

CENSUS OF INDIA 1991

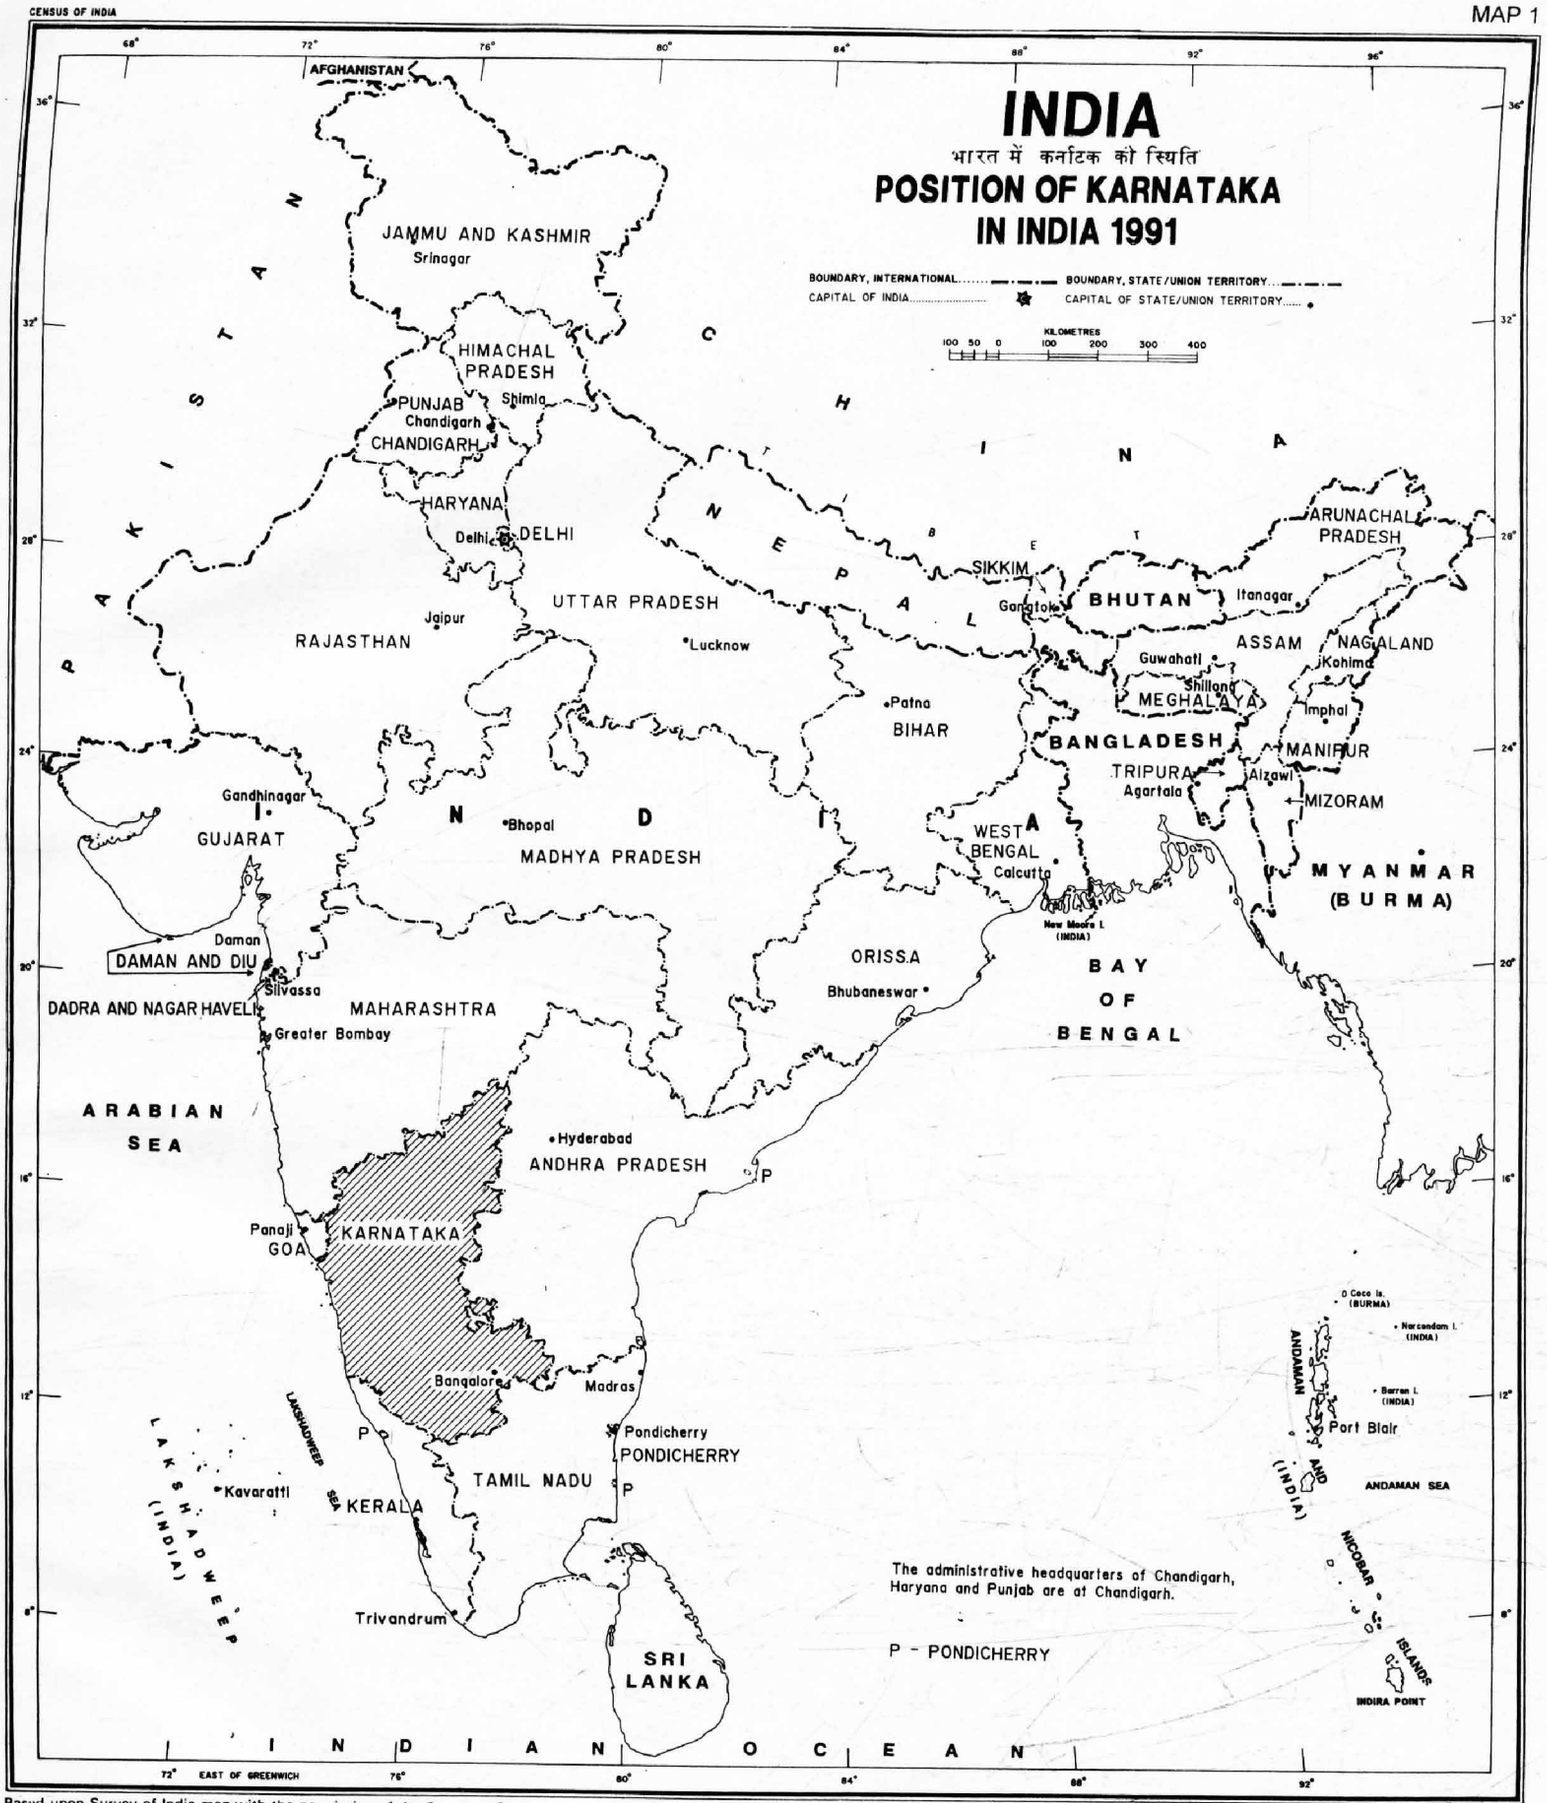

SERIES -11

KARNATAKA

PART II-B(i)

PRIMARY CENSUS ABSTRACT
GENERAL POPULATION

Directorate of Census Operations,
Karnataka

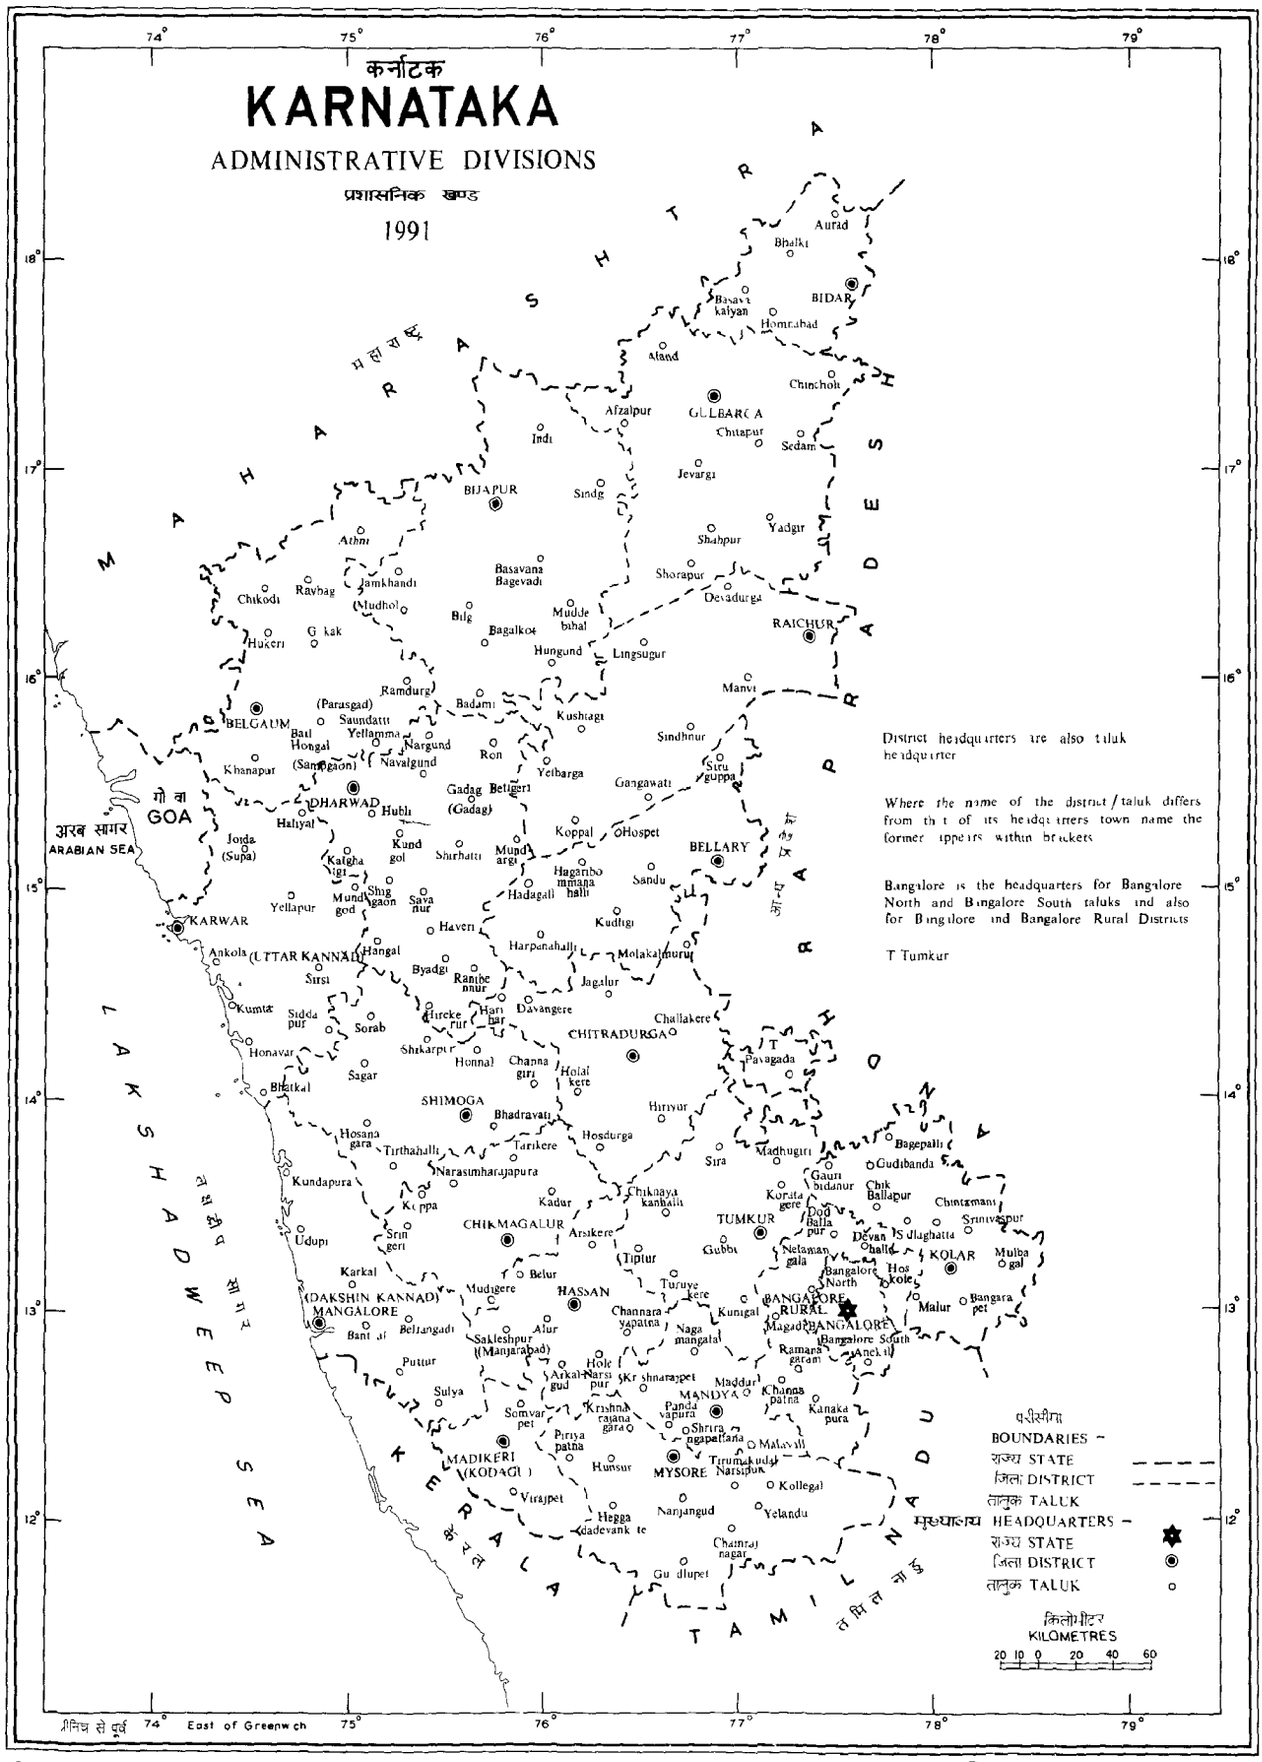

Based upon Survey of India map with the permission of the Surveyor General of India.

