# FOREWORD

Publication of the District Census Handbooks (DCHs) was initiated after the 1951 Census and is continuing since then with some innovations/ modifications after each decennial Census. This is the most valuable district level publication brought out by the Census Organisation on behalf of each State Govt./Union Territory administration. It *inter-alia* provides data/information on some of the basic demographic and socio-economic characteristics and on the availability of certain important civic amenities/facilities in each village and town of the respective districts. This publication has thus proved to be of immense utility to the planners, administrators, academicians and researchers.

The scope of the DCH was initially confined to certain important census tables on population, economic and socio-cultural aspects as also the Primary Census Abstract (PCA) of each village and town (ward-wise) of the district. The DCHs published after the 1961 Census contained a descriptive account of the district, administrative statistics, census tables and Village and Town Directories including PCA. After the 1971 Census, two parts of the District Census Handbooks (Part-A comprising Village and Town Directories and Part-B comprising Village and Town PCA) were released in all the States and Union Territories. The third part, Part C of the District Census Handbooks comprising administrative statistics and district census tables, which was also to be brought out, could not be published in many States/UTs due to considerable delay in compilation of relevant material. In 1981, some new features alongwith the restructuring of the formats of Village and Town Directory were introduced in the DCHs. These were published in two parts for each district after the 1981 Census. While Part-A comprised Village and Town Directories, the PCA of villages and towns (ward-wise) including Scheduled Caste and Scheduled Tribe PCA upto tehsil/town level were provided in Part-B. To illustrate, all the amenities except electricity, were brought together in the Village Directory and if an amenity was not available in the referent village, the distance in broad ranges from the nearest place having such amenity was given. Information on some new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet some of the requirements of the Revised Minimum Needs Programme. Similarly, information on approach to the village was also provided for the first time in the Village Directory so as to give an idea about the number of inaccessible villages in each district. In case of Town Directories also, keeping in view the requirements of the Minimum Needs Programme, a Statement IV-A on slums was provided so as to enable the planners to chalk out the programmes for providing better civic and other amenities in the slums. In this Statement details on civic and other amenities were reported for the slums of Class I and Class II towns Apart from this, one column on the Scheduled Castes and Scheduled Tribes population and another on adult literacy classes/centres were added in Statements IV and V respectively.

The manner of presentation of the DCHs for the 1991 Census is by and large the same as followed in 1981. However, the format of PCA has been restructured slightly in the 1991 Census for the benefit of data users. Nine-fold industrial classification of main workers has been given as against four-fold industrial classification presented in the 1981 Census. In addition to this, the sex-wise population in the 0-6 age-group has also been included in PCA for the first time with a view to enabling data users to compute more realistic literacy rates as all children below 7 years of age have been treated as illiterate at the time of the 1991 Census. It is expected that the above mentioned modifications will help the planners in chalking out more effective developmental programmes.

One of the most important innovations in the 1991 Census is the Community Development Block-level presentation of data in the Village Directory and PCA instead of the traditional Tahsil/Taluk/PS level presentation It is expected that the presentation of Village Directory and PCA data at C D Block level will help the planners in formulation of micro-level developmental plans, as the C D Block is the lowest administrative unit for developmental planning

In order to facilitate the task of administrators, planners and researchers intending to use Village Directory/PCA data, either from the magnetic tapes/floppies or from the published records, both the computer and manual codes for each village have been provided for the 1991 Census along with the corresponding codes of 1981

This publication is a joint venture of the State Govt /UT administration and the Census Organisation The data have been collected and compiled under the direction of Ms Sobha Nambisan, Director of Census Operations, Karnataka on behalf of the State Govt administration which has borne the cost of printing. The task of planning, designing and coordination of the publication was initiated by Dr K P Ittaman, former Deputy Registrar General (Social Studies) and Shri M M Dua, Joint Director For the sake of uniformity in presentation of information/data and for preparation of analytical note depicting the salient features emerging from a micro-level analysis of Census/non-Census data, a model District Census Handbook from each State and Union Territory was thoroughly scrutinised in the Social Studies Division under the guidance of Shri M K Jain, the present Deputy Registrar General (S S ) This task was carried out by Shri A K.Singh, Deputy Director who was assisted by S/Shri V K Jain and Hariram, Investigators and staff Technical guidance in the preparation of the maps was initially provided by Dr B K Roy, former Deputy Registrar General (Map) and later by Mrs Minati Ghosh, the present Deputy Registrar General (Map)

I am thankful to all those who have contributed to this project

# PREFACE

In the foreword to the 1991 series of the District Census Handbooks, Sri A R Nanda, I.A.S., the Registrar General and Census Commissioner, India, has traced the history of the District Census Handbooks. He has also succinctly explained the scope and coverage of the District Census Handbooks. These volumes contain the salient data on the population for every village and town as revealed by the 1991 Census. They also contain a wealth of information regarding these villages and towns which, although not part of the population census, throw some light on the circumstances in which people live and is therefore relevant to the data on the population. This information has also considerable importance in the context of planned development.

The District Census Handbook is therefore divided into two parts: Part A containing information regarding each village and town (Village Directory and Town Directory) which is not census data and part B which contains the data on the population collected during the 1991 Census - the Primary Census Abstract. The data published in Part B was collected in February 1991 at the time of the population census. This data was then manually tabulated in the Regional Tabulation Offices set up for the purpose. Subsequently, as a part of the countrywide project taken up in collaboration with the National Informatics Centre, the Primary Census Abstract data was computerised. The data for Part B of the District Census Handbook was therefore available on tape for the entire country by November 1992. Since the Primary Census Abstract data was available first on the computer, it was decided to publish the District Census Handbooks in two separate volumes, with Part B appearing in print first.

The process of data collection for the Village Directory and the Town Directory (Part A) commenced in early 1990 and continued till the middle of 1992. For operational convenience, the Village Directory format was divided into two portions, one relating to the area and land use particulars and the other relating to the amenities available in each village. The relevant formats were mailed to the Deputy Commissioners of Districts and Chief Secretaries of Zilla Parishads for obtaining the villagewise particulars. Similarly the Town Directory formats were mailed to the Deputy Commissioners and Commissioners of Corporations. The villagewise and town wise data furnished by these officers were then examined exhaustively for consistency in reporting and comparability with the information published in the 1981 District Census Handbooks. The villagewise information, thus finalised was also computerised during 1992-93 at the National Informatics Centre, Bangalore as in the case of Primary Census Abstract.

The National Informatics Centre, Bangalore has undertaken to supply the camera ready copies for the District Census Handbooks and this may enable us to bring out the District Census Handbooks fairly early.

In the preparation of the District Census Handbooks the role of the Census Directorate is that of data collector. For accomplishing this task we have had the ready co-operation of the staff of different departments of the State Government. The cost of printing of the District Census Handbooks is borne by the Government of Karnataka.

I take this opportunity to offer my grateful thanks to all the officers and officials who have been actively involved in the compilation of this volume.

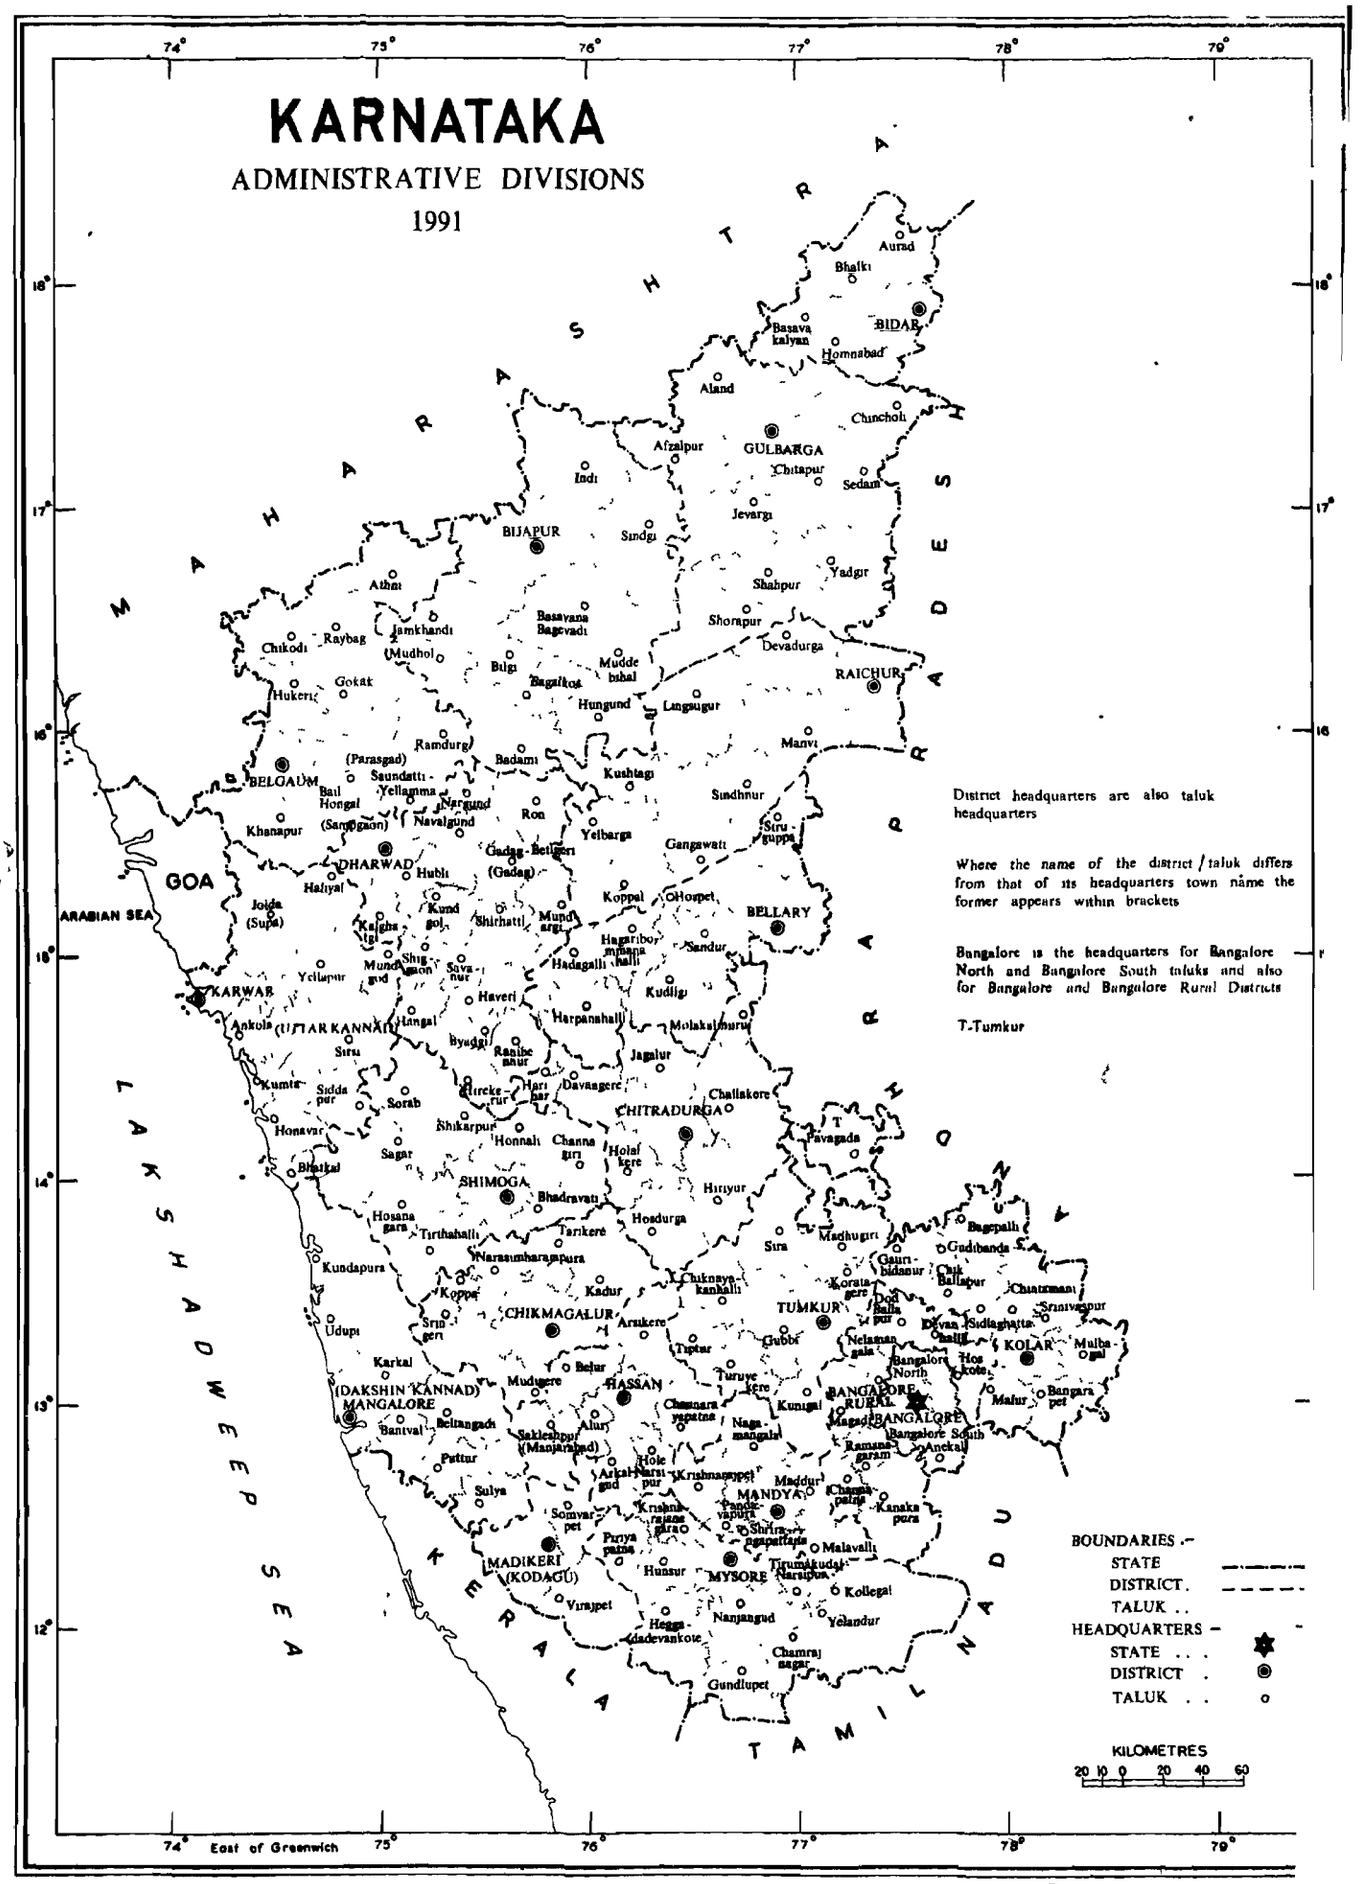

I am thankful to Shri A.Venkateshan, the State Informatics Officer, National Informatics Centre, Bangalore for all the assistance he and his staff members have rendered for computerisation of the data and for preparation of the camera ready copy of the manuscripts of all the Districts.

I am deeply grateful to Shri A.R.Nanda, I.A.S., the Registrar General, India for the benefit I have derived by way of guidance and advice. I express my thanks to Shri M.K.Jain, the present Deputy Registrar General (SS) as well as to Mrs. Minati Ghosh, Deputy Registrar General (Map).

Lastly, I am thankful to the Government of Karnataka for having readily agreed to bear the cost of printing these District Census Handbook volumes and to the Director of Printing, Stationery and Publications for the keen interest he has evinced in bringing out these publications.

# ANALYTICAL NOTE

**Brief History of the District Census Handbook :-**

The District Census Handbook series was, for the first time, included in the census publication programme at the 1951 census in order to satisfy the growing demand for micro-level data by the administrators, the planners and the other census data users. The District Census Handbooks sought to replace 'Part IV - Taluk Tables' and 'Part V - Village Tables' of the earlier censuses and to present the basic demographic and economic data in the form of 'Primary Census Abstract' in respect of each and every village and town within the jurisdiction of the district concerned. In addition, these volumes were to contain a set of statistical tables based on the census data in respect of the district and its constituent taluks and towns.

At the 1961 census, the scope of the District Census Handbook was greatly enlarged by incorporating in it - (i) a descriptive account of the district, (ii) a set of non-census tables dealing with the administrative statistics of the district for a decade, (iii) taluk and town level census tables on economic and socio-cultural aspects and (iv) the village and urban (census enumeration block level) Primary Census Abstract containing the ninefold industrial classification of workers. In a somewhat general way, information on the availability of certain basic amenities in villages and towns, such as the sources of drinking water and educational institutions, was also presented in these volumes. These general guidelines were, by and large, followed in Karnataka too. However, the scope of the District Census Handbooks of 3 out of the then existing 19 districts, namely Bangalore, Dharwar and Mysore, was confined to the publication of the village-wise and urban (census enumeration block wise) Primary Census Abstract only.

The 1971 census witnessed an overall improvement in the matter of compilation as well as presentation of the data. A country-wide uniformity in approach and a comprehensive coverage are the hall marks of this series of publications. In 1971, the District Census Handbook was split up into three portions - (i) Part A - consisting of land use data on villages and also the data on the nature and extent of amenities and services available in the villages and towns of the district - presented in the form of Village Directory and Town Directory respectively, (ii) Part B - consisting of the Primary Census Abstract (including the nine-fold industrial classification of workers) for the district, the taluks, the towns, the villages and the census enumeration blocks in case of towns; and (iii) Part C - consisting of an analytical note based on an analysis of the census data as well as the non-census data included in the volume, a set of tables depicting the administrative statistics in minute detail, a set of statistical tables based on the census data in respect of the district and the constituent taluks and towns thereof besides a set of tables generated on the basis of the villagewise census data in association with the villagewise data on the availability of amenities. The main objective was to present a comprehensive and intelligible portrait of the district and an overview of the developmental programmes implemented in the district during the preceding decade. Publication of the District Census Handbooks was planned in such a way as to minimise the delay inherent in the compilation of a voluminous mass of data gathered from different sources. Accordingly, 'Part A', comprising the Village Directory and the Town Directory for the finalisation of which there was no apparent need to wait till the completion of the tabulation of the data gathered at the census, was to be published first and 'Part B', consisting of the Village/Urban Primary Census Abstract was to be released next. A lower priority was assigned to 'Part C' for the obvious reason that besides administrative statistics it was to include a set of socio - demographic and economic tables generated on the basis of the data gathered at the census and an analytical note prepared thereof. In Karnataka, however, 'Part A' and 'Part B' portions of the District Census Handbooks were combined together and published in a single volume for each district except Bangalore. In the case of Bangalore District, since it was felt that the size of such a combined volume would be unweildy, Part A and Part B were published separately. As regards 'Part C', compilation of data took more time than anticipated and, in addition, there was an inordinate delay in executing the printing job at the State

Directorate of Printing. As a result, only a portion of Part C (depicting some of the census tables) relating to Bangalore District was published somewhat belatedly and the proposal to publish the remaining portion of Part C for Bangalore District as well as the entire portion of Part C for the other districts was finally abandoned.

