distribution of the population returned at the census. For each town these figures are furnished for the 3 successive censuses. This information would provide an insight into the changing pattern of sex ratio in urban areas.

STATEMENT II : PHYSICAL ASPECTS AND LOCATION OF TOWNS, 1989

Column 2 : Class and Name of Town

This column is the same as column 2 of Statement I and does not need any explanation. Unlike in Statement I, here the civic administration status of the town is omitted.

Columns 3 to 5 : Physical Aspects

These columns deal with the rainfall and temperature data. It is common knowledge that meteorological observatories have not been established in each and every town, even though most of the towns do have rain-gauges and due

arrangements have been made to record the rainfall data all through the year. The Director General of Observatories has furnished data on rainfall, maximum and minimum temperature in respect of towns having observatories. These figures are averages based on the data for 10 years from 1980 to 1989, and are distinguished in the statement by placing an asterisk mark at the top right hand side of the figure. Information on this aspect is available only for a few towns.

In so for as the data on rainfall for column 3 is concerned, for most of the towns the particulars have been supplied by the local officers. The rainfall figures are in millimetres and represent the annual average based on the actual figures relating to the preceding ten years i.e., from 1980 to 1989.

In case of non-availability of information, the particulars relating to the nearest town are reported under these columns with the distinguishing notation N being placed at the right hand side of the figure.

Column 6 to 12 : Name of and Road Distance from State Hq., District Hq., Sub-Division/Taluk Hq., Nearest City with a population of 100,000 and more; Railway Station; Bus Route; Navigable River or Canal (if within 10 kms)

The column headings are self explanatory and are intended to indicate the location of various centres of importance with reference to the referent town. If the referent town itself happens to be mentioned in these columns the distance is recorded as '0' (zero) and in all other cases the road distances are given in kilometres. In column 8 the name of the sub-division to which the taluk (in which the town is located) belongs as well as the name of the taluk to which the town belongs are mentioned along with road distances in the same order one below the other. In column 9, the name of the nearest city with a population of 100,000 and more according to 1991 census and the road distance thereto is mentioned in respect of each and every town even if the referent town itself has a population of 100,000 and more. It may be reiterated here that the 'town' includes its outgrowths as well. For example, the 1991 population of the area incorporated in the municipal limits of Hassan is 90,803. However 10 places have been recognised as the outgrowths of Hassan. The aggregate population exceeds one lakh and this urban complex, instead of Hassan CMC alone, is reckoned as a Class I town i.e. a city, for purposes of this column. Though the aggregate population of an urban agglomeration which consists of two or more independent towns (with or without outgrowths) exceeds one lakh mark it does not automatically confer the status of a city to any of the constituent towns. Of course, if any of these constituent towns (including its outgrowths) has a population of 100,000 or more then, in its own right, the place will enjoy the status of a city. The KGF urban agglomeration is composed of three separate units viz., Robertsonpet, Kolar Gold Fields and BEML Nagar. The population of these three towns (inclusive of Outgrowths) according to 1991 census is 68,230, 72,485, and 16,031 respectively. Obviously, none of the three constituent units qualifies to be reckoned as a city for purposes of this column.

The proximity by road alone is taken into consideration for filling up this column and as such cities belonging to adjacent States also find an occasional mention in this column.

Column 10 refers to the nearest railway station and distance thereto by road. In a few cases, though the name of the railway station is the same as that of the referent town, the distance indicated is other than zero because of the fact that the station is actually located beyond the jurisdiction of the referent town.

In case the referent town is enjoying bus route facility (i.e. road transport) the name of the town is mentioned in column 11 and the distance is recorded as zero. Names of bus routes passing through or originating from the town are not indicated here. If there is a navigable river or a navigable canal at a distance of 10 kilometres or less from the referent town then the name of the river or the canal is indicated in column 12. To differentiate between a river and a canal the abbreviations (R) and (C) are made use of and the distance from the town to the navigable waterway is mentioned thereafter. It may incidentally be stated that in Karnataka there are very few navigable rivers and practically no navigable canals.

