Appendix-III Publication Plan		179-181

FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/ modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Govt./Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third part, Part C of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (ward-wise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this Statement details on civic and other amenities were reported for the slums of Class I and Class II towns. Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations is the 1991 Census is the Community Development Block-level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluk/PS level presentation. It is expected that the presentation of Village Directory and PCA data at C.D.Block level will help the planners in formulation of micro-level developmental plans, as the C.D.Block is the lowest administrative unit for developmental planning.

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along with the corresponding codes of 1981.

This publication is a joint venture of the State Govt./UT administration and the Census Organisation. The data have been collected and compiled under the direction of Ms. Sobha Nambisan, Director of Census Operations, Karnataka on behalf of the State Govt. administration which has borne the cost of printing. The task of planning, designing and coordination of the publication was initiated by Dr.K.P.Ittaman, former Deputy Registrar General (Social Studies) and Shri M.M.Dua, Joint Director. For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M.K.Jain, the present Deputy Registrar General (S.S.). This task was carried out by Shri A.K.Singh, Deputy Director who was assisted by S/Shri V.K.Jain and Hariram, Investigators and staff. Technical guidance in the preparation of the maps was initially provided by Dr.B.K.Roy, former Deputy Registrar General (Map) and later by Mrs. Minati Ghosh, the present Deputy Registrar General (Map).

I am thankful to all those who have contributed to this project.

New Delhi
June 11, 1992.

A.R.Nanda
Registrar General, India

PREFACE

In the foreword to the 1991 series of the District Census Handbooks, Sri A.R.Nanda, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain the salient data on the population for every village and town as revealed by the 1991 Census. They also contain a wealth of information regarding these villages and towns which, although not part of the population census, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information has also considerable importance in the context of planned development.

The District Census Handbook is therefore divided into two parts: Part A containing information regarding each village and town (Village Directory and Town Directory) which is not census data and part B which contains the data on the population collected during the 1991 Census - the Primary Census Abstract. The data published in Part B was collected in February 1991 at the time of the population census. This data was then manually tabulated in the Regional Tabulation Offices set up for the purpose. Subsequently, as a part of the countrywide project taken up in collaboration with the National Informatics Centre, the Primary Census Abstract data was computerised. The data for Part B of the District Census Handbook was therefore available on tape for the entire country by November 1992. The State Informatics Officer of the National Informatics Centre at Bangalore supplied the print-outs of the Primary Census Abstract data which helped us to bring out the Part B portion of the District Census Handbook of each district fairly quickly.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in early 1990 and continued till the middle of 1992. For operational convenience, the Village Directory format was divided into two portions, one relating to the area and land use particulars and the other relating to the amenities available in each village. The relevant formats were mailed to the Deputy Commissioners of Districts and Chief Secretaries of Zilla Parishads for obtaining the villagewise particulars. Similarly the Town Directory formats were mailed to the Deputy Commissioners and Commissioners of Corporations. The villagewise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1981 District Census Handbooks.

Since the Primary Census Abstract data was available on the computer, it was decided to publish the District Census Handbooks in two separate volumes, with Part B appearing in print first.

In the preparation of the District Census Handbooks the role of the Census Directorate is that of data collector. For accomplishing this task we have had the ready co-operation of the staff of different departments of the State Government. The cost of printing of the District Census Handbooks is borne by the Government of Karnataka.

I take this opportunity to offer my grateful thanks to all the officers and officials who have been actively involved in the compilation of this volume.

I am thankful to Shri A.Venkateshan, the State Informatics Officer, National Informatics Centre, Bangalore for all the assistance he and his staff members have rendered for computerisation of the data and for preparation of the camera ready copy of the manuscripts of all the Districts.

I am deeply grateful to Shri A.R.Nanda, I.A.S., the Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Shri M.K.Jain, the present Deputy Registrar General (SS) as well as to Mrs. Minati Ghosh, Deputy Registrar General (Map).

Lastly, I am thankful to the Government of Karnataka for having readily agreed to bear the cost of printing these District Census Handbook volumes and to the Director of Printing, Stationery and Publications for the keen interest he has evinced in bringing out these publications.

Bangalore,
Date: 16-11-1992

Sobha Nambisan
Director of Census Operations,
Karnataka.

ANALYTICAL NOTE

Brief History of the District Census Handbook :-

The District Census Handbook series was, for the first time, included in the census publication programme at the 1951 census in order to satisfy the growing demand for micro-level data by the administrators, the planners and the other census data users. The District Census Handbooks sought to replace 'Part IV - Taluk Tables' and 'Part V - Village Tables' of the earlier censuses and to present the basic demographic and economic data in the form of 'Primary Census Abstract' in respect of each and every village and town within the jurisdiction of the district concerned. In addition, these volumes were to contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

At the 1961 census, the scope of the District Census Handbook was greatly enlarged by incorporating in it - (i) a descriptive account of the district, (ii) a set of non-census tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban (census enumeration block level) Primary Census Abstract containing the ninefold industrial classification of workers. In a somewhat general way, information on the availability of certain basic amenities in villages and towns, such as the sources of drinking water and educational institutions, was also presented in these volumes. These general guidelines were, by and large, followed in Karnataka too. However, the scope of the District Census Handbooks of 3 out of the then existing 19 districts, namely Bangalore, Dharwar and Mysore, was confined to the publication of the village-wise and urban (census enumeration block wise) Primary Census Abstract only.

The 1971 census witnessed an overall improvement in the matter of compilation as well as presentation of the data. A country-wide uniformity in approach and a comprehensive coverage are the hall marks of this series of publications. In 1971, the District Census Handbook was split up into three portions - (i) Part A - consisting of land use data on villages and also the data on the nature and extent of amenities and services available in the villages and towns of the district - presented in the form of Village Directory and Town Directory respectively, (ii) Part B - consisting of the Primary Census Abstract (including the nine-fold industrial classification of workers) for the district, the taluks, the towns, the villages and the census enumeration blocks in case of towns; and (iii) Part C - consisting of an analytical note based on an analysis of the census data as well as the non-census data included in the volume, a set of tables depicting the administrative statistics in minute detail, a set of statistical tables based on the census data in respect of the district and the constituent taluks and towns thereof besides a set of tables generated on the basis of the villagewise census data in association with the villagewise data on the availability of amenities. The main objective was to present a comprehensive and intelligible portrait of the district and an overview of the developmental programmes implemented in the district during the preceding decade. Publication of the District Census Handbooks was planned in such a way as to minimise the delay inherent in the compilation of a voluminous mass of data gathered from different sources. Accordingly, 'Part A', comprising the Village Directory and the Town Directory for the finalisation of which there was no apparent need to wait till the completion of the tabulation of the data gathered at the census, was to be published first and 'Part B', consisting of the Village/Urban Primary Census Abstract was to be released next. A lower priority was assigned to 'Part C' for the obvious reason that besides administrative statistics it was to include a set of socio - demographic and economic tables generated on the basis of the data gathered at the census and an analytical note prepared thereof. In Karnataka, however, 'Part A' and 'Part B' portions of the District Census Handbooks were combined together and published in a single volume for each district except Bangalore. In the case of Bangalore District, since it was felt that the size of such a combined volume would be unweildy, Part A and Part B were published separately. As regards 'Part C', compilation of data took more time than anticipated and, in addition, there was an inordinate delay in executing the printing job at the State

Directorate of Printing. As a result, only a portion of Part C (depicting some of the census tables) relating to Bangalore District was published somewhat belatedly and the proposal to publish the remaining portion of Part C for Bangalore District as well as the entire portion of Part C for the other districts was finally abandoned.

Instead of witnessing an expansion as in the past two censuses the scope of the 1981 series of the District Census Handbooks was curtailed to a considerable extent in that it was confined to the publication of Village Directory, Town Directory and the Village/Urban Primary Census Abstract. Thus, at the initial stage itself there was no proposal to compile and publish the administrative statistics and the various socio-demographic and economic tables based on the census data, that is, the portion which constituted 'Part C' of the 1971 series. But for this change, the approach in 1981 regarding uniformity and comprehensiveness were very much the same as in 1971. In order to avoid delay in publication, as in the past, the District Census Handbook was proposed to be published in two parts, namely, 'Part A' consisting of the Village Directory and Town Directory and 'Part B' consisting of the Village/Urban Primary Census Abstract besides the Special Primary Census Abstracts at taluk/town level in respect of the Scheduled Castes and Scheduled Tribes population of the district.

At the 1981 census, the contents of the Village Directory and the Town Directory were slightly enlarged and the formats were restructured. In the Village Directory all the amenities except power supply were brought together under a broad heading with the provision that 'in case an amenity is not available in the referent village, the distance to the nearest place where that particular amenity is available may be indicated in broad ranges'. A new item 'approach to the village' was included. In the remarks column, a provision was made to report the number of copies of newspapers in circulation in the village as also the number of motor cars, the number of motor cycles and the number of tractors available in the village. Further, in order to examine whether there is any correlation between the availability of amenities and the population size of a village, an additional column was provided in the Village Directory to indicate the population and number of households. The contents of Part A were further enlarged by including two appendices, namely, a list of villages not having any amenities and a distribution of villages according to the proportions of Scheduled Castes and Scheduled Tribes in the total population of the village. The Town Directory formats were also modified by the addition of a few items such as class of town, population, Scheduled Castes and Scheduled Tribes population, decadal growth rate of population, working women's hostel, adult literacy classes/centres, storage system regarding drinking water supply etc., and also by providing for recording the information about the nearest place (and distance) having educational, medical and fire-fighting facilities in case such a facility is not available in the referent town. As compared to 1971, while one statement indicating religion-wise population of the town was dropped, another statement to provide information about the amenities available in notified slums in Class I and Class II towns was added. As regards the Primary Census Abstract of towns, the urban block-wise presentation of data was given up and details were presented only upto the level of Wards/Divisions. However, information on the number of persons belonging to Scheduled Castes and Scheduled Tribes was furnished for each census enumeration block within the town in the form of an appendix and an annexure thereto provided the description of the boundaries of each census enumeration block. Further, instead of the nine-fold classification of workers adopted at the 1971 census, on this occasion the classification was restricted to 4 categories. In Karnataka, in 1981 also, both Part A and Part B portions of the District Census Handbooks were published together in a single volume for each district. However, because of certain technical compulsions, all the information relating to Scheduled Castes and Scheduled Tribes was excluded from the main formats and was presented separately at the end in the form of a Supplement (separate booklets were brought out in the case of Bidar and Mandya Districts).

2. Scope of the 1991 District Census Handbooks:

As in 1981, in 1991 too, the District Census Handbooks are proposed to be brought out in two portions, namely Part A consisting of the Village Directory and the Town Directory and Part B

consisting of the Village/Urban ward-wise Primary Census Abstract in addition to the District Primary Census Abstract and the Special Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes. Though, the scope of the 1991 series of the District Census Handbooks has, by and large, remained the same as in 1981, a few significant changes have been made in the Village Directory format as well as the Primary Census Abstract format. In Karnataka, unlike at the previous censuses, on this occasion, the 'Part A' and 'Part B' portions of the District Census Handbooks of each district are being brought out in separate volumes.

The manner of presentation of data has also undergone a significant change in that the Village Directory and the Primary Census Abstract data are presented according to the location of villages and towns within the jurisdiction of a Community Development Block rather than their location within a taluk*. In other words, the traditional practice of taluk-level presentation of data has now been givenup in preference to the Community Development Block level presentation of data which is considered as more meaningful in the present day context. Since C.D.Block is the lowest administrative unit for developmental planning, the choice of the C.D. Block as the unit for data presentation is expected to help the planners in formulating micro-level developmental plans. Another innovation at the 1991 census is the arrangements made for the dissemination of the data in collaboration with the National Informatics Centre through its country-wide computer network. In the published volumes of the District Census Handbooks, therefore, the computer codes assigned to the villages in the 1991 census and the corresponding codes in 1981 are presented so as to facilitate the data users who may prefer to use the data either from magnetic tapes or floppies.

(i) Village Directory :

The Village Directory format adopted for the 1991 series has 18 columns. When examined with reference to the 1981 format it will be noticed that two columns have now been left out - while one of these columns refers to the 'staple food' the other refers to the 'remarks' under which, information about the places of religious, historical or archaeological interest in the village as also information about the number of copies of newspapers in circulation, the number of motor cars, motor-bicycles and tractors available in villages was published in 1981. As compared to 1981, there is no change in the scope and coverage of the information presented in the 18 columns of which 8 are devoted for amenities and 6 are meant for indicating the area of the village and the land use pattern. The remaining four columns are meant for indicating the location code and name of the village, total population and the number of households enumerated in the village and the name of the nearest town as also the distance to that town. The aspects covered under the amenities are: educational, medical, sources of drinking water supply, postal and telegraph, weekly market, communication, nature of approach road and power supply. Further, if a village did not have any educational facility at all, instead of merely reporting the fact and stopping at that, an indication of the distance (in ranges) that the villagers have to traverse to reach a place with educational facilities (at the basic level) is reported. The same procedure of reporting is adopted regarding medical facilities, drinking water supply, postal and communication as well as weekly market facilities. The distance ranges adopted for reporting are the same as in 1981, namely -5 km, 5 - 10 km and 10+km. In an explanatory note, which precedes the presentation of the Village Directory Statements, details about the abbreviations used under various columns are furnished.