The territorial waters of India extend into the sea to a distance of twelve nautical miles measured from the appropriate base line.

The boundary of Meghalaya shown on this map is as interpreted from the North-Eastern Areas (Reorganisation) Act, 1971, but has yet to be verified.

STATEMENTS

1	Number of households per 1000 Census houses and the number of households per Sq. km., 1991	32
2	Ranking of Districts by population size, 1981 and 1991	33
3	Districts arranged in descending order of density of Population, 1991 and their density in 1981	34
4	Sex Ratio, 1901 - 1991 (Females Per 1000 Males)	35
5	Literacy Rate for States and Union Territories, 1981-1991	36
6	Total population, population aged 7 and above, literates, illiterates and literacy rate by sex and rural-urban residence, Karnataka, 1981-1991	37
6.1	Difference in Literacy rates, 1981- 1991	38
6.2	Male-Female and urban-rural differences in literacy rates, 1981 and 1991	38
7	Total population aged 7 years and above and literates aged 7 years and above, 1981	39
8	Population, Literates and Illiterates aged 7 years and above and Literacy Rate for Districts by Rural and Urban, Residence and sex, 1991	40-43
9	Districts arranged in the order of literacy ranking in 1991 Census and comparison with 1981 Census (Literacy rates have been calculated for the population aged 7 years and above)	44
10	Population of Scheduled Castes and Scheduled Tribes in each district, their proportion to total population in rural and urban areas and their percentage distribution in districts	45-46
11	Number and Percentage growth of workers and Sex ratio in the industrial categories, total main workers, marginal workers and non-workers, 1981-1991 Census	47
11.1	Growth Rate of workers in Industrial Categories Va, Vb & IX, 1981-1991	48
12	Proportion of Total workers, Main workers and Marginal workers to Total population in Districts by Residence and Sex, 1981-1991	49-52
12.1	Districts arranged in the descending order of their 1991 male work participation rates and rankings of work participation rates, 1981	53
12.2	Districts arranged in the descending order of their 1991 female work participation rates and rankings of work participation rates, 1981	54
13	Total main workers by nine broad industrial categories, marginal workers and non-workers as percentage of population of State/District, 1981 and 1991	55-63
14	Percentage Distribution of main workers of each sex into broad industrial categories, 1991	64-65
15	Sex ratio (females per 1000 males) among total population, total workers (main + marginal workers), main workers, each category of main workers, marginal workers and non-workers in total, rural and urban areas of each District, 1991	66-67

PUBLICATION PLAN 410-412

PREFACE

In Karnataka as in the rest of the country, the 1991 Census of Population, the thirteenth Census as reckoned from the year 1872 was conducted in February-March 1991, with the sunrise of 1st March, 1991 as the reference point of time. The provisional results based on the figures compiled by the census enumerators were released on April 8, 1991 for Karnakata State with the publication of "Paper–I of 1991 - Provisional Population Totals" and another publication viz., "Supplement to Paper–1 of 1991 - Provisional Population Totals" was released later, on June 18, 1992. The final population figures for Karnataka State were released through a brochure `Final Population Totals ; Scheduled Castes and Scheduled Tribes' on January 20, 1993.

The massive data collected in the census are tabulated manually and also on the computer and the cross classified census data, a wealth of valuable information on the demographic, social and economic facets of the people of the state are published through a number of volumes. Of these Part II-A: General Population Tables - A series and Part II-B Primary Census Abstract are the most important as they provide the basic population data of the 1991 Census based on full count.

For convenience, Part II-B is being published in two volumes viz., Part -II B (I) and Part-II B (ii). Part II-B(i), the present volume contains Primary Census Abstract for the General Population. Part II-B (ii) which is being brought out separately, presents the Primary Census Abstracts for Scheduled Castes and Scheduled Tribes Population.

Ms. Sobha Nambisan, IAS, the Director of Census Operations, Karnataka, under whose supervision and guidance the entire operations were carried out deserves all credit for its success, but she was repatriated to State Government for taking up some other important assignment before this volume could be sent to the press.

I gratefully acknowledge the valuable advice and guidance received from Sri A.R. Nanda, IAS, former Registrar General, India, Dr. M. Vijayanunni, IAS, Registrar General, India and Sri S.P. Sharma, Deputy Registrar General (C&T). I also thank Sri V.P. Rushtagi, Deputy Director, Census Division (now Joint Director) and his colleagues who scrutinised the PCA tables.

The arduous task of scrutiny and compilation of Primary Census Abstracts and preparation of write ups was accomplished in the Census and Tabulation Section by Sri S.R. Raghavendra Rao, ADCO(T) assisted by Sri V. Thippa Setty, Investigator and his team of zealous workers. Their precision and promptitude in delivering goods deserves special mention. The maps included in this volume were prepared under the guidance of Smt. M.G. Mangala, Senior Geographer and her colleagues. Sri G.R. Suresh and Sri N.K. Ravishankara, Data Entry Operators, Grade 'B' did an excellent job of preparing the bilingual manuscript of the PCA on the P.C. 286/386 installed in this Directorate. The names of officers under whose supervision and guidance the compilation were carried out in the Regional Tabulation Offices and the names of other members of the staff closely associated in bringing out this publication are given separately. I thank all of them.

I am also thankful to Sri. Venkatesan, State Informatics Officer and Sri P. Krishna Prasad, Principal Systems Analyst, National Informatics Centre and their colleagues for providing necessary help in the computerisation of the Primary Census Abstract which has been released through NIC network all over India.

I hope this publication will be useful to the administrators, planners, demographers, economists, researchers and other data users.

S. RAJENDRAN
Joint Director of Census Operations,
Karnataka

INTRODUCTION

The 1991 Census enumeration was conducted in Karnataka, as in the rest of the Country during February 9-28, 1991 with reference point of time as the sunrise of March 1, 1991. A revisional round was conducted between March 1-5, 1991 to update the population as at the sunrise on March 1, 1991. The 1991 census enumeration was infact the second phase of the 1991 Census Operations. The first phase namely the Houselisting Operations was held during April-May 1990. The third Economic Census sponsored by the Central Statistical Organisation, Government of India, was integrated with the Houselisting Operations. Thus, during the Houselisting Operations along with the Houselist Schedule another schedule namely, Enterprise List also was canvassed on behalf of the Central Statistical Organisation.

The data collected through the Enterprise List were processed by the Central Statistical Organisation. The data collected through the Houselist have been tabulated and the H-Series tables which present data on houses and household amenities are published in Part-VII-Tables on Houses and Household Amenities, of the 1991 Census Publication Plan.

During the 1991 Census enumeration, two schedules namely, the Household Schedule and the Individual Slip were canvassed. Besides, on behalf of the Council of Scientific and Industrial Research (C.S.I.R.) a Post-Graduate Degree Holder and Technical Personnel Schedule in the form of an inland letter addressed to C.S.I.R., also was issued by the Census Enumerator to each post-graduate and to those persons with a technical degree or technical diploma or certificate from the Industrial Training Institute (I.T.I.) with a request to fill up the Schedule and return the filled in schedule to the addressee (C.S.I.R.) by mail or to the enumerator. The data collected through this schedule in respect of these personnel were processed by that organisation. Specimen of each of these above mentioned schedules is given in Annexure-1.

Immediately after the revisional round of the census enumeration, on the basis of the abstracts prepared by the enumerators for the enumeration blocks, population totals for various levels such as the taluk/CD Block, town, city, district etc., were quickly compiled with the objective of making available the population data to the data users with the least possible delay. On the basis of these figures the provisional population figures for the country were released on March 25, 1991 by the Registrar General and Census Commissioner, India followed by the Directors of Census Operations of the States/Union Territories (UTs).

For the State of Karnakata, two publications namely, Paper 1 of 1991 - Provisional Population Totals and subsequently, Supplement to Paper 1 of 1991 - Provisional Population Totals were broughtout. The paper 1 of 1991 which was released on 8th April 1991 presented provisional figures of the population and literates by sex for the State and the Districts, and for the Cities/Urban Agglomerations having a population of one lakh and more. In the Supplement to paper 1 of 1991 provisional figures relating to

(i) population and literates by sex down to taluk and town level and

(ii) total workers, main workers and marginal workers and further distribution of main workers into Cultivators, Agricultural Labourers, workers in Household Industry and Other Workers were presented. This publication was released on 18th June 1992.

The Household Schedule and the Individual Slips filled in by the enumerators during the census enumeration were processed in the eight Regional Tabulation Offices established in the state. As in the 1981 census, the Individual Slip pads were retained intact without breaking them up and the Household Schedules were used to obtain the aggregated information about the households.

In the Regional Tabulation Offices, the Households Schedules and the Individual Slips were processed and the Primary Census Abstracts were compiled according to the procedure laid down in the "Manual for compilation of Primary Census Abstract". The procedure followed is briefly indicated below :-

The first task that was done, was to apply certain basic edit checks and match the information recorded in the Household Schedule and the Individual Slip to ensure consistency. The entries relating to Sl. no. and name, relationship to head, sex, age and marital status in the Household Schedule were verified and edited to ensure consistency. The entries against questions 1 to 5 of the Individual Slip were matched with these edited and corrected entries and were suitably corrected wherever necessary. Thereafter, entries against questions 6, 8, 9 and 10 of the Individual Slip, namely Mother tongue, Religion, whether S.C. or S.T. and Name of the Scheduled Caste/Tribe were edited and matched with the corresponding entries in the Household Schedule. If the entries in the Household Schedule were different from those in the Individual Slip, entries in the Household Schedule were corrected on the basis of the corresponding entries in the Individual Slips. The names of the Scheduled Castes (SC) and Scheduled Tribes (ST) were checked to ensure that they were in conformity with the names in the Presidential Order and the judgements of the Supreme Court or High Court with regard to the synonyms or equivalent names.

Similarly, the entries against question 11 (Literate/Illiterate) and economic questions 14 A to 15 B of the Individual Slip were edited and the Industrial category code was assigned to the main

activity of the workers in question 15 A. These edited entries in the individual Slips were matched with the corresponding entries in the Household Schedule and the entries in the latter were corrected where necessary with reference to the entries in the former. The Industrial Category Code was also copied in Column 33 of the Household Schedule where applicable from the individual Slip. Thereafter, the totals in the Household Schedule i.e., the last line which gives the aggregated information about the household were edited and firmed up. Besides, population by sex in age-group (0-6) for total population, SC population and ST population, number of SC or ST members by sex and number of males and females in various Industrial Categories based on entries in column 33 of the Household Schedule, marginal workers and non-workers were compiled in the Household Schedules for each household. The aggregated figures for the households in the Household Schedules were posted on to a Block Compilation Sheet and totals struck for the blocks. By means of Master Primary Census Abstract wherein the blockwise figures were posted against the corresponding villages or wards arranged in the order of the location codes, the figures for villages in case of rural areas and for the wards, in case of urban areas were obtained. Finally Urban/Village Primary Census Abstract which presents village-wise data for the rural areas and ward-wise data for the urban units was compiled. The Urban/Village Primary Census Abstract at the C.D. Block level is presented in Part XII-District Census Hand Book of the 1991 Census Publication Plan.

The Primary Census Abstract data at the village/ward level have also been computerised and these data are available on the NICNET for the data users. This data can also be obtained by the data users from the Office of the Registrar General, India or from the Directorates of the Census Operations of the State/UTs on floppies or in the form of computer printouts.

The State Primary Census Abstract is abstracted from the Urban/Village Primary Census Abstract and presents figures for the general population for the State, District and C.D. Block with total, rural and urban break up and for towns, cities and urban agglomerations. Similarly, separate State Primary Census Abstracts are also prepared for Scheduled Castes Population and Scheduled Tribes Population. These Primary Census Abstracts referred to above are compiled by processing the Household Schedules and Individual Slips on a full count basis.

The Part-II of the Publication Plan of the 1991 Census presents the General Population Tables which are prepared on a full count basis. The part II is published in two parts namely, Part-II A - General Population Tables - A Series and Part-II B - Primary Census Abstract.

The Part II-A which contains Tables A-1 to A-5 and their Appendices is brought out as a separate publication.

The Part-II B for convenience is brought out in two volumes. The Part II-B (I) contains the State Primary Census Abstract for the General Population. The Primary Census Abstract for the Scheduled Castes Population and Scheduled Tribes Population will be presented in a separate volume viz., Part II-B (II).

Various terms and definitions adopted in the Census and used in the Primary Census Abstract are described hereunder.

Community Development Block

For the first time in the 1991 census, the data in the Primary Census Abstract are presented for the Community Development Block (C.D. Block) instead of for the traditional revenue administrative unit viz., taluk. In Karnataka, the C.D. Blocks were converted into Taluk Panchayat Samithis under the Karnataka Zilla Parishads, Taluk Panchayat Samithis, Mandal Panchayats and Nyaya Panchayats Act, 1983 with effect from April 1st, 1987. However, in presenting the Primary Census Abstract the term C.D. Block is used instead of Taluk Panchayat Samithi for the sake of uniformity and convenience.

In Karnataka, the C.D. Blocks or the Taluk Panchayat Samithis bear the same name as that of the revenue administrative taluks concerned and their jurisdiction is co-terminous with the respective taluks, but excludes places served by local bodies such as the Municipal Corporation, Municipal Council, Sanitary Board, Notified Area Committee and Cantonment Board.