STATEMENT III : MUNICIPAL FINANCE, 1988-89

As the title denotes, this statement deals with the actual income and expenditure of the civic body administering the town. An attempt has been made to present comparable data in the case of non-municipal towns like Panchayats and areas under the administration of public sector undertakings and the like. The data relate to the financial year 1988-89 and have been furnished by the concerned local authorities on the basis of the relevant records relating to 1988-89. It may also be stated here that no probing enquiries have been made and the particulars as reported by the civic bodies have been presented here.

Column 2 : Class and Name of Town

This is same as column 2 of Statement II and as such does not require any explanation.

Column 3 : Civic Administration Status (in 1990)

As explained under column 2 of Statement I, the civic administration status of the town as on 1.1.90 is indicated in this column using same set of abbreviations.

Columns 4 to 10 : Receipts (in Rs.'00)

The actual receipt realised by the civic body under various heads of income as well as the total for the year 1988-89 are indicated in hundreds in these columns. The opening balance for the year is not taken into account under any of these columns including that for the 'total'.

Columns 11 to 17 : Expenditure (in Rs.'00)

The actual expenditure incurred during the year 1988-89 is furnished here in hundreds. The various heads of accounts are grouped into 6 broad categories for each of which a separate column is provided. Public safety covers the expenses incurred for road lighting, destruction of rabid and stray dogs, besides that on fire fighting service. Similarly, 'Public Institutions' covers not merely the contributions made by the civic body to educational, medical and cultural institutions in the town but also the expenditure incurred for the maintenance of educational and such other institutions if any functioning under its direct control.

As in the case of receipt, in the case of expenditure also the closing balance at the end of the year is not considered. Therefore, in almost all the cases the amount shown under "total receipt" may not tally with the amount shown under "total expenditure".

STATEMENT IV : CIVIC AND OTHER AMENITIES, 1989

Column 2 : Class and Name of Town

This is same as column 2 of Statements II and III and does not need further explanation.

Column 3 : Civic Administration Status

Explanation furnished earlier for column 2 of Statement I and column 3 of Statement III holds good for this statement also.

Column 4 : Population

The total population of the town (inclusive of the outgrowths if any) according to 1991 census is mentioned here with a view to facilitate a comparative analysis of the data.

Column 5 : Scheduled Castes and Scheduled Tribes Population

The aggregate population of the Scheduled Castes and the Scheduled Tribes according to the 1991 Census is indicated in this column.

Column 6 : Road Length (in kilometres)

Generally in a town it is the civic authority that is responsible for the construction and maintenance of roads. The term 'road' as used here includes streets also and while the unsurfaced mud and gravel roads are categorised as Kachcha roads, the surfaced roads are classified as Pucca roads. District roads and highways under the control of the Public Works Department also pass through in the case of most of the towns and cities. The roads situated within the jurisdiction of the town and under the maintenance and control of the State PWD, Central PWD, Zilla Parishad or any other agency such as the Karnataka Power Corporation, a public sector undertaking, Factory Management, etc., have also been taken into consideration while computing the total road length. This total road length is shown under the two categories of KR (Kachcha Road)

and PR (Pucca Road) as defined above. In order to have an idea about the total length of roads in the town therefore, these two figures are to be added together. As it has not been possible to ascertain the full details by type of road and agency responsible for maintenance, the combined road length alone is furnished. The road length is given in kilometres and fractions are rounded off to next integer.

Column 7 : System of Sewerage

Generally sewerage system implies the network of mains and branches of underground conduits for the conveyance of sewerage to the final point of disposal. Sewers that carry only household and industrial wastes are called separate sewers while those that carry storm water from roofs, streets and other surfaces are known as storm water drains and those carrying both sewage and storm water are called combined sewers. In towns provided with such systems of underground sewerage also there would in addition be a surface drainage system to cover the areas not served by sewerage system and also to drain out excess rain water from all over the town.