* *In Karnataka, the "Taluk Panchayat Samiti" corresponds to the Community Development Block, and for the sake of maintaining uniformity with the all-India pattern, the term C.D.Block has been used throughout in the District Census Handbooks. The jurisdiction of a Taluk Panchayat Samiti is coterminus with that of the corresponding Taluk but excludes the statutory towns.*

The main agency which has furnished the villagewise information on amenities is the Zilla Parishad which in turn has collected the relevant particulars through its field formations, namely the Chief Executive Officers (i.e., the Block Development Officers) of the various *Taluk Panchayat Samitis*. These details were examined for consistency as well as with reference to the particulars reported in 1981 and cases of deterioration or of abnormal developments were referred back for reverification and rectification. For instance, as compared to 1981, for several villages, Wells and Tanks did not find a mention as a source of drinking water supply. When referred back, the concerned Chief Executive Officers clarified that in most of these cases, the drinking water wells of yester years have either dried up or fallen into disuse on account of the increasing number of borewells drilled in such villages and also because of the implementation of the National Rural Water Supply Scheme, the Mini-Water Supply Scheme and Accelerated Water Supply Scheme etc. So also regarding the availability of pucca approach road facility several instances of deterioration were noticed. Such cases too were referred back so that the factual data may be verified again and reported for publication. Information about the number of educational institutions, nature of government run medical institutions and postal, phonocom and telegraph facilities as furnished by these officers have been cross-checked with the data obtained from the concerned Departments as well to ensure a higher level of reliability.

In case of uninhabited villages, i.e., villages which returned 'nil' population at the 1991 census count, except the name and the total area no other information is furnished. Instead of putting a dash under each column to indicate this fact, the word 'uninhabited' is printed along the line.

In order to facilitate easy reference, an alphabetical list of villages is given at the begining in respect of each C.D.Block. This list indicates the code numbers assigned to the villages for purposes of census enumeration as well as the computer codes assigned (at the stage of computerisation) as also the corresponding codes according to the 1981 census. At the end of the Village Directory the following appendices are given:- C.D. Block-wise abstract of amenities; list of villages not having any amenities except Drinking Water, land utilisation data in respect of non-municipal towns and distribution of villages according to the proportion of Scheduled Castes population and Scheduled Tribes population.

(ii) Town Directory :

As in 1981, in 1991 too, there are seven statements which furnish information on the following aspects - growth history; physical aspects and locational particulars; municipal finance; civic and other amenities; civic amenities available in the notified slums of Class I and Class II towns; medical, educational, recreational and cultural facilities; and trade, commerce, industry and banking. The scope of the various column headings adopted in 1981 has remained unchanged in 1991. However, in Statement-I, slight modifications have been made to accomodate the 1991 census data - an additional column is provided for indicating the 1991 population and the growth rate registered by the town during the decade 1981-91. In Statement-I an additional column has been provided for indicating the name of the C.D.Block within the jurisdiction of which the referent town is located. It may be incidentally mentioned that, in Karnataka, the civic bodies functioning in the Statutory Towns do not fall within the administrative jurisdiction of the C.D.Blocks (i.e., Taluk Panchayat Samitis).

In the Town Directory statements, the towns are arranged in an alphabetical order of their names and the aggregate particulars about urban agglomerations if any in the district have also been furnished in the same order. Where an urban agglomeration includes two or more independent towns, the names of these constituent towns are shown in the correct sequence as per the alphabetical arrangement of their names. But, the details which ought to have been furnished in the subsequent columns have been skipped with a view to avoiding repetition. Instead, immediately after the name of the town, a cross reference is given by printing the message "see ..... urban agglomeration". The name of the core town of the urban agglomeration too appears at its correct sequence with the legend printed thereafter and immediately below that, i.e., in the next line the same name with the suffix urban agglomeration appears again without bearing any

serial number. Against this name the cumulative totals for the urban agglomeration as a statistical unit are presented wherever such a procedure is relevant and meaningful. This line is then followed by those relating to the constituent towns of the urban agglomeration starting with the name of the core town and followed by the others arranged in an alphabetical order of their names. This procedure, it may be recalled, is the same as that adopted in 1971 as well as in 1981 and this enables one to have a fairly good assessment of the data relating to the smaller civic administrative units that form part of the larger unit and also of the aggregate data relating to the larger unit itself. In case there are 'outgrowths' which are not 'urban areas' in their own right, the particulars relating to such areas are merged with the data relating to the concerned core town. Such towns which have 'outgrowths' are marked out by an asterisk mark and for all purposes, the term 'town' would cover the core town as well as its outgrowths. In an appendix the names of the revenue villages which have been identified as outgrowths and the population thereof are indicated separately. In the case of villages certain parts of which are regarded as outgrowths while the other parts are considered as 'rural', the data relating to the outgrowths (i.e., the urban component) is included in the Town Directory statements and the data pertaining to the rest of the portion retained in the rural frame appears in the Village Directory. In Statements II, III and VI where it is not relevant to combine the data for the urban agglomeration as a whole, the legend 'see the constituent towns' is printed against the name of the urban agglomeration instead of allowing the entire line to remain blank.

The particulars furnished in Statement I which deals with the growth history are entirely based on the current as well as the previous censuses. As such, this has been compiled in the Census Directorate without seeking information from the concerned civic bodies. The details presented in the remaining statements have been furnished mainly by the concerned civic authorities such as the Municipal Commissioners, Chief Officers of towns, Secretaries of Mandal Panchayats, Administrative Officers etc. Except for the information regarding municipal finance, most of the information on other apsects had to be gathered by the civic authorities from several offices and institutions located in the town through correspondence and or by deputing officials for the purpose. The particulars so furnished were scrutinised in the first stage and cases of abnormal variations as compared to the situation in 1980 and also inconsistencies were referred back to the reporting agency for reverification and rectification so as to ensure that the details now given in the Town Directory represent the factual position.

The scope of the information presented under various columns and the abbreviations used are explained in a note which precedes the presentation of the Town Directory statements.

(iii) Primary Census Abstract :

The Primary Census Abstract is presented village-wise in the case of 'rural' areas and town-wise (upto ward or division level) in the case of urban areas. The outgrowths of a town are treated at par with a ward or division of the core town irrespective of the number of census enumeration blocks into which it is constituted. Within the district, the Community Development Blocks are arranged in the alphabetical order of their names in English and covered one after the other in that order. For each C.D.Block, the total figures with the rural-urban break-up is given first and this is followed by the village-wise data and then by the ward-wise data for the towns if any, within the jurisdiction of the C.D.Block. In the case of a village of which only a portion has been incorporated in a town or has been recognised as an outgrowth of a town, the details relating to only that portion which is not so incorporated or so recognised but has been retained in the rural frame is presented under various columns. The names of villages (and their respective areas) which are fully included in urban areas or have been recognised as outgrowths of towns for purposes of the 1991 Census (but are retained in the jurisdictional lists of the Survey and Settlement authorities) if any within the boundaries of the C.D.Block are indicated in the flyleaf which precedes the PCA statement for the C.D.Block

After presenting the PCA data for all the villages and towns covered by the C.D.Blocks in the district,

the PCA data relating to all the urban areas of the district (i.e., statutory as well as non-statutory towns) are furnished. For this purpose, the towns/urban agglomerations are arranged in an ascending order of their location code numbers. And, for each town the ward or division-wise details are presented here.

In Karnataka, as already mentioned, the jurisdiction of a C.D.Block is coterminus with that of the Taluk of the same name, but excludes the areas incorporated in statutory towns and cities. By and large, a C.D.Block corresponds to the rural areas of the taluk. However, if there are any non-municipal census towns and areas which have been identified as outgrowths of statutory towns within the jurisdiction of the taluk, then such towns and outgrowths are also regarded as lying within the jurisdiction of the concerned C.D.Block. The PCA particulars relating to such units are presented under the concerned C.D.Blocks against the urban category and are repeated again at the end under the caption 'District Urban'.

In the case of an urban agglomeration, the aggregate figures obtained by the addition of the data relating to the constituent towns and outgrowths thereof if any are presented against its name. Thereafter, the data for the constituent towns starting from the core town including the location code, are presented in a continuous sequence. In case a town has outgrowths (which are not towns in their own right) in the first line the aggregates relating to the core town as well as its outgrowths are given and this is then followed by the details relating to the core town and the outgrowths separately. Each outgrowth is treated at par with a municipal ward or division while presenting the ward-wise PCA for towns.

3. Brief note on Census concepts :

Census taking is a massive operation carried out in a short span of time with the active participation of a very large number of census enumerators. The reference moment for the 1991 census count is the sunrise of March 1, 1991. However, the enumeration of the population was spread over a period of 20 days from 9-2-1991 to 28-2-1991 followed by a revisional round from 1-3-1991 to 5-3-1991 for updating the population count with reference to the sunrise on March 1, 1991. The questionnaires canvassed by the enumerators, namely the Household Schedule and the Individual Slip are brief in their wordings and the concepts used for purposes of the 1991 Census Operations and the manner in which the schedules are to be filled in have been explained in a booklet entitled Instructions to Enumerators for filling up the Household Schedule and the Individual Slip. Some of the important concepts and the relevant explanations are indicated in the following paragraphs.

(i) **Urban areas** :- The definition adopted in 1961 and adhered to in 1971 as well as in 1981 (though with a slight modification regarding the classification of fishing and forestry) has been retained for the 1991 census also. According to this definition the urban areas include :

i) all places with a Municipality, Corporation, Cantonment Board or Notified Town Area Committees, etc.

ii) all other places which satisfy the following criteria :

a) a minimum population of 5,000

b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits and

c) a density of population of at least 400 per square kilometre (1000 per square mile)

d) all places which, though not satisfying the above criteria, had pronounced urban characteristics.

(ii) **Urban Agglomeration:** This concept, which replaced the concept of 'town-group' in 1971, has been retained for the 1991 census. It has been observed that very often railway colonies, university campuses, port areas, military camps and large residential colonies etc., come up quite adjacent to, but situated outside the statutory limits of cities and towns. Such areas may not by themselves qualify to be treated as towns. But if they form a continuous spread with the town they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit called "urban

agglomeration". An urban agglomeration may consist of :

a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

b) One town with similar outgrowths or two or more adjoining towns with their outgrowths as in (a) ; or

c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Geographical contiguity with the statutory limits of the core town is the main factor in determining whether or not a nearby satellite town or an outgrowth is to be included in the urban agglomeration. This is purely a statistical concept and for carrying out the actual census, the administrative jurisdictions of the city or the towns concerned as well as of the outgrowths have been kept quite intact. The data are presented for the urban agglomeration as a whole and also severally for each of the constituent units.

(iii) **Rural areas - i.e., villages** : Areas which are not classified as 'urban' according to the definition given above constitute the rural areas. The basic unit for rural areas is the revenue village which has definite surveyed boundaries. In the case of unsurveyed villages, the boundaries as determined by the local usage have been adopted. The revenue village may consist of a single nucleated settlement or comprise of several settlements or clusters of houses located at several places within the territorial limits of the village or the village may not be having any human settlements at all (i.e., it may be totally uninhabited). The census village and the revenue village are identical in the matter of jurisdiction. However, there are a few exceptions to this general rule:

1) When the main settlement of the village with or without the surrounding open lands is constituted into an urban area, the remaining tracts of the revenue village are together treated as a separate unit for purposes of census i.e., the truncated portion itself is considered as an independent revenue village.

2) When outlying portions of certain revenue villages are incorporated into the limits of urban areas by a Government Notification such areas, whether populated or not, are excluded from the revenue village concerned and the village boundaries are redefined for census purposes.

3) Revenue villages which are completely incorporated in the limits of urban areas or else, are submerged completely under reservoir projects but are still retained in the jurisdictional lists of the Survey and Settlement authorities pending a resurvey and such other procedures, are taken note of as revenue villages but are omitted for census purposes i.e., these are not treated as census villages. Similarly, entire revenue villages, which have been identified as outgrowths of urban areas for purposes of 1991 census are treated not as census villages but as urban areas. The names of such villages, if any, in a Taluk/C.D.Block are indicated in a fly leaf.

4) If there are forest areas that do not form part of any of the revenue villages then such areas are identified clearly and the smallest administrative unit into which such forest areas are divided (eg.Forest Beat) is reckoned as the census village. A Forest Range may consist of several such census villages. (In Karnataka this phenomenon is noticeable only in Kollegal Taluk of Mysore District).

(iv) **Census Enumeration Block** : The smallest unit adopted for census taking is the Census Enumeration Block. Generally, the towns and cities are divided into wards or divisions and, wherever such units exist, their distinctive identities have been maintained. The geographical area comprised in each such ward or division or, the town in its entirety, is constituted into several blocks in such a way that every bit of land specifically stands included in one or the other enumeration block and also that there is no over-lapping of areas. In the urban areas, the Census Enumeration Blocks are constituted in such a way that each such Block contains about 120 households covering a population of about 600 persons. However, in view of the condition that

each block should have clear-cut boundaries easily recognisable on the field, blocks which are either larger or smaller than the norm have also been constituted. In the case of non-municipal towns, if the town boundaries are not specifically notified, the jurisdiction of the entire revenue village concerned is regarded as the jurisdiction of the town as well. In the case of towns which are under the administration of Mandal Panchayats, the Panchayat jurisdiction need not necessarily be identical with the jurisdiction of the non-municipal census town.

In the case of villages, depending upon the population data based on the Houselisting Operations carried out during 1990, each village has been constituted into one or more number of Census Enumeration Blocks. The work-load norm for the rural areas is 150 households covering an approximate population of 750 persons. However, numerous Census Enumeration Blocks with below-norm population have been constituted and a single enumerator has quite often been entrusted with the enumeration work in 2 or more contiguous blocks so as to ensure that the aggregate population is quite close to the norm. Further, in each village care has been taken to ensure that no bit of land belonging to that village is left out of consideration while constituting the Blocks. Each hamlet or island, if any, found within the jurisdiction of the village - irrespective of its population size - has been constituted into a separate Block in order to maintain its geographical identity. Further, even the villages known to be uninhabited at the time of houselisting operations have been constituted into separate blocks. In other words, a complete coverage of the territorial jurisdiction of each and every village has been ensured.