Instead of witnessing an expansion as in the past two censuses the scope of the 1981 series of the District Census Handbooks was curtailed to a considerable extent in that it was confined to the publication of Village Directory, Town Directory and the Village/Urban Primary Census Abstract. Thus, at the initial stage itself there was no proposal to compile and publish the administrative statistics and the various socio-demographic and economic tables based on the census data, that is, the portion which constituted 'Part C' of the 1971 series. But for this change, the approach in 1981 regarding uniformity and comprehensiveness were very much the same as in 1971. In order to avoid delay in publication, as in the past, the District Census Handbook was proposed to be published in two parts, namely, 'Part A' consisting of the Village Directory and Town Directory and 'Part B' consisting of the Village/Urban Primary Census Abstract besides the Special Primary Census Abstracts at taluk/town level in respect of the Scheduled Castes and Scheduled Tribes population of the district.

At the 1981 census, the contents of the Village Directory and the Town Directory were slightly enlarged and the formats were restructured. In the Village Directory all the amenities except power supply were brought together under a broad heading with the provision that 'in case an amenity is not available in the referent village, the distance to the nearest place where that particular amenity is available may be indicated in broad ranges'. A new item 'approach to the village' was included. In the remarks column, a provision was made to report the number of copies of newspapers in circulation in the village as also the number of motor cars, the number of motor cycles and the number of tractors available in the village. Further, in order to examine whether there is any correlation between the availability of amenities and the population size of a village, an additional column was provided in the Village Directory to indicate the population and number of households. The contents of Part A were further enlarged by including two appendices, namely, a list of villages not having any amenities and a distribution of villages according to the proportions of Scheduled Castes and Scheduled Tribes in the total population of the village. The Town Directory formats were also modified by the addition of a few items such as class of town, population, Scheduled Castes and Scheduled Tribes population, decadal growth rate of population, working women's hostel, adult literacy classes/centres, storage system regarding drinking water supply etc., and also by providing for recording the information about the nearest place (and distance) having educational, medical and fire-fighting facilities in case such a facility is not available in the referent town. As compared to 1971, while one statement indicating religion-wise population of the town was dropped, another statement to provide information about the amenities available in notified slums in Class I and Class II towns was added. As regards the Primary Census Abstract of towns, the urban block-wise presentation of data was given up and details were presented only upto the level of Wards/Divisions. However, information on the number of persons belonging to Scheduled Castes and Scheduled Tribes was furnished for each census enumeration block within the town in the form of an appendix and an annexure thereto provided the description of the boundaries of each census enumeration block. Further, instead of the nine-fold classification of workers adopted at the 1971 census, on this occasion the classification was restricted to 4 categories. In Karnataka, in 1981 also, both Part A and Part B portions of the District Census Handbooks were published together in a single volume for each district. However, because of certain technical compulsions, all the information relating to Scheduled Castes and Scheduled Tribes was excluded from the main formats and was presented separately at the end in the form of a Supplement (separate booklets were brought out in the case of Bidar and Mandya Districts).

**2. Scope of the 1991 District Census Handbooks:**

As in 1981, in 1991 too, the District Census Handbooks are proposed to be brought out in two portions, namely Part A consisting of the Village Directory and the Town Directory and Part B

consisting of the Village Urban ward wise Primary Census Abstract in addition to the District Primary Census Abstract and the Special Primary Census Abstract in respect of the Scheduled Castes and Scheduled Tribes. Though, the scope of the 1991 series of the District Census Handbooks has, by and large, remained the same as in 1981, a few significant changes have been made in the Village Directory format as well as the Primary Census Abstract format. In Karnataka, unlike at the previous censuses, on this occasion, the 'Part A' and 'Part B' portions of the District Census Handbooks of each district are being brought out in separate volumes.

The manner of presentation of data has also undergone a significant change in that the Village Directory and the Primary Census Abstract data are presented according to the location of villages and towns within the jurisdiction of a Community Development Block rather than their location within a taluk*. In other words, the traditional practice of taluk-level presentation of data has now been givenup in preference to the Community Development Block level presentation of data which is considered as more meaningful in the present day context. Since C.D.Block is the lowest administrative unit for developmental planning, the choice of the C.D. Block as the unit for data presentation is expected to help the planners in formulating micro-level developmental plans. Another innovation at the 1991 census is the arrangements made for the dissemination of the data in collaboration with the National Informatics Centre through its country-wide computer network. In the published volumes of the District Census Handbooks, therefore, the computer codes assigned to the villages in the 1991 census and the corresponding codes in 1981 are presented so as to facilitate the data users who may prefer to use the data either from magnetic tapes or floppies.

**(i) Village Directory :**

The Village Directory format adopted for the 1991 series has 18 columns. When examined with reference to the 1981 format it will be noticed that two columns have now been left out - while one of these columns refers to the 'staple food' the other refers to the 'remarks' under which, information about the places of religious, historical or archaeological interest in the village as also information about the number of copies of newspapers in circulation, the number of motor cars, motor-bicycles and tractors available in villages was published in 1981. As compared to 1981, there is no change in the scope and coverage of the information presented in the 18 columns of which 8 are devoted for amenities and 6 are meant for indicating the area of the village and the land use pattern. The remaining four columns are meant for indicating the location code and name of the village, total population and the number of households enumerated in the village and the name of the nearest town as also the distance to that town. The aspects covered under the amenities are: educational, medical, sources of drinking water supply, postal and telegraph, weekly market, communication, nature of approach road and power supply. Further, if a village did not have any educational facility at all, instead of merely reporting the fact and stopping at that, an indication of the distance (in ranges) that the villagers have to traverse to reach a place with educational facilities (at the basic level) is reported. The same procedure of reporting is adopted regarding medical facilities, drinking water supply, postal and communication as well as weekly market facilities. The distance ranges adopted for reporting are the same as in 1981, namely -5 km, 5 - 10 km and 10+km. In an explanatory note, which precedes the presentation of the Village Directory Statements, details about the abbreviations used under various columns are furnished.

---

* *In Karnataka, the 'Taluk Panchayat Samiti' corresponds to the Community Development Block, and for the sake of maintaining uniformity with the all India pattern, the term C.D.Block has been used throughout in the District Census Handbooks. The jurisdiction of a Taluk Panchayat Samiti is coterminus with that of the corresponding Taluk but excludes the statutory towns.*

The main agency which has furnished the villagewise information on amenities is the Zilla Parishad which in turn has collected the relevant particulars through its field formations, namely the Chief Executive Officers (i.e., the Block Development Officers) of the various *Taluk Panchayat Samitis*. These details were examined for consistency as well as with reference to the particulars reported in 1981 and cases of deterioration or of abnormal developments were referred back for reverification and rectification. For instance, as compared to 1981, for several villages, Wells and Tanks did not find a mention as a source of drinking water supply. When referred back, the concerned Chief Executive Officers clarified that in most of these cases, the drinking water wells of yester years have either dried up or fallen into disuse on account of the increasing number of borewells drilled in such villages and also because of the implementation of the National Rural Water Supply Scheme, the Mini-Water Supply Scheme and Accelerated Water Supply Scheme etc. So also regarding the availability of pucca approach road facility several instances of deterioration were noticed. Such cases too were referred back so that the factual data may be verified again and reported for publication. Information about the number of educational institutions, nature of government run medical institutions and postal, phonocom and telegraph facilities as furnished by these officers have been cross-checked with the data obtained from the concerned Departments as well to ensure a higher level of reliability.

In case of uninhabited villages, i.e., villages which returned 'nil' population at the 1991 census count, except the name and the total area no other information is furnished. Instead of putting a dash under each column to indicate this fact, the word 'uninhabited' is printed along the line.

In order to facilitate easy reference, an alphabetical list of villages is given at the begining in respect of each C.D.Block. This list indicates the code numbers assigned to the villages for purposes of census enumeration as well as the computer codes assigned (at the stage of computerisation) as also the corresponding codes according to the 1981 census. At the end of the Village Directory the following appendices are given:- C.D. Block-wise abstract of amenities; list of villages not having any amenities except Drinking Water, land utilisation data in respect of non-municipal towns and distribution of villages according to the proportion of Scheduled Castes population and Scheduled Tribes population.

**(ii) Town Directory :**

As in 1981, in 1991 too, there are seven statements which furnish information on the following aspects - growth history; physical aspects and locational particulars; municipal finance; civic and other amenities; civic amenities available in the notified slums of Class I and Class II towns; medical, educational, recreational and cultural facilities; and trade, commerce, industry and banking. The scope of the various column headings adopted in 1981 has remained unchanged in 1991. However, in Statement-I, slight modifications have been made to accomodate the 1991 census data - an additional column is provided for indicating the 1991 population and the growth rate registered by the town during the decade 1981-91. In Statement-I an additional column has been provided for indicating the name of the C.D.Block within the jurisdiction of which the referent town is located. It may be incidentally mentioned that, in Karnataka, the civic bodies functioning in the Statutory Towns do not fall within the administrative jurisdiction of the C.D.Blocks (i.e., Taluk Panchayat Samitis).

In the Town Directory statements, the towns are arranged in an alphabetical order of their names and the aggregate particulars about urban agglomerations if any in the district have also been furnished in the same order. Where an urban agglomeration includes two or more independent towns, the names of these constituent towns are shown in the correct sequence as per the alphabetical arrangement of their names. But, the details which ought to have been furnished in the subsequent columns have been skipped with a view to avoiding repetition. Instead, immediately after the name of the town, a cross reference is given by printing the message "see ..... urban agglomeration". The name of the core town of the urban agglomeration too appears at its correct sequence with the legend printed thereafter and immediately below that, i.e., in the next line the same name with the suffix urban agglomeration appears again without bearing any

serial number. Against this name the cumulative totals for the urban agglomeration as a statistical unit are presented wherever such a procedure is relevant and meaningful. This line is then followed by those relating to the constituent towns of the urban agglomeration starting with the name of the core town and followed by the others arranged in an alphabetical order of their names. This procedure, it may be recalled, is the same as that adopted in 1971 as well as in 1981 and this enables one to have a fairly good assessment of the data relating to the smaller civic administrative units that form part of the larger unit and also of the aggregate data relating to the larger unit itself. In case there are 'outgrowths' which are not 'urban areas' in their own right, the particulars relating to such areas are merged with the data relating to the concerned core town. Such towns which have 'outgrowths' are marked out by an asterisk mark and for all purposes, the term 'town' would cover the core town as well as its outgrowths. In an appendix the names of the revenue villages or areas which have been identified as outgrowths and the population thereof are indicated separately. In the case of villages certain parts of which are regarded as outgrowths while the other parts are considered as 'rural', the data relating to the outgrowths (i.e., the urban component) is included in the Town Directory statements and the data pertaining to the rest of the portion retained in the rural frame appears in the Village Directory. In Statements II, III and VI where it is not relevant to combine the data for the urban agglomeration as a whole, the legend 'see the constituent towns' is printed against the name of the urban agglomeration instead of allowing the entire line to remain blank.

The particulars furnished in Statement I which deals with the growth history are entirely based on the current as well as the previous censuses. As such, this has been compiled in the Census Directorate without seeking information from the concerned civic bodies. The details presented in the remaining statements have been furnished mainly by the concerned civic authorities such as the Municipal Commissioners, Chief Officers of towns, Secretaries of Mandal Panchayats, Administrative Officers etc. Except for the information regarding municipal finance, most of the information on other aspects had to be gathered by the civic authorities from several offices and institutions located in the town through correspondence and or by deputing officials for the purpose. The particulars so furnished were scrutinised in the first stage and cases of abnormal variations as compared to the situation in 1980 and also inconsistencies were referred back to the reporting agency for reverification and rectification so as to ensure that the details now given in the Town Directory represent the factual position.

The scope of the information presented under various columns and the abbreviations used are explained in a note which precedes the presentation of the Town Directory statements.

**(iii) Primary Census Abstract :**

The Primary Census Abstract is presented village-wise in the case of 'rural' areas and town-wise (upto ward or division level) in the case of urban areas. The outgrowths of a town are treated at par with a ward or division of the core town irrespective of the number of census enumeration blocks into which it is constituted. Within the district, the Community Development Blocks are arranged in the alphabetical order of their names in English and covered one after the other in that order. For each C.D.Block, the total figures with the rural-urban break-up is given first and this is followed by the village-wise data and then by the ward-wise data for the towns if any, within the jurisdiction of the C.D.Block. In the case of a village of which only a portion has been incorporated in a town or has been recognised as an outgrowth of a town, the details relating to only that portion which is not so incorporated or so recognised but has been retained in the rural frame is presented under various columns. The names of villages (and their respective areas) which are fully included in urban areas or have been recognised as outgrowths of towns for purposes of the 1991 Census (but are retained in the jurisdictional lists of the Survey and Settlement authorities) if any within the boundaries of the C.D.Block are indicated in the flyleaf which precedes the PCA statement for the C.D.Block

After presenting the PCA data for all the villages and towns covered by the C.D.Blocks in the district,

the PCA data relating to all the urban areas of the district (i.e., statutory as well as non-statutory towns) are furnished. For this purpose, the towns/urban agglomerations are arranged in an ascending order of their location code numbers. And, for each town the ward or division-wise details are presented here.

In Karnataka, as already mentioned, the jurisdiction of a C.D.Block is coterminus with that of the Taluk of the same name, but excludes the areas incorporated in statutory towns and cities. By and large, a C.D.Block corresponds to the rural areas of the taluk. However, if there are any non-municipal census towns and areas which have been identified as outgrowths of statutory towns within the jurisdiction of the taluk, then such towns and outgrowths are also regarded as lying within the jurisdiction of the concerned C.D.Block. The PCA particulars relating to such units are presented under the concerned C.D.Blocks against the urban category and are repeated again at the end under the caption 'District Urban'.

In the case of an urban agglomeration, the aggregate figures obtained by the addition of the data relating to the constituent towns and outgrowths thereof if any are presented against its name. Thereafter, the data for the constituent towns starting from the core town including the location code, are presented in a continuous sequence. In case a town has outgrowths (which are not towns in their own right) in the first line the aggregates relating to the core town as well as its outgrowths are given and this is then followed by the details relating to the core town and the outgrowths separately. Each outgrowth is treated at par with a municipal ward or division while presenting the ward-wise PCA for towns.

**3. Brief note on Census concepts :**

Census taking is a massive operation carried out in a short span of time with the active participation of a very large number of census enumerators. The reference moment for the 1991 census count is the sunrise of March 1, 1991. However, the enumeration of the population was spread over a period of 20 days from 9-2-1991 to 28-2-1991 followed by a revisional round from 1-3-1991 to 5-3-1991 for updating the population count with reference to the sunrise on March 1, 1991. The questionnaires canvassed by the enumerators, namely the Household Schedule and the Individual Slip are brief in their wordings and the concepts used for purposes of the 1991 Census Operations and the manner in which the schedules are to be filled in have been explained in a booklet entitled Instructions to Enumerators for filling up the Household Schedule and the Individual Slip. Some of the important concepts and the relevant explanations are indicated in the following paragraphs.

(i) **Urban areas** :- The definition adopted in 1961 and adhered to in 1971 as well as in 1981 (though with a slight modification regarding the classification of fishing and forestry) has been retained for the 1991 census also. According to this definition the urban areas include :

i) all places with a Municipality, Corporation, Cantonment Board or Notified Town Area Committees, etc.

ii) all other places which satisfy the following criteria :

a) a minimum population of 5,000

b) atleast 75 per cent of the male working population engaged in non-agricultural pursuits and

c) a density of population of at least 400 per square kilometre (1000 per square mile)

d) all places which, though not satisfying the above criteria, had pronounced urban characteristics.

(ii) **Urban Agglomeration:** This concept, which replaced the concept of 'town-group' in 1971, has been retained for the 1991 census. It has been observed that very often railway colonies, university campuses, port areas, military camps and large residential colonies etc., come up quite adjacent to, but situated outside the statutory limits of cities and towns. Such areas may not by themselves qualify to be treated as towns. But if they form a continuous spread with the town they are outgrowths of the town and deserve to be treated as urban. Such towns together with their outgrowths have been treated as one urban unit called "urban

agglomeration" An urban agglomeration may consist of .

a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages);

b) One town with similar outgrowths or two or more adjoining towns with their outgrowths as in (a) ; or

c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Geographical contiguity with the statutory limits of the core town is the main factor in determining whether or not a nearby satellite town or an outgrowth is to be included in the urban agglomeration. This is purely a statistical concept and for carrying out the actual census, the administrative jurisdictions of the city or the towns concerned as well as of the outgrowths have been kept quite intact. The data are presented for the urban agglomeration as a whole and also severally for each of the constituent units

(iii) **Rural areas - i.e., villages :** Areas which are not classified as 'urban' according to the definition given above constitute the rural areas. The basic unit for rural areas is the revenue village which has definite surveyed boundaries. In the case of unsurveyed villages, the boundaries as determined by the local usage have been adopted The revenue village may consist of a single nucleated settlement or comprise of several settlements or clusters of houses located at several places within the territorial limits of the village or the village may not be having any human settlements at all (i.e., it may be totally uninhabited). The census village and the revenue village are identical in the matter of jurisdiction. However, there are a few exceptions to this general rule:

1) When the main settlement of the village with or without the surrounding open lands is constituted into an urban area, the remaining tracts of the revenue village are together treated as a separate unit for purposes of census i.e., the truncated portion itself is considered as an independent revenue village.

2) When outlying portions of certain revenue villages are incorporated into the limits of urban areas by a Government Notification such areas, whether populated or not, are excluded from the revenue village concerned and the village boundaries are redefined for census purposes.