Rural and Urban Area

It has been the tradition in the census to present data by rural and urban areas. A revenue village which has definite surveyed boundaries is considered the basic unit for the rural areas. In cases of forest tracts which do not form part of any revenue village, forest beats which have recognised boundaries, also are considered as the basic unit on par with the revenue village for the purposes of Census Operations. Where a portion of a revenue village is merged with a municipality, corporation etc., or submerged under an irrigation project, the remaining portion of the revenue village falling outside the municipality etc., or not submerged under an irrigation project is reckoned as a village for the census purposes.

For Census purposes, an urban area is defined as follows :-

(a) All places with a municipality, corporation or cantonment board or notified town area :

(b) All villages/compact project areas which satisfied the following criteria :

(I) A minimum population of 5,000

(II) Atleast 75 per cent of the male main workers engaged in non-agricultural pursuits

(III) A population density of atleast 400 person per sq. km.

(c) Discretion of the Director of census operations to include places though not satisfying the above criteria but had other distinct urban characteristics and to exclude certain areas which could not be considered as urban, in consultation with the State Government.

The criteria for the urban unit adopted for the 1991 census are same as those adopted at the 1981 census.

Urban Agglomeration

The concept of Urban Agglomeration introduced at the 1971 Census to identify spatially contiguous urban areas around a city or a statutory town and to present composite data for such urban spread is adopted for the 1991 census also as was done at the 1981 census. Large railway colonies, university campuses, military camps, industrial townships etc., situated outside but adjoining the statutory limits of a city or town may not qualify to be treated as towns in their own right but as they are appendages of the city or town, forming a continuous urban spread together with the town, they are treated as outgrowths of the city or town and hence as urban. The town or city together with their outgrowths is treated as one urban unit and is called Urban Agglomeration. An Urban Agglomeration can be constituted in varying situations as indicated below :

(a) A city with continuous outgrowth (the part of outgrowth being outside the statutory limits but falling within the boundaries of the adjoining village or villages).

(b) One town with similar outgrowth or two or more adjoining towns with their outgrowths as in (a) ; or

(c) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Area in Km^2

The Area in Km^2 is furnished in column 4 of the Primary Census Abstract. The area presented against "Total" for the State and the districts are supplied by the Surveyor General, India. The figures for the urban units are either those supplied by the concerned authorities of towns or compiled and supplied by the Directorate of Survey, Settlement and Land Records in Karnataka, Government of Karnataka or compiled in the Directorate of Census Operations, Karnataka on the basis of the records available pertaining to the delimitation of urban units. The area shown against urban of the State or district or CD Block is the aggregated area of all the urban units in the State or district or CD Block as the case may be.

The area for the taluks are compiled from villagewise area figures reported by the local officers. From these, the area figures presented against the CD Blocks are derived by subtracting the area of the statutory towns. The 'Rural' area for the State or district or CD Blocks is obtained by subtracting the areas for urban from the 'Total'.

The area figures, for some of the urban units in Bangalore District, are not available. In such cases 'NA' - Not available' is indicated against the units concerned under column 4. But area figures for the Bangalore North CD Block, Bangalore South CD Block and for the Bangalore Urban Agglomeration however have been compiled by aggregating the area of all revenue villages or portions thereof forming the urban tract in the respective units.

Census Houses and Households

The definitions of the 'building', 'census house' and 'household' as adopted for the census are given below :-

Building : A building is generally a single structure on the ground. Some times it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, worksheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Census House : A 'Census House' is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc., used or recognised as a separate unit. It may be occupied or vacant. It may be used for residential or a non-residential purpose or both.

The total number of houses found to have been occupied for residential purposes during the census enumeration is given under column 5 of the Primary Census Abstract. This figure was arrived at by counting the cencus houses used for residential or partly residential purposes in the updated Abridged House List.

Household : A household is a group of persons who commonly live together and would take their meals from a common Kitchen unless the exigencies of

work prevented any of them from doing so. There may be a household of persons related by blood or a household of unrelated persons or having a mix of both. Examples of unrelated households are boarding houses, messes, hostels, residential hotels, rescue homes, jails, *ashrams* etc. These are called 'Institutional Households'. There may be one member households, two member households or multimember households. For Census purposes, each of these types is regarded as a 'Household'.

All persons in all the households living in the census houses including institutional households were enumerated between February 9,1991 and February 28, 1991. On the night of February 28, 1991 all the houseless persons such as those who were found to be residing on the road side, pavements, in the hume pipes, under the stair cases or in the open, temples, *Mandaps*, platforms and the like were enumerated.

The total number of households presented under column 6 includes the figures of institutional households and houseless households also.

Similarly, the population figures presented in columns 7, 8 and 9 and figures presented in other columns of the Primary Census Abstract include figures of Institutional and Houseless Population also.

Literate : "A person who can both read and write with understanding in any language is to be taken as literate. A person who can merely read but cannot write is not literate. it is not necessary that a person who is literate should have received any formal education or should have passed any minimum educational standard".

The test that was applied for reading was the ability to read any portion of the printed matter in the enumerator's instruction booklet (provided the person was familiar with the language used in the booklet) and the test for writing was the ability to write a simple letter. Ability to merely sign one's name was not adequate to qualify a person as being able to write with understanding. If a person claimed to be literate in some other language with which the enumerator was not acquainted, the respondent's word was taken as correct. If other members of the household testified that the person being enumerated was a literate, it was accepted.

All children of the age of 6 years or less were treated as illiterates even if the child was going to a school and had picked up reading and writing a few odd words.

In the previous censuses, the children in age-group 0-4 were considered as illiterates by definition. At the time of preparation for the 1991 census, the Department of Education in the Ministry of Human Resource Development and the Planning Commission desired that in the 1991 census, Children in age-group 0-6 should be considered as illiterates since the ability to read and write with understanding is not generally achieved specially in the rural areas, until a child attains the age of 7 or more. Accordingly, in the 1991 census, Children of the age of 6 years or less were considered as illiterates even if the child was going to school and might have picked up reading and writing a few odd words.

The population figures of those so classified as illiterates by definition on the criterion of the age of the respondent i.e., Children in age-group 0-6 are also presented in the Primary Census Abstract for the first time in the 1991 census. This is done to facilitate computation of actual literacy rates by excluding the population in age-group 0-6 from the total population.

The figures of Children in age-group 0-6 are presented under columns 10 to 12 of the Primary Census Abstract.

Scheduled Castes and Scheduled Tribes

The 'Scheduled Castes' and 'Scheduled Tribes' are those notified under Article 341 and 342 of the Constitution according to which the President may with respect to any State or Union Territory, and where it is a State after consultation with the Governor thereof, by public notificataion specify the Castes, Races or Tribes or parts of or groups within Castes, Races or Tribes which shall for the purposes of the Constitution be deemed to be the Scheduled Castes or Scheduled Tribes in relation to that State or Union Territory as the case may be. The Parliament may by law include in or exclude from the list of Scheduled Castes or Scheduled Tribes specified in a notification any Caste, Race or Tribe.

The lists of Scheduled Castes and Scheduled Tribes were notified for the first time under the Constitution (Scheduled Castes) Order, 1950 and the Constitution (Scheduled Tribes) Order, 1950. These lists have been modified or amended or supplemented from time to time. The list of Scheduled Castes and Scheduled Tribes adopted for the 1991 census are as amended under the Scheduled Castes and Scheduled Tribes Order (Amendment) Act 1976 (No. 108, dated the 18th September 1976) and Constitution (Scheduled Caste) Orders (Amendment) Bill, 1990. With the passing of the Constitution (Scheduled Caste) orders (Amendment) Bill, 1990, Scheduled Castes can belong to Hindu or Sikh or Buddhist religion and accordingly for the 1991 census returns of Scheduled Castes under these 3 religions were accepted. Earlier however, the religion of the Scheduled Castes could be one of the two religions viz., Hindu or Sikh religion. Scheduled Tribes can belong to any religion.

Printed lists of the Scheduled Castes and Scheduled Tribes were supplied to facilitate the

enumerators to ascertain and to record the name of the Scheduled Caste or Scheduled Tribe correctly, after making necessary enquiries with the respondent.

A list of the Scheduled Castes and Scheduled Tribes is given in Annexure - 2.

Economic Activity

In so far as the classification of workers into nine industrial categories is concerned, the Primary Census Abstract presented here generally follows the pattern adopted in the 1961 and 1971 censuses and the workers are classified into 9 industrial categories as indicated below :

Category	Description
I	Cultivators
II	Agricultural Labourers
III	Livestock, Forestry, Fishing, Hunting and Plantations, Orchards & Allied activities
IV	Mining and Quarrying
V(a)	Manufacturing, Processing, Servicing and Repairs in Household Industry
V(b)	Manufacturing, Processing, Servicing and Repairs in other than Household Industry
VI	Construction
VII	Trade and Commerce
VIII	Transport, Storage & Communications and
IX	Other Services

At the 1981 census, figures for categories III, IV, V(b), VI, VII, VIII and IX had not been separately given but had been clubbed and presented as Other Workers.

The information about the economic activity of the person was collected at the 1991 census through 3 questions having sub-parts contained in the Individual Slip and these questions are reproduced below.

14A Did you work any time at all last year ? — Yes / No (H/ST/D/R/B/I/O)

(Including unpaid work on farm or in family enterprise)

14B If 'Yes' in 14A, did you work for major part of last year ? — Yes (1) / No (2)

15A Main activity last year ? — 'Yes' in 14B (C/AL/HHI/OW) / ~~'No' in 14B (H/ST/D/R/B/I/O)~~

If HHI/OW in 15A

(i) Name of establishment .....
(ii) Nature of Industry, trade or service .....
(iii) Description of work .....
(iv) Class of worker.....

15B 'Yes' in 14B - Any other work any time last year? Yes (C/AL/HHI/OW)/No
'No' in 14B - Work done any time last year ? (C/AL/HHI/OW)

If HHI/OW in 15B

(i) Name of establishment .....
(ii) Nature of Industry, trade or service .....
(iii) Description of work .....
(iv) Class of worker .....

16A If 'No' in 14A, seeking / available for work ? Yes (1)/ No(2)

16B If 'Yes' in 16A, have you ever worked before ? Yes (1)/No (2)

These economic questions of the 1991 census varied only slightly as compared to those adopted at the 1981 census. The concepts and definitions relating to economic questions in general and 'Work' in particular adopted in the 1981 census were retained for the sake of comparability. In order to ensure that the economic activities of persons, especially, women and children engaged in unpaid work on farm or in family enterprise is properly netted, the instructions to census enumerators were expanded and emphasis was laid on the need to ask probing questions regarding the work done at any time at all

last year or in any of the seasons in the reference period in case of women and children. To make the scope of the question 14 A amply clear to the enumerator the words "including unpaid work on farm or in family enterprise" were incorporated in the individual Slip itself.

The question on seeking/available for work was asked in the 1991 census in respect of non-workers only whereas this question was canvassed for both non-workers and marginal workers in the 1981 census. Further, in case of those seeking/available for work, a question whether they had ever worked before was asked to ascertain the number of fresh entrants to the labour force.

The economic questions were canvassed for every person irrespective of age or sex. Every person was asked whether he/she did work any time at all last year (Qn. 14A) i.e., during the reference period of one year preceding the date of enumeration and answer to this question was filled in. On the basis of the answer obtained for this question, the other questions viz., 14B, 15A, 15B and 16 were filled in as applicable. If the person reported that he/she did not work during the reference period of one year, the person was classified as a non- worker against 14A and Qns 16A and 16B were canvassed. On the other hand if the person had worked in the last year Qns. 14B, 15A and 15B were canvassed and details of work done by the persons were collected.

Definition of work

Work was defined as participation in any economically productive activity. Such participation could be physical or mental in nature. Work involved not only actual work but also effective supervision and direction of work. It also included unpaid work on farm or in family enterprise.

Reference period

In all the questions except Qn. 16B, the reference period was the one year preceding the date of enumeration. Certain types of work such as agriculture, households industry like, *gur* making etc., are carried on either throughout the year or only during certain seasons or parts of the year, depending on the local circumstances. In such cases, the broad time span of the agricultural seasons preceding the date of enumeration was taken into consideration.

For Qn. 16B, the reference period was any time before one year preceding the date of enumeration.

Through Qn. 14A and 14B, it was sought to classify a person into one of the three main groups namely Main worker, Marginal worker and Non-worker.

Workers

Those who had participated in any economically productive activity during the reference period irrespective of the quantum of their contribution to the economy were classified as workers.

Main Workers

Main workers were those who had worked for the major part of the year preceding the date of enumeration i.e, those who were engaged in any economically productive activity for 183 days or more, or six months or more during the reference period of one year.

Marginal Workers

Those who worked any time at all in the year preceding the date of enumeration but did not work for a major part of the year i.e., those who worked for less than 183 days or six months were classified as Marginal Workers.

As it was likely that a person might have worked in different capacities or had different economic activities during the year and the time spent in performing each different spells of economic activity might not be the same and there could even be breaks in between different types of work performed, probing questions were asked to elicit correct information.

In reckoning the work done, all different types of work done by the person in different capacities or different economic activities at different periods of the year were taken into account and for determining whether a person worked for major part of the year i.e., 183 days and more, or for less than 183 days, the total aggregated period the person spent in doing the work even with breaks in between different spells of economic activities was computed, ignoring spells of inactivity, if any, in between the various activities. If the total period so computed fell short of 183 days, the person was classified as a marginal worker and on the otherhand if it was 183 days or more, the person was classified as Main Worker.

Through Qn.14A a person was classified either as a worker or non-worker after ascertaining whether a person had worked any time or had been non worker throughout. For a person who had not worked at all during the reference period, one of the seven categories of non-workers viz., H/ST/D/R/B/I/O as applicable was entered against Qn. 14A after ascertaining how he or she spent his or her time. A person who had worked during the reference period viz., a worker, was further classified as a main worker or marginal worker in Qn.14B depending on whether the person worked for 183 days or more, or for less than 183 days during the year preceding the date of enumeration. For those who worked for major part of

the year '1' was recorded against Qn. 14B and details of the main activity in Qn. 15A and of any other work done if any, in Qn. 15B were entered. For those, who worked for less than 183 days, '2' was recorded against Qn. 14B and the main activity that is, one of the seven categories of the non-workers, as applicable, was entered against Qn. 15A and details of the marginal work i.e., the economic activity performed for less than 183 days were recorded against Qn. 15B.

Special emphasis had been laid down in the instructions issued to the enumerators for classifying a person as worker or non-worker in certain cases. How the classification was made in such cases is briefly indicated below.

A person who normally worked but was absent from work during the reference period on account of illness, holiday, temporary closure, strike etc., was treated as engaged in the work he/she would otherwise have been doing but for his/her temporary absence.

Persons under training such as apprentices, with or without stipends or wages were treated as workers.

A person who had merely been offered work but had not actually joined yet, was not treated as engaged in that work.

If a person was engaged in some economic activity, but at the same time attended also to some household chores or attended school, he/she was treated basically as a worker.