(v) **Location Code Number** : Every State in the Country, every District in the State, every Taluk or Town in the District, every C.D. Block (or its equivalent) in the District, every village in the taluk and every ward or division in the city or town and every enumeration block in the village or town is assigned a number in a particular order for carrying out the census enumeration. When these numbers are written side by side in the same order, starting from the State and separated by an oblique mark, the identity of any particular census enumeration block can be known quite easily. The numbers assigned are in Arabic numerals, except in the case of towns in which case Roman numerals have been adopted. For assigning the location code numbers the States in the Country, the Districts in the State, the Towns in the District and the Taluks/C.D.Blocks in the District are arranged in the alphabetical order of their names. The villages in a taluk are organised into revenue circles or hoblis for administrative purposes and each such unit will have a headquarter town or village. The identity of such units is maintained while assigning the location code numbers. Starting from the circle of which the Taluk Headquarters happens to be the Circle headquarters as well, the villages in its jurisdiction are serially numbered by proceeding in a clockwise direction or in a serpentine manner starting from the north-west corner. After exhausting all the villages in that circle, the villages of the adjacent circle are assigned numbers in the same manner. The numbering of villages run continuously for the Taluk through the different Circles or Hoblis.

The entire set of the 1991 census data relating to the village directory and the village/urban ward-wise PCA has been computerised. For this purpose a separate code structure has been developed. The computer codes assigned to the villages in each Taluk or C.D.Block are indicated in the alphabetical list of villages along with the corresponding location code numbers assigned for enumeration purposes. So also particulars about the codes assigned to towns are indicated in the alphabetical list of towns which precedes the presentation of the PCA statements in respect of the urban areas of the district.

(vi) **Building** : A building is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-*cum*-residence, workshop-*cum*-residence, office-*cum*-residence, etc.

(vii) **Census House** : A 'census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

(viii) **Household** : A 'household' is a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of households having unrelated members are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashramas* etc. These are called 'Institutional Households'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'. If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person would be treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen. There may be a household which does not have a house to live in and may temporarily dwell on the roadside pavement, in hume pipes, temples, *mantaps*, platforms etc., or move about from place to place resting underneath shade-bearing trees, pavements and verandahs of public or private buildings. Such households, referred to as 'Houseless Households' for census purposes, were enumerated on the night of February 28, 1991.

ix) **Criteria for enumeration of a person in a particular household :**

1) All those who normally stay and are present in that household during the entire period of enumeration i.e., from February 9 to February 28, 1991 (both days inclusive);

2) All those who are known to be normally residing and had actually stayed during a part of the enumeration period (February 9 - 28, 1991) but are not present at the time of the enumerator's visit ;

3) Also those who are known to be normally residing and are not present at the time of the enumerator's visit but are expected to return before February 28, 1991 and

4) Visitors who are present in the household censused and are away from the place(s) of their usual residence during the entire enumeration period. For the purpose of enumeration such visitors will be treated as normal residents of the household in which they are actually found during the enumeration period provided they have not been enumerated elsewhere.

(x) **Literate** : A person who can both read and write with understanding in any language is 'literate'. A person who can merely read but cannot write, is not 'literate'. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 6 years or less are treated as illiterate.

(xi) **Workers and Non-workers** : For census purposes 'work' is defined as 'participation in any economically productive activity'. Such participation may be physical or mental in nature and would involve not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise. The reference period for determining whether a person is a worker or a non-worker is the year i.e., the 365 days, preceding the date of enumeration. The criterion is liberal and, even a person who has participated in the production of goods and services for a very brief period is entitled to be categorised as a worker. Depending upon the nature of his or her activity during the reference period, every person enumerated at the census is classified as either a worker or a non-worker.

Among 'workers' however there are two categories:

Main Workers : Those who have worked for a major part of the year i.e., for 183 days or more (6 months or more) during the reference period even though this may be in broken spells and in different occupations.

Marginal Workers .: Those who have not worked for a major part of the year under reference i.e., those who have worked for less than six months (i.e., for less than 183 days) during the entire reference period.

In view of the past experience that women are often classified as non-workers because of non-reporting of their work or as those who have not worked for a major part of the year, special efforts have been made at the 1991 census for eliciting accurate information by asking probing questions.

In respect of main workers as also marginal workers, further details on the sector of economy in which they worked, the actual nature of work done by them, their employment status (i.e., employer, employee, unpaid family worker or own account single worker) have been gathered at the census.

Important terms such as cultivators, agricultural labourers and household industry are explained below.

a) **Cultivators:** For purposes of census, a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation as well. A person who has given out his or her land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct the cultivation of land, will not be treated as 'cultivator'. Similarly, a person working in another person's land for wages in cash or kind or a combination of both will not be treated as ' cultivator'.

Cultivation involves ploughing, sowing and harvesting. For certain reasons, the growing of certain crops is not considered as cultivation and a person engaged in growing of such crops is not regarded as a cultivator. A person can be classified as cultivator or not, *only on the basis of the crops grown*. The growing of the following crops is considered as cultivation.

1. Cereal and Millet crops : Paddy, wheat, jowar, bajra, maize, ragi, barley, etc.
2. Pulses : Arhar, gram, kesari, moong, masur, urd, etc.
3. Fibre crops : Raw cotton, jute, mesta, sunhemp and kindred crops.
4. Oil Seeds : Sesamum, ground-nut, rape seed, mustard, linseed, sunflower, castor, etc.
5. Cash crop : Sugarcane

The growing of the following crops *is not considered* as cultivation :

1. Plantation crops : Tea, coffee, rubber, tobacco, pepper, cardamom, etc.
2. Edible nuts (other than groundnut) : Walnut, almond, cashewnut, etc.
3. Fruits : Bananas, apples, grapes, mangoes, oranges etc.
4. Coconut
5. Ganja, cinchona, opium and medicinal plants.
6. Betel nuts (areca)
7. Flowers
8. Roots and tubers, chillies and spices
9. Vegetables
10. Other crops not specifically included under cultivation.

b) **Agricultural Labourer** : A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation. The agricultural labourer has no right of lease or contract on the land on which he or she works.

c) **Household Industry** : Household Industry is defined as an industry conducted by the head of the household himself or herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in the case of urban areas. The larger proportion of workers in a household industry would consist of members of the household including the head. The industry

should not be run on the scale of a registered factory which would qualify to be registered under the Indian Factories Act. Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. The goods produced should not be exclusively for consumption by the household itself but should be wholly or partly for sale.

d) **Other Workers** : All workers, i.e., those who have been engaged in some economic activity during the reference period of last one year, who are not Cultivators or Agricultural Labourers or workers in Household Industry were categorised as 'Other Workers' (OW) at the time of census enumeration and further details about the nature of industry, trade or service in which they were engaged were gathered by the enumerators. On the basis of this descriptive information, at the tabulation stage, each such worker has been further categorised as belonging to one or the other of the following Industrial Categories based on Revised National Industrial Classification - 1987.

III Workers in livestock, forestry, fishing, hunting, plantations, orchards and allied activities;

IV Workers in mining and quarrying activities;

V(b) Workers in manufacturing, processing, servicing and repairs which are carried on as other than household industry;

VI Workers in construction;

VII Workers in trade and commerce;

VIII Workers in transport, storage and communications, and

IX Workers in other services.

(xii) **Non-workers** : All those who have not at all participated in any economic activity during the reference period of one year preceding the date of enumeration are classified as non-workers.

Depending upon the manner in which such non-workers engaged themselves for most of the time during the reference period of one year they are classified into one or the other of the following six categories at the time of census enumeration itself. However, the Primary Census Abstract presented in this volume does not furnish details according to the categories of non-workers but indicates the total number of non-workers by sex.

a) **Household duties** : This covers all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year.

b) **Students** : This will cover all full-time students including children attending school.

c) **Dependents** : This category includes all dependents such as infants, children not attending school and permanently disabled from work because of illness or old age. Dependents will include even able bodied persons who cannot be categorised in any other category of non-workers but are dependent on others.

d) **Retired Persons or Rentiers** : A person who has retired from service and is doing no other work i.e., not employed again in some full time work or not engaged in some other work such as cultivation, business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he or she does not have to work, will come under this category.

e) **Beggars** : This will cover beggars, vagrants or cases such as persons without indication or source of income and those with unspecified sources of subsistence who are not engaged in any economically productive work.

f) **Inmates of Institutions** : This will cover convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions. But an undertrial prisoner enumerated in a jail would be recorded for the work he or she was doing before he or she was apprehended. Similarly, a person temporarily in a hospital or similar institutions would be recorded for the kind of work he or she was doing before he or she was admitted into the hospital or institution. But, for a long-term undertrial prisoner or convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work would not be taken into consideration. A person will be considered as 'Long-term' inmate if he or she is in such an institution for 6 months or more.

4. Brief History of the District

Kodagu, known as Coorg during the British period, is a land of great antiquity. Its name is derived from 'Kodi malenad' which connotes a dense forest land with steep sided hills. The legendary account known as *Kaveri mahatmya* which extols the merits of the river Kaveri (more commonly spelt as Cauvery), mentions this part of the country by the three names of *Brahma Kshetra, Matsya Desha* and *Kroda Desha*. According to the legend, Lopamudra, the daughter of Brahma, was adopted by sage Kavera Muni and, on that account, she came to be known as Kaveri. She was later married to sage Agastya. Ultimately she was transformed into a river, viz., the river Cauvery, at Talakaveri in Kodagu district and has eversince been regarded as the presiding Goddess of Kodagu.

Numerous sepulchral remains which have been discovered in the district have amply demonstrated that this district was inhabited by man during the pre-historic times. These cairns are similar to such remains found all over South India and indicate that before the dawn of modern civilization, the same set of people who were dwelling in various parts of South India had their settlements in Kodagu district as well.

The earliest references to Kodagu in historical records are to be found in the Tamil literature of the Sangam period. *Kudakam* i.e., Kodagu has been mentioned as the western limit of the Pandyan Kingdom. The history of Kodagu district can be gathered from numerous inscriptions covering a period of about 15 centuries commencing from the second century A.D. It can be gleaned from such records that as early as from the 5th century A.D., the Gangas of Talkad ruled over the southern and central parts of Kodagu through their governors and local chieftains. During the same period, the Kadambas of Banavasi ruled over the northern parts of the district. In the 11th century A.D., the Cholas overthrew the Gangas and assumed suzerain powers over Kodagu as well. The supremacy of the Cholas in this region lasted for over a hundred years. From about the 10th century till the beginning of the 13th century, the early Chengalvas administered a major portion of Kodagu district. They functioned as local chiefs under the suzerainty of the Cholas at first and later on in the same capacity under the suzerainty of the Hoysalas. However, depending upon the strength or weakness of the ruling monarch, i.e., the prevailing suzerain, the Chengalvas were either loyal and submissive or were rebellious and independent. They professed Jainism and had their capital at Palpare. During the 13th century, the Chengalvas embraced the Veerashaiva faith. The later Chengalvas ruled over Kodagu and parts of Piriyapatna taluk of Mysore district from the 15th to the 17th century A.D. They had their capital at Nanjarajapatna. Periya Deva Raja; who founded the Piriyapatna town, is the most famous king of this dynasty. The later Chengalvas were subordinate to the Vijayanagara monarchs. The last King of this line, viz., Vira Raja, fell fighting against Kanthirava Narasa Raja Wodeyar of Mysore.

During the period from 14th to 16th century A.D., petty chiefs, called Nayakas, rose to prominence in this region and there used to be constant warfare among them for gaining supremacy. This situation opened the way for the establishment of a new dynasty of rulers in Kodagu, viz., the dynasty of the Haleri Rajas. Vira Raja, a scion of the Ikkeri family (also known as the Nayakas of Keladi), is the founder of this dynasty. He and his successors subdued the petty chiefs and consolidated their power over the area which now constitutes Kodagu district. Mudduraja I (1633-87) built a mud fort at Madikeri and made it his capital in 1681 A.D. His successor, Dodda Virappa Wodeyar (1687-1736) waged wars against the Rajas of Mysore on the one hand and the Rajas of Chirakkal on the other. He extended his kingdom to include Sulya in the north (belongs to Dakshin Kannad district at present). During the reign of his successor viz., Chikka Virappa Wodeyar (1736-1766), Kodagu kingdom attracted the attention of Haidar Ali of Mysore. On the death of Chikka Virappa Wodeyar in 1766 A.D., a dispute arose about his successor to the throne and this dispute provided an opportunity to Haidar Ali for the first time to intervene in the affairs of

**Source : Gazetteer of India, Mysore State, Kodagu District, Bangalore 1966 and Census of India 1981, DCHB, Kodagu District, Bangalore.*

Kodagu as a mediator. Lingaraja (1775-1780) tried to consolidate his position and occupied parts of Wynad (currently part of Kerala State) as well. In early 1780, Lingaraja died. On this occasion, on the pretense of being the guardian of the minor prince, Haidar Ali occupied Kodagu kingdom. With this began a long struggle which lasted for 9 years. It was during this period that Tipu Sultan (who had in the meanwhile succeeded Haidar Ali) is said to have taken 70,000 Kodavas as prisoners and shifted them to places outside the district and at the same time tried to populate Kodagu with Muslims brought from outside. During this period, the rightful King Vira Rajendra was imprisoned and kept in confinement in Piriyapatna. In 1788, Vira Rajendra escaped from the prison and established friendship with the British. Subsequently, at the conclusion of the III Mysore War between the British and Tipu Sultan of Mysore, the latter was forced to hand over the possession of Kodagu to the British, who, in turn, restored the kingdom to Vira Rajendra. From then on, till 1834, Kodagu was ruled by the Haleri Rajas under the suzerainty of the British.

In 1834, during the reign of Chikka Vira Rajendra (1820-1834), serious differences arose between the Raja and the British. As a consequence thereof, the administrative powers vested till then with the Raja were withdrawn and Kodagu came to be administered directly by the British. This position continued till the dawn of Independence in 1947. Soon after the attainment of Independence, Kodagu was constituted into a 'Part C' State in the Union of India. In 1956, as a consequence of the Reorganisation of States, Kodagu was merged with the erstwhile Mysore State and was constituted into a separate district without any change in its territorial jurisdiction. As the original name of the district was restored on 31st January 1977 (vide G.O.No.RDF 6 TNV 76), the name given to the district by the British viz., Coorg, is no longer in use for official purposes. With effect from the date mentioned above, the original name of the district headquarters town was also restored i.e., the name of the district headquarters town was officially changed from Mercara to Madikeri. Kodagu is the smallest among the 20 districts of the State and is comprised of only 3 taluks which are named after the respective taluk headquarter towns of Madikeri, Somvarpet and Virajpet.