3) Revenue villages which are completely incorporated in the limits of urban areas or else, are submerged completely under reservoir projects but are still retained in the jurisdictional lists of the Survey and Settlement authorities pending a resurvey and such other procedures, are taken note of as revenue villages but are omitted for census purposes i.e., these are not treated as census villages. Similarly, entire revenue villages, which have been identified as outgrowths of urban areas for purposes of 1991 census are treated not as census villages but as urban areas. The names of such villages, if any, in a Taluk/C.D.Block are indicated in a fly leaf.

4) If there are forest areas that do not form part of any of the revenue villages then such areas are identified clearly and the smallest administrative unit into which such forest areas are divided (eg.Forest Beat) is reckoned as the census village. A Forest Range may consist of several such census villages (In Karnataka this phenomenon is noticeable only in Kollegal Taluk of Mysore District).

(iv) **Census Enumeration Block :** The smallest unit adopted for census taking is the Census Enumeration Block. Generally, the towns and cities are divided into wards or divisions and, wherever such units exist, their distinctive identities have been maintained. The geographical area comprised in each such ward or division or, the town in its entirety, is constituted into several blocks in such a way that every bit of land specifically stands included in one or the other enumeration block and also that there is no over-lapping of areas. In the urban areas, the Census Enumeration Blocks are constituted in such a way that each such Block contains about 120 households covering a population of about 600 persons. However, in view of the condition that

each block should have clear-cut boundaries easily recognisable on the field, blocks which are either larger or smaller than the norm have also been constituted. In the case of non-municipal towns, if the town boundaries are not specifically notified, the jurisdiction of the entire revenue village concerned is regarded as the jurisdiction of the town as well. In the case of towns which are under the administration of Mandal Panchayats, the Panchayat jurisdiction need not necessarily be identical with the jurisdiction of the non-municipal census town.

In the case of villages, depending upon the population data based on the Houselisting Operations carried out during 1990, each village has been constituted into one or more number of Census Enumeration Blocks. The work-load norm for the rural areas is 150 households covering an approximate population of 750 persons. However, numerous Census Enumeration Blocks with below-norm population have been constituted and a single enumerator has quite often been entrusted with the enumeration work in 2 or more contiguous blocks so as to ensure that the aggregate population is quite close to the norm. Further, in each village care has been taken to ensure that no bit of land belonging to that village is left out of consideration while constituting the Blocks. Each hamlet or island, if any, found within the jurisdiction of the village - irrespective of its population size - has been constituted into a separate Block in order to maintain its geographical identity. Further, even the villages known to be uninhabited at the time of houselisting operations have been constituted into separate blocks. In other words, a complete coverage of the territorial jurisdiction of each and every village has been ensured.

(v) **Location Code Number** : Every State in the Country, every District in the State, every Taluk or Town in the District, every C.D. Block (or its equivalent) in the District, every village in the taluk and every ward or division in the city or town and every enumeration block in the village or town is assigned a number in a particular order for carrying out the census enumeration. When these numbers are written side by side in the same order, starting from the State and separated by an oblique mark, the identity of any particular census enumeration block can be known quite easily. The numbers assigned are in Arabic numerals, except in the case of towns in which case Roman numerals have been adopted. For assigning the location code numbers the States in the Country, the Districts in the State, the Towns in the District and the Taluks/C.D.Blocks in the District are arranged in the alphabetical order of their names. The villages in a taluk are organised into revenue circles' or hoblis for administrative purposes and each such unit will have a headquarter town or village. The identity of such units is maintained while assigning the location code numbers. Starting from the circle of which the Taluk Headquarters happens to be the Circle headquarters as well, the villages in its jurisdiction are serially numbered by proceeding in a clockwise direction or in a serpentine manner starting from the north-west corner. After exhausting all the villages in that circle, the villages of the adjacent circle are assigned numbers in the same manner. The numbering of villages run continuously for the Taluk through the different Circles or Hoblis.

The entire set of the 1991 census data relating to the village directory and the village/urban ward-wise PCA has been computerised. For this purpose a separate code structure has been developed. The computer codes assigned to the villages in each Taluk or C.D.Block are indicated in the alphabetical list of villages along with the corresponding location code numbers assigned for enumeration purposes. So also particulars about the codes assigned to towns are indicated in the alphabetical list of towns which precedes the presentation of the PCA statements in respect of the urban areas of the district.

(vi) **Building** : A building is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-*cum*-residence, workshop-*cum*-residence, office-*cum*-residence, etc.

(vii) **Census House** : A 'census house' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase, etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

(viii) **Household** : A 'household' is a group of persons who commonly live together and take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of households having unrelated members are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashramas* etc. These are called 'Institutional Households'. There may be one member households, 2 member households or multi-member households. For census purposes, each one of these types is regarded as a 'household'. If a group of persons who are unrelated to each other live in a census house but do not have their meals from the common kitchen, they would not constitute an institutional household. Each such person would be treated as a separate household. The important link in finding out whether there is a household or not is a common kitchen. There may be a household which does not have a house to live in and may temporarily dwell on the roadside pavement, in hume pipes, temples, *mantaps*, platforms etc., or move about from place to place resting underneath shade-bearing trees, pavements and verandahs of public or private buildings. Such households, referred to as 'Houseless Households' for census purposes, were enumerated on the night of February 28, 1991.

ix) **Criteria for enumeration of a person in a particular household :**

1) All those who normally stay and are present in that household during the entire period of enumeration i.e., from February 9 to February 28, 1991 (both days inclusive);

2) All those who are known to be normally residing and had actually stayed during a part of the enumeration period (February 9 - 28, 1991) but are not present at the time of the enumerator's visit ;

3) Also those who are known to be normally residing and are not present at the time of the enumerator's visit but are expected to return before February 28, 1991 and

4) Visitors who are present in the household censused and are away from the place(s) of their usual residence during the entire enumeration period. For the purpose of enumeration such visitors will be treated as normal residents of the household in which they are actually found during the enumeration period provided they have not been enumerated elsewhere.

(x) **Literate** : A person who can both read and write with understanding in any language is 'literate'. A person who can merely read but cannot write, is not 'literate'. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard. All children of the age of 6 years or less are treated as illiterate.

(xi) **Workers and Non-workers** : For census purposes 'work' is defined as 'participation in any economically productive activity'. Such participation may be physical or mental in nature and would involve not only actual work but also effective supervision and direction of work. It also includes unpaid work on farm or in family enterprise. The reference period for determining whether a person is a worker or a non-worker is the year i.e., the 365 days, preceding the date of enumeration. The criterion is liberal and, even a person who has participated in the production of goods and services for a very brief period is entitled to be categorised as a worker. Depending upon the nature of his or her activity during the reference period, every person enumerated at the census is classified as either a worker or a non-worker.

Among 'workers' however there are two categories:

**Main Workers** : Those who have worked for a major part of the year i.e., for 183 days or more (6 months or more) during the reference period even though this may be in broken spells and in different occupations.

**Marginal Workers** : Those who have not worked for a major part of the year under reference i.e., those who have worked for less than six months (i.e., for less than 183 days) during the entire reference period.

In view of the past experience that women are often classified as non-workers because of non-reporting of their work or as those who have not worked for a major part of the year, special efforts have been made at the 1991 census for eliciting accurate information by asking probing questions.

In respect of main workers as also marginal workers, further details on the sector of economy in which they worked, the actual nature of work done by them, their employment status (i.e., employer, employee, unpaid family worker or own account single worker) have been gathered at the census.

Important terms such as cultivators, agricultural labourers and household industry are explained below.

a) **Cultivators**: For purposes of census, a person is working as a cultivator if he or she is engaged either as employer, single worker or family worker in cultivation of land owned or held from Government or held from private persons or institutions for payment in money, kind or share. Cultivation includes supervision or direction of cultivation as well. A person who has given out his or her land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct the cultivation of land, will not be treated as 'cultivator'. Similarly, a person working in another person's land for wages in cash or kind or a combination of both will not be treated as 'cultivator'.

Cultivation involves ploughing, sowing and harvesting. For certain reasons, the growing of certain crops is not considered as cultivation and a person engaged in growing of such crops is not regarded as a cultivator. A person can be classified as cultivator or not, *only on the basis of the crops grown*. The growing of the following crops is considered as cultivation.

1. Cereal and Millet crops : Paddy, wheat jowar, bajra, maize, ragi, barley, etc.
2. Pulses : Arhar, gram, kesari, moong, masur, urd, etc
3. Fibre crops : Raw cotton, jute, mesta, sunhemp and kindred crops.
4. Oil Seeds : Sesamum, ground-nut, rape seed, mustard, linseed, sunflower, castor, etc.
5. Cash crop : Sugarcane

The growing of the following crops *is not considered* as cultivation :

1. Plantation crops : Tea, coffee, rubber, tobacco, pepper, cardamom, etc.
2. Edible nuts (other than groundnut) : Walnut, almond, cashewnut, etc.
3. Fruits : Bananas, apples, grapes, mangoes, oranges etc.
4. Coconut
5. Ganja, cinchona, opium and medicinal plants.
6. Betel nuts (areca)
7. Flowers
8. Roots and tubers, chillies and spices
9. Vegetables
10. Other crops not specifically included under cultivation.

b) **Agricultural Labourer** : A person who works in another person's land for wages in money, kind or share is regarded as an agricultural labourer. He or she has no risk in the cultivation. The agricultural labourer has no right of lease or contract on the land on which he or she works.

c) **Household Industry** : Household Industry is defined as an industry conducted by the head of the household himself or herself and or by the members of the household at home or within the village in rural areas and only within the precincts of the House where the household lives in the case of urban areas. The larger proportion of workers in a household industry would consist of members of the household including the head. The industry

should not be run on the scale of a registered factory which would qualify to be registered under the Indian Factories Act. Household Industry should relate to production, processing, servicing, repairing or making and selling (but not merely selling) of goods. The goods produced should not be exclusively for consumption by the household itself but should be wholly or partly for sale.

d) **Other Workers** : All workers, i.e., those who have been engaged in some economic activity during the reference period of last one year, who are not Cultivators or Agricultural Labourers or workers in Household Industry were categorised as 'Other Workers' (OW) at the time of census enumeration and further details about the nature of industry, trade or service in which they were engaged were gathered by the enumerators. On the basis of this descriptive information, at the tabulation stage, each such worker has been further categorised as belonging to one or the other of the following Industrial Categories based on Revised National Industrial Classification - 1987.

III Workers in livestock, forestry, fishing, hunting, plantations, orchards and allied activities;

IV Workers in mining and quarrying activities;

V(b) Workers in manufacturing, processing, servicing and repairs which are carried on as other than household industry;

VI Workers in construction;

VII Workers in trade and commerce;

VIII Workers in transport, storage and communications, and

IX Workers in other services.

(xii) **Non-workers** : All those who have not at all participated in any economic activity during the reference period of one year preceding the date of enumeration are classified as non-workers.

Depending upon the manner in which such non-workers engaged themselves for most of the time during the reference period of one year they are classified into one or the other of the following six categories at the time of census enumeration itself. However, the Primary Census Abstract presented in this volume does not furnish details according to the categories of non-workers but indicates the total number of non-workers by sex.

a) **Household duties** : This covers all persons who are engaged in unpaid home duties and who do no other work or have not done any work at all during the last one year.

b) **Students** : This will cover all full-time students including children attending school.

c) **Dependents** : This category includes all dependents such as infants, children not attending school and permanently disabled from work because of illness or old age. Dependents will include even able bodied persons who cannot be categorised in any other category of non-workers but are dependent on others.

d) **Retired Persons or Rentiers** : A person who has retired from service and is doing no other work i.e., not employed again in some full time work or not engaged in some other work such as cultivation, business, trade, etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend, or any other person of independent means for securing which he or she does not have to work, will come under this category.

e) **Beggars** : This will cover beggars, vagrants or cases such as persons without indication or source of income and those with unspecified sources of subsistence who are not engaged in any economically productive work.

f) **Inmates of Institutions** : This will cover convicts in jails or inmates of a penal, mental or charitable institution even if such persons are compelled to do some work such as carpentry, carpet weaving, vegetable growing, etc., in such institutions. But an undertrial prisoner enumerated in a jail would be recorded for the work he or she was doing before he or she was apprehended. Similarly, a person temporarily in a hospital or similar institutions would be recorded for the kind of work he or she was doing before he or she was admitted into the hospital or institution. But, for a long-term undertrial prisoner or convict in a prison or for long-term inmates of penal or charitable or mental institutions, the person's previous work would not be taken into consideration. A person will be considered as 'Long-term' inmate if he or she is in such an institution for 6 months or more.

## 4. Brief History of the District

According to the legendary accounts, the present site of Mandya City was known as Vedaranya in *Krita Yuga* and great sages like Kadamba, Kanva and Gauthama had their hermitages on the banks of the rivers Cauvery and Shimsha flowing through this district. Historically, this small and compact district, forming part of the larger Mysore plateau, was under the reign of the Gangas from about the beginning of the Christian era till the close of tenth century A.D. Maddur, known as Marudur in epigraphs, was the capital of the territory designated as Chikka-Gangavadi. This town retained its importance during the reign of the Hoysala King Vishnuvardhana also, for he is said to have re-named the place after his son's name as Narasimha-Chaturvedi-Mangalam and made it into an *agrahara*. The Gangas were subdued for some time by the Rashtrakutas but were completely over-run by the Cholas in about 1004 A.D. Thereafter, in these parts of the country, the supremacy of the Cholas lasted for about a hundred years before they yielded place to the Hoysalas. Vishnuvardhana of the Hoysala dynasty who, by 1117 A.D. recovered all the former Ganga dominions and took the title Vira Ganga, is known to have assigned *ashtagrama*, the fertile tract of lands situated on either bank of the river Cauvery to the disciples of his own religious mentor, namely, Ramanujacharya the propounder of the Vishishtadvaita philosophy. With the decline of Hoysala power, this region came under the suzerainty of the Vijayanagar empire. In 1495 A.D., Narasa Nayaka, the founder of the third dynasty of Vijayanagar, captured Shrirangapattana. Thenceforth, Shrirangapattana became the seat of a Viceroy of the Vijayanagar empire and continued to flourish under the royal patronage. In the beginning of the 16th century the chief of Ummattur, Ganga Raja, established a principality at the island of Shivana Samudram and took over Shrirangapattana, assumed independence and claimed Penukonda. As a result, the then ruler of the Vijayanagar, viz., King Sri Krishnadevaraya, led an expedition in 1511 A.D. and re-captured the lost territories. Later, when Ganga Raja II was the chief of Shivana Samudram, he was attacked by his own sons-in-law and, it is said, that this island principality withstood the siege for 12 long years until his own minister succumbed to bribery and allowed the enemies to enter the fort. In his desperation, Ganga Raja first killed all his womenfolk and children and then died in the battle field. Struck with horror, his two sons-in-law leaped into the Gaganachukki cataract here and were followed by their wives i.e., the daughters of Ganga Raja whose arrogance had lead to the catastrophe. In about 1532 A.D. the Vijayanagar king Achuta Raya visited Shrirangapattana on his way back from Srirangam. Even after the decline of the Vijayanagar empire, Shrirangapattana continued to be a seat of power. According to epigraphic evidence, Rama Raja (one of the four sons of King Tirumala Raya) who is styled as *Maha Mandaleshwara*, was the viceroy of the Shrirangapattana region. In 1610 A.D., when his son Tirumala II was the viceroy of Shrirangapattana, Raja Wodeyar of the now famous Wodeyar dynasty gained possession of Shrirangapattana and made it his capital. His grand son Chamaraja Wodeyar II (1617-37 A.D.) extended the kingdom south of the present districts of Mandya and Mysore and also captured several places in the north from Jagadeva Raya, of Channapatna. Nagamangala, which for centuries, had been the seat of a line of Lohita Chiefs and was held by Jagadeva Raya too was annexed by Chamaraja Wodeyar in 1630 A.D. His successor, Kanthirava Narasa Raja Wodeyar assumed complete independence from the nominal heads of the Vijayanagar empire. He ruled from 1638 to 1659 A.D. and issued coins in his own name. It was during his reign that the Bijapur armies marched south under the command of Ranadullah Khan and attacked Shrirangapattana as well. Kanthirava Narasa Raja defended the fort, repulsed the attack and harassed the retreating enemy by successive attacks. Later, during the regin of Deva Raja Wodeyar, Shivappa Nayaka of Keladi made an unsuccessful attempt on Shrirangapattana and, in the process, himself ceded large territories to Deva Raja Wodeyar. Similar was the fate of the Nayaka of Madurai who had to surrender Erode and Dharmapuram. Shrirangapattana became a flourishing city during the reign of Chikka Deva* Raja Wodeyar (1673 - 1704 A.D) and during this period Malavalli too assumed importance as a seat of learning teaming with men learned in *vedas, vedanta, shruti* and *dharmasastras.* Among the rulers of the small kingdoms that emerged from out of the wreckage

---

*Source :- Gazetteer of India, MYSORE STATE, MANDYA DISTRICT, Bangalore 1967.*

of the Vijayanagar empire, Chikka Deva Raja Wodeyar stood out as the foremost to uphold the cherished values of the Hindu empire. The political centre of gravity, in so far as the former Mysore Kingdom is concerned, soon shifted to Shrirangapattana. The Nawabs of Sira, Arcot, Kurnool, Cuddapah, etc., both in their individual capacities and also as a confederate force, made repeated efforts to capture Shrirangapattana. These attackers were successfully repelled on each such occasion. The Maratha invaders too attacked the fort and met with a similar fate. In 1761 A.D., Haidar Ali became the de facto ruler of the Kingdom, which he had to defend against the triple alliance of the Nizam of Hyderabad, the Marathas and the British who had by then established a strong foothold in the country and were in the forefront of the power struggle. In 1782 A.D., Tipu Sultan succeeded Haidar Ali and carried on with the intermittent warfare, especially with the British, for 17 long years. Finally in May 1799 A.D., the fight for supremacy ended when Shrirangapattana was captured by the British and the valiant Tipu Sultan was slain in the battle field. Thereafter the Kingdom was restored by the British to the Wodeyars who ruled this part of the country under the suzerainty of the British till August 1947. In June 1799 A.D., the royal residence as well as the official capital of the kingdom was shifted to Mysore. With this change, the importance of Shrirangapattana began to decline, even though for the next five years it continued to be the administrative capital as well as the headquarters of a subsidiary force. Between 1809 and 1811 A.D., the European regiments were moved from Shrirangapattana to Bangalore and finally in 1830 A.D., Shrirangapattana ceased to be a military station and the erstwhile gun carriage manufactory too was shifted to Madras. Thus, a place which rose to prominence and served as a seat of power for more than three centuries slumped back into the oblivion.