A person who merely received an income, such as a rent receiver or a pensioner who did not have to work for receiving the income, was not treated as economically active unless the person was also engaged for some part of the year in some economic activity. Similarly beggars, pensioners, receivers of agricultural or non- agricultural royalty or of rents or dividends who might be earning an income but who were not participating in any productive work were not treated as working.

A person who was engaged only in household duties and did no other productive work to augment the family resources was not considered as working. If however, this person engaged himself/herself in addition to the household duties in work such as, rice pounding for sale or wages or in domestic services, for wages for others or mending cattle for wages or selling firewood or making and selling cowdung cakes or selling grass etc., or any other work including unpaid work in family enterprise or farm, the person was treated as a worker.

Production or making something by the member/s of the household solely for the domestic consumption and not for sale was not considered as work although such activity was productive according to the member/s of the household.

For an undertrial prisoner enumerated in a jail, the work he/she was doing before he/she was apprehended was recorded. But for convicts in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work was not recorded but 'I' was recorded. For census purposes, inmates of penal or charitable or mental institutions if detained for six months or more were treated as long term and 'I' was recorded for them.

A public or social service worker engaged in public service activity or a political worker engaged in furthering the political activity of his/her party was treated as worker. Such persons included members of Parliament, State Legislatures, Local Authorities, etc.

Workers, for purposes of recording the activity of the main worker in Qn. 15A, the activity of any other work done (other than one recorded against Qn. 15A, i.e. main activity) in Qn. 15B, and the activity of the marginal worker in Qn. 15B are classified into four broad Industrial Categories viz., C, AL, HHI and OW. These are briefly described below.

C : Cultivator

For the purposes of census, a person was considered as cultivator if he or she was engaged either as employer, single worker or family worker in cultivation of land owned or held from private persons or institutions for payment in money, kind or share. Cultivation included supervision or direction of cultivation.

A person who had given out his/her land to another person or persons for cultivation for money, kind or share of crop and who did not even supervise or direct cultivation of land, was not treated as cultivator. Similarly, a person working in another person's land for wages in cash or kind or a combination of both (agricultural labourer) was not treated as cultivator.

Cultivation involved ploughing, sowing and harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi etc., and other crops such as sugar cane, groundnuts, tapioca etc., and pulses, raw jute and kindred fibre crop, cotton etc., and did not include fruit growing, vegetable growing or keeping orchards or groves or working on plantations like tea, coffee, rubber, cinchona and other medicinal plantations.

AL : Agricultural Labourer

A person who worked in an another person's land merely for wages in money, kind or share and had no risk in the cultivation was regarded as an agricultural labourer. An agricultural labourer had no

right of lease or contract on land on which he/she worked.

HHI : Worker in Household Industry

Household industry was defined as an industry conducted by the head of the household himself/herself and/or by the member of the household at home or within the village in rural areas and only within the precincts of the house where the household lived in urban area. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act.

The main criterion of a Household Industry was the participation of one or more members of a household. This criterion was applied in Urban areas too. Even if the industry was not actually located at home in rural areas there is greater possibility of the members of the household participating even if it is located anywhere within the village limits. In the urban areas where organised industry takes greater prominence, the Household Industry was to be confined to the precincts of the house where the participants live. In Urban areas even if the members of the household ran an industry but at a place away from the precincts of their home, it was not considered as a Household Industry.

A Household industry was one that was engaged in production, processing, servicing, repairing or making and selling (but not merely selling) of goods. It did not include professions such as a Pleader, Doctor, Barber, Musician, Dancer, Waterman, *Dhobi*, Astrologer, etc., or merely trade or business, even if such activities were carried out at home by members of the household.

A list of few typical industries included in the instruction booklet issued to the enumerators is reproduced as Annexure-3.

OW : Other Workers

All workers i.e., those who were engaged in some economic activity other than cultivation or agricultural labour or household industry were classified as "other workers-OW". The type of workers that come under this category of 'OW' included factory workers, plantation workers, those in trade, commerce, business, transport, mining, construction, political or social work, all government servants, municipal employees, teachers, priests, entertainment artists, etc.

Non-workers

If an individual had not worked at all during the last year preceding the date of enumeration he or she was treated as a non-worker and 'NO' was recorded in Qn. 14A. For purposes of Qn. 14A, non-workers were categorised into one of the seven groups indicated below.

H : Household duties

This category covered all persons who were engaged in unpaid household duties and who did no other work or had not done any work at all during the last one year.

ST : Students

This category covered all full time students including children attending school.

D : Dependents

This category included all dependents such as infants or children not attending school or a person permanently disabled from work because of illness or old age. Even able bodied persons who could not be categorised in any other category of non-workers but were dependent on others were included in this category. However, if such persons who were dependent on others for subsistence were seeking work they were categorised as 'O' rather than 'D'.

R : Retired persons or Rentiers

A person retired from service and doing no other work, i.e. not employed again in some work or not engaged in some other work such as cultivation, business, trade etc., or a person who is a rentier or living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he/she did not have to work were covered under this category.

B : Beggars

This category covered beggars, vagrants or persons without indication of source of income and those with unspecified sources of subsistence who were not engaged in any economically productive work.

I : Inmates of Institutions

Convicts in jails or inmates of a penal, mental or charitable institutions, even if such persons performed some work such as carpentry, carpet weaving, vegetable growing etc., under compulsion in such institutions were classified under this category. But for an undertrial prisoner enumerated in jail, the work he/she was doing before he/she was apprehended was recorded. But for a long term undertrial prisoner or convict in a prison or for long term inmates of penal or charitable or mental institutions, the person's previous work was not recorded but 'I' was recorded. A person was considered as a 'long term' inmate if he or she was residing in such an institution for 6 months or more.

O : Other Non-workers

This category included all non-workers who were not covered under any of the above six categories but who were looking for work. A person who was merely spending his/her time at home as a dependent and was not doing any work and was not seeking any work was categorised as 'D' rather than 'O'. All persons irrespective of age and whether educated or not reporting that they were not engaged in any other activity but were seeking work were classified as 'O'.

Classification of Workers into Industrial Categories

In the Individual Slips, the workers were classified into 4 broad groups, viz., C, AL, HHI and OW as described in the foregoing paras. However, for purposes of preparing the Primary Census Abstract 'Workers' were required to be classified into 9 Industrial Categories already mentioned.

The categorisation of workers made by the enumerator in the Individual Slips as C, AL and HHI in Qn. 15A corresponded to Industrial Category I, II and V(a) of the Primary Census Abstract and hence required no further consideration. However, the workers, categorised as 'other workers' in Qn. 15A had to be identified with one of the other Industrial Categories. This was done in the Regional Tabulation Offices by referring to the information recorded in Qn.15A(ii). The Industrial Category Code III, IV, V(b), VI, VII, VIII or IX as the case may be so assigned was entered on the left side of the Qn. 15A in the Individual Slip and also copied in the dotted box in column 33 of the Household Schedules. On the basis of these codes copied in the Household Schedules, the number of persons assigned with different Industrial Category code by sex was compiled for each household in the Household Schedules and for each block, village or ward etc., following the procedure indicated earlier using Block Compilation Sheet, Master Primary Census Abstract etc.

To facilitate the assignment of the Industrial Category other than Cultivation and Agricultural Labour for the description available in Qn. 15A (ii) of the Individual Slip, a list of activities associated with each of the Industrial Categories III to IX had been included in the Manual for Compilation of Primary Census Abstract. This list is reproduced as Annexure-4.

In the 1981 census, though in the Primary Census Abstract, main workers were classified into only 4 groups as stated earlier, in the General Economic Tables, the workers were classified into 9 Industrial Categories. The classification of economic activities made under the 9 broad Industrial Categories has generally remained the same for the 1991 census as in 1981 but for one significant change which should be noted.

The workers in tailoring establishments earlier were categorised either as working in Household Industry V(a) or other than Household Industry V(b) under Manufacturing, Processing, Servicing and Repairs - Category (V). However, in the 1991 Census, in consonance with the National Industrial Classification (NIC), 1987 wherein the tailoring establishments are brought under Personal Services and only the manufacture of textile garments and clothing accessories has been retained under 'Manufacturing', the workers in tailoring establishments were assigned to Other Services i.e., Industrial Category IX.

Earlier, 'Repair Services' were covered under "Manufacturing and Repair" of the National Industrial Classification, 1970 adopted for the 1971 and 1981 censuses. In the National Industrial classification, 1987 all 'Repair Services' except 'Repair of capital goods' have been shifted to a different section dealing with "Community, Social and Personal Services". In this case however it was decided that though the NIC codes that would be assigned to the activities relate to Services, for comparability with the previous censuses, these activities would be assigned Industrial Category V. Accordingly, the Repair Services were assigned Industrial Category V (viz., V(a) or V(b) as the case may be) as in the 1981 census.

In the instructions issued to the enumeration personnel for the canvassing of Household Schedule and Individual Slip, tailoring was covered under Manufacturing, Processing, Servicing and Repairs i.e., Industrial Category V and accordingly this activity had been classified as either 'HHI' or 'OW' by the enumerators depending on whether it was run on a household industry basis or otherwise. In accordance with the decision taken referred to above all returns relating to tailoring activity irrespective of the classification made by the enumerator - either as 'HHI' or 'OW' - in the Individual Slip were reclassified as Category 'IX' - 'Other Services' in the Regional Tabulation Offices at the time of processing the data for the Primary Census Abstract. However activities relating to 'Manufacture of textile garments and clothing accessories' which the enumerator had classified as OW according to the instructions given, were classified as V(b) viz., Manufacturing, Processing, Servicing and Repairs - Other than HHI, as this particular activity continued to be covered under manufacturing.

Publication of final figures of 1991 Census

After the finalisation and computerisation of the Primary Census Abstract, the Registrar General & Census Commissioner, India, released the final population figures of the 1991 Census through publications indicated below :

1. Series I India - Paper-1 of 1992 Final Population Totals

2. Series I India - Paper-2 of 1992 Final Population Totals

Brief analysis of Primary Census Abstract

First of these two publications namely Paper-1 of 1992 presented figures for Total Population, Total Scheduled Castes Population and Total Scheduled Tribes Population for the Country and States/UTs down to C.D. Block and town level.

A brochure namely, Final Population Totals, Scheduled Castes and Scheduled Tribes which gave final figures for the total population, Scheduled Castes and Scheduled Tribes Population for the State of Karnataka was released by this Directorate on 20th January 1993. The Paper-2 of 1992 released by the Registrar General and Census Commissioner, India, presented the Primary Census Abstract figures with a brief analysis. For Karnataka no such paper was brought out. This publication whch gives the Primary Census Abstract for General Population and also incorporates a brief analysis of the figures presented is brought out as part of the Publication Plan of the 1991 Census.

For the benefit of the data user, the Primary Census Abstract for General Population for the Country and the States/UTs with Total, Rural and Urban break-up is also reproduced in this volume.

IMPORTANT: Please return this form to the enumerator duly filled in, failing which post it.

INSTRUCTIONS

Following code numbers have to be mentioned under employment details in Item No. 10 and 11 for nature of activity of the organisations, nature of work and sector of employment.

A. Nature of activity of the organisation
[Enter the code number in Column No. 5 of Items 10 and in Item 11 (iv)]

Code No.	*Nature of activity of the organisation*
1.	Agriculture, Forestry & Fishing
2.	Mining & Quarrying
3.	Manufacturing, Processing including plant maintenance
4.	Generation & Distribution of electricity, gas and water
5.	Construction
6.	Wholesale & Retail trade including restaurent and hotels
7.	Transport, Storage and Communication Organisations
8.	Banking, Insurance and similar financial institutions
9.	Real Estates & Legal Services
10.	Public Administration
11.	Education (Universities & Colleges)
12.	Education (Polytechnic & ITI)
13.	Education (Schools)
14.	Research & Development
15.	Medical & Health Services
16.	Community, Social & Personnel Services including Repair Services
17.	All other activities not covered above (Please specify,

B. Nature of Your Work
[Enter the code number in Column No. 7 of Item 10 and Item 11 (v)]

Code No.	*Nature of work*
1.	Teaching
2.	Teaching cum Research
3.	Research
4.	Professional work related to field of your education, for example: Engineers, Medical Doctors, Lawyers, Economists, etc.
5.	Design & Development/Testing/Quality Control
6.	Repair & Maintenance
7.	Administration/Management
8.	Clerical/Secretarial/Accounting
9.	Participating directly in production/processing work
10.	Engaged in activities related to agriculture/animal husbandry
11.	Providing Community/Social/Personnel Services
12.	Others (Please specify)

C. Sector of Employment
[Enter the code number in Column No. 6 of Item 10]

Code No.	*Sector of employment*
1.	Central Government
2.	State Government
3.	Public Sector Undertaking (Central)
4.	Public Sector Undertaking (State)
5.	Local Bodies e.g. Municipal Corporation
6.	Private Sector
7.	Autonomous bodies (e.g. Universities, ICAR, CSIR, ICSSR)
8.	Cooperative & Joint Sector

ANNEXURE -3

LIST OF A FEW TYPICAL INDUSTRIES THAT CAN BE CONDUCTED ON A HOUSEHOLD INDUSTRY BASIS

Foodstuffs

Production of flour by village chakkis or flour mills ; milling or dehusking of paddy; grinding of chillies, turmeric, etc.; production of gur, khandsari, boora, etc.; production of pickles, chutney, jams etc.; processing of cashewnuts; making of dried vegetables; manufacture of sweet-meats and bakery products; production of butter, ghee, etc.; slaughtering and preservation of meat and fish; fish curing; etc.; oil pressing ghani.

Beverages

Manufacture of country liquor, toddy; production of soda-water, ice, ice-cream, sharbats, etc.; processing of coffee, etc.

Tobacco Products

Manufacture of bidi, cigars, cherroots, tobacco, snuff, etc.

Textile Cotton

Cotton ginning, carding, pressing and baling, spinning, etc.; dyeing and bleaching of cloth; weaving in handlooms or powerlooms or manufacture of khadi; cloth printing; making of fishing nets, mosquito nets, cotton thread, rope, twine, etc.

Textile Jute, Wool or Silk

Similar type of production or processing as mentioned under Textile Cotton but pertaining to the material concerned.

Textile Miscellaneous

Making of durries, carpets, hosiery, embroidery work; lace garland making; manufacture of chrochet headgear; making of newar, bed covers, (curtains, pillow, pillow cases etc.); making of mattress, quilt, (rezai), etc.; making of namda felt, coconut fibre for upholstery, making of brushes, brooms, etc., from coconut fibres; coir spinning; manufacture and repair of umbrellas; manufacture of dolls and toys (rags and cotton), etc.

Manufacture of Wood and Wood Products

Sawing and planing of wood, manufacture of wooden furniture, structural goods like beams, door and window frames, etc., wooden agricultural implements and their repair, wooden lacquerware, wooden toys, wood carving, sawdust and plaster figure making, inlay work; match splinters, plywood and veneers, etc.; making palm leaf mats, fans, umbrellas, etc.; baskets and broomsticks, caning of chairs; making of chicks and khas khas tatties; making of cart wheels, wooden sandals, etc.