However, in towns that are not provided with a sewerage system - and such towns are far more numerous in the State - there would generally be open drainage system. Where even this system is not prevalent the householders would have made their own arrangements such as soak pits and cesspools. In this column therefore information is presented not only on sewerage system, but also on the drainage system. Like sewerage system, the drainage system is also of different types depending upon the construction material and also the shape of the drains. The two most important types of sewerage/drainage system prevailing in the town are reported under this column in the order of their importance. The following abbreviations are used

S : Sewers
OSD : Open Surface Drains
BSD : Box Surface Drains
SD : Sylk Pattern Drains
CD : Cesspool method
Pt : Pit System
O : Others

The box surface drains are also open drains but are built of size stone masonary and are also called Pucca gutters. The sylk pattern drains too are open surface drains only. The open surface drains category thus covers the Kachcha drains involving mere earth-work and also the drains constructed from out of oblong granite slabs or, out of pre-fabricated cement concrete blocks which need only joining and cement pointing after being placed in position.

Columns 8, 9 and 10 : Number of Latrines

Information on total number of latrines (i.e. lavatories) of different types as furnished by the concerned civic authorities is reported under these 3 columns. Both private and public latrines are covered here and the particulars in these columns and in column 11 are closely interlinked. The water-borne latrines include all types of flush-out latrines while service latrines refer to only those that are being serviced by manual scavengers either everyday or twice or thrice a week.

Column 11 : Method of Disposal of Night soil

The phrase disposal of night soil is generally presumed to refer to the manner in which the garbage is finally disposed of by the civic body, i.e., sale by public auction, used as manure etc. However, the main purpose of this column is to provide information on the method by which the night soil is removed from the latrines, that is, the primary disposal of the human waste. A little elaboration on this aspect therefore appears to be necessary.

There are three systems of disposal of human waste, namely, (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems like septic tank, leaching cesspool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cisterns (or hand flushing). Through this sewer the faeceal matter is transported without the need for scavenging. This system generally exists in cities and large towns

besides industrial townships built and controlled by public sector undertakings and large companies and the like. Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Where the liquid wastes from the water closet could be disposed off locally in a leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which render the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected to such wells. These wells are cleared at periodic intervals by a suitable device. The dry type latrines are of service type from where the human excreta has to be removed by scavengers who move from house to house, in most cases carrying the night soil as head loads on their head, or shoulders or in baskets with handles or in wheel barrows. This waste is then collected in bullock carts or trucks and transported to dumping grounds at the outskirts of the town.

It may be mentioned in passing that in Karnataka the practice of carrying night soil by head loads has been discontinued with effect from 15.8.1973 consequent on the issuance of a Government Order in this behalf. However in a few cities and towns once the civic body cease to provide the services of scavengers for lifting the night soil from the latrines, the affected householders themselves entered into private oral agreements with the scavengers and have ensured the continuance of the scavenging services till date. As a result, even at present, dry type service latrines are existing in a few towns and the practice of carrying night soil as head loads etc., is very much in existence. In some of the towns, withdrawal of the services of the scavengers by the civic bodies has resulted in the practice of erecting latrines in such a way that the night soil is directly flushed into the open drains (in which the pigs freely roam about) instead of erecting sanitary hand flush latrines with septic tanks.

If more than one system is prevailing in the town, the two most important types are indicated one after the other. The abbreviations used in this column are the following

S	:	Sewerage
HL	:	Head Loads
ST	:	Septic Tanks
Pt	:	Pit System
WB	:	Wheel Barrows
B	:	Baskets (with handles)
O	:	Others

In case the town has latrines of other types that are neither of the sanitary type nor of the service type, this column does not apply at all and therefore a dash is entered.

Columns 12 and 13 : Protected Water Supply : Source and Capacity of Storage Systems

The sources of water supply in the town are indicated by using the following four abbreviations :

T	:	Tap
TK	:	Tank Water
W	:	Well
TW	:	Tube Well/Hand Pump

Supply through the taps implies a primary source of water supply such as a river, or a stream, or a bore well, or a curb well, or a tank or a reservoir etc., which is of course not mentioned in this column. It may be incidentally stated that the term protected is used in a very liberal sense, and no attempt has been made to gather data on the methods of filteration and water purificatory treatment if any resorted to by the agency supplying water through pipes in the towns. The normal practice in most of the towns is to pump raw water into the storage tank or reservoir, treat it with bleaching powder and then distribute that water for consumption through pipes.