The area now comprised in Mandya district at first formed part of the Ashtagram Foujdari and later of the Ashtagram Division. Subsequently in 1869 when the State was organised into districts, this area was included in the Mysore District which, at the time, consisted of 14 Taluks. Thereafter, several jurisdictional and administrative changes took place and the position in 1930 was as follows: the Mysore district with 14 Taluks (including the Yelandur Jagir) was divided into 3 sub-divisions of which the French Rocks Sub-division consisted of the taluks of Krishnarajapete, Mandya, Malavalli, Nagamangala and Shrirangapattana. With the construction of the Krishnarajasagar dam and the introduction of the canal irrigation system in the region, the lands around Mandya, Pandavapura and Shrirangapattana acquired considerable importance. In 1937, Maddur Taluk was revived and Pandavapura Taluk (then called French Rocks) was constituted. The proposal for bifurcation of the Mysore district was mooted in 1937 and was finally accepted in 1939. Thus, in July 1939, the Mandya district with its headquarters at Mandya, came into existence and its jurisdiction extended over the taluks of Krishnarajpet, Maddur, Malavalli, Mandya, Nagamangala, Pandavapura and Shrirangapattana.

**5. Location and Physical Aspects :-**

Mandya district is located in the central belt of the southern sector of the State in an area which has been physio-graphically classified as the southern *maidan* (plains) region of Karnataka. The boundaries of the district encompass a compact area of 4961 square kilometres of an irregular shape lying between the east longitudinal parallels of 76 degrees 19 minutes and 77 degrees 20 minutes and, the north latitudinal parallels of 12 degrees 13 minutes and 13 degrees 04 minutes. The district is bounded by Hassan district on the north-west, Tumkur district on the north and the north-east, Bangalore district on the east and Mysore district on the south and the south-west. * The lands of the district form an undulating plain situated at an average elevation of 750 to 900 metres above mean sea level. There are a few sporadic outcrops of rocky hills and a few fertile, but shallow, valleys. The Biligiri Rangana Betta range hills of the adjoining Mysore district extend over the south-eastern parts of Mandya district as well and taper off into the plains. In fact, this is the most prominent mountain range in the entire district. Further, it is in this portion that the river Cauvery breaks through the range of hills and rushes forth forming the famous Gaganachukki and Bharachukki Water Falls. The Melukote range of hills form a broken series of conspicuous peaks which reach the altitudes of 1159 metres, 1064

*Source: Gazetteer of India, MYSORE STATE, MANDYA DISTRICT, Bangalore, 1967.*

metres, 1050 metres and 1046 metres above the mean sea level. The Hulikere Karighatta range of hills near Shrirangapattana is also somewhat conspicuous because of its natural setting. The bold, rugged and precipitous but low peaks near Sindhaghatta also deserve notice.

The drainage is towards the Bay of Bengal and comprises of three river basins , the Shimsha, the Lokapavani and the Cauvery. The important rivers of the district are the Cauvery, Shimsha, Hemavathi, Lokapavani and the Vira vaishnavi - all of which flow south and finally eastwards and cut through the south-eastern hill range. Cauvery, hailed as the Ganges of the South, has its source in the Western Ghats at Tala Cauvery in Kodagu district and enters the district in the western border of Shrirangapattana taluk. Near Shrirangapattana it divides itself into two streams forming the island town and after traversing a few kilometres in a south-easterly course enters Mysore district. Once again the Cauvery re-enters the Mandya district near Belakavadi town of Malavalli taluk and again divides itself into two streams each of which makes a descent of about 105 metres and forms the famous Shivana Samudram island which is about 5 kilometres long and one kilometre broad. The two branches unite on the north-east of the island. Thereafter, the river continues its easterly course. A few kilometres down stream from this island the river Shimsha flows into it from the north.

In the south-eastern sector, the Cauvery forms the natural boundary of the district for a continuous stretch of about 30 kilometres till it enters the Bangalore district. The people of Mandya district are beholden to this holy and mighty river which, in association with the Hemavathi, has for the past 6 decades been providing the life-blood as it were of the district's agricultural economy.

Hemavathi, a tributory of the Cauvery, rises at Javali of Chikmagalur district, traverses in a south-eastern course in Hassan district and enters Mandya district in the north-west whereafter it flows directly south. The river joins the Cauvery on the north-western side of the Krishnaraja Sagara Reservoir and looses its identity. Lokapavani which is also a tributory of the Cauvery has its source in the south-western portion of Nagamangala taluk, and, flowing east at first, turns south and subsequently joins the north-eastern branch of the Cauvery river near Shrirangapattana. Shimsha another important river of the district, which is also a tributary of the Cauvery rises near Devaravanadurga of Tumkur district and enters Mandya district in the north-eastern sector. Pursuing a South-by-South-easterly course, the Shimsha joins the Cauvery a few kilometres down stream of Shivana Samudram Falls. Viravaishnavi is a rivulet that enters the district in the northern sector near Bellur and, after traversing a few kilometres in the south-easterly direction, joins the Shimsha. Apart from these rivers, the district is endowed with a number of streams which along with the major rivers, have proved to be of immense benefit to the agriculturists. The waters of the rivers and the streams have been harnessed for irrigation purposes on a large scale and also for generation of electricity to some extent. The rivers of the district are not navigable. The riverbeds are generally rocky and shallow.

The rock formations of the district belong to the most ancient period of earth's history and are of two groups: the Dharwar schists and, the peninsular gneisses and granites. Of the former type there are two well-defined belts viz., the Bellibetta Schist (908 metres above MSL) and Hadanur Schist. The main rock type is a dark horn-blende in which coarse and fine grained varieties can be distinguished. The gneisses commonly met with in the district are grey in colour and are banded. The Melukote range is composed of pink to light grey granite gneisses whereas the rugged peaks near Sindhaghatta are of uniform biotite. Dykes of dolomite are also found at a few places.

The soils which are derived from granites and gneisses interspersed with occasional patches of schists, range from red sandy loams to red clayey loams. In the taluks of Mandya, Malavalli, Maddur and Nagamangala, the soils are generally shallow and gravelly and are underlain with a murram zone containing powdered rock. These soils which are highly leached and are poor in bases have a very low water-holding capacity. On the other hand, the soils under the old channel areas of Malavalli, Pandavapura and Shrirangapattana are rich in clay. The soils are by and large deficient in Nitrogen and Phosphorous content. In a way this poor quality of the soil has in recent decades been compensated to a considerable extent by providing irrigation

facilities through an extensive network of irrigation canals.

Mandya district is endowed with an agreeable climate all through the year. April is generally the hottest month. But, even during this period the maximum day temperature hovers around 35 degrees Celsius. With the onset of the south-west monsoon in June, the temperature drops considerably and the weather turns pleasant both during the day time and at night as well. December is generally the coldest month during which the mean daily maximum temperature and the mean daily minimum temperature would be about 28 degrees Celsius and 16 degree Celsius respectively. Occasionally the minimum temperature dips down to 10 degree Celsius.

A meteorological observatory was established in 1972 at Mandya city for recording the weather phenomena. This apart, there are rain-gauge stations at several places all over the district. The rainfall is generally uniform throughout the district except in the western sector where it is slightly higher. The average annual rainfall in the district is 691.2 mm and the average number of rainy days in a year is 45. The district receives rainfall both in the south-west monsoon season and the retreating monsoon season which together cover the period from mid-June to mid-November. A significant amount of rainfall occurs mainly in the form of thunder-showers during the months of April and May. In all parts of the district the heaviest rainfall occurs between mid-September and mid-October. The rainfall and climate of the district are quite congenial to those who work on farms and fields as well as to those who attend to the rearing of silkworms - an activity which is one of the major cottage industries of the district and the State.

The district has all along been known to be free from earthquakes. However, a few mild tremors were reported from certain isolated spots in March 1967, November and December 1968, August 1969, January 1970, September 1970, January 1971, March 1971, May 1971 and May 1972. Out of all these events, the earthquake which occurred on 16th May 1972 at Doddegowdanakoppalu and measured an intensity of 4.2 to 4.5 on the Ritcher's Scale received much publicity. Doddegowdanakoppalu is a hamlet of Kalkuni village of Malavalli taluk and is located off the main road connecting Malavalli with Mysore, at a distance of about 12 kilometres from Malavalli town. Subsequent investigations revealed that this village which is situated on a sloping ground and is covered mostly by sandy soil had received heavy rainfall during the preceding 12 days (an amount of 293.9 mm which constituted about 50 per cent of the annual rainfall) and that the epicentre of the earthquake was near the boundary of Charnockites (Source: Geological Studies, No.126, Seismicity of Karnataka, Department of Mines and Geology, Bangalore 1979). Though the damage caused to life and property was not much, the chain of tremors and the mild earthquake of 16th May which was followed immediately by a similar event on the very next day caused serious apprehensions among the rural folk of the region about their safety. Apart from this latest event of a mild earthquake, the district has not witnessed any other event of geographical or geophysical importance.

**6. Jurisdictional Changes :-**

According to the Survey Settlement and Land Records, there are 1484 revenue villages in the district. These are organised into 7 taluks and the taluks are in turn grouped into two Revenue Sub-Divisions. The Mandya Sub Division comprises of the taluks of Mandya, Maddur and Malavalli, while the Pandavapura Sub-Division comprises of the taluks of Pandavapura, Krishnarajpet, Nagamangala and Shrirangapattana. During the decade 1981-91, the district has not witnessed any jurisdictional changes either with regard to its outer boundaries or with regard to the boundaries of the Taluks comprised in it.

For purposes of Development Planning and implementation thereof, under the Zilla Parishad Act 1985, Mandya district is constituted into seven Taluk Panchayats. The jurisdiction of each Taluk Panchayat is coterminous with the General Administrative jurisdiction of the taluk of the same name but excludes the areas incorporated in the statutory towns or cities located if any in the taluk concerned. Thus all villages and also places classified as non-municipal towns or as outgrowths of statutory towns at the 1991 Census come under the jurisdiction of the Taluk Panchayats. Taluk Panchayat is analogous to the unit more popularly known through out the country as the 'Community Development Block'. In order to conform to the All India pattern

In presentation of the 1991 Census data, instead of the term Taluk Panchayat the term 'C.D.Block' has been made use of at appropriate contexts in this volume.

According to the 1991 Census there are 11 towns and 1478 villages in the district. As compared to the position in 1981, there is no change in the total number of towns. However, Hongahalli which was a 'non-municipal town' in 1981 is now declassified and a new town named "Krishnaraja Sagara Notified Area" has been constituted. It is further noticed that the developed portion of the former town of Hongahalli now stands incorporated in the limits of the newly constituted town which, in addition, covers certain portions belonging to another village as well. As between 1981 and 1991, the total number of villages in the district has decreased by one, that is from 1479 to 1478. The following statement indicates talukwise distribution of the towns and villages of the district and also indicates the reasons for the decrease in the number of villages. Further, among the 11 towns of the district, Belakavadi, Belluru, Krishnarajpet, Nagamanglala and Melukote are non - municipal towns and the remaining 6 towns are statutory towns. As already mentioned, the jurisdictions of the C.D.Blocks cover the non-municipal towns and villages located in the taluks of the same name.

**Statement showing the no. of villages/towns in each taluk of the District, decadal variations if any and reasons thereof.**

| Sl No | Taluk | Total No of Villages according to the list finalised for | | No. of Towns as per census list | Reasons for variation in the No. of Villages between 1981 and 1991 census |
|---|---|---|---|---|---|
| | | 1991 Census | 1981 Census | | |
| 1 | 2 | 3 | 4 | 5 | 6 |
| 1 | Krishnarajpet | 316 | 316 | 1 | - |
| 2 | Maddur | 160 | 162 | 1 | Doddarasinakere which is divided into 3 units for administrative purposes informally was reported as 3 independent villages in 1981 and earlier This error has now been rectified and all the 3 units are reckoned as a single unit so as to conform to the reckoning by the Directorate of Survey Settlement and Land Records. |
| 3 | Malavalli | 186 | 186 | 2 | - |
| 4 | Mandya | 183 | 183 | 1 | - |
| 5 | Nagamangala | 366 | 366 | 2 | - |
| 6. | Pandavapura | 171 | 171 | 2 | - |
| 7. | Shrirangapattana | 96 | 95 | 2* | The jurisdiction of Hongahalli non-municipal town of 1981 was coterminous with that of the revenue village. Now only a portion of Hongahalli is incorporated in the limits of Krishnaraja Sagara Notified Area (NAC) and the remaining portion is reckoned as a separate village for 1991 census purposes |
| | TOTAL | 1478 | 1479 | | |

* In one of these towns, namely Krishnaraja Sagara Notified Area (NAC), lands belonging to two villages of different taluks are incorporated - one of these villages is located in Shrirangapattana taluk and the other is located in Pandavapura taluk.

## 7. Brief Analysis of Data

### A. Village Directory

Villagewise information regarding the availability of certain basic amenities within the village as also that on the manner of utilisation of the land in the concerned village are furnished in the Village Directory. The items covered include the minimum needs such as the source of drinking water supply and the educational, medical, public transport and communication as well as the weekly market facility. If any one or more of these basic amenities were to be 'not available' within the village, then instead of merely stating that fact, the distance (in ranges) to the nearest place having that particular facility in which the village is lacking, is indicated. The other items covered in the Village Directory are the nature of approach road to the village, electrification and the proximity of the village to an urban area. Since the availability or otherwise of a facility depends to a considerable extent on the population size of a village, information on population and the number of households as per 1991 Census is also furnished in the Village Directory. Under the land use pattern, besides indicating the total area of the village, the Village Directory gives a breakup of this area by the broad categories of Landuse such as forests, cultivated lands with irrigation facility (by sources of irrigation), cultivated lands without irrigation facility, culturable waste and the barren and uncultivable lands including the lands put to non-agricultural use.

In essence, the Village Directory provides micro-level data which will help the planners in formulation of micro-level developmental plans, as the C.D.Block is the lowest administrative unit for developmental planning. Regarding the basic facilities, the villagewise data are consolidated for each C.D.Block (i.e., Taluk Panchayat) and the district thereof and are presented in Appendix-I to the Village Directory. This would in a general way enable the reader to have a broad idea regarding the level of development achieved by the district as a whole and also by the different administrative units constituting the district (viz., the C.D.Blocks). With the same end in view, six tables, which have been generated on the computer, on the basis of the villagewise information contained in the Village Directory format, are presented in Tables 1 to 6. Of these tables, while Tables 1, 2 and 6 provide data for each C.D.Block and are indicative of the levels of development, Table 3 deals with villages not having the facilities and classifies these villages by distance ranges with reference to the nearest place having such a facility, Tables 4 and 5 deal in a general way about the correlation between the proximity of a town and the availability of a facility on the one hand and the population size of the village and availability of a facility on the other hand.

### B. Town Directory

Certain salient details pertaining to each town within the district are presented in the Town Directory Statements. The various aspects covered in these simple statements include the growth history of the town; its location with reference to centres of administration and transport; income and expenditure of the local body looking after the civic administration of the town; nature and extent of basic amenities existing in the town such as roads, drainage and sewerage, toilet facilities, drinking water supply, fire fighting services and electrification; nature and extent of the availability of medical, educational and recreational facilities in the town and a broad indication about the trading, commercial and manufacturing activities within the town. In the case of towns with a population of 50,000 and upwards, particulars about the civic amenities existing in the notified slums, if any, in the town have also been provided.

Unlike villages, the number of towns within a district are quite small. A mere inspection of the data presented in the Town Directory Statements would provide the reader with a broad idea about the conditions prevailing in the towns of the district as also an insight into the inter-town differences. Population of a town is one of the most important factors which is closely related to the extent of availability of various amenities in the town. Tables 7 to 10 based on the data presented in the Town Directory Statements indicate the percapita income and expenditure of the civic body governing the town, the average number of beds available in hospitals (per thousand population), the average number of educational institutions (per 10,000 population) and the names of the most important commodities manufactured in the towns, exported from the towns and imported to the towns. These tables are self-explanatory and do not need further elucidation.