5. Location and Physical Aspects *

Kodagu district covers a geographical area of 4102 square kilometres and lies in the south-western corner of Karnataka State between 11 degree 56 minutes and 12 degree 52 minutes North Latitude and 75 degree 22 minutes and 76 degree 12 minutes East Longitude. It is bounded on the north-west and the western half of its northern border by Dakshin Kannad district; on the eastern half of its northern border and on the north-east by Hassan district; on the east and the south-eastern corner by Mysore district and on the south and the west by the Kerala State. In the north-eastern portion of the district, a narrow strip of land measuring about 20 km in length and about 10 km in breadth protrudes into Hassan district.

Kodagu is a picturesque high land which is situated of the slopes on the western ghats and is clothed with lush green forests and plantations. The landscape is broken by cultivated valleys at numerous places. The physical features of the district are varied. The southern, western and the north-western portions are intersected by a network of hills and dales and are, to a large extent, covered with forests. The landscape on the north-eastern and the eastern portions is different and resembles the plains noticeable in the adjoining Mysore district.

The district has a mountainous configuration which presents a grand panorama of verdant valleys, ravines, fast-flowing streams, lofty peaks and awe-inspiring spurs. Towards the west, the summit of the Western Ghats attain great heights and the entire western portion of the district is an unbroken chain of hills which appears like a formidable wall from the foot hills on Kerala side. The highest peak of the district is Tadiondamal (1908 Metres MSL). Close to this peak there is the lofty Sannamale mountain which overlooks the Kodamtora pass and is regarded as a sacred place. From the main chain of hills of the ghats and Bengunad ridge

* *Source : Gazetteer of India - Mysore State - Kodagu District, Bangalore, 1966*

numerous ridges jut out on either side The table land of Madikeri maintains an average altitude of about 1166 Metres MSL and slopes down a little to reach 910 Metres near Kushalnagar This plateau is bounded on the west by the continuation of the western ghats which culminate near Bisle pass in Pushpagiri hill (about 1870 Metres MSL) which is a remarkable hill of precipitous height and is of a peculiar shape

The main drainage of the district is eastwards However, there are a few mountain streams of the western declivities on the ghats which flow westward The rivers of the district are perennial streams with a plentiful supply of water all through the year The sources of the rivers and streams are high up in the mountains and these flow through a highly rugged terrain as a result of which these rivers and streams are not suitable either for navigation or for providing waters for assured irrigation Cauvery, Hemavathi, Lakshmanatirtha and Barpole are the important rivers of the district

Cauvery is the main river of the district It has its origin in the Brahmagiri mountains at a place called Talakaveri, where the western ghats form a sharp angle with the Bengunad range Cauvery is one among the seven most sacred rivers of the country and there are several myths and legends which are associated with its origin Its course in Kodagu district is very tortuous In dry seasons the river is fordable at almost all points despite a plentiful flow of water During the monsoon months of July and August in particular, the river rises to an impetuous torrent The river Cauvery supplies the life blood as it were for the economy of the districts through which it courses its way to the Bay of Bengal Kannike, a rivulet rises near Talakaveri and, after a short run, joins the river Cauvery near Bhagamandala The place of confluence is considered as a sacred spot The length of Cauvery from its source to the place where it leaves the district is about 80 kilometres

Hemavathi, a tributary of the Cauvery, rises at Javali in Chikmagalur district, traverses in south-eastern course and after passing through Manjarabad taluk of Hassan district forms the northern boundary of Kodagu district for a short stretch covering a few kilometres Lakshmanatirtha, on the other hand, originates within Kodagu district, in Munikadu forest on the plateau of Devasibetta in Brahmagiri range of mountains In view of its descent over an almost perpendicular mountain wall, tradition has invested this river with the sin-cleansing virtue by mentioning it as *Papanashini* in the legends Thousands of pilgrims throng this place, especially on the occasion of the annual fair at Irupu, to have a bath in this river Barpole also rises on the same plateau of the Brahmagiri range of mountains and flows west through a mountainous gorge where it is joined by a tributary stream that cascades down a perpendicular rock of great height Near the Kerala frontier, Barpole leaps into a deep chasm and, after running along the Kodagu borders for about three kilometres and receiving the waters of Kallahole stream, enters Kerala territory Of the numerous streams of the district a specific mention may be made of the following Muttaremutta *Hole*, Chikka *Hole*, Harangi or Suvarnavati *Hole*, Kakke *Hole*, Madapur *Hole*, Hatti *Hole* and Najikal *Hole*

Geologically, the district consists of recent and sub recent formations lateritic soils, dolerite dykes, charnockites, granites and Dharwar gneisses The granitic areas are traversed by thin veins of quartz and pigmatites This is so especially in the eastern and southern sectors of the district Dolerite dykes occur as detached boulders and, at places, intrude the granitic formations The flat and the low-lying areas are covered by a thick mantle of fertile soil while the elevated portions and hills are capped with laterite The river sections contain sand, silt and gravel in varying proportions A systematic and thorough geological survey has not so far been carried out in the district as a unit The mineral wealth of Kodagu district is generally held to be quite impressive The district has not witnessed any geophysical change in recent years On completion of the Harangi Project, a large artificial lake has come up in the eastern sector near Igoor village of Somvarpet taluk

The climate of Kodagu is quite pleasant and healthy It is characterised by a high humidity, a heavy to very heavy rainfall and a cool summer A major part of the year consists of the rainy season as the monsoon period starting in June lasts till the end of September Even during the post-monsoon months of October and November certain parts of the district receive a significant amount of rainfall. Because of the cloudy weather, the day would be

quite sultry during October and it is usually towards the second half of November that the weather becomes brighter. The period from December to February constitutes the cold season marked by a bright weather, foggy mornings and cool nights. The intensity of cold increases in areas closer to the forest zones and in the hilly tracts. Madikeri town is located on a hill and is well known for its chilly weather. The day temperature begins to rise sharply during March and marks the commencement of the summer season which lasts till the end of May. Sporadic mild showers, locally known as blossom showers, occur in all parts of the district during March. Occasional heavy showers preceded by winds of high velocity and thunderstorms occur during the month of May. The south-west monsoon usually sets in during the early part of June. Generally, June, July and August are the months of heavy rainfall. The precipitation in July, in particular, is incessant and very heavy. The average rainfall for the district is 2725 mm per annum and, on an average, there are about 118 rainy days in a year. The amount of rainfall as also the number of rainy days varies considerably within the district. The ghat region around Bhagamandala for example experiences an annual rainfall of over 6000 mm, with an average of 153 rainy days whereas Kushalnagar and its surroundings receive about a fifth of this quantity, namely about 1200 mm and have on an average of 85 rainy days. The rainfall tends to be heavy as one moves towards the southern and the south-western sectors of the district. The climate of the district on the whole is very pleasant and invigorative. The weather conditions are well suited for the cultivation of paddy in the valleys and for raising plantation crops like coffee, orange and cardamom on the slopes of hills and mountains.

The soils of the district are of a heterogenous profile and consist of lateritic debris found in different stages of weathering and laterization. The valleys and slopes have fertile red loamy soils that are suitable for cultivation. In the eastern zone dark clay soils are predominant whereas in the central zone loamy soils are predominant and in the western zone the soil is highly leached and being lateritic in content, tends to be very shallow. Kodagu district is noted for its abundance of vegetation and fauna.

6. Administrative Divisions and Jurisdictional Changes

Kodagu district belongs to Mysore Division, which is one of the four divisions into which the State is organised for purposes of general administration. The district itself is divided into 3 taluks named after the three taluk-headquarter towns of Madikeri, Somvarpet and Virajpet. There are in all 296 census villages and 9 towns as per 1991 census. The concept of a revenue village as applicable to the other districts of the State does not fully apply in the case of the villages of Kodagu. What were formerly independent revenue villages with separate village maps and records were, periodically, rearranged into a lesser number of main villages by grouping smaller units to form viable units for purposes of revenue administration. In 1901 for instance, there were 479 inhabited villages and this number dwindled to 277 by 1961. The names of such amalgamated villages too were changed in several cases in order to provide an idea about the villages that were merged. However, combined maps were not drawn up by renumbering the survey numbers in a village and the records were continued to be maintained separately - either in separate books or in separate sections in the single book covering the main village as well as its sub villages. The merged villages were termed sub-villages and treated as units analogous to the hamlets having no independence existence. However, the concept of a hamlet as a distinct group of households or a settlement, located at some distance from the core village, is not applicable to Kodagu district. Because of the mountainous and rugged terrain, climatic conditions and socio-cultural traditions, the houses in the villages of Kodagu district are generally found to be scattered in small clusters or found to occur as isolated homesteads at places of convenience all over the revenue lands of the villages. Unlike in the villages of the *Maidan* region, in the case of the villages of Kodagu district no specific area is designated as a *gramathana* or *uru* to indicate the existence of a core settlement. Usually each cluster of houses has a local place name and is easily identifiable through informal enquiries. In some cases, such clusters of houses may be quite large and may cover lands belonging to two or more adjacent revenue villages

or sub villages. In view of this unique feature, at the 1981 census, the population census data as also the data on amenities and land use were presented in the District Census Handbook for the main village (inclusive of the sub villages) as also for each one of the sub villages in the main formats of Primary Census Abstract and Village Directory.

In order to maintain continuity with the beginning made at the 1981 census, relevant data have been compiled in respect of the sub-villages at the 1991 census also and are presented in the District Census Handbook, not in the main format, but as a supplement. This departure is due to the fact that in order to conform to the general pattern adopted for the purpose, the sub-village data have not been incorporated in the main project of computerisation of the Primary Census Abstract and Village Directory which provides access to the villagewise data through NICNET.

If each sub-village for which a separate village map is available as per Director of Survey, Settlement and Land Records, is regarded as an independent village, the total number of villages in the district would be 538. The district has not witnessed any change in its jurisdiction during the decade of 1981-1991. Similarly there have not been changes in the jurisdictions of the taluks and villages of the district. However as between 1981 and 1991, Kudmangalúr which was a non-municipal town has been declassified and this has resulted in a decrease in the total number of towns and a consequential increase in the number of villages and sub-villages. Secondly, East Nemmale and West Nemmale which were regarded as separate villages in 1981 are now treated as a single village. A talukwise distribution of villages and towns of the district is given in the following statement.

For purposes of development planning and implementation thereof, a Zilla Parishad for Kodagu district and Taluk Panchayats for each one of the 3 taluks of the district have been constituted under the provision of the Zilla Parishad Act 1985. The jurisdiction of each Taluk Panchayat is coterminus with the General Administrative jurisdiction of the taluk of the same name but excludes the areas incorporated in the statutory towns or cities located if any in the taluk concerned. Thus, all villages and also places classified as non-municipal towns at the 1991 census come under the jurisdiction of the Taluk Panchayats. Taluk Panchayat is analogous to the unit more popularly known throughout the country as "Community Development Block". In order to conform to the All India pattern in the presentation of the 1991 census data, instead of the term Taluk Panchayat, the term 'C.D.Block' has been used at appropriate contexts in this volume.

Statement showing the no. of villages/towns in each taluk of the District, decadal variations if any and reasons thereof.

7. Brief Analysis of Data

(i) Area and Population

According to the Surveyor General, India, the total geographical area of Kodagu district is 4102 sq.km. According to another source, namely the village records as reported by the local officers, the aggregate area of the villages and towns of the district is 4094.28 sq.km. The difference between the two figures is negligibly small. The smallest unit for which the area figures are furnished by the Surveyor General is the district. As a result, for purposes of the 1991 census, the area figures furnished by the Surveyor General have been adopted at the district level. At the lower levels such as taluks, towns and villages however, the area figures furnished by the local officers on the basis of village records have been adopted. The area of the district is unequally distributed among its three taluks : with an area of 1646.44 sq.km. Virajpet is the largest taluk while Somvarpet which has an area of 998.70 sq.km. is the smallest. Madikeri taluk (1449.14 sq.km.) occupies the middle position. These three taluks respectively account for 40.21 per cent, 24.39 per cent and 35.40 per cent of the total area of the district.

According to the 1991 census, the total population of Kodagu district is 488,455 persons. Since there are only three taluks, the average population of a taluk of this tiny district works out to 162,818 persons. Among the three taluks, Somvarpet is the most populous (182,526 persons) and it is followed by Virajpet (178,511 persons) and then by Madikeri (127,418 persons). Somvarpet, the taluk with the smallest area has the largest population and Virajpet which has the largest area holds the second place in terms of population. The taluks of Somvarpet, Virajpet and Madikeri respectively account for 37.37 per cent, 36.55 per cent and 26.08 per cent of the total population of the district. The disparity in the talukwise population may, to some extent, be attributed to the marked variations noticeable in the physical features of the district. The taluks of Madikeri and Virajpet are located in the heavy to very heavy rainfall zone where the landscape is mountainous and is covered with dense vegetation whereas the taluk of Somvarpet covering the northern and eastern sectors of the district is located in the moderate rainfall zone where the landscape is less rugged and the overall climatic conditions are relatively more hospitable.

(ii) Rural-Urban Composition

Amongst the 488,455 persons enumerated in Kodagu district at the 1991 census, 410,514 persons (84.04 per cent) are found to be residing in rural areas and the remaining 77,941 persons (15.96 per cent) are found to be residing in urban areas. Talukwise particulars reveal that the rural component is the highest in Virajpet taluk (86.55 per cent) and that it is followed closely behind by Somvarpet taluk (86.20 per cent) while Madikeri taluk occupies the last place with a tally of 77.44 per cent. Since the rural and urban categories of population are complimentary to each other, among the three taluks, Madikeri has the highest urban component (22.56 per cent) and it is followed first by Somvarpet (13.80 per cent) and then by Virajpet (13.45 per cent). The jurisdiction of the rural area of the taluk corresponds to that of the C.D.Block (i.e. Taluk Panchayat) of the same name. The following table gives a distribution of the rural population of the district by sex and also indicates the number of villages in each taluk (C.D.Block).