Paper and Paper Products

Manufacture of pulp and paper by hand; making of envelopes, paper made articles, card board boxes, paper flower, paper kites, toys, etc.

Printing and Publishing

Printing works, lithography, block-making, book binding, etc.

Leather and Leather Products

Flaying and processing of hides and skins; making leather footwear, wearing apparel of leather and fur; repair of shoes or other leather products.

Rubber, Petroleum and Coal Products

Vulcanising tyres and tubes; manufacture of chappals from torn tyres and other rubber footwear; manufacture of rubber products from natural and synthetic rubber.

Chemicals and Chemical Products

Manufacture of toys, paints, colours, etc., manufacture of matches, fireworks, perfumes, cosmetics; manufacture of ayurvedic medicines, soap, plastic products, celluloid goods; manufacture of ink, candles, boot polish, etc.

Non-Metallic Mineral Products - other than Petroleum and Coal

Making of bricks, roofing tiles, sanitary fittings, cement statues, stone or marble carvings, manufacture of stone structurals, stone dressing and stone crushing, mica splitting and manufacture of other mica products; making of earthenware and pottery, crockery, glass beads and bangles, earthen toys; manufacture of glass products, etc.

Basic Metals and their Products except Machinery and Transport Equipment

Manufacture of iron arms and weapons and their service and repair, iron and steel furniture, brass, bell-metal utensils, aluminium utensils, tin utensils, copper utensils, etc.; nickeling and electroplating, blacksmithy, manufacture and repair of agricultural implements such as plough-share, etc,; making and repairing of locks and trunks; cutlery; manufacture of scales, weights and measures and foundry industry etc.

Machinery (all kinds other than transport) and Electrical Equipment

Manufacture of small machine tools and parts ; repairing and servicing of fans, radios, domestic electrical appliances, etc.

Transport Equipment

Repairing and servicing of automobiles; manufacture of cycle parts, rickshaw parts, boats and barges; manufacture of animal- drawn and hand-drawn vehicles such as bullock carts, wheel barrow, etc.

Miscellaneous Manufacturing Industries

Repair of spectacles, photographic equipment; goldsmithy, silver filigree industry; gold covering work, bidriware, repair of musical instruments, fountain pens; making of cowdung cakes, manufacture of sports goods; repairing of petromax lights; making of buttons and beads from conchshell and horn goods.

ANNEXURE-4

Guidelines for assigning industrial category

INDUSTRIAL CATEGORIES OTHER THAN CULTIVATORS AND AGRICULTURAL LABOURERS

III LIVESTOCK, FORESTRY, FISHING, HUNTING, PLANTATIONS, ORCHARDS AND ALLIED ACTIVITIES

Plantations

Growing of roots, tubers, vegetables, singharas, chillies and spices (other than pepper, cardamom).

Floriculture and Horticulture including tree nurseries.

Fodder Crops and agriculture product n.e.c.

Plantation of tea, coffee, rubber, tobacco, pepper, cardamom, coconut, arecanut, edible nut (excluding groundnut).

Fruits, ganja, cinchona, opium and plantations not elsewhere classified.

Livestock

Cattle breeding & rearing of goats, sheep, horse, camel, mule, pig, duck, hens, bees, silk worms and birds.

Collection of honey, production of milk, wool, eggs, cocoons and raw silk.

Agriculture Services

Destroying of pest & insects

Irrigation services

Grading of agricultural products or livestock

Soil conservation services

Harvesting and thrashing and agriculture services.

Forestry

Cutting of trees, production of firewood, fuelwood, charcoal, gathering of gums, resins, lac, barks, herbs etc.

Forestry services n.e.c.

Fishing & collection of sea products

Hunting

IV MINING AND QUARRYING

Mining of Coal, lignite, iron ore, copper etc. Extraction of petroleum, natural gas etc. and mining services.

V(b) MANUFACTURING, PROCESSING, SERVICING AND REPAIRS

Manufacture of bakery products, sugar products, salt, oil, blending of tea, preparation of meat, beverages, etc. cotton, jute, wool, silk, leather & man made fibre textiles, wood and wood products, paper and its products, printing & publishing, leather and leather products, fur, chemical products, rubber, plastic, petroleum and coal products, non-metallic mineral products, basic metal and alloys industries, machinery and equipment, transport equipment and parts, repair of capital goods such as ships/boats, aircrafts, agricultural equipment, machine tools, industrial machine tools, electrical industrial machine and apparatus, locomotives and other rail/road equipment. Repair services such as repair of footwear, leather goods, household electrical appliances, T.V., V.C.R., radio, refrigerator, watches, clocks, jewellery, motor vehicles, motor cycles, trucks, lorry, bicycles and cycle rickshaws.

VI CONSTRUCTIONS

Constructions and maintenance of buildings, roads, railways, bridges, pipelines and runways etc. Maintenance of power, telecommunications and transmission lines, waterways, canals, tanks, wells etc.

Heating and air conditioning and sound proofing, timber works, painting and decorating work for constructions.

VII TRADE AND COMMERCE

Wholesale and retail trades and restaurants and hotels.

Financing insurance, real estate and business services.

VIII TRANSPORT, STORAGE AND COMMUNICATIONS

Land transport, water transport and air transport, services incidental to transport, storage and warehousing services, communication services.

IX OTHER SERVICES

Electricity, gas and water services, community, social and personal services. Activities not adequately defined.

A BRIEF ANALYSIS

The Primary Census Abstract presented here is supplemented with a few statements and brief notes on each of these statements, which seek to highlight the salient features of the 1991 census population data.

It may be noted that at the 1981 census there were 19 districts in the State whereas there are 20 at the 1991 census, as one new district, namely, Bangalore Rural district was carved out of the erstwhile Bangalore district after the 1981 census. In the statements prepared on literacy, workers etc., data for these two districts for the 1981 census have not been given separately as figures adjusted for the changed jurisdiction could not be compiled.

Houses and Households

Statement - 1 presents the number of households per 1000 census houses and the number of households per Km^2 for the State and district by residence. As will be seen from this statement, there are on an average 1023 households for 1000 census houses in the State as a whole indicating a certain degree of congestion in the housing amenities available. The degree of congestion appears to be slighlty more in rural areas than in the urban areas of the State as a whole. This index varies considerably among the districts. In the districts of Belgaum, Dharwad, Mandya, Mysore and Uttara Kannada this index is higher than the State average. This is true in case of rural areas also.

In the urban areas, the position is only slightly different. While in Bangalore district this index is 1006, it is equal to State average in Bangalore Rural District and Dakshina Kannada district and higher than the State average in the districts of Belgaum, Bidar, Chikmagalur, Chitradurga, Dharwad, Mandya and Uttara Kannada.

The average number of households per Square Kilometer (Sq. Km) for the State as a whole is 42 as will be seen from Statement-1. The highest number of households per Sq. Km. among the districts is registered by the Bangalore District with 441 households per Sq. Km. which is several times higher than that in Mandya district which ranks 2nd with 62 households per Sq.Km. The presence of Bangalore Urban Agglomeration, the 6th most populous city in the Country and consequent high proportion of urban population accounting for over 85 per cent of the population of the district and very high urban density has contributed for this phenomenon. Incidentally Bangalore district is the smallest district in the State in terms of area. The districts which have higher density than the State average besides Bangalore and Mandya are Dakshina Kannada, Bangalore Rural, Mysore, Kolar, Belgaum, Hassan and Dharwad. The lowest number of households per Sq.Km. is accounted for by the Uttara Kannada district.

The number of households per Sq.Km. in the urban areas is many times more than that in rural areas in the State as a whole as well as in all the districts. The number of households in the urban areas is significantly high being 607 as against 30 in rural areas of the State. Among the districts, while in the rural areas the number of households per Sq. Km. varies from a mere 17 in the district of Uttara Kannada, which has large tracts of land under forest, to 75 in Bangalore, in urban areas it varies from 248 in Bellary to 1829 in Bangalore.

Districts by Population size

Statement-2 shows the ranks assigned to the districts arranged in the descending order of their total population at the 1981and 1991 censuses.

It will be seen from the statement that the distrits generally have the same rankings at both the censuses. The exceptions to this are the districts of Raichur, Tumkur, Kolar, Bidar and Uttara Kannada. Raichur district which ranked 10th in population size among the districts accounting for 4.80 per cent of the total population of the State in 1981 has moved upto the 8th rank. The districts of Tumkur and Kolar which were more populous than Raichur now occupy respectively, 9th and 10th ranks. It may be mentioned here that the district of Raichur has recorded a high increase in its population with the second highest growth rate (29.49 per cent) during the decade 1981-91 among the districts. Similarly Bidar district which also has recorded a higher decadal growth has moved from 18th rank in 1981 to 17th rank in 1991.

Density of Population

The density of population in the State as a whole as will be seen from Statement-3 has increased from 194 in 1981 to 235 in 1991 registering an increase of 41 persons per Sq.Km. As in 1981 census, the Bangalore district accounts for the highest density amongst the districts in 1991 also. It has recorded an increase of 614 persons per Sq. Km. in its density between 1981 and 1991. Bangalore is a highly industrialised district and 86 per cent of its population resides in urban areas owing to the presence of the 6th most populous urban centre in the Country viz., Bangalore Urban Agglomeration (UA). Bangalore UA is the seat of the Government besides being an educational and industrial centre. These factors have contributed for a higher growth of population and a higher density in Bangalore district. Kodagu and Uttara Kannada districts have the lowest density per Sq.Km. of (119) preceded by Chikmagalur. The main reason for the low density in Uttara Kannada district is its forest cover extending to about 80 per cent of its total geographical area. Chikmagalur and Kodagu have large tracts of lands under coffee, cardamom etc., plantations and forests. The forest, agriculture and plantation oriented economy of these districts also has resulted in a sparse distribution of population.

Though there is considerable variation among the districts in the net increase in the population density ranging from just 6 in Kodagu to 614 in Bangalore district the relative position of the districts with regard to the density of population at the 1981 and 1991 censuses have generally remained unaltered except in the cases of Bidar,

Hassan, Tumkur, Bellary, Shimoga, Raichur and Gulbarga districts. The high population growth recorded during 1981-91 in Bidar, Bellary and Raichur is reflected in the higher density rankings as compared to 1981.

Sex Ratio

The sex ratio computed as the number of females per 1000 males, as will be seen from Statement-4, has been adverse to females in the State as a whole in all the censuses since 1901. This is so in all the districts except Dakshina Kannada, Hassan, Mandya and Mysore.

In fact the figures reveal that in the State as a whole, the sex ratio has shown a continuous decline, favouring males in all the censuses but for a slight upward movement at the 1951 and 1981 censuses.

The coastal district of Dakshina Kannada is unique in that, it is the only district in the State where the sex ratio favoured females all along. In other words, the females out numbered males in all the censuses since 1901. The districts of Hassan, Mandya and Mysore too had sex ratios favouring females in the beginning of the century that is, in the censuses of 1901 and 1911. However, in the census of 1921 and thereafter predominance of males is seen in the population of these districts.

At the 1991 census, the highest sex ratio (1063) is recorded in Dakshina Kannada district which is followed by Hassan district, the sex ratio of which is almost balanced. The lowest sex ratio is recorded by the highly urbanised district of Bangalore.

The sex ratio in 1991 has remained at the same level as at the 1981 census in the district of Chitradurga whereas it has declined in varying degrees in the contiguous tracts comprising the districts of Bellary, Dharwad, Belgaum, Bijapur, Bidar, Gulbarga and Raichur in the northern part of the State and in Tumkur, Bangalore Rural and Kolar in the southern part of the State.

Literacy

As already explained at the 1991 census, children in age-group 0-6 were treated as illiterates. In the earlier censuses children in age-group 0-4 were treated as illiterates. Further, since the distribution of population by age, in particular, the number of persons in age-group 0-4 was not available till the detailed tabulations were completed, the practice was to compute the literacy rate as a percentage of literates to total population. The total population which was taken as the denominator included the population in age-group 0-4 which was not represented in the numerator, the number of literates. This procedure tended to depress the literacy rates. At the 1991 census however since the figures relating to population in 0-6 is compiled and made available in the Primary Census Abstract itself, actual literacy rates have been worked out. In comparing the literacy rates of the earlier censuses with those of the 1991 census these aspects should be kept in view.

Statement-5 presents the literacy rates as also the rank in literacy for the Country and the States/Union Territories (UTs) for the 1981 and 1991 censuses.

As will be seen from this statement, the Karnataka State enjoys a higher literacy rate of 56.04 per cent at the 1991 census as compared to the overall literacy rate of 52.19 per cent of the Country. At the 1981 census also the literacy rate in Karnataka was higher than that of the Country as a whole. But, Karnataka among the 23 States and 7 UTs shown in the statement, ranks 20th, a relatively lower rank in this aspect at the 1991 census. In fact the State has slipped from the 19th rank that it held in 1981 to 20th rank in 1991.

While 8 States and one UT in the Country have improved their literacy ranking at the 1991 census as compared to 1981, 7 States and 3 UTs have retained their 1981 positions. Karnataka is one among the 8 States and 3 UTs which have suffered a low ranking at the 1991 census as compared to that in 1981 census.

Statement-6 presents some interesting facts about the growth of literacy, difference in male and female literacy, difference in rural and urban literacy etc., for the State.

At the 1981 census, it was only in the urban areas of the State, the number of literates both among males and females exceeded the number of illiterates and in the rural population however, only the number of male literates exceeded the number of male illiterates, highlighting the fact that among the rural women a majority still remained illiterates. At the 1991 census too the situation is not entirely different, though the literacy rates in both rural and urban areas and for both sexes have considerably improved. A close look at the literacy rates reveals that it is the rural population which has shown a higher increase in literacy rates - a clear increase of 10 points over the literacy rate of 37.63 per cent in 1981 as against an increase of 7 points over the literacy rate of 66.91 per cent in the urban population in 1981. Statement-6.1 will bring these aspects into focus more clearly.

Another significant feature is that as compared to males, females appear to have fared better during the decade 1981-91 as is witnessed by higher differences in the literacy rates of 1981 and 1991 censuses (cols. 3 and 4 of Statement-6.1).

It will be seen from Statement-6.2 that the male-female difference in literacy rate has declined during 1981-91 and that the decline is more in the urban population than in the rural population. A look at the urban-rural differences in literates reveals that the urban-rural gap has tended to be narrowed down more rapidly among males rather than among females. These suggest that rural areas are still lagging behind in so far as the progress in female literacy is concerned.

A further study of Statement-6 reveals that there are no significant differences in the sex ratios in 1981 and 1991 and the decadal growth rates of the total population and population aged 7 years or more between 1981-91.