If there are more than 2 sources of water supply in the town the first two which are regarded as most important are mentioned in that order separated by a comma. In column 13, the systems of water storage are considered and the two that are most important in the referent town are indicated in that order and after each entry, the storage capacity is also mentioned in litres within brackets. The abbreviations used in this column are :

OHT	:	Overhead Tank
SR	:	Service Reservoir
GLSR	:	Ground Level Service Reservoir
IG	:	River Infilteration Gallery
BWP	:	Borewell Pumping System
PT	:	Pressure Tank

The term capacity has its usual meaning, namely, the capacity to store or contain. It may further be clarified that the storage capacity does not necessarily indicate the quantity of water supplied daily to the inhabitants of the town. In some of the towns due to the inadequacy of water supply at the primary source for most part of the year the normal utilisation of the storage capacity would be of the order of 50 to 60 per cent only. On the contrary there are towns where water is pumped into the storage system and also distributed for consumption twice every day almost throughout the year and there are a few towns where the inlets and outlets of the storage systems would both be functioning simultaneously for most part of the day making it somewhat difficult to calculate the quantity of water supplied everyday under such a system.

Column 14 : Fire Fighting Service

If fire fighting service is available in the town this fact is indicated by the word 'yes' recorded in this column. In all other cases the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where such services are available is indicated along with the road distance in kilometres between the referent town and the place with fire-fighting service.

Columns 15 to 19 : Electrification (Number of connections) - Domestic, Industrial, Commercial, Road Lighting (points) and Others

In columns 15 to 19 information about the number of electrical connections (installations) for different categories of consumers in the town is furnished. The definitions of the terms used in the column headings are as follows

(i) **Domestic** : Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial lines, charitable, educational and religious institutions are all included in the domestic category, A.E.H. i.e., All Electric Home connections are also categorised as domestic.

(ii) **Commercial** : This category includes all connections for the supply of electricity to commercial establishments such as wholesale and retail shops, offices and business houses, hotels, restaurants, tea stalls, photographic studios, X-ray installations, advertisements and exterior illumination, railway station, bus station and the like.

(iii) **Industrial** : Power supply connections to industrial establishments are covered under this column. This would include connections to small establishments such as powerlooms, flour mills, roasting, grinding, wet grinding, repair workshops using power operated tools and the like as well.

(iv) **Road Lighting** : The total number of street lights being maintained in the town is mentioned here.

(v) **Others** : Connections to all categories i.e., other than those cited above, are covered under this heading. This would include temporary connections, connections to pumpsets, water works and such other installations.

STATEMENT IV-A : CIVIC AND OTHER AMENITIES IN NOTIFIED SLUMS, 1989

This statement which may be regarded as an appendix to Statement IV is confined to towns with a population of 50,000 and more i.e., class I and class II towns. Information as furnished by the concerned civic body (or the Slum Clearance Board) on slums that are officially recognised as slums (even if those are not notified in some cases) is presented under 14 columns apart from column 1 which relates to serial number and column 2 which relates to name and class of town.

Column 3 : Name of Slum

The names of slums, if any, in the town are given in separate lines.

Column 4 : Area of Slum

The geographical area of each slum is given in square kilometres upto three places of decimal.

Column 5 : Population of Slum (approximate)

The approximate population of the notified slum (as in 1989) as furnished by the concerned civic authorities is reported in this column.

Column 6 : Paved Roads (in Km.)

The total length of paved roads, if any, in the slum is reported here in kilometres (upto 2 decimal places).

Column 7 to 12 : System of Sewerage, Number of Latrines and Method of disposal of Night soil

These column headings which are the same as those appearing in statement IV above have already been explained. The information is furnished here for each slum separately. The main heading 'latrines' is sub-divided into those that are privately owned and those that are for common use of the community i.e., public latrines.