Table 1 : Population and Number of Villages, 1991

Sl No	Name of C D Block/ Taluk-Rural	Population of Villages			No of Villages	
		Persons	Males	Females	Total	Inhabited
1	2	3	4	5	6	7
1.	Madikeri	98,668	49,477	49,191	67	67
2	Somvarpet	157,345	78,633	78,712	135	130
3.	Virajpet	154,501	78,549	75,952	94	94
District Rural		410,514	206,659	203,855	296	291

At the 1991 census, 5 out of the 296 villages in the district i.e., 1.69 per cent of the total number of villages, have returned a nil population. All these uninhabited villages are located in Somvarpet taluk. Among the taluks, Somvarpet has the highest number of inhabited villages, viz., 130 out of 291 or 44.67 per cent, and it is followed first by Virajpet with a tally of 94 villages (32.30 per cent) and then by Madikeri with 67 villages (23.03 per cent). The rural population of the district is unequally shared by the 3 taluks. Somvarpet taluk which is the smallest in terms of geographical area has the highest number of inhabited villages and has the largest

population among the taluks. Virajpet taluk which ranks first in the matter of geographical area holds the second place in so far as the number of populated villages and population are concerned. Madikeri has the smallest population of 98,668. When expressed as a proportion to the total population of the district, the population of each of the taluks of Somvarpet, Virajpet and Madikeri is seen to work out to 38.33 per cent, 37.64 per cent and 24.03 per cent respectively.

As already indicated, the urban population of the district as per 1991 census is 77,941. This population is shared unequally by as many as 9 towns. Table 2, gives a townwise distribution of this urban population by sex The average population of a town of the district works out to 8660 persons.

Table 2 : Population and Number of Towns, 1991

Sl.No	Name and Civic Administration Status of Towns	Population		
		Persons	Males	Females
1	2	3	4	5
1	Gonikoppal (MP)	5910	3118	2792
2	Kodlipet (MP)	2179	1089	1090
3	Kushalnagar (MP)	9472	5008	4464
4	Madikeri (TMC)	28750	14758	13992
5	Ponnampet (MP)	4963	2432	2531
6	Sanivarsante (MP)	3596	1865	1731
7	Somvarpet (MP)	7094	3635	3459
8	Suntikoppa (MP)	2840	1500	1340
9	Virajpet (MP)	13137	6805	6332
	District Urban	77941	40210	37731

Note : Abbreviations used in Column 2 regarding Civic Administration Status are : TMC : Town Municipal Council, MP : Mandal Panchayat

Among the 9 towns of the district, Madikeri is the most populous town and, as may be noticed from Table 2, it is the only town which has the status of a statutory urban area. It may be mentioned in passing at this juncture that the other 8 places were also statutory towns at the 1981 census and that the loss in status occurred due to the dissolution of the municipalities during the inter censal period and the constitution of Mandal Panchayats at these places as an interim arrangement to carry on the civic administration. Next to Madikeri, Virajpet is the most populous town. In fact these are the only towns with a population of more than 10,000 each. The population of these two towns, viz., Madikeri and Virajpet constitute 36.89 per cent and 16.86 per cent of the total urban population of the district. Madikeri town belongs to the category of class III towns (population 20,000 to 49,999) and Virajpet belongs to the category of Class IV towns (10,000 to 19,999). Among the remaining 7 towns, Kushalnagar is the largest and this, as well as Somvarpet and Gonikoppal, belongs to the category of Class V towns (5000 to 9999). While Kushlanagar accounts for 12.15 per cent, Somvarpet and Gonikoppal respectively account for 9.10 per cent and 7.58 per cent of the urban population of the district. The other 4 towns belong to the category of Class VI towns (population below 5000) and together constitute 17.41 per cent of the population. Kodlipet is the smallest town. It is evident from Table 2, that small towns are preponderant in this hilly and mountainous district. Madikeri, the district headquarters town is thirteen times as large as the smallest town of the district viz., Kodlipet. The range of variation is quite considerable.

(iii) Classification of new places as towns, declassification, and or merger of old towns during the decade 1981-1991

As between 1981 and 1991, no new place has been classified as a town. On the other hand, Kudmangalur, a town according to the 1981 census, has been declassified at the 1991 census. There have not been any cases of merger or amalgamation of towns during the decade. Details regarding this aspect are presented in Table 3.

Table 3 : New Towns/Towns Declassified, Merged in 1991 Census

Particulars	Name of Town	Population
1	2	3
(a) Added	Nil	-
(b) Declassified	(1) Kudmangalur	4522 (1981 Census)
(c) Wholly merged with any other town	Nil	-

Amongst the 10 towns of 1981 census, while Kudmangalur has been declassified, all the others, except Madikeri, have witnessed a dilution in status : i.e., the statutory towns of 1981 are now non-statutory towns.

(iv) Decadal variation in population, 1981-91

A comparative idea about the decadal variation in the population of Kodagu district and its constituent taluks, with the rural-urban break up, may be had from the details presented in table 4.

Table 4 : Decadal change in distribution of Population

Taluk	Population						Percentage decadal variation (1981-91)			Percentage of urban population	
	1981			1991							
	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1981	1991
1	2	3	4	5	6	7	8	9	10	11	12
1 Madikeri	117726	93002	24724	127418	98668	28750	8.23	6.09	16.28	21.00	22.56
2 Somvarpet	163832	138327	25505	182526	157345	25181	11.41	13.75	1.27	15.57	13.80
3 Virajpet	180330	158896	21434	178511	154501	24010	-1.01	-2.77	12.02	11.89	13.45
District	461888	390225	71663	488455	410514	77941	5.75	5.20	8.76	15.52	15.96

In table 4, the proportion of urban population to the total population of each unit is also indicated in respect of the two censuses. During the decade as is evident from Table 4, the district has witnessed a net addition of 26,567persons. Among these persons, 20,287 i.e., 76.37 per cent have been returned from the rural areas and the remaining 6278 persons or 23.63 per cent have been returned from the urban areas. The Table further discloses that while the taluks of Madikeri and Somvarpet have registered a gain in population to the extent of 9692 persons and 18964 persons respectively Virajpet taluk has suffered a loss to the tune of 1819 persons.

Kodagu district has registered a decadal growth rate of 5.75 per cent for the decade 1981-91. This figure is very low in comparison to the growth rate returned by Karnataka State as a whole for the corresponding period, which is 21.12 per cent. In fact, among the 20 districts of the State, Kodagu district has registered the lowest decadal growth rate. The reasons for this sluggish growth are not quite explicit. Talukwise data reveal that, among the three taluks, Somvarpet has witnessed the highest growth rate of 11.41 per cent and that it is followed by Madikeri with a moderate growth rate of 8.23 per cent while Virajpet has lost one per cent of its population. The rural-urban break up further discloses that in the case of Virajpet taluk, the negative growth or the population loss between 1981 and 1991 is confined to its rural sector i.e., villages. As against a positive growth rate of 12.02 per cent in urban areas, the rural areas of the taluk have registered a negative growth rate of 2.77 per cent. It may also be noticed from Table 4 that the urban population of Madikeri taluk has increased at a higher rate (16.28 per cent) than its counterparts in the taluks of Virajpet (12.02 per cent) and Somvarpet (1.27 per cent).

(v) Trends of Urbanisation

The proportion of urban population to the total population is a measure of urbanisation. It may be inferred from Table 4 that the level of urbanisation of Kodagu district has marginally moved up during the decade. The urban component in the total population of the district has increased from 15.52 per cent in 1981 to 15.96 per cent in 1991. However, at the taluk level, during this period, Somvarpet taluk has witnessed a downward trend - the proportion of urban population in the taluk has moved down from 15.57 per cent to 13.80 per cent. The phenomenon noticed in Somvarpet taluk is mainly due to the declassification of one of the erstwhile towns within its jurisdiction at the 1991 census. The number of places classified as towns within a district or a taluk is also an important index of urbanisation. On this count, Kodagu district has suffered a setback during the decade. The total number of towns in the district has decreased from 10 in 1981 to 9 in 1991. At the taluk level, while the number of towns has remained unchanged at 1 and 3 in the taluks of Madikeri and Virajpet, that in Somvarpet taluk has decreased from 6 to 5. Kudmangalur, which was classified as a town for purposes of the 1981 census, has reverted to the status of a village at the 1991 census. Another aspect which deserves notice is that as between 1981 and 1991, eight towns of the district have witnessed a decline in the civic administration status - the erstwhile municipalities of these towns have

been dissolved and interim Mandal Panchayats have been constituted to carry on the civic administration at these places. This change, in a way, implies that the district has suffered a setback in the progress of urbanisation during the decade.

(vi) Population size of villages

The rural population of Kodagu district is dispersed among 291 inhabited villages which are unevenly scattered over three taluks. The average population of a village of this district works out to 1411 persons. At the taluk level, i.e., C.D.Block level, this average is the highest in the case of Virajpet (1644 persons) and the least in the case of Somvarpet (1210 persons). Madikeri taluk, which incidentally has the smallest number of villages and the lowest population among the three taluks holds the middle position with an average of 1473 persons per village. A talukwise distribution of the 291 villages of the district by population size-class is given in the following table.

Table 5 : Percentage distribution of villages by population ranges, 1991

Taluk/C.D.Block	No. and Percentage of inhabited villages	No. and percentage of villages in each range (figures in paranthesis indicate percentage of villages in each range)					
		Less than 200	200 - 499	500 -1999	2000 - 4999	5000 - 9999	10,000 & above
1	2	3	4	5	6	7	8
1. Madikeri	67	-	-	54	13	-	-
	(100.00)	-	-	(80.60)	(19.40)	-	-
2. Somvarpet	130	10	23	76	20	1	-
	(100.00)	(7.69)	(17.69)	(58.46)	(15.39)	(0.77)	-
3. Virajpet	94	-	5	65	23	1	-
	(100.00)	-	(5.32)	(69.15)	(24.47)	(1.06)	-
District Rural	291	10	28	195	56	2	
	(100.00)	(3.44)	(9.62)	(67.01)	(19.24)	(0.69)	-

As may be seen from Table 5, there are only 2 large-sized villages having a population of 5000 or more and these are located in the taluks of Somvarpet and Virajpet. Medium-sized villages having a population in the range of 500-1999 constitute the single largest group and account for 67.01 per cent of the total number of inhabited villages of the district. This proportion is as high as 80.60 per cent in Madikeri taluk. The number of very small and small villages is not in any way impressive. In Madikeri taluk for example the population of none of the villages is less than 500 whereas in Virajpet taluk there are only 5 villages with a population below 500. The existence of very small villages (below 200) and small villages (200-499) is noticeable to a significant extent in Somvarpet taluk where such villages constitute 7.69 per cent and 17.69 per cent respectively of the total number of inhabited villages.

(vii) Density of Population

The overall density of population in Kodagu district as per 1991 census is 119 persons per square kilometre. In conformity with the general pattern, in this district too, the urban areas are more densely populated (2706 persons per sq.km) than the rural areas (101 persons per sq.km). In the case of rural population, the talukwise (i.e. C.D.Blockwise) density figures are as follows : Madikeri - 69 persons per sq.km; Somvarpet - 158 persons per sq.km and Virajpet - 94 persons per sq.km. As with population so with geographical area, the villages differ from each other to a considerable extent. Therefore, the density of population of the village is a convenient tool for a comparative analysis. A distribution of the 291 populated villages of the district by density ranges is presented in Table 6.

Table 6 : Distribution of villages by density ranges

Range of Density (population per sq km)	Total no of villages in each range	Percentage of villages in each range
1	2	3
-10	10	3.44
11-20	12	4.12
21-50	19	6.53
51-100	39	13.40
101-200	134	46.05
201-300	52	17.87
301-500	15	5.15
501 & above	10	3.44
Not known	-	-
All densities	291	100.00

The district has an uneven mix of villages coming under different ranges of density. There are villages which are very sparsely populated - in 7.56 per cent of the villages there are 20 persons or less per sq.km - as also villages which are densely populated - in 3.44 per cent of the villages there are more than 500 persons per sq.km. However, the medium density ranges of 101 to 200 and 201 to 300 together account for 63.92 per cent of the villages of the district.

(viii) Sex Ratio

Among the 488,455 persons enumerated at the 1991 census in Kodagu district, 246,869 are males and 241,586 are females. The sex ratio, expressed as the number of females per thousand males works out to 979. This figure, it may be incidentally noted, is significantly higher than the average sex ratio for Karnataka State which is 960. According to the 1981 census, the sex ratio figures for Kodagu and the State are 933 and 963 respectively. Over the decade, it is evident, the sex ratio for the district has registered an enormous increase while that for the State as a whole has decreased to a marginal extent. In this matter, the behaviour of Kodagu district does not conform to the overall pattern noticed in the State and the Country as a whole.

The rural-urban break-up shows that the sex ratio figures for the rural and urban categories of population of the district work out to 986 and 938 respectively. The corresponding figures as per 1981 census are 943 and 884 respectively. During the decade, the sex ratio has vastly improved in the case of rural as well as urban population.

In the case of rural population, there are considerable variations at the taluk level (i.e. C.D.Block level). Relevant details which are furnished in Table 7 indicate that the sex ratio varies between 967 in Virajpet taluk and 1001 in Somvarpet taluk and that the taluk of Madikeri holds the middle position with a sex ratio of 994 females per thousand males.

Table 7 : Sex Ratio for Rural Population of C.D.Blocks, 1991

Sl.No	Name of C.D.Block/Taluk	No of females per 1000 males
1	2	3
1	Madikeri	994
2.	Somvarpet	1001
3	Virajpet	967
	District Rural	986

Though the average sex ratio for the urban population of the district is 938, the townwise particulars presented in Table 8 shows that the sex ratio for towns varies between a low of 891 in Kushalnagar and a high of 1041 in Ponnampet. The table further discloses that the sex ratio is very low in the towns of Suntikoppa (893) and Gonikoppal (895) and that it is closer to the district urban average in the case of Madikeri (948) - the most populous town of the district - as well as in the case of Sanivarsanthe (928) and Virajpet (930). The reasons for such marked variations in sex ratio are not quite explicit.