TABLE-I - DISTRIBUTION OF VILLAGES ACCORDING TO THE AVAILABILITY OF DIFFERENT AMENITIES

| Name of C.D.Block | No. of inhabited villages | No. (with percentage) of villages having one or more of the following amenities | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Education | Medical | Drinking water | Post and Telegraph | Market/ Hat | Communications | Approach by Pucca Road | Power Supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| KRISHNARAJPET | 296 | 256 (86.49) | 19 (6.42) | 296 (100.00) | 51 (17.23) | 12 (4.05) | 138 (46.62) | 169 (57.09) | 278 (93.92) |
| MADDUR | 153 | 149 (97.39) | 20 (13.07) | 153 (100.00) | 69 (45.10) | 5 (3.27) | 107 (69.93) | 124 (81.05) | 153 (100.00) |
| MALAVALLI | 172 | 158 (91.86) | 13 (7.56) | 172 (100.00) | 55 (31.98) | 2 (1.16) | 122 (70.93) | 142 (82.56) | 165 (95.93) |
| MANDYA | 174 | 166 (95.40) | 21 (12.07) | 174 (100.00) | 76 (43.68) | 3 (1.72) | 133 (76.44) | 155 (89.08) | 173 (99.43) |
| NAGAMANGALA | 343 | 264 (76.97) | 10 (2.92) | 343 (100.00) | 62 (18.08) | 5 (1.46) | 151 (44.02) | 179 (52.19) | 326 (95.04) |
| PANDAVAPURA | 140 | 128 (91.43) | 9 (6.43) | 140 (100.00) | 41 (29.29) | 5 (3.57) | 83 (59.29) | 111 (79.29) | 135 (96.43) |
| SHRIRANGAPATTANA | 87 | 73 (83.91) | 18 (20.69) | 87 (100.00) | 37 (42.53) | 3 (3.45) | 63 (72.41) | 74 (85.06) | 83 (95.40) |
| DISTRICT | 1365 | 1194 (87.47) | 110 (8.06) | 1365 (100.00) | 391 (28.64) | 35 (2.56) | 797 (58.39) | 954 (69.89) | 1313 (96.19) |

## TABLE-2 - PROPORTION OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES

| Name of C.D.Block | Total population of inhabited villages | Proportion of Rural Population served by the amenity of - | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Education | Medical | Drinking water | Post & Telegraph | Market/ Hat | Communications | Approach by Pucca Road | Power Supply |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| KRISHNARAJPET | 203104 | 197562 (97.27) | 37406 (18.42) | 203104 (100.00) | 76081 (37.46) | 24148 (11.89) | 124504 (61.30) | 140754 (69.30) | 200954 (98.94) |
| MADDUR | 260611 | 259611 (99.62) | 81025 (31.09) | 260611 (100.00) | 176095 (67.57) | 16894 (6.48) | 208823 (80.13) | 230471 (88.43) | 260611 (100.00) |
| MALAVALLI | 226971 | 223855 (98.63) | 41780 (18.41) | 226971 (100.00) | 128699 (56.70) | 15326 (6.75) | 187861 (82.77) | 208176 (91.72) | 226076 (99.61) |
| MANDYA | 262765 | 261848 (99.65) | 75827 (28.86) | 262765 (100.00) | 185472 (70.58) | 15801 (6.01) | 237275 (90.30) | 255006 (97.05) | 262611 (99.94) |
| NAGAMANGALA | 158380 | 146702 (92.63) | 13593 (8.58) | 158380 (100.00) | 57676 (36.42) | 7948 (5.02) | 81999 (51.77) | 92850 (58.62) | 156885 (99.06) |
| PANDAVAPURA | 140903 | 139258 (98.83) | 24129 (17.12) | 140903 (100.00) | 74755 (53.05) | 14811 (10.51) | 109742 (77.88) | 124252 (88.18) | 140422 (99.66) |
| SHRIRANGAPATTANA | 124836 | 122570 (98.18) | 64203 (51.43) | 124836 (100.00) | 96695 (77.46) | 13268 (10.63) | 114127 (91.42) | 118572 (94.98) | 124272 (99.55) |
| DISTRICT | 1377570 | 1351406 (98.10) | 337963 (24.53) | 1377570 (100.00) | 795473 (57.74) | 108196 (7.85) | 1064331 (77.26) | 1170081 (84.94) | 1371831 (99.58) |

## TABLE-3 - DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE

| Village not having the amenity of | Number of villages where the amenity is not available and available at a distance of | | | |
|---|---|---|---|---|
| | -5 Km. | 5-10 Km. | 10+ Km. | Total Cols.2-4 |
| 1 | 2 | 3 | 4 | 5 |

TABLE-9 - SCHOOLS PER 10,000 POPULATION IN TOWNS

| Class, Name and Civic status of Town | | No. per 10,000 population | | | |
|---|---|---|---|---|---|
| | | Higher Secondary/ Inter/PUC/Junior College | Secondary/ Matriculation | Junior Secondary/ Middle | Primary |
| 1 | | 2 | 3 | 4 | 5 |
| V | Belakavadi (MP) | 1.37 | 1.37 | 2.74 | 4.12 |
| V | Bellur (MP) | 1.62 | 1.62 | 6.47 | 6.47 |
| IV | Krishnarajpet (MP) | 1.11 | 1.67 | 3.89 | 4.44 |
| V | Krishnarajasagara Notified Area (NAC)* | 1.27 | 1.27 | 3.81 | 1.27 |
| III | Maddur (TMC) | 0.45 | 1.36 | 2.71 | 3.62 |
| III | Malavalli (TMC) | 0.67 | 1.68 | 2.35 | 6.04 |
| I | Mandya (CMC) | 0.50 | 1.33 | 2.33 | 3.08 |
| VI | Melukote (MP) | 3.07 | 6.15 | 6.15 | 9.22 |
| IV | Nagamangala (TMC) | 0.71 | 1.42 | 4.26 | 5.68 |
| IV | Pandavapura (TMC) | 1.25 | 1.25 | 4.38 | 5.63 |
| III | Shrirangapattana (TMC) | 0.91 | 1.37 | 4.57 | 3.20 |
| | All Towns | 0.07 | 1.46 | 3.07 | 3.97 |

* Spreads over two taluks i.e., Pandavapura and Shrirangapattana.

## TABLE-10 - MOST IMPORTANT COMMODITY MANUFACTURED, EXPORTED AND IMPORTED IN TOWNS

| Class, Name and Civic status of the Town | | Most important commodity | | |
|---|---|---|---|---|
| | | Manufactured | Exported | Imported |
| 1 | | 2 | 3 | 4 |
| V | Belakavadi (MP) | Agarbathies | Silk Cocoon | Foodgrains |
| V | Bellur (MP) | Groundnut Oil | Coconuts | Medicines |
| IV | Krishnarajpet (MP) | Silk Sarees | Silk Sarees | Foodgrains |
| V | Krishnarajasagara Notified Area (NAC)* | - | - | Foodgrains |
| III | Maddur (TMC) | Groundnut Oil | Groundnut Oil | Groundnut |
| III | Malavalli (TMC) | Paper | Beedies | Fertilizers |
| I | Mandya (CMC) | Sugar | Sugar | Sugarcane |
| VI | Melukote (MP) | Silk Sarees | Cotton | Medicines |
| IV | Nagamangala (TMC) | Coir Products | Coir Products | Paddy |
| IV | Pandavapura (TMC) | Sugar | Goats & Sheep Raw Skin | Edible Oil |
| III | Shrirangapattana (TMC) | Cutsize of Timber | Rice | Tobacco |

* Spreads over two taluks i.e., Pandavapura and Shrirangapattana.

# SECTION-I VILLAGE DIRECTORY

# VILLAGE DIRECTORY

## Explanatory Note

Village Directory, as the title signifies provides certain basic particulars about each and every village in the district. The Village Directory is supplemented by four appendices. There are, in all, 18 columns in the Village Directory format and of these, the first two relate to the location code and name of the village while the next two provide information about the geographical area and population as per 1991 census. Of the remaining, 6 columns deal with the availability or otherwise of the basic amenities such as educational, medical, drinking water, postal, communication and marketing facilities, in the referent village. Separate columns have been provided to indicate the nature of the approach road to the village, whether the village has been electrified and the proximity of the village to an urban area. The manner in which the land constituting the village is being utilised is indicated under five columns with suitable headings. The column headings and the scope of the data presented under each column are explained below.

**Column 1 : Location Code Number**

The concept of location code number has already been explained in the Analytical Note. The location code number thus assigned to the village is entered in this column. This number, in so far as it relates to the village within the C.D.Block, runs serially starting from 1 for every C.D.Block and the data are presented for villages arranged in an ascending order of their location code numbers.

**Column 2 : Name of Village**

The name of the village corresponding to the location code number given in column 1 is given in this column. By and large the spellings adopted at the previous i.e., 1981 Census, have been retained. However, changes in village names duly effected by the concerned authorities with the sanction of the Government have been taken into consideration while finalising the spellings of village names for 1991 census purposes.

A little more explanation appears to be necessary about the places which appear in the list of towns as well as in the list of villages. This phenomenon occurs particularly in the case of Taluk and District Headquarter towns which, as revenue entities are geographically large villages. The main village site area including the peripheral developed areas would have for long been incorporated into the urban limits without any change whatsoever in Survey and Settlement Records. In the original survey records and also the Resurvey, the entire village inclusive of all the lands that are incorporated into the urban limits continues to be shown as a regular revenue village. In other words, the portion constituted into a town is not taken out from the parent village and formed into a separate and independent unit in the jurisdictional lists (exception Dakshin Kannad district). Every civic body, be it a municipal corporation or a town municipality or a notified area or a sanitary board, defines its own jurisdiction confining itself mostly to the built up area and the fringe areas for enforcing municipal rules and regulations. With the administrative and legal sanction of the Government, which issues a notification in this behalf, the civic body secures statutory rights for administering the local area so defined with effect from a specified date. The incorporated areas may at times cut across village boundaries and may comprise portions belonging to the revenue jurisdiction of two or more villages. In some instances entire revenue lands of a village or of several villages lose their independent identity and are omitted in the list of villages of the taluk (C.D.Block). But it is only in the case of villages of which only certain portions are included in the town, especially those that contribute their names to the towns concerned, that this apparent duplication of names occurs. In such cases, the jurisdiction of the town is very clear and it covers only a portion of the village which is constituted into an independent entity as 'urban' for census enumeration purposes. The remaining area too is constituted as an independent unit under the 'rural' category i.e., as a village. In order to distinguish this unique situation, the name of the village bears the suffix Rural within brackets in the lists of villages finalised for census purposes (perhaps the term non-municipal would be more appropriate). Division of the village into

urban and rural components and the suffixing of the names is a special procedure adopted for census purposes only. That is to say, if one were to ask the Officers of the Survey, Settlement and Land Records whether in their lists there are villages such as say Bellary (Rural), Belgaum (Rural), Bijapur (Rural), Chamarajnagar (Rural), Magadi (Rural), Mandya (Rural), Mysore (Rural), Raichur (Rural) etc., the answer would be a definite 'no' and then they would say that there are villages of the same name but without the suffix Rural. Similarly, in the village maps and other records pertaining to the above named places, the lands that are incorporated into urban areas are also shown as part and parcel of the concerned village.

**Column 3 : Total area of the village (in hectares)**

The total geographical area of the village as per revenue records is furnished in hectares upto two decimal places. In Karnataka, the basic records are still maintained in acres and guntas or acres and cents, that is, in the units of measurement which were adopted at the time of the first cadastral survey. After the introduction of the decimal system however the equivalents of these figures are also indicated in addition to the already existing entries in registers such as Akarband and Records of Rights. The area of each survey number or part thereof is converted into hectares, ares and square metre. Thus, if these converted figures for each such small unit are added together for the village, the resultant total area would normally be either less or more than the corresponding figures that one would derive by the addition of figures in acres-guntas/acres and cents and conversion of that total into hectares and ares. For purposes of presentation in this statement the village level area and land use figures which were furnished in acres-guntas or acres-cents by the Revenue Officers have been converted into hectares and ares and these figures may not therefore be identical with the total area as may be found entered in hectares and ares in the records of some of the villages. The marginal differences would be due to the factors explained above. Further, in the case of villages of which certain portions are incorporated into an urban area the extent thus categorised as urban has been deducted from the total geographical area of the revenue village and for this reason the particulars presented here would not be in full correspondence with the total area of that revenue administrative unit as mentioned in the village records. If area figures are not available for any village, the abbreviation 'N.A.' is entered in this column and a note at the bottom of the page explains the reason thereof.

**Column 4 : Total Population and Number of Households**

The total population of the village (inclusive of the hamlets if any) according to 1991 census and the number of households therein are indicated one below the other, in this column. In the case of villages with no inhabitants i.e., 'nil' population, the word un-inhabited is written across the line.

**Columns 5 to 10 : Amenities available (if not available within the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges, viz., -5 km, 5-10 km and 10+ km of the nearest place where the facility is available is given)**

As the main heading for these columns suggests, if the basic amenity covered under any of these columns were to be not available within the village limits (i.e., its entire geographical area) then, instead of simply stating that fact, an attempt is made here to indicate the range of the minimum distance (in km) that one has to cover to reach a place having that specific facility. The abbreviations made use of in these columns are explained below column by column.

**Column 5 : Education**

All types of educational institutions functioning in the village - irrespective of the levels of education offered, the medium of education and the status of the managing body - are considered under this column. The abbreviations used to denote institutions with different levels of education are :

i) **P** : Primary or Elementary School : Schools providing education from I standard and upwards upto and inclusive of IV standard are classified as Primary Schools. This would also include junior basic schools if any.

For purposes of reporting, schools which provide education not merely from I to IV but also for higher standards, called composite schools for easy reference, are split up into different levels of education and counted as independent units under each such level.

ii) **M** : Middle or Junior Secondary School : Schools providing education from V standard and upwards upto and inclusive of VII standard are classified as middle schools. In Karnataka, as a matter of fact, the term middle school is no longer in vogue. Primary education itself consists of seven years of schooling and the first four years duration of this course is called Lower Primary and the next 3 year period is termed as Higher Primary. As mentioned above for accounting purposes, a Higher Primary School with I-VII standard is treated as two units i.e., one Primary School and one Middle School.

iii) **H** : Matriculation or Secondary School : Schools providing education from VIII standard and upwards upto and inclusive of X standard are classified as High Schools. A composite school with I-X standard is treated as three separate units and counted separately under the categories of Primary Schools, Middle Schools and High Schools.

iv) **PUC** : Higher Secondary/Intermediate/ Pre-University/Junior College : Schools and colleges that provide education for the XI and XII standards or, as is more common in Karnataka, for the I and II year of the Pre-University Course, fall under this category. There are Higher Secondary Schools with VIII standard and upwards covering the XII standard and, on the other hand, there are also degree colleges which provide education for PUC I year and PUC II year. These composite units are, as explained earlier, split up into different levels for reporting purposes.

v) **C** : College : This would cover all educational institutions that provide post-PUC level education leading to University degree in any subject or combination of subjects and also post-graduate levels of education.

vi) **I** : Industrial School : Industrial Schools if any in the village are indicated by the abbreviation 'I'.

vii) **Tr** : Training School : All types of Institutions that provide vocational and professional training are covered by this abbreviation.

viii) **AC** : Adult Literacy Class/Centre : This abbreviation is recorded in this column only if adult literacy classes were being conducted regularly in the village during the reference year.

ix) **O** : Others : All other types of educational institutions such as Sanskrit Pathasala, Urdu Madarasa, Makhtab etc., are included in this residuary category.

It is important to note that in this column whenever the number of institutions of a particular level or class exceeds one, only then the actual number is also reported immediately after the relevant abbreviation within brackets. That is to say, the mere presence of an abbreviation without any numerical attribute signifies the existence of the facility, in at least one institution for which that abbreviation stands. The numerals indicate the number of institutions or units of that level or type. Such a procedure has not been adopted in respect of Adult Literacy Class/Centre in view of inconsistencies noticed in the data furnished.

If a village does not have any educational institution whatsoever then a dash (-) is entered in this column and thereafter, within brackets, the range of the distance (in km) from the referent village to the nearest place having at least a primary school is indicated. The emphasis here is on the most basic need i.e., the minimum level. In other words, if the village has primary school, but not middle school or high school then no further information is furnished in respect of the proximity of a middle school or a high school or a college. Similarly, for a village with primary and middle schools but no high school or a college, no further information is furnished in respect of the proximity of places having high school and college level facilities.

It may again be recalled that the concept of a village covers the entire revenue jurisdiction of that unit and includes all the hamlets and clusters of houses as well as isolated homesteads if any i.e., all human settlements as also all the non-residential buildings located within the limits of the village concerned.

**Column 6 : Medical :**

The abbreviations used to denote the existence of medical institutions of different types in the village are :

| | |
|---|---|
| H | : Hospital |
| MCW | : Maternity and Child Welfare Centre |
| MH | : Maternity Home |
| CWC | : Child Welfare Centre |
| HC | : Health Centre |
| PHC | : Primary Health Centre/Primary Health Unit |
| D | : Dispensary |
| FPC | : Family Planning Centre |
| TB | : T.B.Clinic |
| NH | : Nursing Home |
| RP | : Registered Private Medical Practitioner |
| SMP | : Subsidised Medical Practitioner |
| CHW | : Community Health Worker |
| O | : Others |

If the number of institutions of a particular type happens to be more than one, then that number is also indicated immediately after the relevant abbreviation.

If medical facilities of any of the types mentioned above are not available in the village then a dash is entered in this column and thereafter, within brackets, the range of the distance (in km) from the referent village to the nearest place having a medical institution which provides at least the minimum level of medical facilities is indicated.

The status of a Primary Health Unit in Karnataka is much lower than that of a Primary Health Centre. However for purposes of reporting under this column, the abbreviation PHC has been made use of in respect of PHU as well. The abbreviation H which stands for hospitals implies the availability of facilities for the treatment of in-patients also. In several Primary Health Centres also such facilities do exist. Likewise Maternity Homes also entertain in-patients but then these are confined only to maternity cases. This apart, in all other cases except in private nursing homes, arrangements exist for the treatment of out-patients only. In local parlance in certain areas however even a dispensary is referred to as a hospital and the clinic run by a private medical practitioner as a dispensary and a private nursing home as a hospital. This indiscriminate usage at times leads to confusion.

All types of medical institutions, irrespective of the system of medicine practiced therein, are covered under this column without any attempt to provide a further break up by the systems of medicine practiced.

About the Community Health Worker it may incidentally be mentioned that it does not refer to workers in extension programmes like the Malaria Surveillance Worker, the Basic Health Worker, the Auxiliary Nurse Midwife etc., but refers only to the paramedical personnel who have been specially trained for dispensing medicines for minor ailments at the doorsteps of the patients.

**Column 7 : Drinking Water**

Following are the abbreviations used to indicate the different sources of drinking water that are available in the village. These sources of drinking water supply may be public property or may be owned by private persons and institutions. If there are two or more sources of drinking water in a village then all these sources are mentioned one after the other but separated by commas.

| | |
|---|---|
| T | : Tap |
| C | : Canal |
| W | : Well |
| L | : Lake |
| Tk | : Tank |
| S | : Spring |
| TW | : Tube Well |
| N | : Nallah/Stream |
| HP | : Hand Pump |
| R | : River |
| F | : Fountain |
| O | : Others |
| NA | : Information not available |

A village is regarded as having 'tap water' facility only if the village is provided with proper storage facility and an arrangement for supply of water to the consumers through a network of pipes. Most

of the villages where NRWS schemes have been implemented fall under this category. On the other hand, under the Mini Water Supply Scheme or Accelerated Rural Water Supply Scheme etc., if arrangements have been made in the village to pump water from a primary source such as a borewell, store that water in RCC or masonary tanks erected at one or more centrally located places and to provide such storage tanks with a few taps for public use, the source of water supply in the village has been regarded as 'Tube Well' and not as 'Tap'.

During the last decade, borewells have been drilled under one scheme or the other in most of the villages of Karnataka. As a result, open draw wells which formerly constituted the main source of drinking water in several of these villages have ceased to enjoy such a status. Such wells are reported to have either dried up or the water therein has been rendered unfit for human consumption due to contamination on account of negligence, as well as disuse and stagnation of water. Thus, for numerous villages 'hand pump' has now been reported as the main source of drinking water.