Column 13 : Number of Tap Points/Public Hydrants installed for Supply of Protected Water

The total number of public taps or hydrants if any in the slum is mentioned here. (Handpumps if any are also regarded as equivalent to public taps).

Column 14 to 16 : Electrification (Number of connections)

Total number of electrical connections in each slum provided for purposes of domestic use, road lighting and other than these two is reported separately under these three columns. The meaning of the terms used in the column heading has already been explained. The information furnished under these columns is very approximate.

STATEMENT V : MEDICAL, EDUCATIONAL, RECREATIONAL AND CULTURAL FACILITIES, 1989

Column 2 : Class and Name of Town

This column is same as column 2 of Statement IV and therefore calls for no further explanation.

Column 3 : Population

The total population of the town according to the 1991 Census is noted in this column.

Columns 4 and 5 : Medical Facilities : Hospitals/Dispensaries/T.B.Clinics/ Health Centres/Nursing Homes etc., and Number of Beds in Medical Institutions noted in Column 4

The scope of these columns is confined to only such of the facilities that are offered by institutions run by or aided by government/semi-government or local bodies and charitable institutions or social service agencies like the missionaries. In other words, data on the medical facilities provided in the town by private doctors i.e., registered medical practictioners either individually or in establishments where they work in groups, are excluded from the purview of these columns.

The abbreviations used in column 4 are

H	: Hospital
D	: Dispensary
HC	: Primary Health Centre/Health Centre/ Primary Health Unit/Primary Health Sub Centre etc.
FPC	: Family Planning Centre
TB	: T.B.Clinic
NH	: Nursing Home
O	: Others

If there are two or more number of institutions of the same type, then the number of institutions is also indicated within brackets immediately after the relevant abbreviation.

Maternity homes, maternity and child welfare centres, leprosy clinics, chest clinics and venereal diseases clinic etc., if any, are all included under the category of 'Others'. But even when a Family Planning Centre is attached to a hospital or a Primary Health Centre it is treated as an independent unit and is counted separately.

If the town has hospitals and dispensaries providing facilities under different systems of medicines such as allopathic, ayurvedic, unani and homoeopathic, then this detail too has been included using abbreviations such as 'Ay' for Ayurvedic, 'U' for Unani and 'Hom' for Homoeopathic system. [The allopathic institutions do not have any additional abbreviation. In presenting the information under column 4 for H or D, first the total number of all institutions under different systems is given within brackets after 'H' or 'D, as the case may be and thereafter the number of institutions under each

system is given. For instance, H(1) (1) represents one allopathic hospital, whereas H(12) (9, U-1, Ay-1, Hom-1) indicates availability of 12 hospitals, of which, 9 are Allopathic, 1 Unani, 1 Ayurvedic and 1 Homoeopathy.]

If medical facility is not available in the town, then the name of the nearest place where it is available is mentioned here along with the distance to that place in kilometres.

The number of beds with which the medical institutions, noted in column 4, are equipped is indicated in column 5.

Column 6 to 15

These columns provide information regarding the educational facilities available in the town.

Columns 6 to 9 : Arts/Science/Commerce Colleges (of Degree Level and Above); Medical Colleges; Engineering Colleges; Polytechnics

Particulars of colleges in the town providing general education facilities at degree level are indicated in column 6 using the following abbreviations :

A	:	Arts only
S	:	Science only
AS	:	Arts and Science only
C	:	Commerce only
AC	:	Arts and Commerce only,
ASC	:	Combined for all three categories
	:	Arts, Science and Commerce,
L	:	Law
U	:	University
O	:	Others.

If the number of colleges of any particular category is more than one, then that number is also given within brackets against the abbreviation concerned. It may incidentally be mentioned here that the educational institutions with a vocational and professional content such as Pharmacy College, B.Ed. College, Agricultural College etc., are not covered under this category but are shown included in the category of "Others" in column 10.

In columns 7, 8 and 9 the number of medical colleges, the number of engineering colleges and the number of polytechnic institutions are indicated. In case of medical colleges, the number of institutions, if any, under different systems of medicine is separately given against abbreviations representing different systems of medicine. The abbreviations used are A : Allopathy; Ay : Ayurvedic; U : Unani; Hom : Homoeopathy and O : Others.