Table 8 : Sex Ratio for Towns, 1991

Sl. No.	Name and Civic Administration Status	No. of females per 1000 Males
1	2	3
1.	Gonikoppal (MP)	895
2	Kodlipet (MP)	1001
3	Kushalnagar (MP)	891
4	Madikeri (TMC)	948
5.	Ponnampet (MP)	1041
6	Sanivarsante (MP)	928
7	Somvarpet (MP)	952
8	Suntikoppa (MP)	893
9.	Virajpet (MP)	930
	District Urban	938

(ix) Scheduled Castes

Out of the 488,455 persons enumerated in Kodagu district at the 1991 census, 59,005 persons have returned themselves as belonging to the Scheduled Castes category. Among them, 51,477

persons are residing in rural areas and the remaining 7,532 persons are residing in urban areas. In other words, 87.24 per cent of the Scheduled Castes population of the district dwell in villages and the other 12.76 per cent reside in towns. The Scheduled Castes constitute 12.08 per cent of the total population of the district and their strength in the rural and urban segments work out to 12.54 per cent and 9.66 per cent respectively. It may be incidentally mentioned that according to 1991 census, the Scheduled Castes constitute 16.38 per cent of the total population of Karnataka. The Scheduled Castes component in the population of Kodagu district is significantly lower than that in the population of Karnataka.

If the villages of the district are arranged according to the proportion of the Scheduled Castes population to the total population of the concerned village, the distribution would be as shown in Table 9. At the outset it may be noticed that the Scheduled Castes population is very widely dispersed - they are found in 277 out of the 291 villages. Their relative strength in the villages, however varies considerably - they constitute 10 per cent or less in 46.21 per cent and more than 20 per cent in 19.50 per cent of the villages having persons belonging to the Scheduled Castes.

Table 9 : Proportion of Scheduled Castes Population to Total Population in villages, 1991

Percentage range of Scheduled Castes population to total population	No. of villages in each range	Percentage of villages in each range
1	2	3
0-5	62	22.38
6-10	66	23.83
11-15	55	19.85
16-20	40	14.44
21-30	37	13.36
31+	17	6.14
All ranges	277	100.00

The urban resident population of the Scheduled Castes is unevenly distributed among the 9 towns of the district. Townwise data are presented in Table 10.

Table 10 : Percentage of Scheduled Castes Population in towns, 1991

Sl No	Name of Town	Total Population	Total Scheduled Castes Population	Percentage of Scheduled Castes Population to Total Population
1	2	3	4	5

	District Urban	77941	7532	9.66

(x) Scheduled Tribes

Out of the 488,455 persons enumerated in Kodagu district at the 1991 census, 40,312 persons have returned themselves as belonging to the Scheduled Tribes category. Among them, 38,899 persons or 96.49 per cent are residing in villages and the remaining 1413 persons or 3.51 per cent are residing in towns. The proportion of the Scheduled Tribes population to the total population of the district comes to 8.22 per cent - a figure which is almost double that returned by the State as a whole. Obviously, Kodagu ranks among the districts having a relatively high concentration of the Scheduled Tribes. The rural-urban break-up shows that, in Kodagu district, the Scheduled Tribes constitute 9.48 per cent and 1.81 per cent of the rural and urban segments of the population of the district.

Village-level data reveal that persons belonging to the Scheduled Tribes are met with in 245 out of the 291, i.e., 84.20 per cent, populated villages of the district. If these villages are classified on the basis of the proportion of Scheduled Tribes population to the total population of the village concerned, the distribution of the villages would be as shown in Table 11.

Table 11: Proportion of Scheduled Tribes Population to Total Population in Villages, 1991

Percentage range of Scheduled Tribes Population to total Population	No of villages in each range	Percentage of villages in each range
1	2	3
0-5	115	46.94
6-15	71	28.98
16-25	31	12.65
26-35	9	3.67
36-50	8	3.27
51 & above	11	4.49
All ranges	245	100.00

The presence of Scheduled Tribes is nominal in 46.94 per cent of the villages, it is substantial in 6.94 per cent of the villages where they constitute more than 25 per cent but less than 50 per cent and is quite impressive in 4.49 per cent of the villages where they account more than one half of the village population. Kodagu is one of the few districts of the State which are endowed with vast tracts of forests covered with a dense growth of vegetation. That the tribals i.e., denizens of the forests, should be found in the villages of this district in relatively larger numbers appears to be quite natural.

The 1413 urban-resident Scheduled Tribes persons are unequally dispersed in the 9 towns of the district. The townwise distribution and their relative strength with reference to the population of the town are presented in Table 12.

Table 12 : Percentage of Scheduled Tribes Population in Towns, 1991

Sl. No.	Name of Town	Total Population	Total Scheduled Tribes Population	Percentage of Scheduled Tribes Population to Total Population
1	2	3	4	5
1.	Gonikoppal (MP)	5910	147	2.49
2.	Kodlipet (MP)	2179	15	0.69
3.	Kushalnagar (MP)	9472	176	1.86
4.	Madikeri (TMC)	28750	513	1.78
5.	Ponnampet (MP)	4963	181	3.65
6.	Sanivarsante (MP)	3596	28	0.78
7.	Somvarpet (MP)	7094	52	0.73
8.	Suntikoppa (MP)	2840	37	1.30
9.	Virajpet (MP)	13137	264	2.01
	District Urban	77941	1413	1.81

Madikeri, Virajpet, Ponnampet and Kushalnagar are the important centres of concentration of the urban-residents among the Scheduled Tribes. The presence of the Scheduled Tribes is nominal in the towns of Suntikoppa, Sanivarsante and Kodlipet, where their numbers do not add up to even 50. When viewed in relation to the total popualtion of the town, the Scheduled Tribes constitute 3.65 per cent in Ponnampet and 2.49 per cent in Gonikoppal. These two towns are located very close to each other and lie within the jurisdiction of Virajpet taluk. The proportion of Scheduled Tribes exceeds 2 per cent in Virajpet town as well. In Madikeri, the most populous town of the district, the Scheduled Tribes are seen to constitute 1.78 per cent of the total population of the town. In Kodlipet, which is the smallest town of the district, the Scheduled Tribes (whose numerical strength is just 15) account for 0.69 per cent of its population.

(xi) Literacy

At the 1991 census, all the children in the 0-6 age-group have, by definition, been treated as illiterate. They are therefore to be excluded while computing the literacy rates. According to the 1991 census, out of the 488,455 persons enumerated in Kodagu district, 71,073 persons are in the age-group of 0-6 years. If the children are excluded, the number of persons aged 7 years and upwards would be 417,382. Amongst these persons, 285,280 have returned themselves as literate. The sexwise data further reveal that among the 210,556 males and 206,826 females aged 7 years and upwards, 158,656 males and 126,624 females are literate. The literacy rates for the total, male and female population of the district works out to 68.35 per cent, 75.35 per cent and 61.22 per cent respectively. The corresponding literacy rates for Karnataka State as per 1991 census are 56.04 per cent (for total population), 67.26 per cent (for male population) and 44.34 per cent (for female population). Obviously, Kodagu ranks amongst the districts with a relatively high literacy rate in the State.

If the literacy rates for rural population of the district are examined, it is noticed that while the literacy rate for the total population comes to 65.50 per cent that for the male and female segments work out to 72.29 per cent and 58.16 per cent.

Talukwise (i.e. C.D.Blockwise) particulars regarding rural population which are set out in Table 13, show that among the three taluks, Madikeri tops the list and it is followed by the taluks of Somvarpet and Virajpet. When the sexwise data are examined, in the case of males, the three taluks have the same rankings. However, in the case of female literacy, Virajpet holds the second position relegating Somvarpet to the third place.

Table 13 : Literacy Rates for Rural Population of Taluks (C.D.Blocks) by sex, 1991 (Excluding children in the age-group 0-6)

Sl No.	Name of Taluk/C D Block	Percentage of Literates		
		Persons	Males	Females
1	2	3	4	5
1.	Madikeri	73 37	79 84	66 91
2.	Somvarpet	63 53	72 97	54 13
3.	Virajpet	62 45	68 10	56 60
District Rural		65 50	72 79	58 16

The literacy rate for the urban population of the district is 83.27 per cent. The sexwise rates are 88.43 per cent and 77.76 per cent respectively for males and females. The literacy rates are fairly high in all the towns. Townwise particulars presented in Table 14 show that among the 9 towns of the district, Madikeri tops the list in the matter of total as well as sexwise literacy rates and Suntikoppa, likewise, holds the last position. Except in Suntikoppa, in all the other towns the proportion of literates to the total population (excluding 0-6) exceeds 75 per cent mark and it reaches the maximum of 87.33 per cent in Madikeri. The literacy rates for males is above 80 per cent in all the towns including Suntikoppa (82.90 per cent) and is above 90 per cent in the towns of Kodlipet (90.35 per cent) and Madikeri (91.67 per cent). The female literacy rate is seen to range between 69.08 per cent in Suntikoppa and 82.75 per cent in Madikeri town. The range of variation in this case is much wider than that noticed in the case of literacy rate among the males. The female literacy rate is below 70 per cent in two towns, viz., Suntikoppa and Sanivarsante, and lies between 70 to 80 per cent in 6 towns and is above 80 per cent in one town viz., Madikeri, which incidentally is the most populous town of the district.

Table 14 : Literacy Rates for towns, 1991 (excluding children in the age-group 0-6)

Sl No	Name and Civic Administration Status of Town	Percentage of Literates		
		Persons	Males	Females
1	2	3	4	5
1	Gonikoppal (MP)	78.65	84.60	71.96
2.	Kodlipet (MP)	84.39	90 35	78.44
3	Kushalnagar (MP)	81.49	87.88	74.29

9	Virajpet (MP)	83 30	87.35	78 93
District Urban		83.27	88.43	77.76

(xii) Main Workers, Marginal Workers & Non-workers

Every person enumerated at the 1991 census has been classified either as a main worker or as a marginal worker or as a non-worker depending on whether or not the person concerned participated in any economic activity and, if yes, the total duration in terms of days during the reference period of one year preceeding the date of enumeration. Accordingly, in the total population of Kodagu district, it is seen that 220,248 persons or 45.09 per cent are main workers, 9,888 persons or 2.02 per cent are marginal workers and the remaining 258,319 persons or 52.89 per cent are non-workers. A comparison with the corresponding figures for the State as a whole which are - 38.45 per cent are main workers, 3.54 per cent are marginal workers and 58.01 per cent non-workers - indicates that in Kodagu district, the proportion of the main workers is considerably higher than the overall average for the State and that, as a result, the proportions of marginal workers and non-workers in the district are lower than the corresponding averages for the State. It may be incidentally mentioned that the production of plantation crops such as coffee, cardamom, orange and pepper constitute the mainstay of the economy of Kodagu district.

The sexwise break-up shows that in the male population of the district, the main workers, marginal workers and non-workers respectively account for 58.11 per cent, 0.60 per cent and 41.29 per cent. On the other hand, in the female population these

three categories constitute 31 78 per cent, 3 48 per cent and 64 74 per cent respectively Obviously, the male segment of the population has a much larger proportion of workers than its female counterpart and this feature conforms to the general pattern noticed in the State Within the district, which incidentally consists of 3 taluks (rural population) and 9 towns (urban population) there are considerable variations For example, as compared to 46 84 per cent in the case of rural population, the main workers in the urban population constitute 35 89 per cent - a difference of about 11 percentage points which is quite significant The marginal workers are found in a relatively larger proportion in the rural population (2 33 per cent) than in the urban population (0 42 per cent) On the other hand, the non-workers account for only 50 83 per cent of the rural population as compared to 63 89 per cent in the case of the urban population A comparative idea about the variations among the taluks (i e C D Blocks) of the district may be had from the particulars presented in table 15

The proportion of main workers in the rural population of the taluk is the highest in Virajpet and the least in Madikeri In contrast, the proportion of marginal workers as also that of the non-workers is the highest in the case of Madikeri taluk and the least in Virajpet taluk The only other taluk of the district, viz, Somvarpet occupies the middle position The range of variation among the taluks in each of these three categories is quite moderate Sexwise details reveal that in conformity with the general pattern, in the rural areas of all the taluks, the proportion of main workers in the male population is considerably higher than that in the female population The proportion of main workers among males varies within a narrow margin, viz, between 57 51 per cent in Madikeri taluk and 60 90 per cent in Virajpet taluk On the other hand, in the case of females, this proportion varies between 25 66 per cent in Madikeri taluk and 38 73 per cent in Virajpet taluk Somvarpet taluk occupies the middle position

Marginal workers are met with in the rural population of all the three taluks Such workers are found among males as well as females However, the incidence of marginal worker is higher among females than among males In the rural male population of the district the marginal workers constitute 0 63 per cent whereas in the rural female population their counterparts account for as much as 4 05 per cent The same type of disparity is noticeable in all the three taluks In the case of males, the proportion of marginal workers varies between 0 36 per cent in Virajpet and 0 82 per cent in Somvarpet whereas in the case of females, this proportion varies between 2 77 per cent in Virajpet and 5 24 per cent in Madikeri.

Main workers and marginal workers together constitute the category of workers Since the categories of workers and non-workers are complimentary to each other, in any unit of population, if the proportion of workers is large that of the non-workers would be correspondingly small The converse is also true As may be noticed in Table 15, the proportion of workers is high in Virajpet taluk (51 55 per cent) and that of

Table 15 Percentage of Main Workers, Marginal Workers and Non-Workers for Rural Population of Taluks (C D Blocks), 1991

Sl No	Name of the Taluk/C D Block	Percentage of											
		Main Workers to Total Population			Marginal Workers to Total Population			Total Workers to Total Population			Non-Workers to Total Population

3	Virajpet	50 00	60 90	38 73	1 55	0 36	2 77	51 55	61 26	41 50	48 45	38 74	58 50
	District Rural	46 84	58 82	34 69	2 33	0 63	4 05	49 17	59 45	38 74	50 83	40 55	61 26

non-workers is low to a corresponding extent (48.45 per cent). On the other hand, the reverse situation prevails in the case of Madikeri taluk where the workers and non-workers respectively account for 44.82 per cent and 55.18 per cent of the population.