If the village does not have any source of drinking water supply at all then, after a dash in this column, the distance range that one has to traverse to reach the nearest place with drinking water facility is indicated.

**Column 8 : Post and Telegraph**

In this column, information on the availability of postal, telegraph and telephone facilities in the village is furnished using the following abbreviations.

PO : Post Office
TO : Telegraph Office
PTO : Post and Telegraph Office
Phone : Telephone connection

Villages with Extra Departmental Post Offices are regarded as having the post office facility. Similarly, villages having phonocom facility (but not having a regular Telegraph Office equipped with Morse Code transmitters) are regarded as having Telegraph facilities.

Telephone connection need not necessarily indicate the availability of a public call office in the village, for even private telephone connections to subscribers have been taken into consideration while filling up this column. If a village has postal as well as telephone facilities then both these amenities are mentioned. Likewise if there is a PTO and telephone connections, then both the abbreviations are entered in this column. On the other hand if the village is not having any of these facilities then a dash is noted and next to it the distance to the nearest place having the minimum facility of a post office is indicated in ranges.

**Column 9 : Day or Days of the Market/Hat**

The column refers to the weekly, or bi-weekly markets i.e., the weekly shandy, held in villages with a view to cater to the needs of that village and more so to the needs of the inhabitants of several surrounding villages. In local terminology such a weekly market is called *Santhe* and is quite popular in Karnataka. In the case of villages which host such shandies the actual day on which the shandy takes place is mentioned and in all other cases a dash is entered and thereafter the distance to the nearest place with a weekly market is indicated in ranges as specified in the column heading. The place where such weekly market gathers may be located in the limits of an adjoining taluk or district. The important matter for consideration here is the geographical proximity. In some cases where the nearest town or a large sized village with a permanent market would serve the needs of the villagers, the distance ranges refer to such places with permanent markets only. In such cases obviously the nearest place where a weekly market is held would be very far away and will not be a matter of much significance. For instance shandy is not being held in any of the villages of Ramanagaram taluk of Bangalore Rural District.

**Column 10 : Communication**

For purposes of this column, only the means of public transport namely bus, railway and water transport system if any are considered. If the village is served by any mode of such public transport the fact is indicated using the undermentioned abbreviations :

BS : Bus Stop
RS : Railway Station
NW : Navigable Waterway (including river, canal, back-waters, etc.)

If a bus stop or a railway station is located within the territorial jurisdiction of a village then that village is considered as being served by that facility even if that bus stop or railway station is in a somewhat solitary place and is located at some distance from the village-site. If more than one type of communication facility is available, then all the relevant abbreviations are mentioned in this column. If no such facility is available at all then a dash is entered and thereafter the distance to the nearest place with a communication facility is indicated in ranges.

**Column 11 : Approach to village**

By approach to village is meant the type of road that leads to the village and this would indicate whether the village is accessible throughout the year or only during the fair season. The abbreviations used in this column are :

| | |
|---|---|
| PR | : Pucca Road |
| KR | : Kachcha Road |
| NR | : Navigable River |
| NC | : Navigable Canal |
| NW | : Navigable Waterway (other than river and canal) |
| FP | : Foot path/Bridle path |

If a village has a foot path or bridle path and also both pucca road and kachcha road then, only PR is recorded in this column as it would denote a higher level of facility of the same type. Similarly if the village has a bridle path, a foot path and a Kachcha Road, then only KR is reported in this column. While kachcha road refers only to the unsurfaced mud road, the term pucca road covers tar roads, cement roads, water bound mecadum roads and metalled roads. But, if in addition to either PR or KR the village has a waterway then information on the availability of a water way is also indicated.

**Column 12 : Nearest town and distance**

The name of the nearest town, that is, any urban area as defined for purposes of the 1991 Census, and the distance thereto from the village are indicated in this column. The town mentioned here need not be located within that very taluk or the district or even the State for that matter. The main point for consideration here is the geographical proximity. The distance however is reckoned not as a 'crow flies' but by some land route or water way. Further, when there is a cross country footpath or a cart-track and a little more circuitous road from the village or its proximity to the town then the distance by road is reported here in preference to the distance by foot path or cart-track. Similarly, when there are natural hurdles like unbridged rivers or streams the distance is furnished by the more circuitous route that the villagers would usually prefer. The information on distance is based on local enquiry by the reporting agency and is very approximate. If the town mentioned in this column belongs to another State then the name of that State is also indicated along with the name of the town and the distance thereto.

**Column 13 : Power Supply**

If the village is electrified, that is, if power is actually available, whatever may be the form of its use, then the village is regarded as enjoying this amenity of power supply. If the supply is expressly restricted for, say agricultural or any other specific purpose then this point is clearly stated by using a specific abbreviation. On the other hand, if electricity is being supplied for all purposes without any reservations, then information on various purposes is not separately mentioned. The abbreviations used in this column are :

| | |
|---|---|
| ED | : Electricity for domestic purpose only |
| EAG | : Electricity for agricultural purposes only |
| EO | : Electricity for other purposes like industrial |
| EA | : Electricity for all purposes stated above |

**Column 14 to 18 : Land Use (i.e. area under different types of land use in hectares upto two places of decimal)**

The land use pattern adopted for the Village Directory conforms to the classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry of Agriculture has recommended the maintenance of records on land use under the following five categories :

1. Forests

2. Lands not available for cultivation :

   a) Lands put to non-agricultural uses

   b) Barren and unculturable lands

3. Other uncultivated lands excluding fallow lands :

   a) Permanent pastures and other grazing lands,

   b) Lands under miscellaneous tree-crops and groves not included in the net area sown,

   c) Culturable wastes

4. Fallow lands :

   a) Fallow lands-other than current fallows,

   b) Current fallows

5. Net area sown

Column 14 of the Village Directory corresponds to category 1 i.e. forest, while columns 15 and 16 put together represent the cultivated lands and correspond to the combination of categories 4 and 5 above. Similarly, columns 17 and 18 respectively correspond to categories 3 and 2 of the above classification. The data furnished here are based on the village records and pertain generally to the year 1989. The total of the area figures reported under these columns generally tallies with the total geographical area of the village noted in column 3. However, in the case of villages which are partly included in towns the total area reported in column 3 will be less than the total arrived at by adding the figures reported under these columns (i.e. Columns 14 to 18).

**Column 14 : Forest**

This includes all lands classified as forests under any legal enactment dealing with forests or administered as forests whether State-owned or private and whether wooded or simply maintained as potential forest land. Lands transferred to forest department for afforestation as also the class C and D lands transferred thus by the revenue department are also classified as forests. Within the forest area itself there may occasionally be cultivated patches or else there may be grazing lands. But such areas too are shown under column 14 only as forests. If within an area classified as forest some specific extents of lands have been expressly assigned for regular cultivation and the records have not been set right pending formalisation of grants and related processes of survey and settlement then such cropped areas are shown under column 15 or 16 as the case may be and the remainder alone is shown as forest under column 14. The processes of regularisation of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore, the information merely based on records is, in some cases at least, likely to be different when compared with that based on actual field inspection.

**Column 15 and 16 : Irrigated (by source) and Un-irrigated**

These two columns cover all the agricultural lands and when added together would correspond to the net area sown plus the current and other fallows. The latter would imply all lands which were taken up for cultivation, but are temporarily out of cultivation for a period of not less than one year and not more than five years. All lands that are lying uncultivated as fallows for more than 5 years in succession are regarded as permanent fallows i.e., culturable waste, and are covered under column 17. Area sown more than once during the same year, if any in the village, is counted only once under these columns. In column 15, a sourcewise break up of the irrigated area is furnished using the following abbreviations :

| | |
|---|---|
| GC | : Government Canal |
| PC | : Private Canal |
| W | : Well (without Electricity) |
| We | : Well (with Electricity) |
| TW | : Tubewell (without Electricity) |
| TWe | : Tubewell (with Electricity) |
| Tk | : Tank |
| R | : River |
| L | : Lake |
| Wf | : Waterfall |
| O | : Others |
| T | : Total |

The concept of irrigation implies the existence of a source of water supply within a reasonable distance and an arrangement to regulate the supply of water according to the day-to-day needs of the crops raised in these fields. Naturally therefore all areas that are cultivated under purely rainfed

conditions are treated as unirrigated. Though paddy is generally regarded as a wet crop, if it is raised purely as a rainfed crop, as it very often is the case in heavy to very heavy rainfall regions, such areas are regarded as unirrigated for purposes of this column and shown under column 16. Similarly, about garden crops, the area is considered for column 15 only if there is an element of irrigation. Sometimes it happens that the lands shown as dry and rainfed in the settlement records are in actual fact having irrigation facilities due to recent changes such as sinking of wells, introduction of lift irrigation or canal irrigation or commissioning of a project etc. In such a case the actual situation is taken note of and despite its classification as rainfed in the records, the area concerned is treated as irrigated. Though rare, the opposite situation (where a plot of land originally shown as irrigated has ceased to enjoy that facility and is now yielding purely rainfed crops) is also met with and such a situation arises due to reasons such as breaching of tanks, drying up of irrigation wells and small tanks, defunct canal system and so on. The reporting agency has generally assessed the actual situation prevailing during the reference year i.e., 1989, while furnishing the data on irrigated lands. Regarding canal irrigation too it is the actual irrigated area and not the command area that has been reported here.

In column 16 the total extent of unirrigated lands, that is, dry lands cultivated as rainfed fields and the current fallow lands put together is reported. As explained above, lands yielding rainfed paddy crop are considered as unirrigated.

**Column 17 : Culturable Waste (including gauchar and groves)**

This category includes all lands available for cultivation whether not taken up for cultivation at all or taken up for cultivation once but not cultivated during the past five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles which are not put to any use. These may be assessed or unassessed and may be in isolated blocks or within cultivated holdings. Lands under thatching grass, bamboo bushes and other groves which are not included under orchards or forests are also included under this category. Further, this includes all grazing lands irrespective of whether these are permanent pastures and meadows or not. In several instances, lands that were at one time reserved for use as grazing fields and pastures and declared as assessed or unassessed wastes have, over a period of time, been brought under cultivation either fully or in parts as a result of gradual encroachments and also because of the policy decisions of the Government regarding land grants. Thus, though the particular plot of land continues to be shown as a pasture in the village records the actual field situation would reveal that most of that land is actually under cultivation. In all such cases, to the extent possible, the actual field situation has been taken into consideration by the reporting agency.

**Column 18 : Area not available for cultivation**

In this column, the total extent of land which is not available for cultivation in view of its being barren and unculturable as also that which is put to non-agricultural uses is reported. Mountains, deserts, rocky hills, quarries, ravines and the like as well as the lands that cannot be brought under cultivation except at a very high cost are included in the category of barren and uncultivable lands. The category of lands put to non-agricultural uses covers all lands occupied by buildings, roads, railways, parks and play grounds, area under water viz., rivers, streams, canals, reservoirs, tanks, ponds etc., and land put to any other use which is apparently non-agricultural.

There are four appendices to the Village Directory. Appendix-I is based on the Village Directory itself and presents abstract figures for the C.D.Blocks and the district in respect of various amenities for which information is presented in the Village Directory. At the end of the Village Directory of each C.D.Block, against "Total (Sum)", the total number of various types of educational and medical institutions represented by various abbreviations under columns 5 and 6 respectively are given. In Appendix-I, besides incorporating this information, the total number of villages in which these institutions are situated is also given for comparison. Further, in respect of amenities viz., drinking water supply,

post and telegraph, communication and power supply for which the types of amenities available are indicated by abbreviations under columns 7, 8, 10 and 13 respectively for each village but totals are not presented for the C.D Block as a whole in the Village Directory, the total number of villages in the C.D.Block and, in the district as well, having the above mentioned amenities is also presented under separate captions in Appendix-I.

Appendix-II presents the land utilisation data in respect of non-municipal census towns. The different types of land use for which information is presented here is same as that in the Village Directory. Owing to constraints in the compilation of land use data, information in respect of towns comprising portion/s of one or more villages could not be procured and compiled. Thus information in respect of non-municipal census towns (NMCTs) which comprise of a whole revenue village only is presented in this appendix wherever applicable.

Appendix-III gives the list of villages which are lacking in all amenities covered in the Village Directory except the drinking water.

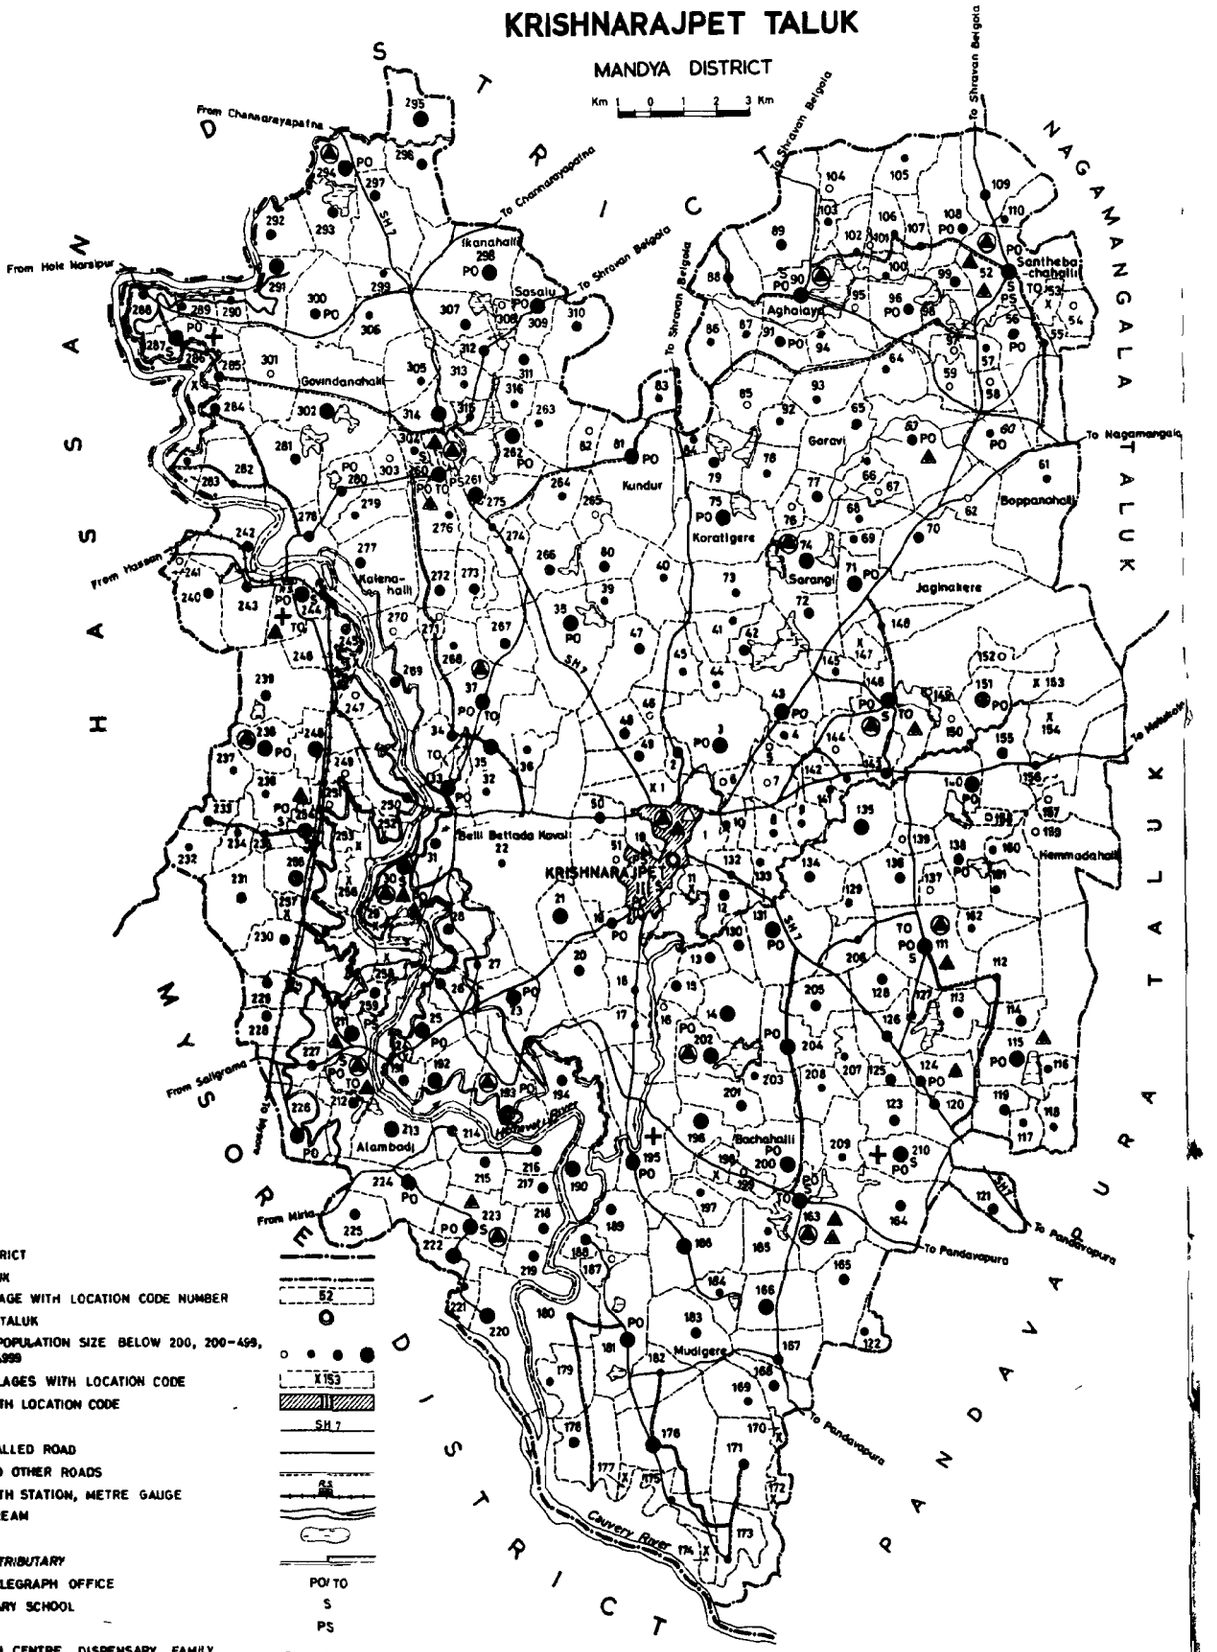

Appendices-IV(A) and IV(B) are compiled from the Primary Census Abstract. The proportion of Scheduled Castes population to the total population of the village, as per 1991 census, has been worked out for each village in a C.D.Block and a list of villages grouped into 6 ranges of percentage points is given in Appendix-IV(A). Appendix-IV(B) is similar to Appendix-IV(A) but deals with the proportion of Scheduled Tribes to the total population of the village concerned. However in view of the vast difference in the relative strengths of these two communities as well as the pattern of distribution, the percentage points included in the 6 ranges adopted for the Scheduled Castes and the Scheduled Tribes are slightly different.