However, in case of literate population aged 7 years and above, illiterates aged 7 years and above, significant variation in the growth rates and in sex ratios between 1981-91 can be observed. The growth rates of the literates aged 7 years and above for both the sexes in both rural and urban areas indicate a definite addition to the literate population during the decade 1981-91. The higher growth rates of the female literates as compared to those of male literates and increase in sex ratios in the literate population aged 7 years and above highlights the positive aspects of the progress made in the field of female literacy during the decade.

While growth rate of male literates is almost of the same order in the total, rural and urban areas viz., 41.78 per cent, 41.68 per cent and 41.94 per cent respectively, among females it is 65.44 per cent, 74.67 per cent and 55.71 per cent respectively, indicating a higher growth among female literates. However, it should be noted that though the growth rates are impressive, in absolute terms, the net addition to female literates during the decade is considerably less as compared to the net addition to male literates. This is further confirmed by the growth rates and sex ratios of illiterates aged 7 years and above.

The growth rates for female illiterates are higher in both rural and urban areas as compared to those of male illiterates. Even the absolute figures reveal that net addition of illiterates comparatively is more to female population than to the male population.

The sex ratio at the 1991 census are also high as compared to those in 1981 in case of illiterates. This indicates that the trend of increasing illiterates among females is not yet arrested and that achieveing the goal of male-female parity in the matter of literacy is still a far cry.

Statement-7 presents the figures for total population, literates aged 7 years or more and literacy rate for 1981 census for the total areas of the State and districts for the jurisdiction as existed at the 1981 census. Statement-8 presents similar data for the 1991 census as also data for rural and urban areas.

The literacy rate for the persons, males and females at the 1981 census were 46.21 per cent, 58.73 per cent and 33.17 per cent respectively and the corresponding rates for the 1991 census are 56.04 per cent, 67.26 per cent and 44.34 per cent respectively. Though the net increase in between 1981-1991 is higher in case of females, still more than half the females aged 7 years or more are illiterates as will be observed from Statement-8.

At the 1981 census in the total population aged 7 years or more illiterates exceeded the literates in 12 out of the 19 districts. While in case of males, illiterates exceeded the literates in 5 districts, in case of females in as many as 17 districts illiterates exceeded the literates.

The 1991 census data however reveals that the number of districts where illiterates exceed the literates has come down to 6. These 6 districts in which the majority of its population is still illiterates are the contiguous districts of Bidar, Gulbarga, Raichur and Bellary in the northern part and Mandya and Mysore in the southern part of the State.

It is only in one district viz., Raichur district that; illiterates exceed literates in the male population aged 7 years or more in 1991 census. On the other hand in so far as females are concerned the number of districts where illiterates exceed literates or in other words where the literacy rate is less than 50 per cent is as high as 14. The remaining 6 districts which have female literacy rates exceeding 50 per cent are Bangalore and the contiguous districts of Uttara Kannada, Dakshina Kannada, Shimoga, Chikmagalur and Kodagu. These facts highlight the degree of backwardness of the districts and the spatial disparity that exists in the matter of literacy in the male and female populations in the districts of the State.

Literacy rates, as will be seen from Statement-8, are generally higher in the urban areas than in the rural areas of the State as a whole and the districts as well. Further, in the urban areas of the State and districts generally, the literacy rate for persons, males and females is more than 50 per cent i.e., the number of literates aged 7 years or more exceed the number of illiterates in the corresponding ages. The notable exceptions however to this are Bellary and Raichur districts, where illiterates exceed literates among the females.

Although the literacy rates are higher in urban areas, a large majority of the literates reside in the rural areas both among males and females. This is true in case of all the districts except Bangalore and Mysore. In Bangalore, the district where over 86 per cent of its population reside in urban areas, for obvious reasons, the number of literates of both the sexes found in urban areas is several times more than that in rural areas. In Mysore district, number of female literates in the urban population is slightly higher than that in the rural population.

In the rural population of the State, as will be seen from Statement-8, illiterates constitute the majority, as 47.69 per cent only are literates in the population aged 7 years or more. Among the districts, in half the number of districts i.e., in only 10 out of the total of 20, the literates are in majority i.e. literacy rate is 50 per cent or more. Two distinct regions formed by the contiguous districts of Bidar, Gulbarga, Raichur, Bellary and Chitradurga and the contiguous districts of Bangalore Rural, Kolar, Mandya and Mysore in the southern part of the State can be visualised as the main low rural literacy areas in the State.

The disparity in rural literacy rates of the districts is more pronounced than in the case of the urban literacy rates. Dakshina Kannada district has the highest literacy rate of 72.37 per cent while the Gulbarga district has the lowest literacy rate of 30.36 per cent in their respective rural population. The gap thus, in the literacy rates of these two districts is 42.01 percentage points, whereas, in the case of urban population similar gap is just 28.13 percentage points derived as the difference between the highest literacy rate of 84.51 per cent obtained in Dakshina Kannada and lowest literacy rate of 56.38 per cent obtained in Raichur district.

Steep differences can also be observed in male and female literacy rates. Though literacy rates in the rural male population of the districts vary from 44.26 per cent in Raichur district of 81.65 per cent in Dakshina Kannada, there are only three districts which have a literacy rate below 50 per cent. On the other hand among rural females the literacy rates vary from a mere 16.06 per cent in Gulbarga district to 64 per cent in Dakshina Kannada district and the literacy rate is less than 50 per cent in as many as 17 districts. Obviously, this is a pointer to the lack of efforts to achieve uniform progress in the spread of literacy in various districts and as also among the two sexes.

From Statement-9 it will be seen that Dakshina Kannada district which ranked first among the districts in the literacy rates in 1981 has yielded that place to Bangalore district. It may be recalled that Bangalore district of 1981 census was bifurcated into Bangalore district and Bangalore Rural district after the 1981 census. The present Bangalore district has claimed the first rank and the highest literacy rate of 76.27 per cent owing to its very high urban residence of 86 per cent in its population and various other factors.

The districts which have retained their respective 1981 ranks are Kodagu, Uttara Kannada, Shimoga, Chikmagalur and Dharwad. Bidar, Gulbarga and Raichur are the last three districts which account for the last three literacy ranking in 1991 also as they did in 1981. The first three ranked districts of the 1981 census, namely Dakshina Kannada, Bangalore and Kodagu have kept up the top three rankings at the 1991 Census also albeit with an interchanging ranks between Bangalore and Dakshina Kannada districts.

In the 1981 census the difference in the literacy rates of the first and last ranking districts viz., Dakshina Kannada (63.11%) and Raichur (30.13%) was 32.98 percentage points. In the 1991 census similar difference between the literacy rates between first ranking and the last ranking districts viz., Bangalore (76.27%) and Raichur (35.96%) is 40.31 percentage points. This only goes to show that the disparity in the literacy rates has only widened among the districts during 1981-91.

Further, the percentage increase in the literacy rates during the decade 1981-91 is not uniform among the districts. While the percentage increase at the State level is 21.27, among the districts excluding Bangalore and Bangalore Rural districts, only 9 districts have registered increases higher than this. These 9 districts are Hassan, Bijapur, Tumkur, Kolar, Mandya, Mysore, Bellary, Bidar and Gulbarga. Among these Bijapur has registered the highest increase of 40.85% which has enabled it to move from 13th rank in 1981 to 10th rank in 1991. The lowest percentage increase is recorded by Dharwad the 7th ranked district, preceded by 4th ranked Uttara Kannada district.

Scheduled Castes and Scheduled Tribes

In the total population of 44,977,201 in the State, 7,369,279 persons are Scheduled Castes and 1,915,691 persons are Scheduled Tribes. A reference to Statement-10 reveals that the Scheduled Castes population and the Scheduled Tribes population constitute 16.38 per cent and 4.26 per cent of the total population of the State. The proportion of the population of Scheduled Castes in the total population is higher than the State average of 16.38 per cent in 13 districts of the State. However, in case of Scheduled Tribes, only seven districts have a proportion of population of Scheduled Tribes higher than the State average of 4.26 per cent.

A predominance of rural residence is observed among Scheduled Castes and also among Scheduled Tribes. This is so in case of all the districts except Bangalore district, where a very high proportion of its population i.e., about 86 per cent reside in urban areas. This is true in case of Scheduled Tribes also.

The Scheduled Castes account for 18.17 per cent of the rural population of the State and 12.40 per cent of the urban population of the State revealing a lesser concentration of Scheduled Castes population in urban areas as compared to the rural areas. In case of Scheduled Tribes population also, a higher concentration is observed in rural areas (5.24%) than in the urban areas (2.06%). Among the districts also generally same pattern prevails with the sole exception of Uttara Kannada in case of Scheduled Castes and Mandya in case of Scheduled Tribes. The proportion of Scheduled Castes in the urban population is higher than that in the rural population in the district of Uttara Kannada. Similarly, in Mandya district the proportion of Scheduled Tribes in the urban population is more than that in the rural population. However, in terms of numbers, Scheduled Castes or Scheduled Tribes, as the case may be, residing in rural areas in these districts clearly exceed those in the urban areas.

Of the total Scheduled Castes population of 7,369,279 in the State 711,775 persons or 9.66 per cent are enumerated in Bangalore, the most populous district in the State which account for over 10 per cent of the population of the State. The other districts which contribute sizeable Scheduled Castes population to the total Scheduled Castes population of the State are Gulbarga (8.29%), Mysore (8.11%), Kolar (7.74%) and Bijapur (6.92%). A reference to Statement-2 would reveal that in so far as the total population is concerned each of these districts however accounts for a lesser percentage share in the total population of the State as compared to the percentage share of the total Scheduled Castes population.

The Scheduled Castes population in Kodagu constitutes a mere 0.80 per cent of the Scheduled Castes population of the State, which is less than its share of the State's total population (1.09%) as may be seen from Statement-2.

Turning to the districtwise distribution of the Scheduled Castes population residing in the rural areas it may be observed that the percentage share of the districts vary from 0.91 per cent in Kodagu district to 8.90 per cent in Gulbarga district. The districts of Gulbarga, Mysore, Kolar, Bijapur and Tumkur account for considerably higher share of the rural Scheduled Castes population of the State as compared to other districts. It is in the districtwise

percentage share of the urban Scheduled Castes population a steep variation is noticed. The percentage share of the districts vary from 0.44 per cent in Kodagu to 30.93 per cent in Bangalore. Besides Bangalore, the other districts which have a share of the urban Scheduled Castes population exceeding 5 per cent are Bijapur (5.14%), Dharwad (6.95%), Gulbarga (6.28%), Kolar (6.66%) and Mysore (6.82%). It may be recalled that the districts of Gulbarga, Kolar, Mysore and Bijapur account for a higher share of the State's Scheduled Castes population residing in rural areas also.

It is seen that the distribution of Scheduled Tribes population also is not uniform among the districts. The district of Chitradurga accounts for over 16 per cent of the Scheduled Tribes population of the State, whereas Uttara Kannada accounts for a mere 0.53 per cent. In fact nearly 80 per cent of the Scheduled Tribes population of 1,915,691 in the State is accounted for by only half of the total number of the districts. Each of these 10 districts share over 5 per cent of the Scheduled Tribes population of the State. As 85 per cent of the Scheduled Tribes population of the State resides in rural areas, the percentage distribution of the Scheduled Tribes population is generally similar in the total and rural areas among the districts.

In so far as the urban residence is concerned the percentage of Scheduled Tribes population of the districts to the Scheduled Tribe population of the State varies from 0.38 per cent in Uttara Kannada to 15.04 per cent in Chitradurga, the districts which account for the lowest and highest shares respectively in the total and rural residences also. However, there are only 8 districts which account for over 5 per cent of the Scheduled Tribes. It will be observed from Statement-10 that besides Chitradurga there are only two districts viz., Bangalore (13.65%) and Bellary (13.01%) which show a higher share exceeding 10 per cent of the State's Scheduled Tribes population residing in urban areas.

Workers and Non-workers

The definitions of workers, main workers and marginal workers and non-workers and the description of Industrial Categories have been given earlier.

Statement-11 gives the number of main workers in each industrial category, the total number of marginal workers and non-workers in the population of the State for the 1981 and 1991 censuses.

In the PCA of the 1981 census it may be recalled that figures for industrial categories III, IV, V(b), VI, VII, VIII and IX had not been presented separately. Therefore the industrial categorywise figures for the 1981 census have been culled out from "Table B 3 : Main workers classified by Industrial Category, Age and Sex" of 1981 census which was prepared on the basis of a 20 percent sample of the enumeration blocks.

In the total population of 44,977,201 persons in the State, 17,292,117 persons are main workers 15,994,681 persons are marginal workers and 26,090,403 persons are non-workers according to 1991 census. As will be seen from Statement-11 among the total main workers and in all the industrial categories, male workers clearly outnumber female workers. The difference between the number of male workers and female workers is the least in industrial category II : Agricultural labourers. The Sex ratio among agricultural labourers which is 990 actually is much higher than the sex ratio in the total population (960), an indication of higher participation of females in this activity. The participation of females in activities such as Transport, Storage and Communication (VIII), Construction (VI), Trade and Commerce (VII) etc., as compared to males is very low as is evident from the very low sex ratios. However, female marginal workers outnumber male marginal workers by several times.

As compared to the decadal growth rate of 21.12 per cent in the total population, the main workers, marginal workers and total workers (main workers + marginal workers) have recorded comparatively higher growth rates of 26.68 per cent, 23.30 per cent and 26.39 per cent respectively. A perusal of the corresponding growth rates for the males and females would reveal that the percentage decadal increase is substantially high in case of females as compared to males. In fact the growth rate in respect of male marginal workers is negative (-2.33%) as there is a slight decrease in the number of male marginal workers in 1991 as compared to 1981.

As mentioned earlier, for the purpose of retaining comparability of data, concepts and definitions used in 1981 census were adopted for the 1991 census also in toto. However, in order to ensure that the work performed in farm and in family enterprises not necessarily paid in cash or kind would not go unnoticed and to constantly remind the enumerators of the necessity to enquire and net all such activities, the words "including unpaid work on farm or family enterprise" had been included in the individual Slip as part of the Qn. 14A. Special emphasis also had been made in the instructions issued to the enumeration personnel to net all persons, especially women and children as most of whom are engaged in unpaid work in farm and in family enterprises. Besides, publicity measure such as the distribution of special posters and telecasting on the national network a documentary supplied by the United Nations Development Fund for Women (UNIFEM) were also undertaken to sensitise the enumerators and the respondents. Better awareness among the respondents and a better canvassing by the enumerators might have resulted in the classification of more females as workers in 1991.

A look at the percentage growth of workers during 1981-91 would reveal that besides the growth rate for female marginal workers, the growth rates recorded by the female workers in Industrial Categories I, II, V(b), VII and IX also are considerably higher than those for male workers in the respective categories. Thus, special efforts made, referred to earlier, to net female workers appear to have paid dividends, since the activities related to these categories are such where female participation is expected to be generally more.