In the urban population of the district, 35.89 per cent are main workers, 0.42 per cent are marginal workers and the remaining 63.69 per cent are non-workers. There are considerable differences at the town level. A townwise percentage distribution of the urban population of the district by sex and according to the categories of main workers, marginal workers and non-workers is set out in table 16.

Table 16 : Percentage of Main Workers, Marginal Workers and Non-Workers in Towns, 1991

Sl No	Name and Civic Administration Status of Town	Percentage of											
		Main Workers to Total Population			Marginal Workers to Total Population			Total Workers to Total Population			Non-Workers to Total Population

3	Kushalnagar (MP)	33.73	52.52	12.66	0.15	0.16	0.13	33.88	52.68	12.79	66.12	47.32	87.21
4	Madikeri (TMC)	35.42	54.15	15.67	0.37	0.50	0.23	35.79	54.65	15.90	64.21	45.35	84.10
5	Ponnampet (MP)	35.77	52.88	19.32	0.34	0.04	0.63	36.11	52.92	19.95	63.89	47.08	80.05
6.	Sanivarsante (MP)	37.26	55.28	17.85	0.64	0.48	0.81	37.90	55.76	18.66	62.10	44.24	81.34
7.	Somvarpet (MP)	41.20	57.96	23.59	1.00	1.02	0.98	42.20	58.98	24.57	57.80	41.02	75.43
8	Suntikoppa (MP)	39.16	55.47	20.89	0.88	0.40	1.42	40.04	55.87	22.31	59.96	44.13	77.69
9	Virajpet (MP)	34.13	53.55	13.25	0.05	0.04	0.06	34.18	53.59	13.31	65.82	46.41	86.69
	District Urban	35.89	54.48	16.08	0.42	0.42	0.42	36.31	54.90	16.50	63.69	45.10	83.50

Among the nine towns, Somvarpet has the highest proportion of main workers in its population (41.20 per cent) and it is followed by Suntikoppa (39.16 per cent). At the other end, Kodlipet (33.36 per cent) and Kushalnagar (33.73 per cent) occupy the last two places. Sexwise details disclose that in the case of males the proportion of main workers exceeds 50 per cent mark in all the towns and is seen to range between 52.52 per cent in Kushalnagar and 57.96 per cent in Somvarpet. On the other hand, in the case of females, this proportion does not touch even the 25 per cent mark in any of the towns. The proportion of main workers in the female population is seen to vary between 10.64 per cent in Kodlipet town and 23.59 per cent in Somvarpet. This proportion is lower than the district average of 16.08 per cent in the case of 4 out of the 9 towns of the district.

Marginal workers are found among males and females in all the towns. The proportion of such workers to the total population of the town is seen to vary between 0.05 per cent in Virajpet and 2.16 per cent in Kodlipet. Somvarpet is the only other town where this proportion touches the one per cent mark. Sexwise particulars reveal that in the towns of Madikeri, Gonikoppal and Kushalnagar, the proportion of marginal workers in the male population is greater than that in the female population. In the remaining 6 towns the incidence of marginal work is higher among females than among males. The proportion of marginal workers in the male population varies between a nominal 0.04 per cent in the towns of Ponnampet and Virajpet and 1.56 per cent in Kodlipet. The other town where this proportion touches the one per cent mark is Somvarpet and in all the other towns

this proportion is very low. In the case of female population, the proportion of marginal workers varies between 0.06 per cent in Virajpet and 2.75 per cent in Kodlipet. This proportion is relatively high in Suntikoppa as well (1.42 per cent). Table 16 discloses that in most of the towns of the district, the contribution of the marginal workers to the total work force is quite nominal.

The proportion of total workers to total population is the highest (42.20 per cent) in the case of Somvarpet town and the least in the case of Kushalnagar town (33.88 per cent). Kodlipet town which has the lowest proportion of main workers in its population occupies a place above that of Kushalnagar when the category of total workers is considered. Since the categories of workers and non-workers are complimentary to each other, the proportion of non-workers is the highest in Kushalnagar (66.12 per cent) and the least in Somvarpet (57.80 per cent). In the case of males, the non-workers constitute less than 50 per cent in each one of the towns of the district. Their proportion to male population of the town ranges between 41.02 per cent in Somvarpet and 47.32 per cent in Kushalnagar. On the other hand, in the case of females, the proportion of non-workers is more than 75 per cent in each one of the 9 towns, the least being 75.43 per cent in Somvarpet and the highest being 87.21 per cent in Kushalnagar. The proportion of non-workers among females is fairly high in Virajept (86.69 per cent) as also in Kodlipet (86.61 per cent).

Analysis of the particulars regarding the main workers, marginal workers and non-workers in the different rural areas as well as in the different urban areas of the district, discloses that the extent of intra district variations is quite moderate and these may be attributed to local factors.

* * * * *

PRIMARY CENSUS ABSTRACT

PRIMARY CENSUS ABSTRACT

EXPLANATORY NOTE

The Primary Census Abstract furnishes, in a nutshell as it were, vital information on the basic demographic and economic composition of the population. This statement, referred to as PCA, summarises the whole mass of data gathered at the Census. The smallest geographical unit with a clearly defined boundary identifiable on the field that has been delineated for ensuring cent per cent coverage of the area under the jurisdiction of various administrative units is the Census Enumeration Block. The details gathered in the household schedules in respect of each and every person enumerated in each such block have been meticulously tabulated to prepare this Primary Census Abstract. The tabulation has been done entirely by manual processing of the data at the Regional Tabulation Offices. The village PCA is derived from the Block PCA and in case of urban areas, the Block PCA has yielded the ward and Town PCA. In turn, the Taluk (Rural) and Taluk (Urban) as well as Taluk (Total) PCA statements as well as the C.D.Block-wise PCA Statements are built up on the basis of Village-wise and Town-wise data. This process goes on until it yields the data for higher and higher administrative divisions, such as the District and the State, culminating at the apex in the form of a single line statement for the country. The entire edifice thus rests on the information contained in the household schedules filled up by the enumerator.

The District Primary Census Abstract is presented immediately after this Explanatory Note. This statement gives the aggregate figures for the district with the rural-urban break up, the aggregate figures for each C.D.Block (with the rural-urban break up) and the aggregate figures for each town/urban agglomeration within the district. It is important to note that the lowest unit for which the data are presented here is the C.D.Block and not the traditional taluk*. Thereafter the C.D.Blocks within the district are taken up one by one in the alphabetical order of their names. For each C.D.Block, an alphabetical list of villages (which indicates the code numbers assigned to villages in 1991 as well as the corresponding code numbers assigned in 1981) precedes the presentation of the village-wise PCA followed by the ward-wise PCA in respect of towns and outgrowths if any within the jurisdiction of the concerned C.D.Block. After thus exhausting all the C.D.Blocks in the district, the town/urban agglomerations are covered one by one in the ascending order of their location code numbers without regard to the fact whether any of these towns or portions thereof (eg. outgrowths) have already been covered under one or the other of the Community Development Blocks. As in 1981, on this occasion too, the PCA has been compiled separately in respect of the Scheduled Castes and Scheduled Tribes Population of the District. The District PCA for Scheduled Castes and for Scheduled Tribes are presented after the PCA for the urban areas. The pattern of presentation of data in these two statements is the same as that adopted for presentation of data in the District PCA.

It may be recalled that in Karnataka the term Community Development Block is not in vogue and that its equivalent is the Taluk Panchayat Samiti. The jurisdiction of each Taluk Panchayat Samiti is coterminus with that of the corresponding Taluk but excludes the statutory towns. In other words, the administrative jurisdiction of a Taluk Panchayat Samiti covers all the villages of the Taluk (as listed out for the 1991 census) as also the villages or parts thereof which have been classified as non-municipal towns for purposes of the 1991 census and the revenue villages or portions thereof which have been identified as outgrowths of statutory towns and have therefore been excluded from the purview of Rural PCA. It is important to remember that in this statement, the particulars relating to the non-municipal towns (such as those administered by Mandal Panchayats) and those relating to the outgrowths (places which are not towns in their own right) are repeated - for these appear once below the concerned C.D.Block and again under the 'urban areas' of the district.

* *For purposes of comparison with 1981 data the Taluk wise District PCA with Rural - Urban breakup is given in Appendx I.*

The Primary Census Abstract has 21 main columns to furnish information about the name of the unit, area, number of occupied residential houses, number of households, population, number of persons in the age-group of 0-6, number of persons belonging to Scheduled Castes and Scheduled Tribes, number of literates, number of main workers and their distribution among nine industrial categories, number of marginal workers and the number of non-workers. In the District PCA, each column indicating the data on population characteristics is sub-divided into 3 columns in order to indicate the total as well as the sex-wise break-up whereas in the village/town PCA, each such column (with the exception of Total Population and Population in the 0-6 age group) is sub-divided into two columns to indicate the sex-wise break-up only.

It may be mentioned at this juncture that for each town/urban agglomeration in the district, information regarding the total population, Scheduled Castes Population and Scheduled Tribes Population of each census enumeration block as also the particulars regarding the boundaries of each Census Enumeration Block have been compiled and are kept for the census data users' reference in the Library of the Office of the Director of Census Operations, Karnataka.

COLUMN 1 : Location Code Number :- The location code number assigned to the village or the town as the case may be is entered in this column.

COLUMN 2 :- Name of Village/Town/Ward :- The name of the village or the town as finally adopted for the 1991 census purposes is entered in this column. The towns and cities are often divided into smaller geographical segments called wards, mohallas or divisions for purposes of administration. Such units bear distinctive locality names or specific numbers. It is this name or the number of the ward or its equivalent unit that is mentioned here in the case of towns.

Irrespective of whether a town is divided into administrative wards or not, every town is invariably constituted into territorial divisions for the conduct of civic elections. This delimitation of constituencies is done as an essential and preliminary process of civic elections scheduled to be held periodically. So, in some cases the name or number reported in this column refers to such territorial divisions and not to administrative divisions.

COLUMN 3 : Area of the Village in Hectares and of Town in Square Kilometres :- For the villages, the area is reported here in hectares upto two places of decimal and for the towns, as also the wards or divisions thereof, the area figures are furnished in square kilometres upto two places of decimal. It may be incidentally mentioned here that for none of the towns in the State, Ward/Division-wise area figures are available. If the area figures are not available for any reason, a dash (-) is entered in this column.

COLUMN 4 : Number of Occupied Residential Houses :- A 'Census House' could be wholly residential or partly residential or else completely non-residential according to the use to which it is put. All census houses enumerated as either wholly or partly residential at the time of the census count are added together to get the data for the block and from thence to derive the data for higher units. Houses found vacant at the time of the census count are not reckoned as occupied residential houses. The information for this column has been compiled from the Abridged Houselists.

COLUMN 5 : Number of Households :- This information too is compiled from the Abridged Houselists. The actual total number of households including the 'normal', 'institutional' and the 'houseless' that were enumerated at the census count is mentioned in this column. Generally, the number of households in any unit would be equal to or more than the occupied residential houses in that unit because of the houseless households that one may come across in that unit and also because of the occasional instances of two or more households sharing a common census house.

COLUMNS 6, 7 AND 8: Total Population (including Institutional and Houseless Population):- The total population as on the reference date is furnished in column 6 while in the next two columns the sex-wise break-up is given. The institutional population refers to such of those who were enumerated in institutions like hostels, chummeries, hospitals, prisons etc. The houseless persons

represent those who were enumerated on the night of 28th February 1991 at the places where they were found at that time, provided they had not already been enumerated elsewhere.

COLUMNS 9, 10 and 11 : Population in the age group (0 - 6) :- The total number of children belonging to the age-group of 0-6 in the total population as also the number of males and females among them are reported under these three columns. This information is of considerable significance since all such children are regarded as illiterate at the 1991 Census.

COLUMNS 12 AND 13 : Scheduled Castes :- Number of males and females belonging to Scheduled Castes is indicated in these two columns. Whether a person belongs to a Scheduled Caste or not has been determined with reference to the List of Scheduled Castes in Karnataka according to the Scheduled Castes and Scheduled Tribes (Amendment) Order 1976 (Act No. 108 of 1976) (See Appendix). Scheduled Castes may belong to either the Hindu or the Sikh or the Buddhist religion.

COLUMNS 14 AND 15 : Scheduled Tribes :- Number of males and females belonging to Scheduled Tribes is reported under these columns. Whether a person belongs to a Scheduled Tribe or not has been determined with reference to the 'List of Scheduled Tribes in Karnataka' according to the Scheduled Castes and Scheduled Tribes (Amendment) Order 1976 (Act No.108 of 1976) (See Appendix for the list). Scheduled Tribes may belong to any religion.

COLUMNS 16 AND 17 : Literates :- Sex-wise break up of the total number of persons who are literate, irrespective of their levels of educational attainments is given in these two columns. By definition a literate is a person who can both read and write with understanding in any language. It is important to note that for purposes of the 1991 census by definition all children in the 0 - 6 age group are regarded as illiterate. Even if such a child is going to school and has picked up reading and writing a few odd words it is treated as illiterate.

COLUMNS 18 AND 19 : Total Main Workers:- A worker is a person who participates in economically productive work. The reference period for judging whether a person is a worker or not in the year preceding the day of enquiry. If a person had worked even for one day during this entire period he or she is entitled to be classified as a worker. If for any such worker the period of work is 183 days or more then that person is a main worker. On the other hand, if such period is less than 183 days then that worker is a marginal worker. In columns 18 and 19 the total number of main workers is furnished sex-wise and a sex-wise break up of these main workers according to the nine-fold 'industrial classification of workers' is presented in the next 20 columns i.e., from column 20 to column 39.