# SECTION-II TOWN DIRECTORY

# TOWN DIRECTORY

## Explanatory Note

Town Directory comprises of six tabular statements as applicable to all the towns and an additional statement regarding the slums applicable only in respect of towns with a population of 50,000 and above. The six statements are numbered serially from I to VI and the additional statement bears the number IV A in view of the fact that it deals with the same type of information which is covered in Statement IV. These statements contain several columns, each with a brief heading and for presentation of the data, abbreviations have also been made use of in several columns. The title of each statement, the scope of the information furnished under each column therein and the abbreviations used, if any, are indicated below.

### STATEMENT I : STATUS AND GROWTH HISTORY

**Column 2 : Class, Name and Civic Administration Status of Town**

The class to which a town belongs is determined on the basis of its population at the 1991 census count and it is indicated in this column in roman numerals. The classification criterion adopted now is the same as that adopted for analysis and explanation at the earlier censuses. The towns are divided into six classes

| Class | Population Size | Class | Population Size |
|---|---|---|---|
| I | 100,000 and above | IV | 10,000 to 19,999 |
| II | 50,000 to 99,999 | V | 5,000 to 9,999 |
| III | 20,000 to 49,999 | VI | Below 5,000 |

For purposes of this classification, the total population of the town inclusive of the population of its outgrowths if any, is taken into consideration. In the case of urban agglomerations which have two or more urban components (each of which may or may not be having outgrowths) each such urban component (inclusive of its outgrowths) is regarded as a separate unit and the population size class is determined accordingly. An asterisk mark placed at the top right position after the name of the town indicates that this town has one or more outgrowths and that the 1991 census population and such other data presented against it includes the details relating to the outgrowths as well.

The middle component of this column heading refers to name of the town which does not need elucidation. Name of the town, as adopted in the official records, is reported here.

The civic administration status of the town as on 1.1.1990 is indicated immediately after the name of the town, within brackets. The abbreviations used for this purpose are as follows

| | | |
|---|---|---|
| MC | : | Municipal Corporation, |
| CMC | : | City Municipal Council, |
| TMC | : | Town Municipal Council, |
| CB | : | Cantonment Board, |
| NAC | : | Notified Area Committee, |
| SB | : | Sanitary Board, |
| MP | : | Mandal Panchayat, |
| NMCT | : | Non-municipal Census Town. |

With a view to ensuring the fixity of boundaries of various administrative units, that is, to ensure that the frame for census taking once finalised with reference to a cut-off date remains unchanged till the completion of the census count, the State Government had been requested during 1989 itself not to order any jurisdictional changes and not to give effect to any changes in the civic administration status either.

**Column 3 : Location Code Number**

The location code number assigned to the town for purposes of computerisation of the 1991 census data is entered in this column.

**Column 4 : Name of Taluk**

In Karnataka, the term taluk is very much in vogue though the designation of the Revenue Administrative Officer has for long been changed from Amildar or Mamlatdar to Tahsildar. The name of the taluk within the jurisdiction of which the town is located is indicated in this column. There are a few instances wherein a particular town straddles portions belonging to two adjacent taluks.

In such a case the town is considered to belong to the Taluk that contains a major portion of the town. In the statement, such cases are differenciated by an index mark and a note at the bottom of the page explains the correct situation.

**Column 5 : Name of Community Development Block**

The name of the Community Development Block within the jurisdiction of which the referent town is located is indicated in this column. This column does not apply to statutory towns since, in Karnataka, all such towns are outside the jurisdiction of the Community Development Blocks i.e., the (Taluk Panchayat Samitis).

**Column 6 : Area (Sq.Km)**

The geographical area of the town is furnished here in square kilometres upto two places of decimal. The figures for the urban areas are either those supplied by the civic administration authorities of the towns or compiled and supplied by the Director of Survey, Settlement and Land Records or compiled in the Census Directorate on the basis of the available records pertaining to the delimitation of urban units.

**Column 7 : Number of Households (1991)**

The total number of households, including those consisting of institutional and houseless population, enumerated in the town at the 1991 census is reproduced here from the Primary Census Abstract. The purpose is to facilitate a better comprehension of the demographic situation, especially with reference to the population data presented in this statement.

**Columns 8 to 17 : Population and Growth Rate of the Town at different Censuses from 1901 to 1991**

The population figures for the town as returned at the decennial census from 1901 through 1991 are furnished under these columns in order to provide an insight into the history of growth of the town. If in any particular census year the referent town did not enjoy the urban status, that is, if that place was reckoned as a village for that census, its population is not reported under the column concerned and a dash mark is indicated instead. In other words, the population figures are given here for the town only if it happened to be an urban area at that particular census year.

Thus, a glance at these columns reveals whether the referent town having been first classified as 'urban' has maintained that status continuously through the succeeding censuses or whether there have been subsequent declassifications. From column 9 onwards the decadal growth rates for the town are indicated within brackets below the population figures in order to permit an easier grasp of the decadal growth trends and to facilitate a comparative analysis. Population variations are quite often associated with changes in the jurisdiction of the urban area and sudden spurts are sometimes due to incorporation of fast developing fringe areas to the town or amalgamation of adjacent towns within the core town during the inter censal period.

**Column 18 : Density (1991)**

A town may have one or more outgrowths which are not towns in their own right. In such a case the density is worked out for the town inclusive of the area and population of such outgrowth(s).

**Columns 19 to 21 : Sex Ratio 1971 to 1991**

Sex ratio is expressed as the number of females for every thousand males and is based on the sexwise distribution of the population returned at the census. For each town these figures are furnished for the 3 successive censuses. This information would provide an insight into the changing pattern of sex ratio in urban areas.

**STATEMENT II : PHYSICAL ASPECTS AND LOCATION OF TOWNS, 1989**

**Column 2 : Class and Name of Town**

This column is the same as column 2 of Statement I and does not need any explanation. Unlike in Statement I, here the civic administration status of the town is omitted.

**Columns 3 to 5 : Physical Aspects**

These columns deal with the rainfall and temperature data. It is common knowledge that metcorological observatories have not been established in each and every town, even though most of the towns do have rain-gauges and due

arrangements have been made to record the rainfall data all through the year. The Director General of Observatories has furnished data on rainfall, maximum and minimum temperature in respect of towns having observatories. These figures are averages based on the data for 10 years from 1980 to 1989, and are distinguished in the statement by placing an asterisk mark at the top right hand side of the figure. Information on this aspect is available only for a few towns.

In so for as the data on rainfall for column 3 is concerned, for most of the towns the particulars have been supplied by the local officers. The rainfall figures are in millimetres and represent the annual average based on the actual figures relating to the preceding ten years i.e., from 1980 to 1989.

In case of non-availability of information, the particulars relating to the nearest town are reported under these columns with the distinguishing notation N being placed at the right hand side of the figure.

**Column 6 to 12 : Name of and Road Distance from State Hq., District Hq., Sub-Division/Taluk Hq., Nearest City with a population of 100,000 and more; Railway Station; Bus Route; Navigable River or Canal (if within 10 kms)**

The column headings are self explanatory and are intended to indicate the location of various centres of importance with reference to the referent town. If the referent town itself happens to be mentioned in these columns the distance is recorded as '0' (zero) and in all other cases the road distances are given in kilometres. In column 8 the name of the sub-division to which the taluk (in which the town is located) belongs as well as the name of the taluk to which the town belongs are mentioned along with road distances in the same order one below the other. In column 9, the name of the nearest city with a population of 100,000 and more according to 1991 census and the road distance thereto is mentioned in respect of each and every town even if the referent town itself has a population of 100,000 and more. It may be reiterated here that the 'town' includes its outgrowths as well. For example, the 1991 population of the area incorporated in the municipal limits of Hassan is 90,803. However 10 places have been recognised as the outgrowths of Hassan. The aggregate population exceeds one lakh and this urban complex, instead of Hassan CMC alone, is reckoned as a Class I town i.e. a city, for purposes of this column. Though the aggregate population of an urban agglomeration which consists of two or more independent towns (with or without outgrowths) exceeds one lakh mark it does not automatically confer the status of a city to any of the constituent towns. Of course, if any of these constituent towns (including its outgrowths) has a population of 100,000 or more then, in its own right, the place will enjoy the status of a city. The KGF urban agglomeration is composed of three separate units viz., Robertsonpet, Kolar Gold Fields and BEML Nagar. The population of these three towns (inclusive of Outgrowths) according to 1991 census is 68,230, 72,485, and 16,031 respectively. Obviously, none of the three constituent units qualifies to be reckoned as a city for purposes of this column.

The proximity by road alone is taken into consideration for filling up this column and as such cities belonging to adjacent States also find an occasional mention in this column.

Column 10 refers to the nearest railway station and distance thereto by road. In a few cases, though the name of the railway station is the same as that of the referent town, the distance indicated is other than zero because of the fact that the station is actually located beyond the jurisdiction of the referent town.

In case the referent town is enjoying bus route facility (i.e. road transport) the name of the town is mentioned in column 11 and the distance is recorded as zero. Names of bus routes passing through or originating from the town are not indicated here. If there is a navigable river or a navigable canal at a distance of 10 kilometres or less from the referent town then the name of the river or the canal is indicated in column 12. To differentiate between a river and a canal the abbreviations (R) and (C) are made use of and the distance from the town to the navigable waterway is mentioned thereafter. It may incidentally be stated that in Karnataka there are very few navigable rivers and practically no navigable canals.

**STATEMENT III : MUNICIPAL FINANCE, 1988-89**

As the title denotes, this statement deals with the actual income and expenditure of the civic body administering the town. An attempt has been made to present comparable data in the case of non-municipal towns like Panchayats and areas under the administration of public sector undertakings and the like. The data relate to the financial year 1988-89 and have been furnished by the concerned local authorities on the basis of the relevant records relating to 1988-89. It may also be stated here that no probing enquiries have been made and the particulars as reported by the civic bodies have been presented here.

**Column 2 : Class and Name of Town**

This is same as column 2 of Statement II and as such does not require any explanation.

**Column 3 : Civic Administration Status (in 1990)**

As explained under column 2 of Statement I, the civic administration status of the town as on 1.1.90 is indicated in this column using same set of abbreviations.

**Columns 4 to 10 : Receipts (in Rs.'00)**

The actual receipt realised by the civic body under various heads of income as well as the total for the year 1988-89 are indicated in hundreds in these columns. The opening balance for the year is not taken into account under any of these columns including that for the 'total'.

**Columns 11 to 17 : Expenditure (in Rs.'00)**

The actual expenditure incurred during the year 1988-89 is furnished here in hundreds. The various heads of accounts are grouped into 6 broad categories for each of which a separate column is provided. Public safety covers the expenses incurred for road lighting, destruction of rabid and stray dogs, besides that on fire fighting service. Similarly, 'Public Institutions' covers not merely the contributions made by the civic body to educational, medical and cultural institutions in the town but also the expenditure incurred for the maintenance of educational and such other institutions if any functioning under its direct control.

As in the case of receipt, in the case of expenditure also the closing balance at the end of the year is not considered. Therefore, in almost all the cases the amount shown under "total receipt" may not tally with the amount shown under "total expenditure".

**STATEMENT IV : CIVIC AND OTHER AMENITIES, 1989**

**Column 2 : Class and Name of Town**

This is same as column 2 of Statements II and III and does not need further explanation.

**Column 3 : Civic Administration Status**

Explanation furnished earlier for column 2 of Statement I and column 3 of Statement III holds good for this statement also.

**Column 4 : Population**

The total population of the town (inclusive of the outgrowths if any) according to 1991 census is mentioned here with a view to facilitate a comparative analysis of the data.

**Column 5 : Scheduled Castes and Scheduled Tribes Population**

The aggregate population of the Scheduled Castes and the Scheduled Tribes according to the 1991 Census is indicated in this column.

**Column 6 : Road Length (in kilometres)**

Generally in a town it is the civic authority that is responsible for the construction and maintenance of roads. The term 'road' as used here includes streets also and while the unsurfaced mud and gravel roads are categorised as Kacheha roads, the surfaced roads are classified as Pucca roads. District roads and highways under the control of the Public Works Department also pass through in the case of most of the towns and cities. The roads situated within the jurisdiction of the town and under the maintenance and control of the State PWD, Central PWD, Zilla Parishad or any other agency such as the Karnataka Power Corporation, a public sector undertaking, Factory Management, etc., have also been taken into consideration while computing the total road length. This total road length is shown under the two categories of KR (Kacheha Road)

and PR (Pucca Road) as defined above. In order to have an idea about the total length of roads in the town therefore, these two figures are to be added together. As it has not been possible to ascertain the full details by type of road and agency responsible for maintenance, the combined road length alone is furnished. The road length is given in kilometres and fractions are rounded off to next integer.

**Column 7 : System of Sewerage**

Generally sewerage system implies the network of mains and branches of underground conduits for the conveyance of sewerage to the final point of disposal. Sewers that carry only household and industrial wastes are called separate sewers while those that carry storm water from roofs, streets and other surfaces are known as storm water drains and those carrying both sewage and storm water are called combined sewers. In towns provided with such systems of underground sewerage also there would in addition be a surface drainage system to cover the areas not served by sewerage system and also to drain out excess rain water from all over the town.

However, in towns that are not provided with a sewerage system - and such towns are far more numerous in the State - there would generally be open drainage system. Where even this system is not prevalent the householders would have made their own arrangements such as soak pits and cesspools. In this column therefore information is presented not only on sewerage system, but also on the drainage system. Like sewerage system, the drainage system is also of different types depending upon the construction material and also the shape of the drains. The two most important types of sewerage/drainage system prevailing in the town are reported under this column in the order of their importance. The following abbreviations are used

S : Sewers
OSD : Open Surface Drains
BSD : Box Surface Drains
SD : Sylk Pattern Drains
CD : Cesspool method
Pt : Pit System
O : Others

The box surface drains are also open drains but are built of size stone masonary and are also called Pucca gutters. The sylk pattern drains too are open surface drains only. The open surface drains category thus covers the Kachcha drains involving mere earth-work and also the drains constructed from out of oblong granite slabs or, out of pre-fabricated cement concrete blocks which need only joining and cement pointing after being placed in position.

**Columns 8, 9 and 10 : Number of Latrines**

Information on total number of latrines (i.e. lavatories) of different types as furnished by the concerned civic authorities is reported under these 3 columns. Both private and public latrines are covered here and the particulars in these columns and in column 11 are closely interlinked. The water-borne latrines include all types of flush-out latrines while service latrines refer to only those that are being serviced by manual scavengers either everyday or twice or thrice a week.

**Column 11 : Method of Disposal of Night soil**

The phrase disposal of night soil is generally presumed to refer to the manner in which the garbage is finally disposed of by the civic body, i.e., sale by public auction, used as manure etc. However, the main purpose of this column is to provide information on the method by which the night soil is removed from the latrines, that is, the primary disposal of the human waste. A little elaboration on this aspect therefore appears to be necessary.

There are three systems of disposal of human waste, namely, (i) underground sewerage, (ii) sanitary water flush latrines with individual disposal systems like septic tank, leaching cesspool and collecting well, and (iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cisterns (or hand flushing). Through this sewer the faeceal matter is transported without the need for scavenging. This system generally exists in cities and large towns

besides industrial townships built and controlled by public sector undertakings and large companies and the like. Where the street sewer does not exist these sanitary water flush latrines are connected to a local septic tank with a subsoil dispersion system or a leaching pit. Where the liquid wastes from the water closet could be disposed off locally in a leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil which render the harmful liquid bacterially innocuous by the slow process of filteration through the soil traversed. Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected to such wells. These wells are cleared at periodic intervals by a suitable device. The dry type latrines are of service type from where the human excreta has to be removed by scavengers who move from house to house, in most cases carrying the night soil as head loads on their head, or shoulders or in baskets with handles or in wheel barrows. This waste is then collected in bullock carts or trucks and transported to dumping grounds at the outskirts of the town.

It may be mentioned in passing that in Karnataka the practice of carrying night soil by head loads has been discontinued with effect from 15.8.1973 consequent on the issuance of a Government Order in this behalf. However in a few cities and towns once the civic body cease to provide the services of scavengers for lifting the night soil from the latrines, the affected householders themselves entered into private oral agreements with the scavengers and have ensured the continuance of the scavenging services till date. As a result, even at present, dry type service latrines are existing in a few towns and the practice of carrying night soil as head loads etc., is very much in existence. In some of the towns, withdrawal of the services of the scavengers by the civic bodies has resulted in the practice of erecting latrines in such a way that the night soil is directly flushed into the open drains (in which the pigs freely roam about) instead of erecting sanitary hand flush latrines with septic tanks.

If more than one system is prevailing in the town, the two most important types are indicated one after the other. The abbreviations used in this column are the following

| | | |
|---|---|---|
| S | : | Sewerage |
| HL | : | Head Loads |
| ST | : | Septic Tanks |
| Pt | : | Pit System |
| WB | : | Wheel Barrows |
| B | : | Baskets (with handles) |
| O | : | Others |

In case the town has latrines of other types that are neither of the sanitary type nor of the service type, this column does not apply at all and therefore a dash is entered.

**Columns 12 and 13 : Protected Water Supply : Source and Capacity of Storage Systems**

The sources of water supply in the town are indicated by using the following four abbreviations :

| | | |
|---|---|---|
| T | : | Tap |
| TK | : | Tank Water |
| W | : | Well |
| TW | : | Tube Well/Hand Pump |

Supply through the taps implies a primary source of water supply such as a river, or a stream, or a bore well, or a curb well, or a tank or a reservoir etc., which is of course not mentioned in this column. It may be incidentally stated that the term protected is used in a very liberal sense, and no attempt has been made to gather data on the methods of filteration and water purificatory treatment if any resorted to by the agency supplying water through pipes in the towns. The normal practice in most of the towns is to pump raw water into the storage tank or reservoir, treat it with bleaching powder and then distribute that water for consumption through pipes.