It may also be noticed from Statement-11, that

Industrial category V(a) has shown a decrease in number of workers from 559,710 in 1981 to 322,151 in 1991. Among both males and females also the decrease in the number of workers in industrial category V(a) may be noticed.

As explained earlier, in the 1991 census, persons working in tailoring establishments were assigned industrial category IX since in National Industrial classification (NIC), 1987, tailoring establishments come under personal services. Persons working in garment manufacturing (manufacture of all types of textile garments and clothing accessories) however were assigned industrial category V(b). Thus to some extent workers in tailoring establishments included under industrial category V : Manufacturing Processing Servicing and Repairs in 1981 are brought under industrial category IX : Other Services in 1991. Besides, there appears to be a shift in the work force engaged in Household industry sector to other than HHI sector Statement-11.1 gives the growth rate of workers among persons, males and females in categories V(a), V(b) and IX between 1981-91. It may be seen that the growth rates of workers for persons, males and females in industrial categories V(a), V(b) and IX taken together compare well with the corresponding growth rates for the total workers or total population. It may therefore be reasonably stated that there has been no fall in the total number of workers engaged in activities under these three industrial categories V(a), V(b) and IX or proportion thereof to the total population as such in 1991 as compared to 1981. A clear picture will be available about the shift from industrial category Va to V(b) and IX when NIC group level data are available in General Economic Tables.

Work Participation Rate

The proportion of total workers viz., sum total of total main workers and marginal workers expressed as percentage of total population is referred to as Work Participation Rate (WPR). This is often considered as a very crude measure since this does not take into account the age structure of the population. For making specific comparisons, the age specific WPR would be ideal. Since the distribution of the population by age is not yet available, the WPR for the total population is considered here.

As will be seen from Statement-12 the WPR at the 1991 census for the persons and females have increased while that for males has shown a slight decrease. In case of male main workers although the number at the 1991 census is comparatively higher than that in 1981, the proportion to total population is less than that in 1981. In case of male marginal workers there is a fall in actual number itself as observed earlier.

As mentioned earlier, a better coverage of the unpaid work done by the persons in farm and family enterprises may have resulted in improved WPR in case of females.

Among the 20 districts in the State it is only in Gulbarga district that WPRs for males and females, and hence, for persons have registered decrease as compared to the corresponding WPRs of the 1981 census. In Bidar and Kodagu districts the WPRs for persons and males that have decreased, while that WPR for females has increased. In the districts of Bangalore Rural, Belgaum, Bellary, Bijapur, Chitradurga, Dharwad, Raichur and Uttara Kannada the WPR for females and also that for persons are higher than those in 1981 although the WPR for males has decreased.

In the remaining 9 districts the WPRs for both males and females and hence for persons also have registered increases in varying proportions.

It may be generally said that the WPR for females has increased in both the rural and urban areas of almost all the districts, with exceptions being the urban areas of Bidar, Bijapur, Dharwad, Gulbarga, Raichur and Uttara Kannada wherein the WPR for females has decreased in 1991 as compared to that in 1981 census.

It may mentioned here that all the 9 districts referred to above wherein the WPRs for persons, males and females have increased in 1991 as compared to 1981 are situated in the southern part of the State. These are Bangalore, Chikmagalur, Dakshina Kannada, Hassan, Kolar, Mandya, Mysore, Shimoga and Tumkur.

A further perusal of Statement-12 reveals that the WPR for males has increased in the rural population of Uttara Kannada and in the urban population of Bangalore Rural, Belgaum, Bellary and Chitradurga districts. Among the 8 northern districts, it is only in 3 districts viz., Belgaum, Bellary and Uttara Kannada that the WPR for males has increased in 1991 that too either in the rural population or urban population of the district concerned as mentioned above.

Statement-12.1 gives the WPR for males for the 1981 and 1991 censuses. The districts have been presented in the descending order of the WPR of the 1991 census and for the 1981 census the ranks assigned for the districts are shown in Col.5.

Although the districts of Kodagu, Chikmagalur, Mysore and Chitradurga have retained the same ranks which they held in 1981, it may be noted from the Statement that there are considerable changes in the rankings of the WPR among the other districts at the 1981 and 1991 censuses.

Among the 9 districts which have registered increases in the WPR in 1991 over the 1981 rates, the increase varies from 0.42 to 2.91 percentage points. Bangalore district tops the list with an increase of 2.91 percentage points followed by Dakshina Kannada with 2.13 percentage points.

On the otherhand in the 11 districts where the WPR for males has decreased in 1991 the decrease varies from a meagre −0.14 percentage point in Bangalore Rural district to as high as −4.46 percentage points in Bidar district. In fact, the contiguous districts of Bidar, Gulbarga, Bijapur and Raichur are the only four districts in the State which have registered a decrease of over 3 percentage

points in the WPR in 1991 as compared to 1981.

Statement-12.2 is similar to Statement-12.1 but presents the data for females.

As already noted the WPR for females has increased in all the districts except Gulbarga. The Gulbarga district which occupied first place in 1981 among the districts with the highest WPR for females has now slipped down to 6th place and WPR has recorded decrease of –0.36 percentage points.

Among the other 19 districts the increase in WPR varies from 0.59 percentage point to 14.06 percentage points. While there are considerable changes in the relative positions of the districts at the 1981 and 1991 censuses, the districts of Kodagu, Raichur, Shimoga and Bangalore have retained the same relative positions in both 1981 and 1991 censuses.

Statement-13 presents the percentage distribution of the workers and non-workers and of main workers by industrial categories in the total, rural and urban population by sex. It may be seen from the statement that in the State as a whole the proportion of cultivators has decreased in 1991 as compared to 1981 in case of total and male populations, while there is a slight increase in case of females. In so far as the proportion of workers in the category of agricultural labourers is concerned, it may be observed that in case of both males and females this proportion has registered increases.

A consideration of the district level data of the 1981 and 1991 censuses reveals that while in all the districts, the proportion of male cultivators has decreased in 1991, the proportion of females in the category has registered increases in 17 out of the 20 districts of the State. The districts wherein the proportior of female cultivators has decreased are Chitradurga, Dakshina Kannada and Kodagu.

As in the case of the State, the proportion of male agricultural labourers to total male population has increased in all the districts except in Bangalore, Bidar, Chitradurga, Dakshina Kannada, Dharwad and Kodagu. While in case of Bangalore the proportion of male agricultural labourers has remained at the same level, in the latter districts, the proportion has decreased at the 1991 census. Likewise, the proportion of female agricultural labourers to total female population has increased in all the districts except in the two districts of Dakshina Kannada and Kodagu. In fact in these two districts- proportions of workers both in the twin categories of cultivators and agricultural labourers have decreased for both the sexes.

Another important aspect of the distribution of workers among the various Industrial Categories about which a reference has already been made is the decrease in the proportion of workers in category V(a) - Household Industry (HHI). As noted earlier, in the State as a whole, the proportion of workers of both sexes in category V(a) has decreased. At the district level however, it may be seen from Statement-13 that there are some exceptions only in respect of females. In respect of female workers in HHI, their proportion to total female population has registered a decrease in all the districts except in Bangalore Rural, Hassan, Kolar, Mandya, Mysore and Tumkur. While the proportion of female workers in HHI has remained unchanged in Hassan, the proportion has increased in case of Bangalore Rural, Kolar, Mandya, Mysore and Tumkur districts.

The fall in proportion of HHI workers in Dakshina Kannada in particular is very steep. While the proportion of male HHI workers to total male population has decreased from 3.21 per cent in 1981 to 0.63 per cent in 1991, the proportion of female HHI workers to total female population has decreased from 9.52 per cent to 0.28 per cent.

It may not be out of place to mention here that in 1981, the district of Daksnina Kannada accounted for the highest number of Household Industry workers among the districts of the State or in other words over 50 per cent of the female HHI workers of the State were enumerated in Dakshina Kannada district. Further, most of the HHI workers particularly among females were engaged in Bidi manufacturing. The drastic fall in HHI workers in 1991 in this district is a significant change, particularly in the light of the almost corresponding increase in the proportion of workers in Non-HHI. The extent of the shift or fall in the number of HHI workers can be ascertained when the group level data on NIC are available.

Statement-14 presents the percentage of workers in each industrial category to the total main workers by sex. As will be seen from this statement, among both the sexes, the industrial categories of Cultivators and Agricultural Labourers together account for the largest proportion of workers in the State as a whole. While cultivators and agricultural labourers together account for 58.12 per cent of total male workers, they account for 75.41 per cent of total female main workers. However, among male workers cultivators account for the largest share of 37.67 per cent as compared to 20.45 per cent of agricultural labourers. On the otherhand among females nearly 50 per cent of workers are agricultural labourers as compared to 25.72 per cent of cultivators.

The cultivation as defined in the census, still forms the important sector of economy employing the largest proportion of work force (cultivators and agricultural labourers taken together) both among males and females in the State as a whole and in 17 of the 20 districts. The three districts where cultivation in terms of the work force engaged in not prominent are the districts of Bangalore, Dakshina Kannada and Kodagu.

Bangalore is the highly industrialised district in the State besides being the administrative capital of the State and a business centre. Thus a large proportion of workers are found in industrial categories V(b), VII and IX. Kodagu is the main producer of coffee in the Country and thus the plantation activity in this district takes precedence over the cultivation. The workers in category III in this district account for 38.87 per cent while those in category I and II together account for 34.98 per cent. In Dakshina Kannada the proportion of workers in category I and II

together account for 35.80 per cent as here too as in case of Bangalore district, the industry, trade and commerce and the services account for a sizeable proportion of workers.

Besides Kodagu, the districts which have a large proportion of workers in category III are Chikmagalur, Dakshina Kannada, Hassan and Uttara Kannada. Large tracts of land in certain parts of the districts of Chikmagalur and Hassan are under coffee plantations, as in case of Kodagu, resulting in deployment of large number of workers in coffee plantations. In case of the districts of Dakshina Kannada and Uttara Kannada the only two districts in category III is significantly high due to the large number of workers engaged in coastal fishing and plantations such as arecanuts etc.

In the State as a whole, workers enganged in activities under industrial categories V(b), VII and IX account for a sizeable proportion though not in the same magnitude as of categories I and II. As indicated earlier, the districts of Bangalore and Dakshina Kannada have considerably higher proportion of workers in industrial category V(b) (30.08 per cent and 28.14 per cent respectively) than at the State level. The workers engaged in Trade and Commerce i.e. category VII, account for a higher proportion of workers than at the State level in the districts of Bangalore, Chitradurga, Dakshina Kannada, Dharwad and Uttara Kannada. In fact Bangalore among the 20 districts of the State is unique in the sense that nearly 85 per cent of its workers are engaged in activities other than that in Primary Sector (i.e., industrial categories I, II, III and IV).

The proportion of female workers in each of the industrial categories to total female main workers is less than the corresponding proportions for males with the exception of categories II and V(a) in the State as a whole. A consideration of the data at the district level reveals that the proportion of female workers in category II is connsiderably higher than the corresponding proportion for males in all the districts. However the proportion of female workers in HHI- V(a) to total female main workers is more than the corresponding proportion for males in only 11 of the 20 districts of State.

It may be observed from the Statement-14, that the proportion of female workers in certain other industrial categories too exceeds corresponding proportions for male workers in some of the districts. The districts and the industrial categories (other than category II) in case of which the proportions of female workers exceed those for the males are the following:

Bangalore - I, III, IV, V(a) and IX, Bangalore Rural - V(a), Bellary - V(a), Chikmagalur - III and V(a), Chitradurga - V(a), Dakshina Kannada - V(b), Dharwad- V(a), Hassan - III and V(a), Kodagu - III and IV, Kolar - V(a), Mandya - IV and V(a), Mysore- V(a), Shimoga - IV, Tumkur - V(a) and Uttara Kannada - IX.

A comparison of the proportions of the male and female workers in the various industrial categories to the respective total main workers may not provide a satisfactory picture in so far as the work participation is concerned as the actual number of total female main workers itself is less than the number of total male main workers.

A study of sex ratios among the population, total workers, total main workers and the industrial categories, in addition, may present some interesting facts.

Statement-15 presents the sex ratio for the total population, total workers, total main workers, marginal workers and non-workers besides the industrial categories of the main workers, for total, rural and urban population of the State and districts. The sex ratios for the various characteristics of the total population of the State have been presented in Statement-11 and examined earlier.

The participation of the females in marginal work compared to males is significantly high as revealed by 4 to 5 digit sex ratios of the marginal workers. Similarly, in the State and in all the districts in both rural and urban areas for obvious reasons, the sex ratio among non-workers is highly in favour of females.

A comparison of the sex ratios of the total workers and main workers in the rural and urban areas of the State and districts reveals that the sex ratios are quite higher in the rural areas, an indication of higher work participation of females in rural areas than in the urban areas.

The cause of higher sex ratios in main workers in rural areas may be traced to the participation of more females than the males in the agricultural labour. In fact in the rural population of seven of the districts viz., Bellary, Bidar, Bijapur, Chitradurga, Gulbarga, Raichur and Tumkur, the sex ratio in industrial category II exceeds 1000. On the otherhand the female participation is the lowest as compared to males in the industrial categories of VI, VII and VIII.

STATEMENT-1

Number of households per 1000 Census houses and the number of households per Sq.Km. - 1991

	State/ District	No. of Households per 1000 Census Houses			No. of Households per Sq. Km.		
		Total	Rural	Urban	Total	Rural	Urban
	1	2	3	4	5	6	7
11	KARNATAKA	1,023	1,023	1,021	42	30	607

NOTE ON MAPS

In Karnataka, the boundaries of the CD Blocks and the revenue administrative taluks are same but the statutory towns situated within the taluk do not come under the jurisdiction of the CD Blocks. The data depicted for CD Blocks in the maps exclude data pertaining to statutory towns.

STATE PRIMARY CENSUS ABSTRACT

Note :-

The Primary Census Abstract presents data for the State, District and Community Development Block (CD Block) by total, rural and urban residence and for Urban Agglomeration (UA), city, town and outgrowths (OG). Unlike in the previous censuses, this time, the data are presented for the CD Blocks instead of Revenue Taluks. In Karnataka CD Blocks were converted into Taluk Panchayat Samithi's. However for the sake of uniformity, the term CD Block is used in the PCA. Revenue taluks and CD Blocks in Karnataka are coterminous but the latter do not include places statutorily notified under the Karnataka Municipalities Act and Karnataka Municipal Corporation Act, which are treated as 'towns' for the purposes of 1991 census. Thus, in the PCA, only non-statutory towns and outgrowths are presented under the concerned CD Blocks. However data for all the towns, cities and UAs (along with their component units) in the district are presented separately under 'Total Urban'. Thus the PCA for each district presents data say, in three distinct parts viz.,

(i) data for the district by total, rural and urban residence.