In case the town does not have any of the colleges referred to in these 4 columns i.e., if the entry were to be a dash in any of these columns then the name of the nearest place with the facility along with the distance thereto is mentioned. If such a place is outside the district then the name and the distance to that place and if such a place is outside the State itself then the name of that State is mentioned in these columns. The same procedure is adopted regarding the other columns dealing with educational facilities.

Column 10 : Recognised Shorthand, Typewriting and Other Vocational Training Institutions

The term recognised would mean recognition by some statutory authority like the Educational Department, Commerce Department, Labour Department etc., of the Government or Semi-Government autonomous bodies or public sector projects. The Teacher's Training College, the Nursing College, the Pharmacy College, the College imparting education in Physical Education, Applied Art/Painting College, Music/Dancing Schools and the like are also shown under this column against the category of 'Others'.

SH	:	Shorthand
Type	:	Typewriting
Sh. Type	:	Shorthand and Typewriting
O	:	Others

If the number of institutions of any particular type is more than one, then that number is also indicated within brackets along with the abbreviation concerned.

Columns 11 to 14 : Higher Secondary/Intermediate/PUC (Pre-University College/ Junior College/Secondary, Matriculation, Junior Secondary and Middle Schools and Primary Schools

Information about the number of schools of different types functioning in the town is furnished under these columns. All schools irrespective of the medium of education and the type of administering agency i.e., all those run by or aided by Government or local bodies, as well as the unaided institutions run by private management are considered here for reporting. If there are composite institutions such as a college providing education at degree level and also at Pre-University level then such institutions are split up into degree colleges and PUC colleges (i.e., junior college) and separately counted as if they are independent units. Likewise, a composite Junior College which has facilities for providing education say from I to XII standard (i.e., from Primary I standard upto PUC) would be regarded as representing one Junior College, one High school, one Middle School and one Primary School and each of these units would be counted and reported under the relevant column as if each unit was an independent institution in its own right. Similarly, a school with I to X standard would get counted under Primary, Middle and High School categories and a Composite School with I to VII standard would be considered under the Primary School as also the Middle School category.

In Karnataka the term middle school is no longer in vogue as the primary education consists of 7 years of schooling leading to secondary level. However, the first four classes (I to IV standard) are called lower primary classes and the next three are regarded as higher primary classes. There are schools with only I to IV standards called LPS and also those with V to VII only (formerly middle schools) known as HPS and there is no difficulty in counting such institutions as separate primary and middle schools. But there are composite schools called Higher Primary Schools having I-VII standards and such schools have now been split up into one Primary School and one Middle School for purposes of reporting under these columns of the Town Directory. This method of accounting is therefore different from a simple counting of schools in the town.

Column 15 : Adult Literacy Classes/Centres and Others (Specify)

If adult literacy classes are being run at regular centres in the town, the number of such centres is indicated in this column by the side of the abbreviation AC. Gurukula, Madarasa (Arabic School) and such other quasi religious cum educational institutions if any in the town are also reported in this column under the category of 'Others'.

Column 16 : Number of Working Women's Hostels with Number of Seats

Though there are hostels meant for students in almost all the towns, very few have hostels meant for working women. In this column the number of only such hostels that are exclusively meant for working women only are reported along with the information on the number of seats i.e., its strength.

Columns 17 to 19 : Recreational and Cultural Facilities, Stadia, Cinema, Auditoria/Drama/Community Halls

Column 17 relates to the number of stadia, if any, in the town. Ordinary play grounds which one usually comes across in towns and cities are excluded from the purview of this column. The term stadium is used in its strict sense to refer to those constructed at considerable costs and are under proper upkeep.

In column 18 the total number of permanent cinema theatres in the town is indicated. Touring talkies i.e., cinema tents of purely temporary nature, are not taken into account for this column. If there are any auditoria, drama halls and community halls in the town the total number of such units is reported in column 19.