If there are more than 2 sources of water supply in the town the first two which are regarded as most important are mentioned in that order separated by a comma. In column 13, the systems of water storage are considered and the two that are most important in the referent town are indicated in that order and after each entry, the storage capacity is also mentioned in litres within brackets. The abbreviations used in this column are :

| | | |
|---|---|---|
| OHT | : | Overhead Tank |
| SR | : | Service Reservoir |
| GLSR | : | Ground Level Service Reservoir |
| IG | : | River Infilteration Gallery |
| BWP | : | Borewell Pumping System |
| PT | : | Pressure Tank |

The term capacity has its usual meaning, namely, the capacity to store or contain. It may further be clarified that the storage capacity does not necessarily indicate the quantity of water supplied daily to the inhabitants of the town. In some of the towns due to the inadequacy of water supply at the primary source for most part of the year the normal utilisation of the storage capacity would be of the order of 50 to 60 per cent only. On the contrary there are towns where water is pumped into the storage system and also distributed for consumption twice every day almost throughout the year and there are a few towns where the inlets and outlets of the storage systems would both be functioning simultaneously for most part of the day making it somewhat difficult to calculate the quantity of water supplied everyday under such a system.

**Column 14 : Fire Fighting Service**

If fire fighting service is available in the town this fact is indicated by the word 'yes' recorded in this column. In all other cases the name of the nearest place if in the same district or the name of the nearest district if in the same State or other State where such services are available is indicated along with the road distance in kilometres between the referent town and the place with fire-fighting service.

**Columns 15 to 19 : Electrification (Number of connections) - Domestic, Industrial, Commercial, Road Lighting (points) and Others**

In columns 15 to 19 information about the number of electrical connections (installations) for different categories of consumers in the town is furnished. The definitions of the terms used in the column headings are as follows

(i) **Domestic** : Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial lines, charitable, educational and religious institutions are all included in the domestic category, A.E.H. i.e., All Electric Home connections are also categorised as domestic.

(ii) **Commercial** : This category includes all connections for the supply of electricity to commercial establishments such as wholesale and retail shops, offices and business houses, hotels, restaurants, tea stalls, photographic studios, X-ray installations, advertisements and exterior illumination, railway station, bus station and the like.

(iii) **Industrial** : Power supply connections to industrial establishments are covered under this column. This would include connections to small establishments such as powerlooms, flour mills, roasting, grinding, wet grinding, repair workshops using power operated tools and the like as well.

(iv) **Road Lighting** : The total number of street lights being maintained in the town is mentioned here.

(v) **Others** : Connections to all categories i.e., other than those cited above, are covered under this heading. This would include temporary connections, connections to pumpsets, water works and such other installations.

**STATEMENT IV-A : CIVIC AND OTHER AMENITIES IN NOTIFIED SLUMS, 1989**

This statement which may be regarded as an appendix to Statement IV is confined to towns with a population of 50,000 and more i.e., class I and class II towns. Information as furnished by the concerned civic body (or the Slum Clearance Board) on slums that are officially recognised as slums (even if those are not notified in some cases) is presented under 14 columns apart from column 1 which relates to serial number and column 2 which relates to name and class of town.

**Column 3 : Name of Slum**

The names of slums, if any, in the town are given in separate lines.

**Column 4 : Area of Slum**

The geographical area of each slum is given in square kilometres upto three places of decimal.

**Column 5 : Population of Slum (approximate)**

The approximate population of the notified slum (as in 1989) as furnished by the concerned civic authorities is reported in this column.

**Column 6 : Paved Roads (in Km.)**

The total length of paved roads, if any, in the slum is reported here in kilometres (upto 2 decimal places).

**Column 7 to 12 : System of Sewerage, Number of Latrines and Method of disposal of Night soil**

These column headings which are the same as those appearing in statement IV above have already been explained. The information is furnished here for each slum separately. The main heading 'latrines' is sub-divided into those that are privately owned and those that are for common use of the community i.e., public latrines.

**Column 13 : Number of Tap Points/Public Hydrants installed for Supply of Protected Water**

The total number of public taps or hydrants if any in the slum is mentioned here. (Handpumps if any are also regarded as equivalent to public taps).

**Column 14 to 16 : Electrification (Number of connections)**

Total number of electrical connections in each slum provided for purposes of domestic use, road lighting and other than these two is reported separately under these three columns. The meaning of the terms used in the column heading has already been explained. The information furnished under these columns is very approximate.

**STATEMENT V : MEDICAL, EDUCATIONAL, RECREATIONAL AND CULTURAL FACILITIES, 1989**

**Column 2 : Class and Name of Town**

This column is same as column 2 of Statement IV and therefore calls for no further explanation.

**Column 3 : Population**

The total population of the town according to the 1991 Census is noted in this column.

**Columns 4 and 5 : Medical Facilities : Hospitals/Dispensaries/T.B.Clinics/ Health Centres/Nursing Homes etc., and Number of Beds in Medical Institutions noted in Column 4**

The scope of these columns is confined to only such of the facilities that are offered by institutions run by or aided by government/semi-government or local bodies and charitable institutions or social service agencies like the missionaries. In other words, data on the medical facilities provided in the town by private doctors i.e., registered medical practictioners either individually or in establishments where they work in groups, are excluded from the purview of these columns.

The abbreviations used in column 4 are

| | |
|---|---|
| H | : Hospital |
| D | : Dispensary |
| HC | : Primary Health Centre/Health Centre/ Primary Health Unit/Primary Health Sub Centre etc. |
| FPC | : Family Planning Centre |
| TB | : T.B.Clinic |
| NH | : Nursing Home |
| O | : Others |

If there are two or more number of institutions of the same type, then the number of institutions is also indicated within brackets immediately after the relevant abbreviation.

Maternity homes, maternity and child welfare centres, leprosy clinics, chest clinics and venereal diseases clinic etc., if any, are all included under the category of 'Others'. But even when a Family Planning Centre is attached to a hospital or a Primary Health Centre it is treated as an independent unit and is counted separately.

If the town has hospitals and dispensaries providing facilities under different systems of medicines such as allopathic, ayurvedic, unani and homoeopathic, then this detail too has been included using abbreviations such as 'Ay' for Ayurvedic, 'U' for Unani and 'Hom' for Homoeopathic system. [The allopathic institutions do not have any additional abbreviation. In presenting the information under column 4 for H or D, first the total number of all institutions under different systems is given within brackets after 'H' or 'D, as the case may be and thereafter the number of institutions under each

system is given. For instance, H(1) (1) represents one allopathic hospital, whereas H(12) (9, U-1, Ay-1, Hom-1) indicates availability of 12 hospitals, of which, 9 are Allopathic, 1 Unani, 1 Ayurvedic and 1 Homoeopathy.]

If medical facility is not available in the town, then the name of the nearest place where it is available is mentioned here along with the distance to that place in kilometres.

The number of beds with which the medical institutions, noted in column 4, are equipped is indicated in column 5.

**Column 6 to 15**

These columns provide information regarding the educational facilities available in the town.

**Columns 6 to 9 : Arts/Science/Commerce Colleges (of Degree Level and Above); Medical Colleges; Engineering Colleges; Polytechnics**

Particulars of colleges in the town providing general education facilities at degree level are indicated in column 6 using the following abbreviations :

| | | |
|---|---|---|
| A | : | Arts only |
| S | : | Science only |
| AS | : | Arts and Science only |
| C | : | Commerce only |
| AC | : | Arts and Commerce only, |
| ASC | : | Combined for all three categories |
| | : | Arts, Science and Commerce, |
| L | : | Law |
| U | : | University |
| O | : | Others. |

If the number of colleges of any particular category is more than one, then that number is also given within brackets against the abbreviation concerned. It may incidentally be mentioned here that the educational institutions with a vocational and professional content such as Pharmacy College, B.Ed. College, Agricultural College etc., are not covered under this category but are shown included in the category of "Others" in column 10.

In columns 7, 8 and 9 the number of medical colleges, the number of engineering colleges and the number of polytechnic institutions are indicated. In case of medical colleges, the number of institutions, if any, under different systems of medicine is separately given against abbreviations representing different systems of medicine. The abbreviations used are A : Allopathy; Ay : Ayurvedic; U : Unani; Hom : Homoeopathy and O : Others.

In case the town does not have any of the colleges referred to in these 4 columns i.e., if the entry were to be a dash in any of these columns then the name of the nearest place with the facility along with the distance thereto is mentioned. If such a place is outside the district then the name and the distance to that place and if such a place is outside the State itself then the name of that State is mentioned in these columns. The same procedure is adopted regarding the other columns dealing with educational facilities.

**Column 10 : Recognised Shorthand, Typewriting and Other Vocational Training Institutions**

The term recognised would mean recognition by some statutory authority like the Educational Department, Commerce Department, Labour Department etc., of the Government or Semi-Government autonomous bodies or public sector projects. The Teacher's Training College, the Nursing College, the Pharmacy College, the College imparting education in Physical Education, Applied Art/Painting College, Music/Dancing Schools and the like are also shown under this column against the category of 'Others'.

| | | |
|---|---|---|
| SH | : | Shorthand |
| Type | : | Typewriting |
| Sh. Type | : | Shorthand and Typewriting |
| O | : | Others |

If the number of institutions of any particular type is more than one, then that number is also indicated within brackets along with the abbreviation concerned.

**Columns 11 to 14 : Higher Secondary/Intermediate/PUC (Pre-University College/ Junior College/Secondary, Matriculation, Junior Secondary and Middle Schools and Primary Schools**

Information about the number of schools of different types functioning in the town is furnished under these columns. All schools irrespective of the medium of education and the type of administering agency i.e., all those run by or aided by Government or local bodies, as well as the unaided institutions run by private management are considered here for reporting. If there are composite institutions such as a college providing education at degree level and also at Pre-University level then such institutions are split up into degree colleges and PUC colleges (i.e., junior college) and separately counted as if they are independent units. Likewise, a composite Junior College which has facilities for providing education say from I to XII standard (i.e., from Primary I standard upto PUC) would be regarded as representing one Junior College, one High school, one Middle School and one Primary School and each of these units would be counted and reported under the relevant column as if each unit was an independent institution in its own right. Similarly, a school with I to X standard would get counted under Primary, Middle and High School categories and a Composite School with I to VII standard would be considered under the Primary School as also the Middle School category.

In Karnataka the term middle school is no longer in vogue as the primary education consists of 7 years of schooling leading to secondary level. However, the first four classes (I to IV standard) are called lower primary classes and the next three are regarded as higher primary classes. There are schools with only I to IV standards called LPS and also those with V to VII only (formerly middle schools) known as HPS and there is no difficulty in counting such institutions as separate primary and middle schools. But there are composite schools called Higher Primary Schools having I-VII standards and such schools have now been split up into one Primary School and one Middle School for purposes of reporting under these columns of the Town Directory. This method of accounting is therefore different from a simple counting of schools in the town.

**Column 15 : Adult Literacy Classes/Centres and Others (Specify)**

If adult literacy classes are being run at regular centres in the town, the number of such centres is indicated in this column by the side of the abbreviation AC. Gurukula, Madarasa (Arabic School) and such other quasi religious cum educational institutions if any in the town are also reported in this column under the category of 'Others'.

**Column 16 : Number of Working Women's Hostels with Number of Seats**

Though there are hostels meant for students in almost all the towns, very few have hostels meant for working women. In this column the number of only such hostels that are exclusively meant for working women only are reported along with the information on the number of seats i.e., its strength.

**Columns 17 to 19 : Recreational and Cultural Facilities, Stadia, Cinema, Auditoria/Drama/Community Halls**

Column 17 relates to the number of stadia, if any, in the town. Ordinary play grounds which one usually comes across in towns and cities are excluded from the purview of this column. The term stadium is used in its strict sense to refer to those constructed at considerable costs and are under proper upkeep.

In column 18 the total number of permanent cinema theatres in the town is indicated. Touring talkies i.e., cinema tents of purely temporary nature, are not taken into account for this column. If there are any auditoria, drama halls and community halls in the town the total number of such units is reported in column 19.

**Column 20 : Public Libraries including Reading Rooms**

The number of public libraries and reading rooms are separately furnished by the side of abbreviation PL for Public Library and RR for Reading Room. Such facilities offered by educational and private institutions including those that are commercialised (called circulating libraries

in local parlance) are not covered for reporting under this column.

## STATEMENT VI : TRADE, COMMERCE, INDUSTRY AND BANKING, 1989

### Column 2 : Class and Name of Town

This column is the same as column 2 of the preceding statement and therefore calls for no further explanation.

### Column 3 to 8 : Names of Three Most Important Commodities Imported and Names of Three Most Important Commodities Exported

For purposes of these columns, commodities for which the town serves only as a transit centre by importing for the specific purpose of exporting the commodities without any processing are not considered either as imports or as exports. Agricultural and such other allied produce may be regularly brought into the town from the neighbouring villages and sold to commission agents and wholesalers at the regulated market for further export to areas outside the town. In such cases the produce that is brought into the town is not considered as import. On the other hand, if these items are mainly consumed within the town - either as consumption goods or as raw materials by any manufacturing industry - then the commodities under reference would be regarded as imports. Thus, the commodities imported are either locally consumed in the same form or else processed further and thereafter either consumed locally or exported to other centres. This restriction apart, there is no limitation concerning the nature and quantity of the commodities that may be considered for reporting under these columns. Importance in a town is restricted basically to the few or several commodities that qualify for consideration either as imports or as exports. By and large the commodities reported under exports would coincide with the commodities reported as manufactured in the town because of the specific exclusion of transit goods. As a result, the image that some of the towns have built up over decades as traditional exporters of certain goods does not get reflected under these columns.

In these columns the importance of a commodity is reported in very general terms and decided upon in terms of the estimated volume of commodities transacted and is supposed to be based on local enquiries made by the civic authorities concerned

### Columns 9 to 11 : Names of Three Most Important Commodities Manufactured

The order of importance is determined broadly by taking into consideration the volume of the total output of the commodities or the scale of operation and for these columns too it is the civic authority that has furnished the information after local enquiries. All types of manufacturing and processing irrespective of the sector to which they belong are considered and of these the three that are most important are reported.

### Column 12 : Number of Banks

Information on this item has been supplied by the civic authorities after local enquiries and relates to the year 1989. If a bank has two or more branches then each such branch is regarded as a separate Bank for computing the number of banks in the town.

### Column 13 : Number of Agricultural Credit Societies

The total number of agricultural co-operative credit societies functioning in the town, irrespective of the type to which they belong (i.e., primary service, multipurpose, agricultural produce marketing etc.,) is reported under this column. In quite a large number of towns agriculture is an important means of livelihood for a number of persons and agriculturists of urban areas too have for long been influenced by the co-operative movement.

### Column 14 : Number of Non-Agricultural Credit Societies

Consumer co-operative societies which extend credit facilities to the members, and all other credit co-operative societies that cannot be classified as agricultural are considered for this column. Several groups of people belonging to specific categories might have formed co-operative societies to cultivate the habit of thrift and to make use of the benefit arising out of the encouragement given to the co-operative movement. All such co-operative societies are covered under this column. The information as furnished by the civic bodies after local enquiries has been merely reported here.

49. Yerava

# PUBLICATION PLAN

The 1991 Census tables will be published in 33 separate series of volumes for All - India and for each State and Union Territory. The publication series is as follows:

**Series No.**

1 INDIA

**States**

2. Andhra Pradesh
3. Arunachal Pradesh
4. Assam
5. Bihar
6. Goa
7. Gujarat
8. Haryana
9 Himachal Pradesh
10 Jammu & Kashmir
11 Karnataka
12. Kerala
13. Madhya Pradesh
14. Maharashtra
15 Manipur
16 Meghalaya
17 Mizoram
18 Nagaland
19 Orissa
20 Punjab
21. Rajasthan
22. Sikkim
23. Tamil Nadu
24. Tripura
25 Uttar Pradesh
26 West Bengal

**Union Territories**

27. Andaman & Nicobar Islands
28. Chandigarh
29. Dadra & Nagar Haveli
30. Daman & Diu
31. Delhi
32. Lakshadweep
33 Pondicherry

In each of these series (for all - India and each State/Union Territory) the different series of tables (A Series - General Population Tables, B - Series - General Economic Tables, etc.,) will be brought out as different Parts. Apart from these, District Census Handbooks will be published for each district in the country. These will contain the PCA data for the district, the village and town primary census abstract and the village and town directories. The latter comprise compilations of statistics, external to census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For all - India and for each State and Union Territory, the census tabulations and reports will be published according to the following plan:

| Part No. and subject covered | Sub-part No. if any, and the topics covered |
|---|---|
| 1 | 2 |
| Part I - Administration Report (for Office use only) | Part I-A - Administration Report Enumeration |
| | Part I-B - Administration Report Tabulation |
| Part II - General Population Tables | Part II-A - General Population Tables - A-Series |
| | Part II-B - Primary Census Abstract |
| Part III - General Economic Tables | Part III-A - B-Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories. |
| | Part III-B - B-Series tables of second stage which will be brought out on full count. The data relating HHI, OW, Marginal Workers and Non-workers seeking/available for work will be entered on full count basis. |

The following special papers are also planned and will be published as and when they are ready as 1991 Census papers :

(a) Special studies taken up by the Directors of Census Operations

(b) Special Areas Surveys

(c) Special Tables for Standard Urban Areas

(d) Language Survey Reports

(e) Post Enumeration Check Report

(f) Age Tables

(g) Life Tables

(h) Reports on estimates of inter-censal birth and death rates using 1981-1991 life tables and age data

(i) Development of Vital Statistics in India

Besides these special papers, some monographs based on 1991 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1991 Census monographs.

It is also proposed to carry out some special studies of 1991 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1991 Census.

It is also proposed to disseminate census tabulations and the basic data in machine readable forms such as magnetic tapes, diskettes, floppies, etc.

The District Census Handbooks will be available for sale at the Government Central Press, Bangalore and the other publications at the Office of the Director of Census Operations, Karnataka, Bangalore and the Manager of Publications, Civil Lines, New Delhi - 6.