(ii) data for each of the CD Blocks in the district by total, rural and urban residence along with that for the urban units, if any, belonging to the CD Block concerned viz., non-statutory towns and outgrowths, and

(iii) data for all the Urban units in the district and the district urban total. The non-statutory towns and OGs are presented under the CD Block also besides presenting them under the district urban as otherwise it would not be possible to associate them with the CD Block concerned. The components of UA i.e., towns and outgrowths which appear under the CD Block can be identified with the concerned UA figures for which are presented under the 'Total Urban' with the help of their location codes given under column 1 of the PCA. Further, in the Annexure to the PCA population figures for the Revenue taluks and for the urban units falling within each of the taluk are presented. This will facilitate identification of the statutory towns and CD Blocks with the taluk concerned.

Location code

The codes given under column 1 of the State PCA for various units are the code used for the computerisation of the PCA. These codes are given in the PCA for the convenience of the data users as computerised data can be accessed with these codes on the NICNET or in the data supplied by the census organisation in floppies etc.

The location codes used for various units are briefly explained below :

State

States and Union Territories which are 32 in the country are given a two digit location code from 02 to 33. Code 01 is reserved for the country. Karnataka is assigned 11.

District

This is a two digit numerical code starting from 01. The 20 districts in the state are arranged in alphabetical order and assigned location code starting from 01 and ending with 20.

CD Block

All the CD Blocks in each of the districts are arranged in alphabetical order and assigned four digit numerical location code with zeros on either side and middle two digits representing different CD Blocks. For instance, the codes for the 1st, 2nd, 3rd..... 11th etc., CD Blocks in any district are given as 0010, 0020, 0030..... 0110 etc., respectively.

TOWN /CITY/ URBAN AGGLOMERATION

1. Towns/Urban Agglomerations having population less than one lakh

(a) **Towns** : All towns having a population not exceeding one lakh in a district are arranged in alphabetical order and assigned 6 digit numerical code starting with 100000 of which 2nd and 3rd fields from left represent different towns. Thus 100000, 101000, 102000..... 110000, 111000 etc., represent 1st, 2nd, 3rd.....11th, 12th etc., towns respectively in a district.

(b) **UAs** : (i) UAs having one town and one or more outgrowths is given a location code in continuation of the code given to the last town as at (a) above, as the town and its OGs together is considered as one unit. Thus the code for such a UA which occupies say 13th place in the list of towns is 112000. The town in this UA is given 112001 while the associated outgrowths are given codes in continuation of this as 112002, 112003 and so on.

(ii) UAs having population not exceeding 1 lakh with two or more towns are assigned a 6 digit numerical code such as 200000, 210000, 220000 etc., with the 2nd digit from left indicating different UAs in the same district.

The component towns and OGs are represented by codes as follows. If the UA code is 200000 (being the first UA in the district having atleast two component towns and population not exceeding 1 lakh) the code for the first component town (and OG if any) given, is 200001 whereas the 2nd, 3rd etc., component towns are given codes as 201000, 202000 etc.,

II. Cities/UAs having population of one lakh and above

Towns with one lakh population or more in census parlance are called cities. Cities and UAs having population of one lakh or more are arranged in alphabetical order and assigned a 6 digit numerical code starting from 300000. The City/UA in a district are given codes such as 300000, 310000 etc., with the 2nd digit from left denoting 1st, 2nd etc. City/UA in the district respectively. Different components in the UA are identified by the 3rd and 4th digit from left in the UA code. Here too, if a town has OGs the town and the associated OGs together are treated as one unit. If a UA is assigned code say, for instance, 300000 being the first UA in the district, then towns (or town with OGs together) are given codes such as 300100, 300200,.....301000..etc., which represent 1st, 2nd..... 10th components respectively. Where this code represents both the town and OGs, the town and the different associated OGs are separately identified by the last 2 digits of the code from right. For instance, the first component of the UA i.e., the town and OG's together is given code 300100 and the town, the first OG, 2nd OG.....etc., of the town are assigned codes 300101., 300102, 300103..... etc., respectively.

Presentation of Units

Under column 2, the names of the State/ District /CD Block/Town /City/ UA OG are presented in the order as indicated earlier. The names of the districts formed after 1981 census are given in *Italics*. Similarly names of the places which are treated as towns as such, for the first time at the 1991 census are given in *Italics*.

The names of places which were classified as towns for the first time in 1981 census and continue as towns for the 1991 census also, are shown with an asterisk (*) on their left.

The following abbreviations given within brackets along with the names of the towns indicate the civic status of the towns.

CB	:	Cantonment Board
CMC	:	City Municipality Council
MC	:	Municipal Corporation
MP	:	Mandal Panchayat
NAC	:	Notified Area Committee
NMCT	:	Non-Municipal Census Town
SB	:	Sanitary Board
TMC	:	Town Municipal Council.

Outgrowths of the towns/cities in UA are denoted by OG given within brackets– "(OG)".

Area figures

The area figures given under column 4 against 'Total' for State and Districts are those supplied by the Survey of India. The figures for urban units are either those supplied by the concerned authorities of the towns or compiled and supplied by the Directorate of Survey, Settlement and Land Records, Government of Karnataka or compiled by the Census Directorate on the basis of the records available pertaining to the delimitation of urban units.

The CD Blocks and Revenue Taluks in Karnataka are coterminous but the former excludes the statutory towns. The total area for the CD Block is obtained by deducting the areas of the statutory towns, if any, from the total area of the taluk concerned. The area figures for the taluks are supplied by the local officers and are based on village records.

The urban area for the District or State is derived by aggregating the areas of all the respective urban units in the district concerned or the State and the 'Rural area' is obtained by subtracting the total urban area thus obtained from the Total.

Similarly, the urban area for the CD Block is obtained by aggregating the areas of all the urban units i.e. non-statutory towns, and OGs thereof. The Rural area for the CD Block is obtained by deducting the urban area from the totals.

The total area given for the district and for the CD Blocks are supplied by different sources. As such the aggregated area of all the CD Blocks and of the statutory towns will not tally with the total area for the district.

'NA' for 'Not Available' is given under column 4 if area is not available.

CHANGES IN JURISDICTION

Bangalore and Bangalore Rural Districts

A new district, namely, Bangalore Rural district was carved out of erstwhile Bangalore district after the 1981 census. The new district comprises of 8 taluks namely (i) Channapatna, (ii) Devanhalli (excluding Jala hobli), (iii) Dodballapur, (iv) Hoskote (excluding Bidarahalli hobli), (v) Kanakapura, (vi) Magadi (excluding Tavarekere hobli), (vii) Nelamangala (excluding Dasanapura hobli) and (viii) Ramanagara, all of which together with the hoblis given in parenthesis formed part of erstwhile Bangalore district. Bangalore district thus comprises only 3

taluks viz., Anekal, Bangalore North and Bangalore South now as against 11 taluks in 1981.

Jala hobli of Devanhalli Taluk and Dasanapura hobli of Nelamangala Taluk now form part of Bangalore North Taluk/CD Block. Thus, Hunasamaranahalli (OG) and Suggatta (OG) which belonged to Devanhalli (Jala hobli) and shown under Devanhalli Taluk in 1981 now appear under Bangalore North CD Block in the PCA.

Chikkabidarakallu of Dasanapura hobli of Nelamangala Taluk which was a rural unit in 1981 now appears as an OG under Bangalore North CD Block due to the said transfer.

Bidarahalli hobli of Hoskote Taluk and Tavarekere hobli of Magadi Taluk are now incorporated into Bangalore South Taluk/CD Block. Thus, Battarahalli (OG) and Medahalli (OG) and Kadugodi (NMCT) which were rural units in 1981 and belonged to Bidarahalli hobli of Hoskote Taluk in 1981 now appear under Bangalore South CD Block.

At the 1981 Census, data had been presented for "Bangalore (C) and Bangalore Development Authority". Now areas under the control of Bangalore Development Authority are treated as separate "Outgrowths". The unit shown as "Bangalore (MC)" represents the jurisdiction of Bangalore City Corporation.

Kadenahalli (P), Krishnarajapura (P) and Dyavasandra (OG) which appeared as separate units in 1981 census now form part of I.T.I. Notified Area.

Consequent on declassification of Kengeri TMC after the 1981 census, the three revenue villages comprised in the said municipal limits viz., Kengeri, Valagerehalli and Choodenapura are treated as outgrowths for the 1991 census.

Dakshina Kannada District

The following urban units of 1981 census now form part of Mangalore (MC) in Dakshina Kannada District.

(a) Towns

(1)	Mangalore	(M)
(2)	Kankanady	(P)
(3)	Derebail	(P)
(4)	Padavu	(M)
(5)	Alape	(P) and
(6)	Kavuru	(P)

(b) Outgrowths

(1)	Boloor	(OG)
(2)	Kadri	(OG)
(3)	Jeppinamogru	(OG)
(4)	Maroli	(OG) and
(5)	Bangra Kulur	(OG)

Casba Bazar and Mangalore Thota which were treated as Outgrowths of Mangalore UA at the 1981 census are now substituted by "Bengare Area", as the area covered under the nomenclature Casba Bazar and Mangalore Thota previously, do not form part of any revenue village and is locally referred to as "Bengare Area".

$ The area figure for India is 3,287,263 sq. km. which includes 78,114 sq. km under illegal occupation of Pakistan and 5,180 sq. km. illegally handed over by Pakistan to China and 37,555 sq. km. under illegal occupation of China in Ladakh district.

@ The 1991 Census could not be conducted in 33 villages of Akrani and Akkalkuwa tehsils of Dhule district of Maharashtra. The population of these villages (persons, males and females) has been obtained from secondary sources and included in the population of Maharashtra and India. However, their further details are not available.

! Excludes Arunachal Pradesh and Sikkim.

PUBLICATION PLAN

The 1991 Census tables will be published in 33 separate series of volumes for All India and for each State and Union Territory.

The publication series is as follows :

Series No.

1. INDIA

States

2.	Andhra Pradesh	3.	Arunachal Pradesh	4.	Assam
5.	Bihar	6.	Goa	7.	Gujarat
8.	Haryana	9.	Himachal Pradesh	10.	Jammu & Kashmir
11.	Karnataka	12.	Kerala	13.	Madhya Pradesh
14.	Maharashtra	15.	Manipur	16.	Meghalaya
17.	Mizoram	18.	Nagaland	19.	Orissa
20.	Punjab	21.	Rajasthan	22.	Sikkim
23.	Tamil Nadu	24.	Tripura	25.	Uttar Pradesh
26.	West Bengal				

Union Territories

27.	Andaman & Nicobar Islands	28.	Chandigarh	29.	Dadra & Nagar Haveli
30.	Daman & Diu	31.	Delhi	32.	Lakshadweep
33.	Pondicherry				

In each of these series (for all India and each State/Union Territory) the different series of tables (A Series- General Population Tables, B-Series- General Economic Tables, etc.) will be brought out as different parts. Apart from these, District Census Handbooks will be published for each district in the country. These will contain the PCA data for the district, the village and town primary census abstract and the village and town directories. The latter comprise compilations of statistics, external to census relating to the villages and towns, which in conjunction with census data will be very useful to data users.

For all India and for each State and Union Territory, the census tabulations and reports will be published according to the following plan :

Part No. and subject covered	Sub-part No., if any, and the topics covered
Part I - Administration Report (for Office use only)	Part I-A–Administration Report - Enumeration Part I-B–Administration Report - Tabulation
Part II - General Population Tables	Part II-A–General Population Tables - A Series Part II-B–Primary Census Abstract
Part III - General Economic Tables	Part III-A–B Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories. Part III-B–B Series tables of second stage which will be brought out on full count. The data relating HHI, OW, Marginal Workers and Non-workers, seeking/ available for work will be entered on full count basis.
Part IV - Social and Cultural Tables	Part IV-A–C Series tables of first stage covering age, sex and marital status, composition of population, single year age returns, educational levels, school attendance and bilingualism. Part IV-B–C Series tables covering mother tongue, religion of population and household composition.

Part V - Migration Tables	Part V -A–D Series tables of first stage covering tables based on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories. Part V-B–D Series tables of second stage covering occupational classification of migrant workers. These tables are based on full count.
Part VI - Fertility Tables	F–Series tables of first stage which will be brought out on 10% sample in respect of major States and on full count in respect of smaller States and Union Territories.
Part VII - Tables on Houses and Household Amenities	H– Series tables covering census houses and the uses of which these are put, construction material of wall, roof and floor of the census houses occupied by households, tenure status of the house occupied and number of living rooms, household size, housing facilities like drinking water, electricity and toilet available to households and the fuel used by the household for cooking. These tables will also cover tables on Scheduled Castes and Scheduled Tribes. This volume will contain analytical notes also.
Part VIII - Special Tables on Scheduled Castes and Scheduled Tribes	This part will contain SC and ST series of tables for Scheduled Castes and Scheduled Tribes respectively. The data relating to Scheduled Castes and Scheduled Tribes will be entered on full count basis in the third stage and SC/ST tables will be processed on the computer on full count. These will cover population of each Scheduled Caste/ Tribe, industrial categories of main and marginal workers, non-workers, seeking/available for work and those who never worked before, educational level, school attendance, age, sex and marital status, composition of Scheduled Castes and Scheduled Tribes. In addition to these, the fertility tables relating to SC/ST are also covered. These tables also cover for Scheduled Tribes, their composition by religion, mother tongue and bilingualism.
Part IX - Town Directory, Survey Report on Towns and villages	Part IX-A–Town Directory Part IX-B–Survey Report on selected Towns Part IX-C–Survey Report on selected villages
Part X	Ethnographic notes and special studies on Scheduled Castes and Scheduled Tribes
Part XI - Census Atlas	Union and State/Union Territory Census Atlases
Part XII - District Census Handbook	Part XII-A–Village and Town Directory Part XII-B–Village and Town wise Primary Census Abstract

The following special papers are also planned and will be published as and when they are ready as 1991 Census papers :

(a) Special studies taken up by the Directors of Census Operations
(b) Special Areas Surveys
(c) Special Tables for Standard Urban Areas
(d) Language Survey Reports
(e) Post Enumeration Check Report
(f) Age Tables
(g) Life Tables
(h) Reports on estimates of inter-censal birth and death rates using 1981-1991 life tables and age data
(i) Development of Vital Statistics in India

Besides these special papers, some monographs based on 1991 Census data on subjects of topical interest to be prepared by scholars will be brought out as 1991 Census monographs.

It is also proposed to carry out some special studies of 1991 Census data in collaboration with other organisations and the results of such studies will be published as occasional papers of the 1991 Census.

It is also proposed to disseminate census tabulations and the basic data in machine readable forms such as magnetic tapes, diskettes, floppies, etc.

The District Census Handbooks of Karnataka State will be available for sale at the Government Central Press, Bangalore. Other publications pertaining to Karnataka State will be available for sale at the Office of the Director of Census Operations, Karnataka, Kendriya Sadan, E & F Blocks, 7th Floor Koramangala, Bangalore-560034 and the Manager of Publications, Civil Lines, Delhi-54.