Column 20 : Public Libraries including Reading Rooms

The number of public libraries and reading rooms are separately furnished by the side of abbreviation PL for Public Library and RR for Reading Room. Such facilities offered by educational and private institutions including those that are commercialised (called circulating libraries

in local parlance) are not covered for reporting under this column.

STATEMENT VI : TRADE, COMMERCE, INDUSTRY AND BANKING, 1989

Column 2 : Class and Name of Town

This column is the same as column 2 of the preceding statement and therefore calls for no further explanation.

Column 3 to 8 : Names of Three Most Important Commodities Imported and Names of Three Most Important Commodities Exported

For purposes of these columns, commodities for which the town serves only as a transit centre by importing for the specific purpose of exporting the commodities without any processing are not considered either as imports or as exports. Agricultural and such other allied produce may be regularly brought into the town from the neighbouring villages and sold to commission agents and wholesalers at the regulated market for further export to areas outside the town. In such cases the produce that is brought into the town is not considered as import. On the other hand, if these items are mainly consumed within the town - either as consumption goods or as raw materials by any manufacturing industry - then the commodities under reference would be regarded as imports. Thus, the commodities imported are either locally consumed in the same form or else processed further and thereafter either consumed locally or exported to other centres. This restriction apart, there is no limitation concerning the nature and quantity of the commodities that may be considered for reporting under these columns. Importance in a town is restricted basically to the few or several commodities that qualify for consideration either as imports or as exports. By and large the commodities reported under exports would coincide with the commodities reported as manufactured in the town because of the specific exclusion of transit goods. As a result, the image that some of the towns have built up over decades as traditional exporters of certain goods does not get reflected under these columns.

In these columns the importance of a commodity is reported in very general terms and decided upon in terms of the estimated volume of commodities transacted and is supposed to be based on local enquiries made by the civic authorities concerned

Columns 9 to 11 : Names of Three Most Important Commodities Manufactured

The order of importance is determined broadly by taking into consideration the volume of the total output of the commodities or the scale of operation and for these columns too it is the civic authority that has furnished the information after local enquiries. All types of manufacturing and processing irrespective of the sector to which they belong are considered and of these the three that are most important are reported.

Column 12 : Number of Banks

Information on this item has been supplied by the civic authorities after local enquiries and relates to the year 1989. If a bank has two or more branches then each such branch is regarded as a separate Bank for computing the number of banks in the town.

Column 13 : Number of Agricultural Credit Societies

The total number of agricultural co-operative credit societies functioning in the town, irrespective of the type to which they belong (i.e., primary service, multipurpose, agricultural produce marketing etc.,) is reported under this column. In quite a large number of towns agriculture is an important means of livelihood for a number of persons and agriculturists of urban areas too have for long been influenced by the co-operative movement.

Column 14 : Number of Non-Agricultural Credit Societies

Consumer co-operative societies which extend credit facilities to the members, and all other credit co-operative societies that cannot be classified as agricultural are considered for this column. Several groups of people belonging to specific categories might have formed co-operative societies to cultivate the habit of thrift and to make use of the benefit arising out of the encouragement given to the co-operative movement. All such co-operative societies are covered under this column. The information as furnished by the civic bodies after local enquiries has been merely reported here.

49. Yerava

PUBLICATION PLAN

The 1991 Census tables will be published in 33 separate series of volumes for All - India and for each State and Union Territory. The publication series is as follows:

Series No.

1. INDIA

States

2. Andhra Pradesh
3. Arunachal Pradesh
4. Assam
5. Bihar
6. Goa
7. Gujarat
8. Haryana
9. Himachal Pradesh
10. Jammu & Kashmir
11. Karnataka
12. Kerala
13. Madhya Pradesh
14. Maharashtra
15. Manipur
16. Meghalaya
17. Mizoram
18. Nagaland
19. Orissa
20. Punjab
21. Rajasthan
22. Sikkim
23. Tamil Nadu
24. Tripura
25. Uttar Pradesh
26. West Bengal

Union Territories

27. Andaman & Nicobar Islands
28. Chandigarh
29. Dadra & Nagar Haveli
30. Daman & Diu
31. Delhi
32. Lakshadweep
33. Pondicherry