COLUMNS 20 AND 21 : Cultivators (Category-I) :- These two columns give out the number of male and female workers who satisfy the conditions laid down in the definition of a cultivator. A cultivator may be an employer, a single worker or an unpaid family worker. Participation in work may be by way of physical labour or by way of supervision and direction. The lands cultivated may be owned by the household or taken on lease for payment in money or kind or share in the produce. Cultivation, as already emphasised involves ploughing, sowing and harvesting and allied activities in the production of cereals and millet crops, pulses, raw jute and kindred fibres, sugarcane, tapioca and oil seeds.

COLUMNS 22 AND 23 : Agricultural Labourer (Category -II) :- A person who works in another person's land for wages in money or kind or share and does not have any lease or contract on the land on which he or she works is an agricultural labourer. In this case too, the crops grown on the lands are quite pertinent and the difference between a cultivator and an agricultural labourer lies in the fact that the former works on his own or leased in lands as an independent worker while the latter works for wages having no right whatsoever on the lands on which he works. The sex-wise break-up of such workers is given in these two columns.

COLUMNS 24 AND 25 : Livestock, Forestry, Fishing, Hunting and Plantations, Orchards and Allied activities (Category - III) :- A sex-wise break up of the workers who were mainly engaged in activities connected with livestock rearing, forestry

and logging, hunting, fishing, plantations, orchards etc, is given under these columns

COLUMNS 26 AND 27 : Mining and Quarrying (Category - IV) A sex wise break up of the workers mainly engaged in activities connected with mining and quarrying is given under these columns

COLUMNS 28 AND 29 : Manufacturing, Processing, Servicing and Repairs - Household Industry (Category - V[a]) Household industry belongs to the broad category of 'manufacturing, processing, servicing and repairs' and represents a particular sector therein Household industry is generally conducted by the head of household himself or herself and or mainly by the members of the household, at home or within the village in the case of those dwelling in rural areas and only within the residential premises occupied by the household in the case of those living in urban areas A person may be a labourer or a petty employee in the household industry run by some other household By and large the household industry is carried on by individuals on a small scale with or without the assistance of family members all of whom work as unpaid family workers and the entire earnings are treated as family income

COLUMNS 30 AND 31 : Manufacturing, Processing, Servicing and Repairs - Non-household Industry (Category - V[b]) - A sex-wise break up of the workers who were engaged in manufacturing, processing, servicing and repair activities in establishments which do not qualify to be classified as household industry as defined above {category V(a)} is given here

COLUMNS 32 AND 33 : Construction (Category-VI) - Workers engaged in construction, maintenance, upkeep, repair and similar activities of buildings, roads, railways, bridges, dams, canals, electrical and water supply installations, communication systems etc, are shown under this category

COLUMNS 34 AND 35 : Trade and Commerce (Category - VII) 'In these two columns the number of male and female workers engaged in wholesale or retail trade in goods or engaged in dealing with insurance stocks and shares, banking and financial institutions etc, either as proprietors or in any other capacity are indicated

COLUMNS 36 AND 37 : Transport, Storage and Communications (Category - VIII) - A sex-wise breakup of the workers in establishments such as railways, road transport, transportation by water-ways or by air, postal and telegraphs, telecommunications etc, which are engaged in transport, storage and communication activities is given in these columns

COLUMNS 38 AND 39 : Other Services (Category - IX) - This residuary category includes employees of the Central and State Governments, local bodies and other organisations and institutions engaged in educational, scientific, medical and health services, religious and welfare services, community services, recreational services, personal services and other miscellaneous activities not covered in the 8 categories specified above

COLUMNS 40 AND 41 : Marginal Workers - Males and females who are workers but have worked for less than 183 days during the reference year are reported under these two columns Such workers, irrespective of the economic sector in which they work, are considered together and reported here

COLUMN 42 AND 43 : Non-workers - Irrespective of age and sex, all those who are not economically active are non-workers and a sex-wise break-up of such persons is given in these two columns The aggregate of the main workers, marginal workers and non-workers would be equal to the total population of that unit

NOTE :-

1 : The area figure for the district given under column No.4 against "Total" represents "Geographical Area" and has been furnished by the Surveryor General, India. The figures for the urban areas are either those supplied by civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in this Directorate on the basis of the available records pertaining to the delimitation of urban units. Area figures for Rural Areas are derived by subtracting the Total Urban Area from the Total Area of the District.

The total of the area figures of all the C.D.Blocks/Taluks in the district will not tally with the district figures (except urban), because the area figures for C.D.Blocks/Taluks represent the land-use area based on village wise area figures as reported by the Local Officers. The total area of the taluk may not tally with the aggregate of the areas of the villages listed for census purposes for it includes the area of the statutory as well as non-statutory towns, villages which may be fully submerged and reserve forests which may not form part of any revenue village, if any, within the jurisdiction of the concerned taluk. The total area of the C.D.Block is derived by subtracting the area of the statutory town or towns (within the jurisdiction of the concerned taluks) from the total area of the taluk.

2 : Outgrowths of towns in urban agglomerations are denoted by letter "OG".

3 : The following abbreviations have been used to indicate the Civic Administration Status of Town.

MC : Municipal Corporation
CMC : City Municipal Council
TMC : Town Municipal Council
NAC : Notified Area Committee
CB : Cantonment Board
SB : Sanitary Board
MP : Mandal Panchayat
NMCT : Non-Municipal Census Town

1. Adi Andhra
2. Adi Dravida
3. Adi Karnataka
4. Adiya (in Coorg District)
5. Ager
6. Ajila
7. Anamuk
8. Aray Mala
9. Arunthathiyar
10. Arwa Mala
11. Baira
12. Bakad
13. Bant (in Belgaum, Bijapur, Dharwar and North Kanara districts)
14. Bakuda
15. Balagai
16. Bandi
17. Banjara, Lambani
18. Bathada
19. Beda Jangam, Budga Jangam
20. Bellara
21. Bhangi, Mehtar, Olgana, Rukhi, Malkana, Halalkhor, Lalbegi, Balmiki, Korar, Zadmalli
22. Bhambi, Bhambhi, Asadaru, Asodi, Chamadia, Chamar, Chambhar, Chamgar, Haralayya, Harali, Khalpa, Machigar, Mochigar, Madar, Madig, Mochi, Muchi, Telegu Mochi, Kamati Mochi, Ranigar, Rohidas, Rohit, Samgar
23. Bhovi
24. Bindla
25. Byagara
26. Chakkiliyan
27. Chalavadi, Chalvadi, Channayya
28. Chandala
29. Chenna Dasar, Holaya Dasar
30. Dakkal, Dokkalwar
31. Dakkaliga
32. Dhor, Kakkayya, Kankayya
33. Dom, Dombara, Paidi, Pano
34. Ellamalwar, Yellammalawandlu
35. Ganti Chores
36. Garoda, Garo
37. Godda
38. Gosangi
39. Halleer
40. Halsar, Haslar, Hulasvar, Halasvar
41. Handi Jogis
42. Hasla
43. Holar, Valhar
44. Holaya, Holer, Holeya
45. Holeya Dasari
46. Jaggali
47. Jambuvulu
48. Kadaiyan
49. Kalladi
50. Kepmaris
51. Kolupulvandlu
52. Koosa
53. Koracha
54. Korama
55. Kotegar, Metri
56. Kudumban
57. Kuravan
58. Lingader
59. Machala
60. Madari
61. Madiga
62. Mahar, Taral, Dhegu Megu
63. Mahyavanshi, Dhed, Vankar, Maru Vankar
64. Maila
65. Mala
66. Mala Dasari
67. Mala Hannai
68. Mala Jangam
69. Mala Masti
70. Mala Sale, Netkani
71. Mala Sanyasi
72. Mang, Matang, Minimadig
73. Mang Garudi, Mang Garodi
74. Manne

75. Masthi
76. Mavilan
77. Meghval, Menghvar
78. Moger
79. Mukri
80. Mundala
81. Nadia, Hadi
82. Nalkadaya
83. Nalakeyava
84. Nayadi
85. Pale
86. Pallan
87. Pambada
88. Panchama
89. Panniandi
90. Paraiyan, Paraya
91. Paravan
92. Raneyar
93. Samagara
94. Samban
95. Sapari
96. Sillekyathas
97. Sindhollu, Chindollu
98. Sudugadu Siddha
99. Thoti
100. Tirgar, Tirbanda
101. Valluvan

SCHEDULED TRIBES

1. Adiyan
2. Barda
3. Bavacha, Bamcha
4. Bhil, Bhil Garasia, Dholi Bhil, Dungri Bhil, Dungri Garasia, Mewasi Bhil, Rawal Bhil, Tadvi Bhil, Bhagalia, Bhilala, Pawra, Vasava, Vasave
5. Chenchu, Chenchwar
6. Chodhara
7. Dubla, Talavia, Halpati
8. Gamit, Gamta, Gavit, Mavchi, Padvi, Valvi
9. Gond, Naikpod, Rajgond
10. Gowdalu
11. Hakkipikki
12. Hasalaru
13. Irular
14. Iruliga
15. Jenu Kuruba
16. Kadu Kuruba
17. Kammara (in South Kanara District and Kollegal Taluk of Mysore District)
18. Kaniyan, Kanyan (in Kollegal Taluk of Mysore District)
19. Kathodi, Katkari, Dhor Kathodi, Dhor Katkari, Son Kathodi, Son Katkari
20. Kattunayakan
21. Kokna, Kokni, Kukna
22. Koli Dhor, Tokre Koli, Kolcha, Kolgha
23. Konda Kapus
24. Koraga
25. Kota
26. Koya, Bhine Koya, Rajkoya
27. Kudiya, Melakudi
28. Kuruba (in Coorg District)
29. Kurumans
30. Maha Malasar

33. Malayekandi
34. Maleru
35. Maratha (in Coorg District)
36. Marati (in South Kanara District)
37. Meda
38. Naikda, Nayaka, Cholivala Nayaka, Kapadia Nayaka, Mota Nayaka, Nana Nayaka
39. Palliyan
40. Paniyan
41. Pardhi, Advichincher, Phanse Pardhi
42. Patelia
43. Rathawa
44. Sholaga
45. Soligaru
46. Toda
47. Varli
48. Vitolia, Kotwalia, Barodia
49. Yerava

Appendix III - PUBLICATION PLAN

The 1991 Census tables will be published in 33 separate series of volumes for All - India and for each State and Union Territory. The publication series is as follows:

Series No

1. India

In each of these series (for all - India and each State/Union Territory) the different series of tables (A Series - General Population Tables, B - Series - General Economic Tables, etc.,) will be brought out as different Parts. Apart from these, District Census Handbooks will be published for each district in the country. These will contain the PCA data for the district, the village and town primary census abstract and the village and town directories. The latter comprise compilations of statistics, external to census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For all - India and for each State and Union Territory, the census tabulations and reports will be published according to the following plan:

Part No. and subject covered	Sub-part No. if any, and the topics covered
1	2
Part I - Administration Report (for Office use only)	Part I-A - Administration Report Enumeration
	Part I-B - Administration Report Tabulation
Part II - General Population Tables	Part II-A - General Population Tables - A-Series
	Part II-B - Primary Census Abstract
Part III - General Economic Tables	Part III-A - B-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
	Part III-B - B-Series tables of second stage which will be brought out on full count. The data relating HHI, OW, Marginal Workers and Non-workers seeking/available for work will be entered on full count basis.
Part IV - Social and Cultural Tables	Part IV-A - C-Series tables of first stage covering age, sex and marital status, composition of population, single year age returns, educational levels, school attendance and bilingualism.
	Part IV-B - C-Series tables covering mother tongue, religion of population and household composition.

Part V - Migration Tables	Part V-A - D-Series tables of first stage covering tables based on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
	Part V-B - D-Series tables of second stage covering *occupational classification of migrant workers.* These tables are based on full count.
Part VI - Fertility Tables	F-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
Part VII - Tables on Houses and Household Amenities	H - Series tables covering census houses and the uses to which these are put, construction material of wall, roof and floor of the census houses occupied by households, tenure status of the house occupied and number of living rooms, household size, housing facilities like drinking water, electricity and toilet available to households and the fuel used by the household for cooking. These tables will also cover tables on Scheduled Castes and Scheduled Tribes. This volume will contain analytical notes also.
Part VIII - Special Tables on Scheduled Castes and Scheduled Tribes	This part will contain SC and ST series of tables for Scheduled Castes and Scheduled Tribes respectively. The data relating to Scheduled Castes and Scheduled Tribes will be entered on full count basis in the third stage and SC/ST tables will be processed on the computer on full count. These will cover population of each Scheduled Caste/Tribe, industrial categories of main and marginal workers, non-workers seeking/available for work and those who never worked before, educational level, school attendance, age, sex and marital status, composition of Scheduled Castes and Scheduled Tribes. In addition to these, the fertility tables relating to SC/ST are also covered. These tables also cover for Scheduled Tribes, their composition by religion, mother tongue and bilingualism.
Part IX - Town Directory, Survey Report on Towns and Villages	Part IX - A - Town Directory
	Part IX - B - Survey Report on selected Towns
	Part IX - C - Survey Report on selected Villages
Part X	Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes

Part XI - Census Atlas	Union and State/Union Territory Census Atlases
Part XII - District Census Handbook	Part XII - A - Village and Town Directory
	Part XII - B - Village and Town wise Primary Census Abstract

The following special papers are also planned and will be published as and when they are ready as 1991 Census papers :

(a) Special studies taken up by the Directors of Census Operations

(b) Special Areas Surveys

(c) Special Tables for Standard Urban Areas

(d) Language Survey Reports

(e) Post Enumeration Check Report

(f) Age Tables

(g) Life Tables

(h) Reports on estimates of inter-censal birth and death rates using 1981-1991life tables and age data

(i) Development of Vital Statistics in India

Besides these special papers, some monographs based on 1991 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1991 Census monographs.

It is also proposed to carry out some special studies of 1991 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1991 Census.

It is also proposed to disseminate census tabulations and the basic data in machine readable forms such as magnetic tapes, diskettes, floppies, etc.

The District Census Handbooks will be available for sale at the Government Central Press, Bangalore and the other publications at the Office of the Director of Census Operations, Karnataka, Bangalore and the Manager of Publications, Civil Lines, New Delhi - 6.