In each of these series (for all - India and each State/Union Territory) the different series of tables (A Series - General Population Tables, B - Series - General Economic Tables, etc.,) will be brought out as different Parts. Apart from these, District Census Handbooks will be published for each district in the country. These will contain the PCA data for the district, the village and town primary census abstract and the village and town directories. The latter comprise compilations of statistics, external to census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For all - India and for each State and Union Territory, the census tabulations and reports will be published according to the following plan:

Part No. and subject covered	Sub-part No. if any, and the topics covered
1	2
Part I - Administration Report (for Office use only)	Part I-A - Administration Report Enumeration
	Part I-B - Administration Report Tabulation
Part II - General Population Tables	Part II-A - General Population Tables - A-Series
	Part II-B - Primary Census Abstract
Part III - General Economic Tables	Part III-A - B-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
	Part III-B - B-Series tables of second stage which will be brought out on full count. The data relating HHI, OW, Marginal Workers and Non-workers seeking/available for work will be entered on full count basis.

Part IV - Social and Cultural Tables	Part IV-A - C-Series tables of first stage covering age, sex and marital status, composition of population, single year age returns, educational levels, school attendance and bilingualism.
	Part IV-B - C-Series tables covering mother tongue, religion of population and household composition.
Part V - Migration Tables	Part V-A - D-Series tables of first stage covering tables based on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
	Part V-B - D-Series tables of second stage covering occupational classification of migrant workers. These tables are based on full count.
Part VI - Fertility Tables	F-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
Part VII - Tables on Houses and Household Amenities	H - Series tables covering census houses and the uses to which these are put, construction material of wall, roof and floor of the census houses occupied by households, tenure status of the house occupied and number of living rooms, household size, housing facilities like drinking water, electricity and toilet available to households and the fuel used by the household for cooking. These tables will also cover tables on Scheduled Castes and Scheduled Tribes. This volume will contain analytical notes also.
Part VIII - Special Tables on Scheduled Castes and Scheduled Tribes	This part will contain SC and ST series of tables for Scheduled Castes and Scheduled Tribes respectively. The data relating to Scheduled Castes and Scheduled Tribes will be entered on full count basis in the third stage and SC/ST tables will be processed on the computer on full count. These will cover population of each Scheduled Caste/Tribe, industrial categories of main and marginal workers, non-workers seeking/available for work and those who never worked before, educational level, school attendance, age, sex and marital status, composition of Scheduled Castes and Scheduled Tribes. In addition to these, the fertility tables relating to SC/ST are also covered. These tables also cover for Scheduled Tribes, their composition by religion, mother tongue and bilingualism.
Part IX - Town Directory, Survey Report on Towns and Villages	Part IX - A - Town Directory
	Part IX - B - Survey Report on selected Towns
	Part IX - C - Survey Report on selected Villages

Part X	Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes
Part XI - Census Atlas	Union and State/Union Territory Census Atlases
Part XII - District Census Handbook	Part XII - A - Village and Town Directory
	Part XII - B - Village and Town wise Primary Census Abstract

The following special papers are also planned and will be published as and when they are ready as 1991 Census papers :

(a) Special studies taken up by the Directors of Census Operations

(b) Special Areas Surveys

(c) Special Tables for Standard Urban Areas

(d) Language Survey Reports

(e) Post Enumeration Check Report

(f) Age Tables

(g) Life Tables

(h) Reports on estimates of inter-censal birth and death rates using 1981-1991 life tables and age data

(i) Development of Vital Statistics in India

Besides these special papers, some monographs based on 1991 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1991 Census monographs.

It is also proposed to carry out some special studies of 1991 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1991 Census.

It is also proposed to disseminate census tabulations and the basic data in machine readable forms such as magnetic tapes, diskettes, floppies, etc.

The District Census Handbooks will be available for sale at the Government Central Press, Bangalore and the other publications at the Office of the Director of Census Operations, Karnataka, Bangalore and the Manager of Publications, Civil Lines, New Delhi - 6.
